Two or three years later (about 200) Tertullian assaulted heresy in a treatise even more brilliant, which, unlike the "Apologeticus", is not for his own day only but for all time. It is called "Liber de præscriptione hæreticorum". Prescription now means the right obtained to something by long usage. In Roman law the signification was wider; it meant the cutting short of a question by the refusal to hear the adversary's arguments, on the ground of an anterior point which must cut away the ground under his feet. So Tertullian deals with heresies: it is of no use to listen to their arguments or refute them, for we have a number of antecendent proofs that they cannot deserve a hearing. Heresies, he begins, must not astonish us, for they were prophesied. Heretics urge the text, "Seek and ye shall find", but this was not said to Christians; we have a rule of faith to be accepted without question. "Let curiosity give place to faith and vain glory make way for salvation", so Tertullian parodies a line of Cicero's. The heretics argue out of Scripture; but, first, we are forbidden to consort with a heretic after one rebuke has been delivered, and secondly, disputation results only in blasphemy on the one side and indignation on the other, while the listener goes away more puzzled than he came. The real question is, "To whom does the Faith belong? Whose are the Scriptures? By whom, through whom, when and to whom has been handed down the discipline by which we are Christians? The answer is plain: Christ sent His apostles, who founded churches in each city, from which the others have borrowed the tradition of the Faith and the seed of doctrine and daily borrow in order to become churches; so that they also are Apostolic in that they are the offspring of the Apostolic churches. All are that one Church which the Apostles founded, so long as peace and intercommunion are observed [*dum est illis communicatio pacis et appellatio fraternitatis et contesseratio hospitalitatis*]. Therefore the testimony to the truth is this: We communicate with the apostolic Churches". The heretics will reply that the Apostles did not know all the truth. Could anything be unknown to Peter, who was called the rock on which the Church was to be built? or to John, who lay on the Lord's breast? But they will say, the churches have erred. Some indeed went wrong, and were corrected by the Apostle; though for others he had nothing but praise. "But let us admit that all have erred:—is it credible that all these great churches should have strayed into the same faith"? Admitting this absurdity, then all the baptisms, spiritual gifts, miracles, martyrdoms, were in vain until Marcion and Valentinus appeared at last! Truth will be younger than error; for both these heresiarchs are of yesterday, and were still Catholics at Rome in the episcopate of Eleutherius (this name is a slip or a false reading). Anyhow the heresies are at best novelties, and have no continuity with the teaching of Christ. Perhaps some heretics may claim Apostolic antiquity: we reply: Let them publish the origins of their churches and unroll the catalogue of their bishops till now from the Apostles or from some bishop appointed by the Apostles, as the Smyrnæans count from Polycarp and John, and the Romans from Clement and Peter; let heretics invent something to match this. Why, their errors were denounced by the Apostles long ago. Finally (36), he names some Apostolic churches, pointing above all to Rome, whose witness is nearest at hand,—happy Church, in which the Apostles poured out their whole teaching with their blood, where Peter suffered a death like his Master's, where Paul was crowned with an end like the Baptist's, where John was plunged into fiery oil without hurt! The Roman Rule of Faith is summarized, no doubt from the old Roman Creed, the same as our present Apostles' Creed but for a few small additions in the latter; much the same summary was given in chapter xiii, and is found also in "De virginibus velandis" (chapter i). Tertullian evidently avoids giving the exact words, which would be taught only to catechumens shortly before baptism. The whole luminous argument is founded on the first chapters of St. Irenæus's third book, but its forceful exposition is not more Tertullian's own than its exhaustive and compelling logic. Never did he show himself less violent and less obscure. The appeal to the Apostolic churches was unanswerable in his day; the rest of his argument is still valid.

A series of short works addressed to catechumens belong also to Tertullian's Catholic days, and fall between 200 and 206. "De spectaculis" explains and probably exaggerates the impossibility for a Christian to attend any heathen shows, even races or theatrical performances, without either wounding his faith by participation in idolatry or arousing his passions. "De idololatria" is by some placed at a later date, but it is anyhow closely connected with the former work. It explains that the making of idols is forbidden, and similarly astrology, selling of incense, etc. A schoolmaster cannot elude contamination. A Christian cannot be a soldier. To the question, "How am I then to live?", Tertullian replies that faith fears not famine; for the Faith we must give up our life, how much more our living? "De baptismo" is an instruction on the necessity of baptism and on its effects; it is directed against a female teacher of error belonging to the sect of Gaius (perhaps the Anti-Montanist). We learn that baptism was conferred regularly by the bishop, but with his consent could be administered by priests, deacons, or even laymen. The proper times were Easter and Pentecost. Preparation was made by fasting, vigils, and prayers. Confirmation was conferred immediately after by unction and laying on of hands. "De pænitentia" will be mentioned later. "De oratione" contains an exposition of the Lord's Prayer, *totius evangelii breviarium*. "De cultu feminarum" is an instruction on modesty and plainness in dress; Tertullian enjoys detailing the extravagances of female toilet and ridiculing them. Besides these didactic works to catechumens, Tertullian wrote at the same period two books, "Ad uxorem", in the former of which he begs his wife not to marry again after his death, as it is not proper for a Christian, while in the second book he enjoins upon her at least to marry a Christian if she does marry, for pagans must not be consorted with. A little book on patience is touching, for the writer admits that it is an impudence in him to discourse on a virtue in which he is so conspicuously lacking. A book against the Jews contains some curious chronology, used to prove the fulfilment of Daniel's prophecy of the seventy weeks. The latter half of the book is nearly identical with part of the third book against Marcion. It would seem that Tertullian used over again what he had written in the earliest form of that work, which dates from this time. "Adversus Hermogenem" is against a certain Hermogenes, a painter (of idols?) who taught that God created the world out of pre-existing matter. Tertullian reduces his view *ad absurdum*, and establishes the creation out of nothing both from Scripture and reason.

The next period of Tertullian's literary activity shows distinct evidence of Montanist opinions, but he has not yet openly broken with the Church, which had not as yet condemned the new prophecy. Montanus and the prophetesses Priscilla and Maximilla had been long dead when Tertullian was converted to belief in their inspiration. He held the words of Montanus to be really those of the Paraclete, and he characteristically exaggerated their import. We find him henceforth lapsing into rigorism, and condemning absolutely second marriage and forgiveness of certain sins, and insisting on new fasts. His teaching had always been excessive in its severity; now he positively revels in harshness. Harnack and d'Alès look upon "De Virginibus velandis" as the first work of this time, though it has been placed later by Monceaux and others on account of its irritated tone. We learn that Carthage was divided by a dispute whether virgins should be veiled; Tertullian and the pro-Montanist party stood for the affirmative. The book had been preceded by a Greek writing on the same subject. Tertullian declares that the Rule of Faith is unchangeable, but discipline is progressive. He quotes a dream in favour of the veil. The date may be about 206. Shortly afterwards Tertullian published his largest extant work, five books against Marcion. A first draft had been written much earlier; a second recension had been published, when yet unfinished, without the writer's consent; the first book of the final edition was finished in the fifteenth year of Severus, 207. The last book may be a few years later. This controversy is most important for our knowledge of Marcion's doctrine. The refutation of it out of his own New Testament, which consisted of St. Luke's Gospel and St. Paul's Epistles, enables us to reconstitute much of the heretic's Scripture text. The result may be seen in Zahn's, "Geschichte des N. T. Kanons", II, 455–524. A work against the Valentinians followed. It is mainly based on the first book of St. Irenæus.

In 209 the little book "De pallio" appeared. Tertullian had excited remark by adopting the Greek pallium, the recognized dress of philosophers, and he defends his conduct in a witty pamphlet. A long book, "De anima", gives Tertullian's psychology. He well describes the unity of the soul; he teaches that it is spiritual, but immateriality in the fullest sense he admits for nothing that exists,—even God is *corpus.* Two works are against the docetism of the Gnostics, "De carne Christi" and "De resurrectione carnis". Here he emphasizes the reality of Christ's Body and His virgin-birth, and teaches a corporal resurrection. But he seems to deny the virginity of Mary, the Mother of Christ, *in partu,* though he affirms it *ante partum.* He addressed to a convert who was a widower an exhortation to avoid second marriage, which is equivalent to fornication. This work, "De exhortatione castitatis", implies that the writer is not yet separated from the Church. The same excessive rigour appears in the "De corona", in which Tertullian defends a soldier who had refused to wear a chaplet on his head when he received the donative granted to the army on the accession of Caracalla and Geta in 211. The man had been degraded and imprisoned. Many Christians thought his action extravagant, and refused to regard him as a martyr. Tertullian not only declares that to wear the crown would have been idolatry, but argues that no Christian can be a soldier without compromising his faith. Next in order is the "Scorpiace", or antidote to the bite of the Scorpion, directed against the teaching of the Valentinians that God cannot approve of martyrdom, since He does not want man's death; they even permitted the external act of idolatry. Tertullian shows that God desires the courage of the martyrs and their victory over temptation; he proves from Scripture the duty of suffering death for the Faith and the great promises attached to this heroism. To the year 212 belongs the open letter "Ad scapulam", addressed to the proconsul of Africa who was renewing the persecution, which had ceased since 203. He is solemnly warned of the retribution which overtakes persecutors.

The formal secession of Tertullian from the Church of Carthage seems to have taken place either in 211 or at the end of 212 at latest. The earlier date is fixed by Harnack on account of the close connexion between the "De corona" of 211 with the "De fuga", which must, he thinks, have immediately followed the "De corona". It is certain that "De fuga in persecutione" was written after the secession. It condemns flight in time of persecution, for God's providence has intended the suffering. This intolerable doctrine had not been held by Tertullian in his Catholic days. He now terms the Catholics "Psychici", as opposed to the "spiritual" Montanists. The cause of his schism is not mentioned. It is unlikely that he left the Church by his own act. Rather it would seem that when the Montanist prophecies were finally disapproved at Rome, the Church of Carthage excommunicated at least the more violent among their adherents. After "De fuga" come "De monogamia" (in which the wickedness of second marriage is yet more severely censured) and "De jejunio", a defence of the Montanist fasts. A dogmatic work, "Adversus Praxean", is of great importance. Praxeas had prevented, according to Tertullian, the recognition of the Montanist prophecy by the pope; Tertullian attacks him as a Monarchian, and develops his own doctrine of the Holy Trinity (see MONARCHIANS and PRAXEAS). The last remaining work of the passionate schismatic is apparently "De pudicitia", if it is a protest, as is generally held, against a Decree of Pope Callistus, in which the pardon of adulterers and fornicators, after due penance done, was published at the intercession of the martyrs. Monceaux, however, still supports the view which was once commoner than it now is, that the Decree in question was issued by a bishop of Carthage. In any case Tertullian's attribution of it to a would-be *episcopus episcoporum* and *pontifex maximus* merely attests its peremptory character. The identification of this Decree with the far wider relaxation of discipline with which Hippolytus reproaches Callistus is uncertain.

The argument of Tertullian must be considered in some detail, since his witness to the ancient system of penance is of first-rate importance. As a Catholic, he addressed "De pænitentia" to catechumens as an exhortation to repentance previous to baptism. Besides that sacrament he mentions, with an expression of unwillingness, a "last hope", a second plank of salvation, after which there is no other. This is the severe remedy of exomologesis, confession, involving a long penance in sackcloth and ashes for the remission of post-baptismal sin. In the "De pudicitia" the Montanist now declared that there is no forgiveness for the gravest sins, precisely those for which exomologesis is necessary. It is said by some modern critics, such as Funk and Turmel among Catholics, that Tertullian did not really change his view on this point between the writing of the two treatises. It is pointed out that in "De pænitentia" there is no mention of the restoration of the penitent to communion; he is to do penance, but with no hope of pardon in this life; no sacrament is administered, and the satisfaction is lifelong. This view is impossible. Tertullian declares in "De pud." that he has changed his mind and expects to be taunted for his inconsistency. He implies that he used to hold such a relaxation, as the one he is attacking, to be lawful. At any rate in the "De pæn." he parallels baptism with exomologesis, and supposes that the latter has the same effect as the former, obviously the forgiveness of sin in this life. Communion is never mentioned, since catechumens are addressed; but if exomologesis did not eventually restore all Christian privileges, there could be no reason for fearing that the mention of it should act as an encouragement to sin, for a lifelong penance would hardly be a reassuring prospect. No length is mentioned, evidently because the duration depended on the nature of the sin and the judgment of the bishop; had death been the term, this would have been emphatically expressed. Finally, and this is conclusive, it could not be insisted on that no second penance was ever allowed, if all penance was lifelong.

For the full understanding of Tertullian's doctrine we must know his division of sins into three classes. There are first the terrible crimes of idolatry, blasphemy, homicide, adultery, fornication, false witness, fraud (Adv. Marc., IV, ix; in "De pud." he substitutes apostasy for false witness and adds unnatural vice). As a Montanist he calls these irremissible. Between these and mere venial sins there are *modica* or *media* (De pud., i), less grave but yet serious sins, which he enumerates in "De pud.", xix: "Sins of daily committal, to which we are all subject; to whom indeed does it not occur to be angry without cause and after the sun has set, or to give a blow, or easily to curse, or to swear rashly, or break a contract, or lie through shame or necessity? How much we are tempted in business, in duties, in trade, in food, in sight, in hearing! So that, if there were no forgiveness for such things, none could be saved. Therefore there will be forgiveness for these sins by the prayer of Christ to the Father" (De pud., xix).

Another list (De pud., vii) represents the sins which may constitute a lost sheep, as distinguished from one that is dead: "The faithful is lost if he attend the chariot races, or gladiatorial combats, or the unclean theatre, or athletic shows, or playing, or feasts on some secular solemnity, or if he has exercised an art which in any way serves idolatry, or has lapsed without consideration into some denial or blasphemy". For these sins there is forgiveness, though the sinner has strayed from the flock. How is forgiveness obtained? We learn this only incidentally from the words: "That kind of penitence which is subsequent to faith, which can either obtain forgiveness from the bishop for lesser sins, or from God only for those which are irremissible" (ib., xviii). Thus Tertullian admits the power of the bishop for all but "irremissible" sins. The absolution which he still acknowledges for frequent sins was obviously not limited to a single occasion, but must have been frequently repeated. It is not even referred to in "De pœn.", which deals only with baptism and public penance for the gravest sins. Again, in "De pud.", Tertullian repudiates his own earlier teaching that the keys were left by Christ through Peter to His Church (Scorpiace, x); he now declares (De pud., xxi) that the gift was to Peter personally, and cannot be claimed by the Church of the Psychici. The spiritual have the right to forgive, but the Paraclete said: "The Church has the power to forgive sins, but I will not do so, lest they sin afresh."

The system of the Church of Carthage in Tertullian's time was therefore manifestly this: those who committed grievous sins confessed them to the bishop, and he absolved them after due penance enjoined and performed, unless the case was in his judgment so grave that public penance was obligatory. This public penance was only allowed once; it was for protracted periods, even sometimes until the hour of death, but at the end of it forgiveness and restoration were promised. The term was frequently shortened at the prayer of martyrs.

Of the lost works of Tertullian the most important was the defence of the Montanist manner of prophesying, "De ecstasi", in six books, with a seventh book against Apollonius. To the peculiarities of Tertullian's views which have already been explained must be added some further remarks. He did not care for philosphy: the philosophers are the "patriarchs of the heretics". His notion that all things, pure spirits and even God, must be bodies, is accounted for by his ignorance of philosophical terminology. Yet of the human soul he actually says that it was seen in a vision as tender, light, and of the colour of air! All our souls were contained in Adam, and are transmitted to us with the taint of original sin upon them,—an ingenious if gross form of traducianism. His Trinitarian teaching is inconsistent, being an amalgamation of the Roman doctrine with that of St. Justin Martyr. Tertullian has the true formula for the Holy Trinity, *tres Personæ, una Substantia*. The Father, Son, and Holy Ghost are numerically distinct, and each is God; they are of one substance, one state, and one power. So far the doctrine is accurately Nicene. But by the side of this appears the Greek view which was one day to develop into Arianism: that the unity is to be sought not in the Essence but in the origin of the Persons. He says that from all eternity there was reason (*ratio*) in God, and in reason the Word (*Sermo*), not distinct from God, but in *vulva cordis*. For the purpose of creation the Word received a perfect birth as Son. There was a time when there was no Son and no sin, when God was neither Father nor Judge. In his Christology Tertullian has had no Greek influence, and is purely Roman. Like most Latin Fathers he speaks not of two Natures but of two Substances in one Person, united without confusion, and distinct in their operations. Thus he condemns by anticipation the Nestorian, Monophysite, and Monothelite heresies. But he seems to teach that Mary, the Mother of Christ, had other children. Yet he makes her the second Eve, who by her obedience effaced the disobedience of the first Eve.

Tertullian's doctrine of the Holy Eucharist has been much discussed, especially the words: "Acceptum panem et distributum discipulis corpus suum illum fecit, hoc est corpus meum dicendo, id est, figura corporis mei". A consideration of the context shows only one interpretation to be possible. Tertullian is proving that Our Lord Himself explained bread in Jer., xi, 19 (*mittamus lignum in panem ejus*) to refer to His Body, when He said, "This is My Body", that is, that bread was the symbol of His Body. Nothing can be elicited either for or against the Real Presence; for Tertullian does not explain whether the bread is the symbol of the Body present or absent. The context suggests the former meaning. Another passage is: *Panem, quo ipsum corpus suum repræsentat*. This might mean "Bread which stands for His Body", or "Presents, makes present". D'Alès has calculated that the sense of presentation to the imagination occurs seven times in Tertullian, and the similar moral sense (presentation by picture, etc.) occurs twelve times, whereas the sense of physical presentation occurs thirty-three times. In the treatise in question against Marcion the physical sense alone is found, and fourteen times. A more direct assertion of the real presence is *Corpus ejus in pane censetur* (De orat., vi). As to the grace given, he has some beautiful expressions, such as: "Itaque petendo panem quotidianum, perpetuitatem postulamus in Christo et individuitatem a corpore ejus" (In petitioning for daily bread, we ask for perpetuity in Christ, and indivisibility from His body.—Ibid.). A famous passage on the Sacraments of Baptism, Unction, Confirmation, Orders, and Eucharist runs: "Caro abluitur ut anima maculetur; caro ungitur ut anima consecretur; caro signatur ut et anima muniatur; caro manus impositione adumbratur ut et anima spiritu illuminetur; caro corpore et sanguine Christi vescitur ut et anima de Deo saginetur" (The flesh is washed, in order that the soul may be cleansed; the flesh is anointed, that the soul may be consecrated; the flesh is signed [with the cross], that the soul, too, may be fortified; the flesh is shadowed with the imposition of hands, that the soul also may be illuminated by the Spirit; the flesh feeds on the body and blood of Christ, that the soul likewise may have its fill of God—"De res. carnis.", viii). He testifies to the practice of daily communion, and the preserving of the Holy Eucharist by private persons for this purpose. What will a heathen husband think of that which is taken by his Christian wife before all other food? "If he knows that it is Bread, will he not believe that it is simply what it is called?" This implies not merely the Real Presence, but transubstantiation. The station days were Wednesday and Friday; on what other days besides Holy Mass was offered we do not know. Some thought that Holy Communion would break their fast on Station days; Tertullian explains: "When you have received and reserved the Body of the Lord, you will have assisted at the Sacrifice and have accomplished the duty of fasting as well" (De oratione, xix). Tertullian's list of customs observed by Apostolic tradition though not in Scripture (De cor., iii) is famous: the baptismal renunciations and feeding with milk and honey, fasting Communion, offerings for the dead (Masses) on their anniversaries, no fasting or kneeling on the Lord's Day and between Easter and Pentecost, anxiety as to the falling to the ground of any crumb or drop of the Holy Eucharist, the Sign of the Cross made continually during the day.

Tertullian's canon of the Old Testament included the deuterocanonical books, since he quotes most of them. He also cites the Book of Enoch as inspired, and thinks those who rejected it were wrong. He seems also to recognize IV Esdras, and the Sibyl, though he admits that there are many sibylline forgeries. In the New Testament he knows the Four Gospels, Acts, Epistles of St. Paul, I Peter (Ad Ponticos), I John, Jude, Apocalypse. He does not know James and II Peter, but we cannot tell that he did not know II, III John. He attributes Hebrews to St. Barnabas. He rejects the "Pastor" of Hermas and says that many councils of the Psychici had also rejected it. Tertullian was learned, but careless in his historical statements. He quotes Varro and a medical writer, Soranus of Ephesus, and was evidently well read in pagan literature. He cites Irenæus, Justin, Miltiades, and Proclus. He probably knew parts of Clement of Alexandria's writings. He is the first of Latin theological writers. To some extent, how great we cannot tell, he must have invented a theological idiom and have coined new expressions. He is the first witness to the existence of a Latin Bible, though he seems frequently to have translated from the Greek Bible as he wrote. Zahn has denied that he possessed any Latin translation, but this opinion is commonly rejected, and St. Perpetua certainly had one at Carthage in 203.

JOHN CHAPMAN.

Teruel, DIOCESE OF (TUROLENSIS), suffragan of Saragossa, comprises the civil province of the same name, excepting the town of Bechí (Castellón). It is believed by some that Teruel and the ancient Turba are the same. Turba was the city whose disputes with the Saguntines gave Hannibal an excuse for attacking Saguntum and beginning the Second Punic War. According to the annals of Teruel it appears that Turba was not situated on the site of the present city of Teruel, but at its boundary [illegible]. Teruel was founded in 1176 by Sancho Sánchez Muñoz and Blasco Garcés Marcilla. It formed a separate community and was governed by the *Fuero de Sepúlveda* [illegible] 1598, when the inhabitants abjured it before the courts of Aragon, in order to come under the Government of Aragon. Jaime I received its support [illegible] the conquest of Valencia, and the standards of Teruel were the first to wave in the gateway of Serranos. In 1271 it joined in the war against Castile, invaded Huete and Cuenca, and sided with Pedro IV in his war against the "Union". In recognition of this the king visited the city in 1348 and conferred upon it the title of *exenta* (exempt). Gregory XIII at the earnest solicitations of Philip II created the diocese in 1577. The first bishop, Juan Pérez de Artieda, was elected but not consecrated; the first bishop installed was Andrés Santos, who was transferred to Saragossa in 1579. All the churches of Teruel are contemporary with its foundation, as the founders built nine churches, one, Santa María de Media Villa, in the centre, and the remaining eight in a circle following the circuit of the walls. The central church was made a collegiate church in 1423 and named the cathedral in 1577. It was originally built of brick and rubble-work, but since the restoration in the seventeenth century it has lost its primitive character. The Doric choir stalls were the gift of Martín Terrer, Bishop of Teruel, and later of Tarazona.

Ferdinand and Isabella visited Teruel in 1482, took the oath in the cathedral, and received the freedom of the city. The founding of the Inquisition in 1484 produced serious changes because the converts were numerous and powerful. The inquisitor, Juan de Solivella, was forced to leave. Property to the amount of 123,000 sueldos was confiscated and turned over to the city. The Churches of San Martín and El Salvador are remarkable for their Arabic towers. The first, Moorish in style, was built in the twelfth century. Pierre de Bedel, builder of the Arcos de Teruel (Aqueduct) and of the Mina de Daroca, repaired its foundations from 1549 to 1551. The tower of the Church of El Salvador, Moorish style of the thirteenth century, was reinforced in the nineteenth century by brick additions. In the Church of San Pedro rest the bodies of the famous "lovers of Teruel", Diego Martínez de Marcilla and Isabel de Segura. The seminary, dedicated to St. Toribio de Mogrovejo, was founded by the bishop Francisco José Rodríguez Chico, who after the expulsion of the Jesuits in 1769 was granted the use of their magnificent college by Charles III. During the wars of independence and the civil wars that followed, the building was taken over for military quarters and shortly afterwards the seminary was suppressed. It was re-established in 1849 by Don Antonio Lao y Cuevas, who gave his own palace for the purpose. The Jesuit college has since been restored to the order. The episcopal palace is in no way remarkable except perhaps for its courtyard, which has a well-proportioned Ionic colonnade. The *Casa del Capítula*, where the ecclesiastical chapter used to assemble, has an altar dedicated to the Immaculate Conception and to St. Emerentia, patroness of the city.

Among the distinguished citizens of Teruel must be mentioned Jerónimo Ripalda, S.J.; the jurisconsult Gaspar de Castellot; Miguel Jerónimo de Castellot, judge of the courts of Aragon, 1665; Fray Juan Cebrian de Perales, Bishop of Albarracín, and Juan Martínez Salafranca, Viceroy of Aragon, founder of the Academy of History.

CUADRADO, *España, sus monumentos: Aragón* (Barcelona, 1886); PRUNEDO, *Crónica general de España; Crónica de Teruel* (Madrid, 1866).

RAMÓN RUIZ AMADO.

Test Act. See OATHS, ENGLISH POST-REFORMATION.

Testament, THE OLD.—I. NAME.—The word "testament", Hebrew *berîth*, Greek διαθήκη, primarily signifies the covenant which God entered into first with Abraham, then with the people of Israel. The Prophets had knowledge of a new covenant to which the one concluded on Mount Sinai should give way. Accordingly Christ at the Last Supper speaks of the blood of the new testament. The Apostle St. Paul declares himself (II Cor., iii, 6) a minister "of the new testament", and calls (iii, 14) the covenant entered into on Mount Sinai "the old testament". The Greek expression διαθήκη is employed in the Septuagint for the Hebrew "berîth". The later interpreters Aquila and Symmachus substituted for διαθήκη the more common συνθήκη, which probably agreed more with their literary taste. The Latin term is "fœdus" and oftener "testamentum", a word corresponding more exactly to the Greek.

As regards Christian times, the expression at an early period came to signify the whole of God's Revelation as exhibited in the history of the Israelites, and because this old covenant was incorporated into the Canonical Books, it was but an easy step to make the term signify the Canonical Scriptures. Even the text referred to above (II Cor., iii, 14) points to that. So, the Scriptures are called "books of the Old Testament" by Melito of Sardis and Clement of Alexandria (τὰ παλαιὰ βιβλία; τα τῆς παλαιᾶς διαθήκης βιβλία). It is not clear whether with these authors "Old Testament" and "Scriptures of the Old Testament" mean the same. Origen shows that in his time the transition was complete, although in his writings signs of the gradual fixing of the expression may be still traced. For he repeatedly speaks of the "so-called" Old Testament, when meaning the Scriptures. With the Western writers this use of the term in the most ancient period cannot yet be proved. To the lawyer Tertullian the Sacred Books are, above all, documents and sources of argument, and he therefore frequently calls them "vetus and novum instrumentum". Cyprian once mentions the "scripturæ veteres et novæ". Subsequently the Greek use of the term becomes established among the Latins as well, and through them it has been made common property of the Christian world. In this meaning, as signifying the Canonical Scriptures of the Old Testament, the expression "Old Testament" will be used in what follows.

II. HISTORY OF THE TEXT.—The canon of the Old Testament, its manuscripts, editions and ancient versions are treated in the articles BIBLE; CANON OF THE HOLY SCRIPTURES; CODEX ALEXANDRINUS, etc.; HEBREW BIBLE; MASSORAH; MANUSCRIPTS OF THE BIBLE; VERSIONS OF THE BIBLE. Questions concerning the origin and contents of the single books are proposed and answered in articles on the respective books. This article is confined to the general introduction on the text of the parts of the Old Testament written in Hebrew; for the few books originally composed in Greek (Wisdom; II Machabees) and those of which the Semitic original has been lost (Judith; Tobias; Sirach, i. e. Ecclus.; I Machabees) call for no special treatment.

A. *Text of the Manuscripts and Massoretes.*—The sure starting-point for a correct estimation of the text of the Old Testament is the evidence obtained from the MSS. In this connexion, the first thing to observe is that however distant the oldest MSS. are—the earliest are of the ninth century A. D.—from the time when the books were composed, there is a uniform and homogeneous tradition concerning the text. The fact is all the more striking, as the history of the New Testament is quite different. We have New-Testament MSS. written not much more than 300 years after the composition of the books, and in them we find numerous differences, though but few of them are important. The textual variants in the MSS. of the Old Testament are limited to quite insignificant differences of vowels and more rarely of consonants. Even when we take into account the discrepancies between the Eastern, or Babylonian, and Western, or Palestinian schools, no essential differences are found. The proof for the agreement between the MSS. was established by B. Kennicott after comparing more than 600 MSS. ("Vetus Testamentum Hebraicum cum variis lectionibus", Oxford, 1776, 1780). De Rossi has added considerably to this material ("Variæ lectiones veteris Testamenti", Parma, 1784–88). It is obvious that this striking uniformity cannot be due to chance; it is unique in the history of text-tradition, and all the more remarkable as the imperfect Hebrew system of writing could not but occasion many and various errors and slips. Besides many peculiarities in the method of writing show themselves uniformly everywhere. False readings are retained in the same manner, so that the text is clearly the result of artificial equalization.

The question now arises: How far back can we trace this care in handing down the text to posterity? Philo, many authorities on the Talmud, and later Jewish rabbis and savants of the sixteenth and seventeenth century favoured the opinion that the Hebrew text, as it is now read in our MSS., was written down from the outset and bequeathed to us unadulterated. The works of Elias Levita, Morinus, Cappellus have shown this view to be untenable; and later investigations have established the history of the text in its essential features. The uniformity of the MSS. is ultimately the outcome of the labours of the Massoretes, which were not concluded till after the writing of the oldest MSS. The work of the Massoretes chiefly consisted in the faithful preservation of the transmitted text. This they accomplished by maintaining accurate statistics on the entire state of the Sacred Books. Verses, words, letters were counted; lists were compiled of like words and of forms of words with full and defective spelling, and possibilities of easy mistakes were catalogued. The invention of the signs for vowels and accents—about the seventh century—facilitated a faithful preservation of the text. Incorrect separation and connexion of syllables and words was henceforth all but excluded.

Textual criticism was employed by the Massoretes very moderately, and even the little they did, shows that as much as possible they left untouched all that had been handed down. If a reading proved untenable, they did not correct the text itself, but were satisfied with noting the proper reading on the margin as "Qerê" (read), in opposition to "Kethîbh" (written). Such corrections were of various kinds. They were first of all corrections of real mistakes, whether of letters or of entire words. A letter or a word in the text had, according to the note on the margin, either to be changed, or inserted, or omitted by the reader. Such were the so-called "Tiqqunê Sopherîm", corrections of the scribes. The second group of corrections consisted in changing an ambiguous word,—of such eighteen are recorded in the Massorah. In the Talmud no mention has as yet been made of them. But its compilers were aware of the "'Itturê Sopherîm", or erasures of the connecting *Waw*, which had been made in several places in opposition to the Septuagint and the Samaritan Versions. When later the Massoretes speak only of four or five instances, we must say with Ginsburg that these cases are merely recorded as typical. Cases are not rare when consideration for religious or moral feeling has led to the substitution of a more harmless euphemism for an ill-sounding word. The vowels of the expression to be read are attached to the written word of the text, whilst the consonants are noted on the margin. Well known is the ever-recurring "Qerê" Adonai instead of Jahvé; it seems to date back to the time before Christ, and probably even the first Greek interpreters were acquainted with it.

The fact that the Massoretes did not dare insert the changes described in the Sacred Text itself shows that the latter was already fixed. Other peculiarities point to the same reverence for tradition. We repeatedly find in the text a so-called inverted *Nun* (e. g., Num., x, 35–36). In Is., ix, 6, there is a final *Mêm* within the word. A *Waw* is interrupted or letters are made bigger, whilst others are placed higher up—the so-called suspended letters. Not a few of these oddities are already recorded in the Talmud, and therefore must be of great age. Letters with points are mentioned even in the "Mishna". The counting of the letters also probably belongs to the older period. Records serving for textual criticism are extant from the same time. In its essentials the work is completed with the post-Talmudic treatise "Sopherim". This treatise, which gives a careful introduction to the writing of the Sacred Text, is one of the most conclusive proofs of the scrupulosity with which at the time of its origin (not before the seventh century) the text was generally treated.

B. *Older Witnesses.*—The condition of the text previous to the age of the Massoretes is guaranteed by the "Talmud" with its notes on text-criticism and its innumerable quotations, which are, however, frequently drawn only from memory. Another help are the "Targums", or free Aramaic versions of the Sacred Books, composed from the last centuries B. C. to the fifth A. D. But the state of the text is chiefly evidenced by the Vulgate Version made by St. Jerome at the end of the fourth and the beginning of the fifth centuries. He followed the Hebrew original, and his occasional remarks on how a word was spelt or read enable us to arrive at a sure judgment on the text of the fourth century. As was to be expected from the statements of the Talmud, the consonant-text of the MSS. tallies almost in every respect with the original of St. Jerome. There appear greater discrepancies in vocalization, which is not to be wondered at, for at that time the marking of the vowels was not known. Thus the reading is necessarily often ambiguous, as the saint expressly states. His comment on Is., xxxviii, 11, shows that this statement is not only to be taken as a learned note, but that thereby the interpretation might often be influenced practically. When St. Jerome occasionally speaks of vowels, he means the quiescent or vowel letters. Nevertheless, the opinion that in the fourth century the pronunciation was still fluctuating, would be erroneous. For the saint knew how, in a definite case, an ambiguous word was to be vocalized; he appealed to the custom of the Jews standing in opposition to the interpretation of the Septuagint. A fixed pronunciation had already resulted from the practice, in vogue for centuries, of reading the Holy Writ publicly in the synagogue. There might be doubt in particular cases, but, on the whole, even the vowel-text was secured.

The letters in which the MSS. of that time were written are the "square characters", as appears from St. Jerome's remarks. This writing distinguished the final forms of the well-known five letters (Prologus galeatus), and probably supposed the separation of words which, excepting a few places, is the same as in our Massoretic Text. Sometimes the Vulgate alone seems to have preserved the correct separation in opposition to the Massoretes and the Greek Version.

The loss of Origen's hexapla is very much to be regretted. This work in its first two columns would have handed down to us both the consonant-text and the vocalization. But only a few scattered remnants of the second are left. They show that the pronunciation, especially of the proper names, in the third century disagrees not infrequently with the one used later. The alphabet at the time of Origen was the same as that of a century and a half afterwards. As regards the consonants there is little change, and the text shows no essential transformation.

We are led still further back by the Greek versions originating in the second century. The most valuable is Aquila's, as it was based upon the Hebrew text, and rendered it to the letter, with the greatest fidelity, thus enabling us to draw reliable conclusions as to the condition of the original. The work is all the more valuable, as Aquila does not care about the Greek position of words and the peculiar Greek idiom. Moreover, he consciously differs from the Septuagint, taking the then official text for his norm. Being a disciple of Rabbi Aqiba he presumably maintains the views and principles of the Jewish scribes in the beginning of the second century. The two other versions of the same period are of less importance for the critic. Theodotion depends upon the Septuagint, and Symmachus allows himself greater liberty in the treatment of the text. Of the three versions only very small fragments have come down to us. The form of the text which we gather from them is almost the one transmitted by the Massoretes; the differences naturally became more numerous, but it remains the one recension we know of from our MSS. It must, therefore, be ascribed at least to the beginning of the second century, and recent investigations in fact assign it to that period.

But that is not all. The perfect agreement of the MSS., even in their critical remarks and seemingly irrelevant and casual peculiarities, has led to the assumption that the present text not only represents a single recension, but that this recension is even built upon one archetype containing the very peculiarities that now strike us in the MSS. In favour of this hypothesis, which, since the time of Olshausen, has been defended and based upon a deeper argument especially by de Lagarde, evidence has been brought forward which seems overwhelming. Hence it is not surprising that, of late, the assertion was made that this view had long since become an admitted fact in the textual criticism of the Old Testament. Yet, however persuasive the argument appears at first sight its validity has been constantly impugned by authorities such as Kuenen, Strack, Buhl, König, and others distinguished by their knowledge of the subject. The present state of the Hebrew text is doubtless the outcome of systematic labour during the course of several centuries, but the question is whether the supposed archetype ever existed.

At the outset the very assumption that about A. D. 150 only a single copy was available for the preparation of the Bible text is so improbable as scarcely to deserve consideration. For even if during the insurrection of Bar-Cocheba a great number of Scripture rolls perished, there nevertheless existed enough of them in Egypt and Persia, so that there was no need to rely on one damaged copy. And how could this copy, the defective peculiarities of which could not have been overlooked, attain to such undisputed authority? This could have happened only if it had much greater weight than the others, for instance, for its being a temple scroll; this would imply further that there existed official texts and copies, and so the uniformity goes further back. On the supposition that it were but a private scroll, preserved merely by chance, it would be impossible to explain how the obvious mistakes were retained. Why, for instance, should all copies have a closed *Qoph*, or a letter casually made larger, or a final *Mem* within a word? Such improbabilities arise necessarily from the hypothesis of a single archetype. Is it not much more likely that the supposed mistakes are really not erroneous, but have some critical signification? For several of them a satisfactory explanation has already been given. Thus the inverted *Nun* points to the uncertainty of the respective passages: in Prov., xvi, 28, for instance, the small *Nun*, as Blau rightly conjectures, might owe its origin to a textual emendation suggested by the feeling prevalent later on. The larger letters served perhaps to mark the middle of a book. Possibly something similar may have given rise to the other peculiarities for which we cannot at present account. As long as there exists the possibility of a probable explanation, we should not make chance responsible for the condition of our text, though we do not deny that here and there chance has been at play. But the complete agreement was certainly brought about gradually. The older the witnesses, the more they differ, even though the recension remains the same. And yet it might have been expected, the more ancient they were the more uniform they should become.

Besides, if one codex had been the source of all the rest, it cannot be explained why trifling oddities were everywhere taken over faithfully, whilst the consonant-text was less cared for. If, again, in later times the differences were maintained by the Western and the Eastern schools, it is clear that the supposed codex did not possess the necessarily decisive authority.

The present text on the contrary seems to have resulted from the critical labour of the scribes from the first century B. C. to the second century A. D. Considering the reading of the Bible in the synagogue and the statements of Josephus (Contra Apionem, I, viii) and of Philo (Eusebius, "Præp. evang.", VIII, vi) on the treatment of the Scriptures, we may rightly suppose that greater changes of the text did not occur at that time. Even the words of Jesus in Matt., v, 18, about the jot and tittle not passing away, seem to point to a scrupulous care in the preservation of the very letter; and the unconditional authority of the Scripture presupposes a high opinion of the letter of Holy Writ.

How the work of the scribes was carried out in detail, we cannot ascertain. Some statements of Jewish tradition suggest that they were satisfied with superficial investigation and criticism, which, however, is all that could have been expected at a time when serious textual criticism was not even thought of. When difficulties arose, it is said that the witnesses were counted and the question decided according to numerical majority. However simple and imperfect this method was, under the circumstances an objective account of the actual state of the question was much more valuable than a series of hypotheses the claims of which we could not now examine. Nor is there any reason for supposing, with some early Christian writers, conscious changes or falsifications of the text. But we are, perhaps, justified in holding that the disputes between the Jews and Christians about the text of the Scriptures were one of the reasons why the former hastened the work of unifying and fixing the text.

The MSS. of that period probably showed little difference from those of the subsequent epoch. The consonant-text was written in a more ancient form of the square characters; the so-called final letters presumably came into use then. The Nash Papyrus (the Ten Commandments) would give some information if it were only certain that it really belongs to the first century. The question cannot be decided, as our knowledge of Hebrew writing from the first to the third century is quite imperfect. The papyrus is written in well-developed square characters, exhibits division of words throughout, and always uses the "final letters". As in the Talmud, the memory of the relatively late distinction of the double forms of the five letters is still alive, their application in Holy Writ cannot be dated back too far. Even the Massorah contains a number of phrases having final letters which are divided differently in the text and on the margin, and must, therefore, belong to a period when the distinction was not as yet in use. From the Nabatæan and Palmyrian inscriptions we learn that at the time of Christ the distinction already existed, but it does not follow that the same usage prevailed in the land west of the Jordan and, in particular, in the Sacred Books. The Palmyrian inscriptions of the first to the third century apply the final form of only one letter, viz., *Nun*, whilst the Nabatæan go beyond the Hebrew and use, though not consistently, double forms also for *Aleph* and *Hê*. The time when the Jewish copyists began to distinguish the double forms must then remain an open question. Moreover, the term "final letters" does not seem very appropriate, considering the historical development. It is not the final forms then invented, but rather the others, that seem to be the product of a new writing. For, with the single exception of *Mêm*, the so-called final forms are those of the old characters as exhibited partly at least even in the oldest inscriptions, or at any rate in use in the Aramaic papyri of the fifth century B. C.

C. *The Bible Text before Christ.*—As regards the preceding centuries, we are relatively well informed. In place of the missing MSS. we have the ancient Greek Version of the Old Testament, the so-called Septuagint, or Alexandrian, Version. The Pentateuch was translated in the first half of the third century, but it cannot be determined in what order and at what intervals the other books followed. Yet in the case of the majority of the books the work was probably completed about the middle of the second century B. C. Of primary importance for us is the question of the state of the text at the time of the translation. As the version is not the work of one man—not even the Pentateuch had only one translator—nor the work of one period, but is extended over more than a hundred years, it cannot all be judged by the same criterion. The same holds good of its Hebrew original. Some of the Old-Testament Scriptures had, at the time of the translation, existed for about a thousand years, whilst others had just been composed. Considering this historical development, we must, in judging the texts, not simply oppose the whole of the M. T. (Massoretic Text) on the one hand to the whole Septuagint on the other. Results of any practical value can be obtained only by a separate study of the different books of Holy Scripture.

The oldest, the Pentateuch, presents considerable differences from the M. T. only in Ex., xxxvi–xl, and in Num. Greater divergences appear in Sam., Jer., Job, Prov., and Daniel. The M. T. of the Books of Samuel has suffered in many places. The Greek Version often serves to correct it, though not always. In Jeremias text-tradition is very unsettled. In the Greek Version not less than 2700 words of the M. T., about an eighth part of the whole, are missing. Additions to the M. T. are inconsiderable. Some of the parts wanting in Sept. may be later additions, whilst others belong to the original text. The transpositions of the Greek text seem to be secondary. Still the order of the M. T. is not unobjectionable either, and sometimes Sept. is right in opposition to M. T. On the whole, the text of Sept. seems to be preferable to the M. T. In Job the textual problem is quite similar. The Greek text is considerably shorter than the M. T. The Greek rendering of Proverbs diverges still more from the Hebrew. Lastly, the Greek Ecclesiasticus, a translation which we must consider to have been made by the author's grandson, is altogether different from the Hebrew recension lately found. These facts prove that during the third–second century B. C. texts were circulated which manifest traces of careless treatment. But it must be remembered that translators, sometimes, may have treated the text more freely, and that even our Greek Version has not come down to us in its original form. It is hard to determine how far we may recognize the official text of the period in the present form of the Greek text. The legend of the solemn mission to Jerusalem and the deputation of the translators to Egypt cannot be treated as historical. On the other hand it is arbitrary to assume that the original of the Greek Version represents a corrupted text every time it differs from M. T. We have to distinguish various forms of the text, whether we call them recensions or not.

For a judgment on the Sept. and its original, the knowledge of the Hebrew writing then in vogue is indispensable. In the case of the Minor Prophets attempts have been made by Vollers to discover the characters employed. The Books of Samuel have been investigated by Wellhausen and Driver; Jeremias by Köhler; Ezechiel by Cornill; Job by Beer; Ecclesiasticus by Peters. Full certainty as to the characters of the Hebrew scrolls of the third–second century B. C. has not as yet been obtained. According to Jewish tradition, Esdras brought over the new (Assyrian) writing when returning from the Exile, in which script the Sacred Books were thereafter transcribed. A sudden change is improbable. It is not possible that the writing of the fourth century was quite similar to that of the Nash Papyrus or of the first-century inscriptions. The Aramaic writing of the fifth century shows an unmistakable tendency towards the latter forms, yet many letters are still closely related to the ancient alphabet: as *Bêth*, *Caph*, *Mêm*, *Samech*, *Ayin*, *Tsade*. How did this change take place? Did it pass through the Samaritan alphabet, which clearly betrays its connexion with the Phœnician? We know the Samaritan letters only after the time of Christ. The oldest inscription belongs, perhaps, to the fourth century A. D.; another, that of Nablus, to the sixth. But this writing is undoubtedly decorative, displaying care and art, and offers, therefore, no sure basis for a decision. Still there was presumably a time in which the Sacred Scriptures were written in an ancient form of the Samaritan characters which are closely related with those of the Hasmonæan coin inscription.

Others suggest the Palmyrian alphabet. Some letters, indeed, agree with the square characters; but *Ghimel*, *Hê*, *Pê*, *Tsade*, and *Qôph* differ so much that a direct relation is inadmissible. In short, considering the local nature of this artificial writing, it is hardly credible that it exerted a wider influence towards the west. The Hebrew square characters come nearer to the Nabatæan, the sphere of which is more extended and is immediately adjacent to Palestine.

As the change of the alphabet probably took place step by step, we must reckon with transition writings, the form and relation of which can perhaps be approximately determined by comparison. The Greek Version offers excellent material; its very mistakes are an inestimable help to us. For the errors in reading or writing, occasioned, or already supposed, by the original, will often find their reason and explanation in the form of the characters. A group of letters repeatedly read erroneously is a clue as to the form of the alphabet of the original. For the well-known possibilities in the square writing of confounding *Daleth* with *Rêsh*, *Yôdh* with *Waw*, *Bêth* with *Caph* do not exist in the same way in the transition writings. The interchanging of *Hê* and *Hêth*, of *Yôdh* and *Waw*, so easy with the new characters, is scarcely conceivable with the old ones; and the mistaking of *Bêth* for *Caph* is altogether excluded. *Aleph* and *Tau* on the other hand can easily be mixed up. Now in Paralipomenon, in itself recent and translated into Greek long after the Pentateuch, *Waw* and *Tau*, *Yôdh* and *Hê*, *Caph* and *Rêsh* have been mistaken for each other. This can be accounted for only if an older form of writing were employed. Hence we are compelled to suppose that the old alphabet, or a transition form like it, was in use up to the second or first century B. C. From Christ's words about the jot (Matt., v, 18) it has been concluded that *Yôdh* must have been regarded as the smallest letter; this holds good with the square characters. We know otherwise that, at the time of Christ, the new writing was all but developed; at least the inscriptions of the Benê Chezîr and of many ossuaries sufficiently testify to this. But in these inscriptions *Zayin* and *Waw* are as small as or even smaller than *Yôdh*.

In addition to the form of the characters, orthography is of importance. The unpointed consonant-text can be made essentially clearer by writing "plene", i. e. by using the so-called quiescent letters (matres lectionis). This means was often absent in the original of the Sept. In the text of the Minor Prophets *Aleph* seems not to have been written as a vowel-letter. Thus it came about that the translators and the M. T. diverge, according as they suppose the *Aleph* or not. If the vowel-letter was written, only one interpretation was possible. The same applies to the use of *Waw* and *Yôdh*. Their omission occasions mistakes on the one or other side. The liberty prevailing in this regard is expressly testified even for a much later period. But it is going too far to consider the omission of the vowel-letters as the rule commonly observed. The oldest inscriptions (Mesha, Siloah) and the whole history of Semitic writing prove that this practical device was known.

In particular cases the possibility of connecting or separating the letters differently must be considered as another source of divers interpretations. Whether the division of the words was expressed in the ancient MSS. or not cannot be shown by direct testimonies. The Mesha and Siloah inscriptions and some of the oldest Aramaic and Phœnician divide the words by a dot. The later monuments do not abide by this usage, but mark the division here and there by a little interval. This custom is universal in the Aramaic papyri from the fifth century downwards. The Hebrew fragments make no exception, and the Syriac writing applies the word-division in the earliest MSS. Therefore the conjecture that word-division was used in the old scrolls is not to be rejected at the outset. Still the intervals must have been so small that wrong connexions easily came about. Instances are not wanting, and both the Massorah and the Greek Version testify to that. Thus Gen., xlix, 19–20, is correctly divided in the Greek and in the Vulgate, whilst the M. T. erroneously carries the *Mêm*, that belongs to the end of verse 19, over to the following word "Asher". The passage, moreover, is poetical and a new stanza begins with verse 20. Hence in the archetype of our M. T. the stichic writing, known perhaps at an earlier period and used in the later MSS., was not applied.

The mistakes occurring in consequence of interchanging of letters, of wrong vocalization or connexion, show how text-corruption originated, and thus suggest ways of repairing the damaged passages. Other slips which always occur in the handing down of MSS., such as haplography, dittography, insertion of glosses, transposition, even of entire columns, must also be taken into consideration whilst estimating the text of the Sacred Books. In books or passages of poetical nature, metre, alphabetical order of verses and stanzas, and their structure, supply a means of textual emendation, which ought nevertheless, to be used with great prudence, especially where the MSS. seem disarranged.

We must, however, beware of comparing the Sept. as a unit with the Massorah. In textual criticism we must distinguish between the questions: What is the relation of the Greek Version of the Scriptures in general to the Hebrew? and, How far in a particular case may one text be corrected by the other? The Sept. may on the whole differ considerably from the M. T., and yet often clear up an obscure passage in the Hebrew, while the reverse happens just as frequently. Apart from the Sept. there is but little to assist us. The Samaritan Text throws light on the Pentateuch, at least up to the fourth century, perhaps up to the time before Esdras. Yet until the critical edition, announced a couple of years ago, appears it must remain an open question whether the Samaritan Text was not influenced by the Sept. at a later period. Regarding shorter passages, the parallel texts allow of comparison. The deviations observed in them show that changes have taken place, which betray carelessness or intentional or accidental variations. Jewish tradition tells of a restoration of the Sacred Scriptures by Esdras. Underlying this narrative may be the recollection of historical events that proved disastrous both to the political and religious life of the people of Israel and to its Sacred Books. The consequences do not everywhere manifest themselves as much as in the books of Samuel and Jeremias, for instance, but often enough are such that the application of all critical means is needed to come to a readable text. Sometimes in spite of all nothing can be done and the passage is irremediably disfigured. It will be impossible to make the M. T. agree entirely with the Sept. until we are favoured by some unexpected discoveries. However, all these discrepancies do not alter the Sacred Texts to such a degree as to affect in any way the religious content of the Old Testament.

Testament, The New.—I. Name; II. Description; III. Origin; IV. Transmission of the Text; V. Contents, History, and Doctrine.

I. Name.—Testament comes from *testamentum*, the word by which the Latin ecclesiastical writers translated the Greek διαθήκη. With the profane authors this latter term means always, one passage of Aristophanes perhaps excepted, the legal disposition a man makes of his goods for after his death. However, at an early date, the Alexandrian translators of the Scripture, known as the Septuagint, employed the word as the equivalent of the Hebrew *berith*, which means a pact, an alliance, more especially the alliance of Yahweh with Israel. In St. Paul (I Cor., xi, 25) Jesus Christ uses the words "new testament" as meaning the alliance established by Himself between God and the world, and this is called "new" as opposed to that of which Moses was the mediator. Later on, the name of testament was given to the collection of sacred texts containing the history and the doctrine of the two alliances; here again and for the same reason we meet the distinction between the Old and the New Testaments. In this meaning the expression Old Testament (ἡ παλαιὰ διαθήκη) is found for the first time in Melito of Sardis, towards the year 170. There are reasons for thinking that at this date the corresponding word "testamentum" was already in use amongst the Latins. In any case it was common in the time of Tertullian.

II. Description.—The New Testament, as usually received in the Christian Churches, is made up of twenty-seven different books attributed to eight different authors, six of whom are numbered among the Apostles (Matthew, John, Paul, James, Peter, Jude) and two among their immediate disciples (Mark, Luke). If we consider only the contents and the literary form of these writings they may be divided into historical books (Gospels and Acts), didactic books (Epistles), a prophetical book (Apocalypse). Before the name of New Testament had come into use the writers of the latter half of the second century used to say "Gospel and Apostolic writings" or simply "the Gospel and the Apostle", meaning the Apostle St. Paul. The Gospels are subdivided into two groups, those which are commonly called synoptic (Matthew, Mark, Luke), because their narratives are parallel, and the fourth Gospel (that of St. John), which to a certain extent completes the first three. They relate the life and personal teaching of Jesus Christ. The Acts of the Apostles, as is sufficiently indicated by the title, relates the preaching and the labours of the Apostles. It narrates the foundation of the Churches of Palestine and Syria only; in it mention is made of Peter, John, James, Paul, and Barnabas; afterwards, the author devotes sixteen chapters out of the twenty-eight to the missions of St. Paul to the Greco-Romans. There are thirteen Epistles of St. Paul, and perhaps fourteen, if, with the Council of Trent, we consider him the author of the Epistle to the Hebrews. They are, with the exception of this last-mentioned, addressed to particular Churches (Rom.; I, II Cor.; Gal.; Ephes.; Philip.; Colos.; I, II Thess.) or to individuals (I, II Tim.; Tit.; Philem.). The seven Epistles that follow (James; I, II Peter; I, II, III John; Jude) are called "Catholic", because most of them are addressed to the faithful in general. The Apocalypse addressed to the seven Churches of Asia Minor (Ephesus. Smyrna, Pergamus, Thyatira, Sardis, Philadelphia, Laodicea) resembles in some ways a collective letter. It contains a vision which St. John had at Patmos concerning the interior state of the above-mentioned communities, the struggle of the Church with pagan Rome, and the final destiny of the New Jerusalem.

III. Origin.—The New Testament was not written all at once. The books that compose it appeared one after another in the space of fifty years, i. e. in the second half of the first century. Written in different and distant countries and addressed to particular Churches, they took some time to spread throughout the whole of Christendom, and a much longer time to become accepted. The unification of the canon was not accomplished without much controversy (see Canon of the Holy Scriptures). Still it can be said that from the third century, or perhaps earlier, the existence of all the books that to-day form our New Testament was everywhere known, although they were not all universally admitted, at least as certainly canonical. However, uniformity existed in the West from the fourth century. The East had to await the seventh century to see an end to all doubts on the subject. In early times the questions of canonicity and authenticity were not discussed separately and independently of each other, the latter being readily brought forward as a reason for the former; but in the fourth century, the canonicity was held, especially by St. Jerome, on account of ecclesiastical prescription and, by the very fact, the authenticity of the contested books became of minor importance. We have to come down to the sixteenth century to hear the question repeated, whether the Epistle to the Hebrews was written by St. Paul, or the Epistles called Catholic were in reality composed by the Apostles whose names they bear. Some Humanists, as Erasmus and Cardinal Cajetan, revived the objections mentioned by St. Jerome, and which are based on the style of these writings. To this Luther added the inadmissibility of the doctrine, as regards the Epistle of St. James. However, it was practically the Lutherans alone who sought to diminish the traditional Canon, which the Council of Trent was to define in 1546.

It was reserved to modern times, especially to our own days, to dispute and deny the truth of the opinion received from the ancients concerning the origin of the books of the New Testament. This doubt and the negation regarding the authors had their primary cause in the religious incredulity of the eighteenth century. These witnesses to the truth of a religion no longer believed were inconvenient, if it was true that they had seen and heard what they related. Little time was needed to find, in analyzing them, indications of a later origin. The conclusions of the Tübingen school, which brought down to the second century the compositions of all the New Testament except four Epistles of St. Paul (Rom.; Gal.; I, II Cor.), was very common thirty or forty years ago, in so-called critical circles (see Dict. apolog. de la foi catholique, I, 771–6). When the crisis of militant incredulity had passed, the problem of the New Testament began to be examined more calmly, and especially more methodically. From the critical studies of the past half century we may draw the following conclusion, which is now in its general outlines admitted by all: It was a mistake to have attributed the origin of Christian literature to a later date; these texts, on the whole, date back to the second half of the first century; consequently they are the work of a generation that counted a good number of direct witnesses of the life of Jesus Christ. From stage to stage, from Strauss to Renan, from Renan to Reuss, Weizsäcker, Holtzmann, Jülicher, Weiss, and from these to Zahn, Harnack, criticism has just retraced its steps over the distance it had so inconsiderately covered under the guidance of Christian Baur. To-day it is admitted that the first Gospels were written about the year 70. The Acts can hardly be said to be later; Harnack even thinks they were composed nearer to the year 60 than to the year 70. The Epistles of St. Paul remain beyond all dispute, except those to the Ephesians and to the Hebrews, and the pastoral Epistles, about which doubts still exist. In like manner there are many who contest the Catholic Epistles; but even if the Second Epistle of Peter is delayed till towards the year 120 or 130, the Epistle of St. James is put by several at the very beginning of Christian literature, between the years 40 and 50, the earliest Epistles of St. Paul about 52 till 58.

At present the brunt of the battle rages around the writings called Johannine (the fourth Gospel, the three Epistles of John, and the Apocalypse). Were these texts written by the Apostle John, son of Zebedee, or by John the presbyter of Ephesus whom Papias mentions? There is nothing to oblige us to endorse the conclusions of radical criticisms on this subject. On the contrary, the strong testimony of tradition attributes these writings to the Apostle St. John, nor is it weakened at all by internal criteria, provided we do not lose sight of the character of the fourth Gospel —called by Clement of Alexandria "a spiritual gospel", as compared with the three others, which he styled "corporal". Theologically, we must take into consideration the recent ecclesiastical documents (Decree "Lamentabili", prop. 17, 18, and the answer of the Roman Commission for Biblical Questions, 29 May, 1907). These decisions uphold the Johannine and Apostolic origin of the fourth Gospel. Whatever may be the issue of these controversies, a Catholic will be, and that in virtue of his principles, in exceptionally favourable circumstances for accepting the just exigencies of criticism. If it be ever established that II Peter belongs to a kind of literature then common, namely the pseudepigraph, its canonicity will not on that account be compromised. Inspiration and authenticity are distinct and even separable, when no dogmatic question is involved in their union.

The question of the origin of the New Testament includes yet another literary problem, concerning the Gospels especially. Are these writings independent of one another? If one of the Evangelists did utilize the work of his predecessors how are we to suppose it happened? Was it Matthew who used Mark or vice versa? After thirty years of constant study, the question has been answered only by conjectures. Amongst these must be included the documentary theory itself, even in the form in which it is now commonly admitted, that of the "two sources". The starting-point of this theory, namely the priority of Mark and the use made of him by Matthew and Luke, although it has become a dogma in criticism for many, cannot be said to be more than a hypothesis. However disconcerting this may be, it is none the less true. None of the proposed solutions has been approved of by all scholars who are really competent in the matter, because all these solutions, while answering some of the difficulties, leave almost as many unanswered. If then we must be content with hypothesis, we ought at least to prefer the most satisfactory. The analysis of the text seems to agree fairly well with the hypothesis of two sources—Mark and Q. (i. e. Quelle, the non-Marcan document); but a conservative critic will adopt it only in so far as it is not incompatible with such data of tradition concerning the origin of the Gospels as are certain or worthy of respect.

These data may be resumed as follows. (a) The Gospels are really the work of those to whom they have been always attributed, although this attribution may perhaps be explained by a more or less mediate authorship. Thus, the Apostle St. Matthew, having written in Aramaic, did not himself put into Greek the canonical Gospel which has come down to us under his name. However, the fact of his being considered the author of this Gospel necessarily supposes that between the original Aramaic and the Greek text there is, at least, a substantial conformity. The original text of St. Matthew is certainly prior to the ruin of Jerusalem; there are even reasons for dating it earlier than the Epistles of St. Paul and consequently about the year 50. We know nothing definite of the date of its being rendered into Greek. (b) Everything seems to indicate the date of the composition of St. Mark as about the time of St. Peter's death, consequently between 60 and 70. (c) St. Luke tells us expressly that before him "many took in hand to set forth in order" the Gospel. What then was the date of his own work? About the year 70. It is to be remembered that we must not expect from the ancients the precision of our modern chronology. (d) The Johannine writings belong to the end of the first century, from the year 90 to 100 (approximately); except perhaps the Apocalypse, which some modern critics date from about the end of the reign of Nero, A. D. 68 (see GOSPEL AND GOSPELS).

IV. TRANSMISSION OF THE TEXT.—No book of ancient times has come down to us exactly as it left the hands of its author—all have been in some way altered. The material conditions under which a book was spread before the invention of printing (1440), the little care of the copyists, correctors, and glossators for the text, so different from the desire of accuracy exhibited to-day, explain sufficiently the divergences we find between various MSS. of the same work. To these causes may be added, in regard to the Scriptures, exegetical difficulties and dogmatical controversies. To exempt the sacred writings from ordinary conditions a very special providence would have been necessary, and it has not been the will of God to exercise this providence. More than 150,000 different readings have been found in the older witnesses to the text of the New Testament—which in itself is a proof that Scriptures are not the only, nor the principal, means of revelation. In the concrete order of the present economy God had only to prevent any such alteration of the sacred texts as would put the Church in the moral necessity of announcing with certainty as the word of God what in reality was only a human utterance. Let us say, however, from the start, that the substantial tenor of the sacred text has not been altered, notwithstanding the uncertainty which hangs over some more or less long and more or less important historical or dogmatical passages. Moreover—and this is very important—these alterations are not irremediable; we can at least very often, by studying the variants of the texts, eliminate the defective reading and thus re-establish the primitive text. This is the object of textual criticism.

A. *Brief History of the Textual Criticism.*—The ancients were aware of the variant readings in the text and in the versions of the New Testament; Origen, St. Jerome, and St. Augustine particularly insisted on this state of things. In every age and in diverse places efforts were made to remedy the evil; in Africa, in the time of St. Cyprian (250); in the East by means of the works of Origen (200–54); then by those of Lucian at Antioch and Hesychius at Alexandria, in the beginning of the fourth century. Later on (383) St. Jerome revised the Latin version with the aid of what he considered to be the best copies of the Greek text. Between 400 and 450 Rabbula of Edessa did the same thing for the Syriac version. In the thirteenth century the universities, the Dominicans, and the Franciscans undertook to correct the Latin text. In the fifteenth century printing lessened, although it did not completely suppress, the diversity of readings, because it spread the same type of text, viz., that which the Hellenists of the Renaissance got from the Byzantine scholars, who came in numbers to Italy, Germany, and France, after the capture of Constantinople. This text, after having been revised by Erasmus, Robert Estienne, and Théodore de Bèze, finally, in 1633, became the Elzeverian edition, which was to bear the name of the "received text". It remained the *ne varietur* text of the New Testament for Protestants up to the nineteenth century. The British and Foreign Bible Society continued to spread it until 1904. All the official Protestant versions depended on this test of Byzantine origin up to the revision of the Authorized Version of the Anglican Church, which took place in 1881.

The Catholics on their side followed the official edition of the Latin Vulgate (which is in substance the revised version of St. Jerome), published in 1592 by order of Clement VIII, and called on that account the Clementine Bible. Thus it can be said that, during two centuries at least, the New Testament was read in the West in two different forms. Which of the two was the more exact? According as the ancient MSS. of the text were discovered and edited, the critics remarked and noted the differences these MSS. presented, and also the divergences between them and the commonly received Greek text as well as the Latin Vulgate. The work of comparison and criticism that became urgent was begun, and for almost two centuries has been conducted with diligence and method by many scholars, amongst whom the following deserve a special mention: Mill (1707), Bentley (1720), Bengel (1734), Wetstein (1751), Semler (1765), Griesbach (1774), Hug (1809), Scholz (1830), both Catholics, Lachmann (1842), Tregelles (1857), Tischendorf (1869), Westcott and Hort, Abbé Martin (1883), and at present B. Weiss, H. Von Soden, R. C. Gregory.

B. *Resources of Textual Criticism.*—Never was it as easy as it is in our own days to see, consult, and control the most ancient documents concerning the New Testament. Gathered from almost everywhere they are to be found in the libraries of our big cities (Rome, Paris, London, Saint Petersburg, Cambridge, etc.), where they can be visited and consulted by everyone. These documents are the MSS. of the Greek text, the old versions and the works of ecclesiastical or other writers who have cited the New Testament. This collection of documents, daily increasing in number, has been called the *apparatus criticus*. To facilitate the use of the codices of the text and versions they have been classed and denominated by means of letters of the Hebrew, Greek, and Latin alphabets. Von Soden recently introduced another notation, which essentially consists in the distribution of all the MSS. into three groups designated respectively by the three Greek letters δ (i. e. διαθήκη, the MSS. containing the Gospels and something else as well), ε (i. e. εὐαγγέλια, the MSS. containing the Gospels only), α (i. e. ἀποστολος, the MSS. containing the Acts and the Epistles. In each series the MSS. are numbered according to their age.

(1) Manuscripts of the Text.—More than 4000 have been already catalogued and partly studied, only the minority of which contain the whole New Testament. Twenty of these texts are prior to the eighth century, a dozen are of the sixth century, five of the fifth century, and two of the fourth. On account of the number and antiquity of these documents the text of the New Testament is better established than that of our Greek and Latin classics, except Virgil, which, from a critical point of view, is almost in the same conditions. The most celebrated of these manuscripts are: B *Vaticanus*, δ 1, Rome, fourth cent.; *Sinaiticus*, δ 2, Saint Petersburg, fourth cent.; C *Ephræmus rescriptus*, δ 3, Paris, fifth cent.; A *Alexandrinus*, δ 4, London, fifth cent.; D *Cantabrigiensis* (or Codex Bezæ) δ 5, Cambridge, sixth cent.; D 2 *Claromontanus*, α 1026, Paris, sixth cent.; *Laurensis*, δ 6, Mount Athos, eighth–ninth cent.; E *Basilcensis*, ε 55, Bâle, eighth cent. To these copies of the text on parchment a dozen fragments on papyrus, recently found in Egypt, most of which go back to the fourth century, one even to the third century, must be added.

(2) Ancient Versions.—Several are derived from original texts prior to the most ancient Greek MSS. These versions are, following the order of their age, Latin, Syriac, Egyptian, Armenian, Ethiopian, Gothic, and Georgian. The first three, especially the Latin and the Syriac, are of the greatest importance. (1) Latin version.—Up to about the end of the fourth century, it was diffused in the West (Proconsular Africa, Rome, Northern Italy, and especially at Milan, in Gaul, and in Spain) in slightly different forms. The best known of these is that of St. Augustine called the "Itala", the sources of which go as far back as the second century. In 383 St. Jerome revised the Italic type after the Greek MSS., the best of which did not differ much from the text represented by the Vaticanus and the Sinaiticus. It was this revision, altered here and there by readings from the primitive Latin version and a few other more recent variants, that prevailed in the west from the sixth century under the name of Vulgate. (2) Syriac Version.—Three primitive types are represented by the Diatessaron of Tatian (second cent.), the palimpsest of Sinai, called the Lewis codex from the name of the lady who found it (third cent., perhaps from the end of the second), and the Codex of Cureton (third cent.). The Syriac Version of this primitive epoch that still survives contains only the

Gospels. Later, in the fifth century, it was revised after the Greek text. The most widespread of these revisions, which became almost the official version, is called the *Pesittâ* (Peshitto, simple, vulgate); the others are called Philoxenian (sixth cent.), Heraclean (seventh cent.), and Syro-Palestinian (sixth cent.). (3) Egyptian Version.—The best-known type is that called Bohaïric (used in the Delta from Alexandria to Memphis) and also Coptic from the generic name Copt, which is a corruption of the Greek αἴγυπτος Egyptian. It is the version of Lower Egypt and dates from the fifth century. A greater interest is attached to the version of Upper Egypt, called the Sahidic, or Theban, which is a work of the third century, perhaps even of the second. Unfortunately it is only incompletely known as yet.

These ancient versions will be considered precise and firm witnesses of the Greek text of the first three centuries only when we have critical editions of them; for they themselves are represented by copies that differ from one another. The work has been undertaken and is already fairly advanced. The primitive Latin version had been already reconstituted by the Benedictine D. Sabatier ("Bibliorum Sacrorum latinæ versiones antiquæ seu Vetus Italica", Reims, 1743, 3 vols.); the work has been taken up again and completed in the English collection "Old-Latin Biblical Texts" (1883–1911), still in course of publication. The critical edition of the Latin Vulgate published at Oxford by the Anglicans Wordsworth and White, from 1889 to 1905, gives the Gospels and the Acts. In 1907 the Benedictines received from Pius X the commission to prepare a critical edition of the Latin Bible of St. Jerome (Old and New Testament). The "Diatessaron" of Tatian is known to us by the Arabic version edited in 1888 by Mgr. Ciasca, and by the Armenian version of a commentary of St. Ephraem (which is founded on the Syriac of Tatian) translated into Latin, in 1876, by the Mechitarists Auchar and Moesinger. The recent publications of H. Von Soden have contributed to make the work of Tatian better known. Mrs. A. S. Lewis has just published a comparative edition of the Syriac palimpsest of Sinai (1910); this had been already done by F. C. Burkitt for the Cureton codex, in 1904. There exists also a critical edition of the Peshitto by G. H. Gwilliam (1901). As regards the Egyptian versions of the Gospels, the recent edition of G. Horner (1901–1911, 5 vols.) has put them at the disposition of all those who read Coptic and Sahidic. The English translation, that accompanies them, is meant for a wider circle of readers.

(3) Citations of Ecclesiastical Authors.—The text of the whole New Testament could be reconstituted by putting together all the citations found in the Fathers. It would be particularly easy for the Gospels and the important Epistles of St. Paul. From a purely critical point of view, the text of the Fathers of the first three centuries is particularly important, expecially Irenæus, Justin, Origen, Clement of Alexandria, Tertullian, Cyprian, and later on Ephraem, Cyril of Alexandria, Chrysostom, Jerome, and Augustine. Here again a preliminary step must be taken by the critic. Before pronouncing that a Father read and quoted the New Testament in this or that way, we must first be sure that the text as in its present form had not been harmonized with the reading commonly received at the time and in the country where the Father's works were edited (in print or in MSS.). The recent editions of Berlin for the Greek Fathers and of Vienna for the Latin Fathers, and especially the monographs on the citations of the New Testament in the Apostolic Fathers (Oxford Society for Historical Theology, 1905), in St. Justin (Bousset, 1891), in Tertullian (Ronsch, 1871), in Clement of Alexandria (Barnard, 1899), in St. Cyprian (von Sodon, 1909), in Origen (Hautsch, 1909), in St. Ephraem (Burkett, 1901), in Marcion (Zahn, 1890), are a valuable help in this work.

C. *Method followed.*—(1) The different readings attested for the same word were first noted, then they were classed according to their causes; involuntary variants: lapsus, homoioteleuton, itacismus, scriptio continua; voluntary variants, harmonizing of the texts, exegesis, dogmatical controversies, liturgical adaptations. This however was only an accumulation of matter for critical discussion. (2) At first, the process employed was that called individual examination. This consists in examining each case by itself, and it nearly always had as result that the reading found in most documents was considered the right one. In a few cases only the greater antiquity of certain readings prevailed over numerical superiority. Yet one witness might be right rather than a hundred others, who often depend on common sources. Even the oldest text we have, if not itself the original, may be corrupt, or derived from an unfaithful reproduction. To avoid as far as possible these occasions of error, critics were not long before giving preference to the quality rather than to the number of the documents. The guarantees of the fidelity of a copy are known by the history of the intermediate ones connecting it with the original, that is by its genealogy. The genealogical process was brought into vogue especially by two great Cambridge scholars, Westcott and Hort. By dividing the texts, versions, and Patristic citations into families, they arrived at the following conclusions:

(a) The documents of the New Testament are grouped in three families that may be called Alexandrian, Syrian, and Western. None of these is entirely free from alterations. (i) The text called Western, best represented by D, is the most altered although it was widely spread in the second and third centuries, not only in the West (primitive Latin Version, St. Irenæus, St. Hippolitus, Tertullian, St. Cyprian), but also in the East (primitive Syriac Version, Tatian, and even Clement of Alexandria). However, we find in it a certain number of original readings which it alone has preserved. (ii) The Alexandrian text is the best, this was the received text in Egypt and, to a certain extent, in Palestine. It is to be found, but adulterated, in C (at least as regards the Gospels). It is more pure in the Bohaïric Version and in St. Cyril of Alexandria. The current Alexandrian text however is not primitive. It appears to be a sub-type derived from an older and better preserved text which we have almost pure in B and ℵ. It is this text that Westcott and Hort call neutral, because it has been kept, not absolutely, but much more than all the others, free from the deforming influences which have systematically created the different types of text. The neutral text which is superior to all the others, although not perfect, is attested by Origen. Before him we have no positive testimony, but historical analogies and especially the data of internal criticism show that it must be primitive. (iii) Between the Western text and the Alexandrian text is the place of the Syrian, which was that used at Antioch in Cappadocia and at Constantinople in the time of St. John Chrysostom. It is the result of a methodical "confluence" of the Western text with that received in Egypt and Palestine towards the middle of the third century. The Syrian text must have been edited between the years 250 and 350. This type has no value for the reconstruction of the original text, as all the readings which are peculiar to it are simply alterations. As regards the Gospels, the Syrian text is found in A and E, F, G, H, K, and also in most of the Peschitto MSS., Armenian Version, and especially in St. John Chrysostom. The "received text" is the modern descendant of this Syrian text.

(b) The Latin Vulgate cannot be classed in any of these groups. It evidently depends on an eclectic text. St. Jerome revised a western text with a neutral text and another not yet determined. The whole was contaminated, before or after him, by the Syrian text. What is certain is that his revision brought the Latin version perceptibly nearer to the neutral text, that is to say to the best. As to the received text which was compiled without any really scientific method, it should be put completely aside. It differs in nearly 8000 places from the text found in the Vaticanus, which is the best text known.

(c) We must not confound a received text with the traditional text. A received text is a determined type of text used in some particular place, but never current in the whole Church. The traditional text is that which has in its favour the constant testimony of the entire Christian tradition. Considering the substance of the text, it can be said that every Church has the traditional text, for no Church was ever deprived of the substance of the Scripture (in as far as it preserved the integrity of the Canon); but, as regards textual criticism of which the object is to recover the *ipsissima verba* of the original, there is no text now existing which can be rightly called "traditional". The original text is still to be established, and that is what the editions called critical have been trying to effect for the last century.

(d) After more than a century's work are there still many doubtful readings? According to Westcott and Hort seven-eighths of the text, that is 7000 verses out of 8000, are to be considered definitely established. Still more, critical discussions can even now solve most of the contested cases, so that no serious doubts exist except concerning about one-sixtieth of the contents of the New Testament. Perhaps even the number of passages of which the authenticity has not yet had a sufficient critical demonstration does not exceed twelve, at least as regards substantial alterations. We must not forget, however, that the Cambridge critics do not include in this calculation certain longer passages considered by them as not authentic, namely the end of St. Mark (xvi, 9–20) and the episode of the adulteress (John, viii, 1–11.

(3) These conclusions of the editors of the Cambridge text have in general been accepted by the majority of scholars. Those who have written since them, for the past thirty years, B. Weiss, H. Von Soden, R. C. Gregory, have indeed proposed different classifications; but in reality they scarcely differ in their conclusions. Only in two points do they differ from Westcott and Hort. These latter have according to them given too much importance to the text of the Vaticanus and not enough to the text called Western. As regards the last-mentioned, recent discoveries have made it better known and show that it is not to be overmuch depreciated.

D. *Results.*—(1) The critical editions of the New Testament resulting from a personal study of the sources, which have appeared during the past fifty years are those of Const. Tischendorf, "Novum Testamentum græce, editio octava critica major" (1869–1872), with the Prolegomena to Tischendorf's eighth edition of C. R. Gregory, 1894; that of S. P. Tregalles, "The Greek New Testament, with the Latin version of Jerome from the cod. Amiatinus" (1857–1872), and an appendix of Dr. Hort (1879); that of B. F. Westcott and F. J. A. Hort, "The New Testament in the original Greek" (1881), with a volume of introduction edited by Hort; that of B. Weiss, "Das neue Testament" (1892–9), and a more recent edition (1902–5). H. Von Soden has published only the valuable introduction to the edition of the text, which is being prepared for the last twelve years, under the title "Die Schriften des neuen Testaments in ihrer ältesten erreichbaren Textgestalt hergestellt auf Grund ihrer Textgeschichte" (1902–10). C. R. Gregory also has announced that he is preparing a new critical edition (cf. Vorschläge für eine kritische Ausgabe des griechischen neuen Testaments, 1911).

(2) From the materials thus collected manuals have been edited. The best known to students are the following: R. F. Weymouth, whose work aims at being the resultant of the critical editions that appeared before 1886. The author usually sides with the majority. O. de Gebhart (1895) follows Tischendorf; E. Nestle (1898) (Greco-Latin) keeps in his text the reading accepted by both Tischendorf and Westcott-Hort (this ordinarily means the accord of B with N). If they do not agree, the editor generally follows Weymouth and Weiss. Since the year 1904 the British and Foreign Bible Society have substituted the text of Nestle for the received text, which it had used from the time of its establishment. Besides these Protestant texts there are three Greco-Latin editions of manuals of Catholic origin: F. Brandscheid (1893); Hetzenauer (1896); E. Bodin, who published an anonymous edition (Paris, 1911). Between the Protestant and Catholic editions there is a double difference. The latter keep in their text the sections of which the authenticity is contested (Mark xvi, 9–20; Luke xxii, 43–44; John v, 4, viii, 1–11; I John v, 7); and also in their choice of variants they pay more attention to the readings authorized by the Latin Vulgate.

V. CONTENTS OF THE NEW TESTAMENT. *History and Doctrine.*—The New Testament is the principal and almost the only source of the early history of Christianity in the first century. All the "Lives of Jesus Christ" have been composed from the Gospels. The history of the Apostles, as narrated by Renan, Farrar, Fouard, Weizsäcker, and Le Camus, is based on the Acts and the Epistles. The "Theologies of the New Testament", of which so many have been written during the nineteenth century, are a proof that we can with canonical texts build up a compact and fairly complete doctrinal system. But what is the worth of these narrations and syntheses? In what measure do they bring us in contact with the actual facts? It is the question of the historical value of the New Testament which to-day preoccupies higher criticism.

A. *History.*—Everybody agrees that the first three Gospels reflect the beliefs regarding Jesus Christ and his work current among Christians during the last quarter of the first century, that is to say at a distance of forty or fifty years from the events. Few ancient historians were in such favourable conditions. The biographers of the Cæsars (Suetonius and Tacitus) were not in a better position to get exact information. All are forced to admit, moreover, that in the Epistles of St. Paul we come into immediate contact with the mind of the most influential propagator of Christianity, and that a quarter of a century after the Ascension. The faith of the Apostle represents the form of Christian thought most victorious and most widespread in the Greco-Roman world. The writings of St. John introduce us to the troubles of the Churches after the fall of the Synagogue and the first encounter of Christianity with the violence of pagan Rome; his Gospel expresses, to say the least, the Christian attitude of that period towards Christ. The Acts inform us, at all events, what was thought in Syria and Palestine towards the year 65 of the foundation of the Church; they lay before our eyes a traveller's diary which allows us to follow St. Paul from day to day during the ten best years of his missions.

Must our knowledge stop here? Do the earliest monuments of Christian literature belong to the class of writings called "memoirs", and reveal only the impressions and the judgments of their authors? Not a single critic (meaning those who are esteemed as such) has yet ventured to underrate thus the historical worth of the New Testament taken as a whole. The ancients did not even raise the question, so evident did it seem to them that these texts narrated faithfully the history of early Christianity. What aroused the distrust of modern critics was the fancied discovery that these writings although sincere were none the less biased. Composed, as was said, by believers and for believers or, at all events, in favour of the Faith, they aim much more at rendering credible the life and teaching of Jesus than at simply relating what He did and preached. And then they say these texts contain irreconcilable contradictions which testify to uncertainty and variety in the tradition taken up by them at different stages of its development.

(1) It is agreed that the authors of the New Testament were sincere. Were they deceived? If so the writing of truthful history should, apparently, be given up altogether. They were near the events: all eye-witnesses or depending immediately on eye-witnesses. In their view the first condition to be allowed to "testify" on Gospel history was to have seen the Lord, especially the risen Lord (Acts, i, 21–22; I Cor., ix, 11; xi, 23; I John, i, 1–4; Luke, i, 1–4). These witnesses guarantee matters easy to observe and at the same time of supreme importance to their readers. The latter must have controlled assertions claiming to impose an obligation of faith and attended with considerable practical consequences; all the more so as this control was easy, since the matters were in question that had taken place in public and not "in a corner", as St. Paul says (Acts, xxvi, 26; cf. ii, 22; iii, 13–14). Besides, what reasonable hope was there to get books accepted which contained an altered form of the tradition familiar from the teaching of the Churches for more than thirty years, and cherished with all the affection that was borne to Jesus Christ in person? In this sentiment we must seek the final reason for the tenacity of ecclesiastical traditions. Finally, these texts control each other mutually. Written in different circumstances, with varying preoccupations, why do they agree in substance? For history only knows one Christ and one Gospel; and this history is based on the New Testament. Objective reality alone accounts for this agreement.

It is true that these same texts present a multitude of differences in details, but the variety and uncertainty to which that may give rise does not weaken the stability of the whole from a historical point of view. Moreover, that this is compatible with the inspiration and inerrancy of the Holy Scriptures, see INSPIRATION OF THE BIBLE. The causes of these apparent contradictions have been long since pointed out: viz., fragmentary narratives of the same events abruptly put side by side; different perspectives of the same object according as one takes a front or a side view; different expressions to mean the same thing; adaptation, not alteration, of the subject-matter according to the circumstances a feature brought into relief; documents or traditions not agreeing on all points, and which nevertheless the sacred writer has related, without claiming to guarantee them in everything or decide the question of their divergence. These are not subtleties or subterfuges invented to excuse as far as possible our Evangelists. Similar observations would be made about profane authors if there was anything to be gained by doing so. Try for example to harmonize Tacitus with himself in "Historiæ", V, iv, and V, ix. But Herodotus, Polybius, Tacitus, Livy did not narrate the history of a God come on earth to make men submit their whole life to His word. It is under the influence of naturalistic prejudice that some people easily, and as it were a priori, are opposed to the testimony of the Biblical authors. Have not recent discoveries come to show that St. Luke is a more exact historian than Flavius Josephus? It is true that the authors of the New Testament were all Christians, but to be truthful must we be indifferent towards the facts we relate? Love does not necessarily make us blind or untruthful, on the contrary it can allow us to penetrate more deeply into the knowledge of our subjects. In any case, hate exposes the historian to a greater danger of partiality; and is it possible to be without love or hate towards Christianity?

(2) These being the conditions, if the New Testament has handed on to us a counterfeit of history, the falsification must have come about at an early date, and be assignable neither to the insincerity nor the incompetence of its authors. It is the early Christian tradition on which they depend that becomes suspected in its vital sources, as if it had been formed under influences of religious instincts, which irrevocably doomed it to be mythical, legendary, or, again, idealistic, as the symbolists put it. What it transmitted to us was not so much the historical figures of Christ (in the modern acceptation of the term) as His prophetic image. The Jesus of the New Testament had become such as He might or ought to have been imagined to be by one who saw in Him the Messias. It is, doubtless, from the saying of Isaias, "Behold a virgin shall conceive", that the belief in the supernatural conception of Jesus springs—a belief which is definitely formulated in the narratives of St. Matthew and St. Luke. Such is the explanation current amongst unbelievers of to-day, and amongst an ever-increasing number of liberal Protestants. It is notoriously that of Harnack.

Avowedly or no, this way of explaining the formation of Gospel tradition has been put forward principally to account for the supernatural element with which the New Testament is permeated: the objectivity of this element is refused recognition for reasons of a philosophical order, anterior to any criticism of the text. The starting-point of this explanation is a merely speculative prejudice. To the objection that the position of Strauss became untenable the day that critics began to admit that the New Testament was a work of the first century, and therefore a witness closely following on the events, Harnack answers that twenty years or even less suffice for the formation of legends. As regards the abstract possibility of the formation of a legend that may be, but it still remains to be proved that it is possible that a legend should be formed, still more, that it should win acceptance, in the same concrete conditions as the Gospel narrative. How is it that the apocrypha never succeeded in forcing their way into the mighty current that bore the canonical writings to all the Churches, and got them accepted? Why were the oldest known to us not composed till at least a century after the events?

Furthermore, if the Gospel narrative is really an exegetical creation based on the Old Testament prophecies, how are we to explain its being what it is? There is no reference in it to texts of which the Messianic nature is patent and accepted by the Jewish schools. It is strange that the "legend" of the Magi come from the East at the summons of a star to adore the infant Jesus should have left aside completely the star of Jacob (Num., xxiv, 17) and the famous passage in Isaias, lx, 6–8. On the other hand, texts are appealed to of which the Messianism is not obvious, and which do not seem to have been commonly interpreted (then, at least) by the Jews in the same way as by the Christians. This is exactly the case with St. Matthew, ii, 15, 18, 23, and perhaps i, 23. The Evangelists represent Jesus as the popular preacher, *par excellence*, the orator of the crowd in town and country; they show Him to us whip in hand, and they put into His mouth words more stinging still addressed to the Pharisees. According to St. John (vii, 28, 37; xii, 44), He "cries out" even in the Temple. Can that trait in his physiognomy be readily explained by Isaias, xlii, 2, who had foretold of the servant of Yahweh: "He shall not cry nor have respect to person, neither shall his voice be heard abroad"? Again, "The wolf shall dwell with the lamb . . . . and the sucking child shall play on the hole of the asp" (Isaias, xi, 6–8) would have afforded material for a charming idyl, but the Evangelists have left that realism to the apocrypha and to the Millenarians. What passage of the Prophets, or even of the Jewish apocalypse, inspired the first generation of Christians with the fundamental doctrine of the transitory character of the Law; and, above all, with the prediction of the destruction of Jerusalem and its Temple? Once one admits the initial step in this theory, he is logically led to leave nothing standing in the Gospel narrative, not even the crucifixion of Jesus, nor His existence itself. Solomon Reinach actually pretends that the Passion story is merely a commentary on Psalm xxi, while Arthur Drews denies the very existence of Jesus Christ.

Another factor which contributed to the alleged distortion of the Gospel story was the necessity imposed on primitive Christianity of altering, if it were to last, the conception of the Kingdom of God preached by Jesus in person. On His lips, it is said, the Gospel was merely a cry of "*Sauve qui peut*" addressed to the world which He believed to be about to end. Such was also the persuasion of the first Christian generation. But soon it was perceived that they had to do with a world which was to last, and the teaching of the Master had to be adapted to the new condition of things. This adaptation was not achieved without much violence, done, unconsciously, it is true, to historical reality, for the need was felt of deriving from the Gospel all the ecclesiastical institutions of a more recent date. Such is the eschatological explanation propagated particularly by J. Weiss, Schweitzer, Loisy; and favourably received by Pragmatists.

It is true that it was only later that the disciples understood the significance of certain words and acts of the Master. But to try and explain all the Gospel story as the retrospect of the second Christian generation is like trying to balance a pyramid on its apex. Indeed the hypothesis, in its general application, implies a state of mind hard to reconcile with the calmness and sincerity which is readily admitted in the Evangelists and St. Paul. As for the starting-point of the theory, namely, that Christ was the dupe of an illusion about the imminent destruction of the world, it has no foundation in the text, even for one who regards Christ as a mere man, except by distinguishing two kinds of discourses (and that on the strength of the theory itself), those that are traced back to Jesus, and those that have been attributed to Him afterwards. This is what is called a vicious circle. Finally, it is false that the second Christian generation was prepossessed by the idea of tracing, *per fas et nefas*, everything—institutions and doctrines—back to Jesus in person. The first generation itself decided more than once questions of the highest importance by referring not to Jesus but to the Holy Spirit and to the authority of the Apostles. This was especially the case with the Apostolic conference at Jerusalem (Acts, xv), in which it was to be decided in what concrete observances the Gospel was to take the place of the Law. St. Paul distinguishes expressly the doctrines or the institutions that he promulgates in virtue of his Apostolic authority, from the teachings that tradition traced back to Christ (I Cor., vii, 10, 12, 25).

Again it is to be presumed that if Christian tradition had been formed under the alleged influence, and that, with such historical freedom, there would remain less apparent contradictions. The trouble taken by apologists to harmonize the texts of the New Testament is well known. If the appellation "Son of God" points out a new attitude of the Christian conscience towards Jesus Christ, why has it not simply replaced that of "Son of Man"? The survival in the Gospels of this latter expression, close by in the same texts with its equivalent (which alone showed clearly the actual faith of the Church), could only be an encumbrance; nay more, it remained as a telltale indication of the change that came—afterwards. It will be said perhaps that the evolution of popular beliefs, coming about instinctively and little by little, has nothing to do with the exigencies of a rational logic, and therefore has no coherence. Granted, but it must not be forgotten that, on the whole, the literature of the New Testament is a thoughtful, reasoned, and even apologetic work. Our adversaries can all the less deny it this character, as, according to them, the authors of the New Testament are "tendentious", that is to say, inclined more than is right to give a bias to things so as to make them acceptable.

B. *Doctrines.*—They are: (1) specifically Christian; or (2) not specifically Christian.

(1) Christianity being the normal continuation of Judaism, the New Testament must needs inherit from the Old Testament a certain number of religious doctrines concerning God, His worship the original destinies of the world, and especially of men, the moral law, spirits, etc. Although these beliefs are not specifically Christian, the New Testament develops and perfects them. (a) The attributes of God, particularly His spirituality, His immensity, His goodness, and above all His fatherhood are insisted on more fully. (b) The moral law is restored to its primitive perfection in what regards the unity and perpetuity of marriage, respect for God's name, forgiveness of injuries, and in general the duties towards one's neighbours; the guilt of the simple desire of a thing forbidden by the Law is clearly set forth; external works (prayer, almsgiving, fasting, sacrifice) really derive their worth from the dispositions of the heart that accompany them. The Messianic hope is purified from the temporal and material elements with which it had become enveloped. (d) The retributions of the world to come and the resurrection of the body are specified more clearly.

(2) Other doctrines, specifically Christian, are not added on to Judaism to develop, but rather to supersede it. In reality, between the New and Old Testaments there is a direct but not revolutionary succession as a superficial observer might be inclined to believe; just as in living beings, the imperfect state of yesterday must give way before the perfection of to-day although the one has normally prepared the other. If the mystery of the Trinity and the spiritual character of the Messianic Kingdom are ranked among the peculiarly Christian dogmas, it is because the Old Testament was of itself insufficient to establish the doctrine of the New Testament on this subject; and still more because, at the time of Jesus, the opinions current among the Jews went decidedly in the opposite direction.

(a) The Divine life common to the Three Persons (Father, Son and Holy Ghost) in the Unity of one and the same Nature is the mystery of the Trinity, obscurely typified or outlined in the Old Testament. (b) The Messias promised by the Prophets has come in the person of Jesus of Nazareth, who was not only a man powerful in word and work, but the true God Himself, the Word made man, born of a virgin, crucified under Pontius Pilate, but risen from the dead and now exalted to the right hand of His Father. (c) It was by an ignominious death on the Cross, and not by power and glory, that Jesus Christ redeemed the world from sin, death, and the anger of God; He is the Redeemer of all men (Gentiles as well as Jews) and He unites them to Himself all without distinction. (d) The Mosaic Law (rites and political theocracy) having been given only to the Jewish people, and that for a time, must disappear, as the figure before the reality. To these practices powerless in themselves Christ substitutes rites really sanctifying, especially baptism, eucharist, and penance. However the new economy is to such a degree a religion in spirit and truth, that, absolutely speaking, man can be saved, in the absence of all exterior means, by submitting himself fully to God by the faith and love of the Redeemer.

(e) Before Christ's coming, men had been treated by God as slaves or children under age are treated, but with the Gospel begins a law of love and liberty written first of all in the heart; this law does not consist merely in the letter which forbids, commands, or condemns; it is also, and chiefly, an interior grace which disposes the heart to do the will of God. (f) The Kingdom of God preached and established by Jesus Christ, though it exists already visibly in the Church, will not be perfected until the end of the world (of which no one knows the day or the hour), when He will come Himself in power and majesty to render to each one according to his works. In the meantime, the Church assisted by the Holy Spirit, governed by the Apostles and their successors under the authority of Peter, teaches and propagates the Gospel even to the ends of the earth. (g) Love of our neighbour is raised to the height of the love of God, because the Gospel makes us see God and Christ in all men since they are, or ought to be, His mystical members. When necessary, this love must be carried as far as the sacrifice of self. Such is Christ's commandment. (h) Natural morality in the Gospel is raised to a higher sphere by the counsels of perfection (poverty and chastity), which may be summed up as the positive renouncement of the material goods of this life, in so far as they hinder our being completely given up to the service of God. (i) Eternal life, which shall not be fully realized until after the resurrection of the body, consists in the possession of God, seen face to face, and of Jesus Christ.

Such are the fundamental points of Christian dogma, as expressly taught in the New Testament. They are not found collected together in any of the Canonical books, but were written throughout a period extending from the middle of the first century to the beginning of the second; and, consequently, the history of the way in which they were expressed at different times can be reconstructed. These texts never could, and were never meant to, dispense with the oral tradition which preceded them. Without this perpetual commentary they would not always have been understood and frequently would have been misunderstood.

Alfred Durand.

Testaments of the Twelve Patriarchs. See Apocrypha, subtitle II.

Testem Benevolentiæ, an Apostolic Letter of Leo XIII addressed to Cardinal Gibbons, 22 January, 1899. It opens by explaining its title, remarking that just as His Holiness had given frequent proof of his affection for the people as well as for the Church in the United States, by praising their spirit and their progress, so now the same affection prompts him to point out certain things which should be avoided or corrected, in order to set at rest controversies that were injurious to peace. Referring to the preface of the French translation of the "Life of Isaac Hecker", as the occasion of these controversies, he proposes to examine certain opinions therein advanced on the manner of leading a Christian life. The basis of these opinions is that, to make converts, the Church should adapt herself to our advanced civilization and relax her ancient rigour as regards not only the rule of life but also the deposit of faith, and should pass over or minimize certain points of doctrine, or even give them a meaning which the Church has never held. On this the Vatican Council is clear; faith is not a doctrine for speculation like a philosophical theory, to be relinquished or in any manner suppressed under any specious pretext whatsoever; such a process would alienate Catholics from the Church, instead of bringing converts. In the words of the council the Church must constantly adhere to the same doctrine in the same sense and in the same way; but the rule of Christian life admits of modifications according to diversity of time, place, or national custom, only such changes are not to depend on the will of private individuals but on the judgment of the Church. What makes the new opinions more dangerous is the pretext of those who follow them that in matters of faith and of Christian life each one should be free to follow his own bent in the spirit of the large measure of civil liberty recognized in these days. The difference between the two spheres had already been indicated in the Encyclical on the Constitution of States. The argument now adduced in favour of this new liberty is a preposterous one. When declaring the infallibility of the pope, the Vatican Council did not have in mind a situation in which, this papal prerogative acknowledged, the faithful might have a wider field of thought and action in religious matters; rather the infallibility was declared in order to provide against the special evils of our times, of license which is confounded with liberty, and the habit of thinking, saying, and printing everything regardless of truth. It was not intended to hamper real serious study or research, or to conflict with any well-ascertained truth, but only to use the authority and wisdom of the Church more effectually in protecting men against error.

Next follows a consideration of the consequences that flow from the principles and opinions just rejected. First, it is declared wrong to say that spiritual direction is less needed in our days, on the score that the Holy Ghost is now more bounteous with His gifts than in times past. The history of the Church does not warrant this view. The Holy Ghost is active in His influences and good impulses; but His promptings are not easily discerned or properly followed without external guidance. Divine Providence has so arranged that men should be saved by men, and that men should be led to loftier holiness by the direction of their fellows as in the case of Saul by the help of Ananias. The more perfect the way of life one may enter the more direction is necessary. This has been the invariable view of the Church and of those who have been remarkable for holiness. Secondly, natural virtues must not be extolled above the supernatural. The former, according to the new opinions, are more in accordance with present ways and requirements, and make men more ready and strenuous; as if nature with grace added to it were weaker than when unaided, or as if the habit of acting always with good natural motives could be sustained without grace. Even were the acts of natural virtue all they seem to be in appearance, how can they without grace become solid and enduring, or avail for the supernatural beatitude to which we are destined? Thirdly, it will not do to establish a division between the virtues and regard some as passive, others as active, and advocate the practice of the latter as more suitable for our day. There can be no really passive virtue. All virtue implies power and action, and every virtue is suitable at all times. Christ, meek and humble of heart or obedient unto death, is a model in every age, and the men who have imitated Him in these virtues have been powerful helps to religion and the State. Fourthly, the vows taken in religious orders must not be considered as narrowing the limits of true liberty, or as of little use for human society or for Christian perfection. This view is not in accord with the usage and doctrine of the Church. To assume the obligations of the counsels, in addition to those of the commandments, is not a sign of weak-mindedness, nor unprofitable, nor hurtful, nor injurious to liberty; rather it is a way to the fuller liberty by which Christ has set us free. The history of the Church, particularly in the United States, is a testimony to the alacrity and success with which the religious orders work everywhere, by preaching, teaching, and by good example. Whether in active ministration, or in contemplative seclusion, they all merit well of human society, and their prayer propitiates the majesty of God. And the congregations that do not take vows are not to magnify their manner of life above that of the religious orders. Finally, as for methods of dealing with those who are not Catholics, it is not prudent to neglect any method which has proved useful in the past. Should the proper authority approve of other methods such as, for instance, preaching, not in the church, but in any private or proper place, or by amicable conferences rather than by disputations, let this be done, provided that the men devoted to this task be men of tried knowledge and virtue.

The Letter concludes with a brief exhortation for unity, as against a spirit that would tend towards developing a national Church. The term Americanism is approved as applying to the characteristic qualities which reflect honour on the American people, or to the conditions of their commonwealths, and to the laws and customs prevailing in them; but as applied to the opinions above enumerated it would be repudiated and condemned by the Bishops of America. "If by that name be designated the characteristic qualities which reflect honour on the people of America, just as other nations have what is special to them; or, if it implies the condition of your commonwealths, or the laws and customs prevailing in them, there is no reason why we should deem that it ought to be discarded. But if it is to be used not only to signify, but even to commend the above doctrines, there can be no doubt that our venerable brethren, the bishops of America, would be the first to repudiate and condemn it, as being especially unjust to them and to the entire nation as well. For it raises the suspicion that there are some among you who conceive and desire a Church in America different from that which is in the rest of the world."

This Letter put an end to a bitter controversy which had been agitated for nearly ten years, particularly in the Catholic press. In expressing their adhesion to the Holy See and their unqualified acceptance of the teachings set forth in the Letter, the bishops of the United States made it clear that whatever departures from the same might have occurred in this country they had not been either widespread or systematic as they had been made to appear by the interpretation put upon the "Life of Father Hecker" in the preface to the French translation. (See HECKER, ISAAC THOMAS.)

CONDÉ B. PALLEN.

Test-Oath, MISSOURI.—In January, 1865, there assembled in St. Louis, Missouri, a "Constitutional Convention" composed of individuals, most of whom were unknown outside of the localities in which they claimed to reside. They had been chosen by a fraction of the voters, as people of voting age were generally in either the Confederate or Federal army, or in the guerrilla companies then abounding, or were fugitives from their homes, in order to save their lives. The "Constitution" made by this convention was put in force on July, 1865, no one being allowed to vote on it unless he first took the test oath it provided. A reign of terror, accompanied by arson, robbery, and murder, in many parts of the state followed. Certain classes of persons, including bishops, priests, or other clergymen "of any religious persuasion, sect or denomination", and teachers in any educational institution, were by the provisions of this Constitution allowed sixty days, after 4 July, 1865, in which "to take, subscribe and file", the oath prescribed by it. Those who failed to file it, and continued to preach, solemnize marriage, or teach, were subject to fine and imprisonment. The terms of the oath, according to Justice Field of the Supreme Court of the United States, required amongst other things, the affiant to deny, not only that he had ever been in armed hostility to the United States, or to the lawful authorities thereof, but that he had ever "by act or word", manifested his adherence to the cause of the enemies of the United States, foreign or domestic, or his desire for their triumph, over the arms of the United States; or his sympathy with those engaged in rebellion, or had ever harboured, or aided, any person engaged in guerrilla warfare against the loyal inhabitants of the United States. About the last of July, 1865, a pastoral letter, in Latin, of which the following is a translation, was sent by the Most Rev. Peter Richard Kenrick, Archbishop of St. Louis, to every priest in his diocese, which was then coextensive with the state.

St. Louis, July 28th, 1865.

Reverend Sir: Since under the new Constitution, a certain oath is to be exacted of Priests, that they may have leave to announce God's word, and officiate at marriage, which oath, they can in no wise take, without a sacrifice of ecclesiastical liberty, I have judged it expedient, to indicate to you my opinion in the matter, that you may have before your eyes, a rule to be followed, in this extraordinary matter. I hope, that the civil power will abstain from exacting such an oath. But, should it happen otherwise, I wish you to inform me of the particular circumstances of your position, that I may be able to give you counsel and assistance. I am, Reverend Sir,

Your servant in the Lord,
Peter Richard,
Archbishop of St. Louis.

The state officials ignored this letter, but their party newspaper organ in St. Louis referred to it, "as important in view of the large number of persons whom the Archbishop of St. Louis in one sense, may be said to represent; and further because of the fact that at least three-fourths of such persons, have, throughout the war, been disloyal men". The opposition press was almost silent.

At that time, Rev. John A. Cummings, a young priest, was in charge of St. Joseph's Church at Louisiana, Pike County, Missouri. He had not taken the oath, and he said Mass and preached as usual, on Sunday, 3 September, 1865. The court having jurisdiction of crimes committed in this county was held at Bowling Green some twelve miles distant, and convened with its accompanying grand jury on Monday, 4 September. Father Cummings was indicted by a grand jury composed of men who had taken the in-

famous oath, promptly, on the first day of the court, and the charge was, that he acted as a priest and minister of the Catholic religious persuasion without having first taken, subscribed, and filed the oath of loyalty. He was arrested a few days afterwards, and brought into court in the custody of the sheriff on the 8th. When asked to say whether he was guilty or not guilty, he declined to answer, but recited the Apostles' Creed. Hon. R. A. Campbell, subsequently lieutenant-governor of the state, then took charge of his defence at the instance of some of Father Cummings' parishioners, and made the same defense which was afterwards successful in the Supreme Court of the United States. He was tried on the 9th, found guilty, and in default of payment of a fine of $500, committed to jail, and placed in confinement with three persons of the most degraded type, charged with felonies. On 15 September, he gave bond, being directed to do so by Archbishop Kenrick, who caused an appeal to be taken to the Supreme Court of Missouri. That court had been, a few months before, reorganized by military force, and its bench filled with men committed to upholding the oath. Father Cummings' appeal was promptly denied in the following month of October, and then his case was appealed to the Supreme Court of the United States. Pending his appeal, many priests and religious were indicted and arrested; amongst others, the saintly Bishop Hogan, of the diocese of Kansas City, Missouri, yet living at the age of 82 years, then a priest at Chillicothe in Livingston County. He made the oath as odious as possible by accompanying the arresting officer to the court-house, dressed in soutane, surplice, stole, and biretta, carrying in his right hand a crucifix, and in his left a large Bible. He took a change of venue, gave bond, and was finally discharged by the effect of the decision in the Cummings case. In an address to some of his parishioners, referring to his arrest and the oath, he said: "The civil authority has been, ever from the days of Herod, the enemy of Christ. The question, now pending, is not one merely of loyalty or disloyalty, past, present, or prospective. The issue is, whether the Church shall be free or not to exercise her natural and inherent right of calling into, or rejecting from, her ministry whom she pleases; or whether, yielding to the dictation of the civil power, she shall admit those only, who, according to its judgment, are fit for the office."

In Cape Girardeau County, the fanatics did not stop with priests, but indicted eight Sisters of Loretto for teaching. Sisters Augusta and Margaret were arrested by the sheriff, but the others could not be found, and probably fled from their persecutors.

When the case of Father Cummings was heard in the Supreme Court of the United States in March, 1866, there appeared for him, David Dudley Field, Reverdy Johnson, and Montgomery Blair, all three lawyers of national reputation. Notwithstanding the sanctity of the principles involved, the Supreme Court, on 14 January, 1867, by only one majority declared the oath void, and thus relieved the priests and nuns of Missouri from further persecution. The effect of the decision in Father Cummings' case is best summarized by Justice Miller in his dissenting opinion in *ex parte* A. H. Garland (4 Wall 333) where he says of it: "In this case, the Constitution of the State of Missouri, the fundamental law of the people of that state, adopted by their popular vote, declares that no priest of any church shall exercise his ministerial functions, unless he will show, by his own oath, that he has borne a true allegiance to his government. This court now holds this constitutional provision void on the ground that the Federal Constitution forbids it". Father Cummings' health was seriously injured by his brutal treatment, and a few years afterwards he lost his mind, and died a martyr to the cause of civil and religious liberty.

Constitution of Missouri of 1865, Art. II, Sections 3, 6, 7, 9, 14; *Mo. Sup. Ct. Reports*, XXXVI–XLI, *Cummings vs. Missouri*; Vol. 71 U. S. *Sup. Ct. Reports*, LXXI, 277.

WILLIAM T. JOHNSON.

Tetzel, JOHANN, first public antagonist of Luther, b. at Pirna in Meissen, 1465; d. at Leipzig, 11 Aug., 1519. He began his studies at Leipzig during the semester of 1482–83; was promoted to the baccalaureate in 1487, being the sixth in a class of fifty-six. Not long after he entered the Dominican Order, whether at Pirna or Leipzig, cannot be established. Disaffection and friction having arisen in the Leipzig community, he went to Rome in 1497 to secure permission from Joachim Turrianus, the general of the order, to enter another monastery. In spite of a recall of this permission, he seems to have carried his point. A few years later we find him as prior of the monastery at Glogau, which belonged to the Polish province. At the request of the Polish provincial John Advocati, he was appointed inquisitor for Poland by the master-general, Cajetan. At this time he also received permission to take the necessary steps to have himself promoted to the doctorate of theology. His relations with the Leipzig convent must in the meantime have been friendly again, for not only do we find him preaching a number of times in the Dominican church at Leipzig, but after severing his relations with the Polish province he was appointed inquisitor of the Saxon province. The activity of his life and publicity of his office made him a well-known figure. In 1503 he made his first appearance as a preacher of indulgences, when the Teutonic Order of Knights in Livonia obtained permission from Alexander VI to have a jubilee indulgence for three years preached in the ecclesiastical provinces of Magdeburg, Bremen, and Riga. After the lapse of three years Julius II (22 Nov., 1506) granted a new indulgence for three additional years in the provinces of Cologne, Mainz, and Trier. At the end of 1509 he was indulgence commissary at Strasburg, and from here in 1510 he went to Nuremberg, Würzburg, and Bamberg.

From July, 1510, to April, 1516, all traces of him were lost. It was his appearance as an indulgence preacher in 1516, to aid the construction of St. Peter's at Rome (see LUTHER, vol. IX, 441), that thrust him into an undue prominence, invested him with an exaggerated importance, and branded him with an unmerited odium that only the most painstaking critical research is now slowly lifting. It was while preaching at Jüterbog, a small town outside of Saxony, not far from Wittenberg (where the indulgences were not allowed to be preached), that Luther in one of his most violent philippics in 1541 relates "many people of Wittenberg flocked after indulgences to Jüterbog" (Wider Hans Worst in "Sammtl. W.", XXVI, 50–53), and then after much hesitation nailed the ninety-five theses on indulgences on the castle church door at Wittenberg, 31 Oct., 1517. That this preaching of the indulgences was not the primary and immediate cause that precipitated the promulgation of Luther's ninety-five theses may be inferred not only from his subsequent course but also from the fact that the "Annales" of Jüterbog (Hechtius, "Vita Joannis Tezelii", Wittenberg, 1717, 53 sq.) prove that Tetzel preached there as early as 10 April; that Luther in his letter to Archbishop Albrecht (Oct. 31, 1517) admits that he entertained the thought for a long time to preach against indulgence abuses (Enders, "Dr. Martin Luther's Brief wechsel", I, Frankfort, 1884, 115); that Tetzel for several weeks had already been in the district of Brandenburg (Paulus, "Johann Tetzel", Mainz, 1899, 47).

The theses dispute between Luther and Tetzel, is handled so circumstantially in a preceding volume of THE CATHOLIC ENCYCLOPEDIA (IX, 441–442) that we need not repeat it here. The publication of Luther's "Sermon on Indulgences and Grace" was replied to by Tetzel's "Vorlegung", issued in April, 1518 (Lea, in "A History of Auricular Confession and Indulgences", III, 395, erroneously makes it *Vorlesung*), in which the scholastically-trained theologian, though not profound, scents nevertheless with keen penetration, not a mere academic tournament, but a far-reaching and momentous battle of principles, involving the very fundamentals of the Christian religion and the authority of the Church. He lays bare with extraordinary precision the unfortunate consequences that would arise. At the close of his "Vorlegung", Tetzel announces that he would presently publish "a few other principles and positions". These are the second series of theses, fifty in number, with Tetzel as author, and published in May, 1518. In these, indulgences are but lightly touched upon, the burden of the argumentation being shifted to the authority of the Church. Tetzel as yet was only a bachelor of theology. In the course of 1518 he was promoted to the doctorate, whether by the master-general or the University of Frankfort is not known. Luther's agitation having frustrated further efforts to popularize the granted indulgence of eight years, Tetzel, deserted by the public, broken in spirit, wrecked in health, retired to his monastery at Leipzig in 1518. Here in the middle of January, 1519, he had to face the bitter reproaches and unjust incriminations of Carl von Meltitz. It was at this time that Luther magnanimously penned a letter in which he tries to console him by declaring "that the agitation was not that of his [Tetzel's] creation, but that the child had an entirely different father". Tetzel died soon after, received an honourable burial, and was interred before the high altar of the Dominican church at Leipzig.

History presents few characters that have suffered more senseless misrepresentation, even bald caricature, than Tetzel. "Even while he lived stories which contained an element of legend gathered around his name, until at last, in the minds of the uncritical Protestant historians, he became typical indulgence-monger, upon whom any well-worn ancedote might be fathered" (Beard, "Martin Luther", London, 1889, 210). For a critical scholarly study which shows him in a proper perspective, he had to await the researches of our own time, mainly at the hands of Dr. Nicholas Paulus, who is closely followed in this article. In the first place, his teaching regarding the indulgences for the living was correct. The charge that the forgiveness of sins was sold for money regardless of contrition or that absolution for sins to be committed in the future could be purchased is baseless. An indulgence, he writes, can be applied only "to the pains of sin which are confessed and for which there is contrition". "No one", he furthermore adds, "secures an indulgence unless he have true contrition". The confessional letters (*confessionalia*) could of course be obtained for a mere pecuniary consideration without demanding contrition. But such document did not secure an indulgence. It was simply a permit to select a proper confessor, who only after a contrite confession would absolve from sin and reserved cases, and who possessed at the same time facilities to impart the plenary indulgence (Paulus, "Johann Tetzel", 103).

As much cannot be said about his teaching regarding indulgences for the dead. The couplet attributed to him—

> As soon as the gold in the casket rings
> The rescued soul to heaven springs,

like that attributed to Luther,

> Who loves not wine and wife and song
> Remains a fool his life long;

though verbally spurious, can in both instances be in substance unfailingly traced to the writings of their respective authors. By Tetzel they are substantially acknowledged in his Frankfort theses. Here he accepted the mere school opinion of a few obscure writers, which overstepped the contents of papal indulgence Bulls. This opinion found no recognition but actual condemnation at the hands of authoritative writers, and was rejected in explicit terms by Cardinal Cajetan as late as 1517–19. By the teaching he laid himself open to just censure and reproach. To condition a plenary indulgence for the dead on the mere gift of money, without contrition on the part of the giver, was as repugnant to the teaching of the Church, as it violated every principle of elementary justice. "Preachers act in the name of the Church", writes Cardinal Cajetan, "so long as they teach the doctrines of Christ and the Church; but if they teach, guided by their own minds and arbitrariness of will, things of which they are ignorant, they cannot pass as representatives of the Church; it need not be wondered at that they go astray" (Paulus, "Johann Tetzel", 165). It was this deviation from the correct teaching of the Church and the obtrusive and disgraceful injection of the treasury chest, that led to abuses and scandals reprobated by such contemporaries as Cochlæus, Emser, and Duke George (Paulus, op. cit., 117–18). "Grave abuses arose; the attitude of the preachers, the manner of offering and publishing the indulgences aroused many scandals: above all, Tetzel is in no way to be exonerated" (Janssen-Pastor, "Geschichte des deutsch. Volkes", 18th ed., Freiburg, II, 84).

If Tetzel was guilty of unwarranted theological views, if his advocacy of indulgences was culpably imprudent, his moral character, the butt of every senseless burlesque and foul libel, has been vindicated to the extent of leaving it untainted by any grave moral dereliction. These would hardly be worth alluding to, did not some of them have Miltitz as the source. But Miltitz has been so discredited that he no longer carries historical weight. "All efforts", writes Oscar Michael, a Protestant, "to produce Miltitz as a reliable witness will prove futile" (Münch. Allg. Zeit., 18 April, 1901). "The circulated reports of Miltitz about Tetzel deserve in themselves no credence", writes another Protestant author (ibid., 14 March, 1910).

The Ratisbon adultery charge, with its penalty of drowning, detailed by Luther, Mathesius, Sleidan and almost every Protestant Reformation historian, has been proved so preposterous, that Brieger (Theodor) claims "it is high time . . . . . that it vanish from all history" (Theol. Literaturzeit., 1900, 84). Dibelius of Dresden says: "Among the faults and shortcomings ascribed to Tetzel by his enemies, that of immorality cannot stand" (Lecture on "Tetzel's Leben u. Lehre" in "Dresdner Journal", 20 March, 1903). "Paulus", in the words of Berger (A.), "has so effectually refuted the notorious adultery anecdote, that no one will ever revive it" (Histor. Viertelsjahrschr. f. Gesch., 1902, p. 256). The charge made by Luther in his seventy-fifth thesis, that Tetzel had preached impiously concerning the Blessed Virgin, and repeated in Luther's letter to Archbishop Albrecht (Enders, I, 115) and in most explicit terms in his pamphlet "Wider Hans Worst", was not only promptly and indignantly denied by Tetzel (13 Dec., 1518), declared false by an official resolution of the entire city magistracy of Halle (12 Dec., 1517), where it was claimed the utterance was made, but has now been successfully proved a clumsy fabrication (Paulus, op. cit., 56–61).

The charge of embezzling the indulgence funds is also legendary. The precautions adopted to safeguard the alms were of a character that precluded all chance of misappropriation. The chest to receive the money always had two or three locks, the keys of which were in the custody of different persons, including a representative of the banking-house of Fugger. It could never be opened save in the presence of a notary. The ecclesiastical injunction was that the faithful had to deposit their contributions in person. To give it to the confessor or indulgence subcommissary invalidated the indulgence (Paulus, op. cit., 76–77). The Tetzel indulgence chests exhibited at Jüterbog and other German towns, are counterfeits, according to the Protestant writer Körner (Tetzel's Leben, 73). The latest Catholic biographer of Luther, Grisar, writes: "To ascribe to the unhappy monk the 'cause' of the entire apostasy that set in since 1517 . . . is an untrue legend" ("Luther", Freiburg, 1911, I, 281).

HECHTIUS, *Vita Joannis Tetzelii* (Wittenberg, 1717); VOGEL, *Leben Johann Tetzels* (Leipzig, 1717); GRÖNE, *Tetzel u. Luther* (2nd ed., Soest, 1860); HOFMANN, *Lebensbeschreibung des Ablasspredigers Johann Tetzel* (Leipzig, 1844); KÖRNER, *Tetzel der Ablassprediger* (Frankenburg, 1880); JANSSEN-PASTOR, *Gesch. des deutschen Volkes*, II (Freiburg, 1897), 81–83; GRISAR, *Luther*, I (Freiburg, 1911), 276–88; PAULUS, *Johann Tetzel der Ablassprediger* (Mainz, 1899); the last-named for thoroughness of research and objective character supersedes all that has ever been written on Tetzel, on both the Catholic and Protestant sides.

H. G. GANSS.

Teuchira, a titular see in Libyan Pentapolis. Teuchira, Τεύχειρα, neuter plural, was a city on the coast of Cyrenaica, 200 stadia west of Ptolemais. It was celebrated for its worship of Cybele, in whose honour annual festivals were held. During the reign of the Ptolemies it was called Arsinoë; at a later period it became a Roman colony, and was garrisoned by Justinian. The ruins are called Tokra (vilayet of Benghasi). Two of its bishops are known, Secundus, at the Council of Nicæa in 325, and Zeno, at that of Ephesus in 431 (Le Quien, "Oriens christ.", II, 623). The see is mentioned in Parthey (Notitia episcopatuum, I) about 840.

S. PÉTRIDÈS.

Teutonic Order, a medieval military order modelled on the Hospitallers of St. John, which changed its residence as often as the latter. These residences, marking as many stages in its development, are: (1) Accon (Acre), its cradle in Palestine (1190–1309); (2) Marienburg, Prussia, the centre of its temporal domination as a military principality (1309–1525); (3) Mergentheim in Franconia, which inherited its diminished possessions after the loss of Prussia (1525–1805); (4) finally, Vienna in Austria, where the order has gathered the remains of its revenues and survives as a purely hospital order. A Protestant branch likewise subsists in Holland.

(1) There was already a Teutonic hospital for pilgrims from Germany in the Latin Kingdom of Jerusalem, with a church dedicated to the Blessed Virgin, who is still the patroness of the order and after whom the name Mariani is sometimes given to its members. But this establishment, which was under the jurisdiction of the Grand Master of St. John, was broken up at the conquest of Jerusalem by Saladin (1187). During the Third Crusade German pilgrims from Bremen and Lübeck with the Duke of Holstein established a temporary hospital under the besieged walls of Acre; this was a large tent, constructed from the sails of their ships, in which the sick of their country were received (1190). After the capture of Acre this hospital was permanently established in the city with the co-operation of Frederick of Suabia, leader of the German crusade, and at the same time religious knights were attached to it for the defence of pilgrims. The Order of Teutonic Knights was founded and took its place beside the other two orders of Jerusalem, the Hospitallers and the Templars. As early as 1192 they were endowed by Celestine III with the same privileges as the Order of St. John, whose hospital rule they adopted, and as the Order of the Temple, from which they borrowed their military organization. Innocent III in 1205 granted them the use of the white habit with a black cross. The emperors of the House of Suabia heaped favours upon them. Moreover, they took sides with Frederick II even after he had broken with the papacy and in opposition to the other two military orders. During the Fourth Crusade, when the gates of Jerusalem were for the last time opened to Christians, under the command of this emperor, the Teutonic Knights were able to take possession of their first house, St. Mary of the Germans (1229). But it was not for long and before the end of the century they left Palestine, which had again fallen under the yoke of Islam (1291).

(2) A new career was already open to their warlike and religious zeal, in Eastern Europe, against the pagans of Prussia. This coast of the Baltic, difficult of access, had hitherto resisted the efforts of the missionaries, many of whom had there laid down their lives. To avenge these Christians a crusade had been preached; a military order founded with this object, the Sword-bearers (see MILITARY ORDERS, THE), had not been very successful, when a Polish duke, Conrad of Massovia, determined to ask the assistance of the Teutonic Knights, offering them in return the territory of Culm with whatever they could wrest from the infidels. Hermann of Salza, fourth Grand Master of the order, was authorized to make this change by Honorius III and the Emperor Frederick II, who, moreover, raised him to the rank of prince of the empire (1230). The knight Hermann Balk, appointed Provincial of Prussia, with twenty-eight of his brother knights and a whole army of crusaders from Germany began this struggle which lasted twenty-five years and was followed by colonization. Owing to the privileges assured to German colonists, new towns arose on all sides and eventually Germanized a country of which the natives belonged to the Letto-Slavic race. Thenceforth the history of this military principality is identified with that of Prussia (q. v.). In 1309 the fifteenth Grand Master, Sigfried of Feuchtwangen, transferred his residence from Venice, where at that time the knights had their chief house, to the Castle of Marienburg, which they made a formidable fortress.

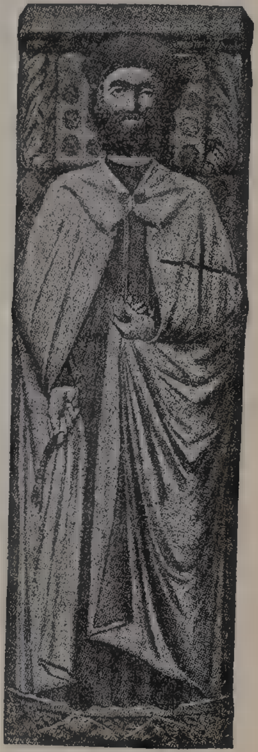

FIGURE ON THE TOMB OF CONRAD OF THURINGIA, XIII CENTURY, SHOWING THE HABIT OF THE TEUTONIC KNIGHTS

The number of knights never exceeded a thousand, but the whole country was organized in a military manner, and with the constant arrival of new crusaders the order was able to hold its own among its neighbours, especially the inhabitants of Lithuania, who were of the same race as the natives of Prussia and, like them, pagans. In the battle of Rudau (1307) the Lithuanians were driven back, and they were converted only some years later, with their grand duke, Jagellon, who embraced Christianity when he married the heiress of the Kingdom of Poland (1386). With this event, which put an end to paganism in that section of Europe, the Teutonic Knights lost their *raison d'être*. Thenceforth their history consists of incessant conflicts with the kings of Poland. Jagellon inflicted on them the defeat of Tannenberg (1410), which cost them 600 knights and ruined their finances, in order to repair which the order was obliged to have recourse to exactions, which aroused the native nobility and the towns and provided the Poles with an opportunity to interfere against the order. A fresh war cost the order half its territory and the remaining half was only held under the suzerainty of the King of Poland (Treaty of Thorn, 1466). The loss of Marienburg caused the transfer of the Grand Master's residence to Königsberg, which is still the capital of Prussia properly so-called. To maintain itself against the kings of Poland the order had to rely on Germany and to confide the office of Grand Master to German princes. But the second of these, Albert of Brandenburg (1511), abused his position to secularize Prussia, at the same time embracing Lutheranism (1525). He made Prussia an hereditary fief of his house under the suzerainty of the Crown of Poland.

(3) Nevertheless, the dignitaries of the order in the remainder of Germany faithfully preserved its possessions, and having broken with the apostate chose a new Grand Master, Walter of Cronenberg, who fixed his residence at Mergentheim in Franconia (1526). After the loss of Prussia the order still retained in Germany twelve bailiwicks, which they lost one by one. The secession of Utrecht (1580) meant the loss of the bailiwick of that name in the Low Countries. Louis XIV secularized its possessions in France. The Treaty of Lunéville (1801) took away its possessions on the left bank of the Rhine and in 1809 Napoleon abandoned its possessions on the right bank to his allies of the Confederation of the Rhine. The Teutonics retained only the bailiwick in the Tyrol and that in the Austrian States.

Tewkesbury Abbey

(4) Thus the order became purely Austrian, under the supreme authority of the Emperor of Austria, who reserves the dignity of Grand Master for an archduke of his house. Since 1894 it has been held by Archduke Eugene. There are at present 20 professed knights who are bound to celibacy while they enjoy a benefice of the order, and 30 knights of honour who are not bound to this observance, but who must furnish an entrance fee of 1500 florins and an annual contribution of 100 florins. Moreover, their admission exacts a nobility of sixteen quarterings. The revenues of the order are now devoted to religious works; it has charge of 50 parishes, 17 schools, and 9 hospitals, for which object it supports 2 congregations of priests and 4 of sisters. Moreover, it performs ambulance service in time of war; it pays the cost of the ambulance, while lay Marians are engaged as ambulance bearers. Thus, after various vicissitudes the Teutonic Knights are restored to their original character of hospitallers. Besides this Catholic branch in Austria the order has a Protestant branch in the ancient bailiwick of Utrecht, the possessions of which have been preserved for the benefit of the nobility of the country. The members, who are chosen by the chapter of knights, must give proof of four quarterings of nobility and profess the Calvinistic religion, but are dispensed from celibacy. When Napoleon took possession of Holland in 1811 he suppressed the institution, but as early as 1815 the first King of the Low Countries, William I of Orange, re-established it, declaring himself its protector. The present order comprises 10 commanders, *Jonkheeren*, and aspirants (*expectanten*), who pay an entrance fee of 525 florins and have the right to wear in their buttonhole a small cross of the order.

CH. MOELLER.

Tewdrig (THEODORIC), a Welsh saint, son of King Teithfallt of Morganwg or Southern Wales, flourished probably in the sixth century. He was a liberal benefactor of the church of Llandaff. He resigned the government to his son Meurig and devoted himself to religion and contemplation at Tintern in Monmouthshire. When, however, the Saxons under Ceolwulf crossed the Severn and pressed hard upon Meurig, Tewdrig left his solitude and gained a brilliant victory at the head of his old troops, but was killed in the main battle. A church was erected over the grave of the royal martyr; it was called Marthyr Tewdrig and is now Mathern at the junction of the Rivers Wye and Severn. The day of his death is 3 January; the year is uncertain, the dates 610, 577, 527, or even 470 being given.

KLEMENS LÖFFLER.

Tewkesbury, JOHN. See TUNSTED, SIMON.

Tewkesbury Abbey, Gloucestershire, England, derives its name from Theoc, a hermit of early times, to whose memory a monastery was dedicated by the dukes of Mercia in the eighth century. In 980 it became a cell of the Benedictine Priory of Cranborne, in Dorsetshire; but having grown in wealth and importance after the Norman Conquest, and being richly endowed by FitzHamon (a cousin of the Conqueror) it became an independent abbey in 1103. Gerald was the first abbot, and the magnificent church—the largest in England, after Westminster, of abbey churches not now used as cathedrals—was completed and consecrated in 1123. FitzHamon, with his son-in-law Robert, Earl of Gloucester, was regarded as its second founder; and their descendants, the De Clares, Despencers, and Beauchamps, remained closely associated with it almost until the Dissolution. The tombs of many of them are still to be seen in the church. The Annals of Tewkesbury from the Conquest (1066) until 1263 are extant, and contain valuable notes on the national history, but little of interest about the abbey itself. During the thirteenth and succeeding centuries Tewkesbury was constantly receiving new endowments in lands and money, and became one of the wealthiest of English monasteries, its income at the Dissolution being set down at £1600 (equal to more than ten times that amount in modern money). The great battle of Tewkesbury on 4 May, 1471, between Yorkists and Lancastrians, was fought in the very precincts of the abbey; and many of those who fell, including Henry VI's only son, were buried in the church.

Sixty-eight years later the last abbot, John Wakeman, surrendered the abbey to Henry VIII. Wakeman himself was handsomely pensioned, and in 1541 became first bishop of the newly-erected See of Gloucester. The abbot's house was preserved intact; most of the remaining monastic buildings were destroyed as "superfluous"; but the magnificent church was subsequently sold by the king to the parishioners of Tewkesbury, and was thus saved from destruction. It measures 317 feet long by 122 across the transepts, and the massive central tower is 132 feet high. The pillars and triforium of the nave and the lower part of the choir belong to the original Norman church; the splendid groined roof, replacing the original Norman ceiling, and apsidal choir with chevet of surrounding chapels (closely resembling Westminster Abbey), date from the fourteenth and fifteenth centuries. The choir windows contain some fine old stained glass. The whole church underwent careful restoration under Sir Gilbert Scott (1875–79), and four years later the restoration committee was enabled to repurchase what remained of the monastic buildings.

D. O. Hunter-Blair.

Texas, State of.—The name, Texas, is probably derived from *Tejas*, the name of a friendly tribe of Indians met within the territory by the early Spanish explorers.

Geography and Physical Characteristics.—The state is bounded on the north by Oklahoma, on the west by New Mexico and Mexico, on the south by Mexico and the Gulf of Mexico, and on the east by the Gulf of Mexico, Louisiana, and Arkansas. It lies between 25° 50′ and 36° 45′ N. lat. and 93° 30′ and 106° 30′ W. long. It embraces 265,896 sq. miles, of which 3498 sq. miles are water. Four great natural provinces, running in general direction from south to north, are formed by geological development. The first of these, nearest the coast, is called the Coastal Plain, consisting of Coast Prairies, a Tertiary area, and Black Prairies. Extending back from the Gulf Coast for from thirty to fifty miles, an outcrop of underlying clays gives a flat, almost treeless tract running along the whole length of the coast and known as the Coast Prairie. Different climatic conditions with respect to rainfall vary the products of different parts of this region. The eastern and northern part, where the rainfall reaches from forty to fifty inches annually, are suitable for rice culture, which is localized there; in the central portion along the coast where the rainfall is less, sugar-cane, fruit, and "truck" are extensively cultivated, while in the southwest, with a rainfall of only 20 to 28 inches annually, cotton culture and "cattle raising on the range" are the chief industries. Irrigation, however, in this south-western region makes the cultivation of sugar-cane and sorghum as well as cotton of some profit. Favourable underground conditions make this Coast Prairie the location of important oil-fields. Further to the interior the Coast Prairie is succeeded by Tertiary deposits giving a generally sandy condition to the soil. This Tertiary area also is divided by climatic conditions. The south-western and western part, the "Rio Grande Plain", having a very shallow rainfall, produces only a dwarfed and shrubby natural vegetation and is hence called the "Chaparral Country"; the humid part, however, north and north-east, called the East Texas timber belt, grows both the short and long-leaf pine. Lumbering is here the important industry. In the northern part of this region more fertile soil affords the great fruit and "truck" products; cotton and tobacco are also grown. In one part of the west of this Tertiary region cotton is cultivated, and valuable deposits of brick and pottery clays and lignite are extensively worked. Further inland and north of the Colorado River in this Coastal Plain are the Black and Grand Prairies, the most important agricultural region of Texas. Black waxy calcareous clay soil, for the most part underlaid by prolific and widespread water-bearing formations, makes this region the great cotton and corn producing section, while oats, wheat, alfalfa, and sorghum are also extensively grown. Wherever the climate becomes arid cattle raising increases as an industry. The Central Basin is the second great natural province. This region, situated in north-west and central-west Texas, was once covered with cretaceous materials, but now is denuded by the head waters of the Red, Brazos, and Colorado Rivers. Its southern extremity, the "Llano Country", as it is called, has a granite foundation, much quarried, and deposits of hematite and magnetite occur here plentifully. On the eastern side the soils show a carboniferous area, and include sands, loams, black and light-coloured clays, producing, in the heavier soils, cotton, wheat, oats, sorghum, milo-maize, and in the lighter, cotton, maize, fruit, and garden products. The western portion contains notably fertile soils, yielding abundant crops of kafir-corn, milo-maize, cotton, wheat, oats, peaches, and alfalfa. Deposits of salt, clay, and gypsum occur in this area. The third natural province of Texas is the Plateau Province, having three great divisions: the Llano Estacado, Staked or Palisaded Plains, which extend beyond the limits of the state, and the Edward's and Stockton Plateau. The Llano Estacado, a plateau 2500 to 4000 feet in elevation, derives its name from being itself an extensive uplifted *mesa*, surrounded, except on the Edward's Plateau side, by "breaks", cliffs, or walls, which, as palisades, have to be climbed before the plateau is attained. The plateaux are treeless, grass-covered prairies; the soils are fine, sandy loams, and the annual rainfall only from fifteen to twenty inches. Formerly this region was devoted entirely to cattle, but now alfalfa, barley, broom-corn, maize, cotton, wheat, and fruits are being successfully cultivated. The water supply may be made abundant mainly from wells at a depth of 100 to 600 feet. Attempts to utilize these for irrigation on a small scale are now being made. On the Edward's Plateau the upland prairies are mainly given over to cattle, sheep, and goats; in the cañon valleys, however, are alluvial plains in which cotton, corn, milo-maize, wheat, and oats are a success. On the Stockton Plateau the formation resembles that of Edward's, but the rainfall being less, averaging only fifteen inches annually, it is used almost entirely for cattle.

Seal of the State of Texas.

The fourth province is that of the Trans-Pecos Mountains, with elevations ranging from 5000 to 9500 feet. Here the chief wealth is in the minerals, consisting of silver, copper, and lead of good grade and some gold, tin, zinc, and quicksilver. Local conditions have, however, retarded the mining development, and silver and quicksilver are the only ores worked on a commercial basis. The annual rainfall on these mountains is as low as ten to fifteen inches, but irrigation of the valley lands is practised by means of impounded storm-water, and alfalfa and kafir-corn are commonly grown. The chief industry of the section is the care of cattle. Over such an extended area the drainage is naturally diverse. In the east there are numerous small streams flowing south and east into the Gulf of Mexico, in the Trans-Pecos region there are practically no streams at all that reach the sea. In the arid regions the drainage channels flow only for a short time after rainfall. On the west and south-west boundary the Rio Grande runs for 1200 miles. The Pecos River crosses the western portion of the state, from north to south, without a tributary. It has a broad plain where it enters the state, but descends into an inaccessible cañon as it approaches the Rio Grande. The Canadian River crosses the extreme north of the state from west to east merely as a small stream on a wide bed of wet sand. The Red, Brazos, and Colorado rivers and their numerous tributaries rise in the Llano Estacado and flow south and east to the Gulf. Their valleys broaden as they approach the coast and end in very wide alluvial bottoms. Many other rivers originate from artesian springs at the foot of the escarpments, called *Balcones*, at the south of Edward's Plateau. The annual rainfall in Texas varies from 40 to 50 inches in the east—it is 60 at Texarkana—to 10 in the west. Moreover, the evaporation in the west is excessive as compared with that in the east, hence the eastern part of the state is humid, the west arid. The Gulf breezes cool the air in the summer, and bring rains to the north and east in winter and spring. The northern limit of the Mexican rainy season, with its water from the Pacific in summer and autumn, reaches the Trans-Pecos Province and along the Rio Grande. The cold winds called "Northers", blowing from the north-west or from the Rocky Mountains, sweep at times over the whole state. A considerable difference, 20° in average temperature between various places in the state, is observable.

POPULATION AND RESOURCES.—The population of Texas as given by the thirteenth decennial census is 3,896,542. This causes the state to rank fifth in population in the Union. In 1850, when Texas was first enumerated in the United States census, the number of inhabitants was given as 212,592.

Agriculture.—There are in Texas, according to the Federal Census Report (1910), 109,226,000 acres of farm-land, and 27,120,000 acres of this are improved farm-land. It is estimated that the state has 167,865,000 acres of tillable land. At present the number of farms is given by the census (1910) as 416,377, with an average of 262 acres to the farm. Over 1,000,000 acres are now (1911) under irrigation, representing an investment of $17,000,000 for irrigating plants. Several large irrigating enterprises are being inaugurated that will greatly extend the acreage under irrigation in 1912. The total value of farm property in the state (lands, buildings, implements, and machinery) was $1,879,246,000 in 1910. In 1911 the acreage for some staple crops is given officially as follows: cotton, 10,868,000; corn, 9,240,000; wheat, 1,240,957; potatoes 60,000; rice, 275,000; tobacco, 600.

The following figures, culled from the offices of the State and Federal Commissioners of Agriculture, show the values of same Texas crop yields for the year 1910: cotton and cotton seed, $265,955,944; corn, $114,206,000; wheat, $18,404,000; oats, $11,443,000; barley, $135,000; rye, $47,000; rice, $5,942,000; emmet and spelt, $30,000; kafir-corn and milo-maize, $3,900,000; peanuts, $1,430,000; other grasses and seeds, $750,000; potatoes, $3,366,000; sweet-potatoes and yams, $2,600,000; hay and forage, $13,900,000; tobacco, $105,000; sugar-cane, $4,360,000; broom corn, $160,000; truck, $30,000,000: total value, $476,733,944.

The United States Government Bulletin, showing the number of bales of cotton ginned to 20 March, 1912, gives Texas 4,437,876 bales as against 3,172,488 for the entire season in 1910. The table given above names only the principal crops and products. The Texas Haymakers' Association has estimated the value of the Texas hay crop, including local consumption and inter-state shipments—the census does not give such local shipments—at $180,000,000. Altogether, the estimate of Texas farm and garden products, not including livestock, gives a market valuation of $650,000,000 annually. As Texas leads in the production of cotton so also in range cattle, pecans, figs, watermelons, bees, and honey.

Livestock.—The livestock statistics given below are taken from the office of the Commissioner of Agriculture of the State of Texas and from the U. S. Census (1910). The figures give the value of animals in the state:

Milch cows, $33,542,000; other cattle, $109,104,000; horses, $97,199,000; mules, $69,498,000; sheep, $5,154,300; goats, $2,000,000; hogs, $18,702,400; poultry, $4,806,653; total value, $340,006,352; number of colonies of bees 238,107; value, $675,000. The wool product given by the Federal census, 1910, for the then current year is valued at $2,202,342. Conservative estimates of the dairying industry in Texas state 4,000,000 lbs. as the output from the creameries in 1910. Official reports of the Fish and Oyster Commission for the year ending 1 August, 1911, relative to the fish and oyster catch in Texas waters, give: oysters, 110,550 barrels; fish, 3,231,159 lbs. Many thousands of pounds of fish are also taken by fishermen and sportsmen who do not come under the License Act, and whose catch is not recorded. The timber and lumber industry from the last report is valued for its output at $1,150,000.

Minerals.—The following figures are taken from a statement made by the director of the Bureau of Economic Geology and Technology of the University of Texas. They have been compared with figures from the United States Geological Survey for 1909 and show the increase or decrease that may be expected from one year to another though the general sums may differ but comparatively little.

Asphalt, $1,040,845; clay industries, excluding pottery, $2,744,845; coal, $2,397,858; fuller's earth, $8,582; granite, $60,909; iron ore, $34,003; lignite, $763,107; lime, $226,592; limestone, $477,239; mineral waters, $128,549; petroleum, $6,605,755; pottery, $112,604; quicksilver, $151,413; salt, $272,568; sandstone, $40,471; sand and gravel, $517,225; silver, $205,374; stone (crushed), $306,862; tin, $2,586; cement, gypsum, natural gas and sand, lime-brick, estimated $500,000; total, $16,597,367.

Manufactures.—The value of the manufactured products of Texas as shown for 1909 (U. S. Census, 1910) is $227,896,000, the capital invested being $216,876,000 and the raw material used being valued at $178,179,000. The industries given do not include any whose products are less than $500 a year and likewise exclude steam laundries. The total wealth of the state as shown by the report compiled by the State Comptroller's Department for 1911 is valued at $2,515,632,745. The capital and surplus of Texas banks amounts to $113,055,617, while the deposits, 1 June, 1911, amounted to $206,664,471, these figures being taken from the Texas Bank Directory (1911), excluding a number of private banks not rendering a report.

MEANS OF COMMUNICATION.—Texas has 140,000 miles of public highways, 35,000 miles of which are graded and are classed as improved highways. Besides these last many thousand miles are naturally of such good formation as to be passable at all seasons of the year and do not require much expenditure, while many thousand miles more receive attention in places, but are not included in the class "improved highway". The total railroad mileage of the state is 16,192.34 miles. These figures are derived from the report compiled by the comptroller's department of the state. The Port of Galveston is the principal port of Texas and the south-west. The total foreign business of the Galveston customs district for the fiscal year ending 30 June, 1911, was $225,155,912;

of this the exports were in value $220,491,365. The coast-wise commerce of the port is estimated at $200,000,000. Port Arthur, the port next in importance to Galveston, had on 30 June, 1911, foreign exports for the year to the value of $23,981,681; the value of the imports was $173,815. The domestic commerce of this port is said to be in excess of the foreign. The towns of Beaumont and Orange will soon share with Port Arthur in the commercial benefits of deep water, all three being connected by the Sabine Neches Canal, now about to be deepened to 25 feet. Houston also is to share with Galveston by the completion of the ship-channel which connects the city with Galveston Bay. The securing of deep water at Aransas Pass will make Harbor Island another deep-water port. Velasco at the mouth of the Brazos River, and Point Isabel at the mouth of the Rio Grande, will yet be important ports for deep-sea commerce, although only beginnings are now in evidence. The project of the Federal Government to form an inland water-way from the west coast of Florida to the Rio Grande, skirting the Gulf Coast, through the protected bays where possible, has been already begun in one section in Texas, between the Brazos River and Matagorda Bay, through the mainland. Other channels are being maintained in various places while some of the rivers are utilized for navigation and projects for rendering them more navigable are being prosecuted. The value of Texas shipping, steamships, and sailing vessels given by the comptroller's department is $2,299,850.

Mission of San Francisco de Espada, Eight Miles South of San Antonio, Built 1730

Educational System.—The public educational system of Texas includes, under State control, the University of Texas at Austin, and its medical department at Galveston; the Agricultural and Mechanical College at College Station; four normal schools situated respectively at Huntsville, San Marcos, Denton, and Canyon; the College of Industrial Arts (for women) at Denton; the normal and industrial school for coloured youths at Prairie View, and the high schools and common schools in the various independent and common school districts of the State. The intention expressed in the Constitution of the Republic of Texas of establishing a university, and the later endowment granted by the Congress to give it effect (1839), never attained fruition. In 1869 the new Constitution of the State again directed the establishment of a university and in accordance with this mandate the Legislature (1871) refunded a prior endowment of $100,000 and added thereto 1,000,000 acres of land. In 1881 the main university was located at Austin and the medical department at Galveston. The main university was opened in 1883 with an enrollment of 221 students. Not until 1891 did the medical department receive its first students. The income of the university from its lands is about $170,000 yearly; the legislative appropriation for 1912 is $268,545, in 1913 it will be $400,000. The institution has 49 professors, 43 instructors, 10 tutors, 10 fellows, 34 student assistants; the present enrolment in the main university at Austin is 1777; in the medical department, Galveston, 285.

The Agricultural and Mechanical College was opened in 1876 with Federal aid. Its present enrolment is 1126. The Legislative appropriation for its maintenance and that of other colleges is shown below.

	1911	1912
Agricultural and Mechanical College	$ 96,750	$368,350
Sam Houston Normal School	33,000	51,000
South-west Texas Normal School	33,000	68,600
North Texas Normal School	33,000	92,000
West Texas Normal School	27,500	59,945
College of Industrial Arts	39,575	121,300
Prairie View Normal and Industrial College	48,600	
	1910–11	1912–13
Institute for the Blind	$161,430	$155,540
Institute for the Deaf and Dumb	106,370	110,520

The school property in independent school districts, including cities and towns, is valued at $16,602,342, and in common school districts at $6,644,998. Enrolled in the scholastic census of the independent districts are 368,303 children, in the common school districts are 623,106; in all 991,409 between the ages of 7 and 17, the scholastic age fixed by law. The total available fund for the current year from all sources for the education of these children is $13,351,121.

Political History.—Early in the sixteenth century Spanish explorers along the Gulf Coast and in the interior of the territory had gained a knowledge of Texas, among the first being Alonzo Alvarez de Pineda. Alvar Nunez, better known as Caveza de Vaco, unmistakably investigated the Gulf shore from Florida to Mexico before 1530, and had even traversed Texas from the coast probably near Galveston to a point in the vicinity of El Paso. There is evidence to show that Coronado, in his memorable northern expedition from Mexico, 1540, travelled near San Elisario and entered the *pueblo* of the Tigvas, afterwards called Ysleta, where a church was built. A church still exists on what is said to be the site of that built under the eye of Coronado. Spain's knowledge of this country, however, had no result towards its occupation before the landing of La Salle in 1685. Robert Cavelier de La Salle, who had sailed down the Mississippi to its mouth in 1682, was returning from France in 1685 prepared to found a colony on the banks of the "Father of Waters" and hold the great river for France; because of an error in his estimate of the latitude of its mouth he passed the mighty stream, and sweeping along the Gulf Coast landed in Matagorda Bay in Texas, which he named the Bay of St. Bernard. In this neighbourhood he attempted to found a colony and called the place Fort St. Louis. From it he made expeditions to discover the position of his confrère de Tonti, who had been left in charge of a colony near the mouth of the Illinois River. On one of these La Salle was slain by one of his own followers, an enemy of his nephew, Duhaut. His faithful friend and companion, Father Anastase Douay, buried in Texas soil the body of this intrepid and enterprising explorer.

The colony was soon scattered and destroyed by sickness and the Indians. When news of the French attempt reached Mexico, Don Alonzo de Leon was sent by the Count of Monclova, Viceroy of Mexico (1686), to scour the country and drive out the French. De Leon visited the ruins of Fort St. Louis and made some little explorations on his way. Later, in 1690 and 1691, some attempts were made to occupy the "New Philippines", as the territory was called. Twenty-three years later (1714), Cadillac, Governor of Louisiana, sent Hucherau St-Denis into Texas territory to establish trade with Mexico. St-Denis, adventurous and enterprising, met with remarkable success and the trail known as the old San Antonio road from Nacogdoches to the Rio Grande was the artery through which commerce flowed between the nations. Other movements of the French evoked counter actions from the Spanish. It may be remarked that the appellation Texas probably arose from La Harpe's dating a letter from the territory of "Las Tekas", although some ascribe the bestowal of the name to de Leon. The French trade enterprises stimulated Spain to inaugurate in 1715 an extended presidio and mission plan to hold the country and to civilize and Christianize the Indians. Many tribes of these inhabited the broad prairies; some, wild and untamable; others, sedentary, gathered in towns or *pueblos*, and possessing a rude kind of civilization. Some of these pueblos are still traceable and the ancient town of the Tejas Indians once occupied the site of the present town of Mound Prairie. The Spanish missionary effort spoken of more particularly in another part of this article covers the period from 1715 to 1794. Other efforts were made by the French to utilize this land, claimed because of La Salle's discovery and settlement, and various struggles between both countries were finally settled by the cession to Spain of Louisiana in 1763. Previous to this in 1728, however, Spanish settlers from the Canary Islands supplemented by others from Mexico were introduced at great expense, and Texas was made a separate province. The civilized population, half or more European, however, grew very slowly (3000 in 1714 and in 1805 only 7000).

From the latter part of the eighteenth century there had been renewed attempts to enter the territory of New Spain from the Louisiana side for the purpose of trade. The policy of Spain had opposed all trade with foreign nations, but some contraband was no doubt connived at or legitimate rights to trade granted from time to time. The expedition of Philip Nolan towards the end of this eighteenth century (1797), to provide horses for the army in Louisiana from the wild herds roaming the prairies of Texas, attracted the attention of United States citizens to Texas. When, after the purchase of Louisiana, the excitement of the consequent dispute between the United States and Spain had been allayed in 1805–06 and Captain Zebulon M. Pike had made his famous expedition and returned his glowing report, and when Burr's attempt at empire came to naught, this interest was still more stimulated. Hence, the efforts of Mexico to gain independence beginning in 1810 gave rise to filibustering movements into Texas, whose eastern boundary was determined on the purchase of Florida in 1819. These were followed by attempts to colonize, so that when in 1821 Mexico had achieved independence Stephen F. Austin and other *empresarios*, as they were named, received grants of lands for colonies and introduced many families from the United States into Texas. Great land privileges were given these early settlers, but some restrictions were also involved in their tenure, one being that they profess the Catholic Faith. In practice, however, this was interpreted in a very nominal way. Real Catholics also entered from the States and from Europe at this period. Catholic colonies even were founded, e. g. Irish settlements near Refugio and San Patricio on the Nueces River (1828 and 1829). President Bustamente's decree of 1830 prohibiting further entry into Texas of colonists from the United States and delay in separating Texas politically from Coahuila—they had been united in 1824—with other sources of discontent, brought about a successful revolution in 1835–36. On 16 March, 1836, a constitution was adopted for the Republic of Texas and signed on the seventeenth. Its independent existence lasted until 1845, when it was annexed to the United States.

The Territory embraced besides its present area what now forms part of New Mexico, of Oklahoma, of Kansas, of Colorado, and even of Wyoming. The portions outside its present borders were sold to the United States in 1850 for $10,000,000. The magnificent public domain possessed by the Texas Government as a republic and retained by her as a State gave ample opportunity for colonizing schemes, and hence grants of land were made to promoters of colonies, some of which were largely Catholic. Henry Castro, consul general for Texas at Paris, obtained large grants from the Republic in 1842, and introduced five hundred families from France a few years later. Castroville on the Medina River was thus founded. Similarly New Braunfels was settled by the Prince de Solms, who brought over German and Alsatian families a year or so earlier. By this liberality in granting lands Texas invited settlers, using also the same means to encourage the building of railroads within her borders. The war with Mexico in 1846 concerning the Texas boundary cemented the union of the young State to her older sister nation, but this union was rudely broken. The Secession movement of 1861 carried Texas away from the Federal Government. Texas furnished not a few distinguished generals and over 90,000 soldiers to the "Lost Cause", and at Brownsville, Brazos Santiago, within its borders was fought the last skirmish of the war between the States, on 13 April, 1865, between a party of Confederates and a detachment from the division of General Banks. After the vicissitudes of Reconstruction the State Constitution at present in force was adopted (1876), and under its provisions and legislation the State has encouraged every form of legitimate enterprise. In population and wealth the State has made rapid strides. The nations of the world have poured, and continue to pour healthy, industrious agriculturists into her territory. Her development has only begun and her untold possibilities promise comfort and wealth to him who fears not toil.

Catholic History and Progress.—The history of the Catholic Church in Texas begins practically with the landing of La Salle in February, 1685. With him was a missionary force of seven priests, four Recollects, and three Sulpicians, who ministered to the spiritual wants of the French colony at Fort St. Louis while it lasted. On its destruction by the Indians in 1687 some of these doubtless perished with their flock, the others made their way to the French settlements further north. Don Alonzo de Leon, Governor of Coahuila, was accompanied in his expedition from Monclova to the site of La Salle's settlement in 1689 by Fray Damian Martinez or Marzanet from the Franciscan Apostolic college of Santa Cruz at Queretaro. Two of these colleges were established in Mexico, one at Queretaro in the seventeenth century, the other later (1706), at Zacatecas. From these centres missionary activity, on the representation of Father Damian, began among the Indians of Texas. In 1690 Leon again returned to the ruins of Fort St. Louis. This time Father Damian with four other Franciscans again accompanied him and established the mission of San Francisco de los Tejas in eastern Texas among the Tejas Indians on the Trinity River. On 16 May, 1691, Domingo de Teran, successor of

Leon as Governor of the Province of Coahuila, with the intent of occupying and settling Texas, set out from Monelova with "officers, civil and military", bringing with them soldiers, labourers, and artisans, together with domestic animals and seeds for farming. With this expedition went nine Franciscan fathers, Francisco Hidalgo, Nicolas Recio, Miguel Estelles, Pedro Fortuny, Pedro Garcia, Ildefonso Monge, Jose Saldona, Antonio Miranda, and Juan de Garayuschea. These priests attended the settlements founded during the expedition on the Red River, the Neches, and the Guadalupe, establishing there missions for the Indians and baptizing many thousands of them.

Although, in consequence of the rebellion of the Indians against the military and religious discipline of the presidios and missions (1693), King Philip II of Spain authorized the abandonment of these posts, "until such time as circumstances should offer more hope of success", it is certain that the devoted missionaries did all that was possible to attend to the religious needs of such of their converts as remained faithful. Indeed we know that during the period from 1693 to 1714 the Spanish missionaries, when forced to withdraw, took with them to San Antonio their faithful Indians and were brought back to these missions by Don Domingo Ramon in 1714. In 1703 the Mission San Francisco de Solano was founded on the Rio Grande by Franciscans from Queretaro; afterwards this mission was moved in 1708 or 1709 to the interior of Texas and called San Ildefonso; again in 1710 or later (1713) it was moved back to the Rio Grande and called San José. This mission was moved by Father Antonio Margil de Jesus to San Antonio de Bexar and located at San Pedro Springs under the name of San Antonio de Valero about 1718; in 1732 it was moved to the military plaza in San Antonio, and in 1744 to the site it now occupies, where it was named the "Alamo". About 1783 the mission became a parish church, and on 2 January, 1793, the Bishop of Monterey directed the records to be handed over to the curate of San Antonio de Bexar. The expedition of St. Denis in 1714 led the Duke of Linares, Viceroy of Mexico, to favour a widespread mission movement in Texas, and so from that date the founding of these religious institutions went on with great spirit. Father Margil, referred to above, whose virtues were declared heroic by Pope Gregory XVI, founded the missions of Guadalupe among the Nacogdoches, Dolores among the Aes, and San Miguel among the Adaes Indians, also the mission of Nuestra Senora del Pilar de los Adaes. The founding of other missions in the northern part of the territory is also ascribed to this holy priest. In June, 1719, during the war between Spain and France, the missionaries and their faithful flocks were again forced to retire to San Antonio, but after the cessation of hostilities these missions were re-established and the French settlers in Louisiana, as well as the Indians, profited by them, that of Nuestra Senora del Pilar de los Adaes being only about twenty miles from Natchitoches.

Mission of San José, Four Miles South of San Antonio, Built 1718

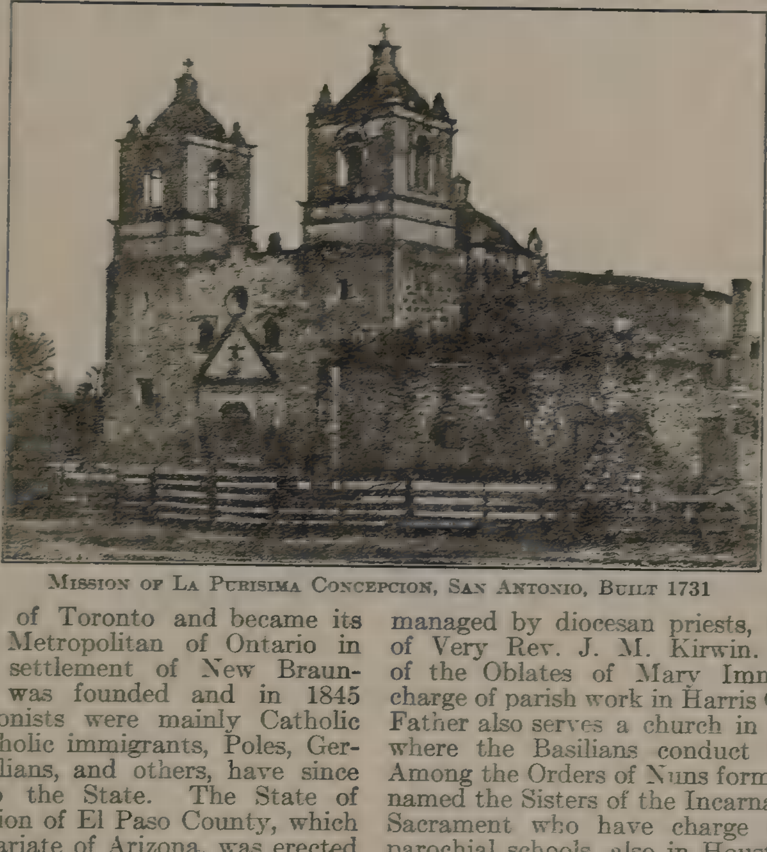
Father Margil was also the founder of other missions; among them one of the most beautiful in the neighbourhood of the city of San Antonio, the Mission San José, founded 1720. Even in decay this mission arouses the most intense interest, its artistic carvings and sculpture exciting wonder. In the same neighbourhood is the mission of La Purissima Concepcion, dating back to 5 March, 1731, when the cornerstone of its church was laid by Father Bargarro and Captain Perez of the San Antonio garrison. At the same time and near the same site were built the missions San Juan Capistrano and San Francisco de la Espada, but the original missions of all these titles were founded in 1716 on the San Marcos River. Other missions were founded in various parts of the territory of Texas up to 1791. Among these may be mentioned Espiritu Santo, founded first in 1722 near Fort St. Louis; La Bahia, also founded in 1722 at Fort St. Louis, and with its neighbour transferred later to Goliad; Rosario (1754), near San Juan, and Refugio, on Mission River, the last foundation of the kind, in 1791. San Saba Mission, on the San Saba River, in what is now Menard County, was founded in 1734 by a company of priests from Santa Fe, among the *Indios Bravos* (Wild Indians)—the Apaches and Comanches, for the humane reason of the priests that it was better to civilize than to kill them. This mission gave great encouragement to the zealous workers until the reopening of the San Saba silver mines, Las Almagras, a project which resulted in the demoralization of the Indians. During a war between the Comanches and Apaches in 1758, the former, seizing the opportunity when the small Spanish garrison was absent, fell upon the mission and destroyed all, both pastors and flock. Even the small guard of soldiers did not escape. Tradition informs us that no one was left to tell the news of the massacre. The remains of the missions still to be seen, in a greater or less degree of preservation or ruin, give ample testimony to the labours of the Franciscans among the Indians, and demonstrate what could have been achieved if the work of God had not been interfered with. Sufficient has been said under California Missions to indicate the method of the missionaries with the Indians, the nature of their buildings and enclosures, and the routine of their work for the spiritual betterment and civilization of the Indians.

When the movement before referred to, of colonizing the Province of Texas with settlers from Canary Islands and other Spanish dependencies, was put into effect (1728), the first colony was founded in San Antonio and the colonists were fairly well established in 1731. They had built their dwellings around the "Plaza of the Constitution", or present Main Plaza (called by these colonists, however, in memory of the sea-girt home they had left, "Plaza des las Islas"), and given their city the name San Fernando. Content for a short time with a small chapel of their own, which, together with the mission church of San Antonio de Valero in the adjoining and pre-existing settlement, temporarily satisfied their religious needs, they founded in 1744 and dedicated in 1749 the church of San Fernando, part of which is still used as the sanctuary of the cathedral of San Fernando, the cathedral church of the Diocese of San Antonio. The spiritual jurisdiction of the Diocese of Guadalajara extended over Texas until the erection, in Mexico, of the Diocese of Nuevo León, now Monterey, under the title of Linares, in 1777, and Texas formed part of its territory. The Franciscan missions were immediately under a president of missions. One of these at this date (1777), by an Indult of Pope Clement XIV, was empowered to administer confirmation in all parts of Texas. Don Pedro de Nava, commandant-general of Chihuahua, whose jurisdiction included part of Texas, issued a decree in 1794 by which the temporalities of all the missions of his two provinces "were placed in the hands of the civil authorities". It also "directed the division of their lands in severalty among the inhabitants of these establishments". In Texas, however, the process of secularization went on very slowly. In 1813 the missions in some parts of Texas were still flourishing when the Spanish Cortes secularized all the missions in Texas. Not until 1823 did the last of the missions at San Antonio become extinct, when the Government of Mexico put into execution the decree of the Cortes. It was not until 1827 that the last of the mission lands were distributed among the individual *Indios reducidos*, who formerly had possessed them in common. Diocesan priests took the places of the Franciscan friars as they departed, when the population required it. The archives of the missions went with their keepers to Queretaro and Zacatecas. These with the various reports sent from time to time, during the century and a quarter of missionary activity, would be a most interesting field for the historian, while furnishing unbounded pathos for the poet.

The experiment of 1728 proved too expensive to be repeated and so the population of European extraction remained small, as we have seen. Later, however (1805), when the boundary dispute with the United States seemed likely to assume a warlike aspect, besides troops to occupy military posts Spain hurried hundreds of families of settlers to take possession of the country. These were of course provided with priests and in 1805–1806 we find Don Primo Feliciano Marin, Bishop of Nuevo León, making a visitation in the province, setting church affairs in order, and making a circumstantial report of the spiritual condition of the people.

When Capt. Zebulon M. Pike visited Texas on his famous expedition (1805–06), he remarked the holy lives and refinement of the priests he had met, their blessed influence upon their flocks, and the general happiness and morality of the people. The European population of course remained small (7000 in 1806), and the revolutionary period beginning in 1810 and lasting fully a decade lowered the general standard both of morals and religion. After settlements from the United States began to be made (1820), we find in the correspondence of the settlers occasional mention of priests still serving some of the old mission churches and in the towns. In the official documents regulating the laying-out of colonial towns provision is always made for the site of a church and priest's house on one of the public squares, though of course most of these colonists were Protestant. The Irish settlements, largely Catholic, made near Refugio and on the Nueces River, San Patricio, were served by priests, one of whom, Father Henry Doyle (1830), is mentioned by non-Catholic historians. A Father Michael Muldoon was an especial favourite of the old settlers from the United States, non-Catholic as well as Catholic. His visits and those of his colleagues were events in the settlements, his ministrations longed for. He is mentioned as participating in some of the stirring events immediately preceding the Texas Revolution. When not from Mexico these priests were from Kentucky, the Diocese of St. Louis, or that of New Orleans. Even in the accounts of the Texas Revolution there is mention of the intervention of priests between the contending parties, to arrange for the burial of the dead after a battle or otherwise provide for human needs, corporal as well as spiritual. Yet when the Republic of Texas was established (1836) very few priests were in Texas: Father J. M. Odin and Father John Timon, of the Congregation of the Mission, from their seminary at the Barrens, Perry County, Missouri, in the Diocese of St. Louis, had visited in Texas territory previous to its independence, and continued to visit there with other priests of their congregation. In June, 1838, Archbishop Blanc of New Orleans wrote to Bishop Rosati (q. v.) of St. Louis and to Father John Timon, then visitor of the Congregation of the Mission in the United States, declaring that it was the wish of the Holy See that a trustworthy person be sent to examine into the condition of religion in Texas and to report to Rome. The Bishop of New Orleans wished Father Timon to undertake this work. Father Timon accordingly went to Texas, landing at Galveston in December, 1838, accompanied by M. L'Eberia. On the feast of the Holy Innocents the visitor celebrated in Galveston what was probably the first Mass ever said in the city. Many ministrations to Catholics were required of him, both there and in Houston, then the capital of the Republic, whither he went on 31 December, where he preached in the hall of Congress in the presence of many legislators. On his return to Galveston (9 January, 1839) after his tour through the Republic, a committee whom he had appointed to provide ways and means for acquiring a lot whereon to build a church, met him and reported favourably. On his visit through the country he had found the care of religion in anything but a good state, although there were not a few Catholics. He made an official report of his findings to Bishop Blanc, who forwarded it to Rome. Although Father Timon had previously refused to be made Coadjutor Bishop of St. Louis with the right of succession (7 September, 1839), he was prevailed upon to accept the honour of Prefect Apostolic of Texas with power to administer confirmation (12 April, 1840). He immediately dispatched Mgr Odin (q. v.) to Texas as vice-prefect and Father Douterlounge as assistant, and a little later obtained for the vice-prefect the power of conferring the Sacrament of Confirmation. On 5 December, 1840, Father Timon reached Galveston for the second time. He at once urged forward the efforts of the people to build a church there and provide means to support a priest, displaying the same energy at Houston. Pushing on to Austin, now the capital, he presented letters from Cardinal Fransoni of Propaganda, addressed to President Mirabeau G. Lamar, which letters were virtually a recognition by the papal government of the independence of the Republic. The Texas executive, Vice-President David G. Burnet, acting for President Lamar, then absent, was greatly pleased to receive these letters. On 23 December, 1840, the first Mass was celebrated in Austin. Mgr Timon was well received by the legislators as well as by the executive. He preached in the capitol more than once, and in conversation with acting-President Burnet and a few prominent members of Congress created a very favourable estimate of the Catholic Faith. With the diplomatic aid of M. de Saligny, minister from France to the Republic of Texas, Mgr Odin's bill for the restoration of church property was spontaneously endorsed by the legislators to whom it was first read in private, was then introduced to Congress, and passed. Thus by Act of Congress were restored to "the Chief Pastor of the Catholic Church in the Republic of Texas", the churches of San Fernando, the "Alamo" (San Antonio de Valero), La Purissima Concepcion, San José, San Juan Capistrano, San Francisco de la Espada, Goliad, Victoria and Refugio, with their lots, the latter not to exceed fifteen acres. Returning to Galveston Father Timon administered confirmation (18 Jan., 1841), to Margaret De Lacy whom he had converted and baptized on the 15th of the same month. The entry in the "Liber Confirmatorum" of Galveston Diocese certifying to this sacred function may be said, together with the baptismal record beginning 7 December, 1840, to mark the beginning of the history of the Diocese of Galveston (q. v.).

The Prefecture Apostolic of Texas was made a vicariate Apostolic in 1842 by the Bull of Pope Gregory XVI, published 10 July, 1841. Rt. Rev. Jean-Marie Odin, previously vice-prefect Apostolic, was consecrated Bishop of Claudiopolis and made vicar Apostolic. Bishop Odin, too, had previously refused to be made Coadjutor Bishop of Detroit (May, 1841).



Mission of La Purisima Concepcion, San Antonio, Built 1731

In fact Texas was singularly blessed at that time in having labourers who were quickly deemed worthy of important bishoprics. Bishop Timon was visitor of the houses of his order in Texas and throughout the United States until 1847 when he was made Bishop of Buffalo. Rev. John J. Lynch, C.M., one of the companions of Bishop Odin on his coming to Galveston (29 May, 1841), was made president of St. Mary's College, Barrens, Missouri, in 1848; after a service of some years in Texas founded Niagara University (Our Lady of Angels, Niagara Falls, N. Y.) in 1856; and was consecrated Bishop of Æchinas and Coadjutor of Toronto in 1859. In 1860 he succeeded to the See of Toronto and became its first archbishop and Metropolitan of Ontario in 1870. In 1844 the settlement of New Braunfels, Comal County, was founded and in 1845 Castroville. The colonists were mainly Catholic Alsatians. Other Catholic immigrants, Poles, Germans, Bohemians, Italians, and others, have since continually come into the State. The State of Texas, with the exception of El Paso County, which was subject to the Vicariate of Arizona, was erected into a diocese in 1847 with Bishop Odin as bishop. There were then thirteen priests, including the bishop, in this vast territory. Of these at least six were of the Congregation of the Mission. In 1849 three Oblates of Mary Immaculate were brought from Canada by Bishop Odin and two of these were sent to Fort Brown, Brownsville, on the Rio Grande. In spite of the privations and hardships of the Rio Grande Mission, and even their temporary withdrawal, enforced by lack of means, the Oblate Fathers have exercised their zeal in the State of Texas. Schools, colleges, and churches have arisen where they had trodden on the cactus and chaparral, and to-day these devoted missionaries have flourishing institutions in every ecclesiastical division of the great State. The very existence of religion among the Mexicans along the Rio Grande is largely due to the mighty labours of this Congregation.

Religious orders of nuns (1848) and of teaching brothers (1853) began their fruitful labours. All the activities of a fully developed diocese assumed shape under the guiding hand of Bishop Odin and were prosecuted with all possible vigour and success.

On Archbishop Odin's retirement he was succeeded in the See of Galveston in 1862 by Rt. Rev. Claude Marie Dubuis, D.D. In 1872 we find the immense territory of the diocese organized into the four districts of Galveston, San Antonio, Brownsville, and Laredo, a vice-chancellor being provided for each district. This organization prepared the way for the ecclesiastical division (1874) of the State of Texas, El Paso County excepted as before. All east of the Colorado River remained the Diocese of Galveston, while out of the territory west and south of this river and within the limits of the State were erected the Diocese of San Antonio (q. v.), reaching from the Colorado to the Nueces River, and the Vicariate Apostolic of Brownsville (q. v.), now (1912) the Diocese of Corpus Christi, westward to the Rio Grande. A second division of the Diocese of Galveston was made in 1890 at the request of Bishop N. A. Gallagher and the Diocese of Dallas (q. v.) was formed out of its northern and north-western portions. In 1891 El Paso County hitherto belonging to the Vicariate Apostolic of Arizona was attached to the Diocese of Dallas. Thus within the State and embracing all of its territory are the four Dioceses, Galveston, San Antonio, Dallas, and Corpus Christi. The population of the Diocese of Galveston is given (1912) as 70,000: whites, 65,000; blacks, 1200; Mexicans, 3800. St. Mary's University, Galveston, is conducted by the Jesuit fathers. St. Mary's Seminary at La Porte is now being managed by diocesan priests, under the presidency of Very Rev. J. M. Kirwin. The Congregation of the Oblates of Mary Immaculate have taken charge of parish work in Harris County. A Josephite Father also serves a church in the city of Houston, where the Basilians conduct St. Thomas College. Among the Orders of Nuns formerly recorded may be named the Sisters of the Incarnate Word and Blessed Sacrament who have charge of an academy and parochial schools, also in Houston. The Diocese of San Antonio shows no change in the statistics given under the title except that the Redemptorist Order has taken charge of the parish of St. Gerard Majella in the city of San Antonio, where a new church and school are now being erected. Besides the information given under the title, the following facts about the Diocese of Dallas are worthy of record: Rev. Father J. M. Giraud in 1864 erected a church at Jefferson in North Texas. The church at St. Paul's, Collin County, an Irish settlement, was the religious centre of a parish organized in 1870 by Father Thomas Hennessy, the present pastor of the Annunciation, Houston. The population of the Diocese of Dallas (1912) includes about 40,000 Caucasians; 22,000 Mexicans, and 250 negroes. The present bishop of the see is Rt. Rev. Joseph Patrick Lynch, D.D., b. 16 November, 1872, at St. Joseph, Mich. When appointed to the see (after the sudden death of Bishop Dunne at Green Bay, Wis., 5 August, 1910), Bishop Lynch was administrator of the diocese and rector of St. Edward's Church in the city of Dallas. His consecration took place 12 July, 1911. Besides the orders of nuns mentioned in the article on the diocese the following should be noted: the Sisters of the Good Shepherd (Ottawa, Canada), conducting a house in Dallas with forty-eight penitents; the Sisters of the Holy Ghost (San Antonio, Texas), devoted to the coloured race. The Josephite Fathers also have charge of the coloured people. The Vincentians conduct the University of Dallas, which has an enrolment of 206 students. The Catholic population shows rapid increase because of the immigration, chiefly from the northern States, of settlers, European in origin, and the work of organizing new parishes goes on quickly here as in the other dioceses. The new Diocese of Corpus Christi is a vacant see at the present writing (1912). It has 15 churches with resident priests and sixty missions with chapels. Thirty-three priests, sixteen secular and seventeen Oblates, serve the Catholic population, which is over 81,917, chiefly Mexicans. Probably between three and four thousand are Caucasians. The Oblates have their novitiate for the province of the south-west, which includes Mexico, in this diocese. A new building for the novitiate is now in course of construction at La Lomita on the Rio Grande near the town of Mission. The Marist Brothers conduct St. Joseph's College for boys at Brownsville. The following orders of nuns are engaged in their various works in the diocese: the Ursuline Sisters, convent and academy and St. Peter's School at Laredo; the Sisters of Mercy, the Mercy Hospital, Laredo, and schools in various towns in the diocese; the Sisters of the Holy Ghost, Academy of Our Lady of Guadalupe, Laredo; the Sisters of Divine Providence, St. Mary's Academy, Beeville; the Sisters of the Incarnate Word, convent and academy, Brownsville; the Sisters of the Incarnate Word and Blessed Sacrament, schools at Corpus Christi, Rio Grande City, and Roma; Sisters of Charity of the Incarnate Word, Spohn Sanitarium, Corpus Christi; the Hermanas del Sagrado Corazón de Jesus conduct an orphanage in Laredo. The number of pupils attending the academies and parochial schools in the diocese is over 1200.

Distinguished Catholics.—In the organization of the Texas revolutionary Government of 1836 the loyalty, patriotism, and talents of Lorenzo de Zavala were deemed of such high order as to qualify him for the office of Vice-President of the Republic. A man of culture, a statesman, and a soldier, de Zavala was above all an ardent Catholic. He was born 3 Oct., 1788, and died 15 Nov., 1836. Colonel Francisco Ruiz, another distinguished Catholic and patriot, exerted himself to achieve Mexican independence, hence endured exile in the United States from 1813 to 1822. After his return to Texas he united with those struggling in their turn for Texan freedom and later independence. He was elected as a delegate to the convention held at Washington on the Brazos, and his name appears among the signers of the Texas Declaration of Independence, 2 March, 1836. As a representative of his native Texas to the Mexican Congress, 1833, as a delegate to the Revolutionary Convention of Texas and signer of the Declaration of Texan Independence, as an upholder of the rights of the Texas Government, member of the Congress of the Republic (1838), and Senator of the first Texas State Legislature (1846), Jose Antonio Navarro commended himself to the gratitude of his fellow-countrymen and edified them by his loyalty to his Catholic Faith. Lieutenant-General Cabell of the Army of the Confederacy, who died in the Diocese of Dallas, 17 February, 1911, was a convert to the Catholic Faith.

Population According to Religious Belief.—In numbers, the Catholic population ranks third of all the religious denominations in the State. The Census Bureau's figures (1906) give Baptist bodies in the State, 401,720 communicants; Disciples of Christ 73,556; Lutherans 27,437; Methodists 317,495; Presbyterians, 62,090; Protestant Episcopalians, 14,346; Catholics, 308,556; Jewish congregation, 11,676. The figures given more recently by Catholic diocesan authorities show 311,667, and doubtless since the increase in the number of children communicants a larger showing may well be claimed. Altogether, of the population of Texas about 25 per cent is Protestant, about 9 per cent Catholic; all other religions, less than 1 per cent, leaving about 65 per cent having no definite religious belief.

Legislation.—The Constitution of Texas in its "Bill of Rights" (Act 1, Sec. 4) prohibits a religious test as a qualification for holding office or a public trust, or the exclusion of any one from office on account of religious sentiments, "provided he acknowledge the existence of a Supreme Being". Sec. 5 prohibits disqualification to give evidence in any court on account of religious opinions or of the want of religious belief, "but all oaths or affirmations shall be administered in the mode most binding upon the conscience". Sec. 6 enunciates the right of freedom of worship, prohibits compulsion to worship or to support or attend places of worship, or preference before the law of any religious society or mode of worship. Sec. 7 prohibits the appropriation of state money or property for the benefit of any sect or religious society, theological or religious seminary. For the proper observance of the Sunday etc. the laws of the State prohibit, under penalty, disturbing public worship also labour on Sunday or compelling to labour thereon. Hunting within one-half mile of a church or schoolhouse, horse-racing, and the sale of goods are also prohibited on Sunday. Cursing, swearing, and indecent language are punishable by statute as breaches of the peace. Under the Constitution each Legislative Chamber determines the rules of its own proceedings. Hence a chaplain for each chamber is usually elected and the sessions are opened with prayer. Christmas Day and all days appointed by the President of the United States or by the governor of the State as fasting or thanksgiving days are the only holidays of a religious nature in addition to Sunday sanctioned by law. Should the occasion ever arise wherein the integrity of the seal of confession should be in question before a Texas court there is little doubt that the constitutional guarantee of religious liberty would protect it, although no statutory provision covers the hypothesis.

The general law of incorporation obtains in the case of churches. Among the first-named purposes enumerated in the statute under which corporations are formed are, the "support of public worship, the support of any benevolent, charitable, educational or missionary undertaking". Any religious society may become a body corporate and any church or association failing to organize under the provisions of the statute cannot sue as a corporation or hold real estate. Schools and churches, cemeteries, public charity, and endowment funds of institutions of learning not used for profit and all buildings used by persons or associations of persons for school purposes are exempt from taxation. Clergymen, all ministers of the Gospel, engaged in the active discharge of their ministerial duties, are exempt from jury service. No compulsory military service is required of any one under Texas law.

Marriage is regarded as a civil contract, a common-law marriage; all licensed or ordained ministers of religion are among the officers in whose presence the marriage ceremony may be legally performed. For a legal marriage there must be in the parties capacity to contract, mutual consent, mutual wills expressed in the prescribed manner. A licence must be obtained from the county clerk of the county. The age at which marriage may be contracted is for males 16, for females 14. The consent of the parents of the parties is necessary for the issuance of a licence by the county clerk until, for males, 21 years of age, for females, 18. Marriage may be annulled because of certain legal impediments. A marriage between one of the Caucasian and one of the negro race is illegal and forbidden under penalty. Marriages are prohibited between persons related in certain degrees of kindred: A man with his mother, his father's sister or half-sister; his mother's sister or half-sister; his daughter, his father's daughter; his mother's daughter; his brother or sister's daughter; the daughter of his half-brother or half-sister; the daughter of his son or daughter; his father's widow; his son's widow; his deceased wife's daughter; or the daughter of his deceased wife's son or daughter. Similarly for a woman with male relatives of equal degree.

The grounds for divorce may practically be classed under four heads: (1) Excesses in, or outrageous treatment from one of the parties, such that living together is insupportable; (2) adultery by one party; (3) Abandonment of one party for three years; (4) conviction of felony and confinement in State prison of one of the parties. The district court has jurisdiction in cases of divorce and petitions are granted only upon full and satisfactory evidence, and upon verdict of a jury, if a jury be demanded; if not, upon judgment of the court, affirming material facts alleged in the petition. Evidence of collusion between the parties being known, or where both parties are equally guilty, no divorce is granted. Divorced persons may legally re-marry. The custody of the children by the marriage is granted by the court to either party as may appear suitable. The court also makes such division of community estate as seems just.

The system of public education is non-sectarian in the meaning of the law. "The reading of the Bible without comment, the recitation of the Lord's Prayer and the singing of songs" of a generally religious character have been judged by the courts as legitimate exercises in the public schools. By a decision, however, of the State department of education the wearing of a distinctively religious garb or religious symbols by the teacher constitutes the school sectarian. No law, however, covers this contingency. No compulsory education law has been passed by the Legislature though some little agitation to that end has been made. The State Constitution and consequent legislation provide for lunatic asylums, an institute for the blind, for the deaf and dumb, for orphans and confederate veterans, and the widows of confederate veterans. For the care of orphans, the aged, and other infirm, private charity also exerts itself, in the lead of which is the Catholic Church.

The Tower, Mission of San José

Besides the regulation of the sale of liquor by licence, penalties more or less severe are attached by statute to selling intoxicating liquor to certain persons: wild Indians, minors, habitual drunkards; to the sale of intoxicants at certain times: Sundays, days of election; or in certain places: places of religious worship, places devoted to educational and literary purposes; to permitting in places, licensed for the sale of liquor, certain stated pastimes and persons: gaming, dancing, minors, etc. Local option may be voted in any county or legal subdivision thereof, and penalties are attached to selling or giving liquor in such prohibited districts. The sale of tobacco to minors is also regulated by law.

The Legislature makes an annual appropriation for a chaplain of the penitentiary, but any clergyman may, with the consent of the superintendent, visit the inmates at seasonable times, and even preach, though then the teaching must be non-sectarian. Any inmate also may have such religious ministrations as he desires. The same rules govern religious ministrations in the house of correction and the reformatory. Bequests for religious purposes are undoubtedly recognized. The provisions of the Constitution with respect to religion would most probably protect bequests for Masses for the repose of the testator's soul especially if the bequests were made to a named person. The law highly favours bequests made for charitable purposes of general philanthropic character. The incorporation of cemetery associations is authorized with but little different conditions from the general law. Severe penalties are attached to the desecration of graves.

JOHN F. O'SHEA.

Thabor, MOUNT.—The name of Mount Thabor, הַר תָבוֹר, is rendered in the Septuagint as ὄρος Θαβώρ, and in Jeremias and Osee as Ἰταβύριον. It is under this last form (Itabyrion or Atabyrion) that the mount figures in the historical works of the ancients. The Arabs call it Jebel et Tur (mountain of mountains), a name which they give likewise to Mounts Garizim, Sinai, and Olivet. Mount Thabor is distinguished among the mountains of Palestine for its picturesque site, its graceful outline, the remarkable vegetation which covers its sides of calcareous rock, and the splendour of the view from its summit. Nearly isolated on all sides and almost hemispherical in shape it rises in a peak 1650 feet above the Plain of Esdraelon, which it bounds on the north and east, about five miles south-east of Nazareth. It attains a height of 1843 feet above the level of the Mediterranean and of 2540 feet above that of the Lake of Tiberias. Josephus (Bell. Jud., IV, i, 8) gives it a height of thirty stadia, or 18,201 feet, but he doubtless made use of the figure Δ (four stadia or 2427 feet), which the copyist must have replaced by Λ (thirty). The summit forms an oblong plateau about 3000 feet long, from north-west to south-east, by 1000 wide. The eye is immediately attracted to the north-east by the gigantic masses of Great Hermon, then to the Valley of the Jordan, the Lake of Tiberias and the mountain chains of Hauran, Basan, and Galaad. To the south are Naim and Endor at the foot of Jebel Dahy or Mount Moreh (Judges, vii, 1), wrongly identified by Eusebius and St. Jerome with Little Hermon (Ps. xli, 7); somewhat farther off is seen Mount Gelboe. Westward the rich plain of Esdrelon stretches as far as Mount Carmel and innumerable Biblical and historical localities stir thoughts of the past.

Mount Thabor is the object of poetical comparisons on the part of the Psalmist (Ps. lxxxviii, 13), the Prophet Jeremias (xlvi, 18), and the Prophet Osee (v, 1). The beautiful mountain also played an important part in history. There the Prophetess Debbora secretly assembled 10,000 Israelites under the command of Barac, who subsequently swept down upon the army of Sisara and put it to flight at the torrent of Cison (Judges, iv, v). Later the Madianites and Amalecites slew there the brothers of Gedeon and other Israelites who had sought refuge there from the enemy (Judges, vi, 2-viii, 18–19). At the division of the Promised Land, Thabor formed the boundary between Issachar and Zabulon (Jos., xix, 22). Within the tribe of Zabulon, but near Dabereth, a city of Issachar, the Book of Josue (xix, 12) mentions the city of Ceseleththabor, in Hebrew Chisloth-Thabor, which means "slope or side of Thabor". I Par. (vi, 77) also speaks of a city of Zabulon called simply Thabor and assigned to the Levites descended from Merari. This is an abbreviated form of the name of the same city, and is probably the same as that which as Dabour figures among the Galilean cities conquered by Rameses II, according to the "Papyrus Anastasii" (I, xxii, 2). Polybius (Hist., V, lxx, 6) relates that in 218 B.C. Antiochus the Great captured by stratagem the city of Atabyrion in Galilee. History makes no further mention of this city, not even in connexion with the bloody battles fought at the foot of Mount Thabor in 53 B. C. between Alexander, the son of Aristobulus, and Gabinius, the lieutenant of Pompey ("Ant. Jud.", XIV, vi, 3; "Bell. Jud.", I, viii, 7). Eusebius alone again refers to it in the words "Dabira . . . a village of the Jews on Mount Thabor" ("Onom.", ed. Klostermann, 78). Dabereth (Jos., xix, 12; xxi, 28) is indisputably the modern village of Dabûriyéh, at the foot of Mount Thabor towards the west.

Mount Thabor
From a Photograph

A ten minutes' ascent northward from Nazareth brings one to the ruins of a Hebrew place called by the natives Khirbet Daboura (ruins of Daboura) and also Abu Amoûd (father of columns). This is the site of the Biblical Ciseleth Thabor, of the Daboura of the Egyptians, and the Atabyrion of the Greeks. It commanded the road of caravans and armies. During the revolt of the Jews against the Romans, Josephus surrounded "the plateau of Thabor" with a wall of circumvallation twenty-six stadia or about two miles in circumference, which task was accomplished in forty days. This formed a kind of entrenched camp where the rebels, pursued from all directions, sought refuge in order to organize their last stand. Vespasian's lieutenant, Placidus, marched against them with a force of 600 horsemen, enticed them into the plain by stratagem, and completely defeated them ("Vita", 37; "Bell. Jud.", II, iv, xx, 6; i, 8). In the fourth century of our era Mount Thabor, which was acknowledged as the scene of Christ's Transfiguration, became a place of pilgrimage and was surmounted by a basilica and several churches and chapels. In 1101 the Benedictine monks rebuilt the sacred edifices and erected a fortified abbey, where they withstood several attacks by the Saracens, but after the battle of Hattin (1187) they had to abandon the mountain. Melek el Adel built there (1210–12) a large and solid fortress which the Crusaders attacked in vain in 1217; in the following year Melek el Adel caused it to be dismantled. The plateau of Mount Thabor is now occupied by Franciscans and Schismatic Greek monks.

Barnabas Meistermann.

Thabraca, a titular see of Numidia near the sea, between the Armua and the Tusca. Thabraca was the last Numidian city in the direction of the Zeugitana and was a Roman colony. It was connected by a road with Simitthu, to which it served as a port for the exportation of its famous marbles. At Thabraca Gildo, the brother of Firmus, committed suicide. Under Genseric it had a monastery for men and one for women. It is now Tabarka, annexed to the civil district of Souk el-Arba, Tunis, and a rather important fishing centre. Confronting it, at a distance of about 365 yards, is the small Island of Tabarca, where the Genoese Lomellini, who had purchased the grant of the coral fishing from the Turks, maintained a garrison from 1540 to 1742. Here may still be seen the ruins of a stronghold, a church, and some Genoese buildings. At Tabarka the ruins consist of a pit used as a church and some fragments of walls which belonged to Christian buildings. There are also two Turkish fortresses, one of which has been repaired. The city contains several Christian cemeteries, many of the tombs having covers adorned with curious mosaics. An inscription (C. I. L., VIII, 173–82) mentions the cult of the martyr Anastasia and her companions. The bishops of Thabraca, who met with those of the proconsulate, were: Victoricus, at the Council of Carthage (256); Rusticianus, at the Conference of Carthage in 411, where his competitor was the Donatist Charentius, and signer in 416 of the letter from the council of Proconsular Africa to Pope Innocent; Clarissimus, who in 646 signed the letter from the same Council to Patriarch Paul of Constantinople against the Monothelites.

S. Pétridès.

Thacia Montana, a titular see in Africa Proconsularis, suffragan of Carthage. An inscription discovered in the ruins known as Henshir Bedji, among them a church, near Bordj Messaoudi, seems to indicate that this was the site of the *municipium* of Thacia, to which Wady Tasaa, or Tessa, also owes its name. It was located on the highway between Carthage and Theveste, midway between Musti (Mest) and Drusiliana (Khanguet Kdim), Tunisia. It is mentioned by Ptolemy (IV, 3), the "Tabula Peutinger.", and the "Geogr. Ravennat." (151); it was fortified during the Byzantine period, and at the end of 545 the Byzantine general, John, was defeated and slain there. On the other hand, at the present Eufida, 6¼ miles west of Botria (Henshir Batria), at the ruins called Henshir Zaktoun, an inscription has been found proving the existence at that place of another *municipium* called Thaca, also fortified during the Byzantine period. Mgr Toulotte ("Geog. de l'Afrique Chrétienne Proconsulaire", Paris, 1892, 258–60) assigns to the first locality two bishops, the Donatist Cresconius, present at the Council of Cabarsussi in 393, and Victor, who in 646 signed the letter against the Monothelites from the Council of Proconsular Africa to the Patriarch Paul of Constantinople; to the second locality he assigns Rufinus, present at the Council of Carthage in 525, and Probus who in 646 signed the letter to the Patriarch Paul. The two last-named were entitled bishops of "Tacia Montana". It may be questioned whether there were really bishops of Thaca, or if there was not near Thacia a place of the same name to which was added a distinctive epithet. The official list of titular sees of the Roman Curia mentions only Thacia Montana and identifies it with Bordj Messaoudi.

Müller, *Notes à Ptolémée*, ed. Didot, I, 651; Diehl, *L'Afrique byzantine* (Paris, 1896), passim.

S. Pétridès.

Thaddeus, Saint. See Jude, Epistle of Saint.

Thænæ, a titular see in Africa Byzacena. It is mentioned in numerous ancient geographical documents and was a maritime city of Byzacium in Africa Propria, situated at the mouth of a river (now Wady Tina) which emptied into the Syrtis Minor. Its ruins (Henshir Tina) are somewhat north of Ounca, formerly Junca, Tunis. The city was crowned by a hill surmounted by an acropolis, its walls attained a length of about two Roman miles and it had a large cemetery. The name Thænæ has numerous variations in Greek and Latin writers, but is borne out by epigraphy. The Punic coins of the city show that its native name was Tainat. Under Hadrian or Antoninus it became a colony which was called "Colonia Ælia Augusta Mercurialis Thænitana". Six of its bishops are known, Eucratius at the Council of Carthage (256); Latonius, at the conference of Carthage (411), where he had as rival the Donatist Securus, and at a Council of Thelepte; Peregrinus, a former deacon of St. Augustine; Paschasius, exiled by Huneric in 484; Pontianus, present at the Council of Junca (525); Felix, who in 641 signed the letter from the provincial council to the emperor against the Monothelites. A council was held at Thænæ at the beginning of the fourth century, three of its canons being extant (Mansi, "Amplissima Coll. conciliorum", IV, 440).

S. Pétridès.

Thagaste (Tagaste), a titular see in Numidia, was a rather important municipality. It is mentioned by Pliny (V, iv, 4) and the "Itinerar. Antonini" (44), but nothing is known of its history. It is famous as having been the birthplace of St. Augustine, who was born there in 354 of the pagan Patricius and St. Monica. St. Augustine speaks of a monastery of Thagaste where he lived with Severus his compatriot and friend, later Bishop of Milevis. Only three bishops of Thagaste are known: St. Firmus (end of third century), mentioned in the Roman Martyrology on 31 July; St. Alypius (q. v.), b. at Thagaste, the friend of Augustine, whose feast is 15 August; and Januarius, sent by Huneric into exile (484), where he died for the Faith. The See of Thagaste still existed about 600. At the time of the French occupation the country was under the dominion of the Arabized Berber tribe of the Hanensha, whose territory bordered on the modern Tunisia. Thagaste is now Souk Ahras, capital of a commune of 7500 inhabitants of whom 4000 are Europeans, and of a mixed community of 42,600 inhabitants, Department of Constantine, Algeria. Souk-Ahras, its modern representative, is built on a small peaked plateau, and is well served by railways. It is a very important agricultural centre, its industries consisting of vineyards, cattle-breeding, vast forests, and mining. Ruins of a basilica and various Christian monuments have been found.

Toulotte, *Géographie de l'Afrique chrétienne. Numidie* (Paris, 1894), 281–85; Renier *in Comptes rendus de l'académie des inscriptiones et belles-lettres* (1857–58), 82.

S. Pétridès.

Thagora (Tagora), titular see in Numidia, mentioned by the "Tabula Peutingeriana", which calls it Thacora, and by the "Itinerarium Antoninum"; Justinian fortified it. It is now the village of Taoura, near Ain Guettar, about thirteen miles south-east of Souk Ahras (ancient Thagaste), Department of Constantine, Algeria. It has ruins of baths, a church, and the fortress of Justinian, and a number of inscriptions have been discovered. Thagura was the birthplace of St. Crispin, martyred at Theveste (now Tebessa) under Diocletian, and whose feast is observed on 5 December. It was also the scene of the martyrdoms of Sts. Julius and Potamia and ten other martyrs who are likewise commemorated in the Roman Martyrology on the same day. The first two figure in the Hieronymian Martyrology and the Calendar of Carthage. Three bishops of Thagura are known: Xanthippus in 401, mentioned in a letter of St. Augustine's; Restitutus, present in 411 at the conference of Carthage; Timotheus, exiled by Huneric in 484.

Toulotte, *Géographie de l'Afrique chrétienne: Numidie* (Paris, 1894), 285–87; Diehl, *L'Afrique byzantine* (Paris, 1896), 605.

S. Pétridès.

Thais (Thaisis, or Thaisia), Saint, a penitent in Egypt in the fourth century. In the Greek menology her name occurs on 8 Oct., it is found also in the martyrologies of Maurolychus and Greven, but not in the Roman. Two lives are extant, one, originally in Greek, perhaps of the fifth century, the other, in verse, by Marbod, Bishop of Rennes, who died in 1123 ("Acta SS.", IV, Oct., 223; "Bibl. hag. lat.", II, 1161). The saint is represented burning her treasures and ornaments, or praying in a cell and displaying a scroll with the words: "Thou who didst create me have mercy on me". According to the legend Thais was a public sinner in Egypt who was converted by St. Paphnutius, brought to a convent and enclosed in a cell. After three years of penance she was released and placed among the nuns, but lived only fourteen days more. The name of the hermit is given also as Bessarion and Serapion the Sindonite. Delahaye says (Anal. boll., XXIV, 400), "If the legend is historical the hermit must have been Paphnutius".

Butler, *Lives of the Saints:* 8 October; Dunbar, *Dict. of Saintly Women* (London, 1904); *Anal. boll.*, XI, 291, 298; Nau, *Hist. de Thaïs* in *Annales du musée Guimet*, XXX (1903), 51; Battifol, *La légende de Thaïs* in *Bull. de litt. eccl.* (Toulouse, 1903), 207.

Francis Mershman.

Thalberg, Sigismond, musical composer and pianist, b. at Geneva, 1812; d. at Posilipo, Italy, 27 April, 1871. The precise date of his birth is a matter of dispute. He was a natural son of Prince Moritz Dietrichstein, and at an early age was brought by him to Vienna. While yet a boy, at the Polytechnic Institute of the Austrian capital, Thalberg formed a friendship with the young Duc de Reichstadt (popularly known as L'Aiglon), who so fired his imagination with the vision of military glory that he was upon the point of entering that career. From this step he was saved by the early discovery of his musical genius through Mittag, the Viennese bassoonist. Devoting himself in good earnest to music, of which he had acquired some knowledge from Mittag, he studied theory under Sechter and pianoforte technic under Hummel. At the age of fourteen he had already made his first public appearance as a pianist in Prince Metternich's salon. Four years later (1830) he began touring Europe, was received with enthusiasm by the virtuosi of the day, and was eventually (1834) appointed court chamber-musician by the emperor. During the next quarter of a century, a period in which the development of the pianoforte made enormous advances, Thalberg's fame was unrivalled save for his great contemporary, Franz Liszt. His concerts and recitals drew crowds, not only in all the capitals of Europe, including London, but also in Brazil and in the United States (1857). The world of musical criticism was for a time divided between the two parties of Thalberg's admirers and those of Liszt. To Liszt, nevertheless, is due perhaps the most decisive encomium of Thalberg as a pianist: "Thalberg is the only artist who can play the violin on the piano". In 1843 he married the widow of Boucher, the painter, a daughter of the famous operatic basso, Lablache.

Thalberg's chief contribution to the advancement of musical art seems to have been as an exponent of possibilities in pianoforte technic which had been unsuspected before his time. He not only possessed the mastery of touch in a transcendent degree and excelled in *sostenuto* playing by the use of the pedal, but actually discovered a method of making two hands produce the triple effect of melody, accompaniment, and bass on one keyboard—a resource exploited by many composers after him. His compositions, some 100 in number, include two operas, "Florinda" and "Christina di Suezia", both important only as demonstrating his unfitness for this field of art. He composed successfully only for the instrument of which he was an unquestioned master, his best-known works being the fantasias on operatic and other popular melodies.

Hume, in *Dict. of Music and Musicians* (London, 1903–11); *Thalberg and Vieux-temps Grand Concert Book* (pamphlet preserved in the British Museum, London).

E. MACPHERSON.

Thalhofer, VALENTIN, German theologian, b. at Unterroth, near Ulm, 21 January, 1825; d. at the same place, 17 September, 1891. He took his gymnasial studies and philosophy at Dillingen, then from 1845 studied theology at the University of Munich. In 1848 he received the degree of Doctor of Theology and was ordained priest. After this he was prefect at the seminary for priests at Dillingen (1850–63), professor of exegesis at the lyceum of Dillingen (1863–1876), director of the seminary for priests, the Georgianum, at Munich, and professor of pastoral theology at the University of Munich. In 1877 he was made cathedral dean and professor of liturgy at Eichstätt, and in 1899 became the cathedral provost there. He was an able and highly respected teacher, a man of noble character, a zealous confessor, pulpit orator, and catechist, and was a fruitful writer, thorough and intellectual in his work. His labours at the Georgianum, for which he was highly praised, greatly benefited the institution. His first publication was a prize essay at Munich on the bloodless sacrifice of the Mosaic worship (1848). In 1855 he wrote in the report of the Dillingen lyceum for that year, a dissertation on the doctrine of sacrifice contained in the Epistle to the Hebrews. In the same year he began a successful opposition to the pseudo-mysticism and Irvingism which were spreading in Swabia at that time. His chief work in this direction was the "Beiträge zur Geschichte des Aftermysticismus und insbesondere des Irvingianismus im Bistum Augsburg" (1857). His excellent commentary on the Psalms was very popular (first published in 1857; 7th ed., 1904). In 1860–63 he edited the official publication of the Augsburg Diocese and brought it to greater prosperity. Among the literary work done during his residence at Munich should be mentioned his editing of a "Library of the Fathers" in eighty volumes (1869–88); a work on the sacrifice of the Old and New Covenants (1870); and the editing of the "Lehrbuch der biblischen Hermeneutik" of his deceased friend Franz Xavier Reithmayr (1874). At Eichstätt he was commissioned by the bishop to revise the "Rituale Romano-Eystettense", and in addition issued a smaller ritual as a manual for the clergy of the diocese (1879–80). He then began his chief work, a large "Handbuch der Liturgik", which rests on a thorough study of the original authorities and is still indispensable. Of the special liturgies, he published himself in 1890 the "Liturgie des heiligen Messopfers", and from the papers of the deceased Andreas Schmid he added to this in 1893 the "Liturgie des kirchlichen Stundengebetes", the "Liturgie der Sakramente und Sakramentalien", and the doctrine of the church year. Adalbert Ebner began a revised edition of this work, but unfortunately no more has been published than the first section of the first volume (1894). Schmid also edited from Thalhofer's literary remains "Die heilige Messe und das Priestertum der katholischen Kirche in 25 Predigten dargestellt" (1893). In addition to these larger works Thalhofer also wrote excellent articles for theological reviews and for the "Kirchenlexikon" of Freiburg.

SCHMID, *Dr. Thalhofer* (Kempten, 1892), compiled from the subject's own papers.

KLEMENS LÖFFLER.

Thangmar (THANKMAR), historian, b. about the middle of the tenth century; d. probably at Hildesheim after 1022. His first appearance in history is as the head of the cathedral school at Hildesheim; at a later date he became dean of the cathedral, and being at the same time notary and librarian his position was a very important one. Thangmar was distinguished both as a scholar and a statesman; he taught Bishops Bernward of Hildesheim, Meinwerk of Paderborn, and Benno of Meissen, as well as the Emperor Henry II. He exercised great influence over Bernward of Hildesheim, and a large part of the affairs under episcopal control were directed by him. In 1000 he accompanied Bernward to Rome, and was sent several times to the imperial court as the representative of the bishop to settle important matters, being highly esteemed by Emperor Otto III. After the death of Bernward in 1022 he wrote an account of the active and varied life of the bishop, a biography for which he had already gathered the material and of which he had probably written the first ten chapters during the years 1008–13. He had been an eye-witness of many of the events he relates and had taken an active part in all important measures. As he says himself, Bernward trusted him as a child does its father. Consequently his "Vita Bernwardi" is one of the finest biographical productions of the Middle Ages, and is also one of the most valuable authorities for an important period of German history. He displays much affection for the dead bishop, and has written a plain and simple narrative, unrhetorical and truthful. It is only in the account of the dispute between the Archbishops of Hildesheim and Mainz as to the right of jurisdiction over Gandesheim that Thangmar appears at times to be a partisan of Bernward. The best edition is that in the "Mon. Germ. Hist.: Scriptores", IV, 757–782; it is also found in Migne, P. L., CXL, 393–436. The life has been edited in German by Hüffer (Berlin, 1857), and by Wattenbach (Leipzig, 1892).

WATTENBACH, *Deutschlands Geschichtsquellen*, I (Berlin, 1893), 346–349; BEELTE, *Thangmar, sein Leben u. Beurteilung seiner Vita Bernwardi* (Hildesheim, 1891).

PATRICIUS SCHLAGER.

Thanksgiving before and after Meals.—The word *grace*, which, as applied to prayer over food, always in pre-Elizabethan English took the plural form *graces*, means nothing but thanksgiving. (Cf. the Latin *gratiarum actio* and the Italian *grazie*, "thanks".) Although the expression of gratitude to God for His bounty when He has supplied the wherewithal to satisfy the most primary of human needs is an idea which is by no means exclusively Christian (see Deut., viii, 10; Ex., xviii, 12; Livy, XXXIX, xliii; Athenæus, iv, 27), still in the Christian dispensation, following the personal example of our Saviour (John, vi, 11 and 23), the obligation of thanksgiving seems to have been emphasized from the very beginning. Thus, under conditions which altogether exclude the idea of a Eucharistic celebration, we are told of St. Paul (Acts, xxvii, 35) that "taking bread he gave thanks to God in the sight of them all and when he had broken it he began to eat" (Cf. I Tim., iv, 3–5; Rom. xiv, 6; I Cor., x, 30). Passing over the "Didache", in which the formulæ of prayer over food may be connected with the Eucharist or the Agape, we find (c. A. D. 123) the apologist Aristides declaring of his fellow Christians that "over their food and over their drink they render God thanks" (Camb. Texts and Studies, I, 49). Similarly Tertullian, "We do not recline at a banquet before prayer be first tasted—in like manner prayer puts an end to the feast" (De orat., xxv). In nearly all the Fathers similar passages may be found. In particular the Christian poet Prudentius, at the beginning of the fifth century, has a set of hymns "Ante cibum" and "Post cibum" in which occur such verses as the following (Cath. Hymn., III, Ante cib., ii, 10 sq.):—

"Without Thy presence, nought, O Lord, is sweet,
No pleasure to our lips can aught supply.
Whether 'tis wine we drink or food we eat,
Till Grace divine and Faith shall sanctify."

Many anecdotes also might be cited from such early writers as Gregory of Tours and Bede, clearly attesting the prevalence of the practice of saying grace. Bede, for example, when he wishes to tell us that Oswald and Bishop Aidan were about to begin dinner, remarks that "they were on the point of stretching out their hands to bless the bread" (Hist. Eccl., III, vi). The Welsh legal codes, ascribed to the ninth and tenth centuries, when speaking of the king's three indispensable attendants, name first "his priest to say Mass and bless his meat and drink", while the function of the queen's priest is also to bless her meat and drink (Haddan and Stubbs, I, 231 and 235). William of Malmesbury (Gest. pont., IV, 140) refers to St. Wulstan's blessings at table as if they perpetuated some custom that was peculiarly English; but that the Normans were no strangers to such a practice is curiously proved by a scene in the Bayeux tapestry, where we look on Bishop Odo at Bayeux as he stands up before the table at the banquet, while the inscription beside him tells us: "Et hic episcopus cibum et potum benedicit."

In the religious orders, naturally the custom of grace was much insisted upon. A special section is assigned to it in c. xliii of the Rule of St. Benedict, and this was much amplified in later expositions. The early monastic rules in fact generally required that each dish brought to table should be separately blessed before it was set before the community. In the "Ancren Riwle" (c. A. D. 1200), which preserves perhaps the earliest instance of the word "graces" in an English treatise, the grace is described as said standing, and, since it included the "Miserere", it must have been pretty long. The souls of the faithful are also prayed for in the thanksgiving after meat. Great importance was attached to the proper learning of the grace by children. It is commonly a prominent feature in the Books of Curtesye and other medieval works for the instruction of the young. Moreover most educational foundations, like the English public schools and the colleges at the universities, had special forms of grace prescribed for them, often metrical in part, some of which are maintained to the present day. The grace officially provided by the Church is contained in the "Breviarium Romanum" under the heading "Benedictio Mensæ". The form for supper, both before and after eating, varies slightly from that assigned for dinner, and during the octaves of certain greater festivals special verses are substituted for those in ordinary use. Grace begins with the acclamation "Benedicite", which is spoken by the officiant and repeated by all present. The "Grace before and after meals" commonly found in the catechisms for children and used by the laity consists substantially of a translation of two items in the longer Latin grace, the blessing spoken before the meal and the thanksgiving afterwards.

As for this longer Latin grace contained in the Breviary, Abbot Cabrol says with reason that the whole series of formulæ with their appropriate citations from the Psalms, particularly Ps. xxxiii, possess a very high antiquity. In point of fact a great part of the existing forms can be traced back to the ninth century. See for example Rhabanus Maurus, "De ins. cleric.", II, x. The benediction, "Bless us, O Lord, and these Thy gifts", etc., which is retained in our short grace, is to be found in the "Gelasian Sacramentary", which is considerably earlier. Moreover, without precise verbal coincidence, it may be said that our existing longer grace echoes the language of the very earliest document of the kind preserved to us. This is contained in a treatise dubiously ascribed to St. Athanasius, but certainly of early date and, probably at least, the work of a contemporary. It is upon this treatise that G. von der Goltz largely bases his theory of the development of grace for meals out of the primitive Eucharist (Goltz, "Tischgebete und Abendmahlsgebete", pp. 33 sq.). This work (De virginitate) is remarkable for the circumstance that the writer recommends as a prayer before an ordinary meal precisely that form of words which we find in the "Didache" in connexion seemingly with a Eucharistic celebration. We also find in this fourth-century document the versicle, "Our merciful and compassionate God has given food to them that fear Him", and in the existing Breviary grace we have:—

"The Lord merciful and compassionate, has perpetuated the memory of His wonders. He has given food to them that fear Him."

Another very early grace may be found in the "Apostolic Constitutions", VII, xliv.

BAUDOT in *Dictionnaire d'archéol. chret. et de liturgie*, s. v. *Bénédiction de la Table;* CABROL, *Le livre de la prière antique* (Paris, 1900), 364–369; GAVANTUS, *Thesaurus sacrorum rituum*, III (Venice, 1823), 233–25; MARTÈNE, *De antiquis ecclesiæ ritibus*, IV (Venice, 1783), 29–32; BRADSHAW in FURNIVALL, *the Babees Book*, Early Eng. Text Soc., Preface (London, 1885).

The fullest details however are given in the excellent little monograph of H. L. Dixon, *Saying Grace* (London, 1903), which contains many documents printed entire. But see also: VON DER GOLTZ, *Tischgebete und Abendmahlsgebete* (Leipzig, 1905), one of the series *Texte u. Untersuchungen*, and KELLER in *Archæological Journal*, XXI, 347–365.

HERBERT THURSTON.

Thanksgiving Day.—A civil holiday observed annually in the United States of America on the last Thursday in November. The president issues a proclamation, calling on the citizens, all Federal officials, and others subject to Federal authority to observe the day as one of national thanksgiving and prayer. The governors of states concur in the president's proclamation and also recommend the citizens to observe the holiday, and all public business is suspended. The custom originated in 1621, when Governor Bradford of the Plymouth colony appointed a day for public praise and prayer after the first harvest, and the practice spread throughout the other New England colonies. The first national observance was when President Washington, at the request of

Congress, recommended Thursday, 26 November, 1789, to the people of the United States "as a day of public thanksgiving and prayer to be observed by acknowledging with grateful hearts the many and signal favours of Almighty God". This proclamation exhorted the people to "beseech Him to pardon our national and other transgressions, to promote the knowledge and practice of true religion and virtue, and to grant unto all mankind such a degree of temporal prosperity as He alone knows to be best". It was the first observation of the day on the date that present custom holds it. In 1817 Thanksgiving Day was first officially noticed in New York State, and by 1859 its observance had spread to twenty-eight states and two territories. In 1863 President Lincoln made his first proclamation, naming the last Thursday of November as a day of national observance, which day President Johnson also selected in 1867 and President Grant in 1870. Since then there has been no change, the last Thursday in November being named in each year's proclamation. Catholic recognition of the day by special religious features has only been of comparatively recent date and not as yet (1911) of official general custom. Historians of the day attempt to trace the origin of Governor Bradford's idea (1621) back to the old Hebrew Feast of the Tabernacles and through the ages to the ancient Greek Harvest Feast, Thesmophoria, the Roman Cerealia, and the English Harvest Home. In the Dominion of Canada the governor-general by proclamation sets aside the last Monday in October as a legal holiday for the purpose of acknowledging God's providence and expressing the nation's dependence on His bounty.

THOMAS F. MEEHAN.

Thapsus, a titular see in Byzacene Africa. It was a Phœnician market on the coast of Byzacium in Africa Propria, established near a salt lake on a point of land eighty stadia from the Island of Lopadussa, confronting it, between Leptis Minor and Sullectum, and had both military and trading ports. In 46 B. C. it was the scene of the defeat by Cæsar of the generals of Pompey and King Juba. He exacted of the vanquished a payment of 50,000 sesterces. Thapsus then became a Roman colony. Vigilius, the only known bishop, assisted at the assembly convoked at Carthage in 484 by King Huneric and was exiled by the latter with his colleagues. He is the author of several controversial works against the Arians and the Eutychians (see VIGILIUS). The ruins of Thapsus are located at Ras Dimas, near Bekalta in Tunisia. They consist of the remains of a mole, a fortress, an amphitheatre, and large cisterns; in the neighbourhood there is a Punic necropolis.

SMITH, *Dictionary of Greek and Roman Geography* (London, 1878), s. v.; MÜLLER, *Notes to Geographi græci minores*, ed. DIDOT, I (Paris, 1882), 88, 469; TOULOTTE, *Géographie de l'Afrique chrétienne, Byzacène et Tripolitaine* (Montreuil, 1894), 201.

S. PÉTRIDÈS.

Thasos, a titular see in Macedonia, suffragan of Thessalonica. The island of Thasos was anciently known under many names, such as Æria, Æthra, and, on account of its gold mines, Chrysos. Its first known inhabitants were the Phœnicians, whom the Greeks supplanted. The latter extended the prosperity of the island, which had a powerful navy and founded many colonies—Parium, Datos (afterwards Philippi), and others. After having repulsed, in 494 B.C., an attack by Histiæus of Miletus, Thasos surrendered in 492 B. C. to Xerxes, who took its navy and exhausted the island with the taxes he levied. After the defeat of the Persians, Thasos joined the Confederation of Delos, but, having quarrelled with Athens, was defeated by sea and by land and, completely ruined by its rival, became its tributary in 465 B. C. Polygnotus, the celebrated painter, a native of Thasos, then followed the Athenians. The island passed from the dominion of Athens to that of Sparta, then again to that of Athens, and at last became a Macedonian possession. The Romans gave it back its independence in 197 B. C., until it was annexed to the Roman Empire and included in the Province of the Islands. Le Quien (Oriens christianus, II, 87) mentions only one bishop, Honoratus, who was present at Chalcedon in 451. Alexander, in the eighth century, is known by an inscription (Échos d'Orient, IV, 93). At least as early as the tenth century, Thasos was a suffragan of Mitylene (Gelzer, "Ungedruckte . . . Texte der Notitiæ Episcopatuum", 559); under Manuel Palæologus (1391–1425) it was raised to the rank of an autocephalous archbishopric (Gelzer, op. cit., 613). The relics of the holy martyrs Mark, Sotericus, and Valentina, venerated on 24 October, were brought thither. The Patriarch St. Nicephorus lived as an exile there under Leo the Armenian.

The Venetians took Thasos in 1204, and it was given to the Dandolo family; the Greeks afterwards recaptured it, and it was then occupied by the princes Gateluzi of Lesbos, and finally conquered by Mohammed II, in 1462. In 1841 the Sultan Mahmoud II granted its revenues to Mehemet Ali, Khedive of Egypt, who introduced a garrison of Egyptians into the island; but the Turks reoccupied it in 1908, and Egypt now (1911) receives only the revenues, according to the terms of the treaty of 1841. The island constitutes a caza depending upon the sanjak of Drama and the vilayet of Salonica. It is fertile and well timbered, and has an area of 100 square miles and a population of 18,000, all Greek schismatics.

LACROIX, *Iles de la Grèce* (Paris, 1853), 372–6; HASSELBACH, *De insula Thaso* (Marburg, 1830); PROKESCH D'OSTEN, *Dell' isola di Taso* in *Dissertazioni della pontificia academia romana di archeologia*, VI (Rome, 1835), 181 sq.; MILLER, *Le Mont Athos, Vatopédi, l'île de Thasos* (Paris, 1889); CUINET, *La Turquie d'Asie*, I (Paris, 1892), 524–528.

S. VAILHÉ.

Thaumaci, a titular see in Thessaly, suffragan of Larissa, commanding the defile of Cœle at the entrance to the Thessalonian plain. Vainly besieged in 198 B. C. by Philip, it was taken in 191 by the consul Acilius Glabrio in the war against Antiochus. The Greeks call it to-day Domokos; it is the chief town of the demos of Thaumakoi, and a well-fortified place; it has 1600 inhabitants, and is beautifully situated on a rock crowned by a medieval fortress, west of which are some old walls. During the last Greco-Turkish war, in 1897, it was the final halting-place of the vanquished Greek army. We do not know if Thaumaci was a bishopric whilst Thessaly owned allegiance to the pope; in any case, when Illyricum, in 732, was withdrawn from the pope's jurisdiction by the emperors of Constantinople, this city became a suffragan of Larissa. In 1882, during the annexation of Thessaly to Greece, the diocese became dependent upon the autocephalous Church of the Kingdom of Greece. After a while the diocese was suppressed by the new organization of this Church (1899). Le Quien, "Oriens christianus", II, 127, names only three bishops of Thaumaci from the sixteenth to the eighteenth century; it would be easy to augment this list. After the Frankish conquest in the thirteenth century, Thaumaci became a Latin bishopric, and four of its titularies are mentioned: Gualo, 1208: Marcus Morellus, about 1334; John, d. 1366; and another John, a Franciscan monk, who replaced him.

LE QUIEN, *Oriens christianus*, III, 981, 1123; EUBEL, *Hierarchia catholica medii ævi*, I, 233.

S. PÉTRIDÈS.

Thayer, JOHN, **missionary, convert, first native of New England ordained to the priesthood, b. at Bos-**

ton, Mass., 1755; d. in Limerick, Ireland, 5 February, 1815. His family were among the early Puritan settlers of New England and all during his career he manifested much of their stern unbending character. Educated at Yale, he became a Congregationalist minister and as such served during the Revolutionary War as chaplain of a company organized for the defence of Boston and of which John Hancock was commander. After the war he wandered over Europe and was in Rome when the beggar-saint Benedict Joseph Labre died. An attempt he made to dispute some of the miracles wrought through Blessed Labre's intercession resulted in Thayer's conversion to the Faith, 25 May, 1783. His own account of this conversion, one of the first of prominent New England Protestants, was printed in 1787 and reissued in several editions in the United States, in London, and in Ireland. It was also translated into French and Spanish, and created a great controversial sensation at the time. Ambitious to convert his non-Catholic fellow-countrymen, he then took a theological course under the Sulpicians in Paris where he was ordained priest in 1789. He returned to the United States the following year and was put in charge of the newly organized Catholic congregation in Boston but soon failed as a pastor because of his erratic and contentious temper. He left Boston in 1799, and ministered for a very short time at Alexandria, Virginia, whence he went to Kentucky as a missionary. Here he remained for four years, his zeal, however, not compensating for his lack of policy and his infirmity of temperament. His wandering inclinations carried him across the ocean again in 1803 and he finally settled down in Limerick, Ireland, where he died, locally esteemed as a priest of edifying piety and ascetic life. The remainder of his small private fortune, with some gifts he had collected, he left by will to found a convent in Boston. Inspired by this wish the three daughters of a merchant named James Ryan, with whom he lived in Limerick, emigrated to Boston (1819) and there founded the Ursuline Community, whose convent, Mount Benedict, near Bunker Hill, Charlestown, was burned and sacked by an anti-Catholic mob on the night of 11 August, 1834.

Thos. F. Meehan.

Theatines (Clerics Regular), a religious order of men, founded by Gaetano dei Conti di Tiene, Paolo Consiglieri, Bonifacio da Colle, and Giovanni Pietro Carafa, afterwards Pope Paul IV. Carafa was Bishop of Chieti (Theate), a city of the Abruzzi in Southern Italy, from which the congregation adopted its specific name to distinguish it from other congregations (Jesuits, Barnabites, Somaschi, Caracciolini, etc.) modelled upon it. Gaetano consecrated his order to the Cross, which he adopted as its emblem, and the foundation took place on the feast of the Finding of the Holy Cross, 3 May, 1524. It was approved on 24 June, 1524, by Clement VII in the Brief "Exponi Nobis". On 14 Sept., feast of the Exaltation of the Holy Cross, St. Gaetano and his companions made solemn profession before the papal altar of St. Peter's, Rome, in the presence of Mgr. Giovanni Battista Bonziano, Bishop of Caserta, special papal delegate. The chief object of the order was to recall the clergy to an edifying life and the laity to the practice of virtue. St. Gaetano and his companions zealously endeavoured to combat the errors of Martin Luther, which, having gained a foothold in Switzerland, Germany, England, and France, then threatened Italy. They founded oratories (among them the celebrated *Divino Amore*) and hospitals, devoted themselves to preaching the Gospel, and reforming lax morals. Through their good example clergy and laity were induced to better living.

Notwithstanding their severe rule of life and strict vow of poverty, the congregation rapidly developed, and soon numbered among its members illustrious names of the Italian aristocracy (Vezzosi, "Illustri scrittori Teatini", Rome, 1780). They founded many beautiful churches, among them that of S. Andrea della Valle in Rome, a gift of Costanza Piccolomini D'Aragona, Duchess of Amalfi. This church is the masterpiece of Carlo Maderno, and contains several paintings by Domenichino. The Theatines were invited to Turin, Genoa, Venice, Milan, Padua, Piacenza, Parma, Modena, Florence, Naples, Palermo, Messina, Lecce, etc., by the authorities of these places. They also attained a great development in foreign countries. In France, through the efforts of Cardinal Mazarin, they built the Church of St. Anne la Royale opposite the Louvre in 1644. In Spain, under Philip II, the Theatine Cardinal Paolo Burali d'Arezzo, afterwards beatified, filled various embassies at the command of the viceroy of Naples. In Portugal John IV, in 1648, gave the Theatines a splendid house and college for the education of noble youth. In England, under Henry VIII, Goldwell, Bishop of St. Asaph, entered the order of Theatines (see Goldwell, Thomas).

The Theatines were the first to found papal missions in foreign lands, as in: Golconda, Ava, Peru, Mingrelia, the Islands of Sunda, Borneo, Sumatra, the history of which was written by the Theatine Bartolomeo Ferro (Missioni Teatine nelle Indie Orientali); Georgia, Arabia, Armenia, in which latter country Father Galano, author of the history of the Armenian Church, negotiated and concluded the reconciliation and union of that Church with the Roman Catholic; Persia and in many other places, as is shown by Theatine manuscripts dating from 1530 till the end of the eighteenth century. In the nineteenth century the order began to decline, and in 1860, through the well-known suppression of religious orders, it was reduced to a shadow of its former greatness. In accordance with the spirit of its rule, it had never acquired possessions and is the only order which feels the consequences of the law of suppression.

Father Francesco di Paola Ragonesi, general of the order and the last surviving representative of its ancient traditions, restored the Church of S. Andrea della Valle to its former splendour, by his care and zeal aided by the munificence of Comm. Filippo Giove Romano. The Theatines maintain a flourishing mission at Durango in Colorado, U. S. A. Pius X, in a Motu Proprio of 15 December, 1909, decreed the union of the ancient Congregation of the Regular Theatine Clergy with the youthful Spanish Congregation of the Holy Family at Barcelona. Besides the two saints, Gaetano, invoked for the interposition of Providence, and Andrea Avellino, against sudden death, the order furnished one pope, Paul IV (Giovanni Pietro Carafa), 250 bishops, archbishops, and papal legates, and the cardinals: Blessed Giovanni Marinoni, Blessed Paolo Burali d'Arezzo, Blessed Giuseppe Maria Tomasi, Giovanni Bernardino Scotti, Francesco and Domenico Pignatelli, Giuseppe Capece-Zurlo, Francesco Maria Banditi, and Ferdinando Pignatelli, the last named created cardinal by Gregory XVI. Father Anton Francesco Vezzosi (whom Clement XIII wished to make cardinal, but chose instead Fr. Ganganelli of the Conventuals who succeeded him in the papacy as Clement XIV) treats of the illustrious men of the order in his work "I scrittori de' chierici regolari detti Teatini", Rome, 1780. The last famous Theatine was the philosopher, *littérateur*, and great sacred orator, Father Gioacchino Ventura dei baroni di Raulica, a Sicilian. He preached and wrote in both Italian and French. His most celebrated work is his funeral oration on the death of Daniel O'Connell. He was the friend of the most illustrious men of his day, among them the Abbé de Lamennais whom he sought to save for the Catholic Church. He died at Versailles in 1860.

Theatine Nuns, a religious congregation of women—oblates and hermitesses—existing in Naples and Sicily, founded under the name of Sisters of the Immaculate Conception of the Virgin Mary, by Venerable Ursula Benincasa. This illustrious woman, who, according to Padre Silos ("Istorie Theatine", Palermo, 1666, XII, p. 657), united in herself the spirit of Gertrude, of Catherine of Siena, of Brigid, and of Paula, was born at Naples, 7 August, 1547. Her parents were Girolamo Benincasa and Vincenza Genuina. Her family came originally from Siena, in Tuscany, and had given to the arts, to the sciences, and to the Church both men and women of great distinction. Venerable Ursula herself displayed great talent; while still a young girl, she comprehended the most recondite meanings of Latin books and of the Holy Scriptures. Her inclination to the monastic life was strongly pronounced from her earliest years. Many of her biographies (that of Maggio; Flamino da Latera, "Compendio della storia degli ordini regolari" s. v. "Theatine dell'Immacolata Concezione"; Bonanni in "Catalogo delle Vergine dedicate a Dio") state that when ten years old she attempted to enter the monastery of S. Maria di Gerusalemme, which flourished at Naples under the rule of St. Clare, and after various pilgrimages and trials she founded the Congregation of the Theatine Oblate Sisters. Her sisters, among them Christina who became the first superioress, and some of her nieces formed the community. Little by little, other pious women joined them, to the number of sixty.

The date of this formation is fixed by some as 1581, according to others (including so weighty an authority as Padre Bonanni, S. J.) as 1583. The latter date is the better substantiated, for in 1581 Ven. Ursula merely determined the spot on which she intended a church to be erected; it was in fact built near Castel S. Elmo, with the help of the Spanish priest Gregorio Navarro, Abbot of Francavilla, whom she had told of a vision in which the Blessed Virgin had commanded her to build a church in honour of the Most Holy Conception of Mary. At this period, having created much popular excitement by her visions, her ecstasies, and the loftiness of her teaching, and having attracted enthusiastic admiration and envenomed calumny, she was accused of being possessed by a devil and was therefore summoned to Rome. Baronius and Tarugi, Oratorians and illustrious cardinals, received her and took her to have audience of Gregory XIII at Frascati, 3 May, 1582. By the pope's authority she was placed under the spiritual direction of St. Philip Neri, who subjected her to the most severe trials; he was constantly astonished by her piety and humility. In 1583 the foundation proper took place, under the protection of the Blessed Virgin, St. Joseph, St. Michael the Archangel, and St. Peter.

The rules of the Congregation of the Oblates are those of the active life of St. Martha, with simple vows. They include recitation of the Office of the Blessed Virgin and the Divine Office daily; one hour of prayer in common at morning, besides the recitation of the Veni Creator and the De Profundis at None; one hour of adoration before the Blessed Sacrament, exposed in the church every Friday, with singing of appropriate hymns. In addition to the ordinary fasts prescribed by the Church, the Oblates fast on the vigils of the feasts of Corpus Christi, the Purification, and the Immaculate Conception, and they are exhorted to wear the hairshirt on Fridays. The daily recitation of one-third of the Rosary is also prescribed. They are recommended to labour with their hands, to practise the common life, poverty, and the other virtues. The habit is that of the Theatine clerics: a white tunic under a black garment with wide sleeves and girdle of wool; on the head a white veil without wimple, the place of which is supplied by the collar of the outer garment, like that of the Theatine clerics (Baronius and Bonanni).

The Theatine Hermitesses (*Romite Teatine*) were founded in 1617. As Venerable Ursula wished to completely withdraw from the world she took thirty-three companions, in memory of the thirty-three years of Christ upon earth, and retired to a hermitage. The rules of the Hermitesses are much like those of the Oblates as regards works of piety; but the former religious follow the contemplative life of St. Magdalene. In addition to their solemn vows, their constitution imposes on them great austerities. They are bound to perpetual abstinence from flesh meat except in case of illness, to fast on the vigils of feasts of the Blessed Virgin and with still greater rigour on the vigils of the Immaculate Conception, the Ascension, and Corpus Christi. They also fast every Saturday and on the last two days of Carnival, besides the ordinary fasts of the church. They are bound to keep the Blessed Sacrament exposed for five hours every Friday, with continual adoration by five religious, and to practise penance regularly. The age of reception to the hermitage is twenty, and the novitiate lasts two years. On admission to solemn profession, a religious may converse with her nearest relatives for one day, but must not expect to see them again. Their enclosure is of the strictest, and they hold no communication with anyone except those charged with supplying them food, which is given to them through a turnstile. Their habit is of white cloth with a leather girdle, light blue scapular and mantle, black veil and wimple like other nuns (Bonanni, op. cit.). The building of the Hermitage was begun on 10 June, 1633, and completed in 1667. The rules of the Hermitesses and those of the Oblates were approved by Gregory XVI in 1623.

The Theatine Sisters, more particularly the Oblates, were under the government and spiritual direction of the Fathers of the Naples Oratory, by the request of the Abbot Navarro mentioned above, until 1633. In this year the Theatine Order, under the pressing and insistent solicitation of important personages, among them Pope Urban VIII, undertook this charge, under the generalship of Padre Matteo Santomagno, who was the depositary of Ven. Ursula's last wishes and desires. Oblates and Hermitesses practised fervent and incessant prayer to avert from mankind the terrible chastisements which Ven. Ursula by Divine Providence foresaw in her ecstasy. The life of the Oblates is active, that of the Hermitesses contemplative. These institutes—like many others which have not lived in touch with the world through schools, hospitals, and the like—continued to live and prosper while the days were less evil than now, and their members were regarded with wonder as victims expiating with prayer the sins of humanity; but through the spoliation of monasteries they have now almost disappeared and are reduced to a shadow of their former greatness. Venerable Ursula's rule and the pious practice of the Blue Scapular, which she introduced, are still observed.

Franciscus Ragonesi.

Theatre, The.—Considering the tone of what is preserved to us of the works of the Greek tragedians and even of the comedies of Plautus and Terence, it seems at first difficult to understand the uncompromising attitude adopted towards the theatre by Christian writers of the early centuries. But the fact remains that by the Fathers of both East and West all forms of the drama were banned indiscriminately and in terms of the severest reprobation. We can only infer that the plays and mimes most popular under the Empire were as a rule grossly indecent and poisonous to virtue. The surviving plays of Aristophanes would alone suffice to show how inconceivably lax public opinion was, even at the most cultured periods of paganism, while the *infamia* which marked the legal status of an actor at Rome is significant of the degradation involved by such a profession. Under the Empire tragedies and even the better class of comedies were not much represented in public. They were regarded rather as literature, and at best read aloud in a select circle of friends. The most popular form of play was the *mimus*, and, as Diomedes, a rhetorician of the fifth century, implies, the note of indecency might be said to enter into its very definition. (*Mimus est factorum et dictorum turpium cum lascivia imitatio:* cf. Ovid, "Tristia", II, 497, and Valerius Maximus, ii, 6 and 7, etc.) Further, there is a good deal of evidence that in the third and fourth centuries the parody of Christian rites formed a regular feature of the mimes. Probably the Christian (*ὁ χριστίανος κωμῳδούμενος*) was almost as familiar an object of ridicule at these representations as is the pantaloon in a modern pantomine (Greg. Nazianz., "Orat", II, 84; P. G., XXXV, 489). There are Acts of the martyrs, no doubt more or less legendary, in which is recorded the conversion of an actor brought to know the truth by the very rite of baptism, which he simulated on the stage. Porphyrius (4 Nov.) and Genesius (25 Aug.) are thus commemorated, while the story of St. Pelagia (8 Oct.), however apocryphal it may be, presents the actor's profession in even darker colours (see Delehaye, "Légendes hagiographiques"). But even accepting these facts, the violence of the language in which the Fathers condemn all scenic representations is remarkable. Tertullian in his treatise "De Spectaculis" strikes the key-note and, as Chambers observes, "his vivid African rhetoric is no unfair sample of a catena of outspoken comment which extends across the third century from Tatian to Lactantius" ("Mediæv. Stage", I, ii). For Chrysostom and nearly all his contemporaries the theatre is the temple of the Evil One, and all who frequent the theatre thereby acknowledge him as their master (P. G., LVI, 263; LVII, 71, 426; LVIII, 120, 188, etc.). Even Julian the Apostate forbade access to the theatre to the new pagan priesthood he was anxious to create. Almost alone amongst the Fathers, St. Augustine ("De Civ. Dei", ii, 8) seems to make some distinction between the gross indecency of the mimes and the classical drama of an earlier age, approving the study of the latter for educational purposes. It is not entirely clear from the "Confessions" of the same writer (iii, 2) whether the performance of serious tragedies was still maintained in his youth.

The Greek Amphitheatre, Syracuse

Vile and degrading as were the more popular forms of scenic representation under the Empire, the proletariat were so wedded to them that even the Christian emperors dared not altogether suppress such amusements. Still something was done. By the Theodosian Code (XV, 5), *omnis theatorum atque circensium voluptas* (all diversions in the theatre and circus) were prohibited on Sundays, festivals, and seasons of special sanctity. Disabilities of various kinds, including restrictions as to dress, were imposed upon actresses, etc., but on the other hand the laws of caste were set aside and it was now made possible for an actress, upon becoming a Christian and quitting this way of life, to acquire a status of respectability. At an even earlier date some of the Christian councils had dealt with the subject. At Elvira in Spain, about A.D. 302, it was decided that actors might be baptized, but only on condition of their giving up that way of life. At Arles in 314 *theatrici* and *agitatores* (actors and charioteers in the games) were declared excommunicate. Somewhat later the Synod of Laodicea directed that the clergy who were present at wedding festivities or banquets ought not to remain for the plays that might be performed afterwards. At Hippo in 393 it was forbidden that the sons of bishops or of ecclesiastics should be present at plays or give them. With regard to actors it was decided that, if they wished to become Christians, their baptism need not be postponed indefinitely. In 401 a Council of Carthage decided that plays ought not to take place on Sundays and feasts, and fulminated against actors being decoyed back to their old way of life (but cf. Cod. Theod., XV, vii, 13). Finally, the Council in Trullo in 692, for those that recognized it, condemned plays altogether, threatening degradation against all clerics and excommunication against the laity who assisted at the performances (Hefele-Leclercq, "Conciles", I, 256, 283, 1032; II, 87, 89, 126, 471; III, 566, 569). The tone of all this legislation is milder than the language used by individual Fathers, but it is quite clear that the actor's profession was looked upon as that of a public sinner and most of the early bishops would have agreed with St. Cyprian (Ep., ii) that it was preferable to maintain such a man out of the funds of the Church rather than allow him to continue in his calling.

With the debased drama of the Roman Empire the theatre of Shakespeare, Calderon, Molière, and Schiller has no direct connexion. The isolated *mimi* or *nugatores*, who may for a while have survived the downfall of the Empire and become strollers, tumblers, *joculatores* (jongleurs), and even minstrels, cannot be shown to have inspired any new dramatic developments. Their connexion with the Norman *estrifs*, one of the forms of the old French *débats* or dialogues, is quite problematical. Moreover, the Teutonic races had their *scop* or gleeman, who was just as likely as these strollers to have evolved ultimately a dialogue form for some of his compositions. Again the Christian imitations of Terence by the Abbess Hroswitha of Gandersheim (d. 1002) or "the Suffering Christ" (χριστὸς πάσχων) of Byzantine literature inspired no imitators and apparently were not even intended for representation. Thus there is a consensus of opinion that the modern drama has sprung out of the mystery or miracle plays of the Middle Ages and is ultimately religious in its origin (see Miracle Plays and Mysteries). We can even put our finger with some confidence upon the primitive germ of the whole subsequent development. It is to be found in a trope which Frere and others have printed from a St. Gall MS. of the ninth century, attached to the Introit of the Easter Mass. In the earliest English tropes written before 1016 it appears thus, the dramatic form being clearly indicated by the headings:

Angelica de Christi Resurrectione.
Quem queritis in sepulchro christiocle?
Sanctarum Mulierum Responsio.
Ihesum Nazarenum crucifixum o celicole.
Angelice vocis consolatio.
Non est hic, surrexit sicut prædixerat;
Ite nuntiate quia surrexit, dicentes;
Sanctarum mulierum ad omnem clerum modulatio.
Alleluia. Resurrexit dominus hodie,
Leo fortis, christus filius dei, deo gratias dicite; eia.
Dicat Angelus.
Venite et videte locum; etc.

This dialogue was transformed at an early date into a separate interlude following the third lesson of the Easter Matins and representing the visit to the Sepulchre. The Sepulchre itself had been previously constituted on Good Friday by curtaining off a vacant altar and depositing there the crucifix and sometimes the Blessed Sacrament. The whole rite is fully described in the "Concordia regularis" of St. Æthelwold (tenth century), where the compiler remarks by way of introduction: "since on this day we celebrate the interment of the body of our Saviour, if it seems good or pleasing to any to follow on similar lines the use of certain of the religious which is worthy of imitation for the strengthening of faith in the unlearned vulgar and in the neophytes, we have ordered it in this wise". These scenes of the deposition on Good Friday and the visit to the Sepulchre on Easter morning became gradually more and more developed and less and less distinctly liturgical, until we reach a stage when we have a dramatic representation performed by lay folk, outside the Church. Great light has recently been thrown on the transition stages in England by the discovery of the Shrewsbury fragments, which show how the matter was brought to the level of the people by the insertion of vernacular verses in Latin songs. Equally "for the strengthening of faith in the unlearned vulgar and in the neophytes" there were kindred dramatic tropes adopted at Christmas time. The form of one of the tenth century Tropes of St. Martial at Limoges seems to show direct imitation of the Paschal interlude: *Quem quæritis in præsepe pastores?* (Whom seek ye, shepherds, in the manger?) So the dialogue began. There were also other influences besides the tropes which led to the same result. For example portions of a sermon, wrongly attributed to St. Augustine, used to be read among the lessons at the Christmas matins. It introduced various Prophets who bore testimony to Christ. A separate voice was assigned to each, much as in the Gospel of the Passion when read in Holy Week, and this at once supplied the elements of a promising Christmas drama (see Sepet, "Prophètes du Christ", 10).

We may probably, with Mr. Chambers, distinguish three stages in the whole evolution: (1) the liturgical stage, i. e. the development of these dramatic dialogues, aided as they were by impersonation and gesture, within the Church ceremonial itself; (2) the transitional stage, i. e. these Latin plays were translated into the vernacular or interpolated with vernacular passages, while different incidents coalesced to form one representation and other new elements were added, until the whole cycle of the matter treated extended from the Creation to the Judgment: (3) the final stage in which the plays were completely secularized. They fell into the hands of the guilds, some plays being assigned to one guild and others to another, while there were constant changes in the dialogue and rearrangement of incidents to suit new conditions; but the cyclic form was firmly adhered to. On the other hand, these stages in the evolution of the drama were not of course sharply defined and they merged into one another. For further details the reader must be referred to the articles Miracle Plays and Mysteries and Moralities, but it should be noted that an important influence in the process of secularization was supplied by the Latin plays, partly scholastic exercises and partly diversions, which the cathedral and monastic schools acquired the habit of performing, more particularly at the Christmas and Easter seasons. It is easy to see how readily such representations addressed to a young or miscellaneous audience might come to be interpolated by passages in the mother tongue, particularly those of a more humorous character. Moreover, it was natural to extend the scope of such diversions and we have evidence that in the twelfth century, in France, England, and Germany, dramatic compositions were represented dealing with such subjects as the life of St. Nicholas, the martyrdom of St. Catherine, the resurrection of Lazarus, the parable of the virgins, or a *ludus prophetarum ornatissimus*, which included Gideon and the Philistines, David and Herod. But the further transference of such representations to the guilds must have taken place early, for it is generally agreed that the play of "Adam", written in Anglo-Norman French of the twelfth century, was probably first represented by a guild and upon English soil (see Grass, "Das Adamsspiel", 1907). In Germany, however, the religious plays seem to have remained almost entirely in the hands of the students, though in Italy the main impulse came from the *laudesi* confraternities, the survivors of the Flagellant movement, who met together in their own chapel to sing *laudi* (canticles) in honour of the Blessed Virgin, which gradually assumed a dramatic form and grew into *rappresentazioni sacre*. A play in the Roman dialect of the fourteenth century, edited by Vattasso (Studi e Testi, no. 4), explicitly bears the title *lauda* (loc. cit., p. 53). But in every country of Europe, Spain and Poland not excepted, a new drama seems to have arisen which sprang into existence in dependence on the Church. Only by slow degrees did the subjects of such plays in the vernacular lose touch with any religious purpose. An entirely new source of inspiration came into play contemporaneously with the humanism of the expiring Middle Ages. In Italy especially it began as early as the fourteenth century, with the revival of the study of the tragedies of Seneca and, what was more important, with the composition of original Latin tragedies upon themes supplied by medieval history. From these it was but a step to the plays called *mescidati*, in which the influence both of the *rappresentazioni sacre*, which were the final development of the religious drama, and also of classical models may be clearly discerned. But it is impossible to pursue the subject here. We have an Italian tragedy, the "Sofonisba", by G. Trissino, acted before Pope Leo X in 1515, while the early comedies (Boiardo's "Timone" was presented before 1494) were introduced gradually in the wake of improvised burlesques to which the *arlecchino* (harlequin) contributed a thread of unity but which still savoured something of the earliest moralities. In any case it is to be noted that no sooner had a popular drama established itself independently of ecclesiastical influence than the licentious excesses of such writers as Ariosto, Macchiavelli, and Aretino (Leonardo Bruni) forced the Church back into much the same attitude of uncompromising hostility to the stage which existed under the Roman Empire. The representation of sacred and moral dramas and sometimes of classical plays was indeed encouraged in colleges and similar institutions. The plays, mostly in Latin, which were written and acted in the Jesuit schools, form quite a literature by themselves (See e. g. Bahlmann, "Jesuiten-Dramen d. niederrhein. Ordensprov.", 1896). But apart from such scholastic exercises the public theatres, on account of the laxity of morals which as a rule prevails at such representations, are nearly everywhere forbidden to the clergy by the decrees of provincial and diocesan synods (see the "Collectio Lacensis", passim). It is maintained by some that these prohibitions have only force to bind the clergy belonging to the diocese or province in which they are issued whilst they remain within the limits of the diocese, but the point is at best doubtful. No authoritative decision has ever been given which would allow clerics who come from a diocese in which attendance at the theatre is forbidden, when passing through another diocese in which it is equally forbidden, to regard themselves as free to visit the theatre at will. To assist at performances which are grossly improper is of course forbidden both to clergy and laity alike, both on account of the proximate danger of sin as also of the scandal which may thereby be given to others. Finally we may note that in the Papal States no permanent public theatre was allowed to be constructed until 1691 and the theatre which was then opened by permission of Alexander VIII at Tor di Nona was subsequently dismantled by his successor Innocent XII. But in the course of the eighteenth century several theatres were built in Rome with papal sanction, though they were subjected to a very strict censorship and were closed at sacred seasons.

THE CHURCH AND THE THEATRE.—STARA, *Zur Wündigung der kirch. Anschauungen über der Theaterwesen* in *Theol. Quartalschrift*, LXIX (1887), 832–666; HEFELE, *Ueber den Rigorismus*, etc. in *Theol. Quartalschrift*, XXIII (1841), 396 seq., afterwards reprinted in his *Beiträge* (1864); MÖHLER, *Symbolik*, 6th ed., 512 ff.; BOSSUET, *Maximes et réflexions sur la comédie* (Paris, 1693); PLUMPTRE, in *Dict. HERBERT THURSTON.

Thebaid.—The valley of the Nile, under Roman domination, was divided into four provinces: Lower and Upper Egypt, Lower and Upper Thebaid. The last two comprised the upper part of the valley. During the fourth and fifth centuries it was the chosen land of the monks, who by their sanctity and by the form they impressed on the monastic system greatly influenced the East and the West. Their monasteries may be divided into several groups. The best known is the Pachomian group, founded and legislated for by St. Pachomius. They formed a real religious order with Tabenna as a mother-house and its superior as their general. Besides Tabenna there were Peboou, Schenesit, Akhmin, Esneh, Monchosis, Thebaid, Tesminé, Hermopolis, and Armoutim. Saint Pachomius governed this group till his death (346), and was succeeded by Abbot Orcisius, and then by Abbot Theodore. There was a community of women, governed by Pachomius's sister, following the same rule as the men. The life of the holy founder and the rule he drew up reveal the interior organization of these monasteries and the congregation. It has all the essential characteristics of cenobitic religious life. Vows of poverty, chastity, and obedience, a dress distinct from that of secular persons, lengthy psalmodies, manual work, and penitential exercises. The monks lived in huts scattered in groups. The groups were enclosed by a wall and formed the monastery. The superior general had absolute authority over each house and over its superior. He held a general assembly of all the religious twice a year. Bgol founded at Atripe a group distinct from that of Tabenna. We know of it from the life of his successor Schnoudi. The monks even increased the austerities prescribed by St. Pachomius and could change from the cenobitic to the eremitical life. Schnoudi died about 452 at the age of 118. His reform had only a mediocre success.

The eremitical life was introduced into the Lower Thebaid by St. Anthony. Born in 251, he embraced the ascetic life at the age of twenty; then impelled by a love of solitude he buried himself in the desert. After twenty years of complete isolation the fame of his sanctity drew around him disciples who imitated his mode of life. Like him they were hermits though remaining under his authority. Their solitude was relative. Those more advanced in years had one or more disciples, whom they instructed in the paths of perfection. Others had companions or neighbours. They visited one another. Grottoes or huts like those of the fellaheen served them as cells. The rules called by St. Anthony's name are not his composition; but his biography, compiled by his admirer and friend St. Athanasius in 365, preserves the memory of his virtues and his teaching. The author wished to illustrate what the life of a monk should be. It influenced the development of eastern and western monachism very considerably. Most of the Egyptian monks of that period were more or less directly connected with the school of St. Anthony, for instance the two Macarii, Isidore, Heraclides, and Pambo, who are looked upon as the founders of the group of Nitria. The group of Scete derives its origin from the same school. They were numerous fervent centres of a partly cenobitical, partly eremitical life. The "Historica Lausiaca" of Palladius gives us the details of the ordinary life of the Nitrian monks; the "Apophthegmata patrum" and the "Vitæ patrum" tell us those of the Scete. In the wilderness along the two banks of the Nile there were many monks, living some alone, some in groups. Others dwelt in populated regions, some even in the towns. The monks disappeared with the fall of the Byzantine domination in these countries and the success of the Saracen invaders. Nothing remains of Tabenna. The two monasteries of St. Anthony and of Nitria by their name and location recall those ancient days. The rules observed there are entirely different from those of the fourth and fifth centuries.

Thébaud, Augustus, Jesuit educator, and publicist, b. at Nantes, France, 20 Nov., 1807; d. at St. John's College, Fordham, New York, 17 Dec., 1885. Father Thébaud was the son of a worthy but not wealthy merchant who was married to his pious wife in the dark days of the Terror by a loyal priest, a circumstance which eloquently proves their earnest Catholicity. Their children were brought up with great care and given the best religious education which France at that time afforded. Young Thébaud studied at first in the preparatory seminary at Nantes, then entered the *grand séminaire* and was ordained to the secular priesthood at the usual age. After three years of parochial work in his native city, he entered the Society of Jesus in Italy, on 27 Nov., 1835, whence he returned to France in 1837 to pursue a course of scientific studies at the Sorbonne under Ampère and other distinguished professors. He landed in the United States on 18 Dec., 1838, and was called to the chair of chemistry at St. Mary's College, Kentucky, where he became rector in 1846. Before the end of that year however the Jesuits left Kentucky to take charge of St. John's College, Fordham, New York, which had been transferred to them by Archbishop Hughes. Father Thébaud was the first Jesuit President of St. John's, a position which he held from 1846 to 1851 and again from 1860 to 1863. In the interval he taught the sciences for two years, 1851–52, under Father Larkin, and the following eight years he spent as the pastor of St. Joseph's Church at Troy. To this charge he returned after his second rectorship at Fordham and filled the position from 1863–69, and again from 1873–74. The intervening years we find him at first in Montreal and then at St. Joseph's Church, Hudson City, New Jersey. After spending another year at Fordham, he was assigned to St. Francis Xavier's parish, New York, where he passed the rest of his days.

Father Thébaud, who always had a strong literary bent, wrote a series of books on religious and historical subjects and published, besides numerous articles in the "Catholic World" and the "Catholic Quarterly Review", two novels, "Louisa Kirkbridge, A Tale of New York" (1879), and "Twit Twats, An Allegorical Story of Birds" (1881). His more important works are: "The Irish Race in the Past and in the Present" (1873); "The Church and the Gentile World" (2 vols., 1878); "The Church and the Moral World" (1881). From 1875 to his death, he also prepared his reminiscences in three volumes. Of these the United States Catholic Historical Society published volume III (1904), giving an account of his American experiences, and volume I (1911), containing the recollections of his life in France. Father Thébaud was a man full of energy, even in old age, an untiring student, and well-informed scholar. Withal he was a most agreeable companion, witty and full of life, and universally beloved by his friends and his pupils.

Charles G. Herbermann.

Thebes (Thebæ), a metropolitan titular see of Achaia Secunda. The city was founded by the Phœnician Cadmus in the sixteenth century B. C., afterwards made illustrious by the legends of Laius, Œdipus, and of Antigone, the rivalry of Eteocles and Polynices, and the unfortunate siege by the seven chiefs of Argos. After the taking of Troy, Thebes became the capital of Bœotia, but did not succeed in imposing its hegemony, for Athens supported certain towns in their opposition. Thebes allied itself to the Persians against the Greeks, but was conquered with them and submitted to Sparta, until its two generals Pelopidas and Epaminondas restored it to the first rank. The death of the latter before Mantinea in 363 B. C., opened a new series of misfortunes for the city. Conquered by Philip of Macedon, in 338 B. C., it revolted two years after and drew on itself the vengeance of Alexander who killed or sold all the inhabitants and destroyed all the houses save that of the poet Pindar. Rebuilt in 316 B. C., by Cassander, it was taken and retaken again. In the second century B. C., the acropolis alone was inhabited. In the Middle Ages the city was repeopled through the silk industry. In 1040 the Bulgarians took possession of it; six years after the Normans sacked it. In 1205 it was taken by Boniface III of Montferrat and assigned with Athens to Othon de la Roche; by marriage it passed later to the lords of Saint-Omer; one of them, Nicholas II, constructed the Frankish château of the Cadmi which was destroyed in 1311 by the Catalans. In 1364 the Turks took it in behalf of Frederick III of Sicily and later on their own account, but its neighbour, Livadia, soon supplanted it.

The first known bishop, Cleonicus, was at Nicæa in 325 (Gelzer, "Patrum nicænorum nomina", LXIV). Le Quien (Oriens Christ., II, 207–11) quotes ten other titulars, among them: Julius at Sardica in 344; Anysius at Ephesus in 431; Architimus in 458; Marcianus in 867. At first a suffragan, Thebes was an autocephalous archbishopric at the beginning of the tenth century and until 970 (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 551, 571); about 1080 it was a metropolitan see (Le Quien, op. cit., II, 210); and about 1170 it numbered five suffragan sees (Gelzer, op. cit., 585). In 1833 Thebes was reduced to the rank of bishopric with the title of Bœotia; since 1882 the diocese has had the title of Thebes and Livadia. The bishop resides at Livadia and exercises his jurisdiction over the entire district of Bœotia. The city numbers 5000 inhabitants including the suburbs. Since 1210 it has had a Latin metropolis which became by degrees a titular. Eubel (Hierarchia catholica medii ævi, I, 508; II, 274; III, 331) mentions a number of bishops. During the Frankish occupation, the Franciscans had a custody named Thebæ.

S. Vailhé.

Thebes (Thebæ), titular see of Thebais Secunda, suffragan of Ptolemais, and the seat of a Coptic Catholic diocese. Thebes was the No-Amon of the Jews, the Nouit-Amen of the Egyptians (City or Kingdom of Amon), the Nia of the Assyrians, and the Diospolis of the Greeks, which is the exact translation of Nouit-Amen. The Egyptians also called it Per or Pi-Amen, the dwelling of Amon, and also Apet, whence, with the article Ta before the feminine name Apet, is derived Ta-Apet, or Tape, as it is called by the modern Copts, the Θήβαι of the Greeks. Thebes is mentioned three times in the Bible under the name of No-Amon in the Hebrew text, which the Vulgate each time renders incorrectly by Alexandria. Nahun (iii, 8–10) refers to the victories of Assurbanipal, King of Ninive, over Tanutamen, King of Egypt, as we now know from the cylinders of that sovereign (G. Smith, "History of Assurbanipal", 52–56). It is thought that Jeremias (xlvi, 25) and Ezechiel (xxx, 14–16) allude to the two campaigns of Nabuchodonosor against Thebes, which took place in 583 and 588 B. C.

Originally a mere borough, Thebes grew by degrees, and as early as the twelfth dynasty its sovereigns dominated Egypt. Thenceforth also its god Amon-Ra, to whom the pharaohs had erected numerous monuments, became the foremost of the gods. Halted for a time by the invasion of the Hyksos, the growth of Thebes continued under the pharaohs of the eighteenth and especially those of the nineteenth dynasty, who extended their dominion to the sources of the Euphrates. When the sovereigns of Thebes had become degenerate they were replaced by the priests of the god Amon, who constituted themselves the twenty-first dynasty. They disappeared in turn and the capital of Egypt was then transferred to the Delta. The city began to fall away, especially after the Assyrian armies had captured and devastated it in 668 and 664 B. C. and Nabuchodonosor had twice rifled it of its treasures. However, as long as there were Egyptian sovereigns, even under the Ptolemies, work was done at the temple of Karnak, which was only abandoned under the Roman domination. Thebes then became a place of pilgrimage and sight-seeing. Christians established their churches in the temples, monks and laymen dwelt everywhere, preferably in the ancient tombs. The great earthquake of 27 B. C. caused some damage, but that which ruined the temples of Karnak must have occurred two or three centuries later.

A see was established at Thebes at an early date. Ammonius of Diospolis assisted at the Council of Nicæa in 325, unless he was Bishop of Diospolis Parva (Harnack, "Mission und Ausbreitung des Christentums", II); Maletius was a partisan of Arius, according to Philostorgius and Nicetas Choniates ("Thesaurus orthodoxæ fidei", V, 7); Hero apostatized under Julius the Apostate, according to Philostorgius (Hist. eccl., VII, 13); Stephen was Catholic metropolitan at the time of Photius, and Kalta was Jacobite metropolitan in 1086 (Le Quien, "Oriens christ.", II, 611). The Coptic diocese, created in 1895, has 15,000 Catholics to 300,000 Jacobite Copts and about 3,000,000 Mussulmans. There are 31 Coptic priests, 35 churches, besides 6 which belong to the Franciscans, 18 stations, 26 primary schools with about 500 pupils, 4 convents of Franciscans, 3 of Brothers of the Christian Schools, and 1 of native Sisters. The seminary which is used by the three Coptic Catholic dioceses has 17 students and is situated at Tahtah, the residence of the Bishop of Thebes.

The ruins of Thebes are among the most beautiful in the world. The city was situated on both banks of the Nile, which is more than two miles wide at this point. On the right bank was the temple of Luxor, built by King Amenothes III and Rameses II, the great temple of Amon, and the great hypostylic hall of Karnak, the work of the pharaohs Rameses I, Seti I, and Rameses II, and which is 337 feet broad by 169 feet deep. A veritable forest of 134 colossal columns divides it into three naves, forming a hall which has not its like in the world. The temples of Luxor and Karnak were joined by an alley nearly two miles long by about 3¾ miles wide, bordered by rams or criocephalous sphinxes. On the left side is Quournah, which begins the line of temples of which the Ramesseum is almost in the centre and Medinet-Habou at the southern extremity. A line drawn around all these monuments either from the right or the left bank describes a circuit of nearly 8¾ miles. Now Diodorus Siculus (I, 45) and Strabo (XVII, 46) give almost the same dimensions to the Diospolis of the first century before Christ. But in the time of its real splendour, according to Eustathius and Stephanus Byzantius, confirmed by other geographers and modern discoveries, Thebes was almost 400 stadia in circumference, or nearly 28 miles. It is probable, however, that these figures included not only the extent of the city, but also the entire territory of the commune.

Lagier in *Dict. de la Bible*, s. v. *No-Amon;* Bénédite, *Guide Joanne: Egypte* (Paris, 1900). Both these authors give a detailed bibliography.

S. Vailhé.

Thecla (Tecla), Saint, Benedictine Abbess of Kitzingen and Ochsenfurt; date of birth unknown; d. at Kitzingen about 790 or later. St. Boniface, Apostle of Germany, kept up a constant intimate correspondence with the community of Wimborne, Dorset, and from the abbess, Tetta, in 748–49, he obtained monastic colonies for Germany. Among these nuns one of the most illustrious for sanctity and learning was Thecla, a relative of St. Lioba, whom she accompanied from Wimborne and under whose rule she lived for some time at Tauberbischofsheim, until St. Boniface appointed her abbess of the newly founded abbey at Ochsenfurt. Later, on the death of St. Adelheid, or Hadelonga, the foundress and first Abbess of Kitzingen on the Main, she was called to rule that abbey while still retaining the government of Ochsenfurt. The Roman as well as the English and Benedictine Martyrology commemorate her on 15 October; others on 27 or 28 September. The name Thecla does not appear on the list of the abbesses of Kitzingen, but it is generally thought that she is designated as Heilga, or "the saint"; unless we admit this, the list must be considered interpolated. Among Boniface's letters is one addressed to Lioba, Thecla, and Cynehilde, as the heads of separate religious communities. Its tone reveals how far the nuns had entered as intelligent fellow-labourers into his apostolate. St. Boniface seems to have had a threefold purpose in summoning these Anglo-Saxon nuns as his auxiliaries:—to propagate the full observance of the Benedictine Rule by new foundations; to introduce it into already founded monasteries, and to restore its observance in others; and finally to bring their gentle influence to bear on the fierce Teuton women, both by example and by the education imparted to their children. The ruined Chapel of St. Thecla, on an islet in the Severn, may have been dedicated to her, as Walstod, a Saxon bishop, was set over that part at this time. Some have tried to prove St. Thecla one of the nuns of Barking to whom St. Aldhelm dedicated his "Treatise on Virginity", but as this treatise was written before 705, and as St. Lioba went to Germany about 748–49, it is evident that her disciple who survived her was not this nun of Barking.

Ochsenfurt gradually declined, most probably owing to its proximity to Kitzingen. There is no record of its having any other abbess after St. Thecla. Kitzingen was used for secular purposes by the margraves of Brandenburg, to whom it had been mortgaged from 1440 to 1629, when it was redeemed by Philip Adolphus, Bishop of Würzburg, and restored by John Godfrey of Guttenberg as a school for the Ursulines. In 1803 the institute of the Ursulines was secularized, and to-day the abbey church is in the hands of Protestants and serves as their parish church. The tombs of St. Thecla and St. Adelheid in this church were profaned in the Peasants' War, 1525; a fanatic of Kitzingen used the heads to play at skittles; when the church was rebuilt (1695), the venerable bodies were covered with rubbish. The monastery contains a Catholic and a Protestant school for girls, a Protestant school for boys, apartments for some teachers, and the district court. The abbess's castle is private property.

Gertrude Casanova.

Thecla, Saints.—I. Thecla of Iconium, the reputed pupil of the Apostle Paul, who is the heroine of the apocryphal "Acta Pauli et Theclæ" (cf. Apocrypha). Our knowledge of her is derived exclusively from these Acts, which appeared about 180. According to this narrative Thecla was a virgin of Iconium who was converted to Christianity and led to dedicate herself to perpetual virginity by the preaching of the Apostle Paul. Miraculously saved from death at the stake to which she had been condemned, she went with St. Paul to Antioch in Pisidia where she was thrown to the wild beasts and was again saved from death by a miracle. After this she went to Myra where the Apostle was, and finally to Seleucia where she died. With the consent of St. Paul she had acted as a "female Apostle" in proclaiming the Gospel. Notwithstanding the purely legendary character of the entire story, it is not impossible that it is connected with an historical person. It is easy to believe that a virgin of this name who was a native of Iconium was actually converted by St. Paul and then, like many other women of the Apostolic and later times, laboured in the work of Christian missions (cf. Harnack, "Die Mission und die Ausbreitung des Christentums in den ersten drei Jahrhunderten", 2nd ed., I, 295; II, 58). In the Eastern Church the wide circulation of the Acts led to a great veneration of Thecla. She was called "Apostle and protomartyr among women". Her veneration was especially great in a number of Oriental cities, as Seleucia where she was buried, Iconium, and Nicomedia. Her cult appeared very early also in Western Europe, particularly in those districts where the Gallican Liturgy prevailed; there is direct proof of this in the fourth century. Her name is given with various topographical comments (Nicomedia, Seleucia, Asia) on several days in the "Martyrologium Hieronymianum". Thus Thecla is mentioned in this martyrology on 22 February, 25 February, 12 September, 23 September, and 17 November ("Mart. Hieron.", ed. de Rossi-Duchesne, 24, 36, 120, 124, 144). It seems certain that on all these dates, and probably also on 20 and 21 December, the same St. Thecla, the pupil of St. Paul, is meant. In Bede's Martyrology (cf. Quentin, "Martyrologes historiques du moyen âge", 93) her name is mentioned with a brief notice taken from the Acts on 23 September, the same date as that on which her feast is given in the present Roman Martyrology. The Greek Church celebrates her feast on 24 September and gives her the title of "Protomartyr among women and equal to the Apostles" (cf. Nilles, "Calendarium utriusque ecclesiæ", I, 283 sq.).

See bibliography of Apocrypha; Holzhey, *Die Thecla-Akten, ihre Verbreitung u. Beurteilung in der Kirche* (Munich, 1905).

II. We possess historically accurate accounts of the martyrdom of a Christian of Gaza in Palestine named Thecla. According to Eusebius ("De martyribus Palestinen.", 3) she was condemned to death in the second year of the great persecution (304–05) together with a Christian named Agapius and was torn to pieces in a horrible manner by the wild beasts to which she was thrown. The present Roman Martyrology gives the feast of this saint under the date of 19 August. III. The "Martyrologium Hieronymianum" mentions a Thecla in connexion with a Zosimus among the martyrs whose feast was celebrated on 1 June; these two saints were commemorated at Antioch. Whether this Thecla was a local saint of the Oriental metropolis is not known. IV. A catacomb of St. Thecla on the Via Ostiensis, not far from the burial place of St. Paul, is mentioned in the seventh-century itineraries to the graves of the Roman martyrs. A church stood on this spot on a hill over the catacomb where the body of the saint rested. St. Thecla must be regarded as a Roman martyr. Armellini believes that he has found the cemetery of St. Thecla (cf. Marucchi, "Les catacombes romaines", Rome, 1903, p. 91 sqq.). V. The Martyrology of St. Jerome mentions under 31 May (69), in connexion with two martyrs buried on the Via Aurelia, a group of martyrs named Tertulla, Lupus, Justa, and Thecla. It is very possible that besides the St. Thecla buried on the Via Ostiensis another Roman female martyr bearing the same name was buried on the Via Aurelia. Still we have no further account of this group of martyrs, and just as little of a number of Roman martyrs, among whom the name of a Thecla also occurs, that are given under 26 March in the present Roman Martyrology.

VI. In the "Martyrologium Hieronymianum" (58, 78) a long list of the names of African martyrs is given under the dates of 10 May, 13 and 14 June, and each time a Thecla is mentioned. Nothing further is known of this saint. In the legend of the twelve brothers and martyrs, Donatus, etc. (cf. Acta SS., Sept., I, 138–41), the parents of the brothers are called Boniface and Thecla, and these two are also given in the present Roman Martyrology as martyrs under 30 August. Apart from the purely legendary Acts just mentioned nothing is known of them. VII. In the "Acts of St. Hermagoras", which are equally legendary (Baronius, "Martyr. Romanum cum notis Baronii", Venice, 1609, p. 494) a St. Thecla of Aquileia is mentioned together with several other martyrs who are only known through this legend. Their feast is observed on 3 September.

Hauck, *Kirchengesch. Deutschlands*, I, 476–79.

J. P. Kirsch.

Theft is the secret taking of another's property against the reasonable will of that other. It is to be noted that the word secret is not employed to exclude the idea of the owner's presence and advertence whilst the theft is being committed. It is used merely to signify that the crime has been perpetrated without violence towards him. Not only the taking, but the keeping or the use unjustly of what belongs to another against his will, is to be considered theft. This would happen, for instance, where one unwarrantably refused to restore what had been entrusted to him as a pledge or loan or only for safe-keeping. Likewise where one would manage to ride on the railway without paying any fare. For the notion of theft, the unwillingness of the owner to part with what is rightfully his, is essential. If he be content, or if under some circumstances he can legitimately be presumed to be satisfied with what is done although perhaps displeased at the manner of its doing, there is no theft properly so called. Moreover his unwillingness must be reasonable not simply insensate close-fistedness. He is not justified in declining always and without regard to conditions to assent to the alienation of what belongs to him merely because it is his. Thus one in danger of death from want of food, or suffering any form of extreme necessity, may lawfully take from another as much as is required to meet his present distress even though the possessor's opposition be entirely clear. Neither, therefore, would he be bound to restitution if his fortunes subsequently were notably bettered, supposing that what he had converted to his own use was perishable. The reason is that individual ownership of the goods of this world, though according to the natural law, yields to the stronger and more sacred right conferred by natural law upon every man to avail himself of such things as are necessary for his own preservation. St. Thomas (II–II, Q. lxvi, a. 7) declares that in such straits what is taken becomes, because of the dire need experienced, one's very own, and so cannot be said to be stolen. This doctrine is sometimes expressed by saying that at such a time all things become common, and thus one reduced to such utter destitution only exercises his right.

The sin of theft is of itself grievous, because it violates the great virtues of justice and charity. St. Paul (I Cor., vi, 10) enumerates it as one of the transgressions which bars the offender from the kingdom of heaven. Still, as happens with regard to other delinquencies, its guilt may often be venial. This is particularly true when the value of what is filched is inconsiderable, or as the theologians say, is not grave matter. The determination of what is grave matter, whose taking, namely, is prohibited under pain of mortal sin, is beset with great difficulties and has offered room for widespread difference of opinion. It is agreed, however, that a distinction is to be drawn between relatively and absolutely grave matter. The grievousness of theft seems to depend on the way in which the purposes which make the respecting of property rights obligatory are set at naught. These ends are, first the preservation of peace and harmony among individuals, and then the guaranteeing of the security of human society, as well as the providing an incentive for each one to pursue an industrious career. A man who steals may bid defiance to either or both of these ends. So far as the first is concerned it is obvious that the unjust appropriation of goods to such a value as to destroy this concord and furnish reasonable ground for great sorrow to the owner must be reputed a mortal sin. That amount is clearly not a constant quantity. It will vary according to the circumstances of the person injured as well as of place and time in which commodities may be more or less valuable. It will even take account of the special relationship which perchance the thief holds to the one he has despoiled, as when children steal from their parents. The sum so ascertained is termed the relatively grave matter. Thus the theft of an amount equal to a day's wages from an ordinary artisan would unquestionably be a mortal sin. The same thing must be said of the taking of an insignificant sum from a beggar. Theologians teach that this method of establishing the grievousness of theft cannot be employed indefinitely and exclusively. There is an absolute sum which it is always a mortal sin to take even from the wealthiest person or corporation. Were this not so the very fabric of human society would be imperilled, the stimulus to labour and enterprise extinguished, and the axe laid to the root of that confidence which must accompany human intercourse.

In the attempt to compute this sum in money theologians are not at one; nor is this surprising. In the settlement of the question we have to reckon with a most important factor, that is with the purchasing power of money which is not the same everywhere nor at all times. Writers on economics tell us that for the last hundred years or so this value has decreased from thirty to forty per cent. Of course, the less the value of money at any given time or in any region the more of it would be required to constitute a mortal sin of theft, always, however, within the limits of the principle already laid down. Comparisons instituted between the United States and Europe in the matter of wages prevailing and cost of living, seem to point unmistakably to the conclusion that money has less purchasing capacity here than abroad. Hence where reputable moralists assign as absolutely grave matter, six dollars for Italy, eight for Belgium, and from seven to ten for England, it will not be deemed excessive to fix the amount for this country as ranging from ten to fifteen dollars. One of the greatest of modern theologians, Palmieri, writing in Europe, professes his willingness to stand sponsor for the opinion which makes the sum twenty dollars. He gives as his reason the greatly lessened value of money in our own time. We may not feel obliged to accept this decision, but it is at any rate an indication of the trend of expert opinion. There is no doubt but that small pilferings perpetrated at different times, whether to the prejudice of one or of many owners, can eventually coalesce and reach a sum forbidden under pain of mortal sin. The contrary doctrine was condemned by Innocent XI. The reason, of course, is that the damage wrought is serious. This coalescence may be brought about by the specific intention of the thief in his petty stealing to ultimately arrive at a conspicuous amount. When several persons join forces to steal from another and the loss incurred is notable, then each one contracts the guilt of grievous sin, even though his own contribution to the wrong-doing has been but small. One who hoards the proceeds of his petty thefts is chargeable with mortal sin when the sum accumulated is grave. Even when he has disposed of his ill-gotten goods as fast as they were acquired, his thievings will still be held to coalesce unless there has been a considerable interval of time between them.

Joseph F. Delany.

Thegan (Degan) of Treves, chronicler, d. about 850. Very little is known of his life; all that is certain is that he was assistant Bishop of Trier and was a warm friend of Walafrid Strabo. These facts are learned from some letters and verses still in existence. It cannot be positively determined whether he is identical with Theganbert, provost of the Monastery of St. Cassius at Bonn, who placed the relics of Sts. Chrysanthus and Daria in the church at Münstereifel. He wrote a history of Louis the Pious, "Vita Ludovici imperatoris", an unsatisfactory narrative written in the form of scanty annals. It begins with St. Arnulf of Metz, describes the vicissitudes of the brothers of Louis, and gives a more detailed account of Louis's reign during the years 814–835. The later narrative is probably by another author. Strabo wrote an introduction to the chronicle. The narrative is very partisan, as the merits of Louis are exalted while the actions of Lothair and of a number of bishops, especially of Bishop Ebo of Reims, are severely criticised. The best edition of this work is that of Pertz in the "Mon. Germ. Hist.: Scriptores", II, 585–604. It was also published in P. L., CVI, 405–428, and was translated into German by Jasmund (Berlin, 1850) and by Wattenbach (Leipzig, 1889).

Simson, *Ueber Thegan, den Geschichtsschreiber Ludwigs des Frommen* (Göttingen, 1870); Wattenbach, *Geschichtsquellen*, I (Berlin, 1893), 208 sq.; Potthast, *Bibliotheca* (Berlin, 1896), 1049.

Patricius Schlager.

Theiner, Augustin, theologian and historian, b. at Breslau, 11 April, 1804; d. at Civitavecchia, 8 Aug., 1874. He was the son of a shoemaker. As a boy he was a pupil at the gymnasium of St. Mathias at Breslau, and studied theology in the same city. Together with his brother Anthony he wrote, "Einführung der erzwungenen Ehelosigkeit bei den Geistlichen" (1828). At the advice of this brother he abandoned theology and turned his attention to law, which he studied at Breslau and Halle, and in 1829 he obtained a degree in law at the latter university. He then received a scholarship from the Prussian Government, which enabled him to make researches in Belgium, England, and France as to the sources of canon law. He finally went to Rome, where he settled permanently. Here, under the influence of Count Reisach then rector of the Propaganda and later cardinal, the change in his opinions was completed. In 1835 he wrote the "Geschichte der geistlichen Bildungsanstalten", and in 1836 the "Disquisitiones criticæ", on the sources of canon law. Soon after this he became a priest and entered the Oratory of St. Philip Neri. In the succeeding years he wrote the following works: "Die neuesten Zustände der kath. Kirche in Polen und Russland" (1841); "Die Rückkehr der regierenden Häuser Braunschweig und Sachsen zur kath. Kirche" (1843); "Zustände der kath. Kirche in Schlesien 1740–58" (1846); "Kardinal Frankenberg" (1850). He was commissioned by Pius IX, who had given him a position in the Vatican Library in 1850, to write the "Geschichte des Pontifikats Klemens XIV" (1853; Italian translation, 1855). In this work he showed himself an opponent of the Jesuits, with whom he had been on good terms until 1844, so that the work was forbidden in the States of the Church. In 1855 Pius IX appointed Theiner prefect of the Vatican archives. He now published his valuable collections of authorities drawn from these treasures: "Die Fortsetzung der Annalen des Baronius" (3 vols., 1856); "Vetera monumenta Hungariæ" (2 vols., 1859–60); "Poloniæ et Lithuaniæ" (4 vols., 1860–64); "Slavorum meridionalium" (2 vols., 1863); "Hibernorum et Scotorum" (1864); "Codex dominii temporalis apostolicæ sedis" (3 vols., 1861–62); "Monumenta spectantia ad unionem ecclesiarum Græcæ et Romanæ" (1872). Both before and during the Vatican Council he was in close connexion with the opponents of Infallibility. Because he communicated to them the order of business of the Council of Trent that had been kept secret he was deposed from his dignities and offices. Whether he died at peace with the Church is doubtful. His correspondence with the Old Catholic Professor Johann Friedrich during the years 1870–73 shows that he had the same views as the latter; on the other hand Count Hermann Stainlein asserts that he knew Theiner during this period as a loyal Catholic priest. There is no doubt as to his large scholarship and his services to history. After his death appeared the work, "Acta genuina Concilii Tridentini" (1874), very imperfectly edited.

Klemens Löffler.

Theism. See God.

Thelepte, a titular see in Byzacene. From an inscription we learn that it was a colony. An important network of Roman roads here branches out, joining the city to Cilium and Theveste, on the north; to Gafsa and Gabes, on the south. In the sixth century Thelepte became the residence of the military governor of Byzacene. Procopius (De Ædificiis, VI, 6) says that the city was fortified by Justinian. We have the names of several bishops: Julianus, present at the Council of Carthage in 256; Donatianus, who assisted at the Conference of Carthage in 411; he is said to have held a council in his episcopal city in 418, but this is uncertain (Tillemont, "Mémoires pour servir à l'hist. eccl.", X, 790–3). Thelepte was the native place of St. Fulgentius, Bishop of Ruspe. We have also the names of other bishops: Frumentius, exiled by Huneric, 484, after the Conference of Carthage; Stephen, present at the Council of Byzacene, 641. The ruins of Thelepte may be seen at Medinet el-Kedima, in Tunisia, a little to the north of Gafsa. The Byzantine citadel, in utter ruins, occupies the centre of the city. There are also the remains of baths, a theatre, and of ten churches recently discovered, one of which had five naves.

Diehl, *Rapport sur deux missions dans l'Afrique du Nord* in *Nouvelles archives des missions scientifiques* (Paris, 1892), IV, 336–343; Toulotte, *Géographie de l'Afrique chrétienne, Byzacène et Tripolitaine* (Paris, 1894), 202–206.

S. Vailhé.

Themiscyra, a titular see, suffragan of Amasea in the Hellespont. There was a town of this name near the mouth of the Thermodon, the modern Therme-Tchai, mentioned by Herodotus (IV, 86) and by most classical authors. Scylax calls it a Greek town while Diodorus (II, 44) makes it an Amazonian foundation. Mythology made this region the native land of these warrior-women.

After Mithridates withdrew his troops from Cyzicus, Themiscyra was besieged by Lucullus and was courageously defended by the inhabitants. The town must have been destroyed on this occasion, for neither Mela nor Strabo mentions it, while the latter treats extensively the country of Themiscyra, which he makes the subject of great eulogy. It is, however, mentioned by Ptolemy (V, vi, 3). It is not found in the "Notitiæ episcopatuum" nor in the "Oriens christianus" of Le Quien. It was situated near the present Therme on the Black Sea, in the sanjak of Samsoun and the vilayet of Trebizond. The country is one of the richest and most beautiful in the world.

Smith, *Dict. of Roman Geography*, s. v.; Pape-Benseler, *Wörterbuch der Griechischen Eigennamen*, s. v.; Texier, *Asie Mineure* (Paris, 1862), 620.

S. Vailhé.

Themisonium, a titular see in Phrygia Pacatiana, suffragan of Laodicea. Themisonium was a city of Phrygia, but near the limits of Pisidia, so that at one time it was said to be in that province. The inhabitants relate that during an invasion of the Gauls, warned by a dream which they attributed to the gods, Hercules, Apollo, and Hermes, they took refuge with their wives and children in a grotto or cave thirty stadia from their city, and placed at the entrance for protection the statues of the three divinities. The coins of the city show the god, Lycabas Sozon. It may be identified with the village of Kara Eyuk Bazar, vilayet of Smyrna.

Le Quien (Oriens christianus, I, 813) mentions the name of only one bishop of Themisonium, but he really belongs to Temenothyræ. On the other hand (ibid., 821), there was a see at Thampsiopolis, with two bishops: Zosimus, who lived in 451, and John, present at the Council of Constantinople, 869. These two sees are certainly one and the same: Thampsiopolis, mentioned in the "Notitiæ episcopatuum" from the tenth to the thirteenth century, is no other than Themisonium. If the earlier "Notitiæ episcopatuum" says nothing of this see it is probably because it was united with Agathe Come, of whose bishops there is no notice, and which disappeared from the later "Notitiæ". To the two bishops mentioned above we may add Magnus, present at the Council of Seleucia, 359.

Smith, *Dict. of Gr. and Rom. Geog.*, s. v.; Ramsay, *Asia Minor* (London, 1890), 135; Idem, *The Cities and Bishoprics of Phrygia* (New York, 1895), 260, 274, and passim.

S. Pétridès.

Thénard, Louis-Jacques, Baron, chemist, b. at Louptière, near Nogent-sur-Seine, Aube, France, on 4 May, 1777; d. at Paris, 21 June, 1857. In 1865 his native village obtained the right to add his name, so the place is now known as Louptière-Thénard. When quite young he went to Paris, and sought permission to work at chemistry with Vauquelin as his master. It was only by the intercession of the sisters of the great chemist that he was taken into the laboratory, Vauquelin like him being very poor. He was unable to pay the small regular fee of twenty francs a month. After three years' work, when he undertook to lecture, his provincial accent and appearance told against him, and he made the most earnest efforts to overcome these defects. He cut down his meagre expenses in order to save enough to go to the theatre and hear the actors. His first original memoir was published in 1799, and for half a century he continued to pour out a flood of contributions to the science of chemistry. In a single month at the request of the Minister of the Interior he invented Thénard blue, a pigment for the use of the great Sèvres factory. The base of this is cobalt. He was intimately associated in his scientific work with Gay-Lussac for many years. In 1813 he published his "Treatise on Chemistry", which for twenty-five years had a great vogue, so that it was said that nearly all Europe learned chemistry from Thénard. After many honours he was elected to a seat in the Academy of Sciences. He at once set off for his home to receive the congratulations of his aged mother. He had found a copy of "The Imitation of Christ" in large print, that his mother could read without glasses. This he took with him, and he used to say that the finding of this book with its large type was one of his great discoveries. His work covered so great a range that there is not room here to tell of it. Dioxide of hydrogen was one of his best-known discoveries; he worked on the electrolysis of the oxides at the same time as Sir Humphry Davy, discovered boron, and came near antedating Davy in the isolation of chlorine. Most of his family died before him and his last years were filled with sadness. He was made a baron by Charles X in 1825 and served in the legislature.

T. O'Conor Sloane.

Thennesus, a titular suffragan see of Pelusium in Augustamnica Prima. Cassian (Collat., XI, 1–3) gives a very exact description of the little island which includes this bishopric. Its inhabitants were given solely to commerce owing to the lack of arable land. The bishop of this locality had just died when Cassian arrived there; and they were about to name a successor. In 451 Heron, another of its bishops, was condemned by the Council of Chalcedon for not having anathematized the Patriarch Dioscorus (Mansi, "Concil. coll.", VI, 572; VII, 52). During the eighth century the Patriarch of Antioch, Dionysius of Tell Mahré, landed there (Bar-Hebræus, "Hist. eccles.", I, 360). About 870 the monk Bernard was well received there by the inhabitants, who were almost all Christians (Tobler and Molinier, "Itinera hierosolymitana", I, 313). Thennesus is also mentioned in a Coptic "Notitia episcopatuum" (Rougé, "Géog. anc. de la Basse Egypte", 156). It is to-day Tell-Tenis, at the extremity of an island in Lake Menzaleh, near the Suez Canal. There still remain there ruins and tombs of the Roman era.

S. Vailhé.

Theobald, Saint, b. at Provins in the Province of Champagne, France, in 1017; d. at Salanigo in Italy 30 June, 1066. He was a member of a noble family. In 1054 without the knowledge of his parents he and his friend Walter gave themselves to the life of hermits at Sussy in the Ardennes, then at Pittingen (now Pettingen) in the Diocese of Trier, a district that to-day belongs to the Grand Duchy of Luxemburg. From this place the two made a pilgrimage to Compostella in Spain, and afterwards returned into the territory of Trier. They made a second pilgrimage to Rome. As they returned they desired to go to Palestine by way of Venice, but Walter's strength failed near Salanigo in the Diocese of Vicenza. They therefore settled in a solitary place near Salanigo. After two years Walter died. A large number of disciples eager for salvation gathered around Theobald, who severed himself more and more from all earthly things. The bishop ordained him priest. His mother, who came to visit him, did not wish to leave him again, and led thenceforth under his direction a religious life.

Shortly before his death he entered the Camaldolese Order. Numerous miracles, some occurring before and some after his death, are reported of him. Alexander II (1061–1073) permitted the public veneration of St. Theobald. His veneration spread especially in Italy, France, Belgium, and Luxemburg. He is the patron saint of charcoal-burners.

Acta SS., June, V, 588–606; *Bibliotheca hagiogr. lat.* (Brussels, 1898–1900), 1163–4; Weicherding, *Der hl. Theobald* (Luxemburg, 1879); Allou, *Vie de saint Thibaud* (Meaux, 1873).

Klemens Löffler.

Theobald (Tedbald), Archbishop of Canterbury; d. 18 April, 1161. He was a Norman by descent and became a Benedictine monk at Bec late in the eleventh or early in the twelfth century. In 1127 he was made prior, and abbot in 1137. On 28 Dec., 1138, he was elected archbishop and was consecrated on 8 January following. He went to Rome for his pallium and took part in the second Lateran Council. He proved a wise and capable prelate, devout in his private life, charitable, and a lover of learning. During the civil war he adhered to King Stephen, whom he crowned, though for a time he was at the Empress Maud's court, and always worked for the Angevin succession.

In his household he collected many young men of ability, including his successor St. Thomas of Canterbury, and he encouraged the formation of scholars and statesmen of a new type. He was the first to introduce civil law into England, and founded a law school at Canterbury, inducing the famous jurist Roger Vacarius to come and lecture there. This introduction of Roman law had important effects on the fortunes of the common law of England, and incidentally led to the establishment of the Inns of Court to maintain the national body of law against the newly introduced code. Theobald suffered many difficulties owing to the appointment of his suffragan bishop, Henry of Winchester, as legate. Among these was the appointment of St. William of York as archbishop of that see, which Theobald felt bound to oppose. Celestine II did not reappoint Henry of Blois as legate and finally in 1150, or possibly before, Theobald was named legate by Blessed Eugene III, probably on the recommendation of St. Bernard (Ep. 238).

When the pope summoned the English bishops to a council at Reims the king forbade them to go, whereupon Theobald defied the king and went. Though he saved the king from excommunication, his property was confiscated and he was banished. The pope then put England under interdict, which was disregarded except in Canterbury, and finally the king and archbishop were reconciled in 1148. In 1151 Theobald held a legatine council in London. In the following year, acting on papal authority, he refused to crown Eustace, the king's son, and was again compelled to seek flight. While in Normandy he reconciled Henry of Anjou to Stephen, with the result that in 1153 the Treaty of Wallingford ended the Civil War. On Stephen's death Theobald crowned Henry II, and during the rest of his life. though not without anxiety for the future of the Church, he maintained good relations with the Court, especially with his former disciple Thomas, who had now become chancellor. He expressed to John of Salisbury his hope that Thomas would succeed him. Throughout his pontificate he had continual trouble with the monks of Christchurch, but in every instance his action was justified finally. He was buried in Canterbury Cathedral, where eighteen years afterwards his body was found incorrupt.

Edwin Burton.

Theocracy, a form of civil government in which God himself is recognized as the head. The laws of the commonwealth are the commandments of God, and they are promulgated and expounded by the accredited representatives of the invisible Deity, real or supposed—generally a priesthood. Thus in a theocracy civic duties and functions form a part of religion, implying the absorption of the State by the Church or at least the supremacy of the latter over the State. The earliest recorded use of the term "theocracy" is found in Josephus, who apparently coins it in explaining to Gentile readers the organization of the Jewish commonwealth of his time. Contrasting this with other forms of government—monarchies, oligarchies, and republics—he adds: "Our legislator [Moses] had no regard to any of these forms, but he ordained our government to be what by a strained expression, may be termed a theocracy [θεοκρατίαν], by ascribing the power and authority to God, and by persuading all the people to have a regard to him as the author of all good things" (Against Apion, book II, 16). In this connexion Josephus enters into a long and rather rambling discussion of the topic, but the entire passage is instructive.

The extent to which the ideals of the Mosaic theocracy were realized in the history of the Chosen People is a matter of controversy. Many eminent scholars are inclined to restrict its sway almost exclusively to the post-exilic period, when unquestionably the hierocratic rule and the ordinances of the Priestly Code were more fully carried into effect than in any of the preceding epochs. Be that as it may, and waiving critical discussion of the Old-Testament writings with which the solution of the question is intimately connected, attention may be called to the fact that a belief in the theocratic rulership of nations and tribes is, in form more or less crude, characteristic of the common fund of Semitic religious ideas. The various deities were considered as having a territorial jurisdiction, fighting for their respective peoples and defending the lands in which they dwelled. This is amply proved by the extant historic and religious records of the Assyrians and Babylonians, and the same idea finds occasional expression in the Old Testament itself (see, for instance, Judges, xi, 23 sq.; I Kings, xxvi, 19; Ruth, i, 15, 16, etc.). In a passage of the Book of Judges, Gideon is represented as refusing to accept the kingship offered to him by the people after his victory over the Madianites, in terms implying that the establishment of a permanent monarchy would involve disloyalty to the rule of Yahweh. "I will not rule over you, neither shall my son rule over you, but the Lord shall rule over you" (Judges, viii, 23). More explicit and stronger expression is given to the same view in the First Book of Kings in connexion with the appeal of the people to the aged prophet Samuel to constitute a king over them after the manner of the other nations. The request is displeasing to Samuel and to the Lord Himself, who commands the prophet to accede to the wishes of the people that they may be punished for their rejection of His kingship. "And the Lord said to Samuel: Hearken to the voice of the people in all that they say to thee. For they have not rejected thee, but me, that I should not reign over them" (I Kings, viii, 7). Again in chap. xii Samuel, in his final discourse to the people, reproaches them in similar words: "you said to me: Nay, but a king shall reign over us: whereas the Lord your God was your king". And at the call of the prophet the Lord sends thunder and rain as a sign of His displeasure, "and you shall know and see that you yourselves have done a great evil in the sight of the Lord, in desiring a king over you".

The bearing of these passages on the historic institution of the theocracy varies in the estimation of different scholars according to the date assigned by them to the sources to which the passages belong. Wellhausen and his school, chiefly on a priori grounds, consider them as retouches of the post-exilic period, but it is far more probable that they form a part of a much older tradition, and indicate that a belief in the Lord's kingship over the Chosen People existed prior to the establishment of the earthly monarchy. At the same time, there is no sufficient warrant for assuming on the authority of these texts that the theocratic rule in Israel came to an end with the inauguration of the monarchy, as is plain from the narration of the Lord's covenant with King David and his descendants (II Kings, vii, 1–17). According to the terms of this covenant the earthly monarch remains under the control of the heavenly King, and is constituted His vicegerent and representative. And this direct dependence of the king on the Lord for wisdom and guidance is assumed throughout the historical records of the Hebrew monarchy. The supreme test of the worthiness of any king to occupy his exalted position is his fidelity to the Lord and His revealed law. The historical books, and still more the writings of the prophets, voice the constant belief that God exercised a special and efficient rule over Israel by blessings, punishments, and deliverances. In the post-exilic period the hierocratic rule became the dominant feature of the Jewish theocracy, and, in spite of its limitations and perversions, it prepared, according to the designs of a wise Providence, the way for the New Dispensation— the Kingdom of Heaven so often mentioned in the Gospels.

Vigouroux, *Dictionnaire de la Bible*, s. v.

James F. Driscoll.

Theodard, Saint, Archbishop of Narbonne, b. at Montauban about 840; d. at the same place 1 May, 893. He seems to have belonged to a noble and wealthy family and to have studied with great zeal both ecclesiastical and secular learning in his youth. He gave proof of his education and skill when he was a subdeacon at a synod at Toulouse that was called upon to settle a dispute between the Jews of the place and Bishop Bernhard. In this way the presiding officer of the synod, Archbishop Sigebod of Narbonne (873–885), came to have so high an opinion of Theodard that he made him his archdeacon. In this position Theodard distinguished himself by faultless morals, modesty, piety, and charitableness, and was "eyes to the blind, feet to the lame, a father to the poor, and the consoler of all the oppressed". After Sigebod's death (885) Theodard was elected his successor, consecrated on 15 August, 885, and in 886 went to Rome to obtain the pallium from Stephen VI.

Theodard maintained with energy the rights of his see and its suffragans, repaired the damages that these dioceses had suffered from the incursions of the Saracens, restored the cathedral, and gave up his revenues and the treasures of his church for the release of captive Christians. At a later date he was able to replace the treasures he had used. He died where he had lived in the Benedictine Abbey of St. Martin and was buried there. The abbey bore his name from 845. It was later plundered by the Huguenots; since then all the relics of St. Theodard, excepting a small remnant, have disappeared.

Acta SS., May, I, 141–56; *Gallia christiana*, VI (Paris, 1739), 19–22; *Bibliotheca hagiogr. Lat.* (Brussels, 1898–1900), 1165; Guyard, *Vie de St. Théodard* (Montauban, 1857; 2nd ed., Paris, 1887).

Klemens Löffler.

Theodicy.—Etymologically considered theodicy (θεὸς δίκη) signifies the justification of God. The term was introduced into philosophy by Leibniz (q. v.), who, in 1710, published a work entitled: "Essais de Théodicée sur la bonté de Dieu, la liberté de l'homme et l'origine du mal". The purpose of the essay was to show that the evil in the world does not conflict with the goodness of God, that, indeed, notwithstanding its many evils, the world is the best of all possible worlds (see Optimism). The problem of evil (see Evil) has from earliest times engrossed the attention of philosophers. The well-known sceptic Pierre Bayle had denied in his "Dictionnaire historique et critique" the goodness and omnipotence of God on account of the sufferings experienced in this earthly life. The "Théodicée" of Leibniz was directed mainly against Bayle. Imitating the example of Leibniz other philosophers now called their treatises on the problem of evil "theodicies". As in a thorough treatment of the question the proofs both of the existence and of the attributes of God cannot be disregarded, our entire knowledge of God was gradually brought within the domain of theodicy. Thus theodicy came to be synonymous with natural theology (*theologia naturalis*), that is, the department of metaphysics which presents the positive proofs for the existence and attributes of God and solves the opposing difficulties. Theodicy, therefore, may be defined as the science which treats of God through the exercise of reason alone. It is a science because it systematically arranges the content of our knowledge about God and demonstrates, in the strict sense of the word, each of its propositions. But it appeals to nature as its only source of proof, whereas theology sets forth our knowledge of God as drawn from the sources of supernatural revelation.

The first and most important task of theodicy is to prove the existence of God. It is of course presupposed that the suprasensible can be known and that the limits of experience pure and immediate can be transcended. The justification of this assumption must be furnished by other branches of philosophy, e. g. criteriology and general metaphysics. The natural demonstrability of God's existence was always accepted by the majority of theists. Hume and Kant were the first to awaken in the minds of would-be theists serious doubt on this point. Not that these philosophers presented any solid reason against the long-tested arguments for the existence of God, but because in their systems a scientific proof of the existence of a supernatural being is impossible. New ways of establishing theism were now sought. The Scotch School led by Thomas Reid taught that the fact of the existence of God is accepted by us without knowledge of reasons but simply by a natural impulse. That God exists, this school said, is one of the chief metaphysical principles that we accept not because they are evident in themselves or because they can be proved, but because common sense obliges us to accept them. In Germany the School of Jacobi taught that our reason is able to perceive the suprasensible. Jacobi distinguished three faculties: sense, reason, and understanding. Just as sense has immediate perception of the material so has reason immediate perception of the immaterial, while the understanding brings these perceptions to our consciousness and unites them to one another (Stöckl, "Geschichte der neueren Philosophie", II, 82 sqq.). God's existence, then, cannot be proved—Jacobi, like Kant, rejected the absolute value of the principle of causality—it must be felt by the mind. In his "Emile", Jean-Jacques Rousseau asserted that when our understanding ponders over the existence of God it encounters nothing but contradictions; the impulses of our hearts, however, are of more value than the understanding, and these proclaim clearly to us the truths of natural religion, e. g., the existence of God, the immortality of the soul, etc. The same theory was advocated in Germany by Friedrich Schleiermacher (d. 1834), who assumed an inner religious sense by means of which we feel religious truths. According to Schleiermacher, religion consists solely in this inner perception, dogmatic doctrines are unessential (Stöckl, loc. cit., 199 sqq.). Nearly all Protestant theologians who have not yet sunken into atheism follow in Schleiermacher's footsteps. They generally teach that the existence of God cannot be demonstrated; certainty as to this truth is only furnished us by inner experience, feeling, and perception.

As is well known the Modernists also deny the demonstrability of the existence of God. According to them we can only know something of God by means of the vital immanence, that is, under favourable circumstances the need of the Divine dormant in our subconsciousness becomes conscious and arouses that religious feeling or experience in which God reveals himself to us (see Modernism). In condemnation of this view the oath against Modernism formulated by Pius X says: "Deum . . . naturali rationis lumine per ea quæ facta sunt, hoc est per visibilia creationis opera, tanquam causam per effectus certo cognosci adeoque demonstrari etiam posse, profiteor", i. e., I declare that by the natural light of reason, God can be certainly known and therefore His existence demonstrated through the things that are made, i. e., through the visible works of creation, as the cause is known through its effects.

There is, however, still another class of philosophers who assert that the proofs for the existence of God present indeed a fairly large probability but no absolute certainty. A number of obscure points, they say, always remain. In order to overcome these difficulties there is necessary either an act of the will, a religious experience, or the discernment of the misery of the world without God, so that finally the heart makes the decision. This view is maintained, among others, by the noted English statesman Arthur Balfour in his widely read book "The Foundations of Belief" (1895). The opinions set forth in this work were adopted in France by Brunetière, the editor of the "Revue des deux Mondes". Many orthodox Protestants express themselves in the same manner, as, for instance, Dr. E. Dennert, President of the Kepler Society, in his work "Ist Gott tot?" (Stuttgart, 1908). It must undoubtedly be conceded that for the perception of religious truths the mental attitude and temper are of great importance. As the questions here under consideration are those that penetrate deeply into practical life and their solution is not directly evident, the will is thus able to hold fast to the opposing difficulties and to prevent the understanding from attaining to quiet, objective reflection. But it is false to say that the understanding cannot eliminate every reasonable doubt as to the existence of God, or that a subjective inclination of the heart is a guarantee of the truth, even though there is no evidence that it is based on objective facts. This latter view would open the door wide to religious extravagance. It is not, therefore, an excess of intellectualism to demand that the truths which serve as the rational basis of faith shall be strictly proved.

Even in earlier times there were those who denied that the existence of God could be proved absolutely by the understanding alone, and took refuge in Revelation. In his "Summa contra Gentiles" (I, c. xii) St. Thomas refers to such reasoners. At a later date this opinion was championed by the Nominalists, William of Occam and Gabriel Biel, as well as by the Reformers; the Jansenists demanded the special aid of grace. In the nineteenth century the Traditionalists (see TRADITIONALISM) asserted that only when some vestiges of the original revelation reached man could he deduce with certainty the existence of God. Dr. J. Kuhn, formerly professor at Tübingen, declares that the clear recognition of the existence of God requires a pure soul unstained by sin. Ontologism (q. v.) went to the other extreme and asserted the immediate cognition of God. St. Anselm offered an **a priori** proof of the existence of God. This, however, has been always and rightly rejected by the majority of Catholic philosophers, notwithstanding the modifications by which Duns Scotus, Leibniz, and Descartes sought to save it (cf. Dr. Otto Paschen, "Der ontologische Gottesbeweis in der Scholastik", Aachen, 1903; M. Esser, "Der ontologische Gottesbeweis und seine Geschichte", Bonn, 1905). In regard to the various **a posteriori** proofs for the existence of God, see the article GOD. A dispute has arisen of late as to whether there are a number of proofs of the existence of God or whether all are not merely parts of one and the same proof (cf. Dr. C. Braig, "Gottesbeweis oder Gottesbeweise?", Stuttgart, 1888). It is certain that we always reach God as the cause, the last ground of all existence, and thus constantly follow as a guide the principle of sufficient reason. But the starting-point of the individual proofs varies. St. Thomas calls them aptly (Summ. theol., I, Q. ii, a. 3) *viæ*, i. e., roads to the apprehension of God which all open on the same highway.

After demonstrating the existence of God, theodicy investigates the question as to His nature and attributes. The latter are in part absolute (*quiescentia*) in part relative (*operativa*). In the first class belong the infinity, unity, immutability, omnipresence, and eternity; to the second class the knowledge, volition, and action of God. The action of God includes the creation, maintenance, and government of the world, the co-operation of God with the activity of the creature, and the working of miracles. The understanding affords us abundant knowledge concerning God, although it allows us but faint glimpses of His essential greatness and beauty. For one thing should not be forgotten, namely, that all our cognition of God is incomplete and analogous, that is, is formed from notions that we have deduced from created things. Hence it is that much remains obscure to us, as for instance, how God's immutability harmonizes with His freedom, and how He knows the future. But the inadequacy of our knowledge does not justify the assertion of the Agnostic that God is unknowable and that consequently any attempt such as theodicy makes to reason about His attributes and our relations to Him is foredoomed to failure (see AGNOSTICISM).

An historical survey of the development of the proofs from Plato to Leibniz for the existence of God may be found in the work of GRATRY, *De la connaissance de Dieu*, I (Paris, 1853), 72–434, II, 1–98. Of value are also: GRUNWALD, *Gesch. der Gottesbeweise im Mittelalter bis zum Ausgang der Hochscholastik* (Münster, 1907); DANIELS, *Quellenbeiträge u. Untersuchungen zur Gesch. der Gottesbeweise im XIII. Jahrhundert mit besonderer Berücksichtigung des Arguments im Proslogion des hl. Anselm* (Münster, 1909); STAAB, *Die Gottesbeweise in der katholischen deutschen Litteratur von 1850–1900* (Paderborn, 1910).

In addition to the bibliography under the article GOD, the following works may be mentioned: LILLY, *The Great Enigma* (London, 1892); LUCAS, *Agnosticism and Religion* (New York, 1895); MOYES, *The Existence of God* (London, and Edinburgh, 1906); WARD, *Essay on the Philosophy of Theism* (London, 1884); FLINT, *Antitheistic Theories* (2nd ed., London and Edinburgh, 1880); HONTHEIM, *Institutiones Theodicææ* (Freiburg, 1893); URRÁBURU, *Theodicea* (Vallodolid, 1899); SCHIFFINI, *Disputationes metaphysicæ*, 2 vols. of *Theologia naturalis* (2nd ed., Turin, 1894); BOEDDER, *Theologia naturalis* (3rd ed., Freiburg, 1911); ZIGLIARA, *Theologia naturalis* (Rome, 1886); GEYSER, *Das philosophische Gottesproblem* (Bonn, 1899); GUTBERLET, *Die Theodicee* (4th ed., Münster, 1909); LEHMEN, *Theodicee* (2nd ed., Freiburg, 1906); MAYER, *Der teleologische Gottesbeweis u. der Darwinismus* (Mainz, 1901); ROLFES, *Die Gottesbeweise bei Thomas von Aquin und Aristoteles* (Cologne, 1898); MOISANT, *Dieu, l'expérience en métaphysique* (Paris, 1907); DE BROGLIE, *Preuve psychologique de l'existence de Dieu* (Paris, 1905). See also the bibliographies to AGNOSTICISM, ATHEISM, EVIL, MODERNISM, MONISM, and PANTHEISM.

CONSTANTIN KEMPF.

Theodore I, POPE, from 642 to 649; the date of his birth is unknown. He was a Greek of Jerusalem and the son of a bishop, Theodore. His election as pope was promptly confirmed by the Exarch of Ravenna, perhaps because he was a Greek, and he was consecrated 24 Nov., 642. Engaged throughout all his pontificate in the struggle against Monothelitism, he at once wrote to the Byzantine Emperor Constans II to inform him that he could not recognize Paul as Patriarch of Constantinople, because the deposition of his predecessor (Pyrrhus) had not been canonical. He then urged Constans to withdraw the Ecthesis. He also wrote to Paul and to the bishops who had consecrated him, to impress upon them the importance of securing the legal deposition of Pyrrhus, if the accession of Paul was to be recognized. If Theodore's vigorous action produced no result at Constantinople, it elsewhere excited strong opposition to Monothelitism. The Bishops of Cyprus, Palestine, and Africa expressed their loyal submission to his teaching in very striking language. Even the deposed patriarch Pyrrhus recanted his heresy before Theodore (645), but soon relapsed into his old errors, and was excommunicated by the pope (648). Meanwhile, urged by the bishops of Africa, Theodore made another effort to reclaim Paul, but only succeeded in drawing from him an express declaration of his belief in the doctrine of one Will in our Lord. This brought upon him sentence of excommunication and deposition from Rome (649). To this Paul replied by barbarously ill-treating the papal *apocrisiarii* (or nuncios) at Constantinople. He also prevailed upon Constans to issue a new decree known as the Type (*Typus*). This document ordered the *Ecthesis* to be taken down, and enjoined that in future there was to be no more discussion on the doctrine of one or two Wills or Operations. The Type was promptly condemned "by the whole West" in general, and specifically by Theodore's successor (St. Martin I), but it is not certain whether Theodore lived long enough to anathematize it. This energetic pontiff, who was good to the poor of Rome, and a benefactor of its churches, was buried in St. Peter's, 14 May, 649.

Liber Pontificalis, I, 330 sqq., ed. DUCHESNE (Paris, 1886); JAFFÉ, *Regesta*, I, 228 sqq. (Leipzig, 1888); MAXIMI, *Disputatio, vita*, etc., in LABBE, *Concil.*, V, pp. 1813 sqq.; or *P. L.*, CXXIX; or COMBEFIS (2 vols., Paris, 1675); *Acts of the Lateran Council under Martin I;* MANN, *Lives of the Popes in the early Middle Ages*, I (London, 1902), 369 sqq.

HORACE K. MANN.

Theodore II, POPE, son of Photius. His pontificate lasted only twenty days; neither the date of his birth nor of his accession to the papacy is known; it is probable that he was pope during December 897. He reinstated in synod the clerics who had been degraded by Stephen (VI) VII, ordered the burning of the acts of resignation which they had been forced to tender, and formally recognized the validity of the orders conferred by Pope Formosus. He caused the body of the last-named pope, which had been thrown into the Tiber and cast ashore by a flood, to be reburied in St.

Peter's. By his contemporary Frodoard he is said to have been beloved by the clergy, to have himself loved and promoted peace, and to have been temperate, and chaste, and charitable to the poor.

Frodoard, *De Christi triumph.* in *P. L.*, CXXXV; Auxilius in Dümmler, *Auxilius und Vulgarius* (Leipzig, 1866); Jaffé, *Regesta*, I (Leipzig, 1888); Mann, *Lives of the Popes in the early Middle Ages* (London, 1910), 88 sqq.

Horace K. Mann.

Theodore, seventh Archbishop of Canterbury, b. at Tarsus in Cilicia about 602; d. at Canterbury 19 September, 690; was a monk (probably of the Basilian Order), but not yet in Holy orders, living at Rome in 667, when Pope Vitalian chose him for the See of Canterbury in place of Wighard, who had died before consecration. After receiving orders, Theodore was consecrated by the pope himself, on 26 March, 668, and set out for England, but did not reach Canterbury until May, 669. The new primate found the English Church still suffering from the jealousies and bitterness engendered by the long Paschal controversy, only lately settled, and sadly lacking in order and organization. The dioceses, conterminous with the divisions of the various kingdoms, were of unwieldy size, and many of them were vacant. Theodore, says Bede, at once "visited all the island, wherever the tribes of the Angles inhabited", and was everywhere received with respect and welcome. He made appointments to the vacant bishoprics, regularized the position of St. Chad, who had not been duly consecrated, corrected all that was faulty, instituted the teaching of music and of sacred and secular learning throughout the country, and had the distinction of being, as Bede specially mentions, "the first archbishop whom all the English Church obeyed". In 673 he convoked at Hertford the first synod of the whole province, an assembly of great importance as the forerunner and prototype of future English witenagemotes and parliaments. Going later to the court of the King of Northumbria, which country was entirely under the jurisdiction of St. Wilfrid, he divided it into four dioceses against the will of Wilfrid, who appealed to Pope Agatho. The pope's decision did not acquit Theodore of arbitrary and irregular action, although his plan for the subdivision of the Northumbrian diocese was carried out. For the See of Lindisfarne Theodore himself consecrated St. Cuthbert in 685, and in the following year he was fully reconciled to Wilfrid, who was restored to his See of York. Thus, before his death, which occurred five years later, Theodore saw the diocesan system of the English Church fully organized under his primatical and metropolitical authority. Stubbs emphasizes the immensely important work done by Theodore not only in developing a single united ecclesiastical body out of the heterogeneous Churches of the several English kingdoms, but in thus realizing a national unity which was not to be attained in secular matters for nearly three centuries.

Apart from the epoch-making character of his twenty-one years' episcopate, Theodore was a man of commanding personality: inclined to be autocratic, but possessed of great ideas, remarkable powers of administration, and intellectual gifts of a high order, carefully cultivated. Practically his only literary remains are the collected decisions in disciplinary matters, well known as "The Penitential of Theodore". It was first published complete by Wasserschleben in 1851, and several editions of it have been printed during the past sixty years. Theodore was buried in St. Augustine's Monastery, Canterbury, a long poetical epitaph, of which Bede has preserved only eight verses, being inscribed upon his tomb.

Wilfridi* in Raine, *Historians of the Ch. of York*, I (London, 1879), 1–103.—For text of Theodore's *Penitential* and other reputed works, see *P. L.*, XCIX, 901–1229.

D. O. Hunter-Blair.

Theodore, Bishop of Mopsuestia in Cilicia and ecclesiastical writer, b. at Antioch about 350 (thus also known as Theodore of Antioch), of wealthy and prominent parents; d. 428.

I.—According to Syrian sources Theodore was the cousin of the somewhat younger Nestorius (Nestle, op. cit. in bibliography); Polychromius, afterwards Bishop of Apamea, was a brother of Theodore. The clever and highly gifted youth received the education in classical literature usual to his station and studied philosophy and rhetoric in the school of the renowned pagan rhetorician Libanius. He here became acquainted with his early friends, St. John Chrysostom and Maximus, later Bishop of Seleucia (perhaps as fellow-student). Following the example of Chrysostom (Socrates, "Hist. eccl.",VI, iii), Theodore renounced a secular career when about eighteen years old, and devoted himself to the ascetic life in the school of Diodorus (later Bishop of Tarsus) and Carterius, situated near Antiochia. His youthful and too tempestuous zeal soon grew cold, and, owing chiefly to the memory of Hermione whom he intended to take as wife, he resolved to return to the world (Sozomen, "Hist. eccl.", VIII, 2; Hesychius Hieros., "Hist. eccl." in Mansi, "Concil.", IX, 248). Chrysostom's grief at this step of his friend was so great that he addressed him two letters or treatises ("Ad Theodorum lapsum" in P. G., XLVII, 277 sqq.) to recall him to his early resolution. A little later Theodore did indeed return to the "divine philosophy" of the ascetic-monastic life. He quickly acquired a great acquaintance with the Holy Scriptures. Impetuous and restless of character, he had already, when scarcely twenty years old (at eighteen according to Leontius, "Adv. Incorrupticolas", viii, in P. G., LXXXVI, 1364), applied himself to theological compositions. His first work was the commentary on the Psalms, in which his extreme exegetical tendencies in the sense of an almost exclusively grammatico-historical and realistic explanation of the text is already manifest (see below Theodore's Hermeneutics). Between 383 and 386 he was ordained priest (perhaps together with Chrysostom) by his early teacher (now bishop) Flavian. Theodore soon displayed a very keen interest in the theologico-polemical discussions of the time, writing and preaching against the Origenists, Arians, Eunomians, Apollinarists, magicians, Julian the Apostate, etc. His keen and versatile literary activity won him the name of "Polyhistor" (Sozomen, op. cit., VIII, ii). Theodore apparently left Antioch before 392 to join his old teacher Diodorus, who was then Bishop of Tarsus (Hesychius Hier., op. cit., in Mansi, IX, 248). Probably through the influence of Diodorus he was named Bishop of Mopsuestia in 392, in which capacity he was to labour thirty-six years. In 394 he attended the Synod of Constantinople, and during its progress preached before the Emperor Theodosius the Great. During the confusion concerning Chrysostom, Theodore remained faithful to his early friend (cf. Chrysostom, "Epp.", cxii, in P. G., LII, 668; Latin translation in Facundus, loc. cit., VII, 7). Later (about 421) he received hospitably Julian of Eclanum and other Pelagians, and doubtless allowed himself to be further influenced by their dogmatic errors. However, he later associated himself with the condemnation of Pelagianism at a synod in Cilicia (Marius Merc. in P. L., XLVIII, 1044). He died in 428, the year in which Nestorius succeeded to the episcopal See of Constantinople. During his lifetime Theodore was always regarded as orthodox and as a prominent ecclesiastical author, and was even consulted by distant bishops on theological questions.

II. Writings.—The most complete list of the writings of Theodore is given by Ebedjesu (d. 1318; see Assemani, "Bibl. orient.", III, 30–36). According to this the following works existed in a Syrian translation. A. *Exegetical Commentaries:* (a) On the Old Testament: (1) on Genesis, 3 books (Greek fragments in the Nicephoruscatene, Leipzig, 1772; Syrian in Sachau, 1–21); (2) on the Psalms, 5 books (Greek fragments in P. G., LXVI, 648; Latin translation discovered by Mercati, see bibliography; Greek text discovered by Lietzmann, but not yet edited, cf. ibid.); (3) on the twelve Minor Prophets (extant in its entirety; edited by Mai in P. G., LXVI, 124–632); (4) on the First and Second Books of Kings, 1 book (lost); (5) on Job, 2 books, dedicated to St. Cyril of Alexandria (only four fragments preserved in P. G., loc. cit., 697 sq.); (6) on Ecclesiastes, 1 book (lost); (7) to the four Great Prophets, 4 books (lost). Assemani adds "Quæstiones et Responsiones in Sacram Scripturam"; the fragments mentioned by the Fifth Œcumenical Council (Mansi, IX, 225) on the Canticle of Canticles are perhaps taken from a letter. (b) On the New Testament: (1) on Matthew, 1 book (fragments in P. G., LXVI, 705 sqq.); (2) on Luke, 1 book (fragments, ibid., 716 sqq.); (3) on John, 1 book (fragments, ibid., 728; Syrian, discovered and edited by Chabot, Paris, 1897); (4) on the Acts, 1 book (fragments in P. G., LXVI, 785 sq.); (5) on all the Epistles of St. Paul (Greek fragments in P. G., LXVI, 188–968; the Epistles to the Galatians, Colossians, Thessalonians, Philemon, Latin edition by H. B. Swete, Cambridge, 1880–82). B. *Opuscula:* (1) "De sacramentis", 1 book (lost); (2) "De fide", 1 book ("Liber ad baptizatos", according to Facundus, op. cit., IX, 3; fragments in Swete, II, 323–27); (3) "De sacerdotio", 1 book (lost); (4) "De Spiritu Sancto", 2 books, against the Macedonians (lost); (5) "De Incarnatione", 15 books (cf. Facundus, IX, 3; Gennadius, 12; written at Antioch about 382–92 against the Apollinarians and Eunomians; Greek fragm. in P. G., LXVI, 969 sqq., and Swete, II, 290–312); (6) "Contra Eunomium", 2 books (one fragment in Facundus, IX, 3); (7) "Contra dicentes: peccatum naturæ inesse", 2 books (cf. Photius, "Bibl.", 177); (8) "Contra magicam artem", 2 books (cf. Photius, 81); (9) "Ad monachos", 1 book (lost); (10) "De obscura locutione", 1 book (lost); (11) "De perfectione operum", 1 book (lost); (12) "Contra allegoristas", 5 books (cf. Facundus, III, 6: "De allegoria et historia"); (13) "De Assumente et Assumpto", 1 book (lost); (14) "De legislatione", 1 book (lost). Many unidentified fragments are perhaps taken from lost works. The fifteen books "De mysteriis" or "Opus mysticum", mentioned by Assemani (III, 1, 563), are probably identical with the "Codex mysticus" cited by Facundus (III, 2). Concerning the "Symbolum fidei" (Facundus, III, 2; Leontius, P. G., LXXXVI, 1367), cf. Fritzsche in P. G., LXVI, 73 sqq. Leontius Byzant. ("Advers. Incorr.", xx, in P. G., LXXXVI, 1368) says, perhaps with reference to the so-called Nestorian Liturgy, that Theodore had also introduced a new Liturgy. C. *Letters:* These were collected in one volume which is now lost.

III. Theodore's Doctrine.—A. *Hermeneutics and Canon.*—As regards the Old Testament, Theodore seems to have accepted Flavius Josephus's idea of inspiration and his canon. He rejected as uncanonical the Book of Job, the Canticle of Canticles, the Book of Esdras, and the deutero-canonical books. From the New Testament he excised the Catholic Epistles (except I Peter and I John) and the Apocalypse (cf. Leontius, loc. cit., III, 13–17, in P. G., LXXXVI, 1365–68). In his explanation of the Holy Writ Theodore employs primarily the prevailing historical and grammatical method of the Antiochene school. Of all the Psalms he recognized only ii, viii, xlv, and cx as containing direct prophetic reference to the Messias; the Canticle of Canticles was pronounced by him a vulgar nuptial poem. B. *Anthropology and Doctrine of Justification.*—Theodore's doctrine concerning justification gave rise to very grave misgivings, even if we reject the accusations of Leontius (loc. cit., 20–37) as exaggerated. According to Theodore, the sin of Adam rendered himself and mankind subject to death, because he was then mutable. But that which was the consequence of sin in the case of Adam is in his descendants its cause, so that in consequence of mutability all men in some manner or other sin personally. The object of the Redemption was to transfer mankind from this condition of mutability and mortality to the state of immutability and immortality. This happened first in the case of Christ, fundamentally by the union with the Logos, to a greater extent at His baptism, and completely at His Resurrection. In mankind this change is effected by union with Christ. The union begins in baptism, through which (1) all (personal) sins are remitted, (2) the grace of Christ is granted, which leads us to immutability (sinlessness) and immortality. At the baptism of children only this second effect occurs. That these ideas show a certain resemblance to the fundamental thoughts of Pelagianism is not to be denied; whether, however, Theodore influenced Pelagius and Cælestius (according to Marius Mercator, through the medium of the Syrian Rufinus; P. L., XLVIII, 110), or whether these influenced Theodore, is very difficult to determine. C. *Christology.*—Theodore's Christology exercised a more direct and eventful influence on the doctrine of his (mediate) disciple Nestorius (q. v.). The contemporary polemics against Arianism and Apollinarianism led the Antiochenes (Diodorus, Theodore, and Nestorius) to emphasize energetically the perfect Divinity and the unimpaired Humanity of Christ, and to separate as sharply as possible the two natures. Thus, in a sermon which he delivered at Antioch (perhaps the first as bishop), Theodore vehemently attacked the use of the term θεοτόκος, long employed in ecclesiastical terminology, because Mary was strictly speaking ἀνθρωποτόκος, and only indirectly θεοτόκος. It was only by recalling his words and correcting himself that Theodore could appease the excitement resulting from this view (see John of Antioch, "Epist. ad Theodosium imper." in Facundus Herm., "Pro defensione trium capp.", X, 2; P. L., LXXXVII, 771). It cannot indeed be denied that the Antiochene separation of the natures must result in an improper weakening of the union in Christ. Like Nestorius, Theodore expressly declares that he wished to uphold the unity of person in Christ; perhaps they recognized some distinction between nature and person, but did not know exactly what was the distinguishing factor, and therefore used faulty paraphrases and comparisons, and spoke of the two natures in a way which, taken strictly, presupposed two persons. Thus, according to Theodore, the human nature of Christ was not only *passibilis*, but also really *tentabilis*, since otherwise His actual freedom from sin would be the result of His physical union with God, not a merit of His free will. The union of the human and Divine nature happens not κατ' οὐσίαν nor κατ' ἐνέργειαν, but κατ' εὐδοκίαν (at will), and indeed a εὐδοκία ὡς ἐν υἱῷ it is a συνάφεια, which effects a ἕνωσις εἰς ἓν πρόσωπον. The two natures form a unity, "like man and wife" or "body and soul". Consequently, according to Theodore, the *communicatio idiomatum*, fundamentally speaking, is also lawful.

IV. The Condemnation of the Doctrine of Theodore.—While during his lifetime (apart from the episode at Antioch) Theodore was regarded as orthodox (cf. Theodoret, "Hist. eccl.", V, xxxix; John of Antioch, in Facundus, II, 2), a loud outcry was raised against him when the Pelagians and Nestorians appealed to his writings. The first to represent him as the father of Pelagianism was Marius Mercator in his work "Liber subnotationum in verba Juliani, Præf." (about 431; in P. L., XLVIII, 111). He was accused of Nestorianism by Hesychius of Jerusalem in his Church History (about 435). Rabulas of Edessa went so far as to pronounce anathema on Theodore. Acting under the influence of the latter, St. Cyril of Alexandria expressed himself in fairly sharp terms concerning Theodore, naming him with Diodorus the "patres Nestorii blasphemiæ" ("Ep. lxxi ad Theodosium imp.", in P. G., LXXVII, 341–44); he was, however, unwilling to condemn Theodore, as he had died in peace with the Church. Meanwhile the Nestorian strife passed by without any official action being taken by the Church against Theodore, although his writings stood in higher favour among the Nestorians of Edessa and Nisibis than those of Nestorius himself. The General Council of Chalcedon seemed rather to favour Theodore, when it declared his disciples and admirers, Theodoret and Ibas of Edessa, orthodox, although the latter in his epistle to Maris had referred to Theodore in terms of the highest praise. The Monophysitic reaction against the Council of Chalcedon in the sixth century first succeeded in bringing Theodore's person and writings under the ban of the ecclesiastical anathema through the ill-famed dispute of the Three Chapters. Theodore was for the first time condemned as a heretic by the Emperor Justinian in his edict against the Three Chapters (544). Under the influence of imperial pressure Pope Vigilius composed (553) at Constantinople a document in which sixty propositions taken from Theodore's writings were declared heretical. Finally, at the Fifth General Synod (553), at which, however, Vigilius did not participate, the three Chapters, including Theodore's writings and person, were placed under anathema. It was only on 8 December that Vigilius, broken with exile, gave his approval to the decrees of the synod. Among the most zealous defenders of Theodore and the Three Chapters, besides Pope Vigilius (until 533), were the African Facundus of Hermiana ("Pro defensione trium capitulorum libri XII", in P. L., LXVII, 527 sqq.) and the bishops, Paulinus of Aquileia and Vitalis of Milan.

The most complete edition of Theodore's works is given in P. G., LXVI, 124 sqq.; see also: SWETE, *Theodori Ep. Mopsuesteni in epistolas B. Pauli. The Latin Version with the Greek Fragments* (2 vols., Cambridge, 1880-82); SACHAU, *Theodori Mopsuesteni fragmenta syriaca* (Leipzig, 1869); and some fragments in *S. Innocenti ep. Maroniæ: De his qui unum ex trinitate vel unum Subsistentiam seu personam Dominum nostrum Jesum Christum dubitant confiteri*, ed. AMELLI in *Spicilegium Casinense*, I (1888), 148-54.

CHRYS. BAUR.

Theodore of Amasea, SAINT, surnamed TYRO (TIRO), not because he was a young recruit, but because for a time he belonged to the Cohors Tyronum (Nilles, Kal. man., I, 105), called of Amasea from the place where he suffered martyrdom, and Euchaita from the place, Euchais, to which his body had been carried, and where he was held in such veneration that the city was frequently spoken of [redacted] Theodoropolis. His martyrdom seems to have taken place 17 Feb., 306, under the Emperors Galerius Maximian and Maximin, for on this day the Menologies give his feast. The Greeks and Armenians honour him also on the first Saturday of Lent, while the Roman Martyrology records him on 9 Nov. In the twelfth century his body was transferred to Brindisi, and he is there honoured as patron; his head is enshrined at Gaeta. There are churches bearing his name at Constantinople, Jerusalem, Damascus, and other places of the East. An ancient church of Venice, of which he is titular, is said to have been built by Narses. At the foot of the Palatine in Rome is a very old church, circular in shape and dedicated to S. Teodoro, whom the Roman people call S. Toto, which was made a collegiate church by Felix IV. The people showed their confidence in the saint by bringing their sick children to his temple. His martyrdom is represented in the choir of the cathedral of Chartres by thirty-eight glass paintings of the thirteenth century (Migne, "Dict. iconogr.", 599). He is invoked against storms. Emblems: temple, torch, crocodile, pyre, crown of thorns.

St. Gregory of Nyssa delivered a panegyric on his feast and gave several data concerning his life and martyrdom (P. G., XLVI, 741, and Ruinart, 505). The oldest text of the "Martyrium S. Theodori Tironis" was published by Delehaye in "Les légendes grecques des saints militaires", p. 227, but it is considered largely interpolated (Anal. Boll., XXX, 323). St. Theodore is said to have been born in the East (Syria or Armenia are mentioned by some writers). He enlisted in the army and was sent with his cohort to winter quarters in Pontus. When the edict against the Christians was issued by the emperors, he was brought before the Court at Amasea and asked to offer sacrifice to the gods. Theodore, however, denied their existence and made a noble profession of his belief in the Divinity of Jesus Christ. The judges, pretending pity for his youth, gave him time for reflection. This he employed in burning the Temple of Cybele. He was again taken prisoner, and after many cruel torments was burned at the stake.

FRANCIS MERSHMAN.

Theodore of Gaza, a fifteenth-century Greek Humanist and translator of Aristotle, b. at Thessalonica early in the fifteenth century; d. in Southern Italy in 1478. In 1429 he went to Italy, where he made his home, like many other learned Greeks who did not wish to submit to the rule of the Turks at Constantinople. He taught Greek at Siena, Ferrara, and Rome. Having learned Latin from Victorino da Feltre, he devoted himself to the translation of Aristotle's works into that language. He was received with favour at the Court of Nicholas V, and, although a pronounced Aristotelean, remained on terms of friendship with Cardinal Bessarion. Through the good offices of the cardinal he obtained a small benefice in the Abruzzi. His chief service to the cause of Peripatetic philosophy consisted in his translations, which were superior both in point of accuracy and in that of style to the versions in use before his time. He devoted particular attention to the translation and exposition of Aristotle's works on natural science. In the campaign waged by Plethon (q. v.) against Aristotelianism he contributed his share to the defence of the Stagyrite. His influence on the humanistic movement was considerable, owing to the success with which he taught Greek language and literature at the various seats of learning in Italy. At Ferrara he founded an academy to offset the influence of the Platonic academy founded by Plethon at Florence.

UEBERWEG, *Hist. of Philosophy*, tr. MORRIS, I (New York, 1892), 10.

WILLIAM TURNER.

Theodore of Studium, Saint, a zealous champion of the veneration of images and the last great representative of the unity and independence of the Church in the East, b. in 759; d. on the Peninsula of Tryphon, near the promontory Akrita on 11 November, 826. He belonged to a very distinguished family and like his two brothers, one of whom, Joseph, became Archbishop of Thessalonica, was highly educated. In 781 Theodore entered the monastery of Saccudion on the Asiatic side of the Bosphorus near Constantinople, where his uncle Plato was abbot. In 787 or 788 Theodore was ordained priest and in 794 succeeded his uncle. He insisted upon the exact observance of the monastic rules. During the Adulterine heresy dispute (see Nicephorus, Saint), concerning the divorce and remarriage of the Emperor Constantine VI, he was banished by Constantine VI to Thessalonica, but returned in triumph after the emperor's overthrow. In 799 he left Saccudion, which was threatened by the Arabs, and took charge of the monastery of the Studium at Constantinople. He gave the Studium an excellent organization which was taken as a model by the entire Byzantine monastic world, and still exists on Mount Athos and in Russian monasticism. He supplemented the somewhat theoretical rules of St. Basil by specific regulations concerning enclosure, poverty, discipline, study, religious services, fasts, and manual labour. When the Adulterine heresy dispute broke out again in 809 he was exiled a second time as the head of the strictly orthodox church party, but was recalled in 811. The administration of the iconoclastic Emperor Leo V brought new and more severe trials. Theodore courageously denied the emperor's right to interfere in ecclesiastical affairs. He was consequently treated with great cruelty, exiled, and his monastery filled with iconoclastic monks. Theodore lived at Metopa in Bithynia from 814, then at Bonita from 819, and finally at Smyrna. Even in banishment he was the central point of the opposition to Cæsaropapism and Iconoclasm. Michael II (820–9) permitted the exiles to return, but did not annul the laws of his predecessor. Thus Theodore saw himself compelled to continue the struggle. He did not return to the Studium, and died without having attained his ideals. In the Roman Martyrology his feast is placed on 12 November; in the Greek martyrologies on 11 November.

Theodore was a man of practical bent and never wrote any theological works, except a dogmatic treatise on the veneration of images. Many of his works are still unprinted or exist in Old Slavonic and Russian translations. Besides several polemics against the enemies of images, special mention should be made of the "Catechesis magna", and the "Catechesis parva" with their sonorous sermons and orations. His writings on monastic life are: the iambic verses on the monastic offices, his will addressed to the monks, the "Canones", and the "Pœnæ monasteriales", the regulations for the monastery and for the church services. His hymns and epigrams show fiery feeling and a high spirit. He is one of the first of hymn-writers in productiveness, in a peculiarly creative technic, and in elegance of language. 550 letters testify to his ascetical and ecclesiastico-political labours.

Klemens Löffler.

Theodoret, Bishop of Cyrus and theologian, b. at Antioch in Syria about 393; d. about 457. He says himself that his birth was an answer to the prayers of the monk Macedonius ("Hist. rel.", IX; Epist. lxxxi). On account of a vow made by his mother he was dedicated from birth to the service of God and was brought up and educated by the monks Macedonius and Peter. At a very early age he was ordained lector. In theology he studied chiefly the writings of Diodorus of Tarsus, St. John Chrysostom, and Theodore of Mopsuestia. Theodoret was also well trained in philosophy and literature. He understood Syriac as well as Greek, but was not acquainted with either Hebrew or Latin. When he was twenty-three years old and both parents were dead, he divided his fortune among the poor (Epist. cxiii; P. G., LXXXIII, 1316) and became a monk in the monastery of Nicerte not far from Apamea, where he lived for seven years, devoting himself to prayer and study. Much against his will about 423 he was made Bishop of Cyrus. His diocese included nearly 800 parishes and was suffragan of Hierapolis. A large number of monasteries and hermitages also belonged to it, yet, notwithstanding all this, there were many heathen and heretics within its borders. Theodoret brought many of these into the Church, among others more than a thousand Marcionites. He also destroyed not less than two hundred copies of the "Diatessaron" of Tatian which were in use in that district ("Hæret. fab.", I, xx; P. G., LXXXIII, 372). He often ran great risks in his apostolic journeys and labours; more than once he suffered ill-usage from the heathen and was even in danger of losing his life. His fame as a preacher was widespread and his services as a speaker were much sought for outside of his diocese; he went to Antioch twenty-six times. Theodoret also exerted himself for the material welfare of the inhabitants of his diocese. Without accepting donations (Epist. lxxxi) he was able to build many churches, bridges, porticos, aqueducts, etc. (Epist. lxxxi, lxxviii, cxxxviii).

Towards the end of 430 Theodoret became involved in the Nestorian controversy. In conjunction with John of Antioch he begged Nestorius not to reject the expression Θεοτόκος as heretical (Mansi, IV, 1067). Yet he held firmly with the other Antiochenes to Nestorius and to the last refused to recognize that Nestorius taught the doctrine of two persons in Christ. Until the Council of Chalcedon in 451 he was the literary champion of the Antiochene party. In 430 he published his Ἀνατροπή (Confutation) of the Anathemas of Cyril to which the latter replied with an Apology (P. G., LXXVI, 392 sqq.). At the Council of Ephesus (431) Theodoret sided with John of Antioch and Nestorius, and pronounced with them the deposition of Cyril and the anathema against him. He was also a member of the delegation of "Orientals", which was to lay the cause of Nestorius before the emperor but was not admittted to the imperial presence a second time (Hefele-Leclerq, "Hist. des Conc.", II, i, 362 sqq.). The same year he attended the synods of Tarsus and Antioch, at both of which Cyril was again deposed and anathematized. Theodoret after his return to Cyrus continued to oppose Cyril by speech and writing. The symbol (Creed) that formed the basis of the reconciliation (c. 433) of John of Antioch and others with Cyril was apparently drawn up by Theodoret (P. G., LXXXIV, 209 sqq.), who, however, did not enter into the agreement himself because he was not willing to condemn Nestorius as Cyril demanded. It was not until about 435 that Theodoret seems to have become reconciled with John of Antioch, without, however, being obliged to agree to the condemnation of Nestorius (Synod. cxlviii and cli; Epist. clxxvi). The dispute with Cyril broke out again when in 437 the latter called Diodorus of Tarsus and Theodore of Mopsuestia the real originators of the Nestorian heresy. Theodore entered the lists in their defence. The bitterness with which these polemics were carried on is shown both by the letter and the speech of Theodoret when he learned of the death in 444 of the Patriarch of Alexandria (Epist. clxxx).

The episcopate of Dioscurus, the successor of Cyril, was a period of much trouble for Theodoret. Dioscurus, by the mediation of Eutyches and the influential Chrysaphius, obtained an imperial edict which forbade Theodoret to leave his diocese (Epist. lxxix–lxxxii). In addition Theodoret was accused of Nestorianism (Epist. lxxxiii–lxxxvi); in answer to this attack he wrote his most important polemical work, called "Eranistes". Theodoret was also considered the prime mover of the condemnation of Eutyches by the Patriarch Flavian. In return Dioscurus obtained an imperial decree in 449 whereby Theodoret was forbidden to take any part in the synod of Ephesus (Robber Council of Ephesus). At the third session of this synod Theodoret was deposed by the efforts of Dioscurus and ordered by the emperor to re-enter his former monastery near Apamea. Better times, however, came before long. Theodoret appealed to Pope Leo who declared his deposition invalid, and, as the Emperor Theodosius II died the following year (450), he was allowed to re-enter his diocese. In the next year, notwithstanding the violent opposition of the Alexandrine party, Theodoret was admitted as a regular member to the sessions of the Council of Chalcedon, but refrained from voting. At the eighth session (26 Oct., 451), he was admitted to full membership after he had agreed to the anathema against Nestorius; probably he meant this agreement only in the sense: in case Nestorius had really taught the heresy imputed to him (Mansi, VII, 190). It is not certain whether Theodoret spent the last years of his life in the city of Cyrus, or in the monastery where he had formerly lived. There still exists a letter written by Pope Leo in the period after the Council of Chalcedon in which he encourages Theodoret to co-operate without wavering in the victory of Chalcedon (P. G., LXXXIII, 1319 sqq.). The writings of Theodoret against Cyril of Alexandria were anathematized during the troubles that arose in connexion with the war of the Three Chapters.

Writings.—A. *Exegetical.*—Theodoret wrote brief treatises in the form of questions and answers on special passages of the Octateuch, four Books of Kings, and two Books of Paralipomenon (P. G., LXXX, 75–858). He wrote commentaries covering the whole books on: the Psalms (P.G., LXXX, 857–1998, and LXXXIV, 19–32), written before 436 (Epist. lxxxii); Canticles (P. G., LXXXI, 27–214); the Greater Prophets, Daniel and Ezechiel before 436, Isaias and Jeremias before 448, of which the commentary on Isaias has been lost, excepting some fragments preserved in the "Catenæ" (q. v.); the Minor Prophets before 436 (P. G., LXXXI, 495–1988); and the Epistles of St. Paul, written before 448 (P. G., LXXXII, 35–878). B. *Apologetic.*—"Græcarum affectionum curatio" (Remedy for the diseases of the Greeks), twelve books, written before 437, "the last and probably also the most complete of the numerous apologies which Greek antiquity has produced" (Bardenhewer, "Patrologie", 3rd ed., 1910, p. 327). "De divina Providentia", ten sermons, probably his best work, in which he proves the administration of Divine Providence from the physical, moral, and social systems of the world. C. *Dogmatico-Polemical.*—"Refutatio duodecim Anathematum", against St. Cyril; it has been preserved in Cyril's answer (P. G., LXXVI, 392 sqq.; Latin by Marius Mercator, P. L., XLVIII, 972 sqq.). "De Sancta et vivifica Trinitate" (P. G., LXXV, 1147–90), and "De Incarnatione Domini" (ib., 1419–78); these two last mentioned treatises have been proved by A. Ehrhard to have been written by Theodoret (see bibliography). "Eranistes seu Plymorphos" (P. G., LXXXIII, 27–336), written in 448 in the form of three dialogues between an Orthodox (Theodoret) and a beggar (Eutyches); these dialogues sought to prove that the Divinity of Christ is (a) unchangeable, (b) unmixed with humanity, (c) incapable of suffering. In the fourth book the first three are briefly summed up in syllogisms. "Hæreticarum fabularum compendium" in five books (ib., 336–556); the first four contain a brief summary of heresies up to the time of Theodoret, and the last book contrasts them with Catholic faith and morals.

D. *Historical.*—"Historia Ecclesiastica" (P. G., LXXXII, 881–1280) treats in five books the period from Arius up to 429. In this work Theodoret used Eusebius, Rufinus, Socrates, Sozomenus, Philostorgius, as well as documents long since lost. As an ecclesiastical historian, however, he is inferior to his predecessors. "Historia religiosa" (ib., 1283–1522) contains the biographies of thirty celebrated ascetics or hermits; the treatise "De divina charitate" forms the close of the work.

E. *Letters.*—Theodoret's letters are of much value, both for his personal history and for that of his era. Cf. P. G., LXXXIII, 1173–1494, and Sakkelion, "Forty-eight Letters of Theodoret of Cyrus" (Athens, 1885).

F. *Lost Writings.*—"Opus mysticum", in twelve books; "Responsiones ad quæstiones magorum persarum" (Epist. lxxxii and cxiii), five "Sermones in laudem S. Johannis Chrysostomi", of which the fragments are to be found in Photius, "Bibl.", 273; and other "Sermones". Von Harnack ("Texte und Untersuchungen", N. F. 6, IV, 1901) assigned the "Responsiones ad quæstiones" to Diodorus of Tarsus, but a manuscript of the tenth century, edited by Papadopulos Kerameus (St. Petersburg, 1895), ascribes the work to Theodoret (see A. Ehrhard in "Byzantinische Zeitschrift", VII, 1898, 609 sqq.).

Doctrine.—In Hermeneutics Theodoret followed the principles of the Antiochene school, but avoided the bias of Theodore of Mopsuestia. In his Christology also he followed the terminology of Diodorus and Theodore, and saw in the teaching of Cyril a revival of Apollinarianism. He would never acknowledge that the teaching of Nestorius presupposed the acceptance of two persons in Christ or, as Cyril believed, necessarily led to it.

Chrys. Baur.

Theodoric, Antipope. See Paschal II, Pope.

Theodoric (Thierry) of Chartres, a Platonist philosopher of the twelfth century, b. in France at the beginning of the twelfth century; d. at Chartres about 1150. It is probable that he studied at Chartres under his brother Bernard, at least, we know that in 1121 he was head of the school of Chartres. Later, he seems to have gone to Paris and to have taught there, among his disciples being John of Salisbury. In 1141 he was teaching once more at Chartres. He wrote a work on the seven liberal arts entitled "Eptateuchon", a treatise "De Sex Dierum Operibus", and a commentary on "De Inventione Rhetorica ad Herennium". The first still exists in MS. at Chartres, the others were published 1884 and 1890. Theodoric was an ardent lover of the Classics, the study of which he defended against the sect of Obscurantists known as "Cornificians". He was also interested in the natural sciences, as is indicated by the fact that he was the recipient of a Latin translation of the "Planisphere" of Ptolemy made by Herman the Dalmatian. In philosophy he adopted the Platonic explanation of reality and the ultra-realistic theory of universals. He was influenced also by neo-Pythagorean principles. Nevertheless, he did not, as was formerly contended, go the length of professing explicit pantheism; he did not identify Divinity with reality. He did, indeed, maintain that Divinity is a form of essence (*forma essendi*) in all things; but, as Bäumker has shown (Archiv f. Gesch. der Phil., X, 138) we are to understand this phrase in a theistic sense. For, while it necessarily implies the existence of a Divine something in all things, it does not imply the identity of the essence of God with the individual essences of things. In his exposition of the first chapters of Genesis (De Sex Dierum Operibus) he attempts to reconcile the Mosaic account of creation with the Platonic explanation of the origin of the universe.

Clerval, *Les écoles de Chartres* (Paris, 1895), 169 sqq.; de Wulf, *Hist. of Medieval Phil.*, tr. Coffey (New York, 1909), 182 sqq.; Bäumker in *Archiv f. Gesch. der Phil.*, X; Turner, *Hist. of Philosophy* (Boston, 1903), 294.

William Turner.

Theodoric the Great, King of the Ostrogoths, b. A. D. 454 (?); d. 26 Aug., 526. He was an illegitimate son of Theodomir, of the royal Ostrogothic family of Amali. When eight years old Theodoric was brought as a hostage to the Court of Constantinople. Here he learned to comprehend the education given by ancient civilization. At eighteen he was allowed to return home and became the leader of a great horde of his countrymen, whose increasing numbers drove them to seek new lands. As King of the Ostrogoths he was sometimes an ally, sometimes an enemy, of the emperors. The inconsistencies of his policy may probably be explained by his having as rival another Theodoric, called Strabo (squint-eyed), who was able to influence the Court of Constantinople against him. When Strabo died in 481, Theodoric the Great received from the Emperor Zeno the titles of *patricius* and *magister militum*, and in 484 was appointed consul.

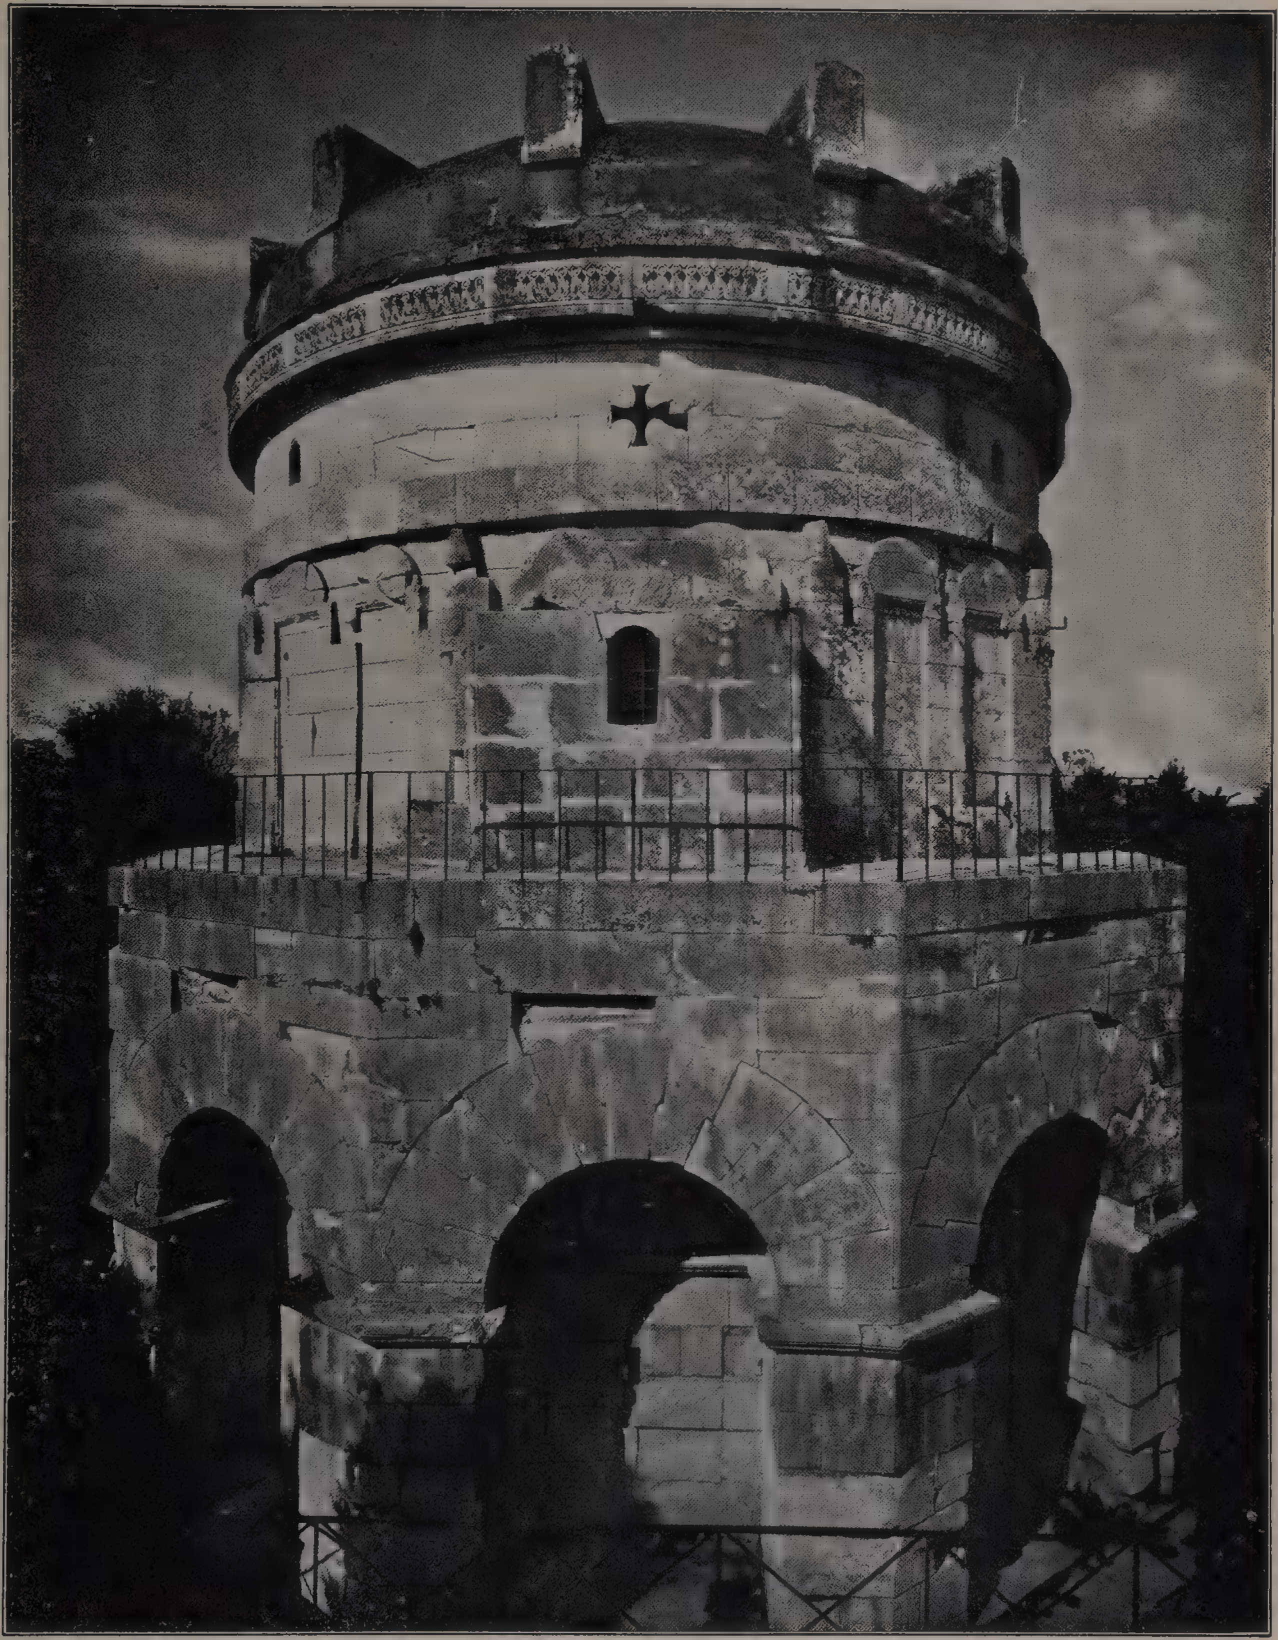
Theodoric was now compelled to set out with his own people to conquer new territory. The course to be pursued was suggested by the Emperor Zeno. The Ostrogoths were to expel the usurper Odoacer, and thus the emperor thought to be rid of dangerous neighbours. In 488 Theodoric started on the march with his own people and a large number of Rugians. In 489 he defeated Odoacer on the Nonsa, later at Verona, and in 490 on the Adige. He then besieged him in Ravenna and forced him to surrender in 493. Theodoric promised Odoacer both life and freedom, but murdered him at a banquet fearing perhaps that he might revolt again.

Theodoric's mastery of Italy being thus established, he at once showed his appreciation of the ancient culture and political organization of the Empire, claiming to be its vicegerent and restorer in Western Europe. His efforts in this capacity were faithfully seconded by his minister Cassiodorus. Proud of his Gothic nationality, Theodoric, unlike the earlier barbarian emperors, believed it possible to reconcile Roman and Germanic interests. His people seemed to him equal to the Romans in antiquity of descent and military renown, and he realized that his power rested solely on Gothic prowess. Apparently his kingdom was a continuation of the Roman Empire; in reality his policy was in direct and fundamental contradiction to the Roman conception, by which all national individuality was to be lost in the State as a whole. This theory of government which sought to suppress nationalities was opposed by Theodoric: he had a profound respect for national independence, and had repeatedly taken up arms to maintain it.

Among his many schemes was a great project to combine in one harmonious system, around the shores of the Mediterranean, all the conflicting barbarian nations, and for this reason he repeatedly aided the Frankish king Clovis against the Alamanni and Visigoths. He based his authority to carry out this wide policy not on his office as vicegerent of the Eastern Emperor, but, as he said, on the *leges gentium*. The precise degree of his dependence on the Byzantine Empire is not known: he certainly recognized its suzerainty and desired to maintain friendly relations with Constantinople. Still, the "Variæ" of Cassiodorus, a collection of documents of the reign of Theodoric, shows that he firmly believed the Western Empire to be continued in his person. The many intermarriages between his family and the royal families of other Germanic kingdoms were undoubtedly intended to prepare the way for the predominance of his dynasty in the West. Yet his supremacy was a divided one: to the Goths he was the king; to the Romans the patrician. Both nations were ruled by their own laws. The *Edictum Theodorici* of 512 was intended to introduce some degree of uniformity into the criminal law. All Theodoric's decrees, including this code, were in their language very conciliatory towards the Romans: the Roman population was to consider Gothic supremacy the guarantee of its security and prosperity.

Street in Ravenna, showing the Palace of Theodoric

In reality Theodoric's reign appeared to bring once more a Golden Age to the sorely-tried peninsula. Experts in well-boring were brought from Africa to help restore the cultivation of the waterless country where the woods had been cut down; and swamps were drained. Books of magic and theatres were forbidden, edicts were issued for the protection of ancient monuments. Roman literature once more flourished in Italy: its most brilliant representative was Boethius, who was able to combine the lofty ideals of Christianity with the dignity of the ancient philosophy. While tolerating the Catholic Church, Theodoric considered himself the protector of Arianism; accordingly he sought to intervene diplomatically in favour of the Arians who were being persecuted by Justinian I. Nevertheless he allowed complete freedom to the Catholic Church, at least so far as dogma was concerned, though he considered himself entitled to appoint a pope, or to act as arbitrator in the schism between Symmachus and Laurentius, and in general to bring any ecclesiastic to judgment. This same king who had come to Italy as the emperor's representative should not, at the end of his reign, have used such barbarous cruelty in suppressing that Roman national revolt againt Gothic rule in which the opposition of the Roman Church to Arianism led the pope, Constantinople, and the educated laity to



THEODORIC'S TOMB, RAVENNA, SIXTH CENTURY

unite. The Senate in its judicial capacity was ordered to try those implicated in this conspiracy, and Boethius and his aged father-in-law, the Senator Symmachus, were condemned to death. Theodoric succumbed to the effects of the bitter conviction that his conciliatory policy had failed, and from that time his health declined. He was buried in the truly regal tomb at Ravenna. At a later date excessive zeal prompted the disinterment of the Arian king, but he continues to live in a wonderful legend, which assumes many forms, as the warrior king of the heroic age of the German people. On stormy nights the peasants still whisper of Dietrich of Berne, as they call Theodoric, riding through the air with his wild followers.

Franz Kampers.

Theodorus and Theophanes (called *Grapti*, "written upon", *γραπτοί*), Saints: Theodorus, b. about 775; d. about 842–43; Theophanes, b. about 778; d. 845. These champions of the veneration of images during the second Iconoclastic controversy in the East were brothers and natives of Jerusalem. Both entered the monastery of St. Sabas, near Jerusalem, which, at that time was under the guidance of Michael, later *syncellus* of the Patriarch of Jerusalem. The brothers had an excellent theological training and were zealous, strict ascetics. About 812 they entered a monastery at Constantinople, where in opposition to the Emperor Leo V (813–20) they energetically defended the veneration of images, and consequently were exiled. Under the succeeding emperor, Michael II (820–29), they were brought into the monastery of Sosthenes on the Bosphorus. Michael's successor, the tyrannical and Iconoclastic Theophilos (829–42), exiled them again, but recalled them in 836 to the capital, had them scourged several times, and had twelve lines of verse cut into their skin (hence the nickname "written upon"). They were once more sent into exile, where Theodorus died, while Theophanes lived to see the close of the Iconoclastic controversy in 842 during the reign of the Empress Theodora. In this same year he was raised to the Archdiocese of Nicæa and administered it until his death. Theophanes wrote a large number of religious poems, among them one on his dead brother, but they have not yet been published (cf. Christ and Paranikas, "Anthologia græca carminum christianorum", Leipzig, 1781). The brothers are venerated as saints. In the Greek Church the feast of Theophanes is observed on 11 October, that of Theodorus on 27 December. In the Roman Church the feasts of both are celebrated on 27 December (Cf. Nilles, "Kalendarium manuale utriusque Ecclesiæ", I, 300, 368 sq.).

J. P. Kirsch.

Theodorus Lector, a lector attached to the Church of St. Sophia of Constantinople in the early part of the sixth century. At the request of a friend he compiled in four books his "Historia Tripartita", an epitome of the historians Socrates, Sozomen, and Theodoret, made up of excerpts from them. An imperfect copy of this work exists in MS. but it has never been published; Valesius used it, attaching perhaps too much importance to the readings he found in it, in his edition of the above-named historians. Theodorus also composed a history in two books which carried the narrative of the "Hist. Trip." from the death of Theodosius II up to the times of Justin I. This work is unfortunately lost, but two long series of excerpts are preserved usually bearing the title Ἀπὸ φωνῆς Νικηφόρου Καλλίστου which, however, is spurious (De Boor, "Zeitschrift f. Kirchengesch.", VI, 489; Preuschen in "Realenencyk. f. Prot. theol.", s. v.); quotations also are found in the writings of St. John of Damascus and the Acts of the Seventh General Council. The history owes its value to the scantiness of our information concerning the period it treats rather than to its merits. It is full of marvellous stories. The only indications of the time when Theodore lived are the date at which his history ended and his speaking of the "holy memory" of Theodoret—he would hardly have done this after the "Three Chapters" controversy.

De Boor, *op. cit.*; Preuschen, *op. cit.* (Leipzig, 1907); Nolte in *Tübingen Theol. Quart.* (1861), 569 sq.; Sarrazin, *De Theod. Lectore. Theophanis præcipuo fonte* in *Comment. philol. Jenensis*, I, 163 sqq.; Bardenhewer-Shahan, *Patrology* (St. Louis, 1908), 552. The fragments of the *History* were published by Valesius and reprinted in *P. G.*, LXXXVI. For additional excerpts to be found in the writings of Nicetas, and Chartophylax of Nicæa, see Diekamp in *Hist. Jahrb.*, XXIV, 553 sq.

F. J. Bacchus.

Theodosiopolis, a titular metropolitan see of Thracia Prima. In the beginning the city was called Apros, or preferably Aproi; later in its history it became known as the Colonia Claudia Aprensis (Ptolemy, "Geographia", vol. III, cap. xi, p. 7). In the fourth century, according to Ammianus Marcellinus (XXVII, iv, 12), it was the principal city of the country south of Heraclea. The official name of Theodosiopolis, which was given to the city by either Theodosius I, or Theodosius II, was rarely used; it was commonly called Apros. At first suffragan episcopal see of Heraclea in the European province, Apros had already in 640 been elevated to an autocephalous archiepiscopal see (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 535), which title it still retained in 1170. However in 1179, Romanus signs himself as Metropolitan of Apros, and the "Notitia episcopatuum" of Manuel I Comnenus, which dates from this same epoch, also refers to Apros as a metropolitan see (Gelzer, op. cit., 587). This see must have disappeared at the end of the fourteenth century, or in the beginning of the fifteenth century, for in the "Notitiæ" subsequent to 1453 no mention of it is to be found. Le Quien, "Oriens christianus", I, 1125–1128, makes special mention of eleven bishops belonging to this see, among whom are Babylas in 458; Andreas in 536; John in 787; Sabbas in 878; and in 1351, Gabriel, the last one known. From 1204, as long as the city remained in the hands of the Crusaders, Apros was a Roman archdiocese; in 1244 it was already a titular archbishopric (Eubel, "Hierarchia catholica medii ævi", I, 94; II, 101). Under the Franks, who called it Naples, Apros belonged to Theodosius Branas, the Greek, who had married Agnes, sister of King Philip Augustus. The Bulgarians took the city and destroyed it in 1205; later it fell anew under the sway of the Franks and the Greeks (Villehardouin, ed. Wailly, 390–91, 403, 413–15, 564). The exact situation of Apros is not known; Tomaschek, "Zur Kunde der Hæmus-Halbinsel", 52, identifies it with Kestridje on the Podja-Dere, south of Haïreboli in the sanjak of Rodosto.

Theodosius I (Flavius Theodosius), Roman Emperor, b. in Spain, about 346; d. at Milan, 17 January,

395. Theodosius is one of the sovereigns by universal consent called Great. He stamped out the last vestiges of paganism, put an end to the Arian heresy in the empire, pacified the Goths, left a famous example of penitence for a crime, and reigned as a just and mighty Catholic emperor. His father, the Comes Theodosius, was a distinguished general; both he and the mother Thermantia were Catholics at a time when Arianism was at its strongest. Theodosius the son distinguished himself in the army, was made Dux of Mœsia, defeated the Sarmatians (Ammianus Marcellinus, XXIX, 6); then, when an intrigue brought about the disgrace and execution of his father (376) he retired to his own property in Spain. But his reputation was not forgotten. The Emperor Gratian (375–383) after the death of Valens (378) took Theodosius from private life and made him his fellow-emperor (Augustus) for the East (19 Jan., 379). He was already married to Ælia Flacilla, by whom he had two sons, Arcadius and Honorius (his future successors) and a daughter Pulcheria. As Augustus he carried on the Gothic war vigorously and successfully. During the year 380 he was able to conclude a victorious peace with the Goths; on 24 November he held his triumph at Constantinople. Meanwhile he had also repressed the Vandals and Huns. Early in the same year a severe sickness at Thessalonica made him seek baptism, and he was baptized by the Catholic Bishop of Thessalonica, Ascholios. Socrates (H. E., V, 6) says that since Theodosius "was a Christian from his parents and professed the faith of the Homoousios" he first assured himself that the bishop was not an Arian (cf. Sozomen; "H. E.", VII, 4). A great part of the emperor's activity was now spent in establishing the Catholic faith and repressing Arianism. In February, 380, he and Gratian published the famous edict that all their subjects should profess the faith of the Bishops of Rome and Alexandria (Cod. Theod., XVI, 1, 2; Sozomen, VII, 4). The conventicles of the heretics were not to be called churches.

As soon as he came to Constantinople Theodosius began expelling the Arians, who had hitherto been in possession. The Arian bishop, Demophilus, left the city (Socr., V, 7; Soz., VII, 5), St. Gregory of Nazianzus undertook the administration of the diocese. In January, 381, the prefect had orders to close all Arian chapels in the city and to expel those who served them. The same severe measures were ordered throughout Theodosius's dominion, not only against Arians, but also in the case of Manichæans and all other heretics. However Sozomen says that the emperor "made severe punishments by his laws, but did not carry them out, for he did not wish to punish, but only to frighten his subjects, that they might think as he did about Divine things. And he praised those who were converted of their own accord" (H. E., VII, 12). In 381 the Second General Council was held at Constantinople under his auspices (Socr., V, 8; Soz., VII, 7). In 383 he attempted a conference at his capital between Catholics and Arians, with a view to a reconciliation; but no result was obtained (Socr., V, 10; Soz., VII, 12). In the same year Gratian was murdered at Lyons (25 Aug.) and Clemens Maximus usurped the imperial title in the West (383–388). Theodosius acknowledged the usurper on condition that he would allow Gratian's brother, Valentinian II, to reign in Italy. In 387 Maximus broke the contract and expelled Valentinian, who fled to Theodosius. Theodosius brought him back with an army, and defeated and executed Maximus at Aquileia. Valentinian II now reigned in the West till 392. It was also in 387 that Theodosius showed such tolerance in the affair of the statues at Antioch (see John Chrysostom).

During all his reign Theodosius took severe measures against the surviving remnants of paganism. In 388 a prefect was sent around Egypt, Syria, and Asia Minor for the purpose of destroying temples and breaking up pagan associations; it was then that the Serapeum at Alexandria was destroyed (Socr., V, 16). Libanius wrote a "Lamentation" about the destruction of the fanes of the gods (περὶ τῶν ἱερῶν, ed. R. Foerster, Bibl. Script. Gr. et Rom. Teubner). In 391 Theodosius refused to allow the Altar of Victory to be restored in the Roman Senate (cf. Gibbon, "Decline and Fall", xxviii). Pagan sacrifices, omens, and witchcraft were to be punished as *læsa majestas* (Cod. Theod., XVI, X, 10–12). In short his laws put an end finally to the old cult, at any rate as far as open and public use is concerned. One of its last acts was a despairing appeal to the sword, which offers again the dramatic situation of a field of battle on which the religion of Europe seemed to depend. Argobast, the Frankish tutor of Valentinian II, at least indirectly caused his ward's death (Hodgkin, "Italy and her Invaders", I, 590) and set up a rhetorician, Eugenius, in his stead (15 May, 392). Theodosius hastened to Italy to avenge this crime. Eugenius, although nominally a Christian, tried to unite the remains of paganism in his defence. He set up pagan altars again (including that of Victory at Rome), his soldiers marched under the standard of Hercules invictus. But near Aquileia on 6 Sept., 394, once more the Christian Labarum triumphed over the banner of the ancient gods; Theodosius entered Rome sole master of the now finally Christian empire. Further laws enforced the keeping of Sunday and the disabilities of pagans, Jews, and heretics. During the greater part of his reign Theodosius was in intimate relation with St. Ambrose. The story of the emperor's worst crime, the massacre of at least 7000 citizens of Thessalonica in revenge for a tumult (April, 390); of St. Ambrose's refusal to allow him to enter the Church; of his acceptance of eight months of penance, is one of the memorable incidents of Church history.

Theodosius married Galla (daughter of Valentinian I) after the death of his first wife, and by her had a daughter, Galla Placidia, the mother of Valentinian III. St. Ambrose preached his funeral oration ("De obitu Theodosii", P. L., XVI, 1385). His two sons Arcadius and Honorius had already been proclaimed Augustus during his life. Arcadius became emperor of the eastern half of the empire, Honorius of the western. The Roman world was never again united. Theodosius stands out as the destroyer of heresy and paganism, as the last sovereign of the undivided empire. A coin representing him holding the Labarum with the inscription, *Restitutor Reipublicæ*, expresses perfectly his title to remembrance.

Adrian Fortescue.

Theodosius Florentini, b. at Münster, in the Grisons, Switzerland, 23 May, 1808; d. at Heiden, in Appenzell, 15 Feb., 1865. He entered the Capuchin Franciscan Order, 22 Oct., 1825, was ordained priest in 1830, and appointed novice master, and lecturer on philosophy and theology. In 1838 he became guardian at Baden; in 1845 superior and parish priest at Chur; in 1857 definitor, and in 1860 vicar-general of the Diocese of Chur. In the first half of the nineteenth century the Catholics in Switzerland found themselves in a lamentable position. In addition to Protestant ascendency there was the spirit of unbelief and of false mysticism. Even the Governments of Catholic cantons lent themselves to the persecution of the Church and the conventual houses. The unfortunate Sonderbund war had broken the power and confidence of the Catholics, and the victorious Radical party forced upon the country a constitutional league pledged to the destruction of Catholic interests. In consequence of his zealous defence of the Church, Father Theodosius was forced to fly to Alsace in 1841. But in August of the same year he returned, and brought his experience to bear on plans for the welfare of the Church and people. First he founded the Institute of the Franciscan Sisters of the Holy Cross. In the Capuchin church at Altorf on 16 Oct., 1844, the first three sisters received the habit of the Third Order of St. Francis. Their constitutions enjoin upon them to make themselves all to all in order to win souls to Christ and to do nothing which might repel any from their mode of life. From this foundation grew the congregation of teaching sisters, with their motherhouse at Memingen, which has now about 1200 members. Later on Father Theodosius founded the congregation of Sisters of Mercy at Ingenbohl, which numbers 5251 sisters in 878 institutions. These congregations have been approved by the Holy See. Both are actively engaged in educational works; they have foundling asylums, orphanages, kindergartens, poor schools, boarding-schools for girls, and seminaries for teachers. Both have in their homes for girls a *patronage,* as the French call it, for servant girls, factory workers, shop assistants, and others. The Sisters of Mercy have, besides, homes for the poor and sick, and undertake private nursing.

In the meantime Father Theodosius was himself busy as a schoolmaster. He superintended the people's schools (*Volksschülen*), which are attended by others besides the poor. He promoted continuation schools and was in favour of technical instruction for apprentices and workmen. He founded anew the suppressed Jesuit College, Maria-Hilf zu Schwyz, where there are now more than 400 pupils. It comprises a gymnasium, lyceum, and an industrial school with technical and mercantile departments. To stir up anew Catholic life he engaged in popular missions and retreats for priests. To provide for the needs of Catholics in Protestant parts of Switzerland he founded the home missions for which he provided a special fund. The institution of the annual conference of the Swiss bishops was largely due to his efforts. To bring Swiss Catholics together, to strengthen Catholic feeling, and to organize social works, he founded the Pius Society. For this society Father Theodosius worked harder than for all else; it was in connexion with this that he more fully expounded his Christian social ideas. He was very keen upon the care and inspection of the helpless and dependent, such as boarded-out children, apprentices, neglected children, and discharged prisoners. With regard to the labour question Father Theodosius expressed himself very fully in his speech at Frankfort in 1863. In demanding the Christianizing of industry, trade unions, and workmen's credit banks, he said: "Formerly monasteries were turned into factories, now factories must become monasteries, and the profits must be shared with the workers". Factories were established to carry out this idea, but they failed, owing to a lack of business capacity in the founders. At Ingenbohl Father Theodosius founded a printing and book-binding establishment and a society for the distribution of good books. Among his own writings are the "Legends of the Saints" in four volumes. His spirit was well expressed in the saying of St. Augustine which on the eve of his death he wrote in the notebook of a teacher: "In necessariis unitas, in dubiis libertas, in omnibus charitas". A favourite maxim of his was: "Whatever is the need of the time, is God's Will".

Father Cuthbert.

Theodotion Version. See Versions of the Bible.

Theodotus of Ancyra, Saint, martyr. On 18 May the Roman Martyrology says: "At Ancyra, in Galatia, the martyr Saint Theodotus and the saintly virgins Thecusa, his aunt, Alexandra, Claudia, Faina, Euphrasia, Matrona, and Julitta", etc. They are mentioned in all the menologies, and Theodotus has a special feast on 7 June (Nilles, "Kal. man.", I, 162, and II, 583). He is patron of innkeepers. Emblems: torches and the sword. According to the Acts (Acta SS., May, IV, 147) Theodotus was a married man who kept an inn at Ancyra, the capital of Galatia. He is described as a man very zealous in the performance of his Christian duties, endowed with many virtues, especially charity towards his neighbour. He brought sinners to repentance and strengthened many in their faith during the persecution which Theoctenus, the governor of the province, was carrying on, about 303, in accordance with the edict of Diocletian. The name of a certain Victor is mentioned as one who grew weak in his profession of Christianity and received much encouragement from Theodotus. The governor ordered that all provisions exposed for sale should first be offered to the idols. Theodotus laid in stores of goods and his house became a refuge for the Christians, a hospital for the sick, and a place for Divine worship. At Malos, about five miles from Ancyra, he sought out the body of the martyr, Valens, and gave it Christian burial. Returning to Ancyra he found the Christians in great trouble. The seven virgins mentioned above had been called before the judges and made a valiant profession of their faith; they were then sent to a house of debauchery, but preserved their purity. Then they were obliged to suffer cruel torments and were cast into the sea with stones attached to their bodies. Theodotus succeeded in rescuing the bodies and honourably burying them. In consequence he was arrested, and after many sufferings was killed by the sword; his body was miraculously brought to Malos and there entombed by the priest Fronto. A chapel was built over the grave, and the saint was held in great veneration. The legend is told by Nilus who claims to have been an eye-witness to a great part of what he describes. Ruinart (page 372) places it among his "Acta sincera et selecta". Pio Franchi produced a critical edition of the Acts in "Studi e Testi" (Rome, 1901). He considered them trustworthy, but later changed his opinion. Delehaye (Anal. Boll., XXII, 320, and XXIII, 478) says: "The kernel of the legend is a tale narrated by Herodotus, while the existence of the hero of the narrative is not vouched for by any historic document."

Butler, *Lives of the Saints; Dict. of Christ. Biog.*, IV, 580; *Röm. Quartalschrift*, XVIII, 289; *Der Katholik* (1895), 569; Leclercq, *Les Martyrs*, II, VIII (Paris, 1903); Chevalier, *Bio-Bibl.*, II, 4429.

Francis Mershman.

Theodulf (Theodulfus, Theodulfe), Bishop of Orléans, a writer skilled in poetic forms and a learned theologian, b. in Spain about 760; d. at Angers, France, 18 Dec., 821. By descent a Goth, he became before 794 a member of the court of Charlemagne, where he was, next to Alcuin, the most distinguished and learned person. Charlemagne granted him (about 798) the Bishopric of Orléans and several abbeys. He laboured successfully in his diocese as a reformer both of the clergy and people, as is shown by his two Capitularies, one of which has forty-six chapters; he also encouraged schools. In 798 he was sent, with Bishop Leidrad of Lyons, as a royal messenger (*missus dominicus*) to the southern part of France. In his poem, "Versus contra judices", in which he complains of the severity of Frankish law and addresses earnest warnings to the judges, he gives an account of his experiences while on this mission. As a writer on theology he took part in the dispute over the term *Filioque* (the procession of the Holy Ghost from the Son as well as from the Father) and defended this doctrine at the request of Charlemagne in the treatise, "De spiritu sancto". He also wrote at the wish of the emperor, "De ordine baptismi", a description of the ceremonies at baptism. He is further, apparently, the author of an exposition of the Holy Mass and of the Creed. As regards language and metre he occupies the first place among the poets of the Carlovingian era and distinguished himself by spirit and skill; particularly interesting are the letters which he wrote in the form of poems giving an animated picture of the life at court. His hymn for Palm Sunday, "Gloria, laus, et honor" (Analecta hymnica, L, 160 sq.), came into liturgical use. He is also known as a patron and lover of art. He was still in favour at the beginning of the reign of Louis the Pious, but later, being accused of sharing in the conspiracy of King Bernard of Italy, was consequently deposed in 818 and exiled to Angers.

Theological Virtues. See Faith; Hope; Love; Virtue.

Theology.—The subject will be treated under the several heads of: I. Dogmatic (with its parts, Christology and Soteriology); II. Moral; III. Pastoral; IV. Ascetical; V. Mystical.

I. Dogmatic Theology.—Dogmatic theology is that part of theology which treats of the theoretical truths of faith concerning God and His works (*dogmata fidei*), whereas moral theology has for its subject-matter the practical truths of morality (*dogmata morum*). At times, apologetics or fundamental theology is called "general dogmatic theology", dogmatic theology proper being distinguished from it as "special dogmatic theology". However, according to present-day usage, apologetics is no longer treated as part of dogmatic theology but has attained the rank of an independent science, being generally regarded as the introduction to and foundation of dogmatic theology. The present article shall deal first with those questions which are *fundamental* to dogmatic theology and then briefly review its historical development due to the acumen and indefatigable industry with which the theologians of every civilized country and of every century have cultivated and promoted this science.

A. *Fundamental Questions.*—(1). Definition and Nature of Dogmatic Theology.—To define dogmatic theology, it will be best to start from the general notion of theology. Considered etymologically, theology (Gr. Θεολογία, *i. e.* περὶ Θεοῦ λόγος) means objectively the science treating of God, subjectively, the scientific knowledge of God and Divine things. If defined as the science concerning God (*doctrina de Deo*), the name of theology applies as well to the philosophical knowledge of God, which is cast into scientific form in natural theology or theodicy. However, unless theodicy is free from errors, it cannot lay claim to the name of theology. For this reason, pagan mythology and pagan doctrines about the gods, must at once be set aside as false theology. The theology of heretics also, so far as it contains grave errors, must be excluded. In a higher and more perfect sense we call theology that science of God and Divine things which, objectively, is based on supernatural revelation, and subjectively, is viewed in the light of Christian faith. Theology thus broadens out into Christian doctrine (*doctrina fidei*) and embraces not only the particular doctrines of God's existence, essence, and triune personality, but all the truths revealed by God. The Patristic era did not, as a rule, take theology in this wide sense. For the earlier Fathers, strictly limiting the term *theology* to doctrine about God, distinguished it from the doctrine of His external activity, especially from the Incarnation and Redemption, which they included under the name of the "Divine economy". Now, if God is not only the primary object but also the first principle of Christian theology, then its ultimate end likewise must be God; that is to say, it must teach, effect, and promote union with God through religion. Consequently, it lies in the very essence of theology to be the doctrine not only of God and of faith, but also of religion (*doctrina religionis*). It is this triple function which gave rise to the old adage of the School: *Theologia Deum docet, a Deo docetur, ad Deum ducit* (Theology teaches of God, is taught by God, and leads to God).

However, neither supernatural theology in general nor dogmatic theology in particular is sufficiently specified by its material object or its end, since natural theology also treats of God and Divine things and shows that union with God is a religious duty. What essentially distinguishes the two sciences is the so-called formal principle or formal object. Supernatural theology considers God and Divine things solely in the supernatural light of external revelation and internal faith, analyzes them scientifically, proves them and penetrates as far as possible into their meaning. From this it follows that theology comprehends all those and only those doctrines which are to be found in the sources of faith, namely Scripture and Tradition, and which the infallible Church proposes to us. Now, among these revealed truths there are many which reason, by its own natural power, can discover, comprehend, and demonstrate, especially those that pertain to natural theology and ethics. These truths, however accessible to unaided reason, receive a theological colouring only by being at the same time supernaturally revealed and accepted on the ground of God's infallible authority. The act of faith being nothing else than the unconditional surrender of human reason to the sovereign authority of the self-revealing God, it is plain that Catholic theology is not a purely philosophical science like mathematics or metaphysics; it must rather, of its very nature be an authoritative science, basing its teachings, especially of the mysteries of faith, on the authority of Divine revelation and the infallible Church established by Christ; for it is the Divine mission of the Church to preserve intact the entire deposit of faith (*depositum fidei*), to preach and explain it authoritatively. There are, it is true, many non-Catholics and even some Catholics who are irritated at seeing Catholic theology bow before an external authority. They take offence at conciliar decrees, papal decisions *ex cathedra*, the censure of theological opinions, the index of forbidden books, the Syllabus, the oath against Modernism. Yet all these ecclesiastical regulations flow naturally and logically from the formal principle of Christian theology: the existence of Divine revelation and the right of the Church to demand, in the name of Christ, an unwavering belief in certain truths concerning faith and morals. To reject the authority of the Church would be equivalent to abandoning supernatural revelation and contemning God himself, who can neither deceive nor be deceived, since He is Truth itself, and who speaks through the mouth of the Church. Consequently, theology as a science, if it would avoid the danger of error, must ever remain under the tutelage and guidance of the Church. To a Catholic, theology without the Church is as absurd as theology without God. Dogmatic theology, then, may be defined as the scientific exposition of the entire theoretical doctrine concerning God Himself and His external activity, based on the dogmas of the Church.

(2) Dogmatic Theology as a Science.—Considering that theology depends essentially on the Church, a serious difficulty arises at once. How, one may ask, can theology claim to be a science in the genuine sense of the word? If the aim and result of theological investigation is settled in advance by an authority that attributes to itself infallibility and will brook no contradiction, if the line of march is, as it were, clearly mapped out and strictly prescribed, how can there be any question of true science or of scientific freedom? Are not the dogmatic proofs, supposed to demonstrate an infallible dogma, after all mere dialectical play, sham science, reasoning made to order? Prejudice against Catholic theology, prevalent in the world at large, is beginning to bear fruit; in many countries the theological faculties, still existing in the state universities, are looked upon as so much useless ballast, and the demand is being made to relegate them to the episcopal seminaries, where they can no longer injure the intellectual freedom of the people. The downright unfairness of this attitude is obvious when one considers that the universities sprang up and developed in the shadow of the Church and of Catholic theology; and that, moreover, the exaggeration of scientific freedom may prove fatal to the profane sciences as well. Unless it presuppose certain truths, which can no more be demonstrated than many mysteries of faith, science can achieve nothing; and unless it recognize the limits that are set to investigation, the boasted freedom will degenerate into lawless and arbitrary anarchy. As the logician starts from notions, the jurist from legal texts, the historian from facts, the chemist from material substances as things which demand no proof in his case, so the theologian receives his material from the hands of the Church and deals with it according to the rules which the scientist applies in his own branch.

The view, moreover, that scientific research is absolutely free and independent of all authority is fanciful and distorted. To the freedom of science, the authority of the individual conscience, and of human society as well, sets an impassable limit. Even the civil power would have to exercise its authority in the form of punishment if a university professor, presuming on the freedom of scientific thought and research, should teach openly that burglary, murder, adultery, revolution, and anarchy are permissible. We may concede that the Catholic theologian, being subject to ecclesiastical authority, is more closely bound than the professor of the secular sciences. Yet the difference is one of degree only, inasmuch as every science and every investigator is bound by the moral and religious duty of subordination. Some Scholastics, it is true, e. g. Durandus and Vasquez, denied to Christian theology a strictly scientific character, on the ground that the content of faith is obscure and incapable of demonstration. But their argument does not carry conviction. At most it proves that dogmatic science is not of the same kind and order as the profane sciences. What is essential to any science is not internal evidence, but merely certainty of its first principles.

There are many profane sciences which borrow unproved from a superior science their highest principles; these are the so-called *lemmata*, subsidiary propositions, which serve as premises for further conclusions. The theologian does the same. He, too, borrows the first principles of his science from the higher knowledge of God without proving them. Every subaltern science supposes of course in the superior discipline the power to give a strict demonstration of the assumed premises. But all scientific axioms rest ultimately on metaphysics, and metaphysics itself is unable to prove strictly all its principles; all it can do is to defend them against attack. It is plain then that every science without exception rests on axioms and postulates which, though certain, yet admit of no demonstration. The mathematician is aware that the existence of geometry, the surest and most palpable of all sciences, depends entirely on the soundness of the postulate of parallels. Nevertheless, this very postulate is far from being demonstrable. In fact, since no convincing proof of it was forthcoming, there has arisen since the time of Gauss a more general, non-Euclidean geometry, of which the Euclidean is only a special case. Why, then, should Catholic theology, because of its postulates, *lemmata*, and mysteries, be denied the name of a science? Apart from the domain of dogma proper, the theologian may approach the numerous controversial questions and more intricate problems with the same freedom as is enjoyed by any other scientist. One thing, however, must never be lost sight of. No science is at liberty to upset theorems which have been established once and for all; they must be regarded as unshaken dogmas upon which the entire structure is based. Similarly, the articles of faith must not be looked upon by the theologian as troublesome barriers, but as beacon-lights that warn the mariner, show him the true course, and preserve him from shipwreck.

(3) Methods of Dogmatic Theology.—Whereas other sciences, as, for instance, theodicy, begin with proving the existence of God, it lies beyond the scope of theology to discover dogmatic truths. The subject-matter with which the student of theology has to deal is offered to him in the deposit of faith and, reduced to its briefest form, is to be found in the Catechism. If the theologian is content with deriving the dogmas from the sources of faith and with explaining them, he is occupied with "positive" theology. Guided by the doctrinal authority of the Church, he calls history and criticism to his aid to find in Scripture and Tradition the genuine, unalloyed truth. If to this positive element is joined a polemic tendency, we have "controversial" theology, which was carried to its highest perfection in the seventeenth century by Cardinal Bellarmine. Positive theology must prove its theses by conclusive arguments drawn from Scripture and Tradition; hence it is closely related to exegesis and history. As exegete, the theologian must first of all accept the inspiration of the Bible as the Word of God. But even when elucidating its meaning, he will always bear in mind the unanimous interpretation of the Fathers, the hermeneutical principles of the Church, and the directions of the Holy See. In his character as historian, the theologian must not lay aside his belief in the supernatural origin of Christianity and in the Divine institution of the Church, if he is to give a true and objective account of tradition, of the history of dogma, and of patrology. For, just as the Bible, being the Word of God, was written under the immediate inspiration of the Holy Ghost, so Tradition was, and is, guided in a special manner by God, Who preserves it from being curtailed, mutilated, or falsified.

Consequently, he who from the outset declares the Bible to be an ordinary book, miracles and prophecies impossible and old-fashioned, the Church a great institution for deadening thought, the Fathers of the Church pious prattlers, is quite incapable, even from a purely scientific standpoint, of understanding God's momentous dispensations to mankind. From this we may conclude how unecclesiastical and at the same time how unscientific are those historians who prefer to explain the works of the Fathers without due regard for ecclesiastical tradition, which was the mental environment in which they lived and breathed. For it is only when we discover the living link which bound them to the Apostolic Tradition of which they are witnesses, that we shall understand their writings and establish the heterodoxy of some passages, as for instance, the Origenistic *apocatastasis* in the writings of Gregory of Nyssa. When Pius X, by his Motu Proprio of 1 Sept., 1910, solemnly obliged all priests to adhere to these principles, he did more than recall to our minds the time-hallowed rules of Christian faith; he freed history and criticism from those baneful excrescences which impeded the growth of true science.

When the dogmatic material with the help of the historical method has been derived from its sources, another momentous task awaits the theologian: the philosophical appreciation, the speculative examination and elucidation of the material brought to light. This is the purpose of the "scholastic" method, from which "scholastic theology" takes its name.

The scope of the scholastic method is fourfold: (a) to open up completely the content of dogma and to analyze it by means of dialectics; (b) to establish a logical connexion between the various dogmas and to unite them in a well-knit system; (c) to derive new truths, called "theological conclusions", from the premises by syllogistic reasoning; (d) to find reasons, analogies, congruous arguments for the dogmas, but above all to show that the mysteries of faith, though beyond the reach of reason, are not contrary to its laws, but can be made acceptable to our intellect. It is evident that the ultimate purpose of these philosophical speculations cannot be to resolve dogma finally into mere natural truths, or to strip the mysteries of their supernatural character, but to explain the truths of faith, to provide for them a philosophical basis, to bring them nearer to the human mind. Faith must ever remain the solid rock-bottom on which reason builds up, and faith in its turn strives after understanding (*fides quærens intellectum*). Hence the famous axiom of St. Anselm of Canterbury: *Credo ut intellegam.* However highly one may esteem the results of positive theology, one thing is certain: the scientific character of dogmatic theology does not rest so much on the exactness of its exegetical and historical proofs as on the philosophical grasp of the content of dogma. But in attempting this task, the theologian cannot look for aid to modern philosophy with its endless confusion, but to the glorious past of his own science. What else are the modern systems of philosophy, sceptical criticism, Positivism, Pantheism, Monism, etc., than ancient errors cast into new moulds? Rightly does Catholic theology cling to the only true and eternal philosophy of common sense, which was established by Divine Providence in the Socratic School, carried to its highest perfection by Plato and Aristotle, purified from the minutest traces of error by the Scholastics of the thirteenth century.

This is the Aristotelo-scholastic philosophy, which has gained an ever stronger foothold in ecclesiastical institutions of learning. Guided by sound pedagogical principles, Popes Leo XIII and Pius X officially prescribed this philosophy as a preparation for the study of theology, and recommended it as a model method for the speculative treatment of dogma. While in his famous Encyclical "Pascendi" of 8 Sept., 1907, Pius X praises positive theology and frankly recognizes its necessity, yet he sounds a note of warning not to become so absorbed in it as to neglect scholastic theology, which alone can impart a scientific grasp of dogma. These papal rescripts were probably inspired by the sad experience that any other than Scholastic philosophy, instead of elucidating and clarifying, only falsifies and destroys dogma, as is clearly shown by the history of Nominalism, the philosophy of the Renaissance, Hermesianism, Güntherianism, and Modernism. The development also of Protestant theology, which, entering into close union with modern philosophy, swayed to and fro between the extremes of faith and unfaith and did not even recoil from Pantheism, is a warning example for the Catholic theologian. This does not mean that Catholic theology has received no stimulus whatever from modern philosophy since the days of Kant (d. 1804). As a matter of fact, the critical tendency has quickened the critico-historical sense of Catholic theologians in regard to method and demonstration, has given more breadth and depth to their statement of problems, and has shown fully the value of the "theoretical doubt" as the starting-point of every scientific investigation. All these advances, as far as they mark real progress, have exerted a salutary influence on theology also. But they can never repair the material damages caused to sacred science, when, abandoning St. Thomas Aquinas, it went hand in hand with Kant and other champions of our age. But since the Aristotelo-scholastic philosophy also is capable of continual development, there is reason to expect for the future a progressive improvement of speculative theology.

Another method of arriving at the truths of faith is mysticism, which appeals rather to the heart and the feelings than to the intellect, and sensibly imparts a knowledge of Divine things through pious meditation. As long as mysticism keeps in touch with scholasticism and does not exclude the intellect completely, it is entitled to existence for the simple reason that faith lays hold on the whole man, and penetrates his thoughts, desires, and sentiments. The greatest mystics, as Hugh of St. Victor, Bernard of Clairvaux, and Bonaventure, were at the same time distinguished Scholastics. A heart that has preserved the faith and simplicity of its childhood, takes delight even now in the writings of Henry Suso (d. 1365). But whenever mysticism emancipates itself from the guidance of reason and makes light of the doctrinal authority of the Church, it readily falls a prey to Pantheism and pseudo-mysticism, which are the bane of all true religion. Meister Eckhart, whose propositions were condemned by Pope John XXII in 1329, is a warning example. There is little in the present trend of thought that would be favourable to mysticism. The scepticism which has poisoned the minds of our generation, the uncontrolled greed for wealth, the feverish haste in commercial enterprises, even the dulling habit of reading the daily papers—all these are only too apt to disturb the serene atmosphere of Divine contemplation, and play havoc with the interior life, the necessary conditions under which alone the tender flower of mystical piety can blossom. Modernism claims to possess in its immediate and immanent sense of God a congenial soil for the growth of mysticism; this soil, however, does not receive its waters from the undefiled fountain-head of Catholic piety, but from the cisterns of Liberal Protestant pseudo-mysticism, which are tainted, either confessedly or secretly, by Pantheism.

(4) Relation of Dogmatic Theology to other Disciplines.—At first, it was a thing altogether unknown to have different theological branches as independent sciences. Dogmatic theology was the only discipline, and comprised apologetics, dogmatic and moral theology, and canon law. This internal unity was also marked externally by the comprehensive name of science of faith (*scientia fidei*), or sacred science (*scientia sacra*). First to assert its independence was canon law, which, together with dogmatic theology, was the chief study in the medieval universities. But since the underlying principles of canon law, as the Divine constitution of the Church, the hierarchy, the power of ordinations, etc., were at the same time doctrines of faith to be proved in dogmatic theology, there was little danger that the internal connexion with and dependence on the principal science would be broken. Far longer did the union between dogmatic and moral theology endure. They were treated in the medieval "Books of Sentences" and theological "Summæ" as one science. It was not until the seventeenth century, and then only for practical reasons, that moral theology was separated

from the main body of Catholic dogma. Nor did this division degenerate into a formal separation of two strictly co-ordinated disciplines. Moral theology has always been conscious that the revealed laws of morality are as much articles of faith as the theoretical dogmas, and that the entire Christian life is based on the three theological virtues, which are part of the dogmatic doctrine on justification. Hence the superior rank of dogmatic theology, which is not only the centre around which the other disciplines are grouped, but also the main stem from which they branch out. But the necessity of a further division of labour as well as the example of non-Catholic methods led to the independent development of other disciplines: apologetics, exegesis, church history.

The relation existing between apologetics, or fundamental theology as it has been called of late, and dogmatic theology is not that of a general to a particular science; it is rather the relation of the vestibule to the temple or of the foundation to its superstructure. For both the method and the purpose of demonstration differ totally in the two branches. Whereas apologetics, intent upon laying the foundation of the Christian or Catholic religion, uses historical and philosophical arguments, dogmatic theology on the other hand makes use of Scripture and Tradition to prove the Divine character of the different dogmas. Doubt could only exist as to whether the discussion of the sources of faith, the rule of faith, the Church, the primacy, faith and reason, belongs to apologetics or to dogmatic theology. While a dogmatic treatment of these important questions has its advantages, yet from the practical standpoint and for reasons peculiar to the subject, they should be separated from dogmatic theology and referred to apologetics. The practical reason is that the existing denominational differences demand a more thorough apologetic treatment of these problems; and again, the subject-matter itself contains nothing else than the preliminary and fundamental questions of dogmatic theology properly so called. A branch of the greatest importance, ever since the Reformation, is exegesis with its allied disciplines, because that science establishes the meaning of the texts necessary for the Scriptural argument. As the Biblical sciences necessarily suppose the dogma of the inspiration of the Bible and the Divine institution of the Church, which alone, through the assistance of the Holy Ghost, is the rightful owner and authoritative interpreter of the Bible, it is manifest that exegesis, though enjoying full liberty in all other respects, must never lose its connexion with dogmatic theology. Not even church history, though using the same critical methods as profane history, is altogether independent of dogmatic theology. As its object is to set forth the history of God's kingdom upon earth, it cannot repudiate or slight either the Divinity of Christ or the Divine foundation of the Church without forfeiting its claim to be regarded as a theological science. The same applies to other historic sciences, as the history of dogma, of councils, of heresies, patrology, symbolics, and Christian archæology. Pastoral theology, which embraces liturgy, homiletics, and catechetics, proceeded from, and bears close relationship to, moral theology; its dependence on dogmatic theology needs, therefore, no further proof.

The relation between dogmatic theology and philosophy deserves special attention. To begin with, even when they treat the same subject, as God and the soul, there is a fundamental difference between the two sciences. For, as was said above, the formal principles of the two are totally different. But, this fundamental difference must not be exaggerated to the point of asserting, with the Renaissance philosophers and the Modernists, that something false in philosophy may be true in theology, and vice versa. The theory of the "twofold truth" in theology and history, which is only a variant of the same false principle, is therefore expressly abjured in the anti-Modernist oath. But no less fatal would be the other extreme of identifying theology with philosophy, as was attempted by the Gnostics, later by Scotus Eriugena (d. about 877), Raymond Lullus (d. 1315), Pico della Mirandola (d. 1463), and by the modern Rationalists. To counteract this bold scheme, the Vatican Council (Sess. III, cap. iv) solemnly declared that the two sciences differ essentially not only in their cognitive principle (faith, reason) and their object (dogma, rational truth), but also in their motive (Divine authority, evidence) and their ultimate end (beatific vision, natural knowledge of God). But what is the precise relation between these sciences? The origin and dignity of revealed theology forbid us to assign to philosophy a superior or even a co-ordinate rank. Already Aristotle and Philo of Alexandria, in determining the relation of philosophy to that part of metaphysics which is directly concerned with God, pronounced philosophy to be the "handmaid" of natural theology. When philosophy came into contact with revelation, this subordination was still more emphasized and was finally crystallized in the principle: *Philosophia est ancilla theologiæ.* But neither the Church nor the theologians who insisted on this axiom, ever intended thereby to encroach on the freedom, independence, and dignity of philosophy, to curtail its rights, or to lower it to the position of a mere slave of theology. Their mutual relations are far more honourable. Theology may be conceived as a queen, philosophy as a noble lady of the court who performs for her mistress the most worthy and valuable services, and without whose assistance the queen would be left in a very helpless and embarrassing position. That the Church, in examining the various systems, should select the philosophy which harmonized with her own revealed doctrine and proved itself to be the only true philosophy by acknowledging a personal God, the immortality of the soul, and the moral law, was so natural and obvious that it required no apology. Such a philosophy, however, existed among the pagans of old, and was carried to an eminent degree of perfection by Aristotle.

(5) Division and Content of Dogmatic Theology.—Not only for non-Catholics, but also for Catholic laymen it may be of interest to take a brief survey of the questions and problems generally discussed in dogmatic theology.

(a) God (*De Deo uno et trino*).—As God is the central idea around which all theology turns, dogmatic theology must begin with the doctrine of God, essentially one, Whose existence, essence, and attributes are to be investigated. While the arguments, strictly so called, for the existence of God are given in philosophy or in apologetics, dogmatic theology insists upon the revealed doctrine that God may be known from creation by reason alone, that is, without external revelation or internal illumination by grace. From this it follows at once that Atheism must be branded as heresy and that Agnosticism may not plead mitigating circumstances. Nor can Traditionalism and Ontologism be reconciled with the dogma of the natural knowableness of God. For if, as the Traditionalists assert, the consciousness of God's existence, found in all races and ages, is due solely to the oral tradition of our forefathers and ultimately to the revelation granted in Paradise, the knowledge of God derived from the visible creation is at once discounted. The same must be said of the Ontologists, who fancy that our mind enjoys an intuitive vision of God's essence, and is thus made certain of His existence. Likewise, to assume with Descartes an inborn idea of God (*idea Dei innata*) is out of the question; consequently, the knowableness of God by mere reason, means in the last analysis that His existence can be demonstrated, as the anti-Modernist oath prescribed by Pius X expressly affirms. But this method of arriving at a knowledge of God is toilsome; for it must proceed by way of denying imperfection in God and of ascribing to Him in higher excellence (*eminenter*) whatever perfections are found in creatures; nor does the light of revelation and of faith elevate our knowledge to an essentially higher plane. Hence all our knowledge of God on this earth implies painful deficiencies which will not be filled except by the beatific vision.

The metaphysical essence of God is generally said to be self-existence, which means, however, the fulness of being (Gr. αὐτουσία), and not merely the negation of origin (*ens a se—ens non ab alio*). The so-called positive aseity of Prof. Schell, meaning that God realizes and produces himself, must be as uncompromisingly rejected as the Pantheistic confusion of *ens a se* with the impersonal *ens universale*. The relation existing between God's essence and His attributes may not be called a real distinction (theoretical Realism, Gilbert de La Porrée), nor yet a purely logical distinction of the mind (Nominalism). Intermediary between these two objectionable extremes is the formal distinction of the Scotists. But the virtual distinction of the Thomists deserves preference in every regard, because it alone does not jeopardize the simplicity of the Divine Being. If self-existence is the fundamental attribute of God, both the attributes of being and of operation must proceed from it as from their root. The first class includes infinity, simplicity, substantiality, omnipotence, immutability, eternity, and immensity; to the second category belong omniscience and the Divine will. Besides, many theologians distinguish from both these categories the so-called moral attributes: veracity, fidelity, wisdom, sanctity, bounty, beauty, mercy, and justice. Monotheism is best treated in connexion with God's simplicity and unity. The most difficult problems are those which concern God's knowledge, especially His foreknowledge of free future actions. For it is here that both Thomists and Molinists throw out their anchors to gain a secure hold for their respective systems of grace, the former for their *præmotio physica*, the latter for their *scientia media*. In treating of the Divine will, theologians insist on God's freedom in His external activity, and when discussing the problem of evil, they prove that God can intend sin neither as an end nor as a means to an end, but merely permits it for reasons both holy and wise. While some theologians use this chapter to treat of God's salvific will and the allied questions of predestination and reprobation, others refer these subjects to the chapter on grace.

Being the corner-stone of the Christian religion, the doctrine of the Trinity is thoroughly and extensively discussed, all the more because the Liberal theology of the Protestants has relapsed into the ancient error of the Antitrinitarians. The dogma of God's threefold personality, traces of which may be found in the Old Testament, can be conclusively proved from the New Testament and Tradition. The combat which the Fathers waged against Monarchianism, Sabellianism, and Subordinationism (Arius, Macedonius) aids considerably in shedding light on the mystery. Great importance attaches to the logos-doctrine of St. John; but as to its relation to the logos of the Stoic Neoplatonists, the Jewish Philonians, and the early Fathers, many points are still in an unsettled condition. The reason why there are three Persons is the twofold procession immanent in the Godhead: the procession of the Son from the Father by generation, and the procession of the Holy Ghost from both the Father and the Son by spiration. In view of the Greek schism, the dogmatic justification of the addition of the *Filioque* in the Creed must be scientifically established. A philosophical understanding of the dogma of the Trinity was attempted by the Fathers, especially by St. Augustine. The most important result was the cognition that the Divine generation must be conceived as a spiritual procession from the intellect, and the Divine spiration as a procession from the will or from love. Active and passive generation, together with active and passive spiration, lead to the doctrine of the four relations, of which, however, only three constitute persons, to wit, active and passive generation (Father, Son), and passive spiration (Holy Ghost). The reason why active spiration does not result in a distinct (fourth) person, is because it is one and the same common function of the Father and the Son. The philosophy of this mystery includes also the doctrine of the Divine properties, notions, appropriations, and missions. Finally, with the doctrine of circuminsession, which summarizes the whole theology of the Trinity, the treatment of this dogma is brought to a fitting conclusion.

(b) Creation (*De Deo creante*).—The first act of God's external activity is creation. The theologian investigates both the activity itself and the work produced. With regard to the former, the interest centres in creation out of nothing, around which, as along the circumference of a circle, are grouped a number of secondary truths: God's plan of the universe, the relation between the Trinity and creation, the freedom of the Creator, the creation in time, the impossibility of communicating the creative power to any creature. These momentous truths not only perfect and purify the theistic idea of God, they also give the death-blow to heretical Dualism (God, matter) and to the Protean variations of Pantheism. As the beginning of the world supposes creation out of nothing, so its continuation supposes Divine conservation, which is nothing less than a continued creation. However, God's creative activity is not thereby exhausted. It enters into every action of the creature, whether necessary or free. What is the nature of God's universal co-operation with free, rational beings? On this question Thomists and Molinists differ widely. The former regard the Divine activity as a previous, the latter as a simultaneous, concursus. According to Molinism, it is only by conceiving the concursus as simultaneous that true freedom in the creature can be secured, and that the essential holiness of the Creator can be maintained, the fact of sin notwithstanding. The crowning achievement of God's creative activity is His providence and universal government, which aims at the realization of the ultimate end of the universe, God's glory through His creatures.

The work produced by creation is divided into three kingdoms, rising in tiers one above another: world; man; angel. To this triad correspond dogmatic cosmology, anthropology, angelology. In discussing the first of these, the theologian must be satisfied with general outlines, e. g. of the Creator's activity described in the hexaemeron. Anthropology is more thoroughly treated, because man, the microcosm, is the centre of creation. Revelation tells us many things about man's nature, his origin and the unity of the human race, the spirituality and immortality of the soul, the relation of soul and body, the origin of individual souls. Above all, it tells us of supernatural grace with which man was adorned and which was intended to be a permanent possession of the human race. The discussion of man's original state must be preceded by a theory of the supernatural order without which the nature of original sin could not be understood. But original sin, the wilful repudiation of the supernatural state, is one of the most important chapters. Its existence must be carefully proved from the sources of faith; its nature, the mode of its transmission, its effects, must be subjected to a thorough discussion. The fate of the angels runs in many respects parallel to that of mankind: the angels also were endowed with both sanctifying grace and high natural excellences; some of them rose in rebellion against God, and were thrust into hell as demons. While the devil and his angels are inimical to the human race, the faithful angels have been appointed to exercise the office of guardians over mankind.

(c) Redemption (*De Deo Redemptore*).—As the fall of man was followed by redemption, so the chapter on creation is immediately followed by that on redemption. Its three main divisions: Christology, Soteriology, Mariology, must ever remain in the closest connexion. [For the first of these three (Christology) see I. a. below, immediately following subsection B. *History*.]

(i) Soteriology.—Soteriology is the doctrine of the work of the Redeemer. As in Christology the leading idea is the Hypostatic Union, so here the main idea is the natural mediatorship of Christ. After having disposed of the preliminary questions concerning the possibility, opportuneness, and necessity of redemption, as well as of those regarding the predestination of Christ, the next subject to occupy our attention is the work of redemption itself. This work reaches its climax in the vicarious satisfaction of Christ on the cross, and is crowned by His descent into limbo and His ascension into heaven. From a speculative standpoint, a thorough and comprehensive theory of satisfaction remains still a pious desideratum, though promising attempts have often been made from the days of Anselm down to the present time. It will be necessary to blend into one noble whole the hidden elements of truth contained in the old patristic theory of ransom, the juridical conception of St. Anselm, and the ethical theory of atonement. The Redeemer's activity as Mediator stands out most prominently in His triple office of high priest, prophet, and king, which is continued, after the ascension of Christ, in the priesthood and the teaching and pastoral office of the Church. The central position is occupied by the high-priesthood of Christ, which manifests the death on the cross as the true sacrifice of propitiation, and proves the Redeemer to be a true priest.

(ii) Mariology, or the doctrine of the Mother of God, cannot be separated either from the person or from the work of the Redeemer and therefore has the deepest connexion with both Christology and Soteriology. Here the central idea is the Divine Maternity, since this is at once the source of Mary's unspeakable dignity and of her surpassing fulness of grace. Just as the Hypostatic Union of the Divinity and humanity of Christ stands or falls with the truth of the Divine Maternity, so too is this same maternity the foundation of all special privileges which were accorded to Mary on account of Christ's dignity. These singular privileges are four: her Immaculate Conception, personal freedom from sin, perpetual virginity, and her bodily Assumption into heaven. For the three former we have doctrinal decisions of the Church, which are final. However, though Mary's bodily Assumption has not yet been solemnly declared an article of faith, nevertheless the Church has practically demonstrated such to be her belief by celebrating from the earliest times the feast of the Assumption of the Mother of God. Two more privileges are connected with Mary's dignity: her special mediatorship between the Redeemer and the redeemed and her exclusive right to hyperdulia. Of course, it is clear that the mediatorship of Mary is entirely subordinate to that of Her Divine Son and derives its whole efficacy and power therefrom. In order the better to understand the value and importance of Mary's peculiar right to such veneration, it will be well to consider, by way of contrast, the dulia paid to the saints and, again, the doctrine concerning the veneration paid to relics and images. For the most part, dogmatic theologians prefer to treat these latter subjects under eschatology, together with the Communion of Saints.

(iii) Grace (*De gratia*).—The Christian idea of grace is based entirely upon the supernatural order. A distinction is made between actual and sanctifying grace, according as there is question of a supernatural activity or merely the state of sanctification. But the crucial point in the whole doctrine of grace lies in the justification of the sinner, because, after all, the aim and object of actual grace is either to lay the foundation for the grace of justification when the latter is absent, or to preserve the grace of justification in the soul that already possesses it. The three qualities of actual grace are of the utmost importance: its necessity, its gratuitousness, and its universality. Although on the one hand we must avoid the exaggeration of the Reformers, and of the followers of Baius and Jansenius, who denied the capability of unaided nature altogether in moral action, yet, on the other hand, theologians agree that fallen man is quite incapable, without the help of God's grace, of either fulfilling the whole natural law or of resisting all strong temptations. But actual grace is absolutely necessary for each and every salutary act, since all such acts bear a causal relation towards the supernatural end of man. The heretical doctrines of Pelagianism and Semipelagianism are refuted by the Church's doctrinal decisions based upon Holy Scripture and Tradition. From the supernatural character of grace flows its second quality: gratuitousness. So entirely gratuitous is grace that no natural merit, no positive capability or preparation for it on the part of nature, nor even any purely natural petition, is able to move God to give us actual grace. The universality of grace rests fundamentally upon the absolute universality of God's salvific will, which, in regard to adults, simply means His antecedent will to distribute sufficient grace to each and every person, whether he be already justified or in the state of sin, whether he be Christian or heathen, believer or infidel. But the salvific will, in as far as it is consequent and deals out just retribution, is no longer universal, but particular, for the reason that only those who persevere in justice, enter heaven, whereas the wicked are condemned to hell. The question of the predestination of the blessed and the reprobation of the damned is admittedly one of the most difficult problems with which theology has to deal, and its solution is wrapped in impenetrable mystery. The same may be said of the relation existing between grace and the liberty of the human will. It would be cutting the Gordian knot rather than loosing it, were one to deny the efficacy of grace, as did Pelagianism, or again, following the error of Jansenism, deny the liberty of the will. The difficulty is rather in determining just how the acknowledged efficacy of grace is to be reconciled with human freedom. For centuries Thomists and Molinists, Augustinians and Congruists have been toiling to clear up the matter. And while the system of grace known as syncretic has endeavoured to harmonize the principles of Thomism and Molinism, it has served but to double the difficulties instead of eliminating them.

The second part of the doctrine on grace has to do with sanctifying grace, which produces the state of habitual holiness and justice. Preparatory to receiving this grace, the soul undergoes a certain preliminary process, which is begun by theological faith, the "beginning, root and foundation of all justification", and is completed and perfected by other supernatural dispositions, such as contrition, hope, love. The Protestant conception of justifying faith as a mere fiducial faith is quite as much at variance with revelation as is the *sola fides* doctrine. Catholics also differ from Protestants in explaining the essence of justification itself. While Catholic dogma declares that justification consists in a true blotting-out of sin and in an interior sanctification of the soul, Protestantism would have it to be merely an external cloaking of sins which still remain, and a mere imputation to the sinner of God's or Christ's justice. According to Catholic teaching, the forgiveness of sin and the sanctification of the soul are but two moments of one and the same act of justification, since the blotting-out of original and mortal sin is accomplished by the very fact of the infusion of sanctifying grace. Although we may, to a certain extent, understand the nature of grace in itself, and may define it philosophically as a permanent quality of the soul, an infused habit, an accidental and analogous participation of the Divine nature, yet its true nature may be more easily understood from a consideration of its so-called formal effects produced in the soul. These are: sanctity, purity, beauty, friendship with God, adopted sonship. Sanctifying grace is accompanied by additional gifts, viz., the three theological virtues, the infused moral virtues, the seven gifts of the Holy Ghost, and the personal indwelling of the Holy Ghost in the soul of the justified. This latter it is that crowns and completes the whole process of justification. We must also mention three qualities special to justification or sanctifying grace: its uncertainty, its inequality, and the possibility of its being lost. All of them are diametrically opposed to the Protestant conception, which asserts the absolute certainty of justification, its complete equality, and the impossibility of its being lost. Finally, the fruits of justification are treated. These ripen under the beneficent influence of sanctifying grace, which enables man to acquire merit through his good works, that is to say, supernatural merit for heaven. The doctrine on grace is concluded with the proof of the existence, the conditions, and the objects of merit.

(iv) Sacraments (*De sacramentis*).—This section is divided into two parts: the treatise on the sacraments in general and that on the sacraments in particular. After having defined exactly what is meant by the Christian sacraments, and what is meant by the sacrament of nature and the Jewish rite of circumcision as it prevailed in pre-Christian times, the next important step is to prove the existence of the seven sacraments as instituted by Christ. The essence of a sacrament requires three things: an outward, visible sign, i. e. the matter and form of the sacrament; interior grace; and institution by Christ. In the difficult problem as to whether Christ himself determined the matter and form of each sacrament specifically or only generically, the solution must be sought through dogmatic and historical investigations. Special importance attaches to the causality of the sacraments, and an efficacy *ex opere operato* is attributed to them. Theologians dispute as to the nature of this causality, i. e. whether it is physical or merely moral. In the case of each sacrament, regard must be had to two persons, the recipient and the minister. The objective efficacy of a sacrament is wholly independent of the personal sanctity or the individual faith of the minister. The only requisite is that he who confers the sacrament intend to do what the Church does. As regards the recipient of a sacrament, a distinction must be made between valid and worthy reception; the conditions differ with the various sacraments. But since the free will is required for validity, it is evident that no one can be forced to receive a sacrament.

Furthermore, as regards the sacraments in particular, the conclusions reached with reference to the sacraments in general of course hold good. Thus, in the case of the first two sacraments, baptism and confirmation, we must prove in detail the existence of the three requisites mentioned above, as well as the disposition of both the minister and the recipient. The question whether their reception is absolutely necessary or only of precept must also be examined. More than ordinary care is called for in the discussion of the Eucharist, which is not only a sacrament, but also the Holy Sacrifice of the Mass. Everything centres of course around the dogma of the Real Presence of Christ under the appearances of bread and wine. His presence there is effected by means of the transubstantiation of the Eucharistic elements and lasts as long as the accidents of bread and wine remain incorrupt. The dogma of the totality of the Real Presence means that in each individual species the whole Christ, flesh and blood, body and soul, Divinity and humanity, is really present. The Holy Eucharist is, of course, a great mystery, one that rivals that of the Holy Trinity and of the Hypostatic Union. It presents to us a truth utterly at variance with the testimony of our senses, asking us, as it does, to assent to the continued existence of the Eucharistic species without their subject, a sort of spiritual existence, unconfined by space, yet of a human body, and, again, the simultaneous presence of Christ in many different places. The sacramental character of the Eucharist is established by the presence of the three essential elements. The outward sign consists in the Eucharistic forms of bread and wine and the words of consecration. Its institution by Christ is guaranteed both by the promise of Christ and by the words of institution at the Last Supper. Finally, the interior effects of grace are produced by the worthy reception of Holy Communion. As Christ is wholly present in each species, the reception of the Eucharist under one species is sufficient to obtain fully all the fruits of the sacrament. Hence the chalice need not be communicated to the laity, though at times the Church has so allowed it to be, but not in any sense as though such were necessary. Not everyone is capable of pronouncing the words of consecration with sacramental effect, but only duly ordained bishops and priests; for to them alone did Christ communicate the power of transubstantiation in the Holy Sacrifice of the Mass. A distinct phase of the Eucharist is its sacrificial character. This is proved not only from the oldest Fathers and the liturgical practice of the early Christian Church, but also from certain prophecies of the Old Testament and from the Gospel narrative of the Last Supper. To find the physical essence of the Sacrifice of the Mass, we must consider its essential dependence on, and relation to, the bloody sacrifice of the Cross; for the Mass is a commemoration of the latter, its representation, its renewal, and its application. This intrinsically relative character of the sacrifice of the Mass does not in the least destroy or lessen the universality and oneness of the sacrifice on the Cross, but rather presupposes it; likewise the intrinsic propriety of the Mass is shown precisely in this, that it neither effects nor claims to effect anything else than the application of the fruits of the sacrifice of the Cross to the individual, and this in a sacrificial manner. The essence of the sacrifice is generally thought to consist neither in the Offertory nor in the Communion of the celebrant, but in the double consecration. Widely divergent are the views of the theologians as to the metaphysical essence of the sacrifice of the Mass, that is to say, as to the question how far the idea of a real sacrifice is verified in the double consecration. A concurrence of opinion on this point is all the more difficult owing to the fact that the very idea of sacrifice is involved in no little obscurity. As regards the causality of the sacrifice of the Mass, it has all the effects of a true sacrifice: adoration, thanksgiving, impetration, atonement. Most of its effects are *ex opere operato*, while some depend on the co-operation of the participants.

The Sacrament of Penance presupposes the Church's power to forgive sins, a power clearly indicated in the Bible in the words with which Christ instituted this sacrament (John, xx, 23). Moreover, this power is abundantly attested both by the patristic belief in the Church's power of the Keys and by the history of the ancient penitential system. As at the time of Montanism and Novatianism it was a question of vindicating the universality of this power, so nowadays it is a matter of defending its absolute necessity and its judicial form against the attacks of Protestantism. These three qualities manifest at the same time the intrinsic nature and the essence of the Sacrament of Penance. The universality of the power to forgive sins means that all sins without exception, supposing, of course, contrition for the same, can be remitted in this sacrament. Owing to its absolute necessity and its judicial form, however, the sacrament really becomes a tribunal of penance in which the penitent is at once plaintiff, defendant, and witness, while the priest acts as judge. The matter of the sacrament consists in the three acts of the penitent: contrition, confession, and satisfaction, while the priestly absolution is its form. To act as judge in the Sacrament of Penance, the confessor needs more than priestly ordination: he must also have jurisdiction, which may be restricted more or less by the ecclesiastical superiors. As the validity of this sacrament, unlike that of the others, depends essentially on the worthiness of its reception, great attention must be paid to the acts of the penitent. Most important of all is contrition with the purpose of amendment, containing, as it does, the virtue of penance. The opinion, held by many of the early Scholastics, that perfect contrition is required for the validity of the absolution, is quite irreconcilable with the *ex opere operato* efficacy of the sacrament; for sorrow, springing from the motive of perfect love, suffices of itself to free the sinner from all guilt, quite antecedent to, and apart from, the sacrament, though not indeed without a certain relation to it. According to the mind of the Council of Trent, imperfect contrition (attrition), even when actuated by the fear of hell, is sufficient for the validity of the sacrament, though we should, of course, strive to call in nobler motives. Therefore the addition of a formal *caritas initialis* to attrition, as the Contritionists of to-day demand for the validity of absolution, is superfluous, at least so far as validity is concerned. The contrite confession, which is the second act of the penitent, manifests the interior sorrow and the readiness to do penance by a visible, outward sign, the matter of the sacrament. Since the Reformers rejected the Sacrament of Penance, great care must be bestowed upon the Biblical and patristic proof of its existence and its necessity. The required satisfaction, the third act of the penitent, is fulfilled in the penances (prayers, fasting, alms) which, according to the present custom of the Church, are imposed by the confessor immediately before the absolution. The actual fulfilment of such penances is not essential to the validity of the sacrament, but belongs rather to its integrity. The Church's extra-sacramental remission of punishment due to sin is called indulgence. This power of granting indulgences, both for the living and the dead, is included in the power of the Keys committed to the Church by Christ.

Extreme Unction may be considered as the complement of the Sacrament of Penance, inasmuch as it can take the place of the latter in case sacramental confession is impossible to one who is unconscious and dangerously ill.

While the five sacraments of which we have treated so far were instituted for the welfare of the individual, the last two, Holy Orders and Matrimony, aim rather at the well-being of human society in general. The Sacrament of Holy Orders is composed of various grades, of which those of bishop, priest, and deacon are certainly of a sacramental nature, whereas that of subdeacon and the four minor orders are most probably due to ecclesiastical institution. The decision depends on whether or no the presentation of the instruments is essential for the validity of ordination. In the case of the subdiaconate and the minor orders this presentation indeed occurs, but without the simultaneous imposition of hands. The common opinion prevalent to-day holds that the imposition of hands, together with the invocation of the Holy Ghost, is the sole matter and form of this sacrament. And since this latter obtains only in the case of the consecration of a bishop, priest, or deacon, the conclusion is drawn that only the three hierarchical grades or orders confer *ex opere operato* the sacramental grace, the sacramental character, and the corresponding powers. The ordinary minister of all orders, even those of a non-sacramental character, is the bishop. But the pope may delegate an ordinary priest to ordain a subdeacon, lector, exorcist, acolyte, or ostiarius. Beginning with the subdiaconate, which was not raised to the rank of a major order until the Middle Ages, celibacy and the recitation of the Breviary are of obligation.

Three disciplines treat the Sacrament of Matrimony: dogmatic theology, moral theology, and canon law. Dogmatic theology leads the way, and proves from the sources of faith not merely the sacramental nature of Christian marriage, but also its essential unity and indissolubility. In the case of a consummated marriage between Christians the marriage bond is absolutely indissoluble; but where there is question of a consummated marriage between pagans the bond may be dissolved if one of the parties is converted to the Faith, and if the other conditions of what is known as the "Pauline Privilege" are fulfilled. The bond of a non-consummated marriage between Christians may be dissolved in two cases: when one of the parties concerned makes the solemn profession of religious vows, or when the pope, for weighty reasons, dissolves such a marriage. Finally, the grounds of the Church's power to establish diriment impediments are discussed and thoroughly proved.

(v) Eschatology (*De novissimis*).—The final treatise of dogmatic theology has to do with the four last things. According as we consider either the individual or mankind in general, there is seen to be a double consummation of all things. For the individual the last things are death and the particular judgment, to which corresponds, as his final state and condition, either heaven or hell. The consummation of the human race on doomsday will be preceded by certain indications of the impending disaster, right after which will occur the resurrection of the dead and the general judgment. As for the opinion that there will be a glorious reign of Christ upon earth for a thousand years previous to the final end of all things, suffice it to remark that there is not the slightest foundation for it in revelation, and even a moderate form of Chiliasm must be rejected as untenable.

B. *History of Dogmatic Theology.*—The imposing edifice of Catholic theology has been reared not by individual nations and men, but rather by the combined efforts of all nations and the theologians of every century. Nothing could be more at variance with the essential character of theology than an endeavour to set upon it the stamp of nationalism: like the Catholic Church itself, theology must ever be international. In the history of dogmatic theology, as in the history of the Church, three periods may be distinguished: (1) the patristic; (2) the medieval; (3) the modern.

(1) The Patristic Period (about A. D. 100–800).—The Great Fathers of the Church and the ecclesiastical writers of the first 800 years rendered important services by their positive demonstration and their speculative treatment of dogmatic truth. It is the Fathers who are honoured by the Church as her principal theologians, excelling as they did in purity of faith, sanctity of life, and fulness of wisdom, virtues which are not always to be found in those who are known simply as ecclesiastical writers. Tertullian (b. about 160), who died a Montanist, and Origen (d. 254), who showed a marked leaning towards Hellenism, strayed far from the path of truth. But even some of the Fathers, e. g. St. Cyprian (d. 258) and St. Gregory of Nyssa, went astray on individual points; the former in regard to the baptism of heretics, the latter in the matter of apocatastasis. It was not so much in the catechetical schools of Alexandria, Antioch, and Edessa as in the struggle with the great heresies of the age that patristic theology developed. This serves to explain the character of the patristic literature, which is apologetical and polemical, parenetical and ascetic, with a wealth of exegetical wisdom on every page; for the roots of theology are in the Bible, especially in the Gospels and in the Epistles of St. Paul. Although it was not the intention of the Fathers to give a methodical and systematic treatise of theology, nevertheless, so thoroughly did they handle the great dogmas from the positive, speculative, and apologetic standpoint that they laid the permanent foundations for the centuries to follow. Quite justly does Möhler call attention to the fact that all modes of treatment may be found in the writings of the Apostolic Fathers: the apologetic style is represented by the letter of Diognetus and the letters of St. Ignatius; the dogmatic in pseudo-Barnabas; the moral, in the Pastor of Hermas; canon law, in the letter of St. Clement of Rome; church history, in the Acts of the martyrdom of Polycarp and Ignatius. Owing to the unexpected recovery of lost manuscripts we may add: the liturgical style, in the Didache; the catechetical, in the "Proof of the Apostolic Preaching" by St. Irenæus.

Although the different epochs of the patristic age overlap each other, it may be said in general that the apologetic style predominated in the first epoch up to Constantine the Great, while in the second epoch, that is to say up to the time of Charlemagne, dogmatic literature prevailed. We can here only trace in the most general outlines this theological activity, leaving to patrology the discussion of the literary details.

When the Christian writers entered the lists against paganism and Judaism, a double task awaited them: they had to explain the principal truths of natural religion, such as God, the soul, creation, immortality, and freedom of the will; at the same time they had to defend the chief mysteries of the Christian faith, as the Trinity, Incarnation, etc., and had to prove their sublimity, beauty, and conformity to reason. The band of loyal champions who fought against pagan Polytheism and idolatry is very large: Justin, Athenagoras, Tatian, Theophilus of Antioch, Hermias, Tertullian, Clement of Alexandria, Origen, Cyprian, Minucius Felix, Commodianus, Arnobius, Lactantius, Prudentius, Firmicius Maternus, Eusebius of Cæsarea, Athanasius, Gregory of Nazianzus, Cyril of Alexandria, Nilus, Theodoret, Orosius, and Augustine. The most eminent writers in the struggle against Judaism were: Justin, Tertullian, Hippolytus, Cyprian, Athanasius, Gregory of Nyssa, Epiphanius, Chrysostom, Cyril of Alexandria, Isidore of Seville. The attacks of the Fathers were not, of course, aimed at the Israelitic religion of the Old Testament, which was a revealed religion, but at the obstinacy of those Jews who, clinging to the dead letter of the Law, refused to recognize the prophetic spirit of the Old Testament.

But far greater profit resulted from conflict with the heresies of the first eight centuries. As the flint, when it is struck by the steel, gives off luminous sparks, so did dogma, in its clash with heretical teaching, shed a new and wonderfully brilliant light. As the errors were legion, it was natural that in the course of the centuries all the principal dogmas were, one by one, treated in monographs which established their truth and provided them with a philosophical basis. The struggle of the Fathers against Gnosticism, Manichæism, and Priscillianism served not only to bring into clearer light the essence of God, creation, the problem of evil; it moreover secured the true principles of faith and the Church's authority against heretical aberrations. In the mighty struggle against Monarchianism, Sabellianism, and Arianism an opportunity was afforded to the Fathers and the œcumenical councils to establish the true meaning of the dogma of the Trinity, to secure it on all sides and to draw out, by speculation, its genuine import. When the contest with Eunomianism broke out, the fires of theological and philosophical criticism purified the doctrine of God and our knowledge of Him, both earthly and heavenly. Of world-wide interest were the Christological disputes, which, beginning with the rise of Apollinarianism, reached their climax in Nestorianism, Monophysitism, and Monothelitism, and were revived once more in Adoptionism. In this long and bitter strife, the doctrine of Christ's person, of the Incarnation, and Redemption, and in connexion herewith Mariology also, was placed on a sure and permanent foundation, from which the Church has never varied a hair's breadth in later ages. The following may be mentioned as the Eastern Champions in this scientific dispute on the Trinity and Christology: the great Alexandrines, Clement, Origen, and Didymus the Blind; the heroic Athanasius and the three Cappadocians (Basil, Gregory of Nazianzus, and Gregory of Nyssa); Cyril of Alexandria and Leontius of Byzantium; finally, Maximus the Confessor and John Damascene. In the West the leaders were: Tertullian, Cyprian, Hilary of Poitiers, Ambrose, Augustine, Jerome, Fulgentius of Ruspe, and the two popes, Leo I and Gregory I. As the contest with Pelagianism and Semi-pelagianism purified the dogmas of grace and liberty, providence and predestination, original sin and the condition of our first parents in Paradise, so in like manner the contests with the Donatists brought out more clearly and strongly the doctrine of the sacraments (baptism), the hierarchical constitution of the Church, her *magisterium*, or teaching authority, and her infallibility. In all these struggles it was Augustine who ever led with indomitable courage, and next to him came Optatus of Mileve and a long line of devoted disciples. The last contest was decided by the Second Council of Nicæa (787); it was in this struggle that, under the leadership of St. John Damascene, the communion of saints, the invocation of the saints, the veneration of relics and holy images were placed on a scientific basis.

It may be seen from this brief outline that the dogmatic teachings of the Fathers are a collection of monographs rather than a systematic exposition. But the Fathers broke the ground and furnished the material for erecting the system afterwards. In the case of some of them there are evident signs of an attempt to synthesize dogma into a complete and organic whole. Irenæus (Adv. hær., III–V) shows traces of this tendency; the well-known trilogy of Clement of Alexandria (d. 217) marks an advance in the same direction; but the most successful effort in Christian antiquity to systematize the principal dogmas of faith was made by Origen in his work "De principiis", which is unfortunately disfigured by serious errors. His work against Celsus, on the other hand, is a classic in apologetics and of lasting value. Gregory of Nyssa (d. 394), skilled in matters philosophical and of much the same bent of mind as Origen, endeavoured in his "Large Catechetical Treatise" (λόγος κατεχητικὸς ὁ μέγας) to correlate in a broad synthetic view the fundamental dogmas of the Trinity, the Incarnation, and the Sacraments. In the same manner, though somewhat fragmentarily, Hilary (d. 366) developed in his valuable work "De Trinitate" the principal truths of Christianity. The catechetical instructions of St. Cyril of Jerusalem (d. 386), especially his five mystagogical treatises, on the Apostles' Creed and the three Sacraments of Baptism, Confirmation, and the Holy Eucharist, contain an almost complete dogmatic treatise. St. Epiphanius (d. 496), in his two works "Ancoratus" and "Panarium", aimed at a complete dogmatic treatise, and St. Ambrose (d. 397) in his chief works: "De fide", "De Spiritu S.", "De incarnatione", "De mysteriis", "De pœnitentia", treated the main points of dogma masterfully and in classic Latinity, though without any attempt at a unifying synthesis. In regard to the Trinity and Christology, St. Cyril of Alexandria (d. 444) is even to-day a model for dogmatic theologians. Though all the writings of St. Augustine (d. 430) are an inexhaustible mine, yet he has written one or two works, as the "De fide et symbolo" and the "Enchiridium", which may justly be called compendia of dogmatic and moral theology. Unsurpassed is his speculative work "De Trinitate". His disciple Fulgentius of Ruspe (d. 533) wrote an extensive and thorough confession of faith under the title, "De fide ad Petrum, seu regula rectæ fidei", a veritable treasure for the theologians of his day.

Towards the end of the Patristic Age Isidore of Seville (d. 636) in the West and John Damascene (b. ab. 700) in the East paved the way for a systematic treatment of dogmatic theology. Following closely the teachings of St. Augustine and St. Gregory the Great, St. Isidore proposed to collect all the writings of the earlier Fathers and to hand them down as a precious inheritance to posterity. The results of this undertaking were the "Libri III sententiarum seu de summo bono". Tajus of Saragossa (650) had the same end in view in his "Libri V sententiarum". The work of St. John Damascene (d. after 754) was crowned with still greater success; for not only did he gather the teachings and views of the Greek Fathers, but by reducing them to a systematic whole he deserves to be called the first and the only scholastic among the Greeks. His main work, which is divided into three parts, is entitled: "Fons scientiæ" (πηγὴ γνώσεως), because it was intended to be the source, not merely of theology, but of philosophy and Church history as well. The third or theological part, known as "Expositio fidei orthodoxæ" (ἔκθεσις τῆς ὀρθοδόξου πίστεως), is an excellent combination of positive and scholastic theology, and aims at thoroughness both in establishing and in elucidating the truth. Greek theology has never gone beyond St. John Damascene, a standstill caused principally by the Photian schism (869). The only Greek prior to him who had produced a complete system of theology was Pseudo-Dionysius the Areopagite, in the fifth century; but he was more popular in the West, at least from the eighth century on, than in the East. Although he openly wove into the genuine Catholic system neo-Platonic thoughts and phrases, nevertheless he enjoyed an unparalleled reputation among the greatest Scholastics of the Middle Ages because he was supposed to have been a disciple of the Apostles. For all that, Scholasticism did not take its guidance from St. John Damascene or Pseudo-Dionysius, but from St. Augustine, the greatest of the Fathers. Augustinian thought runs like a golden thread through the whole progress of Western philosophy and theology. It was Augustine who led everywhere, who always pointed out the right path, and from whom all schools sought direction. Even the heretics tried to bolster up their errors with the strength of his reputation. To-day his greatness is recognized and appreciated more and more, as specialized research goes more deeply into his works and brings to view his genius. As Scheeben remarks, "It would be easy to compile from his writings a rich system of dogmatic theology." We cannot help admiring the skill with which he ever kept God, as the beginning and end of all things, in the central position, even where he was compelled to depart from earlier opinions which he had found to be untenable. The English-speaking world may well be proud of the Venerable Bede (d. 735), a contemporary of St. John Damascene. Owing to his unusually solid education in theology, his extensive knowledge of the Bible and of the Fathers of the Church, he is the link which joins the patristic with the medieval history of theology.

(2) The Middle Ages (800–1500).—The beginnings of Scholasticism may be traced back to the days of Charlemagne (d. 814). Thence it progressed in ever-quickening development to the time of Anselm of Canterbury, Bernard of Clairvaux, and Peter the Lombard, and onward to its full growth in the Middle Ages (first epoch, 800–1200). The most brilliant period of Scholasticism embraces about 100 years (second epoch, 1200–1300), and with it are connected the names of Alexander of Hales, Albertus Magnus, Bonaventure, Thomas Aquinas, and Duns Scotus. From the beginning of the fourteenth century, owing to the predominance of Nominalism and to the sad condition of the Church, Scholasticism began to decline (third epoch, 1300–1500).

(a) First Epoch: Beginning and Progress of Scholasticism (800–1200).—In the first half of this epoch, up to the time of St. Anselm of Canterbury, the theologians were more concerned with preserving than with developing the treasures stored up in the writings of the Fathers. The sacred science was cultivated nowhere with greater industry than in the cathedral and monastic schools, founded and fostered by Charlemagne. The earliest signs of a new thought appeared in the ninth century during the discussions relative to the Last Supper (Paschasius Radbertus, Ratramnus, Rabanus Maurus). These speculations were carried to a greater depth in the second Eucharistic controversy against Berengarius of Tours (d. 1088), (Lanfranc, Guitmund, Alger, Hugh of Langres, etc.). Unfortunately, the only systematic theologian of this time, Scotus Eriugena (d. after 870), was an avowed Pantheist, so that the name of "Father of Scholasticism" which some would give him, is wholly unmerited. But the one who fully deserves this title is St. Anselm of Canterbury (d. 1109). For he was the first to bring a sharp logic to bear upon the principal dogmas of Christianity, the first to unfold and explain their meaning in every detail, and to draw up a scientific plan for the stately edifice of dogmatic theology. Taking the substance of his doctrine from Augustine, St. Anselm, as a philosopher, was not so much a disciple of Aristotle as of Plato, in whose masterly dialogues he had been thoroughly schooled. Another pillar of the Church was St. Bernard of Clairvaux (d. 1153), the "Father of Mysticism". Though for the most part the author of ascetic works with a mystical tendency, he used the weapons of scientific theology against Abelard's Rationalism and the exaggerated Realism of Gilbert de La Porrée. It is upon the doctrine of Anselm and Bernard that the Scholastics of succeeding generations took their stand, and it was their spirit which lived in the theological efforts of the University of Paris. Less prominent, yet noteworthy, are: Ruprecht of Deutz, William of Thierry, Gaufridus, and others.

The first attempts at a theological system may be seen in the so-called "Books of Sentences", collections and interpretations of quotations from the Fathers, more especially of St. Augustine. One of the earliest of these books is the "Summa sententiarum" of Hugh of St. Victor (1141). His works are characterized throughout by a close adherence to St. Augustine and, according to the verdict of Scheeben, may even yet serve as guides for beginners in the theology of St. Augustine. Less praise is due to the similar work of Robert Pulleyn (d. 1146), who is careless in arranging the matter and confuses the various questions of which he treats. Peter the Lombard, called the "Magister Sententiarum" (d. 1164), on the other hand, stands far above them all. What Gratian had done for canon law the Lombard did for dogmatic and moral theology. With untiring industry he sifted and explained and paraphrased the patristic lore in his "Libri IV sententiarum", and the arrangement which he adopted was, in spite of the lacunæ, so excellent that up to the sixteenth century his work was the standard text-book of theology. The work of interpreting this masterpiece began as early as the thirteenth century, and there was no theologian of note in the Middle Ages who did not write a commentary on the Sentences of the Lombard. Hundreds of these commentaries are still resting, unprinted, beneath the dust of the libraries. No other work exerted such a powerful influence on the development of scholastic theology. Neither the analogous work of his disciple, Peter of Poitiers (d. 1205), nor the important "Summa aurea" of William of Auxerre (d. after 1230) superseded the Lombard's "Sentences". Along with Alain of Lille (d. 1203), William of Auvergne (d. 1248), who died as Archbishop of Paris, deserves special mention. Though preferring the free, unscholastic method of an earlier age, he yet shows himself at once an original philosopher and a profound theologian. Inasmuch as in his numerous monographs on the Trinity, the Incarnation, the Sacraments, etc., he took into account the anti-Christian attacks of the Arabian exponents of Aristoteleanism, he is, as it were, the connecting link between this age and the most brilliant epoch of the thirteenth century.

(b) Second Epoch: Scholasticism at its Zenith (1200–1300).—This period of Scholasticism was marked not only by the appearance of the "Theological Summæ", but also by the building of the great Gothic cathedrals, which bear a sort of affinity to the lofty structures of Scholasticism. (Cf. Emil Michael, S. J., "Geschichte des deutschen Volkes vom 13. Jahrh. bis zum Ausgang des Mittelalters", V, Freiburg, 1911, 15 sq.) Another characteristic feature was the fact that in the thirteenth century the champions of Scholasticism were to be found in the great religious orders of the Franciscans and Dominicans, beside whom worked the Augustinians, Carmelites, and Servites. This brilliant period is ushered in by two master-minds: the one a Franciscan, Alexander of Hales (d. about 1245), the other a Dominican, Albert the Great (d. 1280). The "Summa theologiæ" of Alexander of Hales, the largest and most comprehensive work of its kind, is distinguished by its deep and mature speculation, though flavoured with Platonism. The arrangement of the subjects treated reminds one of the method in vogue to-day. An intellectual giant not merely in matters philosophical and theological, but in the natural sciences as well, was Albert the Great. It was he who made the first attempt to present the entire philosophy of Aristotle in its true form and to place it at the service of Catholic theology—an undertaking of far-reaching consequences. The logic of Aristotle had indeed been rendered into Latin by Boethius and had been used in the schools since the end of the sixth century; but the physics and metaphysics of the Stagirite were made known to the Western world only through the Arabian philosophers of the thirteenth century, and then in such a way that Aristotle's doctrine seemed to clash with the Christian religion. This fact explains why his works were prohibited by the Synod of Paris, in 1210, and again by a Bull of Gregory IX in 1231. But after the Scholastics, led by Albert the Great, had gone over the faulty Latin translation once more, had reconstructed the genuine doctrine of Aristotle and recognized the fundamental soundness of his principles, they no longer hesitated to take, with the approval of the Church, the pagan philosopher as their guide in the speculative study of dogma.

Two other representatives of the great orders are the gigantic figures of Bonaventure (d. 1274) and of Thomas Aquinas (d. 1274), who mark the highest development of Scholastic theology. St. Bonaventure, the "Seraphic Doctor", clearly follows in the footsteps of Alexander of Hales, his fellow-religious and predecessor, but surpasses him in depth of mysticism and clearness of diction. Unlike the other Scholastics of this period, he did not write a theological "Summa", but amply made up for it by his "Commentary on the Sentences", as well as by his famous "Breviloquium", a "casket of pearls", which, brief as a compendium, is nothing less than a condensed Summa. Alexander of Hales and Bonaventure are the real representatives of the old Franciscan Schools, from which the later School of Duns Scotus essentially differed. Yet it is not Bonaventure, but Thomas Aquinas, who has ever been honoured as the "Prince of Scholasticism". St. Thomas holds the same rank among the theologians as does St. Augustine among the Fathers of the Church. Possessed of angelic rather than human knowledge, the "Doctor angelicus" is distinguished not only for the wealth, depth, and truth of his ideas and for his systematic exposition of them, but also for the versatility of his genius, which embraced all branches of human knowledge. For dogmatic theology his most important work is the "Summa theologica". Experience has shown that, as faithful adherence to St. Thomas means progress, so a departure from his teachings invariably brings with it a decline of Catholic theology. It seems providential, therefore, that Leo XIII in his Encyclical "Æterni Patris" (1879) restored the study of the Scholastics, especially of St. Thomas, in all higher Catholic schools, a measure which was again emphasized by Pope Pius X. The fears prevalent in some circles that by the restoration of Scholastic studies the results of modern thought would be forced back to the antiquated viewpoint of the thirteenth century are shown to be groundless by the fact that both popes, while insisting on the acquisition of the "wisdom of St. Thomas", yet emphatically disclaim any intention to revive the unscientific notions of the Middle Ages. It would be folly to ignore the progress of seven centuries, and, moreover, the Reformation, Jansenism, and the philosophies since Kant have originated theological problems which St. Thomas in his time could not foresee. Nevertheless, it is a convincing proof of the logical accuracy and comprehensiveness of the Thomistic system that it contains at least the principles necessary for the refutation of modern errors.

Before the brilliancy of the genius of St. Thomas even great theologians of this period wane into stars of the second and third magnitude. Still, Richard of Middleton (d. 1300), whose clearness of thought and lucidity of exposition recall the master mind of Aquinas, is a classical representative of the Franciscan School. Among the Servites, Henry of Ghent (d. 1293), a disciple of Albert the Great, deserves mention; his style is original and rhetorical, his judgments are independent, his treatment of the doctrine on God attests the profound thinker. In the footsteps of St. Thomas followed his pupil Peter of Tarentaise, who later became Pope Innocent V (d. 1276), and Ulric of Strasburg (d. 1277), whose name is little known, though his unprinted "Summa" was held in high esteem in the Middle Ages. The famous General of the Augustinians, Ægidius of Rome (d. 1316), a scion of the noble family of the Colonna, while differing in some details from the teaching of St. Thomas yet in the main adhered to his system. In his own order his writings were considered as classics. But the attempt of the Augustinian Gavardus in the seventeenth century to create a distinctly "Ægidian School" proved a failure. On the other hand, adversaries of St. Thomas sprang up even in his lifetime. The first attack came from England and was led by William de la Mare, of Oxford (d. 1285). Speaking broadly, English scholars, famous for their originality, played no mean part in the intellectual life of the Middle Ages. Being more of an empirical and practical than of an aprioristic and theoretical bent of mind, they enriched science with a new element. Their predilection for the natural sciences is also the outcome of this practical sense. Like the links of an unbroken chain follow the names of Bede, Alcuin, Alfred (Anglicus), Alexander of Neckham, Alexander of Hales, Robert Grosseteste, Adam of Marsh, John Basingstoke, Robert Kilwardby, John Pecham, Roger Bacon, Duns Scotus, Occam. Kuno Fischer is right when he says: "When travelling along the great highway of history, we may traverse the whole of the middle ages down to Bacon of Verulam without leaving England for a moment" ("Francis Bacon", Heidelberg, 1904, p. 4).

This peculiar English spirit was embodied in the famous Duns Scotus (1266–1308). While in point of ability he belongs to the golden age of scholasticism, yet his bold and virulent criticism of the Thomistic system was to a great extent responsible for its decline. Scotus cannot be linked with the old Franciscan school; he is rather the founder of the new Scotistic School, which deviated from the theology of Alexander of Hales and Bonaventure not so much in matters of faith and morals as in the speculative treatment of dogma. Greater still is his opposition to the fundamental standpoint of Thomas Aquinas. St. Thomas likens the system of theology and philosophy to the animal organism, in which the vivifying soul permeates all the members, holds them together, and shapes them into perfect unity. In Scotus's own words, on the other hand, the order of things is rather symbolized by the plant, the root shooting forth branches and twigs which have an innate tendency to grow away from the stem. This fundamental difference also sheds light on the peculiarities of Scotus's system as opposed to Thomism: his formalism in the doctrine of God and the Trinity, his loose conception of the Hypostatic Union, his relaxation of the bonds uniting the sacraments with the humanity of Christ, his explanation of transubstantiation as an adductive substitution, his emphasis on the supremacy of the will, and so on. Though it cannot be denied that Scotism preserved theological studies from a one-sided development and even won a signal victory over Thomism by its doctrine concerning the Immaculate Conception, it is nevertheless evident that the essential service it rendered to Catholic theology in the long run was to bring out, by the clash of arguments, the enduring solidity of the Thomistic structure. No one can fail to admire in St. Thomas the perspicuity of thought and the lucidity of diction, as contrasted with the abstruse and mystifying conceptions of his critic. In later centuries not a few Franciscans of a calmer judgment, among them Constantine Sarnanus (1589) and John of Rada (1599), set about minimizing or even reconciling the doctrinal differences of the two masters.

(c) Third Epoch: Gradual Decline of Scholasticism (1300–1500).—The death of Duns Scotus (d. 1308) marks the close of the golden era of the Scholastic system. What the following period accomplished in constructive work consisted chiefly in preserving, reproducing, and digesting the results of former ages. But simultaneously with this commendable labour we encounter elements of disintegration, due partly to the Fraticelli's wrong conception of mysticism, partly to the aberrations and superficiality of Nominalism, partly to the distressing conflict between Church and State (Philip the Fair, Louis of Bavaria, the Exile at Avignon). Apart from the fanatical enthusiasts who were leaning towards heresy, the development and rapid spread of Nominalism must be ascribed to two pupils of Duns Scotus: the Frenchman Peter

Aureolus (d. 1321) and the Englishman William Occam (d. 1347). In union with Marsilius of Padua and John of Jandun, Occam used Nominalism for the avowed purpose of undermining the unity of the Church. In this atmosphere flourished regalism and opposition to the primacy of the pope, until it reached its climax in the false principle: "Concilium supra Papam", which was preached from the housetops up to the time of the Councils of Constance and Basle. It is only fair to state that it was the pressing needs of the times more than anything else which led some great men, as Pierre d'Ailly (d. 1425) and Gerson (d. 1429), to embrace a doctrine which they abandoned as soon as the papal schism was healed. To understand the origin of the errors of Wyclif, Huss, and Luther, the history of Nominalism must be studied. For what Luther knew as Scholasticism was only the degenerated form which Nominalism presents. Even the more prominent Nominalists of the close of the Middle Ages, as the general of the Augustinians, Gregory of Rimini (d. 1359), and Gabriel Biel (d. 1495), who has been called the "last Scholastic", did not escape the misfortune of falling into grievous errors. Nominalistic subtleties, coupled with an austere pseudo-Augustinism of the ultra-rigoristic type, made Gregory of Rimini the precursor of Bajanism and Jansenism. Gabriel Biel, though ranking among the better Nominalists and combining solidity of doctrine with a spirit of loyalty to the Church, yet exerted a baneful influence on his contemporaries, both by his unduly enthusiastic praise of Occam and by the manner in which he commented on Occam's writings.

The order which suffered least damage from Nominalism was that of St. Dominic. For, with the possible exception of Durand of St. Pouçain (d. 1332) and Holkot (d. 1349), its members were as a rule loyal to their great fellow-religious St. Thomas. Most prominent among them during the first half of the fourteenth century were: Hervæus de Nedellec (d. 1323), a valiant opponent of Scotus; John of Paris (d. 1306); Peter of Palude (d. 1342); and especially Raynerius of Pisa (d. 1348), who wrote an alphabetical summary of the doctrine of St. Thomas which even to-day is useful. A prominent figure in the fifteenth century is St. Antonine of Florence (d. 1459), distinguished by his industry as a compiler and by his versatility as an author; by his "Summa Theologiæ" he did excellent service for positive theology. A powerful champion of Thomism was John Capreolus (d. 1444), the "Prince of Thomists" (*princeps Thomistarum*). Using the very words of St. Thomas, he refuted, in his adamantine "Clypeus Thomistarum", the adversaries of Thomism in a masterly and convincing manner. It was only in the early part of the sixteenth century that commentaries on the "Summa Theologica" of St. Thomas began to appear, among the first to undertake this work being Cardinal Cajetan of Vio (d. 1537) and Konrad Köllin (d. 1536). The philosophical "Summa contra Gentes" found a masterly commentator in Francis of Ferrara (d. 1528).

Far less united than the Dominicans were the Franciscans, who partly favoured Nominalism, partly adhered to pure Scotism. Among the latter the following are worthy of note: Francis Mayronis (d. 1327); John of Colonia; Peter of Aquila (d. about 1370), who as abbreviator of Scotus was called Scotellus (little Scotus); Nicolaus de Orbellis (ca. 1460); and above all Lichetus (d. 1520), the famous commentator of Scotus. William of Vorrilong (about 1400), Stephen Brulefer (d. 1485), and Nicholas of Niise (d. 1509) belong to a third class which is characterized by the tendency to closer contact with St. Bonaventure. A similar want of harmony and unity is discernible in the schools of the other orders. While the Augustinians James of Viterbo (d. 1308) and Thomas of Strasburg (d. 1357) attached themselves to Ægidius of Rome, thereby approaching closer to St. Thomas, Gregory of Rimini, mentioned above, championed an undisguised Nominalism. Alphonsus Vargas of Toledo (d. 1366), on the other hand, was an advocate of Thomism in its strictest form. Among the Carmelites, also, divergencies of doctrine appeared. Gerard of Bologna (d. 1317) was a staunch Thomist, while his brother in religion John Baconthorp (d. 1346) delighted in trifling controversies against the Thomists. Drifting now with Nominalism, now with Scotism, this original genius endeavoured, though without success, to found a new school in his order. Generally speaking, however, the later Carmelites were enthusiastic followers of St. Thomas. The Order of the Carthusians produced in the fifteenth century a prominent and many-sided theologian in the person of Dionysius Ryckel (d. 1471), surnamed "the Carthusian", a descendant of the Leevis family, who set up his chair in Roermond (Holland). From his pen we possess valuable commentaries on Holy Writ, Pseudo-Dionysius, Peter the Lombard, and St. Thomas. He was equally conversant with mysticism and scholasticism. Albert the Great, Henry of Ghent, and Dionysius form a brilliant constellation which shed undying lustre on the German theology of the Middle Ages.

Leaving the monasteries and turning our attention to the secular clergy, we encounter men who, in spite of many defects, are not without merit in dogmatic theology. The first to deserve mention is the Englishman Thomas Bradwardine (d. 1340), the foremost mathematician of his day and Archbishop of Canterbury. His work "De causa Dei contra Pelagianos" evinces a mathematical mind and an unwonted depth of thought. Unfortunately it is marred by an unbending, sombre rigorism, and this to such an extent that the Calvinistic Anglicans of a later century published it in defence of their own teachings. The Irish Bishop Richard Radulphus of Armagh (d. 1360), in his controversy with the Armenians, also fell into dogmatic inaccuracies, which paved the way for the errors of Wyclif. We may note in passing that the learned Carmelite Thomas Netter (d. 1430), surnamed Waldensis, must be regarded as the ablest controversialist against the Wyclifites and Hussites. The great Cardinal Nicholas of Cusa (d. 1404) stands out prominently as the inaugurator of a new speculative system in dogmatic theology; but his doctrine is in many respects open to criticism. A thorough treatise on the Church was written by John Torquemada (d. 1468), and a similar work by St. John Capistran (d. 1456). A marvel of learning, and already acknowledged as such by his contemporaries, was Alphonsus Tostatus (d. 1454), the equal of Nicholas of Lyra (d. 1341) in Scriptural learning. He merits a place in the history of dogmatic theology, inasmuch as he interspersed his excellent commentaries on the Scriptures with dogmatic treatises, and in his work "Quinque paradoxa" gave to the world a fine treatise on Christology and Mariology.

As was to be expected, mysticism went astray in this period and degenerated into sham pietism. A striking example of this is the anonymous "German Theology", edited by Martin Luther. This work must, however, not be confounded with the "German Theology" of the pious bishop Berthold of Chiemsee (d. 1543), which, directed against the Reformers, is imbued with the genuine spirit of the Catholic Church.

(3) Modern Times (1500–1900).—As during the Patristic Period the rise of heresies was the occasion of the development of dogmatic theology in the Church, so the manifold errors of the Renaissance and of the Reformation brought about a more accurate definition of important articles of faith. Along

other lines also both these movements produced good effects. While in the period of the Renaissance the revival of classical studies gave new vigour to exegesis and patrology, the Reformation stimulated the universities which had remained Catholic, especially in Spain (Salamanca, Alcalá, Coimbra) and in the Netherlands (Louvain), to put forth an enthusiastic activity in intellectual research. Spain, which had fallen behind during the Middle Ages, now came boldly to the front. The Sorbonne of Paris regained its lost prestige only towards the end of the sixteenth century. Among the religious orders the newly-founded Society of Jesus probably contributed most to the revival and growth of theology. Scheeben distinguishes five epochs in this period.

(a) First Epoch: Preparation (1500–1570).—It was only by a slow process that Catholic theology rose from the depths into which it had fallen. The rise of the Reformation (1517) had inflicted serious wounds on the Church, and the defection of so many priests deprived her of the natural resources on which the study of theology necessarily depends. Nevertheless the list of the loyal contains many brilliant names, and the controversial works of those times include more than one valuable monograph. It was but natural that the whole literature of this period should bear an apologetical and controversial character and should deal with those subjects which had been attacked most bitterly: the rule and sources of faith, the Church, grace, the sacraments, especially the holy Eucharist. Numerous defenders of the faith arose in the very country which had given birth to the Reformation: John Eck (d. 1543), Cochlæus (d. 1552), Staphylus (d. 1564), James of Hoogstraet (d. 1527), John Gropper (d. 1559), Albert Pighius (d. 1542), Cardinal Hosius (d. 1579), Martin Cromer (d. 1589), and Peter Canisius (d. 1597). The last-named gave to the Catholics not only his world-renowned catechism, but also a most valuable Mariology. With pride and enthusiasm we look upon England, where the two noble martyrs John Fisher, Bishop of Rochester (d. 1535), and Thomas More (d. 1535) championed the cause of the Catholic faith with their pen, where Cardinal Pole (d. 1568), Stephen Gardiner (d. 1555), and Cardinal William Allen (d. 1594), men who combined refinement with a solid education, placed their learning at the service of the persecuted Church, while the Jesuit Nicholas Saunders wrote one of the best treatises on the Church. In Belgium the professors of the University of Louvain opened new paths for the study of theology; foremost among them were: Ruardus Tapper (d. 1559), John Driedo (d. 1535), Jodocus Ravesteyn (d. 1570), John Hessels (d. 1566), John Molanus (d. 1585), and Garetius (d. 1571). To the last-named we owe an excellent treatise on the holy Eucharist. In France James Merlin, Christopher Chefontaines (d. 1595), and Gilbert Genebrard (d. 1597) rendered great services to dogmatic theology. Sylvester Pierias (d. 1523), Ambrose Catharinus (d. 1553), and Cardinal Seripandus are the boast of Italy. But, above all other countries, Spain is distinguished by a veritable galaxy of brilliant names: Alphonsus of Castro (d. 1558), Michael de Medina (d. 1578), Peter de Soto (d. 1563). Some of their works have remained classics up to our own times, as "De natura et gratia" (Venice, 1547) of Dominic Soto; "De iustificatione libri XV" (Venice, 1546) of Andrew Vega; "De locis theologicis" (Salamanca, 1563) of Melchior Cano.

(b) Second Epoch: Late Scholasticism at its Height (1570–1660).—Even in the preceding epoch the sessions of the Council of Trent (1545–1563) had exerted a beneficial influence on the character and extent of dogmatic literature. After the close of the council there sprang up everywhere a new life and a marvellous activity in theology which recalls the best days of the Patristic Era and of Scholasticism but surpasses both by the wealth and variety of its literary productions. We are not here concerned with the industry displayed in Biblical and exegetical research. But the achievements of controversial, positive, and scholastic theology deserve a passing notice.

(i) Controversial theology was carried to the highest perfection by Cardinal Bellarmine (d. 1621). There is no other theologian who has defended almost the whole of Catholic theology against the attacks of the Reformers with such clearness and convincing force. Other theologians remarkable for their masterly defence of the Catholic Faith were the Spanish Jesuit Gregory of Valencia (d. 1603) and his pupils Adam Tanner (d. 1635) and James Gretser (d. 1625), who taught in the University of Ingolstadt. To the Englishman Thomas Stapleton (d. 1598) we owe a work, unsurpassed even in our days, on the material and formal principle of Protestantism. Cardinal du Perron (d. 1618) of France successfully entered the arena against James I of England and Philip Mornay, and wrote a splendid treatise on the holy Eucharist. The eloquent pupit orator Bossuet (d. 1627) wielded his pen in refuting Protestantism from the standpoint of history. The "Præscriptiones Catholicæ", a voluminous work of the Italian Gravina (7 vols., Naples, 1619–39), possesses enduring value. Martin Becanus (d. 1624), a Belgian Jesuit, published his handy and well-known "Manuale controversiarum". In Holland the defence of religion was carried on by the two learned brothers Adrian (d. 1669) and Peter de Walemburg (d. 1675), both auxiliary bishops of Cologne and both controversialists, who easily ranked among the best. Even the distant East was represented in the two Greek converts, Peter Arcudius (d. 1640) and Leo Allatius (d. 1669).

(ii) The development of positive theology went hand in hand with the progress of research into the Patristic Era and into the history of dogma. These studies were especially cultivated in France and Belgium. A number of scholars, thoroughly versed in history, published in excellent monographs the results of their investigations into the history of particular dogmas. Morinus (d. 1659) made the Sacrament of Penance the subject of special study; Isaac Habert (d. 1668), the doctrine of the Greek Fathers on grace; Hallier (d. 1659), the Sacrament of Holy orders; Garnier (d. 1681), Pelagianism; Dechamps (d. 1701), Jansenism; Tricassinus (d. 1681), St. Augustine's doctrine on grace. Unfortunately, among the highly gifted representatives of this historico-dogmatical school were to be found men who deviated more or less seriously from the unchangeable teachings of the Catholic Church, as Baius, Jansenius the Younger, Launoy, de Marca, Dupin, and others. Though Nicole and Arnauld were Jansenists, yet their monumental work on the Eucharist, "Perpétuité de la foi" (Paris, 1669–74), has not yet lost its value. But there are two men, the Jesuit Petavius (d. 1647) and the Oratorian Louis Thomassin (d. 1695), who by their epoch-making works: "Dogmata theologica", placed positive theology on a new basis without disregarding the speculative element.

(iii) So great was the enthusiasm with which the religious orders fostered scholastic theology and brought it to perfection that the golden era of the thirteenth century seemed to have once more returned. It was no mere chance that St. Thomas and St. Bonaventure were just then proclaimed Doctors of the Church, the first by Pius V, the other by Sixtus V. By these papal acts the two greatest luminaries of the past were proposed to the theologians as models to be zealously imitated. Thomism, guarded and cherished by the Dominicans, proved [illegible] its full vitality. At the head of the Thomistic movement was Bañez (d. 1604), the first and greatest opponent of the Jesuit Molina (d. 1600). He wrote a valuable commentary on the theological "Summa" of St. Thomas, which, combined with a similar work by Bartholomew Medina (d. 1581), forms a harmonious whole. Under the leadership of Bañez a group of scholarly Dominicans took up the defence of the Thomistic doctrine on grace: Alvarez (d. 1635), de Lemos (d. 1629), Ledesma (d. 1616), Massoulié (d. 1706), Reginaldus (d. 1676), Nazarius (d. 1646), John a St. Thoma (d. 1644), Xantes Mariales (d. 1660), Gonet (d. 1681), Goudin (d. 1695), Contenson (d. 1674), and others. However, the most scholarly, profound, and comprehensive work of the Thomistic school did not come from the Dominicans, but from the Carmelites of Salamanca; it is the invaluable "Cursus Salmanticensis" (Salamanca, 1631–1712) in 15 folios, a magnificent commentary on the "Summa" of St. Thomas. The names of the authors of this immortal work have unfortunately not been handed down to posterity. Outside the Dominican Order, also, Thomism had many zealous and learned friends: the Benedictine Alphonsus Curiel (d. 1609), Francis Zumel (d. 1607), John Puteanus (d. 1623), and the Irishman Augustine Gibbon (d. 1676), who laboured in Spain and at Erfurt in Germany. The Catholic universities were active in the interest of Thomism. At Louvain William Estius (d. 1613) wrote an excellent commentary on the "Liber Sententiarum" of Peter the Lombard, which was permeated with the spirit of St. Thomas, while his colleagues Wiggers and Francis Sylvius (d. 1649) explained the theological "Summa" of the master himself. In the Sorbonne Thomism was worthily represented by men like Gammaché (d. 1625), Andrew Duval (d. 1637), and especially by the ingenious Nicholas Ysambert (d. 1624). The University of Salzburg also furnished an able work in the "Theologia scholastica" of Augustine Reding, who held the chair of theology in that university from 1645 to 1658, and died as Abbot of Einsiedeln in 1692.

The Franciscans of this epoch in no wise abandoned their doctrinal opposition to the school of St. Thomas, but steadily continued publishing commentaries on Peter the Lombard, which throughout breathe the genuine spirit of Scotism. It was especially Irish Franciscans who promoted the theological activity of their order, as Mauritius Hibernicus (d. 1603), Anthony Hickay (Hiquæus, d. 1641), Hugh Cavellus, and John Ponce (Pontius, d. 1660). The following Italians and Belgians also deserve to be mentioned: Francis de Herrera (about 1590), Angelus Vulpes (d. 1647), Philip Fabri (d. 1630), Bosco (d. 1684), and Cardinal Brancatus de Laurea (d. 1693). Scotistic manuals for use in schools were published about 1580 by Cardinal Sarnanus and by William Herincx, this latter acting under the direction of the Franciscans. The Capuchins, on the other hand, adhered to St. Bonaventure, as, e. g., Peter Trigos (d. 1593), Joseph Zamora (d. 1649), Gaudentius of Brescia (d. 1672), Marcus a Baudunio (d. 1673), and others.

But there can be no question that Scholastic theology owes most of its classical works to the Society of Jesus, which substantially adhered to the "Summa" of St. Thomas, yet at the same time made use of a certain eclectic freedom which seemed to be warranted by the circumstances of the times. Molina (d. 1600) was the first Jesuit to write a commentary on the theological "Summa" of St. Thomas. He was followed by Cardinal Toletus (d. 1596) and by Gregory of Valencia (d. 1603), mentioned above as a distinguished controversialist. A brilliant group in the Society of Jesus are the Spaniards Francis Suarez, Gabriel Vasquez, and Didacus Ruiz. Suarez (d. 1617), the most prominent among them, is also the foremost theologian that the Society of Jesus has produced. His renown is due not only to the fertility and the wealth of his literary productions, but also to his "clearness, moderation, depth, and circumspection" (Scheeben). He truly deserves the title of "Doctor eximius" which Benedict XIV gave him. In his colleague Gabriel Vasquez (d. 1604) Suarez found a critic both subtle and severe, who combined positive knowledge with depth of speculation. Didacus Ruiz (d. 1632) wrote masterly works on God and the Trinity, subjects which were also thoroughly treated by Christopher Gilles (d. 1608). Harruabal (d. 1608), Ferdinand Bastida (d. about 1609), Valentine Herice, and others are names which will forever be linked with the history of Molinism. During the succeeding period James Granado (d. 1632), John Præpositus (d. 1634), Caspar Hurtado (d. 1646), and Anthony Perez (d. 1694) won fame by their commentaries on St. Thomas. But, while devoting themselves to scientific research, the Jesuits never forgot the need of instruction. Excellent, often voluminous, manuals were written by Arriaga (d. 1667), Martin Esparza (d. 1670), Francis Amicus (d. 1651), Martin Becanus (d. 1625), Adam Tanner (d. 1632), and finally by Sylvester Maurus (d. 1687), who is not only remarkable for clearness, but also distinguished as a philosopher. Hand in hand with this more general and comprehensive literature went important monographs, embodying special studies on certain dogmatic questions. Entering the lists against Baius and his followers, Martinez de Ripalda (d. 1648) wrote the best work on the supernatural order. To Leonard Lessius (d 1623) we owe some beautiful treatises on God and His attributes. Ægidius Coninck (d. 1633) made the Trinity, the Incarnation, and the sacraments the subject of special studies. Cardinal John de Lugo (d. 1660), noted for his mental acumen and highly esteemed as a moralist, wrote on the virtue of faith and the Sacraments of Penance and the Eucharist. Claude Tiphanus (d. 1641) is the author of a classical monograph on the notions of personality and hypostasis. Cardinal Pallavicini (d. 1667), known as the historiographer of the Council of Trent, won repute as a dogmatic theologian by several of his writings.

(c) Third Epoch: Further Activity and Gradual Decline of Scholasticism (1660–1760).—While the creative and constructive work of the previous epoch still continued, though with languishing vitality, and ushered in a second spring of dogmatic literature, other currents of thought set in which gradually prepared the way for the decline of Catholic theology. Cartesianism in philosophy, Gallicanism, and Jansenism were sapping the strength of the sacred science. There was scarcely a country or nation that was not infected with the false spirit of the age. Italy alone remained immune and preserved its ancient purity and orthodoxy in matters theological.

One might have expected that, if anywhere at all, theology would be securely sheltered within the schools of the old religious orders. Yet even some of these succumbed to the evil influences of the times, losing little by little their pristine firmness and vigour. Nevertheless, it is to them that almost all the theological literature of this period and the revival of Scholasticism are due. A product of the Thomistic school, widely used and well adapted to the needs of the time, was the standard work of the Dominican Billuart (d. 1757), which with exceptional skill and taste explains and defends the Thomistic system in scholastic form. The dogmatic theology of Cardinal Gotti, however, rivals, if it does not surpass, Billuart's work, both as regards the substance and the soundness of its contents. Other Thomists produced valuable monographs: Drouin on the sacraments and Bernard de Rubeis (d. 1775) on original sin. More eclectic in their adherence to

Thomism were the Cardinals Celestine Sfondrato (d. 1696) and Aguirre (d. 1699); the latter's work "Theology of St. Anselm" in three volumes is replete with deep thought. Among the Franciscans Claudius Frassen (d. 1680) issued his elegant "Scotus academicus", a counterpart to the Thomistic theology of Billuart. Of the Scotistic School we also mention Gabriel Boyvin, Krisper (d. 1721), and Kick (d. 1769). Eusebius Amort (d. 1775), the foremost theologian in Germany, also represented a better type, combining sound conservatism with due regard for modern demands. The Society of Jesus still preserved something of its former vigour and activity. Simmonet, Ulloa (d. about 1723), and Marin were the authors of voluminous scholastic works. But now the didactical and pedagogical interests began to assert themselves, and called for numerous text-books of theology. We mention Platel (d. 1681), Antoine (d. 1743), Pichler (d. 1736), Sardagna (d. 1775), Erber, Monschein (d. 1769), and Gener. But both as regards matter and form all these text-books were surpassed by the "Theologia Wirceburgensis", which the Jesuits of Würzburg published in 1766–71. In addition to the old religious orders, we meet during this period the new school of Augustinians, who based their theology on the system of Gregory of Rimini rather than on that of Ægidius of Rome. Because of the stress they laid on the rigoristic element in St. Augustine's doctrine on grace, they were for a time suspected of Baianism and Jansenism, but were cleared of this suspicion by Benedict XIV. To this school belonged the scholarly Lupus (d. 1681) at Louvain and Cardinal Noris (d. 1704), distinguished for his subtle intellect. But its best work on dogmatic theology came from the pen of Lawrence Berti (d. 1766). His fellow-workers in the same field were Bellelli (d. 1742) and Bertieri. The French Oratory, falling from its lofty eminence, was buried in Jansenism, as the names of Quesnel, Lebrun, and Juenin sufficiently indicate.

The Sorbonne of Paris, developing the germs of Jansenism and Gallicanism, ceased to keep abreast of the time. Abstracting, however, from this fact, theology owes works of great merit to men like Louis Habert (d. 1718), du Hamel (d. 1706), L'Herminier, Witasse (d. 1716). Creditable exceptions were Louis Abelly (d. 1691) and Martin Grandin, who distinguished themselves by their loyalty to the Church. The same encomium must be said of Honoratus Tournely (d. 1729), whose "Prælectiones dogmaticæ" are numbered among the best theological text-books. A staunch opponent of Jansenism, he would certainly have challenged Gallicanism, had not the law of the realm prevented him. For the rest, the Church depended almost exclusively on Italy in its scientific combat against the pernicious errors of the time. There had gathered a chosen band of scholars who courageously fought for the purity of the faith and the rights of the papacy. In the front rank against Jansenism stood the Jesuits Dominic Viva (d. 1726), La Fontaine (d. 1728), Alticozzi (d. 1777), and Faure (d. 1779). Gallicanism and Josephinism were hard pressed by the theologians of the Society of Jesus, especially by Zaccaria (d. 1795), Muzzarelli (d. 1749), Bolgeni (d. 1811), Roncaglia, and others. The Jesuits were ably seconded by the Dominicans Orsi (d. 1761) and Mamachi (d. 1792). Another champion in this struggle was Cardinal Gerdil (d. 1802). Partly to this epoch belongs the fruitful activity of St. Alphonsus Liguori (d. 1787), whose popular rather than scientific writings energetically opposed the baneful spirit of the time.

(d) Fourth Epoch: Decay of Catholic Theology (1760–1840).—Many circumstances, both from within and from without, contributed towards the further decadence of theology which had already begun in the preceding epoch. In France it was the still powerful influence of Jansenism and Gallicanism, in the German Empire the spread of Josephinism and Febronianism that sapped the vitality of orthodox theology. The suppression of the Society of Jesus by Clement XIV in 1773 deprived theology of its ablest representatives. To these factors must be added the paralyzing influence of the "Enlightenment" which, rising through English Deism, was swelled by French Encyclopedism and finally deluged all European countries. The French Revolution and the military expeditions of Napoleon all through Europe were not without evil consequences. The false philosophy of the time (Kant, Schelling, Fichte, Hegel, Cousin, Comte, etc.), by which even many theologians were misled, engendered not only an undisguised contempt for Scholasticism and even for St. Thomas, but also fostered a shallow conception of Christianity, the supernatural character of which was obscured by Rationalism. True, the spirit of former centuries was still alive in Italy, but the unfavourable circumstances of the times impeded its growth and development. In France the Revolution and the continual campaigns paralyzed or stifled all productive activity. De Lamennais (d. 1854), the beginning of whose career had held out promises of the highest order, turned from the truth and led others astray. The Catholics of England groaned under political oppression and religious intolerance. Spain had become barren. Germany suffered from the mildew of "Enlightenment". No matter how mildly one may judge the aberrations of Wessenberg (1774–1860), Vicar-General of Constance, who had absorbed the false ideas of his age, it is certain that the movement begun by him marked a decadence in matters both ecclesiastical and scientific. But the poorer the productions of the theologians the greater their pride. They despised the old theologians, whom they could neither read nor understand. Among the few works of a better sort were the manuals of Wiest (1791), Klüpfel (1789), Dobmayer (1807), and Brenner (1826). The ex-Jesuit Benedict Stattler (d. 1797) tried to apply to dogma the philosophy of Christian Wolff, Zimmer (1802), even that of Schelling. The only work which, joining soundness with a loyal Catholic spirit, marked a return to the old traditions of the School was the dogmatic theology of Liebermann (d. 1844), who taught at Strasburg and Mainz; it appeared in the years 1819–26 and went through many editions. But even Liebermann was not able to conceal his dislike for the Scholastics. The renewed attempt of Hermes (d. 1831) of Bonn to treat Catholic theology in a Kantian spirit was no less fatal than that of Günther (d. 1863) in Vienna, who sought to unravel the mysteries of Christianity by means of a modern Gnosis and to resolve them into purely natural truths. If positive and speculative theology were ever to be regenerated, it was by a return to the source of its vitality, the glorious traditions of the past.

(e) Fifth Epoch: Restoration of Dogmatic Theology (1840–1900).—The reawakening of the Catholic life in the forties naturally brought with it a revival of Catholic theology. Germany especially, where the decline had gone farthest, showed signs of a remarkable regeneration and vigorous health. The external impulse was given by Joseph Görres (d. 1848), the "loud shouter in the fray". When the Prussian Government imprisoned Archbishop von Droste-Vischering of Cologne on account of the stand he had taken in the question of mixed marriages, the fiery appeals of Görres began to fill the hearts of the Catholics, even outside of Germany, with unwonted courage. The German theologians heard the call and once more applied themselves to the work which was theirs. Döllinger (d. 1890) developed Church history, and Möhler advanced patrology and symbolism. Both positive and speculative theology received a new lease of life, the former through Klee (d. 1840), the latter through Staudenmeier (d. 1856). At the same time men like Kleutgen (d. 1883), Werner (d. 1888), and Stöckl (d. 1895) earned for the despised Scholasticism a new place of honour by their thorough historical and systematic writings. In France and Belgium the dogmatic theology of Cardinal Gousset (d. 1866) of Reims and the writings of Bishop Malou of Bruges (d. 1865) exerted great influence. In North America the works of Archbishop Kenrick (d. 1863) did untold good. Cardinal Camille Mazzella (d. 1900) is to be ranked among the North American theologians, as he wrote his dogmatic works while occupying the chair of theology at Woodstock College, Maryland. In England the great Cardinals Wiseman (d. 1865), Manning (d. 1892), and Newman (d. 1890) became by their works and deeds powerful agents in the revival of Catholic life and in the advance of Catholic theology.

In Italy, where the better traditions had never been forgotten, far-seeing men like Sanseverino (d. 1865), Liberatore (d. 1892), and Tongiorgi (d. 1865) set to work to restore Scholastic philosophy, because it was found to be the most effective weapon against the errors of the time, i. e. traditionalism and ontologism, which had a numerous following among Catholic scholars in Italy, France, and Belgium. The pioneer work in positive theology fell to the lot of the famous Jesuit Perrone (d. 1876) in Rome. His works on dogmatic theology, scattered throughout the Catholic world, freed theology of the miasmas which had infected it. Under his leadership a brilliant phalanx of theologians, as Passaglia (d. 1887), Schrader (d. 1875), Cardinal Franzelin (d. 1886), Palmieri (d. 1909), and others, continued the work so happily begun and reasserted the right of the speculative element in the domain of theology. Eminent among the Dominicans was Cardinal Zigliara, an inspiring teacher and fertile author. Thus from Rome, the centre of Catholicism, where students from all countries foregathered, new life went forth and permeated all nations. Germany, where Baader (d. 1841), Günther, and Frohschammer (d. 1893) continued to spread their errors, shared in the general uplift and produced a number of prominent theologians, as Kuhn (d. 1887), Berlage (d. 1881), Dieringer (d. 1876), Oswald (d. 1903), Knoll (d. 1863), Denzinger (d. 1883), v. Schäzler (d. 1880), Bernard Jungmann (d. 1895), Heinrich (d. 1891), and others. But Germany's greatest theologian at this time was Joseph Scheeben (d. 1888), a man of remarkable talent for speculation. In the midst of this universal reawakening the Vatican Council was held (1870), and the Encyclical of Pope Leo XIII on the value of Scholastic, especially Thomistic, philosophy and theology was issued (1879). Both these events became landmarks in the history of dogmatic theology. An energetic activity was put forth in every branch of sacred science and is still maintained. Even though, consulting the needs of the time and the hostile situation, theologians cultivate most assiduously historical studies, such as Church history, Christian archæology, history of dogma, and history of religion, yet signs are not wanting that, side by side with positive theology, Scholasticism also will enter upon a new era of progress. History shows that periods of progress in theology always follow in the wake of great œcumenical councils. After the first Council of Nicæa (325) came the great period of the Fathers; after the Fourth Lateran Council (1215) the wonderful age of mature Scholasticism; and after the Council of Trent (1545–63) the activity of later Scholasticism. It is not too much to hope that the Vatican Council, which had to be adjourned indefinitely after a few general sessions, will be followed by a similar period of progress and splendour.

No critical history of Catholic dogma has [illegible] yet been written. In general cf. Laforêt, *Coup d'œil sur l'histoire de la Théologie dogmatique* (Louvain, 1851). Ample material is given in: Possevin, *Apparatus sacer* (3 vols., Venice, 1603–06); Du Pin, *Nouvelle Bibliothèque des auteurs ecclésiastiques* (11 vols., Paris, 1686–1714); Oudin, *Commentarius de scriptoribus ecclesiasticis* (3 vols., Leipzig, 1722); Cave, *Scriptorum ecclesiasticorum historia literaria* (2nd ed., Oxford, 1740–43); Fabricius, *Bibliotheca latina mediæ et infimæ ætatis* (5 vols., Hamburg, 1734—); Ceillier, *Histoire générale des Auteurs sacrés et ecclésiastiques* (2nd ed., 19 vols., Paris, 1858–70); Smith and Wace, *Dict. Christ. Biog.*, Michaud, *Biographie universelle ancienne et moderne* (2nd ed., 45 vols., Paris, 1842–65); Werner, *Geschichte der apologetischen und polemischen Literatur der christl. Religion* (5 vols., Schaffhausen, 1861—); Capozza, *Sulla Filosofia dei Padri e Dottori della Chiesa e in ispecialità di San Tommaso* (Naples, 1868); Willmann, *Geschichte des Idealismus* (2nd ed., 3 vols., Brunswick, 1908). An invaluable work of reference is Hurter, *Nomenclator.* With regard to the several countries cf. Tanner, *Bibliotheca Brittanico-Hibernica seu de scriptoribus, qui in Anglia, Scotia et Hibernia ad sæc. xviii initium floruerunt* (London, 1748); *Dict. Nat. Biog.* The Maurists published: *Histoire littéraire de la France* (12 vols., Paris, 1733–63), which was continued by the Institut de France (20 vols., Paris, 1814–1906); Mazzuchelli, *Gli scrittori d'Italia* (2 vols., Brescia, 1753–63); Tiraboschi, *Storia della Letteratura italiana* (13 vols., Modena, 1771–82); Krumbacher, *Geschichte der byzantinischen Literatur* (2nd ed., Munich, 1897); Wright, *A Short History of Syriac Literature* (London, 1894); Chabot, *Corpus scriptorum Christianorum orientalium* (Paris, 1903—). With regard to various religious orders cf. Ziegelbauer, *Historia rei literariæ Ordinis S. Benedicti* (4 vols., Augsburg, 1754); Tassin, *Histoire littéraire de la Congrégation de Saint-Maure* (Brussels, 1770); Wadding, *Scriptores Ordinis Minorum* (2nd ed., 2 vols., Rome, 1805); de Martigny, *La Scolastique et les traditions franciscaines* (Paris, 1888); Felder, *Geschichte der wissenschaftlichen Studien im Franziskanerorden* (Freiburg, 1904); Quétif Echard, *Scriptores Ordinis Prædicatorum* (2 vols., Paris, 1719–21); Reichert, *Monumenta Ordinis Fratrum Prædicatorum historica* (Rome, 1896—); de Villiers, *Bibliotheca, Carmelitana notis criticis et dissertationibus illustrata* (2 vols., Orléans, 1752); de Visch, *Bibliotheca scriptorum Ordinis Cisterciensis* (2nd ed., Colm, 1656); Goovaerts, *Dictionnaire bio-bibliographique des écrivains, artistes et savants de Ordre de Prémontré* (2 vols., Brussels, 1899–1907); Winter, *Die Prämonstratenser des 12. Jahrhunderts* (Berlin, 1865); Ossinger, *Bibliotheca Augustiniana historica, critica et chronologica* (Ingolstadt, 1768); Southwell, *Bibliotheca scriptorum Societatis Jesu* (Rome, 1676); Sommervogel, *Bibliothèque de la Compagnie de Jésus* (9 vols., Brussels and Paris, 1890–1900). The histories of dogma by Schwane, Harnack, Tixeront, etc., may also be consulted with profit.

With regard to the special literature of the Patristic Period, cf. Ehrhard, *Die altchristliche Literatur u. ihre Erforschung seit 1880* (2 vols., 1894–1900); Donaldson, *A Critical History of Christian Literature and Doctrine from the Death of the Apostles to the Nicene Council* (3 vols., London, 1865–66); Richardson, *The Antenicene Fathers. A Bibliographical Synopsis* (Buffalo, 1887); Cruttwell, *A Literary History of Early Christianity* (2 vols., London, 1893); Schoenemann, *Bibliotheca historico-litteraria Patrum latinorum a Tertulliano usque ad Gregorium M. et Isidorum Hispalensem* (2 vols., Leipzig, 1792–94); Harnack, *Geschichte der altchristlichen Literatur bis Eusebius* (3 vols., Leipzig, 1893–1904); Möhler, *Patrologie* (Ratisbon, 1840); Migne-Sevestre, *Dictionnaire de Patrologie* (4 vols., Paris, 1851–55); Nirschl, *Lehrbuch der Patrologie u. Patristik* (3 vols., Mainz, 1881–85); Alzog, *Grundriss der Patrologie* (4th ed., Freiburg, 1888); Fessler-Jungmann, *Institutiones Patrologiæ* (2 vols., Innsbruck, 1890–1896); Bardenhewer, *Geschichte der altkirchlichen Literatur*, I–II (Freiburg, 1902–03); Idem, *Patrologie* (3rd ed., Freiburg, 1910); Rauschen, *Grundriss der Patrologie* (3rd ed., Freiburg, 1910); Stöckl, *Geschichte der christl. Philosophie zur Zeit der Kirchenväter* (Mainz, 1891). Of great importance are also: A. Harnack u. C. Schmidt, *Texte u. Untersuchungen zur Geschichte der altchristl. Literatur* (Leipzig, 1882—); Robinson, *Texts and Studies* (Cambridge, 1891—); Hemmer-Lejay, *Textes et Documents* (Paris, 1904—).

With regard to the Middle Ages cf. especially Scheeben, *Dogmatik*, I (Freiburg, 1873) 423 sqq.; Grabmann, *Geschichte der scholastichen Methode*, I, II (Freiburg, 1909–11); Idem in Buchberger, *Kirchliches Handlexikon*, s. v. *Scholastik;* Sighardt, *Albertus Magnus, sein Leben u. seine Werke* (Ratisbon, 1857); Werner, *Der hl. Thomas von Aquin* (3 vols., Ratisbon, 1858—); Bach, *Die Dogmengeschichte des Mittelalters vom christologischen Standpunkt* (2 vols., Vienna, 1873–75); Simler, *Des sommes de théologie* (Paris, 1871). With regard to the universities cf. Bulæus, *Historia Universitatis Parisiensis* (Paris, 1665–73); Denifle, *Die Universitäten des Mittelalters*, I (Berlin, 1885); Denifle and Chatelain, *Chartularium Universitatis Parisiensis* (4 vols., Paris, 1889–97); Rashdall, *The Universities of Europe in the Middle Ages* (Oxford, 1895); Feret, *La Faculté de Théologie de Paris et ses Docteurs les plus célèbres*, I: *Moyen-âge* (4 vols., Paris, 1894–97); Robert, *Les écoles et l'enseignement de la Théologie pendant la première moitié du XII^e siècle* (Paris, 1909); Michael, *Geschichte des deutschen Volkes vom 3. Jahrh. bis zum Ausgang des Mittelalters*, II, III (Freiburg, 1899–1903); Ebert, *Allgemeine, Geschichte der Literatur des Mittelalters im Abendlande* (3 vols., Leipzig, 1874–87). With regard to Scholastic philosophy, cf. Hauréau, *Histoire de la Philosophie scolastique* (3 vols., Paris, 1872); de Wulf, *History of Medieval Philosophy*, tr. Coffey (London, 1909); Stöckl, *Geschichte der Philosophie des Mittelalters* (3 vols., Mainz, 1864–66); Bäumker in *Die Kultur der Gegenwart by* Hinneberg, I (Leipzig, 1909), 5; Denifle

AND EHRLE, *Archiv für Literatur- u. Kirchengeschichte* (7 vols., Berlin and Freiburg, 1885–1900); BÄUMKER AND VON HERTLING, *Beiträge zur Philosophie des Mittelalters* (Münster, 1891—). On mysticism cf. PREGER, *Geschichte der deutschen Mystik im Mittelalter* (3 vols., Leipzig, 1874–93); LANGENBERG, *Quellen u. Forschungen zur Geschichte der deutschen Mystik* (Leipzig, 1904); RIBET, *La Mystique divine* (4 vols., Paris, 1895—); DELACROIX, *Etudes d'histoire et de psychologie du Mysticisme* (Paris, 1908).

On modern times cf. GILLOW, *Bibl. Dict. Eng. Cath.;* FERET, *La Faculté de Théologie de Paris et ses Docteurs les plus célèbres:* II, *Epoque moderne* (3 vols., Paris, 1900–04); LAEMMER, *Vortridentinische Theologen des Reformationszeitalters* (Berlin, 1858); WERNER, *Franz Suarez u. die Scholastik der letzten Jahrhunderte* (2 vols., Ratisbon, 1860); IDEM, *Geschichte der Theologie in Deutschland seit dem Trienter Konzil bis zur Gegenwart* (2nd ed., Ratisbon, 1889); for the time of "Enlightenment" in particular, cf. RÖSCH, *Das religiöse Leben in Hohenzollern unter dem Einfluss des Wessenbergianismus* (Freiburg, 1908); IDEM, *Ein neuer Historiker der Aufklärung* (Freiburg, 1910); against him, MERKLE, *Die katholische Beurteilung des Aufklärungszeitalters* (Würzburg, 1909); IDEM, *Die kirchliche Aufklärung im katholischen Deutschland* (Würzburg, 1910); SÄGMÜLLER, *Wissenschaft u. Thomas* (1897); BELLAMY, *La théologie catholique au XIX*^{e} *siècle* (Paris, 1904).

J. POHLE.

I. a. CHRISTOLOGY.—Christology is that part of theology which deals with Our Lord Jesus Christ. In its full extent it comprises the doctrines concerning both the person of Christ and His works; but in the present article we shall limit ourselves to a consideration of the person of Christ. Here again we shall not infringe on the domain of the historian and Old-Testament theologian, who present their respective contributions under the headings JESUS CHRIST, and MESSIAS; hence the theology of the Person of Jesus Christ, considered in the light of the New Testament or from the Christian point of view, is the proper subject of the present article.

The person of Jesus Christ is the Second Person of the Most Holy Trinity, the Son or the Word of the Father, Who "was incarnate by the Holy Ghost of the Virgin Mary and was made man." These mysteries, though foretold in the Old Testament, were fully revealed in the New, and clearly developed in Christian Tradition and theology. Hence we shall have to study our subject under the triple aspect of the Old Testament, the New Testament, and Christian Tradition.

(A) *Old Testament.*—From what has been said we understand that the Old Testament is not considered here from the viewpoint of the Jewish scribe, but of the Christian theologian. Jesus Christ Himself was the first to use it in this way by His repeated appeal to the Messianic passages of the prophetic writings. The Apostles saw in these prophecies many arguments in favour of the claims and the teachings of Jesus Christ; the Evangelists, too, are familiar with them, though they appeal less frequently to them than the patristic writers do. Even the Fathers either state the prophetic argument only in general terms or they quote single prophecies; but they thus prepare the way for the deeper insight into the historical perspective of the Messianic predictions which began to prevail in the eighteenth and nineteenth centuries. Leaving the statement of the historical development of the Messianic prophecies to the writer of the article MESSIAS, we shall briefly call attention to the prophetic predictions of the genealogy of Christ, of His birth, His infancy, His names, His offices, His public life, His sufferings, and His glory.

(1) References to the human genealogy of the Messias are quite numerous in the Old Testament: He is represented as the seed of the woman, the son of Sem, the son of Abraham, Isaac, and Jacob, the son of David, the prince of pastors, the offspring of the marrow of the high cedar (Gen., iii, 1–19; ix, 18–27; xii, 1–9; xvii, 1–9; xviii, 17–19; xxii, 16–18; xxvi, 1–5; xxvii, 1–15; Num., xxiv, 15–19; II Kings, vii, 1–16; 1 Par., xvii, 1–17; Jer., xxiii, 1–8; xxxiii, 14–26; Ezech., xvii). The Royal Psalmist extols the Divine genealogy of the future Messias in the words: "The Lord hath said to me: Thou art my son, this day have I begotten thee" (Ps. ii, 7).

(2) The Prophets frequently speak of the birth of the expected Christ. They locate its place in Bethlehem of Juda (Mich., V, 2–14), they determine its time by the passing of the sceptre from Juda (Gen. xlix, 8–12), by the seventy weeks of Daniel (ix, 22–27), and by the "little while" mentioned in the Book of Aggeus (ii, 1–10). The Old-Testament seers know also that the Messias will be born of a Virgin Mother (Is., vii, 1–17), and that His appearance, at least His public appearance, will be preceded by a precursor (Is., xl, 1–11; Mal., iv, 5–6).

(3) Certain events connected with the infancy of the Messias have been deemed important enough to be the subject of prophetic prediction. Among these are the adoration of the Magi (Ps. lxxxi, 1–17), the slaughter of the innocents (Jer., xxxi, 15–26), and the flight into Egypt (Osee, xi, 1–7). It is true that in the case of these prophecies, as it happens in the case of many others, their fulfilment is their clearest commentary; but this does not undo the fact that the events were really predicted.

(4) Perhaps there is less need of insisting on the predictions of the better known Messianic names and titles, seeing that they involve less obscurity. Thus in the prophecies of Zacharias the Messias is called the Orient, or, according to the Hebrew text, the "bud" (iii; vi, 9–15), in the Book of Daniel He is the Son of Man (vii), in the Prophecy of Malachias He is the Angel of the Testament (ii, 17; iii, 6), in the writings of Isaias He is the Saviour (li, 1; lii, 12; lxii), the Servant of the Lord (xlix, 1), the Emmanuel (viii, 1–10), the Prince of peace (ix, 1–7).

(5) The Messianic offices are considered in a general way in the latter part of Isaias (lxi); in particular, the Messias is considered as prophet in the Book of Deuteronomy (xviii, 9–22); as king in the Canticle of Anna (I Kings, ii, 1–10) and in the royal song of the Psalmist (xliv); as priest in the sacerdotal type Melchisedech (Gen., xiv, 14–20) and in the Psalmist's words "a priest forever" (cix); as Goel, or Avenger, in the second part of Isaias (lxiii, 1–6); as mediator of the New Testament, under the form of a covenant of the people (Is., xlii, 1; xliii, 13), and of the light of the Gentiles (Is., xlix).

(6) As to the public life of the Messias, Isaias gives us a general idea of the fulness of the Spirit investing the Anointed (xi, 1–16), and of the Messianic work (lv). The Psalmist presents a picture of the Good Shepherd (xxii); Isaias summarizes the Messianic miracles (xxxv); Zacharias exclaims, "Rejoice greatly, O daughter of Sion", thus predicting Christ's solemn entrance into Jerusalem; the Psalmist refers to this same event when he mentions the praise out of the mouth of infants (viii). To return once more to the Book of Isaias, the prophet foretells the rejection of the Messias through a league with death (xxvii); the Psalmist alludes to the same mystery where he speaks of the stone which the builders rejected (cxvii).

(7) Need we say that the sufferings of the Messias were fully predicted by the prophets of the Old Testament? The general idea of the Messianic victim is presented in the context of the words "sacrifice and oblation thou wouldst not" (Ps. xxxix); in the passage beginning with the resolve "Let us put wood on his bread" (Jer., xi), and in the sacrifice described by the prophet Malachias (i). Besides, the series of the particular events which constitute the history of Christ's Passion has been described by the prophets with a remarkable minuteness: the Psalmist refers to His betrayal in the words "the man of my peace . . . supplanted me" (xl), and Zacharias knows of the

"thirty pieces of silver" (xi); the Psalmist praying in the anguish of his soul is a type of Christ in His agony (Ps. liv); His capture is foretold in the words "pursue and take him" and "they will hunt after the soul of the just" (Ps. lxx; xciii); His trial with its false witnesses may be found represented in the words "unjust witnesses have risen up against me, and iniquity hath lied to itself" (Ps. xxvi); His flagellation is portrayed in the description of the man of sorrows (Is., lii, 13; liii, 12) and the words "scourges were gathered together upon me" (Ps. xxxiv); the betrayer's evil lot is pictured in the imprecations of Psalm cviii; the crucifixion is referred to in the passages "What are these wounds in the midst of thy hands?" (Zach., xiii), "Let us condemn him to a most shameful death" (Wisd., ii), and "They have dug my hands and my feet" (Ps. xxi); the miraculous darkness occurs in Amos, viii; the gall and vinegar are spoken of in Ps. lxviii; the pierced heart of Christ is foreshadowed in Zach., xii. The sacrifice of Isaac (Gen., xxi, 1–14), the scapegoat (Lev., xvi, 1–28), the ashes of purification (Num., xix, 1–10), and the brazen serpent (Num., xxi, 4–9) hold a prominent place among the types prefiguring the suffering Messias. The third chapter of Lamentations is justly considered as the dirge of our buried Redeemer.

(8) Finally, the glory of the Messias has been foretold by the Prophets of the Old Testament. The context of such phrases as "I have risen because the Lord hath protected me" (Ps. iii), "My flesh shall rest in hope" (Ps. xv), "On the third day he will raise us up" (Osee, v, 15, vi, 3), "O death, I will be thy death" (Osee, xiii, 6–15a), and "I know that my Redeemer liveth" (Job, xix, 23–27) referred the devout Jewish worshipper to something more than a merely earthly restoration, the fulfilment of which began to be realized in the Resurrection of Christ. This mystery is also implied, at least typically, in the first fruits of the harvest (Lev., xxiii, 9–14) and the delivery of Jonas from the belly of the fish (Jon., ii). Nor is the Resurrection of the Messias the only element of Christ's glory predicted by the Prophets. Ps. lxvii refers to the Ascension; Joel, ii, 28–32, to the coming of the Paraclete; Is., lx, to the call of the Gentiles; Mich., iv, 1–7, to the conversion of the Synagogue; Dan., ii, 27–47, to the kingdom of the Messias as compared with the kingdom of the world. Other characteristics of the Messianic kingdom are typified by the tabernacle (Ex., xxv, 8–9; xxix, 43; xl, 33–36; Num., ix, 15–23), the mercy-seat (Ex., xxv, 17–22; Ps. lxxix, 1), Aaron the high priest (Ex., xxviii, 1; xxx, 1; 10; Num., xvi, 39–40), the manna (Ex., xvi, 1–15; Ps. lxxvii, 24–25), and the rock of Horeb (Ex., xvii, 5–7; Num., xx, 10–11; Ps. civ, 41). A Canticle of thanksgiving for the Messianic benefits is found in Is., xii.

The Books of the Old Testament are not the only source from which the Christian theologian may learn the Messianic ideas of pre-Christian Jewry. The Sibylline oracles, the Book of Enoch, the Book of Jubilees, the Psalms of Solomon, the Ascensio Moysis, the Revelation of Baruch, the Fourth Book of Esdras, and several Talmudic and Rabbinic writings are rich depositories of pre-Christian views concerning the expected Messias. Not that all of these works were written before the coming of Christ; but, though partially post-Christian in their authorship, they preserve a picture of the Jewish world of thought, dating back, at least in its outline, centuries before the coming of Christ.

(B) *New Testament.*—Some modern writers tell us that there are two Christs, as it were, the Messias of faith and the Jesus of history. They regard the Lord and Christ, Whom God exalted by raising Him from the dead, as the subject of Christian faith; and Jesus of Nazareth, the preacher and worker of miracles, as the theme of the historian. They assure us that it is quite impossible to persuade even the least experienced critic that Jesus taught, in formal terms and at one and the same time, the Christology of Paul, that of John, and the doctrines of Nicæa, of Ephesus, and of Chalcedon. Otherwise the history of the first Christian centuries appears to these writers to be quite inconceivable. The Fourth Gospel is said to lack the data which underlie the definitions of the first œcumenical councils and to supply testimony that is not a supplement, but a corrective, of the portrait of Jesus drawn by the Synoptics. These two accounts of the Christ are represented as mutually exclusive: if Jesus spoke and acted as He speaks and acts in the Synoptic Gospels, then He cannot have spoken and acted as He is reported by St. John. We shall here briefly review the Christology of St. Paul, of the Catholic Epistles, of the Fourth Gospel, and the Synoptics. Thus we shall give the reader a complete Christology of the New Testament and at the same time the data necessary to control the contentions of the Modernists. The Christology will not, however, be complete in the sense that it extends to all the details concerning Jesus Christ taught in the New Testament, but in the sense that it gives His essential characteristics taught in the whole of the New Testament.

(1) Pauline Christology.—St. Paul insists on the truth of Christ's real humanity and Divinity, in spite of the fact that at first sight the reader is confronted with three objects in the Apostle's writings: God, the human world, and the Mediator. But then the latter is both Divine and human, both God and man.

(a) Christ's Humanity in the Pauline Epistles.—The expressions "form of a servant", "in habit found as a man", "in the likeness of sinful flesh" (Phil., ii, 7; Rom., viii, 3) may seem to impair the real humanity of Christ in the Pauline teaching. But in reality they only describe a mode of being or hint at the presence of a higher nature in Christ not seen by the senses, or they contrast Christ's human nature with the nature of that sinful race to which it belongs. On the other hand the Apostle plainly speaks of Our Lord manifested in the flesh (I Tim., iii, 16), as possessing a body of flesh (Col., i, 22), as being "made of a woman" (Gal., iv, 4), as being born of the seed of David according to the flesh (Rom., i, 3), as belonging according to the flesh to the race of Israel (Rom., ix, 5). As a Jew, Jesus Christ was born under the Law (Gal., iv, 4). The Apostle dwells with emphasis on Our Lord's real share in our physical human weakness (II Cor., xiii, 4), on His life of suffering (Heb., v, 8) reaching its climax in the Passion (ibid., i, 5; Phil., iii, 10; Col., i, 24). Only in two respects did Our Lord's humanity differ from the rest of men: first in its entire sinlessness (II Cor., v, 21; Gal., ii, 17; Rom., viii, 3); secondly, in the fact that Our Lord was the second Adam, representing the whole human race (Rom., v, 12–21; I Cor., xv, 45–49).

(b) Christ's Divinity in the Pauline Epistles.—According to St. Paul, the superiority of the Christian revelation over all other Divine manifestations, and the perfection of the New Covenant with its sacrifice and priesthood, are derived from the fact that Christ is the Son of God (Heb., i, 1 sq.; v, 5 sq.; ii, 5 sq.; Rom., i, 3; Gal., iv, 4; Eph., iv, 13; Col., i, 12 sq.; ii, 9 sq.; etc.). The Apostle understands by the expression "Son of God" not a merely moral dignity, or a merely external relation to God which began in time, but an eternal and immanent relation of Christ to the Father. He contrasts Christ with, and finds Him superior to, Aaron and his successors, Moses and the Prophets (Heb., v, 4; x, 11; vii, 1–22; iii, 1–6; i, 1). He raises Christ above the choirs of angels, and makes Him their Lord and Master (Heb., i, 3; 14; ii, 2–3), and seats Him as heir of all things at the right hand of the Father (Heb., i, 2–3;

Gal., iv, 14; Eph., i, 20–21). If St. Paul is obliged to use the terms "form of God", "image of God", when he speaks of Christ's Divinity, in order to show the personal distinction between the Eternal Father and the Divine Son (Phil., ii, 6; Col., i, 15), Christ is not merely the image and glory of God (I Cor., xi, 7), but also the first-born before any created beings (Col., i, 15), in Whom, and by Whom, and for Whom all things were made (Col., i, 16), in Whom the fulness of the Godhead resides with that actual reality which we attach to the presence of the material bodies perceptible and measurable through the organs of our senses (Col., ii, 9), in a word, "who is over all things, God blessed for ever" (Rom., ix, 5).

(2) Christology of the Catholic Epistles.—The Epistles of St. John will be considered together with the other writings of the same Apostle in the next paragraph. Under the present heading we shall briefly indicate the views concerning Christ held by the Apostles St. James, St. Peter, and St. Jude.

(a) The Epistle of St. James.—The mainly practical scope of the Epistle of St. James does not lead us to expect that Our Lord's Divinity would be formally expressed in it as a doctrine of faith. This doctrine is, however, implied in the language of the inspired writer. He professes to stand in the same relation to Jesus Christ as to God, being the servant of both (i, 1): he applies the same term to the God of the Old Testament as to Jesus Christ (passim). Jesus Christ is both the sovereign judge and independent lawgiver, who can save and can destroy (iv, 12); the faith in Jesus Christ is faith in the Lord of Glory (ii, 1). The language of St. James would be exaggerated and overstrained on any other supposition than the writer's firm belief in the Divinity of Jesus Christ.

(b) Belief of St. Peter.—St. Peter presents himself as the servant and the apostle of Jesus Christ (I Pet., i, 1; II Pet., i, 1), who was predicted by the Prophets of the Old Testament in such a way that the Prophets themselves were Christ's own servants, heralds, and organs (I Pet., i, 10–11). It is the pre-existent Christ who moulds the utterances of Israel's Prophets to proclaim their anticipations of His advent. St. Peter had witnessed the glory of Jesus in the Transfiguration (II Pet., i, 16); he appears to take pleasure in multiplying His titles: Jesus Our Lord (II Pet., i, 2), our Lord Jesus Christ (ibid., i, 14, 16), the Lord and Saviour (ibid., iii, 2), our Lord and Saviour Jesus Christ (ibid., i, 1), Whose power is Divine (ibid., i, 3), through whose promises Christians are made partakers of the nature of God (ibid., i, 4). Throughout his Epistle, therefore, St. Peter feels, as it were, and implies the Divinity of Jesus Christ.

(c) Epistle of St. Jude.—St. Jude, too, introduces himself as the servant of Jesus Christ, through union with whom Christians are kept in a life of faith and holiness (1); Christ is our only Lord and Saviour (4), Who punished Israel in the wilderness and the rebel angels (5), Who will come to judgment surrounded by myriads of saints (14), and to Whom Christians look for the mercy which He will show them at His coming (21), the issue of which will be life everlasting. Can a merely human Christ be the subject of this language?

(3) Johannean Christology.—If there were nothing else in the New Testament to prove the Divinity of Christ, the first fourteen verses in the Fourth Gospel would suffice to convince a believer in the Bible of that dogma. Now the doctrine of this prologue is the fundamental idea of the whole Johannean theology. The Word made flesh is the same with the Word Who was in the beginning, on the one hand, and with the man Jesus Christ, the subject of the Fourth Gospel, on the other. The whole Gospel is a history of the Eternal Word dwelling in human nature among men.

The teaching of the Fourth Gospel is also found in the Johannean Epistles. In his very opening words the writer tells his readers that the Word of life has become manifest and that the Apostles had seen and heard and handled the Word incarnate. The denial of the Son implies the loss of the Father (I John, ii, 23), and "whosoever shall confess that Jesus is the Son of God, God abideth in him and he in God" (ibid., iv, 15). Towards the end of the Epistle the writer is still more emphatic: "And we know that the Son of God is come: and he hath given us understanding that we may know the true God, and may be in his true Son. This is the true God and life eternal" (ibid., v, 20).

According to the Apocalypse, Christ is the first and the last, the alpha and the omega, the eternal and the almighty (i, 8; xxi, 6; xxii, 13). He is the king of kings and lord of lords (xix, 16), the lord of the unseen world (xii, 10; xiii, 8), the centre of the court of heaven (v, 6); He receives the adoration of the highest angels (v, 8), and, as the object of that uninterrupted worship (v, 12), He is associated with the Father (v, 13; xvii, 14).

(4) Christology of the Synoptists.—There is a real difference between the first three Evangelists and St. John in their respective representations of our Lord. The truth presented by these writers may be the same, but they view it from different standpoints. The three Synoptists set forth the humanity of Christ in its obedience to the law, in its power over nature, and in its tenderness for the weak and afflicted; the fourth Gospel sets forth the life of Christ not in any of the aspects which belong to it as human, but as being the adequate expression of the glory of the Divine Person, manifested to men under a visible form. But in spite of this difference, the Synoptists by their suggestive implication practically anticipate the teaching of the Fourth Gospel. This suggestion is implied, first, in the Synoptic use of the title Son of God as applied to Jesus Christ. Jesus is the Son of God, not merely in an ethical or theocratic sense, not merely as one among many sons, but He is the only, the well-beloved Son of the Father, so that His sonship is unshared by any other, and is absolutely unique (Matt., iii, 17; xvii, 5; xxii, 41; cf. iv, 3, 6; Luke, iv, 3, 9); it is derived from the fact that the Holy Ghost was to come upon Mary, and the power of the Most High was to overshadow her (Luke, i, 35). Again, the Synoptists imply Christ's Divinity in their history of His nativity and its accompanying circumstances; He is conceived of the Holy Ghost (Luke, 1, 35), and His mother knows that all generations shall call her blessed, because the mighty one had done great things unto her (Luke, i, 48). Elizabeth calls Mary blessed among women, blesses the fruit of her womb, and marvels that she herself should be visited by the mother of her Lord (Luke, i, 42–43). Gabriel greets Our Lady as full of grace, and blessed among women; her Son will be great, He will be called the Son of the Most High, and of His kingdom there will be no end (Luke, i, 28, 32). As new-born infant, Christ is adored by the shepherds and the Magi, representatives of the Jewish and the Gentile world. Simeon sees in the child his Lord's salvation, the light of the Gentiles, and the pride and glory of his people Israel (Luke, ii, 30–32). These accounts hardly fit in with the limits of a merely human child, but they become intelligible in the light of the Fourth Gospel.

The Synoptists agree with the teaching of the Fourth Gospel concerning the person of Jesus Christ not merely in their use of the term *Son of God* and in their accounts of Christ's birth with its surrounding details, but also in their narratives of Our Lord's doctrine, life, and work. The very term *Son of Man*, which they often apply to Christ, is used in such a way that it shows in Jesus Christ a self-consciousness for which the human element is not something primary, but something secondary and superinduced. Often Christ is simply called Son (Matt., xi, 27:

xxviii, 20), and correspondingly He never calls the Father "our" Father, but "my" Father (Matt., xviii, 10, 19, 35; xx, 23; xxvi, 53). At His baptism and transfiguration He receives witness from heaven to His Divine Sonship; the Prophets of the Old Testament are not rivals, but servants in comparison with Him (Matt., xxi, 34); hence the title Son of Man implies a nature to which Christ's humanity was an accessory. Again, Christ claims the power to forgive sins and supports His claim by miracles (Matt., ix, 2–6; Luke, v, 20, 24); He insists on faith in Himself (Matt., xvi, 16, 17), He inserts His name in the baptismal formula between that of the Father and the Holy Ghost (Matt., xxviii, 19), He alone knows the Father and is known by the Father alone (Matt., xi, 27), He institutes the sacrament of the Holy Eucharist (Matt., xxvi, 26; Mark, xiv, 22; Luke, xxii, 19), He suffers and dies only to rise again the third day (Matt., xx, 19; Mark, x, 34; Luke, xviii, 33), He ascends into Heaven, but declares that He will be among us till the end of the world (Matt., xxviii, 20).

Need we add that Christ's claims to the most exalted dignity of His person are unmistakably clear in the eschatological discourses of the Synoptists? He is the Lord of the material and moral universe; as supreme lawgiver He revises all other legislation; as final judge He determines the fate of all. Blot the Fourth Gospel out of the Canon of the New Testament, and you still have in the Synoptic Gospels the identical doctrine concerning the person of Jesus Christ which we now draw out of the Four Gospels; some points of the doctrine might be less clearly stated than they are now, but they would remain substantially the same.

(C) *Christian Tradition.*—Biblical Christology shows that one and the same Jesus Christ is both God and man. While Christian tradition has always maintained this triple thesis that Jesus Christ is truly man, that He is truly God, and that the God-man, Jesus Christ, is one and the same person, the heretical or erroneous tenets of various religious leaders have forced the Church to insist more expressly now on the one, now on another element of her Christology. A classified list of the principal errors and of the subsequent ecclesiastical utterances will show the historical development of the Church's doctrine with sufficient clearness. The reader will find a more lengthy account of the principal heresies and councils under their respective headings.

(1) Humanity of Christ.—The true humanity of Jesus Christ was denied even in the earliest ages of the Church. The Docetist Marcion and the Priscillianists grant to Jesus only an apparent body; the Valentinians, a body brought down from Heaven. The followers of Apollinaris deny either that Jesus had any human soul at all, or that He possessed the higher part of the human soul; they maintain that the Word supplies either the whole soul in Christ, or at least its higher faculties. In more recent times it is not so much Christ's true humanity as His *real* manhood that is denied. According to Kant, the Christian creed deals with the ideal, not with the historical Jesus; according to Jacobi, it worships Jesus not as an historical person, but as a religious ideal; according to Fichte there exists an absolute unity between God and man, and Jesus was the first to see and teach it; according to Schelling, the incarnation is an eternal fact, which happened to reach in Jesus its highest point; according to Hegel, Christ is not the actual incarnation of God in Jesus of Nazareth, but the symbol of God's incarnation in humanity at large. Finally, certain recent Catholic writers distinguish between the Christ of history and the Christ of faith, thus destroying in the Christ of faith His historical reality. The New Syllabus (Proposit. 29 sq.) and the Encyclical "Pascendi dominici gregis" may be consulted on these errors.

(2) The Divinity of Christ.—Even in Apostolic times the Church regarded a denial of Christ's Divinity as eminently anti-Christian (I John, ii, 22–23; iv, 3; II John, 7). The early martyrs, the most ancient Fathers, and the first ecclesiastical liturgies agree in their profession of Christ's Divinity. Still, the Ebionites, the Theodotians, the Artemonites, and the Photinians looked upon Christ either as a mere man, though singularly enlightened by Divine wisdom; or as the appearance of an æon emanating from the Divine Being according to the Gnostic theory; or again as a manifestation of the Divine Being such as the Theistic and Pantheistic Sabellians and Patripassians admitted; or, finally, as the incarnate Word indeed, but the Word conceived after the Arian manner as a creature mediating between God and the world, at least not essentially identical with the Father and the Holy Ghost. Though the definitions of Nice and of the subsequent councils, especially of the Fourth Lateran, deal directly with the doctrine concerning the Most Holy Trinity, still they also teach that the Word is consubstantial with the Father and the Holy Ghost, and thus establish the Divinity of Jesus Christ, the Word incarnate. In more recent times, our earliest Rationalists endeavoured to avoid the problem of Jesus Christ; they had little to say of him, while they made St. Paul the founder of the Church. But the historical Christ was too impressive a figure to be long neglected. It is all the more to be regretted that in recent times a practical denial of Christ's Divinity is not confined to the Socinians and such writers as Ewald and Schleiermacher. Others who profess to be believing Christians see in Christ the perfect revelation of God, the true head and lord of the human race, but, after all, they end with Pilate's words, "Behold, the man".

(3) Hypostatic Union.—His human nature and His Divine nature are in Jesus Christ united hypostatically, i. e. united in the hypostasis or the person of the Word. This dogma too has found bitter opponents from the earliest times of the Church. Nestorius and his followers admitted in Christ one moral person, as a human society forms one moral person; but this moral person results from the union of two physical persons, just as there are two natures in Christ. These two persons are united, not physically, but morally, by means of grace. The heresy of Nestorius was condemned by Celestine I in the Roman Synod of A. D. 430 and by the Council of Ephesus, A. D. 431; the Catholic doctrine was again insisted on in the Council of Chalcedon and the second Council of Constantinople. It follows that the Divine and the human nature are physically united in Christ. The Monophysites, therefore, believed that in this physical union either the human nature was absorbed by the Divine, according to the views of Eutyches; or that the Divine nature was absorbed by the human; or, again, that out of the physical union of the two resulted a third nature by a kind of physical mixture, as it were, or at least by means of their physical composition. The true Catholic doctrine was upheld by Pope Leo the Great, the Council of Chalcedon, and the Fifth Œcumenical Council, A. D. 553. The twelfth canon of the last-named council excludes also the view that Christ's moral life developed gradually, attaining its completion only after the Resurrection. The Adoptionists renewed Nestorianism in part because they considered the Word as the natural Son of God, and the man Christ as a servant or an adopted son of God, thus granting its own personality to Christ's human nature. This opinion was rejected by Pope Adrian I, the Synod of Ratisbon, A. D. 782, the Council of Frankfort (794), and by Leo III in the Roman Synod (799). There is no need to point out that the human nature of Christ is not united with the Word, according to the Socinian and rationalistic

views. Dorner shows how widespread among Protestants these views are, since there is hardly a Protestant theologian of note who refuses its own personality to the human nature of Christ. Among Catholics, Berruyer and Günther reintroduced a modified Nestorianism; but they were censured by the Congregation of the Index (17 April, 1755) and by Pope Pius IX (15 Jan., 1857). The Monophysite heresy was renewed by the Monothelites, admitting only one will in Christ and thus contradicting the teaching of Popes Martin I and Agatho and of the Sixth Œcumenical Council. Both the schismatic Greeks and the Reformers of the sixteenth century wished to retain the traditional doctrine concerning the Word Incarnate; but even the earliest followers of the Reformers fell into errors involving both the Nestorian and the Monophysite heresies. The Ubiquitarians, for example, find the essence of the Incarnation not in the assumption of human nature by the Word, but in the divinization of human nature by sharing the properties of the Divine nature. The subsequent Protestant theologians drifted away farther still from the views of Christian tradition; Christ for them was the sage of Nazareth, perhaps even the greatest of the Prophets, whose Biblical record, half myth and half history, is nothing but the expression of a popular idea of human perfection. The Catholic writers whose views were derogatory either to the historical character of the Biblical account of the life of Christ or to his prerogatives as the God-man have been censured in the new Syllabus and the Encyclical "Pascendi dominici gregis".

A. J. Maas.

II. Moral Theology.—Moral theology is a branch of theology, the science of God and Divine things. The distinction between natural and supernatural theology rests on a solid foundation. Natural theology is the science of God Himself, in as far as the human mind can by its own efforts reach a definite conclusion about God and His nature: it is always designated by the adjective natural. Theology, without any further modification, is invariably understood to mean supernatural theology, that is, the science of God and Divine things, in as far as it is based on supernatural Revelation. Its subject-matter embraces not only God and His essence, but also His actions and His works of salvation and the guidance by which we are led to God, our supernatural end. Consequently, it extends much farther than natural theology; for, though the latter informs us of God's essence and attributes, yet it can tell us nothing about His free works of salvation. The knowledge of all these truths is necessary for every man, at least in its broad outlines, and is acquired by Christian faith. But this is not yet a science. The science of theology demands that the knowledge won through faith, be deepened, expanded, and strengthened, so that the articles of faith be understood and defended by their reasons and be, together with their conclusions, arranged systematically.

The entire field of theology proper is divided into dogmatic and moral theology, which differ in subject-matter and in method. Dogmatic theology has as its end the scientific discussion and establishment of the doctrines of faith, moral theology of the moral precepts. The precepts of Christian morals are also part of the doctrines of faith, for they were announced or confirmed by Divine Revelation. The subject-matter of dogmatic theology is those doctrines which serve to enrich the knowledge necessary or convenient for man, whose destination is supernatural. Moral theology, on the other hand, is limited to those doctrines which discuss the relations of man and his free actions to God and his supernatural end, and propose the means instituted by God for the attainment of that end. Consequently, dogmatic and moral theology are two closely related parts of universal theology. Inasmuch as a considerable number of individual doctrines may be claimed by either discipline, no sharp line of demarcation can be drawn between the subject-matter of dogma and morals. In actual practice, however, a division and limitation must be made in accordance with practical needs. Of a similar nature is the relation between moral theology and ethics. The subject-matter of natural morals or ethics, as contained in the Decalogue, has been included in positive, Divine Revelation, and hence has passed into moral theology. Nevertheless, the argumentative processes differ in the two sciences, and for this reason a large portion of the matter is disregarded in moral theology and referred to ethics. For instance, the refutation of the false systems of the modern ethicists is generally treated under ethics, especially because these systems are refuted by arguments drawn not so much from faith, as from reason. Only in as far as moral theology requires a defence of revealed doctrines, does it concern itself with false systems. However, it must discuss the various requirements of the natural law, not only because this law has been confirmed and defined by positive revelation, but also because every violation of it entails a disturbance of the supernatural moral order, the treatment of which is an essential part of moral theology.

The field of moral theology, its contents, and the boundaries which separate it from kindred subjects, may be briefly indicated as follows: moral theology includes everything relating to man's free actions and the last, or supreme, end to be attained through them, as far as we know the same by Divine Revelation; in other words, it includes the supernatural end, the rule, or norm, of the moral order, human actions as such, their harmony or disharmony with the laws of the moral order, their consequences, the Divine aids for their right performance. A detailed treatment of these subjects may be found in the second part of St. Thomas's "Summa theologica", a work still unrivalled as a treatise of moral theology.

The position of moral theology in universal theology is briefly sketched by St. Thomas in the "Summa theol.", I, Q. i, a. 7 and Q. ii in the proemium and in the prologus of I–II; likewise by Fr. Suàrez in the proemium of his commentaries on the I–II of St. Thomas. The subject-matter of the entire second part of the "Summa theol." is, man as a free agent. "Man was made after the image of God, by his intellect, his free will, and a certain power to act of his own accord. Hence, after we have spoken of the pattern, viz. of God, and of those things which proceeded from His Divine power according to His will, we must now turn our attention to His image, that is, man, inasmuch as he also is the principle of his actions in virtue of his free will and his power over his own actions." He includes all this in theology, not only because it is viewed as the object of positive Divine Revelation (I, Q. i, a. 3), but also because God always is the principal object, for "theology treats all things in their relation to God, either in as far as they are God Himself or are directed towards God as their origin or last end" (I, Q. i, a. 7). "Since it is the chief aim of theology to communicate the knowledge of God, not only as He is in Himself but also as the beginning and end of all things and particularly of rational creatures . . . , we shall speak first of God, secondly of the tendency of the rational creature towards God", etc. (I, Q. ii, proem.). These words point out the scope and the subject-matter of the moral part of theology. Suárez, who pregnantly calls this tendency of the creatures towards God "the return of the creatures to God", shows that there is no contradiction in designating man created after the image of God, endowed with reason and free will and exercising these faculties, as the object of moral theology, and God as the object of entire theology. "If we are asked to name the proximate object of moral theology, we shall undoubtedly say that it is man as a free agent, who seeks his happiness by his free actions; but if we are asked in what respect this object must be treated chiefly, we shall answer that this must be done with respect to God as his last end."

A detailed account of the wide range of moral theology may be found in the analytical index of Pars Secunda of St. Thomas's "Summa theologica". We must confine ourselves to a brief summary. The first question treats of man's last end, eternal happiness, its nature and possession. Then follows an examination of human acts in themselves and their various subdivisions, of voluntary and involuntary acts, of the moral uprightness or malice of both interior and exterior acts and their consequences; the passions in general and in particular; the habits or permanent qualities of the human soul, and the general questions about virtues, vices, and sins. Under this last title, while enquiring into the causes of sin, the author embodies the doctrine on original sin and its consequences. This portion might, however, be with equal right assigned to dogmatic theology in the stricter meaning of the word. Although St. Thomas regards sin chiefly as a transgression of the law, and in particular of the "lex æterna" (Q. ii, a. 6), still he places the chapters on the laws after the section on sin; because sin, a free human act like any other human act, is first discussed from the standpoint of its subjective principles, viz. knowledge, will, and the tendency of the will; only after this are the human actions viewed with regard to their objective or exterior principles, and the exterior principle, by which human actions are judged not merely as human, but as moral actions, either morally good or morally bad, is the law. Since morality is conceived by him as supernatural morality, which exceeds the nature and the faculties of man, Divine grace, the other exterior principle of man's morally good actions, is discussed after the law. In the exordium to Q. xc, St. Thomas states his division briefly as follows: "The exterior principle which moves us to good actions is God; He instructs us by His law and aids us with His grace. Hence we shall speak first of the law, secondly of grace."

The following volume is wholly devoted to the special questions, in the order given by St. Thomas in the prologue: "After a cursory glance at the virtues, vices, and the moral principles in general, it is incumbent on us to consider the various points in detail. Moral discussions, if satisfied with generalities, are of little value, because actions touch particular, individual things. When there is question of morals, we may consider individual actions in two ways: one, by examining the matter, i. e., by discussing the different virtues and vices; another, by inquiring into the various avocations of individuals and their states of life." St. Thomas then goes on to discuss the whole range of moral theology from both these standpoints. First, he closely scrutinizes the various virtues, keeping in view the Divine aids, and the sins and vices opposed to the respective virtues. He examines first the three Divine virtues which are wholly supernatural and embrace the vast field of charity and its actual practice; then he passes to the cardinal virtues with their auxiliary and allied virtues. The volume concludes with a discussion of the particular states of life in the Church of God, including those which suppose an extraordinary, Divine guidance. This last part, therefore, discusses subjects which specifically belong to mystical or ascetical theology, such as prophecy and extraordinary modes of prayer, but above all the active and the contemplative life, Christian perfection, and the religious state in the Church. The contents of a modern work on moral theology, as, for instance, that of Slater (London, 1909), are: Human acts, conscience, law, sin, the virtues of faith, hope, charity; the precepts of the Decalogue, including a special treatise on justice; the commandments of the Church; duties attached to particular states or offices; the sacraments, in so far as their administration and reception are a means of moral reform and rectitude; ecclesiastical laws and penalties, only in so far as they affect conscience; these laws forming properly the subject-matter of canon law, in so far as they govern and regulate the Church as an organization, its membership, ministry, the relations between hierarchy, clergy, religious orders, laity, or of spiritual and temporal authority.

One circumstance must not be overlooked. Moral theology considers free human actions only in their relation to the supreme order, and to the last and highest end, not in their relation to the proximate ends which man may and must pursue, as for instance political, social, economical. Economics, politics, social science are separate fields of science, not subdivisions of moral science. Nevertheless, these special sciences must also be guided by morals, and must subordinate their specific principles to those of moral theology, at least so far as not to clash with the latter. Man is one being, and all his actions must finally lead him to his last and highest end. Therefore, various proximate ends must not turn him from this end, but must be made subservient to it and its attainment. Hence moral theology surveys all the individual relations of man and passes judgment on political, economical, social questions, not with regard to their bearings on politics and economy, but with regard to their influence upon a moral life. This is also the reason why there is hardly another science that touches other spheres so closely as does moral theology, and why its sphere is more extensive than that of any other. This is true inasmuch as moral theology has the eminently practical scope of instructing and forming spiritual directors and confessors, who must be familiar with human conditions in their relation to the moral law, and advise persons in every state and situation.

The manner in which moral theology treats its subject-matter, must be, as in theology generally, chiefly positive, that is, drawing from Revelation and theological sources. Starting from this positive foundation, reason also comes into play quite extensively, especially since the whole subject-matter of natural ethics has been raised to the level of supernatural morals. It is true reason must be illumined by supernatural faith, but when illumined its duty is to explain, prove, and defend most of the principles of moral theology.

From what has been said it is manifest that the chief source of moral theology is Sacred Scripture and Tradition together with the teachings of the Church. However, the following points must be observed regarding the Old Testament. Not all precepts contained in it are universally valid, as many belong to the ritual and special law of the Jews. These statutes never obliged the non-Jewish world and have simply been abrogated by the New Covenant, so that now the ritual observances proper are illicit. The Decalogue, however, with the sole change in the law enjoining the celebration of the Sabbath, has passed into the New Covenant a positive Divine confirmation of the natural law, and now constitutes the principal subject matter of Christian morality. Moreover, we must remember that the Old Covenant did not stand on the high moral level to which Christ elevated the New Covenant. Jesus Himself mentions things which were permitted to the Jews "on account of the hardness of their hearts", but against which He applied again the law at first imposed by God. Hence, not everything that was tolerated in the Old Testament and its writings, is tolerated now; on the contrary, many of the usages approved and established there would be counter to Christian perfection as counselled by Christ. With these limitations the writings of the Old Testament are sources of moral theology, containing examples of and exhortations to heroic virtues, from which the Christian moralist, following in the footsteps of Christ and His Apostles, may well draw superb models of sanctity.

Apart from Sacred Scripture, the Church recognizes also Tradition as a source of revealed truths, and hence of Christian morals. It has assumed a concrete shape chiefly in the writings of the Fathers. Furthermore, the decisions of the Church must be regarded as a source, since they are based on Holy Writ and Tradition; they are the proximate source of moral theology, because they contain the final judgment about the meaning of Sacred Scripture as well as the teachings of the Fathers. These include the long list of condemned propositions, which must be considered as danger signals along the boundary between lawful and illicit, not only when the condemnation has been pronounced by virtue of the highest Apostolic authority, but also when the congregation instituted by the pope has issued a general, doctrinal decision in questions bearing on morals. What Pius IX wrote concerning the meetings of scholars in Munich in the year 1863 may also be applied here: "Since there is question of that subjection which binds all Catholics in conscience who desire to advance the interests of the Church by devoting themselves to the speculative sciences; let the members of this assembly recall that it is not sufficient for Catholic scholars to accept and esteem the above-mentioned dogmas, but that they are also obliged to submit to the decisions of the papal congregations as well as to those teachings which are, by the constant and universal consent of Catholics, so held as theological truths and certain conclusions that the opposite opinion even when not heretical, still deserves some theological censure." If this is true of the dogmatic doctrines in the strict sense of the word, we might say that it is still more true of moral questions, because for them not only absolute and infallibly certain, but also morally certain decisions must be accounted as obligatory norms.

The words of Pius IX just quoted, point to another source of theological doctrines, and hence of morals, viz., the universal teachings of the Catholic schools. For these are the channels by which the Catholic doctrines on faith and morals must be transmitted without error, and which have consequently the nature of a source. From the unanimous doctrine of the Catholic schools follows naturally the conviction of the universal Church. But since it is a dogmatic principle that the whole Church cannot err in matters of faith and morals, the consent of the various Catholic schools must offer the guarantee of infallibility in these questions.

Moral theology, to be complete in every respect, must accomplish in moral questions what dogmatic theology does in questions pertaining to dogma. The latter has to explain clearly the truths of faith and prove them to be such; it must also, as far as possible, show their accordance with reason, defend them against objections, trace their connexion with other truths, and, by means of theological argumentation, deduce further truths. Moral theology must follow the same processive questions of morals.—It is evident that this cannot be done in all branches of moral theology in such a way as to exhaust the subject, except by a series of monographs. It would take volumes to sketch but the beauty and the harmony of God's dispositions, which transcend the natural law, but which God enacted in order to elevate man to a higher plane and to lead him to his supernatural end in a future life—and yet all this is embraced in the subject of supernatural morals. Nor is moral theology confined to the exposition of those duties and virtues which cannot be shirked if man wishes to attain his last end; it includes all virtues, even those which mark the height of Christian perfection, and their practice, not only in the ordinary degree, but also in the ascetical and mystical life. Hence, it is entirely correct to designate asceticism and mysticism as parts of Christian moral theology, though ordinarily they are treated as distinct sciences.

The task of the moral theologian is by no means completed when he has explained the questions indicated. Moral theology, in more than one respect, is essentially a practical science. Its instructions must extend to moral character, moral behaviour, the completion and issue of moral aspirations, so that it can offer a definite norm for the complex situations of human life. For this purpose, it must examine the individual cases which arise and determine the limits and the gravity of the obligation in each. Particularly those whose office and position in the Church demand the cultivation of theological science, and who are called to be the teachers and counsellors, must find in it a practical guide. As jurisprudence must enable the future judge and lawyer to administer justice in individual cases, so must moral theology enable the spiritual director or confessor to decide matters of conscience in varied cases of every-day life; to weigh the violations of the natural law in the balance of Divine justice; it must enable the spiritual guide to distinguish correctly and to advise others as to what is sin and what is not, what is counselled and what not, what is good and what is better; it must provide a scientific training for the shepherd of the flock, so that he can direct all to a life of duty and virtue, warn them against sin and danger, lead from good to better those who are endowed with necessary light and moral power, raise up and strengthen those who have fallen from the moral level. Many of these tasks are assigned to the collateral science of pastoral theology; but this also treats a special part of the duties of moral theology, and falls, therefore, within the scope of moral theology in its widest sense. The purely theoretical and speculative treatment of the moral questions must be supplemented by casuistry. Whether this should be done separately, that is, whether the subject matter should be taken casuistically before or after its theoretical treatment, or whether the method should be at the same time both theoretical and casuistical, is unimportant for the matter itself; the practical feasibility will decide this point, while for written works on moral theology the special aim of the author will determine it. However, he who teaches or writes moral theology for the training of Catholic priests, would not do full justice to the end at which he must aim, if he did not unite the casuistical with the theoretical and speculative element.

What has been said so far, sufficiently outlines the concept of moral theology in its widest sense. Our next task is to follow up its actual formation and development.

Moral theology, correctly understood, means the science of supernaturally revealed morals. Hence, they cannot speak of moral theology who reject supernatural Revelation; the most they can do is to discourse on natural ethics. But to distinguish between moral theology and ethics is sooner or later to admit a science of ethics without God and religion. That this contains an essential contradiction, is plain to everyone who analyzes the ideas of moral rectitude and moral perversion, or the concept of an absolute duty which forces itself with unrelenting persistency on all who have attained the use of reason. Without God, an absolute duty is inconceivable, because there is nobody to impose obligation. I cannot oblige myself, because I cannot be my own superior; still less can I oblige the whole human race, and yet I feel myself obliged to many things, and cannot but feel myself absolutely obliged as man, and hence cannot but regard all those who share human nature with me as obliged likewise. It is plain then that this obligation must proceed from a higher being who is superior to all men, not only to those who live at present, but to all who have been and will be, nay, in a certain sense even to those who are merely possible. This superior being is the Lord of all, God. It is also plain that although this Supreme lawgiver can be known by natural reason, neither He nor His law can be sufficiently known without a revelation on His part. Hence it is that moral theology, the study of this Divine law is actually cultivated only by those who faithfully cling to a Divine Revelation, and by the sects which sever their connexion with the Church, only as long as they retain the belief in a supernatural Revelation through Jesus Christ.

Wherever Protestantism has thrown this belief overboard, there the study of moral theology as a science has suffered shipwreck. To-day it would be merely lost labour to look for an advancement of it on the part of a non-Catholic denomination. In the seventeenth and eighteenth centuries there were still men to be found who made an attempt at it. J. A. Dorner states in Herzog, "Real-Encyklopädie", IV, 364 sqq. (s. v. "Ethik"), that prominent Protestant writers upholding "theological morals" have grown very scarce since the eighteenth century. However, this is not quite correct. Of those who still cling to a positive Protestantism, we may name Martensen, who recently entered the lists with deep conviction for "Christian Ethics"; the same, though in his own peculiar manner, is done by Lemme in his "Christliche Ethik" (1905); both attribute to it a scope wider and objectively other than that of natural ethics. A few names from the seventeenth and eighteenth centuries may here suffice: Hugo Grotius (d. 1645), Pufendorf (d. 1694), and Christian Thomasius (d. 1728), all see the difference between theological and natural morals in that the former is also positive, i. e. Divinely revealed, but with the same subject matter as the latter. This last assertion could spring only from the Protestant view which has staked its all on the "fides fiducialis"; but it can hardly acknowledge a range of duties widened by Christ and Christianity. Other writers of a "theologia moralis" based on this "fides fiducialis", are Buddeus, Chr. A. Crusius, and Jerem. Fr. Reuss. A logical result of Kantianism was the denial of the very possibility of moral theology, since Kant had made autonomous reason the only source of obligation. On this point Dorner says (loc. cit.): "It is true that the autonomy and the autocracy of the moral being separates morals and religion"; he would have been nearer the mark, had he said: "they destroy all morals". Generally speaking the modern Liberal Protestants hardly know any other than autonomous morals; even when they do speak of "religious" morals, they find its last explanation in man, religion, and God or Divine Revelation being taken in their Modernistic sense, that is subjective notions of whose objective value we have no knowledge and no certainty.

This being the case, there remains only one question to be discussed: What has been the actual development and method of moral theology in the Church? and here we must first of all remember that the Church is not an educational institution or a school for the advancement of the sciences. True, she esteems and promotes the sciences, especially theology, and scientific schools are founded by her; but this is not her only, or even her chief task. She is the authoritative institution, founded by Christ for the salvation of mankind; she speaks with power and authority to the whole human race, to all nations, to all classes of society, to every age, communicates to them the doctrine of salvation unadulterated and offers them her aids. It is her mission to urge upon educated and uneducated persons alike the acceptance of truth, without regard to its scientific study and establishment. After this has been accepted on faith, she also promotes and urges, according to times and circumstances, the scientific investigation of the truth, but she retains supervision over it and stands above all scientific aspirations and labours. As a result, we see the subject matter of moral theology, though laid down and positively communicated by the Church, treated differently by ecclesiastical writers according to the requirements of times and circumstances.

In the first years of the early Church, when the Divine seed, nourished by the blood of the martyrs, was seen to sprout in spite of the chilling frosts of persecution, when, to the amazement of the hostile world, it grew into a mighty tree of heavenly plantation, there was hardly leisure for the scientific study of Christian doctrine. Hence morals were at first treated in a popular, parenetic form. Throughout the Patristic period, hardly any other method for moral questions was in vogue, though this method might consist now in a concise exposition, now in a more detailed discussion of individual virtues and duties. One of the earliest works of Christian tradition, if not the earliest after the Sacred Scripture, the "Didache" or "Teaching of the Apostles", is chiefly of a moral-theological nature. It is hardly more than a code of laws, an enlarged decalogue, to which are added the principal duties arising from the Divine institution of the means of salvation and from the Apostolic institutions of a common worship—in this respect valuable for dogmatic theology in its narrow sense. The "Pastor" of Hermas, composed a little later, is of a moral character, that is, it contains an ascetical exhortation to Christian morality and to serious penance if one should have relapsed into sin.

There exists a long series of occasional writings bearing on moral theology, from the first period of the Christian era; their purpose was either to recommend a certain virtue, or to exhort the faithful in general for certain times and circumstances. Thus, from Tertullian (d. about 240) we have: "De spectaculis", "De idololatria", "De corona militis", "De patientia", "De oratione", "De pœnitentia", "Ad uxorem", not to take into consideration the works which he wrote after his defection to Montanism and which are indeed of interest for the history of Christian morals, but cannot serve as guides in it. Of Origen (d. 254) we still possess two minor works which bear on our question, viz., "De martyrio", parenetic in character, and "De oratione", moral and dogmatic in content; the latter meets the objections which are advanced or rather reiterated even to-day against the efficacy of prayer. Occasional writings and monographs are offered to us in the precious works of St. Cyprian (d. 258); among the former must be numbered: "De mortalitate" and "De martyrio", in a certain sense also "De lapsis", though it bears rather a disciplinary and judicial character; to the latter class belong: "De habitu virginum", "De oratione", "De opere et eleemosynis", "De bono patientiæ", and "De zelo et livore". A clearer title to be classed among moral-theological books seems to belong to an earlier work, the "Pædagogus" of Clement of Alexandria (d. about 217). It is a detailed account of a genuine Christian's daily life, in which ordinary and every-day actions are measured by the standard of supernatural morality. The same author touches upon Christian morals also in his other works, particularly in the "Stromata"; but this work is principally written from the apologetic standpoint, since it was intended to vindicate the entire Christian doctrine, both faith and morals, against pagan and Jewish philosophies.

In subsequent years, when the persecutions ceased, and patristic literature began to flourish, we find not only exegetical writings and apologies written to defend Christian doctrine against various heresies, but also numerous moral-theological works, principally sermons, homilies, and monographs. First of these are the orations of St. Gregory of Nazianzus (d. 391), of St. Gregory of Nyssa (d. 395), of St. John Chrysostom (d. 406), of St. Augustine (d. 430), and above all the "Catecheses" of St. Cyril of Jerusalem (d. 386). Of St. John Chrysostom we have "De sacerdotio"; of St. Augustine, "Confessiones", "Soliloquia", "De cathechizandis rudibus", "De patientia", "De continentia", "De bono coniugali", "De adulterinis coniugiis", "De sancta virginitate", "De bono viduitatis", "De mendacio", "De cura pro mortuis gerenda", so that the titles alone suffice to give an intimation of the wealth of subjects discussed with no less unction than originality and depth of thought. A separate treatment of the supernatural morality of Christians was attempted by St. Ambrose (d. 397) in his books "De officiis", a work which, imitating Cicero's "De officiis", forms a Christian counterpart of the pagan's purely natural discussions. A work of an entirely different stamp and of larger proportions is the "Expositio in Job, seu moralium lib. XXV", of Gregory the Great (d. 604). It is not a systematic arrangement of the various Christian duties, but a collection of moral instructions and exhortations based on the Book of Job; Alzog (Handbuch der Patrologie, 92) calls it a "fairly complete repertory of morals". More systematic is his work "De cura pastorali", which was intended primarily for the pastor and which is considered even to-day a classical work in pastoral theology.

Having broadly outlined the general progress of moral theology during the Patristic era proper, we must supplement it by detailing the development of a very special branch of moral theology and its practical application. For moral theology must necessarily assume a peculiar form when its purpose is restricted to the administration of the Sacrament of Penance. The chief result to be attained was a clear notion of the various sins and their species, of their relative grievousness and importance, and of the penance to be imposed for them. In order to ensure uniform procedure, it was necessary for ecclesiastical superiors to lay down more detailed directions; this they did either of their own accord or in answer to inquiries. Writings of this kind are the pastoral or canonical letters of St. Cyprian, St. Peter of Alexandria, St. Basil of Cappadocia, and St. Gregory of Nyssa; the decretals and synodal letters of a number of popes, as Siricius, Innocent, Celestine, Leo I, etc.; canons of several œcumenical councils. These decrees were collected at an early date and used by the bishops and priests as a norm in distinguishing sins and in imposing ecclesiastical penance for them.

The ascendancy of the so-called "penitential books" dated from the seventh century, when a change took place in the practice of ecclesiastical penance. Till then it had been a time-honoured law in the Church that the three capital crimes: apostasy, murder, and adultery, were to be atoned for by an accurately determined penance, which was public at least for public sins. This atonement, which consisted chiefly in severe fasts and public, humiliating practices, was accompanied by various religious ceremonies under the strict supervision of the Church; it included four distinct stations or classes of penitents and at times lasted from fifteen to twenty years. At an early period, however, the capital sins mentioned above were divided into sections, according as the circumstances were either aggravating or attenuating, and a correspondingly longer or shorter period of penance was set down for them. When in the course of centuries, entire nations, uncivilized and dominated by fierce passions, were received into the bosom of the Church, and when, as a result, heinous crimes began to multiply, many offences, akin to those mentioned above, were included among sins which were subject to canonical penances, while for others, especially for secret sins, the priest determined the penance, its duration and mode, by the canons. The seventh century brought with it a relaxation, not indeed in canonical penance, but in the ecclesiastical control; on the other hand, there was an increase in the number of crimes which demanded a fixed penance if discipline was to be maintained; besides, many hereditary rights of a particular nature, which had led to a certain mitigation of the universal norm of penance, had to be taken into consideration; substitutes and so-called *redemptiones*, which consisted in pecuniary donations to the poor or to public utilities, gradually gained entrance and vogue; all this necessitated the drawing up of comprehensive lists of the various crimes and of the penances to be imposed for them, so that a certain uniformity among confessors might be reached as to the treatment of penitents and the administration of the sacraments.

There appeared a number of "penitential books". Some of them, bearing the sanction of the Church, closely followed the ancient canonical decrees of the popes and the councils, and the approved statutes of St. Basil, St. Gregory of Nyssa, and others; others were merely private works, which, recommended by the renown of their authors, found a wide circulation, others again went too far in their decisions and hence constrained ecclesiastical superiors either to reprehend or condemn them. A more detailed account of these works will be found in another article.

These books were not written for a scientific, but for a practical, juridical purpose. Nor do they mark an advance in the science of moral theology, but rather a standing-still, nay, even a decadence. Those centuries of migrations, of social and political upheavals, offered a soil little adapted for a successful cultivation of the sciences, and though in the ninth century a fresh attempt was made to raise scientific studies to a higher level, still the work of the subsequent centuries consisted rather in collecting and renewing treasures of former centuries than in adding to them. This is true of moral-theological questions, no less than of other scientific branches. From this stagnation theology in general and moral theology in particular rose again to new life towards the end of the twelfth and the beginning of the thirteenth century. A new current of healthy development was noticeable in moral theology and that in two directions: one in the new strength infused into the practice of the confessors, the other in renewed vigour given to the speculative portion.

With the gradual dying out of the public penances, the "penitential books" lost their importance more and more. The confessors grew less concerned about the exact measure of penances than about the essential object of the sacrament, which is the reconciliation of the sinner with God. Besides, the "penitential books" were by far too defective for teaching confessors how to judge about the various sins, their consequences and remedies. In order to meet this need, St. Raymond of Penafort wrote towards the year 1235 the "Summa de pœnitentia et matrimonio". Like his famous collection of decretals, it is a repertory of canons on various matters, i. e. important passages from the Fathers, councils, and papal decisions. More immediately adapted for actual use was the "Summa de casibus conscientiæ", which was written about 1317 by an unknown member of the Order of St. Francis at Asti in Upper Italy, and which is, therefore, known as "Summa Astensana" or "Summa Astensis". Its eight books cover the whole subject matter of moral theology and the canonical decrees, both indispensable for the pastor and confessor: Book I, the Divine commandments; II, virtues and vices; III, contracts and wills; IV–VI, sacraments, except matrimony; VII, ecclesiastical censures; VIII, matrimony. The fourteenth and fifteenth centuries produced a number of similar *summæ* for confessors; all of them, however, discarded the arrangement in books and chapters, and adopted the alphabetical order. Their value is, of course, widely different. The following are the most important and most popular among them: The "Summa confessorum" of the Dominican Johannes of Freiburg (d. 1314), which was published a few years previous to the "Summa Astensis"; its high reputation and wide circulation was due to its revision by another member of the Dominican Order, Bartholomæus of Pisa (d. 1347), who arranged it alphabetically and supplemented its canonical parts; it is commonly known as the "Summa Pisana". This work served as the foundation for the "Summa angelica", a clear and concise treatise, composed about 1476 by the Franciscan Angelus Cerletus, called "Angelus a Clavasio" after his native city, Chiavasso. Its great popularity is attested by the fact that it went through at least thirty-one editions from 1476 to 1520. A like popularity was enjoyed by the "Summa casuum" of the Franciscan, J. B. Trovamala, which appeared a few years later (1484) and, after being revised by the author himself, in 1495, bore the title of "Summa rosella". One of the last and most renowned of these *summæ* was probably the "Summa Silvestrina" of the Dominican Silvester Prierias (d. 1523), after which moral theology began to be treated in a different manner. The *summæ* here mentioned, being exclusively written for the practical use of confessors, did not spurn the more elementary form; but they represented the results of a thorough, scientific study, which produced not only writings of this kind, but also other systematic works of a profound scholarship.

The twelfth century witnessed a busy activity in speculative theology, which centred about the cathedral and monastic schools. These produced men like Hugh and Richard of St. Victor, and especially Hugh's pupil, Peter the Lombard, called the Master of the Sentences, who flourished in the cathedral school of Paris towards the middle of the century, and whose "Libri sententiarum" served for several centuries as the standard text-book in theological lecture-halls. In those days, however, when dangerous heresies against the fundamental dogmas and mysteries of the Christian faith began to appear, the moral part of the Christian doctrine received scant treatment; Peter the Lombard incidentally discusses a few moral questions, as e. g., about sin, while speaking of creation and the original state of man, or more in particular, while treating of original sin. Other questions, e. g., about the freedom of our actions and the nature of human actions in general, are answered in the doctrine on Christ, where he discusses the knowledge and the will of Christ. Even the renowned commentator of the "Sentences", Alexander of Hales, O. Min., does not yet seriously enter into Christian morals. The work of constructing moral theology as a speculative science was at last undertaken and completed by that great luminary of theology, St. Thomas of Aquin, to whose "Summa theologica" we referred above. Aside from this masterpiece, of which the second part and portions of the third pertain to morals, there are several minor works extant which bear a moral and ascetical character; the last-named branch was cultivated with extraordinary skill by St. Bonaventure of the Franciscan Order, though he did not equal the systematic genius of St. Thomas.

This and the subsequent centuries produced a number of prominent theologians, some of whom contested various doctrines of Aquinas, as Duns Scotus and his adherents, while others followed in his footsteps and wrote commentaries on his works, as Ægidius Romanus and Capreolus. Nevertheless, purely moral-theological questions were rarely made the subject of controversy during this time; a new epoch in the method of moral theology did not dawn until after the Council of Trent. However, there are two extremely fertile writers of the fifteenth century who not only exerted a powerful influence on the advancement of theology but raised the standard of practical life. They are Dionysius the Carthusian and St. Antoninus, Bishop of Florence. The former is well known for his ascetical works, while the latter devoted himself to the practice of the confessional and the ordinary work of the pastor. His "Summa theologica" belongs specially to our subject. It went through several editions, and A. Ballerini's revision of it, which appeared in 1740 at Florence, contains four folios. The third volume treats chiefly of ecclesiastical law; it discusses at great length the legal position of the Church and its penal code. A few chapters of the first volume are devoted to the psychological side of man and his actions. The remainder of the whole work is a commentary, from the purely moral standpoint, on the second part of St. Thomas's "Summa theologica", to which it constantly refers. It is not a mere theoretical explanation, but is so replete with juridical and casuistical details that it may be called an inexhaustible fountain for manuals of casuistry. How highly the practical wisdom of Antoninus was esteemed even during his lifetime, is attested by the surname "Antoninus consiliorum", Antoninus of good counsel, given to him in the Roman Breviary.

A new life was breathed into the Catholic Church by the Council of Trent. Reformation of morals gave a fresh impetus to theological science. These had gradually fallen from the high level to which they had risen at the time of St. Thomas; the desire of solid advancement had frequently given place to seeking after clever argumentations on unimportant questions. The sixteenth century witnessed a complete change. Even before the council convened, there were eminent scholars of a serious turn of mind as Thomas of Vio (usually called Cajetanus), Victoria, and the two Sotos, all men whose solid knowledge of theology proved of immense benefit to the Council itself. Their example was followed by a long series of excellent scholars, especially Dominicans and members of the newly-founded Society of Jesus. It was above all the systematic side of moral theology which was now taken up with renewed zeal. In former centuries, Peter the Lombard's "Sentences" had been the universal text-book, and more prominent theological works of subsequent ages professed to be nothing else than commentaries upon them; henceforth, however, the "Summa theologica" of St. Thomas was followed as guide in theology and a large number of the best theological works, written after the Council of Trent, were entitled "Commentarii in Summam Sti. Thomæ". The natural result was a more extensive treatment of moral questions, since these constituted by far the largest portion of St. Thomas's "Summa". Among the earliest classical works of this kind is the "Commentariorum theologicorum tomi quattuor" of Gregory of Valentia (q. v.). It is well thought out and shows great accuracy; vols. III and IV contain the explanation of the "Prima Secundæ" and the "Secunda Secundæ" of St. Thomas. This work was succeeded, at the end of the sixteenth and the beginning of the seventeenth century, by a number of similar commentaries; among them stand out most prominently those of Gabriel Vásquez, Lessius, Suárez, Becanus, and the works of Thomas Sanchez "In decalogum" as well as "Consilia moralia", which are more casuistical in their method; the commentaries of Dominic Bánez, which had appeared some time before; and those of Medina (see MEDINA, BARTHOLOMEW; PROBABILISM).

Prominent among all those mentioned is Francis Suárez, S.J., in whose voluminous works the principal questions of the "Secunda" of St. Thomas are developed with great accuracy and a wealth of positive knowledge. Almost every question is searchingly examined, and brought nearer its final solution; the most varied opinions of former theologians are extensively discussed, subjected to a close scrutiny, and the final decision is given with great circumspection, moderation, and modesty. A large folio treats the fundamental questions of moral theology in general: (1) De fine et beatitudine; (2) De voluntario et involuntario, et de actibus humanis; (3) De bonitate et malitia humanorum actuum; (4) De passionibus et vitiis. Another volume treats of "Laws"; several folio volumes are devoted to treatises which do indeed belong to morals, but which are inseparably connected with other strictly dogmatic questions about God and His attributes, viz., "De gratia divina"; they are to-day assigned everywhere to dogma proper; a third series gives the entire doctrine of the sacraments (with the exception of matrimony) from their dogmatic and moral side. Not all of the various virtues were examined by Suárez; besides the treatise on the theological virtues, we possess only that on the virtue of religion. But if any of Suárez's works may be called classical it is the last-named, which discusses in four volumes the whole subject "De religione". Within the whole range of "religio", including its notion and relative position, its various acts and practices, as prayers, vows, oaths, etc., the sins against it, there can hardly be found a dogmatic or casuistic question that has not been either solved or whose solution has not at least been attempted. Of the last two volumes one treats of religious orders in general, the other of the "Institute" of the Society of Jesus.

In the course of the seventeenth and eighteenth century, there appeared a number of similar, though conciser, works which treat moral-theological questions as a part of universal theology with the genuine spirit of Scholastic science. There are those of Tanner, Coninck, Platel, Gotti, Billuart, and many others, the mere enumeration of whom would lead us too far afield. We must, however, mention one to whom nobody can deny the honour of having advanced both speculative and practical theology, and especially practical morals, John de Lugo. Endowed with uncommon, speculative genius and clear, practical judgment, he in many instances pointed out entirely new paths towards the solution of moral questions. Speaking of his moral theology, St. Alphonsus styles him "by all odds leader after St. Thomas". The works that have come down to us are: "De fide", "De incarnatione", "De justitia et jure", "De sacramentis", viz., "De sacramentis in genere", "De baptismo et eucharistia", and "De pœnitentia". It is above all the volume "De pœnitentia" which, through its sixteenth disputation, has become the classical handbook for casuistical moral theology and particularly for the specific distinction of sins; to the same subject belong the posthumous "Responsa moralia", a collection of answers given by de Lugo in complicated cases of conscience. This is not the place to point out his eminence as a dogmatist; suffice it to say that many far-reaching questions receive original solutions, which, though not universally accepted, have yet shed considerable light on these subjects.

The method which Lugo applies to moral theological questions, may well be called mixed, that is, it is both speculative and casuistical. Such works of a mixed character now grow common, they treat the whole subject-matter of moral theology, in as far as it is serviceable for the confessor and the pastor, in this mixed manner, though they insist more on casuistry than did Lugo. A type of this kind is the "Theologia moralis" of Paul Laymann (d. 1635); in this category may also be numbered the "Theologia decalogalis" and "Theologia sacramentalis" of Sporer (d. 1683), the "Conferentiæ" of Elbel (d. 1756), and the "Theologia moralis" of Reuter (d. 1762). Almost numberless are the manuals for confessors, written in a simple casuistical form, though even these justify their conclusions by internal reasons after legitimatizing them by an appeal to external authority. They are not unfrequently the fruit of thorough, speculative knowledge and extensive reading. One of the most solid is probably the "Manuale confessariorum et pœnitentium" of Azpilcueta (1494–1586), the great canonist, commonly known as "Doctor Navarrus"; furthermore, the "Instructio sacerdotum" or "Summa casuum conscientiæ" of Cardinal Tolet (d. 1596), which was highly recommended by St. Francis of Sales. One other work must also be mentioned, viz., the so-called "Medulla theologiæ moralis" of Hermann Busenbaum (d. 1688), which has become famous on account of its very extensive use (forty editions in less than twenty years during the lifetime of the author) and the number of its commentators. Among these are included Claude Lacroix, whose moral theology is considered as one of the most valuable of the eighteenth century, and St. Alphonsus Liguori, with whom, however, an entirely new epoch of moral theology commences.

Before entering upon this new phase, let us glance at the development of the so-called systems of morals and the controversies which sprang up among Catholic scholars, as well as at the casuistical method of treating moral theology in general. For it is precisely the casuistry of moral theology around which these controversies centre, and which has experienced severe attacks in our own day. These attacks were for the most part confined to Germany. The champions of the adversaries are J. B. Hirscher (d. 1865), Döllinger, Reusch, and a group of Catholic scholars who, in the years 1901 and 1902, demanded a "reform of Catholic moral theology", though all were not moved by the same spirit. In Hirscher it was the zeal for a supposedly good cause, though he was implicated in theological errors; Döllinger and Reusch attempted to cover their defection from the Church and their refusal to acknowledge the papal infallibility by holding up to the ridicule of the world ecclesiastical conditions and affairs which they thought militated against that infallibility; the latest phase of this opposition is mainly the result of misunderstandings. In order to elucidate the accusations brought against casuistry, we use the wholly unjustifiable criticism which Hirscher launched against Scholastic theology in general in his work of 1832, "On the Relation between the Gospel and Theological Scholasticism"; it is quoted approvingly by Döllinger and Reusch (Moralstreitigkeiten, 13 sqq.):—

(1) "Instead of penetrating into the spirit which makes virtue what it is and underlies everything that is good in this world, in other words, instead of beginning with the one indivisible nature of all goodness, they begin with the material of the various moral precepts and prohibitions without adverting to where these originate, on what foundation they rest, and what is their life-giving principle." This means that Scholastics and casuists know only individual things, see nothing universal and uniform in the virtues and duties.

(2) "Instead of deriving these precepts and prohibitions from the one, individual essence of all goodness and thereby creating certainty in the moral judgments of their audience, they, rejecting principles, string 'shalt' to 'shalt', provide them with innumerable statutes and clauses, confuse and oppress the hearer by the overflowing measure of duties, half-duties, non-duties." In other words, the Scholastics oppress and confuse by an unnecessary multiplication of duties and non-duties.

(3) "It is more in accordance with the spirit of Mosaism than with that of Christianity when Christian morality is treated less as a doctrine of virtues than of laws and duties, and when by adding commandment to commandment, prohibition to prohibition, it gives us a full and shaken measure of moral rules instead of building up on the Christian spirit, deriving everything from it and pointing out all particular virtues in its light." Or briefly, casuistry promotes exterior sanctimoniousness without the interior spirit.

(4) "Those who treat morals from the standpoint of casuistry, assign an important part to the distinction between grave and light laws, grave and light duties, serious and slight transgressions, mortal and venial sins. . . . Now, the distinction between grievous and venial sins is not without a solid foundation, and if it is chiefly based on the different qualities of the will, and if, besides, the various degrees of goodness and malice are measured by the presence, e. g., of a purely good and strong will, of one less pure and less strong, of a weak, inert, impure, malicious, perverted will, then nobody will raise his voice against it. But it is wholly different when the distinction between mortal and venial sins is taken objectively, and based on the gravity and lightness of the commandments. . . . Such a distinction between mortal and venial sins, founded on the material differences of the commandments and the prohibitions, is a source of torment and anxiety for many. . . . True morality cannot be advanced through such an anxiety. . . . The mass of the people will derive only this one profit from such a method: many will refrain from what is forbidden under pain of mortal sin and will do what is commanded under the same penalty, but they will care little for what is commanded or forbidden under pain of venial sin only; on the contrary they will seek a compensation in the latter for what they sacrificed to the grave commandments. But can we call the lives of such men Christian?" In other words, casuistry falsifies the consciences by distinguishing objectively between mortal and venial sins, leads to a contempt of the latter, and renders a genuinely Christian life impossible.

It is not difficult to refute all these accusations. One glance at the "Summa theologica" of St. Thomas will prove how incorrect is the first charge that Scholasticism and casuistry know only individual good acts and individual virtues, without inquiring into the foundation common to all virtues. Before treating the individual virtues and the individual duties, St. Thomas gives us a whole volume of discussions of a general nature, of which we may note the profound speculations on the last end, the goodness and malice of human actions, the eternal law.

The second accusation, that the Scholastic casuistry confuses the mind by its mass of duties and non-duties, can only mean that the Scholastic casuistry sets these up arbitrarily and contrary to truth. The complaint can only refer to those works and lectures which aim at the instruction of the clergy, pastors, and confessors. The reader or hearer who is confused or oppressed by this "mass of duties etc." shows by this very fact that he has not the talent necessary for the office of confessor or spiritual guide, that he should therefore choose another vocation.

The third charge, directed against Judaical hypocrisy which neglects the fostering of the interior life, is refuted by every work on casuistry, however meagre, for every one of them states most emphatically that, without the state of grace and a good intention, all external works, no matter how difficult and heroic, are valueless in the sight of God. Can the necessity of the internal spirit be brought out more clearly? And even if, in some cases, the external fulfilment of a certain work is laid down as the minimum demanded by God or the Church, without which the Christian would incur eternal damnation, yet this is not banishing the internal spirit, but designating the external fulfilment as the low-water mark of morality.

Lastly, the fourth charge springs from a very grave theological error. There can be no doubt that, in judging the heinousness of sin and in distinguishing between mortal and venial sins, the subjective element must be taken into consideration. However, every compendium of moral theology, no matter how casuistical, meets this requirement. Every manual distinguishes sins which arise from ignorance, weakness, malice, without, however, labelling all sins of weakness as venial sins, or all sins of malice as mortal sins; for there are surely minor acts of malice which cannot be said to cause the death of the soul. Every manual also takes cognizance of sins which are committed without sufficient deliberation, knowledge, or freedom: all these, even though the matter be grave, are counted as venial sins. On the other hand, every manual recognizes venial and grievous sins which are such by the gravity of the matter alone. Or who would, abstracting from everything else, put a jocose lie on a par with the denial of faith? But even in these sins, mortal or venial according to their object, the casuists lay stress on the personal dispositions in which the sin was actually committed. Hence, their universal principle: the result of a subjectively erroneous conscience may be that an action which is in itself only venial, becomes a mortal sin, and vice versa, that an action which is in itself mortally sinful, that is, constitutes a grave violation of the moral law, may be only a venial sin. Nevertheless, all theologians, also casuists, consider a correct conscience a great boon and hence endeavour, by their casuistic discussions, to contribute towards the formation of correct consciences, so that the subjective estimate of the morality of certain actions may coincide, as far as possible, with the objective norm of morality.

When, lastly, various opponents of the casuistical method object that the moralist occupies himself exclusively with sins and their analysis, with the "dark side" of human life, let them remember that it is physically impossible to say everything in one breath, that, just as in many other arts and sciences, a division of labour may also be advantageous for the science of moral theology, that the particular purpose of manuals and lectures may be limited to the education of skilled confessors and that this purpose may very well be fulfilled by centring attention on the dark side of human life. Nevertheless, it must be granted that this cannot be the only purpose of moral theology: a thorough discussion of all Christian virtues and the means of acquiring them is indispensable. If at any time this part of moral theology should be pushed to the background, moral theology would become one-sided and would need a revision, not by cutting down casuistry, but by devoting more time and energy to the doctrine of virtues in their scientific, parenetical, and ascetical aspect.

In all these branches of moral theology, a great advance was noticeable at the time of the Council of Trent. That more stress was laid on casuistry in particular, finds its explanation in the growing frequency of sacramental confession. This is freely conceded by our adversaries. Döllinger and Reusch say (op. cit., 19 sqq.): "The fact that casuistry underwent a further development after the sixteenth century, is connected with further changes in the penitential discipline. From that time on the custom prevailed of approaching the confessional more frequently, regularly before Communion, of confessing not only grievous, but also venial sins, and of asking the confessor's advice for all troubles of the spiritual life, so that the confessor became more and more a spiritual father and guide." The confessor needed this schooling and scientific training, which alone could enable him to give correct decisions in complex cases of human life, to form a correct estimate of moral goodness or defect, duty or violation of duty, virtue or vice. Now, it was inevitable that the confessor should meet cases where the existence or exact measure of the obligation remained obscure even after careful examination, where the moralist was therefore confronted by the question what the final decision in these cases should be: whether one was obliged to consider oneself bound when the duty was obscure and doubtful, or how one could remove this doubt and arrive at the definite conclusion that there was no strict obligation. That the former could not be the case, but that an obligation, to exist, must first be proved, had always been known and had been variously expressed in practical rules: "In dubiis benigniora sequenda", "odiosa sunt restringenda", etc. The basic principle, however, for solving such dubious cases and attaining the certitude necessary for the morality of an action was not always kept clearly in view. To establish this universal principle, was equivalent to establishing a moral system; and the various systems were distinguished by the principle to which each adhered.

The history of Probabilism is given under this title, suffice it to say here that from the middle of the seventeenth century when the violent discussion of this question begins, the development of moral theology coincides with that of Probabilism and of other Probabilistic systems; although these systems touch only a small portion of morals and of moral truths and nothing is farther from the truth than the opinion, so wide-spread among the adversaries of Catholic morals, that Probabilism gave a new shape and a new spirit to the whole of moral theology. Probabilism and the other systems of morals are concerned only about cases which are objectively doubtful; hence they abstract entirely from the wide sphere of certain, established truths. Now, the latter class is by far the larger in moral theology also; were it not so, human reason would be in a sorry plight, and Divine providence would have bestowed little care on the noblest of its visible creatures and on their highest goods, even in the supernatural order, in which a full measure of gifts and graces was showered upon those ransomed in Christ. The certain and undoubted portion includes all the fundamental questions of Christian morals; it comprises those principles of the moral order by which the relations of man to himself, to God, to his neighbour, and to the various communities are regulated; it embraces the doctrine of the last end of man and of the supernatural means of attaining this end. There is only a comparatively small number of objectively obscure and doubtful laws or duties that appeal to Probabilism or Antiprobabilism for a decision. However, as has been said, since the middle of the seventeenth century, the interest of moral theologians centred in the question about Probabilism or Antiprobabilism.

Just as far from the truth is the second opinion of the adversaries of Probabilism, viz., that this system induces people to evade the laws and hardens them into callousness. On the contrary, to moot the question of Probabilism at all, was the sign of a severely conscientious soul. He who proposes the question at all knows and confesses by that very fact: first, that it is not lawful to act with a doubtful conscience, that he who performs an action without being firmly convinced of its being allowed, commits sin in the sight of God; secondly, that a law, above all the Divine law, obliges us to take cognizance of it and that, therefore, whenever doubts arise about the probable existence of an obligation we must apply sufficient care in order to arrive at certainty, so that a frivolous disregard of reasonable doubts is in itself a sin against the submission due to God. In spite of all this, it may happen that all our pains and inquiries do not lead us to certainty, that solid reasons are found both for and against the existence of an obligation: under these circumstances, a conscientious man will naturally ask whether he must consider himself bound by the law or whether he can, by further reflections—reflex principles, as they are called—come to the plain conclusion that there is no obligation either to do or to omit the act in question. Were we obliged to consider ourselves bound in every doubt, the result, obviously, would be an intolerable severity. But since before performing an action the final verdict of our conscience must be free from doubt, the necessity of removing in one way or another such doubts as may have arisen, is self-evident.

At first there was a lack of clearness with regard to Probabilism and the questions connected with it. Conflicting definitions of opinion, probability, and certitude, could not but cause confusion. When works on moral theology and practical manuals began to multiply, it was inevitable that some individuals should take the word "probable" in too wide or in too lax a sense, although there can be no doubt that in itself it means "something acceptable to reason", in other words, since reason can accept nothing unless it has the appearance of truth, "something based on reasons which generally lead to the truth". Hence it is that opinions were actually advanced and spread as practicable which were little in accord with the demands of the Christian Faith, and which brought down upon them the censure of the Holy See. We refer particularly to the theses condemned by Alexander VII on 24 Sept., 1665, and on 18 March, 1666, and by Innocent XI on 2 March, 1679. It is not Probabilism that must be made responsible for them, but the vagaries of a few Probabilists.

As a result of these condemnations, some theologians thought themselves obliged to oppose the system itself and to side with Probabiliorism. Previous to this turn of affairs, the Jansenists had been the most pronounced adversaries of Probabilism. But they, too, had received a setback when Innocent X condemned (31 May, 1653) in the "Augustinus" of Jansenius, then recently deceased, the proposition: "Just men, with the strength now at their disposal, cannot keep certain commandments of God, even if they wish and endeavour to do so; besides, they are without the help of grace which might make it possible for them", was taken from the work and rejected as heretical and blasphemous. Now Probabilism was least reconcilable with this Jansenistic thesis, which could be maintained the easier, the stricter the moral obligations laid upon man's conscience were and the severer the system proclaimed as solely justified was. Consequently, the adherents of the Jansenistic doctrine endeavoured to attack Probabilism, to throw suspicion on it as an innovation, to represent it even as leading to sin. The exaggerations of a few Probabilists who went too far in their laxity, gave an opportunity to the Jansenists to attack the system, and soon a number of scholars, notably among the Dominicans, abandoned Probabilism, which they had defended till then, attacked it and stood up for Probabiliorism; some Jesuits also opposed Probabilism. But by far, the majority of the Jesuit writers as well as a vast number of other orders and of the secular clergy, adhered to Probabilism. An entire century was taken up with this controversy, which probably has not its equal in the history of Catholic theology.

Fortunately, the works on either side of this controversy were not popular writings. Nevertheless, exaggerated theories caused a glaring inequality and much confusion in the administration of the Sacrament of Penance and in the guidance of souls. This seems to have been the case particularly in France and Italy; Germany probably suffered less from Rigorism. Hence it was a blessing of Divine Providence that there arose a man in the middle of the eighteenth century, who again insisted on a gentler and milder practice, and who, owing to the eminent sanctity which he combined with solid learning, and which raised him soon after his death to the honour of the altar, received the ecclesiastical approbation of his doctrine, thereby definitively establishing the milder practice in moral theology.

This man is Alphonsus Maria Liguori, who died in 1787 at the age of 91, was beatified in 1816, canonized in 1839, and declared Doctor Ecclesiæ in 1871. In his youth Liguori had been imbued with the stricter principles of moral theology; but, as he himself confesses, the experience which a missionary life extending over fifteen years gave him, and careful study, brought him to a realization of their falseness and evil consequences. Chiefly for the younger members of the religious congregation which owed its existence to his fervent zeal, he worked out a manual of moral theology, basing it on the widely used "Medulla" of the Jesuit Hermann Busenbaum, whose theses he subjected to a thorough examination, confirmed by internal reasons and external authority, illustrated by adverse opinions, and here and there modified. The work, entirely Probabilistic in its principles, was first published in 1748. Received with universal applause and lauded even by popes, it went through its second edition in 1753; edition after edition then followed, nearly every one showing the revising hand of the author; the last, ninth, edition, published during the lifetime of the saint, appeared in 1785. After his beatification and canonization his "Theologia moralis" found an even wider circulation. Not only were various editions arranged, but it almost seemed as though the further growth of moral theology would be restricted to a reiteration and to compendious revisions of the works of St. Alphonsus. An excellent critical edition of the "Theologia moralis Sti. Alphonsi" is that of Léonard Gaudé, C.SS.R. (Rome, 1905), who has verified all the quotations in the work and illustrated it with scholarly annotations.

No future work on practical moral theology can pass without ample references to the writings of St. Alphonsus. Hence it would be impossible to gain a clear insight into the present state of moral theology and its development without being more or less conversant with the system of the saint, as narrated in the article PROBABILISM. The controversy, which is still being waged about Probabilism and Æquiprobabilism, has no significance unless the latter oversteps the limits set to it by St. Alphonsus and merges into Probabiliorism. However, though the controversy has not yet been abandoned theoretically, still in every-day practice it is doubtful if there is any one who follows other rules in deciding doubtful cases than those of Probabilism. This ascendancy of the milder school in moral theology over the more rigorous gained new impetus when Alphonsus was canonized and when the Church pointed out in particular that Divine Providence had raised him up as a bulwark against the errors of Jansenism, and that by his numerous writings he had blazed a more reliable path which the guides of souls might safely follow amid the conflicting opinions either too lax or too strict. During his lifetime the saint was forced to enter several literary disputes on account of his works on moral theology; his chief adversaries were Concina and Patuzzi, both of the Dominican Order, and champions of Probabiliorism.

The last decades of the eighteenth century may well be called a period of general decadence as far as the sacred sciences, moral theology included, are concerned. The frivolous spirit of the French Encyclopedists had infected, as it were, the whole of Europe. The Revolution, which was its offspring, choked all scientific life. A few words about the state of moral theology during this period may suffice. Italy was torn asunder by the dispute about Rigorism and a milder practice; in France, Rigorism had received the full rights of citizenship through the Jansenistic movement and held its own till late in the nineteenth century; Germany was swayed by a spirit of shallowness which threatened to dislodge Christian morals by rationalistic and natural principles. The "general seminaries" which Joseph II established in the Austrian states, engaged professors who did not blush to advance heretical doctrines and to exclude Christian self-restraint from the catalogue of moral obligations. Other German institutions, too, offered their chairs of theology to professors who had imbibed the ideas of "enlightenment", neglected to insist on Catholic doctrines of faith and, putting aside the supernatural life, sought the end and aim of education in a merely natural morality. But in the second decade of the nineteenth century the French Revolution had spent itself, quiet had again followed the turmoil, the political restoration of Europe had been begun. A restoration also of the ecclesiastical spirit and learning was also inaugurated and the gradual rise of moral theology became noticeable. Apart from the purely ascetical side, there are three divisions in which this new life was plainly visible: catechism, popular instruction, pastoral work.

Though it is the purpose of catechetical teaching to instruct the faithful in the entire range of Christian religion, in the doctrines of faith no less than in those of morals, yet the former may also be conceived and discussed with respect to the duties and the way by which man is destined to obtain his last end. Hence, the catechetical treatment of religious questions may be regarded as a portion of moral theology. During the period of "enlightenment", this branch had been degraded to a shallow moralizing along natural lines. But that it rose again in the course of the past century to a lucid explanation of the sum-total of the Christian doctrine, is attested by numerous excellent works, both catechisms and extensive discussions. To these may be added the more thorough manuals of Christian doctrine intended for higher schools, in which the apologetical and moral portions of religious instruction are treated scientifically and adapted to the needs of the time. There is nothing, however, which prevents us from placing these writings in the second of the above-mentioned classes, since their aim is the instruction of the Christian people, though principally the educated laymen. It is true these works belong exclusively, even less than the catechetical, to moral theology, since their subject-matter embraces the whole of the Christian doctrine, yet the morally destructive tendencies of Atheism and the new moral questions brought forward by the conditions of our times, impressed upon writers the importance of moral instruction in manuals of Catholic faith. The last decades in particular prove that this side of theology has been well taken care of. Various questions bearing on Christian morals were extensively treated in monographs, as e. g., the social question, the significance of money, the Church's doctrine on usury, the woman question, etc. To quote single works or to enter on the different subjects in detail would exceed the limits of this article.

The third line along which we noted an advance was called the pastoral, that is, instruction which has as its special aim the education and aid of pastors and confessors. That this instruction is necessarily, though not exclusively, casuistic, was mentioned above. The scarcity of priests, which was keenly felt in many places, occasioned a lack of time necessary for an all-round scientific education of the candidates for the priesthood. This circumstance explains why scientific manuals of moral theology, for decades, were merely casuistic compendia, containing indeed the gist of scientific investigations, but lacking in scientific argumentation. The correctness of ecclesiastical doctrine had been insured and facilitated by the approbation with which the Church distinguished the works of St. Alphonsus. Hence, many of these compendia are nothing else than recapitulations of St. Alphonsus's "Theologia moralis", or, if following a plan of their own, betray on every page that their authors had it always ready at hand. Two works may here find mention which enjoyed a wider circulation than any other book on moral theology and which are frequently used even to-day: the Scavini's "Theologia moralis universa", and the shorter "Compendium theologiæ moralis" by Jean-Pierre Gury, together with the numerous revisions which appeared in France, Germany, Italy, Spain, and North America.

We must not, however, deceive ourselves by concluding that, owing to the ecclesiastical approbation of St. Alphonsus and his moral writings, moral theology is now settled forever and, so to speak, crystallized. Nor does this approbation assure us that all individual questions have been solved correctly, and therefore the discussion of certain moral questions remains still open. The Apostolic See itself, or rather the Sacred Penitentiary, when asked, "Whether a professor of moral theology may quietly follow and teach the opinions which St. Alphonsus Liguori teaches in his Moral Theology", gave indeed an affirmative answer on 5 July, 1831; it added, however, "but those must not be reprehended who defend other opinions supported by the authority of reliable doctors". He who would conclude the guarantee of absolute correctness from the ecclesiastical approbation of the saint's works, would make the Church contradict herself. St. Thomas of Aquin was at least as solemnly approved for the whole field of theology as St. Alphonsus for moral theology. Yet, e. g, on the subject of the efficacy of grace, which enters deeply into morals, St. Thomas and St. Alphonsus defend wholly contradictory opinions; both cannot be right, and so may be freely discussed. The same may be said of other questions. In our own days, Antonio Ballerini above all made a simple use of this freedom of discussion, first in his annotations to Gury's "Compendium", then in his "Opus theologicum morale", which was recast and edited after his death by Dominic Palmieri. It rendered an eminent service to casuistry; for though we cannot approve of everything, yet the authority of various opinions has been carefully sifted and fully discussed.

Lately, attempts have been made to develop moral theology along other lines. The reformers assert that the casuistical method has choked every other and that it must give place to a more scientific, systematic treatment. It is evident that a merely casuistical treatment does not come up to the demands of moral theology, and as a matter of fact, during the last decades, the speculative element was more and more insisted on even in works chiefly casuistic. Whether the one or the other element should prevail, must be determined according to the proximate aim which the work intends to satisfy. If there is question of a purely scientific explanation of moral theology which does not intend to exceed the limits of speculation, then the casuistical element is without doubt speculative, systematic discussion of the questions belonging to moral theology; casuistry then serves only to illustrate the theoretical explanations. But if there is question of a manual which is intended for the practical needs of a pastor and confessor and for their education, then the solid, scientific portion of general moral-theological questions must be supplemented by an extensive casuistry. Nay, when time and leisure are wanting to add ample theoretical explanations to an extensive casuistical drill, we should not criticize him who would under these circumstances insist on the latter at the expense of the former; it is the more necessary in actual practice.

III. Pastoral Theology, the science of the care of souls. This article will give the definition of pastoral theology, its relations to other theological sciences, its history, sources, and contents.

A. *Definition.*—Pastoral theology is a branch of practical theology; it is essentially a practical science. All branches of theology, whether theoretical or practical, purpose in one way or another to make priests "the ministers of Christ, and the dispensers of the mysteries of God" (I Cor., iv, 1). Pastoral theology presupposes other various branches; accepts the apologetic, dogmatic, exegetic, moral, juridical, ascetical, liturgical, and other conclusions reached by the ecclesiastical student, and scientifically applies these various conclusions to the priestly ministry.

B. *Relation to Other Theological Sciences.*—Dogmatic theology establishes the Church as the depository of revealed truth and systematizes the deposit of faith which Christ entrusted to His Church to hand down to all generations; pastoral theology teaches the priest his part in this work of Catholic and Christian tradition of revealed truth. Moral theology explains the laws of God and of the Church, the means of grace and hindrances thereto; pastoral theology teaches the practical bearing of these laws, means, and hindrances upon the daily life of the priest, alone and in touch with his people. Canon law collects, correlates, and co-ordinates the laws of the Church; pastoral theology applies those laws to the care of souls. In brief, pastoral theology begins where the other theological sciences leave off; takes the results of them all and makes these results effective for the salvation of souls through the ministry of the priesthood established by Christ.

C. *History.*—The name pastoral theology is new;

the science is as old as the Church itself, as appears from the manifold instructions given by Jesus to His Apostles for the care of souls (Matt., x, 6 sqq.; Mark, vi, 8 sqq.; Luke, ix, 3 sqq.; x, 4 sqq.; xxii, 35) and from the pastoral letters of St. Paul and the very detailed instructions they give to Timothy and to Titus in regard to the sacred ministry. The writings of the Fathers, from the Apostolic age onward, are replete with pastoral instruction. St. Ignatius of Antioch [A. D. 110 (Harnack)] scatters such advice throughout his epistles—see, for instance, "Ad Magnesios" (Harnack's ed., "Patres apostolici", II, 29). The letters of St. Cyprian (A. D. 248) are, many of them, either wholly or in part written about the care of souls (cf. P. L., IV, 194 sq.)—"Qui Antistites in ecclesia eligendi?" "Qualis esse debeat vita sacerdotum?" etc. His "De lapsis" (P. L., IV, 477) is a classic among pastoral instructions. St. Gregory Nazianzen (A. D. 389), explaining his flight to Pontus, tells his ideas of the pastor of souls in "Oratio apologetica de fuga sua", a work sometimes called "De sacerdotio" (P. G., XXXV, 408), and sets down pastoral care as a great science and art, "Ars quædam artium et scientia scientiarum mihi esse videtur hominem regere". Other landmarks in the history of pastoral theology are St. Ambrose, "De officiis ministrorum" (P. L., XVI, 25); St. John Chrysostom, "De sacerdotio" (P. G., XLVIII, 623); St. Isidore of Seville, "De institutione clericorum", "De institutionibus monachorum", "De regulis clericorum" (P. L., LXXXIV, 25, 45, 77); St. Bernard's letters and treatises "De consideratione", "De moribus episcoporum", "De conversione ad clericos" (P. L., CLXXXII, 727, 809, 833). The great classic among patristic works on the care of souls is "Regulæ pastoralis liber" (P. L., LXXVII, 13), written by St. Gregory the Great (c. A. D. 590) to John, Bishop of Ravenna.

During the Middle Ages, there was not yet a separated and systematized science of pastoral theology. Scholasticism did not recognize this science apart from other branches of theology. Dogma and moral were so taught as to include the application of their conclusions to the care of souls. Still, even then writings of the great Doctors of the Church were at times purely pastoral; such were the "Opuscula", 17–20, of St. Thomas Aquinas; St. Bonaventure's "De sex alis seraphim", "De regimine animæ", "Confessionale"; the "Summa theologica" (Books II, III), together with the "Summa confessionalis" of St. Antoninus, Bishop of Florence. At the same time, writers on mystical theology (see V. MYSTICAL THEOLOGY) have often entered into the domain of pastoral theology. Not until the period of the Counter-Reformation did the science of pastoral theology take its present systematized form. During the latter half of the fifteenth century, in certain places, pastoral duties were very much neglected. By the dawn of the sixteenth century, the care of souls was to many priests and not a few bishops a lost or a never-acquired art, with the result that the laity were ready to throw off what was deemed to be a useless clerical yoke. In such places, a reform of the clergy was sorely needed. The Council of Trent set itself to bring about a true reformation of the priesthood. Catholic bishops and theologians followed the lead of the council. The result was the treatment of the care of souls as a science by itself. During the following centuries of true reform and of battle with false reform, the most scientific treatises on pastoral duties and rights were written. John of Avila, Louis of Granada, Peter de Soto, Claude le Jay (Institutiones practicæ), Neumayr (Vir apostolicus), Possevin (Praxis curæ pastoralis), Segneri, Olier, Molina, Toledo (De instructione sacerdotum), Cardinal Cajetan, St. Charles Borromeo (Instructio pastorum), the works of St. Francis de Sales, of Rodriguez, of Scaramelli—such are a few of the scientific treatises that did much to illumine and to strengthen the pastors of the Counter-Reformation. In 1759 St. Alphonsus Liguori issued his great pastoral theology, "Homo apostolicus". He epitomized the conclusions reached by him in his "Moral Theology", applied these conclusions practically to the work of hearing confessions, and added four appendices bearing specifically upon such pastoral duties as the direction of souls, the assistance of the dying, the examination of those to be ordained priests, and the duties of confessors and pastors in regard to their own as well as their flock's sanctification. This work, together with the legislation of Benedict XIV in the matter of diocesan synods, gave a great impetus to the science of pastoral theology.

D. *Sources.*—Tradition and Holy Writ, in so far as they portray the ideal Priest, Teacher, and Pastor, and hand down to us His ideas for the care of souls, are the first sources of pastoral theology. As evidence of Tradition the decrees of general councils are of the highest moment. Next come pontifical Constitutions—Bulls, Briefs, and Motu Proprios; decrees of Roman Congregations; the works cited in Sanford-Drum, op. cit. below; the various sources of dogmatic and moral theology and of canon law, in so far as they bear directly or indirectly upon the care of souls. Decrees of various provincial councils and diocesan synods together with pastoral letters of archbishops and bishops are also among the sources whence pastoral theology draws. For ecclesiastical legislation, one must follow the "Acta Apostolicæ Sedis", a monthly official bulletin published in Rome; the promulgation of laws, authentic interpretations, decisions and rescripts of the Roman Curia is now effected *ipso facto* by publication in this periodical. For past decisions, the various *decreta authentica* of different Roman Congregations must be consulted. Such are "Thesaurus resolutionum Sacræ Congregationis Concilii", from 1718 (Rome); "Decreta authentica Congregationis Sacrorum Rituum" (Rome, 1898); "Decreta authentica sacræ Congregationis Indulgentiis Sacrisque Reliquiis Præpositæ", from 1668 to 1882 (Ratisbon); Pallottini, "Collectio omnium decretorum Sacræ Congregationis Concilii" (Rome, 1868); Bizarri, "Collectanea Sacræ Congregationis Episcoporum et Regularium" (Rome, 1863, 1885); "Collectanea Sacræ Congregationis de Propaganda Fide" (Rome, 1893, 1907). A handy reference work in this matter is Ferraris, "Prompta bibliotheca", together with its supplement edited by Bucceroni (Rome, 1885). Ojetti, "Synopsis rerum moralium et juris pontificii" (Prato, 1904), is also useful. For the pastoral care of religious communities, necessary information may be obtained from Vermeersch, "De religiosis et missionariis supplementa et monumenta", together with the periodical supplements thereto (Bruges, 1904—), and Dom Bastien, "Constitution de Léon XIII sur les instituts à vœux simples et leur relations avec les autorités diocésaines" (Bruges), a work which has been translated into English by Lanslots (Pustet, New York). Periodicals giving current direction and information as to the care of souls are: "Acta Sanctæ Sedis" (Rome, from 1865), now discontinued; "Analecta juris pontificii" (Rome, 1833; Paris, 1869), replaced by "Analecta ecclesiastica" (Rome, 1893–1911); "Il Monitore Ecclesiastico" (Rome, 1876); "The American Ecclesiastical Review" (Philadelphia, 1889); "The Irish Ecclesiastical Record" (Dublin, 1865); "Nouvelle Revue Théologique" (Tournai, 1869); "Theologischpraktische Quartalschrift" (Linz); "Zeitschrift für katholische Theologie" (Innsbruck, 1877).

E. *Contents.*—From the days when St. Gregory the Great wrote his classic "Regulæ pastoralis liber", the duties that make for the care of souls have been conveniently divided into those of the teacher, of the minister of the sacred mysteries, and of the shepherd; pastoral theology purposes to impart the knowledge of these duties and of the treatise known as "pastoral medicine", the medical knowledge requisite for the proper care of souls.

Under the head of teacher are treated the duty of teaching, the qualities of the teacher, his training, the models of teaching left us by the Fathers and Doctors of the Church, as well as by distinguished preachers and catechists, and the occasions and forms of instruction suited for the various needs of the faithful, young and old, literate and illiterate. The Council of Trent, in the fifth session, lays down a twofold duty of the teacher, to preach on Sundays and festivals, and to give catechetical instruction to children and to others who have need of such instruction. Benedict XIV, in his Constitution, "Etsi Minime", calls special attention to this latter most important duty. Pius X, in his Encyclical on the teaching of Christian doctrine (15 April, 1905), insists once again on the paramount need of catechetical instruction. All parish priests, and all others to whom the care of souls is committed, must teach the catechism to their young girls and boys for the space of one hour on all Sundays and holy days of the year without exception, and must explain to them what one is bound to believe and practise in order to be saved. These children shall, at stated times during each year, be prepared by more extended instruction for the Sacraments of Penance and Confirmation. Daily instruction during Lent, and even after Easter, will make the young children of both sexes ready for their first Holy Communion. Moreover, an hour every Sunday and holy day shall be devoted to the catechetical instruction of adults. This lesson in catechism, in plain and simple language, is to be given over and above the Sunday homily on the Gospel and the children's instruction in Christian doctrine.

As minister of the sacred mysteries, the priest must not only know the nature of the sacraments, so far as dogmatic theology explains it, besides what is needed for their valid administration, as taught in moral theology, but must also possess such additional knowledge as may serve him in his spiritual ministrations—for instance, in attending the sick, in advising what is lawful or unlawful in critical operations, especially in such as may affect childbirth; in directing others, when necessary, how to baptize the unborn child; in deciding whether to confer extreme unction or other sacraments in cases of apparent death, etc.

Finally, as pastor, a variety of duties have to be mastered, which keep growing and varying in number constantly with the complicated conditions of modern life, especially wherever there is a tendency to mass people together in large cities, or wherever migration to and fro causes frequent change. This, perhaps, is the main part of pastoral theology. The organization of parishes; the maintenance of a church and other institutions that grow up around it; the management of parish schools; the formation of societies for men and women, young and old; the vast number of social works into which a priest in a modern city is almost necessarily drawn—all these points furnish material for instruction, which, as the fruit of experience, can rarely be conveyed through books. Usually the priest acquires sufficient knowledge of all these things from prudent directors as he goes through his seminary course, or from his own experience under a competent pastor; but gradually an extensive literature on these subjects has accumulated during the past half century, and it is the systematization of such writings that constitutes pastoral theology.

The chief authorities down to the time of St. Alphonsus, *Homo apostolicus* (1759), have already been mentioned in the body of the article. Since (1759) have appeared the *Pastoral Theologies* of Gollowitz-Wiedemann (Ratisbon, 1836); Amberger (1850); Stang (New York, 1897); Schulze (Milwaukee, 1906); Alberti (Rome, 1901–1904); Poey (Montrejeau, 1912); Neumayr, ed. De Auer, *Vir Apostolicus* (Schaffhausen, 1853); Reuter, ed. Lehmkuhl, *Neo-confessarius* (Freiburg im Br., 1905); Zenner, *Instructio practica confessarii* (Vienna, 1840); Frassinetti, *Parish Priests' Manual;* Berardi, *Praxis confessarii* (Faenza, 1899); Heuser, *The Parish Priest on Duty* (New York); Krieg, *Wissenschaft der Seelenleitung* (Freiburg im Br.). For questions on pastoral medicine, the following works are of use: Eschbach, *Disputationes physiologico-theologicæ* (Rome, 1901); Antonelli, *De conceptu impotentiæ et sterilitatis relate ad matrimonium* (Rome, 1900); Debreyne-Ferrand, *La théologie morale et les sciences medicales* (Paris, 1884); Surbled, *La morale dans ses rapports avec la médicine et l'hygiène* (Paris, 1897); *Pastoral Medicine* by Stöhr (Freiburg im Br., 1878); von Olfers (Freiburg im Br., 1881); Capellmann (Aachen, 1901); O'Malley and Walsh (New York, 1907); Sanford-Drum (New York, 1905); Antonelli (Rome, 1909).

WALTER DRUM.

ASCETICAL THEOLOGY.—Ascetics, as a branch of theology, may be briefly defined as the scientific exposition of Christian asceticism. Asceticism (ἄσκησις, ἀσκεῖν), taken in its literal signification, means a polishing, a smoothing or refining. The Greeks used the word to designate the exercises of the athletes, whereby the powers dormant in the body were developed and the body itself was trained to its full natural beauty. The end for which these gymnastic exercises were undertaken was the laurel-wreath bestowed on the victor in the public games. Now the life of the Christian is, as Christ assures us, a struggle for the kingdom of heaven (Matt., xi, 12). To give his readers an object-lesson of this spiritual battle and moral endeavour, St. Paul, who had been trained in the Greek fashion, uses the picture of the Greek pentathlon (I Cor., ix, 24). The exercises to be assumed in this combat tend to develop and strengthen the moral stamina, while their aim is Christian perfection leading up to man's ultimate end, union with God. Human nature having been weakened by original sin and ever inclining toward what is evil, this end cannot be reached except at the price of overcoming, with God's grace, many and serious obstacles. The moral struggle then consists first of all in attacking and removing the obstacles, that is the evil concupiscences (concupiscence of the flesh, concupiscence of the eyes, and pride of life), which effects of original sin serve to try and test man (Trid., Sess. V, De peccato originali). This first duty is called by the Apostle Paul the putting off of "the old man" (Eph., iv, 22). The second duty, in the words of the same Apostle, is to "put on the new man" according to the image of God (Eph., iv, 24). The new man is Christ. It is our duty then to strive to become like unto Christ, seeing that He is "the way, and the truth, and the life" (John, xiv, 6), but this endeavour is based on the supernatural order and, therefore, cannot be accomplished without Divine grace. Its foundation is laid in baptism, whereby we are adopted as sons of God through the imparting of sanctifying grace. Thenceforth, it must be perfected by the supernatural virtues, the gifts of the Holy Ghost, and actual grace. Since, then, ascetics is the systematic treatise of the striving after Christian perfection, it may be defined as the scientific guide to the acquisition of Christian perfection, which consists in expressing within ourselves, with the help of Divine grace, the image of Christ, by practising the Christian virtues, and applying the means given for overcoming the obstacles. Let us subject the various elements of this definition to a closer examination.

A. *Nature of Christian Perfection.*—(1) To begin with, we must reject the false conception of the Protestants who fancy that Christian perfection, as understood by Catholics, is essentially negative asceticism (cf. Seberg in Herzog-Hauck, "Realencyklopädie für prot. Theologie", III, 138), and that the correct notion of asceticism was discovered by the Reformers. There can be no doubt as to the Catholic position, if we but hearken to the clear voices of St. Thomas and St. Bonaventure. For these masters of Catholic theology, who never tired of repeating that the ideal of asceticism upheld by them was the ideal of the Catholic past, of the Fathers, of Christ Himself, emphatically state that bodily asceticism has not an absolute, but only a relative, value. St. Thomas calls it a "means to an end", to be used with discretion. St. Bonaventure says that bodily austerities "prepare, foster, and preserve perfection" (ad perfectionem præparans et ipsam promovens et conservans; "Apolog. pauperum", V, c. viii). In proof of his thesis, he shows that to put an absolute value on bodily asceticism would lead to Manichæism. He also points to Christ, the ideal of Christian perfection, who was less austere in fasting than John the Baptist, and to the founders of religious orders, who prescribed fewer ascetic exercises for their communities than they themselves practised (cf. J. Zahn, "Vollkommenheitsideal" in "Moralprobleme", Freiburg, 1911, p. 126 sqq.). On the other hand, Catholics do not deny the importance of ascetic practices for acquiring Christian perfection. Considering the actual condition of human nature, they declare these necessary for the removal of obstacles and for the liberation of man's moral forces, thus claiming for asceticism a positive character. A like value is put upon those exercises which restrain and guide the powers of the soul. Consequently, Catholics actually fulfil and always have fulfilled what Harnack sets down as a demand of the Gospel and what he pretends to have looked for in vain among Catholics; for they do "wage battle against mammon, care, and selfishness, and practise that charity which loves to serve and to sacrifice itself" (Harnack, "Essence of Christianity"). The Catholic ideal, then, is by no means confined to the negative element of asceticism, but is of a positive nature.

(2) The essence of Christian perfection is love. St. Thomas (Opusc. de perfectione christ., c. ii) calls that perfect which is conformable to its end (*quod attingit ad finem ejus*). Now, the end of man is God, and what unites him, even on earth, most closely with God is love (I Cor., vi, 17; I John, iv, 16). All the other virtues are subservient to love or are its natural prerequisites, as faith and hope. Love seizes man's whole soul (intellect, will), sanctifies it, and fuses new life into it. Love lives in all things and all things live in love and through love. Love imparts to all things the right measure and directs them all to the last end. "Love is thus the principle of unity, no matter how diversified are the particular states, vocations, and labours. There are many provinces, but they constitute one realm. The organs are many, but the organism is one" (Zahn, l. c., p. 146). Love has, therefore, rightly been called "the bond of perfection" (Col., iii, 14) and the fulfilment of the law (Rom., xiii, 8). That Christian perfection consists in love has ever been the teaching of Catholic ascetical writers. A few testimonies may suffice. Writing to the Corinthians, Clement of Rome says (Ep. I Cor., xlix, 1): "It was love that made all the elect perfect; without love nothing is acceptable to God" (*ἐν τῇ ἀγάπῃ ἐτελειώθησαν πάντες οἱ ἐκλεκτοὶ τοῦ θεοῦ, δίχα ἀγάπης οὐδὲν εὐαρεστόν ἐστιν τῷ θεῷ*; Funk, "Patr. apost.", p. 163). The "Epistle of Barnabas" insists that the way of light is "the love of him who created us" (*ἀγαπήσεις τόν σε ποιήσαντα*; Funk, l. c., p. 91), "a love of our neighbour that does not even spare our own life" (*ἀγαπήσεις τὸν πλησίον σου ὑπὲρ τὴν ψυχήν σου*), and it affirms that perfection is nothing else than "love and joy over the good works which testify to justice" (*ἀγάπη εὐφροσύνης καὶ ἀγαλλιάσεως ἔργων δικαιοσύνης μαρτυρία*). St. Ignatius never wearies in his letters of proposing faith as the light and love as the way, love being the end and aim of faith ("Ad Ephes.", ix, xiv; "Ad Philad.", ix; "Ad Smyrn.", vi). According to the "Didache", love of God and of one's neighbour is the beginning of the "way of life" (c. i), and in the "Epistle to Diognetus" active love is called the fruit of belief in Christ. The "Pastor" of Hermas acknowledges the same ideal when he sets down "a life for God" (*ζῆν τῷ θεῷ*) as the sum-total of human existence. To these Apostolic Fathers may be added St. Ambrose (De fuga sæculi, c. iv, 17; c. vi, 35–36) and St. Augustine, who regards perfect justice as tantamount to perfect love. Both St. Thomas and St. Bonaventure speak the same language, and their authority is so overpowering that the ascetical writers of all subsequent centuries have faithfully followed in their footsteps (cf. Lutz, "Die kirchl. Lehre von den evang. Räten", Paderborn, 1907, pp. 26–99).

However, though perfection is essentially love, it is not true that any degree of love is sufficient to constitute moral perfection. The ethical perfection of the Christian consists in the perfection of love, which requires such a disposition "that we can act with speed and ease even though many obstacles obstruct our path" (Mutz, "Christl. Ascetik", 2nd ed., Paderborn, 1909). But this disposition of the soul supposes that the passions have been subdued; for it is the result of a laborious struggle, in which the moral virtues, steeled by love, force back and quell the evil inclinations and habits, supplanting them by good inclinations and habits. Only then has it really become "a man's second nature, as it were, to prove his love of God at certain times and under certain circumstances, to practise virtue and, as far as human nature may, to preserve his soul even from the slightest taints" (Mutz, l. c., p. 43). Owing to the weakness of human nature and the presence of the evil concupiscence (*fomes peccati:* Trid., Sess. VI, can. xxiii), a perfection that would exclude every defect cannot be attained in this life without a special privilege (cf. Prov., xx, 9; Eccl., vii, 21; James, iii, 2). Likewise, perfection, on this side of the grave, will never reach such a degree that further growth is impossible, as is clear from the mind of the Church and the nature of our present existence (*status viæ*); in other words, our perfection will always be relative. As St. Bernard says: "An unflagging zeal for advancing and a continual struggle for perfection is itself perfection" (Indefessus proficiendi studium et iugis conatus ad perfectionem, perfectio reputatur; "Ep. ccliv ad Abbatem Guarinum"). Since perfection consists in love, it is not the privilege of one particular state, but may be, and has as a fact been, attained in every state of life (cf. PERFECTION, CHRISTIAN AND RELIGIOUS). Consequently it would be wrong to identify perfection with the so-called state of perfection and the observance of the evangelical counsels. As St. Thomas rightly observes, there are perfect men outside the religious orders and imperfect men within them (Summa theol., II–II, Q. clxxxiv, a. 4). True it is that the conditions for realizing the ideal of a Christian life are, generally speaking, more favourable in the religious state than in the secular avocations. But not all are called to the religious life, nor would all find in it their contentment (cf. COUNSELS, EVANGELICAL). To sum up, the end is the same, the means are different. This sufficiently answers Harnack's objection (Essence of Christianity) that the Church considers the perfect imitation of Christ possible only for the monks, while she accounts the life of a Christian in the world as barely sufficient for the attainment of the last end.

(3) The ideal, to which the Christian should conform and towards which he should strive with all his powers both natural and supernatural, is Jesus Christ. His justice should be our justice. Our whole life should be so penetrated by Christ that we become Christians in the full sense of the word ("until Christ be formed in you"; Gal., iv, 19). That Christ is the supreme model and pattern of the Christian life is proved from Scripture, as e. g. from John, xiii, 15, and I Peter, ii, 21, where imitation of Christ is directly recommended, and from John, viii, 12, where Christ is called "the light of the world". Cf. also Rom., viii, 29, Gal., ii, 20, Phil., iii, 8, and Heb., i, 3, where the

Apostle extols the excellent knowledge of Jesus Christ, for whom he has suffered the loss of all things, counting them but as dung, that he may gain Christ. Of the numerous testimonies of the Fathers we only quote that of St. Augustine, who says: "Finis ergo noster perfectio nostra esse debet; perfectio nostra Christus" (P. L., XXXVI, 628; cf. also "In Psalm.", 26, 2, in P. L., XXXVI, 662). In Christ there is no shadow, nothing one-sided. His Divinity guarantees the purity of the model; His humanity, by which He became similar to us, makes the model attractive. But this picture of Christ, unmarred by addition or omission, is to be found only in the Catholic Church and, owing to her indefectibility, will always continue there in its ideal state. For the same reason, the Church alone can give us the guarantee that the ideal of the Christian life will always remain pure and unadulterated, and will not be identified with one particular state or with a subordinate virtue (cf. Zahn, l. c., p. 124). An unprejudiced examination proves that the ideal of Catholic life has been preserved in all its purity through the centuries and that the Church has never failed to correct the false touches with which individuals might have sought to disfigure its unstained beauty. The individual features and the fresh colours for outlining the living picture of Christ are derived from the sources of Revelation and the doctrinal decisions of the Church. These tell us about the internal sanctity of Christ (John, i, 14; Col., ii, 9; Heb., i, 9; etc.). His life overflowing with grace, of whose fulness we have all received (John, i, 16), His life of prayer (Mark, i, 21, 35; iii, 1; Luke, v, 16; vi, 12; ix, 18; etc.), His devotion to His heavenly Father (Matt., xi, 26; John, iv, 34; v, 30; viii, 26, 29), His intercourse with men (Matt., ix, 10; cf. I Cor., ix, 22), His spirit of unselfishness and sacrifice, His patience and meekness, and, finally, His asceticism as revealed in his fastings (Matt., iv, 2; vi, 18).

B. *Dangers of the Ascetical Life.*—The second task of ascetical theology is to point out the dangers which may frustrate the attainment of Christian perfection and to indicate the means by which they can be avoided successfully. The first danger to be noticed is evil concupiscence. A second danger lies in the allurements of the visible creation, which occupy man's heart to the exclusion of the highest good; to the same class belong the enticements of the sinful, corrupt world (I John, v, 19), that is, those men who promulgate vicious and ungodly doctrines and thereby dim or deny man's sublime destiny, or who by perverting ethical concepts and by setting a bad example give a false tendency to man's sensuality. Thirdly, ascetics acquaints us not only with the malice of the devil, lest we should fall a prey to his cunning wiles, but also with his weakness, lest we should lose heart. Finally, not satisfied with indicating the general means to be used for waging a victorious combat, ascetics offers us particular remedies for special temptations (cf. Mutz, "Ascetik", 2nd ed., p. 107 sqq.).

C. *Means for Realizing the Christian Ideal.*—(1) Prayer, above all, in its stricter meaning, is a means of attaining perfection; special devotions approved by the Church and the sacramental means of sanctification have a special reference to the striving after perfection (frequent confession and communion). Ascetics proves the necessity of prayer (II Cor., iii, 5) and teaches the mode of praying with spiritual profit; it justifies vocal prayers and teaches the art of meditating according to the various methods of St. Peter of Alcantara, of St. Ignatius, and other saints, especially the "tres modi orandi" of St. Ignatius. An important place is assigned to the examination of conscience, and justly so, because ascetical life wanes or waxes with its neglect or careful performance. Without this regular practice, a thorough purification of the soul and progress in spiritual life are out of the question. It centres the searchlight of the interior vision on every single action: all sins, whether committed with full consciousness or only half voluntarily, even the negligences which, though not sinful, lessen the perfection of the act, all are carefully scrutinized (*peccata, offensiones, negligentiæ;* cf. "Exercitia spiritualia" of St. Ignatius, ed. P. Roothaan, p. 3). Ascetics distinguishes a twofold examination of conscience: one general (*examen generale*), the other special (*examen particulare*), giving at the same time directions how both kinds may be made profitable by means of certain practical and psychological aids. In the general examination we recall all the faults of one day; in the particular, on the contrary, we focus our attention on one single defect and mark its frequency, or on one virtue to augment the number of its acts.

Ascetics encourages visits to the Blessed Sacrament (*visitatio sanctissimi*), a practice meant especially to nourish and strengthen the divine virtues of faith, hope, and charity. It also inculcates the veneration of the saints, whose virtuous lives should spur us on to imitation. It is plain that imitation cannot mean an exact copying. What ascetics proposes as the most natural method of imitation is the removal or at least the lessening of the contrast existing between our own lives and the lives of the saints, the perfecting, as far as is possible, of our virtues, with due regard to our personal disposition and the surrounding circumstances of time and place. On the other hand, the observation that some saints are more to be admired than imitated must not lead us into the mistake of letting our works be weighted with the ballast of human comfort and ease, so that we at last look with suspicion on every heroic act, as though it were something that transcended our own energy and could not be reconciled with the present circumstances. Such a suspicion would be justified only if the heroic act could not at all be made to harmonize with the preceding development of our interior life. Christian ascetics must not overlook the Blessed Mother of God; for she is, after Christ, our most sublime ideal. No one has received grace in such fulness, no one has co-operated with grace so faithfully as she. It is for this reason that the Church praises her as the Mirror of Justice (*speculum justitiæ*). The mere thought of her transcendent purity suffices to repel the alluring charms of sin and to inspire pleasure in the wonderful lustre of virtue.

(2) Self-Denial is the second means which ascetics teaches us (cf. Matt., xvi, 24–25). Without it the combat between spirit and flesh, which are contrary to each other (Rom., vii, 23; I Cor., ix, 27; Gal., v, 17), will not lead to the victory of the spirit (Imitatio Christi, I, xxv). How far self-denial should extend is clear from the actual condition of human nature after the fall of Adam. The inclination to sin dominates both the will and the lower appetites; not only the intellect, but also the outer and the inner senses are made subservient to this evil propensity. Hence, self-denial and self-control must extend to all these faculties. Ascetics reduces self-denial to exterior and interior mortification: exterior mortification is the mortification of sensuality and the senses; interior mortification consists in the purification of the faculties of the soul (memory, imagination, intellect, will) and the mastering of the passions. However, the term "mortification" must not be taken to mean the stunting of the "strong, full, healthy" (Schell) life; what it aims at is that the sensual passions do not gain the upper-hand over the will. It is precisely through taming the passions by means of mortification and self-denial that life and energy are strengthened and freed from cumbersome shackles. But while the masters of asceticism recognize the necessity of mortification and self-denial and are far from

deeming it "criminal to assume voluntary sufferings" (Seeberg), they are just as far from advocating the so-called "non-sensual" tendency, which, looking upon the body and its life as a necessary evil, proposes to avert its noxious effects by wilful weakening or even mutilation (cf. Schneider, "Göttliche Weltordnung u. religionslose Sittlichkeit", Paderborn, 1900, p. 537). On the other hand, Catholics will never befriend the gospel of "healthy sensuality", which is only a pretty-sounding title, invented to cloak unrestricted concupiscence.

Special attention is devoted to the mastering of the passions, because it is with them above all else that the moral combat must be waged most relentlessly. Scholastic philosophy enumerates the following passions: love, hatred, desire, horror, joy, sadness, hope, despair, boldness, fear, anger. Starting from the Christian idea that the passions (*passiones*, as understood by St. Thomas) are inherent in human nature, ascetics affirms that they are neither sicknesses, as the Stoics, the Reformers, and Kant maintain, nor yet harmless, as was asserted by the Humanists and Rousseau, who denied original sin. On the contrary, it insists that in themselves they are indifferent, that they may be employed for good and for evil, and that they receive a moral character only by the use to which the will puts them. It is the purpose of ascetics to point out the ways and means by which these passions can be tamed and mastered, so that, instead of goading the will to sin, they are rather turned into welcome allies for the accomplishment of good. And since the passions are inordinate in as far as they turn to illicit things or exceed the necessary bounds in those things which are licit, ascetics teaches us how to render them innocuous by averting or restraining them, or by turning them to loftier purposes.

(3) Labour, also, is subservient to the striving after perfection. Untiring labour runs counter to our corrupt nature, which loves ease and comfort. Hence labour, if well-ordered, persistent, and purposeful, implies self-denial. This is the reason why the Catholic Church has always looked upon labour, both manual and mental, as an ascetic means of no small value (cf. Cassian, "De instit. cœnob.", X, 24; St. Benedict, Rule, xlviii, li; Basil, "Reg. fusius tract." c. xxxvii, 1–3; "Reg. brevius tract.", c. lxxii; Origen, "Contra Celsum", I, 28). St. Basil is even of the opinion that piety and avoidance of labour are irreconcilable in the Christian ideal of life (cf. Mausbach, "Die Ethik des hl. Augustinus", 1909, p. 264).

(4) Suffering, too, is an integral constituent of the Christian ideal and pertains consequently to ascetics. But its real value appears only when seen in the light of faith, which teaches us that suffering makes us like unto Christ, we being the members of the mystic body of which He is the head (I Peter, ii, 21), that suffering is the channel of grace which heals (*sanat*), preserves (*conservat*), and tests (*probat*). Finally, ascetics teaches us how to turn sufferings into channels of heavenly grace.

(5) The Virtues are subjected to a thorough discussion. As is proved in dogmatic theology, our soul receives in justification supernatural habits, not only the three Divine, but also the moral virtues (Trid., Sess. VI, De justit., c. vi; Cat. Rom., p. 2, c. 2, n. 51). These supernatural powers (*virtutes infusæ*) are joined to the natural faculties or the acquired virtues (*virtutes acquisitæ*), constituting with them one principle of action. It is the task of ascetics to show how the virtues, taking into account the obstacles and means mentioned, can be reduced to practice in the actual life of the Christian, so that love be perfected and the image of Christ receive perfect shape in us. Conformable to the Brief of Leo XIII, "Testem benevolentiæ" of 22 Jan., 1899, ascetics insists that the so-called "passive" virtues (meekness, humility, obedience, patience) must never be set aside in favour of the "active" virtues (devotion to duty, scientific activity, social and civilizing labour); for this would be tantamount to denying that Christ is the perpetual model. Rather, both kinds must be harmoniously joined in the life of the Christian. True imitation of Christ is never a brake, nor does it blunt the initiative in any field of human endeavour. On the contrary, the practice of the passive virtues is a support and aid to true activity. Besides, it not rarely happens that the passive virtues reveal a higher degree of moral energy than the active. The Brief itself refers us to Matt., xxi, 29; Rom., viii, 29; Gal., v, 24; Phil., ii, 8; Heb., xiii, 8 (cf. also Zahn, l. c., 166 sqq.).

D. *Application of the Means in the Three Degrees of Christian Perfection.*—Imitation of Christ is the duty of all who strive after perfection. It lies in the very nature of this formation after the image of Christ that the process is gradual and must follow the laws of moral energy; for moral perfection is the terminus of a laborious journey, the crown of a hard-fought battle. Ascetics divides those who strive after perfection into three groups: the beginners, the advanced, the perfect; and correspondingly sets down three stages or ways of Christian perfection: the purgative way, the illuminative way, the unitive way. The means stated above are applied with more or less diversity according to the stage which the Christian has reached. In the purgative way, when the appetites and inordinate passions still possess considerable strength, mortification and self-denial are to be practised more extensively. For the seeds of the spiritual life will not sprout unless the tares and thistles have first been weeded out. In the illuminative way, when the mists of passion have been lifted to a great extent, meditation and the practice of virtues in imitation of Christ are to be insisted on. During the last stage, the unitive way, the soul must be confirmed and perfected in conformity with God's will ("And I live, now not I; but Christ liveth in me": Gal., ii, 20). Care must, however, be taken not to mistake these three stages for wholly separate portions of the striving after virtue and perfection. Even in the second and the third stages there occur at times violent struggles, while the joy of being united with God may sometimes be granted in the initial stage as an inducement for further advance (cf. Mutz, "Aszetik," 2nd ed., 94 sq.).

E. *Relation of Ascetics to Moral Theology and Mysticism.*—All these disciplines are concerned with the Christian life and its last end in the next world; but they differ, though not totally, in their mode of treatment. Ascetical theology, which has been separated from moral theology and mysticism, has for its subject-matter the striving after Christian perfection; it shows how Christian perfection may be attained by earnestly exercising and schooling the will, using the specified means both to avoid the dangers and allurements of sin and to practise virtue with greater intensity. Moral theology, on the other hand, is the doctrine of the duties, and in discussing the virtues is satisfied with a scientific exposition. Mysticism treats essentially of "union with God" and of the extraordinary, so-called mystic prayer. Though also those phenomena which are accidental to mysticism, such as ecstasy, vision, revelation, fall within its scope, yet they are by no means essential to the mystic life (cf. Zahn, "Einführung in die christl. Mystik", Paderborn, 1908). It is true that mysticism includes also matter of ascetics, such as the endeavour of purification, vocal prayer, etc.; but this is done because these exercises are looked upon as preparatory to the mystical life and must not be discarded even in its highest stage. Nevertheless, the mystical life is not merely a higher degree of the ascetical life, but differs from it essentially, the mystical life being a special grace granted to the Christian without any immediate merit on his part.

F. *Historical Development of Asceticism.*—(1) Holy Writ abounds in practical instructions for the life of Christian perfection. Christ himself has drawn its outlines both as to its negative and positive requirements. His imitation is the supreme law (John, viii, 12; xii, 26), charity the first commandment (Matt., xxii, 36–38; John, xv, 17); the right intention is that which imparts value to the exterior works (Matt., v–vii), while self-denial and the carrying of the cross are the conditions for His discipleship (Matt., x, 38; xvi, 24; Mark, viii, 34; Luke, ix, 23; xiv, 27). Both by His own example (Matt., iv, 2) and His exhortations (Matt., xvii, 20; Mark, ix, 28) Christ recommended fasting. He inculcated sobriety, watchfulness, and prayer (Matt., xxiv, 42; xxv, 13; xxvi, 41; Mark, xiii, 37; xiv, 37). He pointed to poverty as a means of gaining the kingdom of heaven (Matt., vi, 19; xiii, 22; Luke, vi, 20; viii, 14; xii, 33; etc.) and counselled the rich youth to relinquish everything and to follow Him (Matt., xix, 21). That this was a counsel and not a strict command, given in view of the particular attachment of the youth to the things of this world, is shown by the very fact that the Master had twice said "keep the commandments", and that he recommended the renunciation of all earthly goods only on the renewed inquiry after the means that lead to perfection (cf. Lutz, l. c., against the Protestants Th. Zahn, Bern, Weiss, Lemme, and others). Celibacy for God's sake was praised by Christ as worthy of a special heavenly reward (Matt., xix, 12). Yet marriage is not condemned, but the words, "All men take not this word, but they to whom it is given", imply that it is the ordinary state, celibacy for God's sake being merely a counsel. Indirectly, Christ also commended voluntary obedience as a means for attaining the most intimate union with God (Matt., xviii, 4; xx, 22, 25). What Christ had outlined in his teachings the Apostles continued to develop. It is especially in St. Paul that we find the two elements of Christian asceticism brought out in well-defined terms: mortification of inordinate desires as the negative element (Rom., vi, 8, 13; II Cor., iv, 16; Gal., v, 24; Col., iii, 5), union with God in all our thoughts, words, and deeds (I Cor., x, 31; Gal., vi, 14; Col., iii, 3–17), and active love of God and our neighbour (Rom., viii, 35; I Cor., xiii, 3) as the positive element.

(2) Fathers and Doctors of the Church.—With Holy Writ as a basis, the Fathers and Doctors of the Church explained particular features of the Christian life in a more coherent and detailed manner. The Apostolic Fathers called the love of God and man the sun of Christian life, which, animating all virtues with its vital rays, inspires contempt of the world, beneficence, immaculate purity, and self-sacrifice. The "Didache" (q. v.), which was intended to serve as a manual for catechumens, thus describes the way of life: "First, thou shalt love God, who created thee; secondly, thou shalt love thy neighbour as thyself; whatever thou wishest that it should not be done to thee, do not to others." Following probably the "Didache", the so-called "Epistle of Barnabas", written at the end of the second century, represents the Christian life under the figure of the two ways, that of light and that of darkness. Two Epistles, which purport to come from the pen of St. Clement, but were probably written in the third century, exalt the life of virginity, if grounded on the love of God and accompanied by the corresponding works, as heavenly, divine, and angelic. We also mention St. Ignatius of Antioch, of whose letters St. Polycarp says that they contain "faith and patience and all edification in the Lord", and the "Pastor" of Hermas, who in the twelve commandments inculcates simplicity, truthfulness, chastity, meekness, patience, continence, confidence in God, and perpetual struggle against concupiscence. With the third century the works on Christian asceticism begin to show a more scientific character. In the writings of Clement of Alexandria and Gregory the Great ("Moral.", XXXIII, c. xxvii; cf. also Cassian, "Coll.", IX, XV) there may be observed traces of the threefold degree which was afterwards systematically developed by Dionysius the Areopagite. In his "Stromata" Clement sets forth the full beauty and grandeur of "true philosophy". It is particularly remarkable that this author delineates, even in its details, what is now known as ethical culture, and that he endeavours to harmonize it with the example given by Christ. The life of the Christian is to be ruled in all things by temperance. Following out this idea, he discusses in a casuistic form food and drink, dress and love of finery, bodily exercises and social conduct. Beginning with the fourth century, a twofold line of thought is discernible in the works on Christian life: one speculative, laying stress on the union of the soul with God, the Absolute Truth and Goodness; the other practical, aiming principally at instruction in the practice of the Christian virtues. The speculative element prevailed in the mystical school, which owes its systematic development to Pseudo-Dionysius and which reached its highest perfection in the fourteenth century. The practical element was emphasized in the ascetical school with St. Augustine as its chief representative, in whose footsteps followed Gregory the Great and St. Bernard.

It may suffice to detail the principal points on which the writers prior to the medieval-scholastic period dwelt in their instructions. On prayer we have the works of Macarius the Egyptian (d. 385) and of Tertullian (d. after 220), who supplemented his treatise on prayer in general by an explanation of the Lord's Prayer. To these two must be added Cyprian of Carthage (d. 258), who wrote "De oratione dominica", and St. Chrysostom (d. 407). Penance and the spirit of penance were treated by Tertullian (De pœnitentia), Chrysostom ("De compunctione cordis", "De pœnitentia"), and Cyril of Jerusalem (d. 386) in his second catechetical instruction. That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone christiano" and in his "Confessions". Chastity and virginity were treated by Methodius of Olympus (d. 311) in his "Convivium", a work in which ten virgins, discussing virginity, demonstrate the moral superiority of Christianity over the ethical tenets of pagan philosophy. The same subject is discussed by the following Fathers: Cyprian (d. 258); Gregory of Nyssa (d. 394) in his "De virginitate"; Ambrose (d. 397), the indefatigable eulogist and champion of the virginal life; Jerome in his "Adversus Helvidium de virginitate" and "Ad Eustachium"; Chrysostom (d. 407) in his "De virginitate", who, though extolling virginity as a heavenly life, yet recommends it only as a counsel; Augustine in his works "De continentia", "De virginitate", "De bono viduitatis".

On patience we have the works of Cyprian, Augustine, and Tertullian's "De patientia", in which he speaks of this virtue as an invalid might speak of health to console himself. Chrysostom's "De jejunio et eleemosyna" discusses fasting. Almsgiving and good works are encouraged in Cyprian's "De opere et eleemosynis" and in Augustine's "De fide et operibus". The value of labour is explained in "De opere monachorum" by St. Augustine. Nor are treatises on the different states of life wanting. Thus St. Augustine's "De bono conjugali" treats of the married state; his "De bono viduitatis" of widowhood. A frequent subject was the priesthood. Gregory of

Nazianzus, in his "De fuga", treats of the dignity and responsibility of the priesthood; Chrysostom's "De sacerdotio" exalts the sublimity of this state with surpassing excellence; St. Ambrose in his "De officiis", while speaking of the four cardinal virtues, admonishes the clerics that their lives should be an illustrious example; St. Jerome's "Epistola ad Nepotianum" discusses the dangers to which priests are exposed; finally, the "Regula pastoralis" of Gregory the Great inculcates the prudence indispensable to the pastor in his dealings with different classes of men. Of prime importance for the monastic life was the work "De institutis cœnobiorum" of Cassian. But the standard work from the eighth to the thirteenth century was the Rule of St. Benedict, which found numerous commentators. Of the saint or rather his Rule St. Bernard says: "Ipse dux noster, ipse magister et legifer noster est" (Serm. in Nat. S. Bened., n. 2). Illustrations of the practice of Christian virtues in general were the "Expositio in beatum Job" of Gregory the Great and the "Collationes Patrum" of Cassian, in which the various elements of Christian perfection were discussed in the form of dialogues.

(3) The Medieval-Scholastic Period.—The transition period up to the twelfth century exhibits no specially noteworthy advance in ascetical literature. To the endeavour to gather and preserve the teachings of the Fathers we owe Alcuin's "De virtutibus et vitiis". But when in the twelfth century speculative theology was celebrating its triumphs, mystical and ascetical theology, too, showed a healthy activity. The results of the former could not but benefit the latter by placing Christian morality on a scientific basis and throwing ascetical theology itself into a scientific form. The pioneers in this field were St. Bernard (d. 1156) and Hugh and Richard of St. Victor. St. Bernard, the greatest mystical theologian of the twelfth century, also holds a prominent place among ascetical writers, so that Harnack calls him the "religious genius" of the twelfth century. The basic idea of his works, especially prominent in his treatise "De gratia et libero arbitrio", is that the life of the Christian should be a copy of the life of Jesus. Like Clement of Alexandria, he, too, lays down precepts for the regulation of the necessities of life, as food and dress, and for the implanting of God's love in man's heart, which would sanctify all things ("Apologia", "De præcepto et dispensatione"). Many are the steps by which love ascends till it reaches its perfection in the love for God's sake. Among his ascetical writings are: "Liber de diligendo Deo", "Tractatus de gradibus humilitatis et superbiæ", "De moribus et officio episcoporum", "Sermo de conversione ad clericos", "Liber de consideratione".

Frequent allusions to St. Augustine and Gregory the Great are scattered through the pages of Hugh of St. Victor (d. 1141), so much so that he earned the distinction of being called a second Augustine by his contemporaries. He was undoubtedly the first to give to ascetical theology a more or less definite, scientific character. The ever-recurring theme of his works is love. But what he aimed at above all in his writings was to lay bare the psychological bearings of mystical and ascetical theology. Noteworthy are his works: "De vanitate mundi", "De laude caritatis", "De modo orandi", "De meditatione". His pupil, Richard of St. Victor (d. 1173), though more ingenious and systematic, is yet less intent upon practical utility, except in his work "De exterminatione mali et promotione boni". The great theologians of the thirteenth century, who were no less famous for their scholastic "Summæ" than for their ascetical and mystical writings, brought ascetical teaching to its perfection and gave it the definite shape it has retained as a standard for all future times. No other epoch furnishes such convincing proof that true science and true piety are rather a help than a hindrance to each other. Albert the Great, the illustrious teacher of the great Thomas, who was the first to join Aristotelean philosophy with theology and to make philosophy the handmaid of theology, was at the same time the author of excellent works on ascetics and mysticism, as, e. g., "De adhærendo Deo", the ripest fruit of his mystic genius, and "Paradisus animæ", which was conceived along more practical lines. To St. Thomas we owe the ascetic work "De perfectione vitæ spiritualis"; in it he explains the essence of Christian perfection so lucidly that his line of argumentation may even in our days serve as a model. His other works, too, contain ample material of value both for ascetics and for mysticism.

The Seraphic Doctor, St. Bonaventure, "treats of mystic theology", to use the words of Leo XIII, "in a manner so perfect that the unanimous opinion of the most expert theologians regards him as the prince of mystic theologians". Of his authentic works the following deserve to be mentioned: "De perfectione evangelica", "Collationes de septem donis Spiritus sancti", "Incendium amoris", "Soliloquium", "Lignum vitæ", "De præparatione ad Missam", "Apologia pauperum". From the pen of David of Augsburg, a contemporary of these great masters, we have an ascetic instruction for novices in his book entitled "De exterioris et interioris hominis compositione". He leads the reader along the three well-known ways, purgative, illuminative, and unitive, purposing to make the reader a spiritual man. By severely disciplining the faculties of the soul and subordinating the flesh to the spirit, man must restore the original order, so that he may not only do what is good, but likewise do it with ease. There remains to be mentioned the "Summa de vitiis et virtutibus" of Peraldus (d. c. 1270). The fourteenth century is characterized throughout by its mystical tendencies. Among the works which this period produced, Henry Suso's "Booklet of Eternal Wisdom" deserves special mention on account of its highly practical value. Pre-eminent in the fifteenth century were Gerson, Dionysius the Carthusian, and the author of the "Imitation of Christ". Relinquishing the ideals of the mystic writers of the fourteenth century, Gerson attached himself again to the great scholastic writers, thus avoiding the vagaries which had become alarmingly frequent among the mystics. His "Considerationes de theologia mystica" shows that he belongs to the practical school of asceticism. Dionysius the Carthusian is esteemed as a highly gifted teacher of the spiritual life. Both mysticism properly so called and practical asceticism owe valuable works to his pen. To the latter category belong: "De remediis tentationum", "De via purgativa", "De oratione", "De gaudio spirituali et pace interna", "De quatuor novissimis".

The "Imitatio Christi", which appeared in the middle of the fifteenth century, deserves special attention on account of its lasting influence. "It is a classic in its ascetical unction and perfect in its artistic style" (Hamm, "Die Schönheit der kath. Moral", Munich-Gladbach, 1911, p. 74). In four books it treats of the interior spiritual life in imitation of Jesus Christ. It pictures the struggle which man must wage against his inordinate passions and perverse inclinations, the indulgence of which sullies his conscience and robs him of God's grace: "Vanity of vanities and all is vanity, except to love God and serve Him alone" (Vanitas vanitatum et omnia vanitas præter amare Deum et illi soli servire: I, i). It advises mortification and self-denial as the most efficacious weapons in this struggle. It teaches man to establish God's kingdom in his soul by the practice of virtues according to the example of Jesus Christ.

It finally leads him to union with Christ by exciting love for him as well as by pointing out the frailty of all creatures: "It is necessary to leave the beloved thing for the beloved, because Jesus wishes to be loved above all things" (Oportet dilectum propter dilectum relinquere, quia Jesus vult solus super omnia amari: II, xvii). The thoughts of the "Imitation" are thrown into epigrams so simple that they are within the mental grasp of all. Though the book betrays that the author was well versed not only in Scholastic philosophy and theology, but also in the secrets of the mystical life, yet this fact never obtrudes itself on the reader, nor does it obscure the meaning of the contents. There are a number of quotations from the great doctors Augustine, Bernard, Bonaventure, and Thomas, from Aristotle, Ovid, and Seneca; yet these do not mar the impression that the whole work is the spontaneous outburst of an intensely glowing soul. It has often been said that the teachings of the "Imitation" are "unworldly" and show little appreciation for science. But, to judge the work aright, one must take into consideration the peculiar circumstances of the time. Scholasticism had entered on a period of decline and had lost itself in intricate subtleties; mysticism had gone astray; all classes had been more or less infected with the spirit of licentiousness. It is conditions like these that give us the key to interpret phrases such as the following: "I would rather feel compunction than know how to define it" (Opto magis sentire compunctionem quam scire ejus definitionem) or "This is the highest wisdom: through contempt of the world to strive for the kingdom of heaven" (Ista est summa sapientia: per contemptum mundi tendere ad regna cœlestia).

(4) Modern Times.—During the sixteenth century St. Teresa and St. Ignatius of Loyola stand out most prominently owing to the wide-felt influence which they exerted upon the religion of their contemporaries, an influence that is still at work through their writings. The writings of St. Teresa arouse our admiration by the simplicity, clearness, and precision of her judgment. Her letters show her to be an enemy of everything that smacks of eccentricity or singularity, sham piety or indiscreet zeal. One of her principal works, the "Way to Perfection", though written primarily for nuns, also contains apposite instructions for those who live in the world. While teaching the way to contemplation, she yet insists that not all are called to it and that there is greater security in the practice of humility, mortification, and the other virtues. Her masterpiece is the "Castle of the Soul", in which she expounds her theory of mysticism under the metaphor of a "castle" with many chambers. The soul resplendent with the beauty of the diamond or crystal is the castle; the various chambers are the various degrees through which the soul must pass before she can dwell in perfect union with God. Scattered throughout the work are many hints of inestimable value for asceticism as applied in everyday life. This fact is undoubtedly due to the well-founded conviction of the saint that even in extraordinary states the ordinary means must not be set aside altogether, so that illusions may be guarded against (cf. J. Zahn, "Introduction to Mysticism", p. 213).

In his "Exercitia spiritualia" St. Ignatius has left to posterity not only a grand literary monument of the science of the soul, but also a method unparalleled in its practical efficacy of strengthening the will-power. The booklet has appeared in numberless editions and revisions and, "despite its modest guise, is in reality a complete system of asceticism" (Meschler). The four weeks of the Exercises acquaint the exercitant with the three degrees of the spiritual life. The first week is taken up with cleansing the soul from sin and from its inordinate attachment to creatures. The second and third weeks lead the exercitant along the illuminative way. The portrait of Christ, the most lovable of all men, is outlined before his eyes, so that he can contemplate in the humanity the reflex of Divine light and the supreme model of all virtues. The meditations of the fourth week, the subject of which are the resurrection etc., lead to union with God and teach the soul to rejoice in the glory of the Lord. It is true, there are many rules and regulations, the sequence is most logical, the arrangement of the meditations follows the laws of psychology; yet these exercises do no violence to the free will, but are meant to strengthen the faculties of the soul. They do not, as has often been asserted, make the exercitant a powerless instrument in the hands of the confessor, nor are they a mystic flight to heaven, accomplished by means of a compulsion which intends a rapid advance in perfection by a mechanical process (Zöckler, "Die Tugendlehre des Christentums", Gütersloh, 1904, p. 335). Their marked intellectualism, so frequently objected to, in no way constitutes a hindrance to mysticism (Meschler, "Jesuitenaszese u. deutsche Mystik" in "Stimmen aus Maria-Laach", 1912). On the contrary, they make man's moral will truly free by removing the hindrances, while, by cleansing the heart and by accustoming the mind to meditative prayer, they are an excellent preparation for the mystical life. Louis of Granada, O. P. (d. 1588), also belongs to this period. His work "La guia de pecadores" may justly be styled a book full of consolation for the erring. His "El memorial de la vida cristiana" contains instructions which take the soul from the very beginning and lead her to the highest perfection. Louis of Blois (Blosius), O. S. B. (d. 1566), is of a mind kindred to St. Bernard. His "Monile spirituale" is the best known of his numerous works. Thomas of Jesus (d. 1582) wrote the "Passion of Christ" and "De oratione dominica".

A great number of ascetical writers sprang up during the seventeenth century. Among them St. Francis de Sales stands out most prominently. According to Linsemann, the publication of his "Philothea" was an event of historical importance. To make piety attractive and to adapt it to all classes whether living in Court circles, in the world, or in a monastery, this was his aim and in this he succeeded. Of a mild and sweet temperament, he never lost sight of the habits and particular circumstances of the individual. Though unwavering in his ascetical principles, he yet possessed an admirable facility for adapting them without constraint or rigidity. In the practice of mortification he recommends moderation and adaptation to one's state of life and to personal circumstances. Love of God and of man: this he puts down as the motive power of all actions. The spirit of St. Francis pervades the whole of modern asceticism, and even to-day his "Philothea" is one of the most widely read books on asceticism. "Theotimus", another work of his, treats in the first six chapters of the love of God, the rest being devoted to mystical prayer. His letters, too, are very instructive. Attention may be called to the new edition of his works (Œuvres, Annecy, 1891 sqq.). "Il combattimento spirituale" of Scupoli (d. 1610) was spread very widely and earnestly recommended by Francis de Sales.

To the same period belong the following authors and works. Bellarmine, S.J. (d. 1621): "Gemitus columbæ"; "De ascensione mentis in Deum"; "De arte bene moriendi". Alphonsus Rodriguez, S.J. (d. 1616): "Exercicio de perfección y virtudes cristianas" (3 vols., Seville, 1609), which has frequently been re-edited and translated into nearly all languages. John of Jesus-Mary, O.C.D. (d. 1615): "Teologia Mistica" (Naples, 1607), highly esteemed by Bellarmine and Francis de Sales. Alvarez de Paz, S.J. (d. 1620): "De vita spirituali ejusque perfectione" (1608); "De exterminatione mali et promotione boni" (1613); "De inquisitione pacis" (1617), which was frequently re-edited. Gaudier, S.J. (d. 1620): "De perfectione vitæ spiritualis" (1619; new ed., 3 vols., Turin, 1903–4). La Puente, S.J. (d. 1624): "Guia espiritual" (Valladolid, 1609), containing, according to his own statement, a brief epitome of the spiritual life both active and contemplative (prayer, meditation, trials, mortification, practice of virtue); "De la Perfección del Cristiano en todos sus estados" (1612). Both works have ever been highly esteemed by all ascetical men and have been translated into many languages. Lessius, S.J. (d. 1623): "De perfectionibus moribusque divinis", a work distinguished both for its scientific and ascetical spirit. Nicholas Lancicius, S.J. (d. 1638), past-master in the spiritual life, whose saintly personality is reflected in his writings (new ed., Cracow, 1889 sqq.): "De exteriore corporis compositione"; "De quatuor viis perveniendi ad perfectionem"; "De humanarum passionum dominio"; "De mediis ad virtutem"; "De causis et remediis in oratione". Greatly valued is his book of meditations: "De piis erga Deum et cœlites affectibus"; it has been translated into several languages. Schorrer, S.J.: "Synopsis theol. ascet." (Dillingen, 1662; rare edition). Godinez, S.J.: "Práctica de la teologia mystica" (La Puebla de los Angeles, 1681), of which we have a Latin edition together with a commentary by de la Reguera, S.J. (Rome, 1740).

Surin, S.J. (d. 1665), wrote his important "Catéchisme spirituel" at a time when he was subject to interior trials (cf. Zahn, "Mystik", p. 441). The book appeared in many editions and translations, but was placed on the Index. The edition of Fr. Fellon, S.J. (1730), and the latest edition of Fr. Bouix (Paris, 1882) probably do not fall under this prohibition, because in them the errors have been corrected. After Surin's death appeared: "Les fondements de la vie spirituelle" (Paris, 1667); "Lettres spirituelles" (ib., 1695); "Dialogues spirituels" (ib., 1704). Gaspar Druzbicki, S.J. (d. 1662), is the author of a considerable number of ascetical works both in Polish and in Latin, many of which were translated into other languages. There are two complete editions of his works: one published at Ingolstadt (1732) in two folios, the other at Kalisz and Posen (1681–91). Among his numerous works are: "Lapis lydius boni spiritus"; "Considerationes de soliditate veræ virtutis"; "De sublimitate perfectionis"; "De brevissima ad perfectionem via"; "Vota religiosa". The "Mystica theologia Divi Thomæ" of Thomas a Vallgornera, O.P. (d. 1665), published at Barcelona (1662 and 1672) and at Turin (1890), is almost exclusively made up of quotations from St. Thomas and is a rich storehouse of ascetical material. From the pen of Cardinal Bona, O. Cist. (d. 1674), we have: "Principia et documenta vitæ christianæ" (Rome, 1673) and "Manuductio ad cœlum" (Rome, 1672 and 1678), both of which works, remarkable for their simplicity and practical utility, were frequently re-edited; the still valuable "De sacrificio Missæ"; "De discretione spirituum"; "Horologium asceticum". Complete editions of his works appeared at Antwerp, Turin, Venice. Morotius, O. Cist., in his "Cursus vitæ spiritualis" (Rome, 1674; new ed., Ratisbon, 1891), follows closely the lead of St. Thomas. The "Summa theologiæ mysticæ" (new ed., 3 vols., Freiburg, 1874) is the best and most widely read work of Philip of the Blessed Trinity (d. 1671), the philosopher among the mystic writers. He wrote in the spirit of St. Thomas, following definite scientific principles and showing their practical application in the spiritual life. Anthony of the Holy Ghost, O.C.D. (d. 1674), was a disciple of the author just named. His "Directorium mysticum" (new ed., Paris, 1904), dominated by the spirit of his master, was written for the instruction of his pupils. He is also the author of the following works: "Seminarium virtutum" (3rd ed., Augsburg and Würzburg, 1750), "Irriguum virtutum" (Würzburg, 1723), "Tractatus de clericorum ac præcipue sacerdotum et pastorum dignitate", etc. (Würzburg, 1676).

In the course of the eighteenth century a number of valuable works on asceticism and mysticism were published. To Neumeyer, S.J. (d. 1765), we owe the "Idea theol. ascet.", a complete, scientifically arranged epitome. Rogacci, S.J. (d. 1719), wrote "Del uno necessario", an instruction in the love of God, which ranks high in ascetical literature and was translated into several languages. Among the best literary productions, and widely read even to-day, is Scaramelli's (d. 1752) "Direttorio ascetico". The author treats asceticism apart from mysticism. A treatise on the virtues is contained in Dirkink, S.J., "Semita perfectionis" (new ed., Paderborn, 1890). Designed along broad lines is the "Trinum perfectum" (3rd ed., Augsburg, 1728) by Michael of St. Catherine. Katzenberger, O.F.M., wrote "Scientia salutis" (new ed., Paderborn, 1901). Schram's "Institutiones theol. mysticæ" (2 vols.) combines asceticism with mysticism, though the author is at his best in the ascetical parts. St. Alphonsus Liguori (d. 1787), rightly called the "Apostolic Man", published a large number of ascetic works, full of heavenly unction and tender-hearted piety. The best-known and most important of them are: "Pratica di amar Gesù Cristo" (1768), "Visita al SS. Sacramento", perhaps the most widely read of all his ascetical works: "La vera sposa di Gesù Cristo" (1760), a sure guide to perfection for countless souls.

Complete treatises on asceticism, published during the nineteenth and twentieth centuries, are the following: Grundkötter, "Anleitung zur christl. Vollkommenheit" (Ratisbon, 1896). Leick, C.SS.R., "Schule der christl. Vollkommenheit" (Ratisbon, 1886), inspired by the writings of St. Alphonsus Liguori. Weiss, O.P., "Philosophie der christl. Vollkommenheit" (vol. V of his "Apologie"; Freiburg, 1898). The author is extraordinarily well read, and his conception of the spiritual life is unusually deep. Ribet, "L'ascétique chrétienne" (Paris, 1888). Tissot, "La vie intérieure". Saudreau, "Les degrés de la vie spirituelle" (Angers, 1896 and 1897), a work full of unction. His other works, "Les faits extraordinaires de la vie spirituelle" (1908) and "La vie d'union à Dieu" (1909), belong to mysticism properly so called. Poulain, S.J., "La grâce d'oraison", though of a mystic character, yet treats of the ordinary method of prayer. Saudreau and Poulain are reliable throughout and their works are among the best productions in this branch. Rousset, O.P., "Directorium asceticum" (Freiburg, 1893). Meynard, O.P., "Traité de la vie intérieure" (Paris, 1899), based on St. Thomas. Meyer, S.J., "First Lessons in the Science of the Saints" (2nd ed., St. Louis, 1903), translated into several languages. Francis X. Mutz, "Die christliche Aszetik" (2nd ed., Paderborn, 1909). Joseph Zahn, "Einführung in die christliche Mystik" (Paderborn, 1908), important also for asceticism. Berthier, "De la perfection chrétienne et de la perfection religieuse d'après S. Thomas et S. François de Sales" (2 vols., Paris, 1901). A. Devine, "Manual of Ascetical Theology" (London). Ryan, "Groundwork of Christian Perfection" (London). Buchanan, "Perfect Love of God" (London).

An exhaustive list of Catholic ascetical writers is given in Migne, "Encycl. théologique", XXVI; "Dict. d'ascéticisme", II, 1467.

Non-Catholic authors: Otto Zöckler, "Die Tugendlehre des Christentums, geschichtlich dargestellt" (Gütersloh, 1904). W. Hermann, "Der Verkehr des

Christen mit Gott" (6th ed., Stuttgart, 1908), and "Die sittlichen Weisungen Jesu" (Göttingen, 1907). Kähler, "Verkehr mit Christo in seiner Bedeutung für das eigene Leben" (Leipzig, 1904). Peabody, "Jesus Christ and the Christian Character". A. Ritschl, "Christliche Vollkommenheit" (Göttingen, 1902). Sheldon, "In his Steps—What Would Jesus do?", widely read in England.

Franz X. Mutz.

Mystical Theology.—Mystical theology is the science which treats of acts and experiences or states of the soul which cannot be produced by human effort or industry even with the ordinary aid of Divine grace. It comprises among its subjects all extraordinary forms of prayer, the higher forms of contemplation in all their varieties or gradations, private revelations, visions, and the union growing out of these between God and the soul, known as the mystical union. As the science of all that is extraordinary in the relations between the Divinity and the human spirit, mystical theology is the complement of ascetical, which treats of Christian perfection and of its acquisition by the practice of virtue, particularly by the observance of the counsels. The contents of mystical theology are doctrinal as well as experimental, as it not only records the experiences of souls mystically favoured, but also lays down rules for their guidance, which are based on the authority of the Scriptures, on the teachings of the Fathers of the Church, and on the explanations of theologians, many of them eminent as mystics. Its rules and precepts are usually framed for the special use of those who have occasion to direct souls in the ways of mysticism, so as to preserve them from error while facilitating their advancement. It must therefore take note of the erroneous systems of prayer, like Quietism (q. v.) or Semiquietism, and of the self-illusion or deception of souls that mistake the powers of darkness for those of light or the promptings of their own self-seeking for Divine communications. It is this part of the science that necessitates inquiry into various phases of occultism, diabolism, etc., into which writers like Görres have gone so extensively. Mystical theology has a nomenclature all its own, seeking to express acts or states that are for the most part purely spiritual in terms denoting analogous experiences in the material order. Usually it does not form part of the ordinary class-room studies, but is imparted by spiritual masters in their personal direction of souls, or inculcated, as in seminaries and novitiates, by special conferences and courses of spiritual reading. Preliminary to the study of mystical theology is a knowledge of the four ordinary forms of prayer: vocal, mental, affective, and the prayer of simplicity (see Prayer). The last two, notably the prayer of simplicity, border on the mystical. Prayer is often called active or acquired contemplation to distinguish it from passive or higher contemplation, in which mystical union really consists.

Mystical theology begins by reviewing the various descriptions of extraordinary contemplation, contained in the works of mystics and of writers on mystical subjects, and the divisions which help to describe its various phases, indicating chiefly whether it consists of an enlargement or elevation of knowledge, or of absorption in the Divine vision, or, again, whether the cherubic, i. e., intellectual, or seraphic, i. e., affective, element predominates. The objects of contemplation are set forth: God, His Attributes, the Incarnation, and all the Sacred Mysteries of the Life of Christ; His presence in the Eucharist; the supernatural order; every creature of God in the natural order, animate or inanimate, particularly the Blessed Virgin, the angels, the saints, Providence, the Church. In analyzing the causes of contemplation, what may be called its psychology next comes up for consideration, in so far as it necessitates the ordinary or exceptional use of any human faculty, of the senses of the body, or of the powers of the soul. On God's part, grace must be considered as a principle, or cause, of contemplation, the special or unusual graces (*gratis datæ*) as well as ordinary graces, the virtues, theological as well as moral, the gifts of the Holy Spirit. The closing chapter in this part of the science dwells on the fruits of contemplation, especially the elevation of spirit, joy, charity, zeal; on the influences that may contribute to its duration, interruption, or cessation. Here some theologians treat in detail of the preliminary or preparatory dispositions for contemplation, of natural or moral aptitude, solitude, prayer, mortification or self-denial, corporal and spiritual, as a means of soul-purification; these topics, however, belong more properly to the domain of ascetical theology.

What strictly comes within the province of mystical theology is the study of the processes of active and passive purification through which a soul must pass to reach the mystical union. Although the active processes are also treated to some extent in ascetical theology, they require special study inasmuch as they lead to contemplation. They comprise: purity of conscience, or aversion even to the slightest sin; purity of heart, the heart being taken as the symbol of the affections, which to be pure must be free of attachments to anything that does not lead to God; purity of the spirit, i. e. of the imagination and memory; and purity of action. It is to these processes that the well-known term "night" is applied by St. John of the Cross, since they imply three things which are as night to the soul in so far as they are beyond or contrary to its own lights, viz., the privation of pleasure, faith as substituted for human knowledge, and God as incomprehensible, or darkness, to the unaided soul. Passive purifications are the trials encountered by souls in preparation for contemplation, known as desolation, or dryness, and weariness. As they proceed sometimes from God and sometimes may be produced by the Evil Spirit, rules for the discernment of spirits are set down to enable directors to determine their source and to apply proper means of relief, especially should it happen that the action of the Evil One tends to possession or obsession.

These passive purifications affect the soul when every other object of contemplation is withdrawn from it, except its own sins, defects, frailties, which are revealed to it in all their enormity. They put the soul in the "obscure night", as St. John of the Cross calls it, or in the "great desolation", to use the phrase of Father Baker. In this state the soul experiences many trials and temptations, even to infidelity and despair, all of which are expressed in the peculiar terminology of writers on mystical theology, as well as the fruits derived from resisting them. Chief among these fruits is the purification of love, until the soul is so inflamed with love of God, that it feels as if wounded and languishes with the desire to love Him still more intensely. The first difficulty mystical writers encounter in their treatises on contemplation is the proper terminology for its degrees, or the classification of the experiences of the soul as it advances in the mystical union with God effected by this extraordinary form of prayer. Ribet in "La Mystique Divine" has a chapter (x) on this subject, and the present writer treats it in chapter xxix of his "Grace of Interior Prayer" (tr. of the sixth edition). Scaramelli follows this order: the prayer of recollection; the prayer of spiritual silence; the prayer of quiet; the inebriation of love; the spiritual sleep; the anguish of love; the mystical union of love, and its degrees from simple to perfect union and spiritual marriage. In this union the soul experiences various spiritual impressions, which mystical writers try to describe in the terminology used to describe sense impressions, as if the soul could see, hear, touch, or enjoy the savour or odour of the Divinity. Ecstatic union with God is a further degree of prayer. This and the state of rapture require careful observation to be sure that the Evil One has no share in them. Here again mystical writers treat at length the deceits, snares, and other arts practised by the Evil One to lead souls astray in the quest for the mystical union. Finally, contemplation leads to a union so intimate and so strong that it can be expressed only by the terms "spiritual marriage" (see Marriage, Mystical). The article on contemplation (q. v.) describes the characteristics of the mystical union effected by contemplation. No treatise of mystical theology is complete without chapters on miracles, prophecies, revelations, visions, all of which have been treated under their respective headings.

As for the history or development of mysticism, it is as difficult to record as a history of the experiences of the human soul. The most that can be done is to follow its literature, mindful that the most extraordinary mystical experiences defy expression in human speech, and that God, the Author of mystical states, acts upon souls when and as He wills, so that there can be no question of what we could consider a logical or chronological development of mysticism as a science. Still, it is possible to review what mystical writers have said at certain periods, and especially what St. Teresa did to treat for the first time mystical phenomena as a science. Before her, mystics were concerned principally with ecstasies, visions, and revelations; she was the first to attempt a scientific analysis of the process of mystical union brought about by contemplation. As the contribution to the science and history of mystical theology by each of the writers in the following list has been sufficiently noted in the articles on them, it will suffice here to mention the titles of some of their characteristic works.

Famous Mystics Prior to the Nineteenth Century.—St. Gregory I the Great (b. at Rome, c. 540; d. there, 604): "Commentaries on Job"; this book is called the Ethics of St. Gregory. The writings of Dionysius the Pseudo-Areopagite did not reach the West until about 824, when they were sent to Louis the Pious by Michael the Stammerer, Emperor of Constantinople: "Opera". Hugh of St. Victor, canon regular at Paris (b. in Saxony, 1096; d. at Paris, 1141): *passim.* St. Bernard, Abbot of Clairvaux (b. near Dijon, 1090; d. at Clairvaux, 1153): "On the Canticle of Canticles". Richard of St. Victor, canon regular at Paris (d. at Paris, 1173): "De contemplatione". St. Bonaventure, Minister General of the Friars Minor (b. at Bagnorea, 1221; d. at Lyons, 1274): "Journey of the Soul towards God". The "Seven Roads of Eternity", which has sometimes been attributed to him, is the work of a Friar Minor, Rudolph of Bibrach, of the fourteenth century. St. Gertrude, a Benedictine (b. at Eisleben, 1256; d. at Helfta, Saxony, 1302): Revelations. Blessed Angela of Foligno (b. at Foligno, 1248; d. there, 1309): "Life and Revelations" in "Acta SS.", I, January, 186–234; this work is one of the masterpieces of mysticism. Tauler, a Dominican (b. at Strasburg, c. 1300; d. there, 1361): "Sermons" (Leipzig, 1498). Blessed Henry Suso, a Dominican (b. at Constance, c. 1295; d. at Ulm, 1366): "Exemplar" (Augsburg, 1482). "The Book of the Nine Rocks" is not by him but by a merchant of Strasburg, the somewhat unorthodox Rulman Merswin. St. Bridget of Sweden (b. c. 1303; d. at Rome, 1373): "Revelations" (Nuremberg, 1500). Blessed Ruysbroeck, surnamed the Admirable (b. at Ruysbroeck, 1293; d. at Groenendael, 1381): "Opera omnia", Latin tr. by the Carthusian Surius (Cologne, 1692). François-Louis Blosius (de Blois), Benedictine Abbot of Liessies (b. near Liège, 1506; d. at Liessies, 1566): "Opera" (Ingolstadt, 1631).

St. Teresa (b. at Avila, 1515; d. at Aba de Tormes, 1582): "Opera" (Salamanca, 1588). St. John of the Cross, founder of the Discalced Carmelites (b. at Hontiveros, 1542; d. at Ubeda, 1591): "Opera" (Seville, 1702). Venerable Luis de Lapuente (b. at Valladolid, 1554; d. there, 1624): "Life of Father Baltasár Alvarez", confessor of St. Teresa (Madrid, 1615); "Spiritual Guide" (Valladolid, 1609); "Life of Marina de Escobar" (2 vols., Madrid, 1665–73). St. Francis de Sales, Bishop of Geneva (b. at Thorens, near Annecy, 1567; d. at Lyons, 1622): "Treatise on the Love of God" (Lyons, 1616). Alvarez de Paz, S. J. (b. at Toledo, 1560; d. at Potosi, 1620): "De inquisitione pacis" in "Opera", III (Lyons, 1647). Philip of the Blessed Trinity, General of the Discalced Carmelites (b. at Malancène, near Avignon, 1603; d. at Naples, 1671): "Summa theologiæ mysticæ" (Lyons, 1656). Jean-Joseph Surin (q. v.). Venerable Marie de l'Incarnation (b. at Tours, 1599; d. at Quebec, 1672): "Life and Letters", published by her son Dom Claude Martin, O. S. B. (Paris, 1677). Bossuet called her the "Teresa of the New World". Bossuet, Bishop of Meaux (b. at Dijon, 1627; d. at Paris, 1704): "Instruction sur les états d'oraison" (Paris, 1697). Joseph of the Holy Ghost, Definitor General of the Discalced Carmelites (d. 1639): "Cursus theologiæ mystico-scholasticæ" (6 vols., Seville, 1710–40). Emmanuel de la Reguera, S. J. (b. at Aguilàr del Campo, 1668; d. at Rome, 1747): "Praxis theologiæ mysticæ" (2 vols., Rome,1740–45), a development of the mystical theology of Wading (Father Godinez). Scaramelli, S. J. (b. at Rome, 1687; d. at Macerata, 1752): "Direttorio mistico" (Venice, 1754). As a description, this is the best treatise of the eighteenth century despite its too complicated classification; Voss has published a compendium of it, entitled "Directorium Mysticum" (Louvain, 1857). Schram, O. S. B. (b. at Bamberg, 1722; d. at Bainz, 1797): "Institutiones theologiæ mysticæ" (Augsburg, 1777), chiefly an abridgment of la Reguera. More complete lists (176 names) will be found in Poulain, "Graces d'Oraison" (7th ed., Paris, 1911); tr., "The Graces of Interior Prayer" (London, 1910); and in Underhill, "Mysticism" (New York, 1912).

Aug. Poulain.

Theonas, Bishop of Alexandria from about 283 to 301 (Eusebius, "Chronicle", Ann. Abr. 2299, St. Jerome's version). In his time Achillas, who had been appointed presbyter at Alexandria, at the same time with Pierius, became celebrated (Euseb., "Hist. eccl.", III, xxxii). The celebrated letter of Theonas to Lucianus, chamberlain to Diocletian, which has often been quoted as giving such a lifelike description of the position of a Christian in the imperial Court has been pronounced, first by Batiffol and then by Harnack, to be a forgery. Their verdict is endorsed by Bardenhewer. It was first published from what purported to be a transcript made by Jérôme Vignier, by Dacherius in his "Spicilegium". Theonas is commemorated in the Roman Martyrology on 27 August. St. Athanasius in his apology to Constantinus speaks of a church dedicated by his predecessor, St. Alexander, to Theonas. The same church is alluded to in the "Acts of SS. Pachomius and Theodorus".

Untersuchungen*, IX (Leipzig, 1903), iii, new series, English tr. of epistle in Clarke, *Ante-Nicene Fathers: The Writings of Methodius etc.* For a number of fabulous stories told by medieval Arabic writers (Severus, Eutychius, etc.) see Renaudot, *Hist. Patriarch: Alexand.*, 50 sq.; *Acta SS.*, IV, August, 579 sq.

F. J. Bacchus.

Theophanes, Saint, chronicler, b. at Constantinople, about 758; d. in Samothracia, probably 12 March, 817, on which day he is commemorated in the Greek menologies and in the Roman Martyrology. He was the son of Isaac, imperial governor of the islands of the White Sea, and of Theodora, of whose family nothing is known. After the early death of his parents he came to the Court of Constantine Copronimus. He was married at the age of twelve, but induced his wife to lead a life of virginity, and in 799, after the death of his father-in-law, they separated with mutual consent to embrace the religious state, she choosing a convent on an island near Constantinople, while he entered the monastery called Polychronius in the district of Sigriano near Cyzicus. Later he built a monastery on his own lands on the island Calonymus (now Calomio). After six years he returned to Sigriano, founded an abbey known by the name "of the great acre", and governed it as abbot. As such he was present at the second General Council of Nicæa, 787, and signed its decrees in defence of the sacred images. When the Emperor Leo the Armenian again began his iconoclastic warfare, he ordered Theophanes to be brought to Constantinople and tried in vain to induce him to condemn what had been sanctioned by the council. Theophanes was cast into prison and for two years suffered cruel treatment; he was then banished to Samothracia, where, overwhelmed with afflictions, he lived only seventeen days and wrought many miracles after death.

At the urgent request of his friend George Syncellus (d. 810), Theophanes undertook the continuation of his chronicle, during the years 810–15 (P. G., CVIII, 55). He treated of the time from the year 284–813, and made use of material already prepared by Syncellus, probably also the extracts from the works of Socrates, Sozomenus, and Theodoret, made by Theodore Lector, and the city chronicle of Constantinople. The work consists of two parts, the first giving the history, arranged according to years, the other containing chronological tables, full of inaccuracies and therefore of little value. It seems that Theophanes had only prepared the tables, leaving vacant spaces for the proper dates, but that these had been filled out by some one else (Hurter, "Nomencl.", I, Innsbruck, 1903, 735). The first part, though lacking in historical precision and criticism, which could scarcely be expected from a man of such ascetical disposition, greatly surpasses the majority of Byzantine chronicles (Krumbacher, "Gesch. der byz. Litt.", 1897, 342). The chronicle was edited at Paris in 1655 by Goar; again at Venice in 1729 with annotations and corrections by Combefis. A Latin version was made by Anastasius Bibliothecarius, and both were ably edited by de Boor (Leipzig, 1883).

Brooks, *The Sources of Theophanes and the Syriac chroniclers* in *Byzant. Zeitschrift*, XV (1906), 578; Stadler, *Heiligenlexicon*, a dithyramb on Theophanes, in *Münchener Sitzungsbericht*, 1896, 583; *Acta SS.*, II, March, 210; Chevalier, *Biog-Bibl.*, II, 4437; *Anal. Boll.*, XXXI, 11.

Francis Mershman.

Theophanes Kerameus (Κεραμεύς, potter), Archbishop of Rossano in Calabria (1129–52), a celebrated homiletic writer. His sermons, ninety-one of which are known in manuscript, are mostly exegetical, and written in Greek, which was then still extensively spoken in Sicily and Southern Italy. They are remarkable for their simplicity and naturalness, and are masterpieces of oratorical skill and, for those times, rare examples of lucid and unforced expositions of biblical texts. They were first edited, together with a Latin translation and extensive annotations, by Francesco Scorso, S.J. (Paris, 1644), which edition is reprinted in P. G., CXXXII, 125–1078. A new edition was prepared by Gregory Palamas (Jerusalem, 1860). The fact that various other individuals also bore the surname "Kerameus" has given rise to a controversy concerning the authorship of these homilies. Scorso, their first editor, falsely supposed Theophanes Kerameus to have lived in the ninth century and to have been Bishop of Taormina in Sicily. Batiffol, in his work entitled "L'abbaye de Rossano" (Paris, 1891), XXXI, 36–56, holds that part of the homilies were written by the Calabrian monk John Philagathos, a disciple of Abbot Bartholomæus of Grottaferrata (d. c. 1050).

Concerning a probable interpolation in homily 55, see Langen, in *Revue Internationale de Théologie*, III (1895), 122–7.

Michael Ott.

Théophane Vénard, Blessed (Jean-Théophane Vénard), French missionary, b. at St-Loup, Diocese of Poitiers, 1829; martyred in Tonkin, 2 Feb., 1861. He studied at the College of Doué-la-Fontaine, Montmorillon, Poitiers, and the Paris Seminary for Foreign Missions which he entered as a sub-deacon. Ordained priest 5 June, 1852, he departed for the Far East, 19 Sept. After fifteen months at Hong Kong he arrived at his mission in West Tonkin, where the Christians had recently been tried by a series of persecutions under Minh-Menh, a monster of cruelty. Shortly after Father Vénard's arrival a new royal edict was issued against Christians, and bishops and priests were obliged to seek refuge in caves, dense woods, and elsewhere. Father Vénard, whose constitution had always been delicate, suffered almost constantly, but continued to exercise his ministry at night, and, more boldly, in broad day. On 30 Nov., 1860, he was betrayed and captured. Tried before a mandarin, he refused to apostatize and was sentenced to be beheaded. He remained a captive until 2 Feb., and during this interval lived in a cage, from which he wrote to his family beautiful and consoling letters, joyful in anticipation of his crown. His bishop, Mgr Retord, wrote of him at this time: "Though in chains, he is as gay as a little bird".

On the way to martyrdom Father Vénard chanted psalms and hymns. To his executioner, who coveted his clothing and asked what he would give to be killed promptly, he answered: "The longer it lasts the better it will be". His head, after exposure at the top of a pole, was secured by the Christians and is now venerated in Tonkin. The body rests in the crypt at the Missions Etrangères, Paris. Other precious relics are in the hands of the martyr's brother, Canon Eusebius Vénard, curé of Assais Deux Sèvres, France, who possesses, also, most of the martyr's letters, including those written from the cage. In a letter addressed to his father, Théophane refers thus to his approaching sacrifice: "A slight sabre-cut will separate my head from my body, like the spring flower which the Master of the garden gathers for His pleasure. We are all flowers planted on this earth, which God plucks in His own good time: some a little sooner, some a little later . . . Father and son may we meet in Paradise. I, poor little moth, go first. Adieu". The cause of his beatification was introduced at Rome in 1879, and he was declared Blessed, 2 May, 1909. The beatification ceremony brought a large delegation from France, including the Bishop of Poitiers and the martyr's only surviving brother. Théophane Vénard was beatified in company with thirty-three other martyrs, most of whom were natives of Tonkin, Cochin-China, or China.

JAMES ANTHONY WALSH.

Theophilanthropists, or "Friends of God and Man", a deistic sect formed in France during the latter part of the French Revolution. The legal substitution of the Constitutional Church, the worship of Reason, and the cult of the Supreme Being in place of the Catholic Religion had practically resulted in atheism and immorality. With a view to offsetting those results, some disciples of Rousseau and Robespierre resorted to a new religion, wherein Rousseau's deism and Robespierre's civic virtue (*règne de la vertu*) would be combined. Chemin wrote the "Manuel des théophilanthropes", and Haüy offered his institute for the blind as a provisional place of meeting. When, later, the Convention turned over to them the little church of Sainte-Catherine, in Paris, the nascent sect won a few followers and protectors; still its progress was slow till La Révellière-Lépeaux, an influential member of the Directory, took up its cause. But it was only after the Revolution of 18 Fructidor, which left him master of the situation, that his sympathy bore fruit. Then was the apogee of Theophilanthropism. Blended in a way with the *culte décadaire*, it came into possession of some of the great churches of Paris like Notre-Dame, St-Jacques du Haut-Pas, St-Médard etc.; it took a conspicuous part in all the national celebrations, and from the metropolis passed into the provinces, chiefly the Department of Yonne. The movement, in spite of a strong opposition not only on the part of Catholics but also from Constitutionals and Philosophers, was gradually taking hold of the masses when the overthrow of the Directory brought it to an abrupt end. The First Consul set his face against the new religionists and they disbanded. Sporadic attempts at reviving Theophilanthropism were made in the course of the nineteenth century. In 1829, Isambert circulated a manifesto for the purpose of grouping the French deists, but nothing came of it. In 1854 Henri Carle founded "L'alliance religieuse universelle" with "La libre conscience" as its organ, but both society and periodical disappeared during the Franco-Prussian war. In 1882, Décembre and Vallières, through "La fraternité universelle" and many similar publications, sought directly to reorganize the sect, but the attempt failed and, in 1890, Décembre confessed the impossibility of rousing public interest. Camerlynck's voluminous book, "Théisme", published at Paris in 1900, had a similar aim and met a similar fate.

Theophilanthropism is described in the "Manuel du théophilanthropisme", of which there were new editions made as the work progressed. The governing body consisted of two committees, one called "comité de direction morale", in charge of the spiritual, the other styled "comité des administrateurs", in charge of the temporalties. No dogmatic creed was imposed on the adherents of the new religion, the two fundamental tenets, viz. the existence of God and the immortality of the soul, being purely sentimental beliefs (*croyances de sentiment*), deemed necessary for the preservation of society and the welfare of individuals. The moral teaching, considered as by far the principal feature of the movement, held a middle position between the severity of Stoicism and the laxity of Epicureanism. Its basic principle was: good is all that tends to preserve and perfect man; evil is all that tends to destroy or impair him. It is in the light of that axiom and not of the Christian standard—in spite of the phraseology—that we should view the commandments concerning the adoration of God, the love of our neighbour, domestic virtues, and patriotism. Theophilanthropist worship was at first very simple and meant chiefly for the home: it consisted in a short invocation of God in the morning and in a kind of examination of conscience at the end of the day. A plain altar on which were laid some flowers and fruits, a few inscriptions appended to the walls, a platform for the readers or speakers, were the only furnishings allowed. The founders were particularly anxious that this simplicity be strictly adhered to. Nevertheless, the progress of the sect led gradually to a much more elaborate ceremonial. It is a far cry from the early meetings where the minister, or *père de famille*, presided at prayer or mimicked Christian baptism, First Communion, marriages, and funerals, to the gorgeous display of the so-called national festivals. There even was a Theophilanthropist Mass, which, however, came much nearer to a Calvinist service than to the Catholic Liturgy. Of the hymns adopted by the sect, some taken from the writings of J. B. Rousseau, Madame Deshoulières, or even Racine, breathe a noble spirit but, side by side with these, there are bombastic lucubrations like the "Hymne de la fondation de la république" and the "Hymne à la souveraineté du peuple". The same strange combination is found in the feasts where Socrates, Jean-Jacques Rousseau, and St. Vincent de Paul are equally honoured, and in the sermon where political harangues interlard moral exhortations. Quite noteworthy is Dubroca's funeral oration of George Washington, wherein the orator, under cover of the American hero, catered to the rising Bonaparte and laid out for him a whole political programme which, read in the light of subsequent events, sounds like irony. Despite the hint, Bonaparte chose to be the Cromwell rather than the Washington of the new religionists.

Under the appearance of moderation, Theophilanthropism was really an anti-Christian movement. Whenever superstition was mentioned, it meant the Christian religion. There is no doubt that the first Theophilanthropists were Freemasons and that Freemasonry was the leading spirit of the movement throughout. Neither can a secret collusion between Protestantism and Theophilanthropism, at least in the beginning, be denied. The first idea of the sect really belongs to David Williams, an English minister who exercised a considerable influence in Paris during the Revolution. Chemin consulted the French Calvinists before launching his "Manuel". If later a controversy arose between Protestants themselves as to the merits of Theophilanthropism, this was due to the imprudence of the Theophilanthropists, who, elated by apparent success, lifted the mask. The constitutional clergy, in the national council held at Notre-Dame in 1797, protested against the new religion, and Grégoire wrote in his "Annales de la Religion" (VI, no. 5): "Theophilanthropism is one of those derisive institutions which pretend to bring to God those very people whom they drive away from Him by estranging them from Christianity. . . . Abhorred by Christians, it is spurned by philosophers who, though they may not feel the need of a religion for themselves, still want the people to cling to the faith of their fathers." Catholics went further in their denunciations and exposed, beside the anti-Christian and masonic spirit that animated the sect, the political intrigues hiding under the mask of religion. Pope Pius VII, 17 May, 1800, placed an interdict on the churches that had been desecrated by the deistic rites, and Cardinal Consalvi, in the course of the negotiations regarding the Concordat of 1801, demanded that a speedy end be put to the Theophilanthropists' profanation of the Catholic temples.

J. F. Sollier.

Theophilus, Bishop of Antioch. Eusebius in his "Chronicle" places the name of Theophilus against that of Pope Soter (169–77), and that of Maximinus, Theophilus's successor, against the name of Eleutherus (177–93). This does not mean that Maximinus succeeded Theophilus in 177, but only that Theophilus and Maximinus flourished respectively in the times of Soter and Eleutherus. Lightfoot and Hort showed that Eusebius, having no such precise chronological data for the bishops of Antioch as he had for those of Rome and Alexandria, placed the names of the Antiochene bishops against those of contemporary Roman bishops (Lightfoot, "St. Ignatius", etc., II, 468 sq., and "St. Clement", etc., I, 224 sqq.). When therefore we find in the third book of Theophilus, "Ad Autolycum", that the writer was alive after the death (180) of Marcus Aurelius, it does not follow, as even writers like Harnack and Bardenhewer suppose, that Eusebius made a chronological blunder.

The "Ad Autolycum", the only extant writing of Theophilus, is an apology for Christianity. It consists of three books, really separate works written at different times, and corresponds exactly to the description given of it by Eusebius as "three elementary works" (Hist. eccl., IV, xxiv). The author speaks of himself as a convert from heathenism. He treats of such subjects as the Christian idea of God, the Scripture accounts of the origin of man and the world as compared with pagan myths. On several occasions he refers (in connexion with the early chapters of Genesis) to an historical work composed by himself. Eusebius (op. cit.) speaks of refutations of Marcion and Hermogenes, and "catechetical books". To these St. Jerome (De vir. illust., xxv) adds commentaries on Proverbs and the Gospels. He speaks of the latter in the prologue to his own commentary on the Gospels, and also in his epistle "Ad Algasiam", where we learn that Theophilus commented upon a Diatessaron or Gospel Harmony composed by himself ("Theophilus . . . quattuor Evangelistarum in unum opus compingens"). A long quotation in the same epistle is all that survives of this commentary, for Zahn's attempt to identify it with a Latin commentary ascribed in some MSS. to Theophilus has found no supporters.

Batiffol, *Anciennes littératures chrétiennes: Lit. grecque*, 101–2; Zahn, *Forschung. zur Gesch. des N.T. Kanons*, II; Harnack, *Altchrist. Lit.*, 496 sq.; Idem, *Chronologie*, I, 319 sq.; Bardenhewer-Shahan, *Patrology* (St. Louis, 1908), 65–7. For Theophilus's teaching concerning the Eternal Word see Newman, *Causes of Rise and Success of Arianism* in *Tracts Theol. and Eccles.* (London, 1908), 255–57. The *Ad Autolycum* was first published by Frisius (Zurich, 1546); the latest ed. by Otto, *Corp. apologet.*, VIII (Jena, 1861). English tr. by Flower (London, 1860), and in Clarke, *Ante-Nicene Library*. The supposed *Commentary on the Gospels* was first printed by de La Bigne, *Bibl. SS. Patrum*, V (Paris, 1575), then by Otto (loc. cit.), then by Zahn (loc. cit., 29–85). For references to literature in this commentary see Bardenhewer; Morin in *Revue Bénédictine*, XXII, 12 sq.; and Quentin in *Revue Bénédictine*, XXIV, 107 sq. Quentin gives reasons for regarding John of Jerusalem as possibly the author. For monographs on Theophilus's doctrine see Bardenhewer.

F. J. Bacchus.

Theophilus, Patriarch of Alexandria (385–412). Concerning the extraction and early life of Theophilus we have but scanty information. He had a sister of similar temperament and St. Cyril, his successor, was his nephew. Hydatius ("Chron.", II; P. L., LI, 874) calls him a "most learned man", and dedicates to him an Easter table for 100 years. St. Jerome informs us that he did not come forward as a public teacher before 385 ("Contra Rufin.", III, 18, in P. L., XXIII, 492). After his election to the Patriarchate of Alexandria (385) he showed himself a man of great intellectual gifts and capacity, but also extremely violent and unscrupulous in the choice of his means. His name is connected with three important historical events: the decay of paganism in Egypt, the Origenistic controversy, and the deposition and banishment of St. John Chrysostom. About 390 Theophilus deprived the pagans of Alexandria of a temple, probably with the consent of the Emperor Theodosius I, and apparently destroyed several other temples (Socrates, V, 16; Ammian., XXII, xi, 7). A riot ensued, and a number of Christians were slain. With Theophilus at their head, the Christians retaliated by destroying the celebrated temple of Serapis, on the ruins of which the patriarch erected a church. He also erected a magnificent church at Canope. In 391 or 392 Theophilus was requested by the Synod of Capua to exert his influence to end the schism at Antioch. However, he failed to establish peace, and it was only in 398 that St. John Chrysostom, with the assistance of Theophilus, succeeded in re-establishing ecclesiastical communion between Flavian and Rome.

Until 399 Theophilus was regarded as a friend of Origen and the Origenists. Many of the so-called Origenist monks were among his best friends; some of them he appointed to ecclesiastical offices and dignities: for example, he named Isidore archpresbyter and patriarchal *œconomus*, and raised others to the episcopate. In the quarrel between Johannes-Rufinus and Epiphanius-Jerome he took the side of the first (Socrates, VI, 10), informed Jerome through Isidore in 396 that he should show more respect for the authority of his bishop, John of Jerusalem (Epp. lxiii and lxxxii; "Contra Rufin.", III, 17; "Contra Johannem Hieros.", 37), and accused St. Epiphanius of anthropomorphism. He also banished the Egyptian bishop Paulus, an opponent of the Origenists, and reproached St. Jerome for the hospitality he showed him (Jerome, "Cont. Rufinum", III, 17 and 78). Between 399 and 400 Theophilus suddenly altered his attitude; the chief motive for the change seems to have been a personal quarrel with the archpresbyter Isidore, well known as a friend of the Origenists. Isidore had taken charge of a sum of money and, in accordance with the express request of the donor, did not inform Theophilus, who suffered from a "mania for building" and avarice (St. Isidore Pelus., Ep. i, 152). The patriarch heard of the matter, however, and did not shrink from the vilest slanders against Isidore and even acts of violence (Pall., VI; Sozomen, VIII, 12). Isidore found protection with his friends, the monks of Nitria, whereupon Theophilus turned against them also. At first he set the anthropomorphic-minded monks, the enemies of the Origenists, against them, although he had condemned their views in his Easter letter of 399 (Sozomen, VIII, 11; Cassian, "Coll.", X, 2), then directed against them his Easter letter of 401 (P. L., XXI, 773), and finally condemned Origenism at the Synod of Alexandria in 401.

Then placing himself at the head of soldiers and armed servants he marched against the monks, burned their dwellings, and ill-treated those whom he captured (Pall., vii; Socrates, VI, 7; for Jerome's congratulations to Theophilus see Jerome, Ep. lxxxvi). The monks, about 300 in number, proceeded first to Palestine, where the majority of them settled near Scythopolis; the four Tall Brethren meanwhile proceeded to Constantinople to ask protection and justice from St. John Chrysostom and the emperor. Theophilus was summoned to Constantinople to answer their charges, and thus begins his connexion with the tragedy of Chrysostom, which soon took the first place in his and the public interest (see John Chrysostom, Saint). At the Synod of the Oak in 403 Theophilus concluded an equitable peace with the persecuted monks, and on his return to Alexandria is said to have again received the books of Origen (Socrates, VI, 17). That Theophilus may have been really very "broad-minded", is shown by the fact that he consecrated the philosopher Synesius bishop about 410, although the latter had not yet been baptized, and had stipulated that, as bishop, he might retain his wife and adhere to his Platonic views (pre-existence of soul, allegorical explanation of the Resurrection, etc.). As a writer Theophilus did not attain much prominence. In addition to his Easter letters, of which three are extant in a Latin translation by Jerome (P. L., XXII, and P. G., LXV, 53 sqq.), he wrote "one large volume against Origen" (Gennadius, 33), of which some fragments are preserved (collected in Gallandi, "Bibl. vet. patr.", VII, 801–52; P. G., LXV, 33–68; Zahn, "Forschungen zur Gesch. des neutest. Kanons", II, Erlangen, 1883, p. 234 sqq.). The Canons ascribed to Theophilus are in Pitra, "Juris eccles. Græcor. hist. et monum.", I (Rome, 1864), 546–649. Inauthentic and doubtful writings were also in circulation under Theophilus's name (Gennadius, 33: "Legi et tres libros suo nomine titulatos, sed lingua inconsonans est. Non valde credidi").

In addition to the sources already mentioned, consult: Theodoret, *Hist. eccl.*, V, xxii; Sulpicius Severus, *Dial.*, I, 6–7, in *P. L.*, XX, 187–8; Tillemont, *Mémoires*, XI (Paris, 1698–1712), 441–99, 633–8; Ceillier, *Hist. générale*, VII (Paris, 1729–63), 438–47; Prat, *Origène* (Paris, 1907), xlviii sq.; Vincenzi, *Historia critica; quæstiones inter Theophilum Epiphanium, Hieronymum, adversarios Origenis et inter Origenis patronos Joh. Chrysostomum, Rufinum et monachos Nitrienses* (Rome, 1865); Cavallera, *Le schisme d'Antioche* (Paris, 1905), 283–4; Koch, *Synesius von Cyrene bei seiner Wahl u. Weihe zum Bischof* in *Histor. Jahrb.*, XXIII (1902), 751–74.

Chrys. Baur.

Theosophy, Θεοσοφία, wisdom concerning God, is a term used in general to designate the knowledge of God supposed to be obtained by the direct intuition of the Divine essence. In method it differs from theology, which is the knowledge of God obtained by revelation, and from philosophy, which is the knowledge of Divine things acquired by human reasoning. It is often incorrectly confounded with mysticism, for the latter is properly the thirst for the Divine, the aspiration for the invisible, and hence a natural manifestation of the religious sentiment. By intuition or illumination the initiated Theosophists are considered to be in harmony with the central principle of the universe. This knowledge of the secret forces of nature, of the true relation between the world and man, frees them from the ordinary limitations of human life, and gives them a peculiar power over the hidden forces of the macrocosm. Their exceptional faculties are alleged as experimental proof of their superior science; they are the only guarantee of the truth of their teaching. They are said to transmit this truth by way of revelation. Thus theosophy appeals to tradition, but not in the Christian sense.

(1) India is the home of all theosophic speculation. Oltramere says that the directive idea of Hindu civilization is theosophic. Its development covers a great many ages, each represented in Indian religious literature. There are formed the basic principles of theosophy. Knowledge of the occult laws in nature and in life, the intuitive method, superhuman powers, hostility to established religion are not all equally apparent in each age, but are present conjunctively or separately through the whole course of its history. The early Brahmanic writings contain the germs, which have gradually developed into a rich vegetation of ideas and beliefs. These ideas are organized into systems, not however homogeneous or autonomous but mixed with other belief. Then they leave the schools to act upon the masses, either in forming a religion, e. g. Buddhism, or in penetrating popular religions already existing, e. g. Hinduism. Thus the Upanishads teach: that the individual soul is identical with the universal soul, hence the doctrine of *advaita*, i. e. non-duality; that the individual existence of the soul is a state of suffering, hence the doctrine of *samsara*, i. e. metempsychosis; that the individual soul is delivered from suffering by its reunion with the universal soul, a reunion realized by seizing the consciousness of identity with it, hence the doctrine of *moksa*, i. e. salvation. The basic doctrines of the Vedanta and Saukhya systems are monistic Pantheism, intuition as the supreme means to reach truth, metempsychosis, the world of sense is only a very little part of the category of things, the theory and method of salvation strictly intellectual. These systems developed from the Upanishads. The final development is the Yoga. Yoga, i. e. "one who fits himself, or exercises", refers to the exercises practised to free the soul from the body, which to it is like a string to a bird. Some of these exercises were: to rid one's self of moral faults (though the masters do not agree as to what these faults are); to sit in certain painful postures, check the breath, and reduce thought to a minimum by staring at the tip of the nose; to place the soul in a particular part of the body, and so gradually acquire mastery over it, or, rather, let the soul, the true self, acquire mastery over the body; to starve and learn to subsist on air, or even without it; to concentrate thought by meditation, i. e. to think of nothing, *Thyana*, the highest state of which is the cataleptic trance *samadhi*, in which mind is suppressed but the soul is in full activity. In this state the person is a *mahatma*, i. e. master-soul and can enjoy a temporary release from the body which it leaves to go roaming about, performing wonderful feats on material nature and controlling other less powerful souls. This latter was the secret of the Yoga's real power and was supposed to be done by a transfer of soul. When the soul re-enters the body, the Yoga wakes and is like other people. By repeated exercises the soul can become so strong that it secures perpetual release from the body, thus, according to the older Yoga teaching, it flies to heaven where it enjoys great happiness, riding in a celestial car attended by lovely women and music; but with the latter Yogas, on breaking all bodily bonds it formed immediate absorption into the Supreme Soul.

(2) Theosophic teaching comes to the front in the third period of Greek philosophy. Hence it is found in the Jewish-Greek philosophy with the neo-Platonists. The theosophic atmosphere due to the influence of the Orient is plainly shown in Plotinus. The Gnostic systems reveal more theosophy than theology, and in the Jewish Kabbala is found a theosophy mixed with various forms of magic and occultism. The Renaissance brought into modern thought neo-Platonism and the Kabbala, e. g. Reuchlin (d. 1492), Agrippa (d. 1535), Cardano (d. 1576), Paracelsus (d. 1540), Weigel (d. 1588). More important is the teaching of Jakob Böhme (d. 1624). He taught that the "eternal dualism" of God is the ultimate cause of all evil; that there is a "dark" negative principle in God, which evil element makes manifest His goodness. Without this there would be no revelation. Further, were it not for this principle God could not know Himself. Böhme's teaching influenced Baader (q. v.), Schelling, and Hegel. Theosophic principles colour the theology of Swedenborg, and are found in the group of modern thinkers, especially neo-Hegelians, who claim that the existence of God is known by direct intuition or by a special faculty of the soul.

A new importance of these teachings in modern thought is due to the school of Modern theosophy dating from the foundation of the Theosophical Society in New York City by Madame Blavatsky in 1875. She is the chief and only authority for the revelation of so-called Tibetan occultism. A. P. Sinnett however uses the term Esoteric Buddhism. They claimed to have the true solution for the problems of the universe and of man from the Upanishads and Buddhist Sutras through Oriental savants, *mahatmas*, the faithful depositories of a profound and superhuman wisdom. In fact, a great part of their nomenclature is derived from India, and they seek there for a justification of teachings drifting about in modern thought and derived to a great extent, if not wholly, from neo-Platonic and Jewish sources through the Renaissance. The objects of the society are: to form the nucleus of a universal brotherhood of humanity without distinction of race, creed, sex, caste, or colour; to encourage the study of comparative religion, philosophy, and science; to investigate the unexplained laws of nature and the powers latent in man. This last clause gives occasion to include magic, the occult, the uncanny, and the marvellous in any and every form. Madame Blavatsky, with Colonel Olcott, went to India in 1878. Shortly afterwards her frauds were exposed through letters written by her and published by Columb and his wife, who had been in her service. This was acknowledged by the London Society of Psychical Research, which in Nov., 1884 sent R. Hodgson, of St. John's College, Cambridge to investigate (Edmund Garrett, "Isis very much Unveiled", London, 1895; Francis Podmore, "Studies in Psychical Research"). In spite of this, however, the teaching was continued and propagated by her disciples Mrs. Besant, Col. Olcott, A. P. Sinnett, and others.

Modern theosophy claims to be a definite science. Its teachings are the product of thought, and its source is consciousness, not any Divine revelation. As a science it is supposed to be based on investigation and experimentation of the occult laws in nature and in human life. Only those qualified for the inquiry can grasp these laws, and they gain from this knowledge certain superhuman powers. Mrs. Besant calls it the great synthesis of life, i. e. of religion, science, and philosophy, as old as thoughtful humanity, proclaimed in a new form suited to the present time. Its aim is that spirit is and can become the master of matter. Hence it is considered as a protest against materialism which teaches that thought and feeling are the results of the aggregations of matter. Theosophy on the contrary sees in matter an instrument of life, and in thought the creative and moulding power of matter.

The basic teaching of theosophy is the universal brotherhood of humanity. Hence springs the preaching of toleration to all persons and to all varieties of belief, e. g. Buddhists, Christians, Atheists. It considers the different religions as methods adopted by man in the search for God. They are of necessity various, because men differ in temperament, type, needs, and stages of evolution. Hence they are different and imperfect expressions of truth. As such it says: "we cannot afford to lose any of the world's religions, for each has its partial truth and its characteristic message which the perfect man must acquire." Hence theosophy appeals to men as the great peacemaker, for it teaches that all religions mean one and the same thing, or rather that they are all branches of a single tree. In this sense it attacks comparative mythology which tries to show that religion was originally the fruit of man's ignorance and will disappear with the increase of knowledge, whereas in fact religion comes from Divine knowledge, i. e. theosophy.

The principle of universal brotherhood rests upon the "solidarity" of all living, of all that is, in the one life and one consciousness. Solidarity springs from the belief in the immanence of God, the only and external life manifested in the multiplicity of creation. All forces are external; there is no supernatural, except the superhuman and supersensuous, i. e. powers greater than those normally exercised by man, which, however, can be developed. Ignorance therefore makes the miracle. Hence there is no personal God, and for this reason Madame Blavatsky and Mrs. Besant say that theosophy is more readily embraced by Atheists and Agnostics. Hence also Colville could teach that the spirit or soul in man is the only real and permanent part of his being; everything else pertaining to him is illusory and transitory. Solidarity, i. e. the common life pervading all things, is thus made the basis of morality. Hence a wrong done to one is done to all, as e. g. an injury inflicted on one part of the human organism results in pain diffused and felt throughout. At the same time we are told that God is good and man immortal, that the "immanence of God justifies religion", i. e. the search after Him, that all things move to good and to man's benefit, that man must understand and co-operate with the scheme of things.

Man has seven aspects, or rather is a being composed of seven principles. These are viewed in two groups: the Quaternary, corresponding to our animal nature, i. e. soul and body, the mortal part of man, the products of evolution; and the Triad, corresponding to our spiritual nature, i. e. spirit, for theosophists say that Christian philosophy holds the threefold division of body, soul, and spirit in man. The Quaternary is made up of *Sthula Sharira*, i. e. physical body; *Linga Sharira*, i. e. astral double; *Prana*, i. e. principle of life; *Kama*, i. e. our passional nature. The Triad is composed of: *Manas*, i. e. mind or the thinker; *Buddhi*, i. e. the dwelling-place of spirit; *Atnir*, i. e. spirit. Hence we find *Atnir-Buddhi* used conjointly. This Triad is called the Immortal Triad. It is united to the Quaternary by *Manas*, in itself viewed as *Higher Manas*, sending out a Ray, which as *Lower Manas* is imbedded in *Kama*. Thus *Kama-Manas* is the link joining our animal to our spiritual nature, and is the battle-ground of life's struggles. Man is primarily divine, a spark of the Divine life; this living flame passing out from the Central Fire, weaves for itself coverings within which it dwells and thus becomes the Triad, the *Atma-Buddhi-Manas*, the Immortal Self. This sends out its Ray, which becomes encased in grosser matter, in the Kamic body, in the Astral Double, and in the physical body. The Astral Double, i. e. rarer matter, the exact double of the physical body, plays a great part in spiritualistic phenomena. The *Manas* is the real I, the reincarnating ego makes the human personality. The Quaternary as a whole is viewed as the Personality, i. e. the shadow of the Self. In fact each principle or aspect may be considered a Personality in so far as it undervalues *Atma*, i. e. throws its shadow over *Atma* and prevents us from seeing in everything *Atma*, i. e. the One Eternal Existence. The seer however knows that *Atma* is the one reality, the essence of all things, that *Atma-Buddhi* is the Universal One Soul, itself an aspect of *Atma*, that *Atma-Buddhi-Manas* is the individual mind or Thinker, that the shadow of *Manas*, our *Atma-Buddhi*, makes men say "my soul" and "thy soul", whereas in reality we are all one with *Atma*, the Unknown Root. After death all of the Manasic Ray that is pure and unsoiled gradually disentangles itself, carrying with it such of life's experiences as are of a nature fit for assimilation with the Higher Ego. The Manasic Ego united to *Atma-Buddhi* passes into the Devachonic state of consciousness, rapt in blissful dreams coloured by the experiences of the earth-life. This state is a continuation of the earth-life shorn of its sorrows, and a completion of its noble and pure wishes.

Theosophy is not only a basis of religion; it is also a philosophy of life. As such, its main teachings are reincarnation and the law of Karma. Karma is the outcome of the collective life, a law of ethical causation. In the past incarnation the ego had acquired certain faculties, set in motion certain causes. The effect of these causes and of causes set in motion in previous incarnations and not yet exhausted are its Karma and determine the conditions into which the ego is reborn. Thus inequalities of natural gifts, e. g. genius, of temperament and of character are explained. The law of progress is the law of involution and evolution, the returning of the Divine Spark into a unity with Spirit through various reincarnations, which are viewed as a process of purification. Sin, poverty, and misery are the fruits of ignorance, and are gradually removed as the spirit in us becomes freed from earthly dross. There is no heaven nor hell. Death is the passage from this state of life to another. There is an evolution behind and before, with absolute certainty of final attainment for every human soul, i. e. to be one with the Absolute. As man advances in this process his spirit becomes stronger, and can develop latent powers, not shown in ordinary mortals.

Criticism.—In spite of a Christian ethical phraseology, theosophy in reality is a form of pantheism, and denies a personal God and personal immortality. Its appeal to the spiritual in man, and its striving after union with the Divine are based upon a contradictory metaphysic, an imaginary psychology, a system of ethics which recognizes no free-will, but only the absolute necessity of Karma. No evidence or proof is given for its teaching except the simple statements of its leaders. The denial of a personal God nullifies its claim to be a spiritualistic philosophy. Judging it as presented by its own exponents, it appears to be a strange mixture of mysticism, charlatanism, and thaumaturgic pretension combined with an eager effort to express its teaching in words which reflect the atmosphere of Christian ethics and modern scientific truths.

JOHN T. DRISCOLL.

Theotocopuli, DOMENICO (EL GRECO), one of the most remarkable Spanish artists, b. in Crete, between 1545 and 1550; d. at Toledo, 7 April, 1614. On 15 Nov., 1570, the miniature-painter Giulio Clovio wrote to Cardinal N. Farnese, recommending El Greco to his patron, describing him as a Cretan, who was then in Rome and had been a pupil of Titian. El Greco, however, derived very little influence from his master, for his works, beyond a certain influence of Bassano, Baroccio, Veronese, or Tintoretto, are individual and distinct. El Greco came to Spain in 1577. He signed his name in Greek characters, using the Latin form of his Christian name, and repeatedly declaring himself as a native of Crete. He appeared before the tribunal of the Inquisition at Toledo in 1582, as interpreter for one of his compatriots who was accused of being a Moor; he then definitely announced that he had settled in Toledo. Nothing is known of his parentage or early history, nor why he went to Spain; but in time he became typically Spanish, and his paintings exhibit all the characteristics of the people amongst whom he resided. From very early days he struck out a definite line for himself, glorying in cold tones with blue, in the use of grey and many varied tones of white, and in impressionistic work which foreshadowed ideas in art that were introduced one hundred and fifty years later. His first authenticated portrait is that of his patron and fellow-countryman Clovio, now at Naples; his last, that of a cardinal, in the National Gallery. His first important commission in Spain was to paint the reredos of the Church of Santo Domingo el Diego at Toledo. He may have been drawn to Spain in connexion with the work in the Escorial, but he made Toledo his home. The house where he lived is now a museum of his works, saved to Spain by one of her nobles.

DETAIL FROM THE BURIAL OF THE CONDE D'ORGAZ, BY THEOTOCOPULI, IN THE CHURCH OF S. TOMÉ, TOLEDO

His earliest important work is "El Espolio", which adorns the high altar in Toledo, but by far his greatest painting is the famous "Burial of the Count of Orgaz" in the Church of Santo Tomé. The line of portraits in the rear of the burial scene represents with infinite skill almost every phase of the Spanish character, while one or two of the faces in the immediate background have seldom, if ever, been equalled in beauty. It is one of the masterpieces of the world. The influence of El Greco in the world of art was for a long time lost sight of, but it was very real, and very far-reaching. Velasquez owed much to him, and, in modern days, Sargent attributes his skill as an artist to a profound study of El Greco's works. El Greco's separate portraits are marvels of discernment; few men have exhibited the complexities of mental emotion with equal success. The largest collection of his works outside of Spain belongs to the King of Rumania, some of the paintings being at Sinaia, others in Bukarest. In the National Gallery of London, in the collections of Sir John Stirling-Maxwell, the Countess of Yarborough, and Sir Frederick Cook, in the galleries of Dresden, Parma, and Naples, and in the possession of several eminent French collectors are fine examples of his work. But to study El Greco's work to perfection one must visit Toledo, Illescas, Madrid, the Escorial, and many of the private collections of Spain, and his extraordinary work will be found worthy of the closest study. He was a man of eccentric habits and ideas, of tremendous determination, extraordi-

Thera (or Santorin), Diocese of (Santorino), in the Cyclades. About the year 2000 b. c., the extinguished volcano of the island renewed its activities, destroyed the population, and a portion of the island which was engulfed in the sea. In 236 b. c. another eruption separated the island of Therasia from Thera; in 196 b. c. the islet of Hiera sprang up (Palæo-Kaïmeni); in a. d. 46 appeared Thia which was afterwards swallowed up by the sea; in 1570 a portion of the island of Thera caved in; in 1573 and 1711 two new islands arose; in 1866 there was a new volcanic eruption which lasted two years. The ancient town of Thera has been discovered at Haghios-Stephanos, near Mesavouno; the Ptolemies established an important garrison there. Some time after the eruption of the year 2000 b. c., the island called Calliste was repeopled by the Phœnicians, then by the Dorians who named it Thera about the year 620 b. c.; it became successively a tributary of Sparta, Athens, the Ptolemies, and finally the Romans. It is believed that Christianity was already introduced there in the second century and that certain tombs belonged to that epoch (Hiller von Gärtringen, "Thera", III, 195); a very old church dedicated to Saint Michael and other very ancient churches have been found there. The See of Thera was a suffragan of Rhodes in the seventh and tenth centuries (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 542, 558). It became a metropolitan see in the eighteenth century and after the incorporation of the island with the Kingdom of Greece it was reduced in 1833 to a bishopric, which rank it still holds.

Le Quien (Oriens christ., I, 941) and Hiller von Gärtringen (Thera, III, 198) give a list of twenty Greek bishops, of whom the greater part are posterior to the sixteenth century; this list could easily be completed. In 1207 the island fell into the power of a Latin lord, himself subject to the Duke of Naxos; the population decreased continually and in 1457 there were no more than 300 persons. In 1566 Thera fell under the domination of the Turks and took the name of Deir-Menlik. It received the name of Santorin only in the Middle Ages from Saint Irene, to whom the island had a special devotion. A Latin diocese, suffragan of Naxos, was established there; a number of bishops are known, who belonged principally to the fourteenth century (Le Quien, op. cit., III, 1007–12; Eubel, "Hierarchia catholica medii ævi", I, 456; II, 252; III, 309). Thera, in the district of the Cyclades, numbers 15,000 inhabitants, of whom 400 are Catholics; 8 secular priests; 1 parish; 2 churches with a resident priest; and 6 chapels. There is also a house of Lazarists, a convent belonging to the Sisters of Charity and another to the Dominican Sisters. The bishop has jurisdiction also over the islands of Ios, Amorgos, Siphnos, Seriphos, and Melos; the last only has Catholic inhabitants.

Smith, *Dict. of Gr. and Rom. Geog.*, s. v.; Pègues, *Histoire du volcan et des îles volcaniques de Santorin* (Paris, 1842); Cigalla, *General statistics of the Island of Thera* (Hermopolis, 1850), in Greek; Lacroix, *Iles de la Grèce* (Paris, 1853), 484–92; Mamet, *De insula Thera* (Lille, 1874); Fouqué, *Santorin et ses éruptions* (Paris, 1879); von Gärtringen, *Thera* (3 vols., Berlin, 1899–1904); *Missiones catholicæ* (Rome, 1907), 149.

S. Vailhé.

Thermæ Basilicæ, a titular see in Cappadocia Prima, suffragan of Cæsarea. The Greek "Notitiæ episcopatuum" down to the thirteenth century describe the see as the first suffragan of Cæsarea. Perhaps there was a bishop from the time of St. Basil; in any case four others are mentioned: Firminus, present at the Council of Chalcedon, 451; Photinus, at the Council of Constantinople, under the patriarch Gennadius (459); Musonius, exiled by Justin I, about 518; Theodore, present at the Sixth Œcumenical Council of Constantinople, 681, and at the Council in Trullo, 692 (Le Quien, "Oriens christ.", I, 389). This see is evidently the city which Hierocles (Synecdemus, 699, 2) names Therma, and which he places in Cappadocia Prima under the Cæsarean metropolis. It may quite probably be identified with Aquæ Sarvenæ, which the "Tabula" of Peutinger places on the road between Tavium and Cæsarea, the same, doubtless, as Sarvena, a city described on an inscription and by Ptolemy (V, 6, 12). This would be to-day Terzili Hammam, a village about twenty hours north of Cæsarea, a vilayet of Angora, where there are hot mineral sulphur waters, still frequented. A part of the building containing the baths is of Roman construction; a Christian inscription has been found thereon. Therma, which the "Itinerarium Antonini", 204, places also on the road from Tavium to Cæsarea, must be Iamush Pisheren Sou, a mineral spring to the north of Kir Shehir.

S. Pétridès.

Thermopylæ, a titular see and suffragan of Athens in Achaia Prima. It is the name of a defile about 4 miles long, whose principal passage was barred by a wall, which the Phocidians erected against the Thessalians in the sixth century b. c. It receives its name from two hot springs called to-day Loutra (the baths). There in the month of July, 480 b. c., Leonidas, King of Sparta, with 1300 Spartan soldiers and allies fell with his men while bravely opposing the enormous army of Xerxes. In 279 b. c. Brennus with 170,000 Gauls penetrated into Greece by this pass; it was there also that Antiochus III, King of Syria, was defeated by the Romans in 191 b. c., and where in a. d. 395 Alaric, King of the Goths, passed on his way to devastate Greece. In the sixth century Justinian restored the fortifications (Procopius, "De ædificiis", IV, 2). After the Latins in 1204 had overthrown the Byzantine Empire, Thermopylæ was made a Latin diocese. Many letters from Innocent III, written in 1208 and 1210 to Bishop Arnulfus, are extant. The other bishops from the thirteenth to the sixteenth century are mentioned by Le Quien ("Oriens christianus", III, 847–850; Gams, "Series episcoporum", 431; Eubel, "Hierarchia catholica medii ævi", I, 509; II, 275; III, 332); but many of them were only titulars. The see is also referred to shortly after in the "Liber censuum" of the Roman Church (ed. Fabre), II, 8; it was never a Greek diocese. To-day it is known as Lycostomos on the bank of the Maliac Gulf in the district of Phoiotis. The passage is less difficult than formerly because the alluvium deposited by the Sperchios has caused the sea to recede and has facilitated a road between the waters and the mountain.

S. Vailhé.

Thessalonians, Epistles to the, two of the canonical Epistles of St. Paul. This article will treat the Church of Thessalonica, the authenticity, canonicity, time and place of writing, occasion, and contents of the two Epistles to that Church.

I. The Church of Thessalonica.—After Paul and Silas had, during the Apostle's second missionary journey, left Philippi, they proceeded to Thessalonica (Θεσσαλονίκη, the modern Saloniki), perhaps because there was in the city a synagogue of the Jews (Acts, xvii, 2). Thessalonica was the capital of the Roman Province of Macedonia; it was a free city, ruled by a popular assembly (cf. Acts, xvii, 5, *εἰς τὸν δῆμον*) and magistrates (cf. verse 6, *ἐπὶ τοὺς πολιτάρχας*). St. Paul at once began to preach the Gospel to the Jews and proselytes. For three successive sabbaths he explained the Scriptures in the synagogue, opening up the way and gradually leading his hearers to the tremendous truth that there was need the Christ should die and rise again from the dead, and that Jesus whom Paul preached was in very truth this Christ. Some of the Jews believed and took sides with Paul and Silas. It would seem that Paul stayed in the city some time thereafter, for, according to the reading of Codex Bezæ (fifth century), and the Vulgate and Coptic Versions (Acts, xvii, 4), he converted a large number not only of proselytes (*τῶν τε σεβομένων*) but of Gentile Greeks (*καὶ Ἑλλήνων*). In the first place, it is unlikely that a large number of these latter were won over to the Faith during the three weeks devoted to the synagogues; for Paul did manual labour night and day, so as not to be burdensome to his converts (I Thess., ii, 9). Secondly, these converts from idolatry (I Thess., i, 9) would scarcely have become, after so brief an apostolate, a "pattern to all that believe in Macedonia and in Achaia" (I Thess., i, 7). Thirdly, the Church of Philippi sent alms twice to Paul at Thessalonica (Phil., iv, 16), a fact which seems to indicate that his sojourn there was longer than three weeks. Be this as it may, the signal success of Paul's apostolate among Jews, proselytes, and Hellenes, together with the conversion of "not a few noble ladies" (Acts, xvii, 4), aroused the Jews to a fury of envy; they gathered together a mob of idlers from the agora and set the whole city in tumult; they beset the home of Jason, found the Apostle away, dragged his host to the tribunal of the politarchs and charged him with harbouring traitors, men who set Jesus up as king in place of Cæsar. That night the brethren made good the escape of their teacher to Berea. There the Gospel of Paul met with a much more enthusiastic reception than that accorded to it by the synagogue of Thessalonica. The Jews of that city drove Paul to Berea and there, too, stirred up the mob against him. He left Silas and Timothy to complete his work and went to Athens (Acts, xvii, 1–15).

II. FIRST EPISTLE. A. *Authenticity.* (1) External Evidence. (a) II Thess.—The strongest external evidence in favour of the authenticity of I Thess. is II Thess., which, whatsoever be its date of composition, is the very earliest document that clearly presupposes I Thess. to have been written by Paul.

(b) Manuscripts.—The evidence of MSS. alone is such as to set the authenticity of this letter beyond all doubt; it is in the Greek text of the Codex Sinaiticus (fourth cent.), Cod. Vaticanus (fourth cent.), and Cod. Alexandrinus (fifth cent.); it is in the Old Latin and Syriac Versions, which trace its authenticity down to the middle of the second century.

(c) The Apostolic Fathers give evidence of very early use of the Epistle as Sacred Scripture. St. Ignatius of Antioch (d. A. D. 110–17, according to the chronology of Harnack which we shall follow in this article), in "Eph.", X, i, probably uses the *ἀδιαλείπτως προσεύχεσθαι*, "pray without ceasing", of I Thess., v, 17; and undoubtedly had in mind I Thess., ii, 4, when writing to the Romans (II, i) the distinctly Pauline thought *οὐ θέλω ὑμᾶς ἀνθρωπαρεσκεῖν ἀλλὰ θεῷ*, "I will that ye please not man but God". Because St. Ignatius, as the other Apostolic Fathers, cites from memory, without the exactness of later Fathers and without ever mentioning the name of the sacred writer quoted, Dr. Inge, the Lady Margaret professor of divinity in the University of Cambridge, says: "The evidence that Ignatius knew I Thessalonians is almost nil" (cf. "The New Testament in the Apostolic Fathers", Oxford, 1905, p. 74). Against such scepticism, the clear use of St. Paul by the Apostolic Fathers is of no avail. Harnack, who cannot be accused of overmuch credulity, thinks that St. Ignatius of Antioch possessed a collection of the Pauline Epistles; and that by the year 117, St. Polycarp of Smyrna had a complete collection (*eine ganze Sammlung*) thereof before him and veritably lived therein (cf. Chronologie der altchristlichen Litteratur, I, 249, note 2). In the "Pastor" of Hermas (A. D. 140), we find the phrase of I Thess., v, 13, "Be at peace among yourselves" (*εἰρηνεύετε ἐν ἑαυτοῖς*) several times, used almost as it occurs in the Alexandrian and Vatican Codices (cf. Hermas, "Simil.", VIII, vii, 2; "Vis.", III, vi, 3; III, ix, 2, 10; III, xii, 3).

The Apologetic Fathers are clear and to the point. St. Irenæus (A.D. 181–9) cites I Thess., v, 23, expressly attributing the words to the Apostle's First Epistle to the Thessalonians ("Contra hæreses", V, vi, 1 in P. G., VIII, 1138), and I Thess., v, 3, as the saying of the Apostle (ibid., V, xxx, 2 in P. G., VII, 1205). Tertullian quotes at length passages from each of the five chapters of I Thess. to prove his thesis of the resurrection of the body ("Liber de resurrectione carnis", xxiv, in P. L., II, 874); and uses the Epistle against Marcion ("Adv. Marcionem", V, xv in P. L., II, 541). St. Clement of Alexandria (A. D. 190–210) very often cites this brief letter—cf. "Pædagogus", I, v, 19 (Stählin's ed., I, 101) and "Stromata", I, i, 6 (Stählin's ed., II, 5) for I Thess., ii, 5–7; "Stromata", II, xi, 4, IV, xii (Stählin's ed., II, 138 and 286), for an allusion to I Thess., iv, 3, and an accurate citation of six verses (3–8) of the same chapter; "Pædagogus", II, ix, III, xii, IV, xxii (Stählin's ed. I, 206 and 288, and P. G., VIII, 1352) for the appeal to almost every verse of I Thess., v, i. e. verses 5, 8, 13, 15, 19, 22; "Stromata", I, xi (Stählin's ed., II, 34) for a quotation from the same chapter. So strong is the external evidence in favour of the authenticity of I Thess. as to convince all scholars save only those who, on account of internal evidence, deny to Paul the authenticity of all his Epistles.

(2) Internal evidence.—In I Thess. all the main Pauline doctrines are taught,—the Death and Resurrection of Jesus Christ (i, 10; iv, 14; v, 10); His Divinity and Sonship of the living God (i, 9, 10); the resurrection of our bodies (iv, 15–18); the mediatorship of Christ (v, 10); the call of the nations to the Kingdom of Christ, which is the Church (ii, 12), sanctification by the indwelling of the Holy Spirit (iv, 8). The plain and direct style, the writer's affectionate concern for his spiritual children, his impatience of Judaizers, the preponderance of personal over doctrinal statements, the frank and honest self-revelation of the writer—all these distinctly Pauline characteristics argue strongly for the authenticity of this letter.

Baur, the prime mover of neo-Tübingen ideas, was the first to wave aside recklessly all external evidence and seriously to attack the authenticity of I Thess. from internal evidence (cf. "Der Apostel Paulus", ed. 2, II, 94). He was followed by Nowack, "Der Ursprung des Christentums" (Leipzig, 1857), II, 313; Volkmar, "Mose, Prophezie und Himmelfahrt" (Leipzig, 1867), 114; and Van der Vries, "De beiden brieven aan de Thessalonicensen" (Leyden, 1865). The reasons which impel Baur and his followers are trivial. (i) The lack of doctrine makes the letter unworthy of Paul. We have noted that the main heads of Paul's teaching are included in this short letter. Moreover, the letter is a most touching revelation of the great heart of St. Paul and as such alone is befitting the outspoken Apostle. (ii) The Epistle is a clumsy forgery. The author has worked up his story from Acts. Paul could not have written ii, 14–16. It is far-fetched to compare the woes inflicted by the Jews upon the Church of Thessalonica with the ills they wrought upon the Church of Judea. It is un-Pauline to set Jewish Christians up as an example to Gentile converts (Baur, op. cit., 482). These purely subjective objections are worthless. The Apostle was too broad-minded to be tied down to the narrow ideas of Baur. True, in his later letters—to the Romans and Corinthians and Galatians, for instance—we might not look for the juxtaposition of Jewish with Gentile Christians; but the Judaizers were not so troublesome to Paul when he wrote to the Thessalonians as when he wrote to the Romans.

(iii) The expression ἔφθασε δε ἐπ' αὐτοὺς ἡ ὀργὴ εἰς τέλος, "the wrath hath come upon them unto the end" (ii, 16), naturally refers to the destruction of Jerusalem (A. D. 70) as an accomplished punishment of the Jews for killing the Lord Jesus. This is an unwarranted assumption. The phrase εἰς τέλος is indefinite; it has no definite article nor any defining qualificative; it modifies ἔφθασε and refers to no definite end either accomplished or to be accomplished. St. Paul indefinitely but surely sees the oncoming end, reads the easily legible writing on the wall, and interprets that writing: "The wrath [of God] hath come upon them even unto making an end of them". (iv) Baur (op. cit., 485) finds the eschatology of the Epistle un-Pauline. In the Epistles to the Corinthians, Romans, and Galatians, for instance, there is no *diving* into the future, nothing said of the Parousia, or second coming of Jesus. But the reason is clear,—those to whom Paul wrote his great and later Epistles had not the eschatological difficulties of the Thessalonians to meet. He adapted his letters to the wants of those to whom he wrote. The very fact that the apprehension of an immediate Parousia is not mentioned in the later letters would have prevented a forger from palming off as Pauline such an unusual topic.

B. *Canonicity.*—The two Epistles to the Thessalonians are included among the canonical books accepted by the Councils of the Vatican, of Trent, and of Florence, and are among the *homologoumena* of all early lists of canonical New-Testament Scriptures; for instance, to mention only such early lists as accord with the received canon of Trent, these two Epistles are listed in the Muratorian Fragment (A. D. 195–205), in the canons of St. Athanasius of Alexandria (A. D. 373), of the Third Council of Carthage (A. D. 397), in which Saint Augustine took part, of St. Epiphanius (A. D. 403), of Innocent I (A. D. 405), and of Gelasius (A. D. 492). In fact there can be no reason whatsoever to doubt the canonicity of either letter.

C. *Time and Place.*—The *textus receptus*, at the end of the two Epistles, gives a subscription stating that they were written from Athens (ἐγράφη ἀπὸ Ἀθηνῶν); and this same subscription is contained in the great uncial codices A, B^2, K^2, L^2—that is, Alexandrinus (fourth century), Vaticanus (fifth-century corrector), Mosquensis, and Angelicus (both of the ninth century); it is likewise translated in important Latin, Syriac, and Coptic MSS. None the less, there can be no doubt but that the letters were written during Paul's first stay in Corinth. Timothy had been sent to Thessalonica by Paul from Athens (I Thess., iii, 2). Hence some Fathers inferred that, on this mission, Timothy brought along I Thess. The inference is wrong. As Rendel Harris says in "The Expositor" (1898), 174, Paul may have sent another letter from Athens by Timothy to the Thessalonians. He cannot have sent I Thess. from there by him. Paul clearly states that Timothy had returned from Thessalonica before the writing of I Thess. (cf. iii, 6). Whither did he return? I Thess. does not state. Acts, xviii, 5, supplies answer. When Timothy returned from Macedonia with Silas to Paul, the Apostle was at Corinth. The news brought him by Timothy was the occasion of I Thess. Moreover, in the greeting with which each letter begins, the names of Paul, Silvanus (i. e. Silas), and Timothy are grouped together; and we know that the three were together at Corinth (Acts, xviii, 5) during Paul's first visit to that city (cf. also II Cor., i, 19). We have no proof that they were ever elsewhere together. I Thess., then, was written during the eighteen months Paul stayed at Corinth, i. e. in the year 48 or 49, according to the chronology of Harnack, "Chronologie der altchristlichen Litteratur" (Leipzig, 1897), I, 717; in the year 53 or 54 according to the commonly received scheme of Pauline chronology. Both letters are generally considered to be the earliest extant writings of St. Paul. Some few now deem it proved that Paul wrote to the South Galatians even before he wrote to the Thessalonians, cf. Zahn, "Einleitung in das Neue Testament" (Leipzig, 1897), I, 138.

D. *Occasion.*—Having arrived at Athens, Paul at once set himself to convert the Jews, proselytes and Gentiles of that city. Among the latter he met with unusually small success. The Epicureans and Stoics for the most part rated him as a talkative lounger in the agora and either berated him with ridicule upon the Hill of Ares or waved him aside (Acts, xvii, 16–32). Meanwhile he trembled for the Church of Thessalonica. So long as he had been there, only the Jews strove to set his work at naught; now in his absence, the Gentiles joined the Jews (I Thess., ii, 14), and made a vigorous onslaught upon the faith of his children. Paul yearned mightily to see their face once more. In his intense affection and concern, he breaks away from his wonted first plural: "We willed to have come to you, even I, Paul, and that once and again; but Satan hindered us" (ii, 18). The hindrance wrought by Satan was probably a security against his return given by Jason and some friends (Acts, xvii, 9). Being unable to follow the yearnings of his heart, Paul sent Timothy to save the flock from the ravening wolves (I Thess., ii, 2). The Acts make no mention of this legation of Timothy from Athens to Thessalonica. Not long after, Paul left for Corinth (Acts, xviii, I). Thither Timothy, who returned from Thessalonica, brought back an eyewitness's testimony as to the conditions of the faithful of that city. Rendel Harris, in "The Expositor" (1898), 167, thinks that the Thessalonians sent Paul a letter by Timothy and, to make good his theory, appeals to I Thess., i, 2, 5; ii, 1, 5, 9–13; iii, 3–6. There may be some ground for such conjecture in "We also" (καὶ ἡμεῖς) of I, ii, 13; "Also I" (κἀγώ) of I, iii, 5, and in "you have a good remembrance of us always" (ἔχετε μνείαν ἡμῶν ἀγαθήν) of I, iii, 6. Be this as it may, whether by letter or by word of mouth, Timothy fully informed Paul of the needs of the Christian community at Thessalonica; and these needs were the occasion of the first Epistle to that community.

E. *Contents.*—No other letter of Paul to a Church is so free and easy and epistolary as is this letter; it defies strict doctrinal analysis, and is far more personal than doctrinal. Merely for the sake of some division, we may consider chapters i and iii as personal, chapters iv and v as doctrinal. (1) Personal part—a missionary's free outpouring of a noble heart's yearnings.—He is filled with joy at hearing how they stand fast by the faith which he preached to them (i, 2, 8); fondly talks about his labours and about his stay with them (i, 9–ii, 12); thanks God for the way they received from him the word of God (ii, 13–16); delicately hints at his apprehensions for them, by telling how at Athens he yearned to see them, how he sent Timothy in his stead, how relieved he now is as Timothy's message has brought him peace of mind (ii, 17–iii, 10). Then follows a brief and beautiful prayer which sums up the yearnings of the great soul of the Apostle (iii, 11–13).

(2) Doctrinal part.—With this prayer ends what is meant to be free and epistolary. Now follows a little phrase of transition—"For the rest, therefore, brethren"—and a thoroughly Pauline and direct exhortation upon how they "ought to walk and to please God" by purity (iv, 1–8), brotherly love (iv, 9–10), and peaceful toil (verse 11). The peace of everyday toil had been disturbed by a fanatical

lethargy due to the supposed oncoming Parousia. Hence the eschatological passage that follows. The brethren who have died will have part in the Second Coming just as they that are now alive (verses 12–17); the time of the Parousia is uncertain, so that watchfulness and not lethargy are needed (v, 1–11). The letter ends with a series of pithy and pointed exhortations to respect for their religious teachers, and to the other virtues that make up the glory of Christian life (v, 12–22); the Apostolic benediction and salutation, a request for prayers and the charge that the letter be read in public (verses 23–28).

III. SECOND EPISTLE. A. *Authenticity.* (1) External Evidence.—MS. evidence is the same for II Thess. as for I Thess., so, too, the evidence of the ancient versions. The Apostolic and Apologetic Fathers are more clearly in favour of II Thess. than of I Thess. St. Ignatius, in Rom., x, 3, cites a phrase of II Thess., iii, 5, *εἰs τὴν ὑπομονὴν τοῦ Χριστοῦ*, "in the patience of Christ". St. Polycarp (XI, 3) refers the letter expressly to Paul, although, by a slip of the memory, he takes it that the Apostle glories (II Thess., i, 4) in another Macedonian Church, that of the Philippians; elsewhere (XI, 1) Polycarp uses II Thess., iii, 15. St. Justin (about A. D. 150), in "Dialog.", xxxii (P. G., VI, 544), seems to have in mind the eschatological language of this letter. Besides it is set down as Pauline in the Canon of Marcion (about A. D. 140).

(2) Internal Evidence.—The literary dependence of II Thess. on I Thess. cannot be gainsaid. The writer of the former must have written the latter, and that too not very long thereafter. II Thess., ii, 15, and iii, 6, are to be explained by I Thess., iv, 1–8 and 11. The style of the two letters is admittedly identical; the prayers (I, iii, 11, v, 23; II, ii, 16, iii, 16), greetings (I, i, 1; II, i, 1, 2), thanks (I, i, 2; II, i, 3), and transitions (I, iv, 1; II, iii, 1) are remarkably alike in form. Two-thirds of II Thess. is like to I Thess. in vocabulary and style. Moreover, the structure of the Epistle, its subject-matter, and its affectionate outbursts of prayer for the recipients and of exhortation are all decidedly Pauline characteristics. The argument from internal evidence is so strong as to have won over such critics as Harnack (Chronologie, I, 238) and Jülicher (Einleitung, 40). Schmiedel, Holtzmann, Weizacker, and others deny the force of this argument from internal evidence. Its very similarity to I Thess. in vocabulary and style is made to militate against the authenticity of II Thess.; the letter is too Pauline; the author was a clever forger, who, some sixty years later, took up I Thess. and worked it over. There has been no motive assigned for such a forgery; no proof given that any post-Apostolic writer was so cunning as to palm off this letter as a Pauline imitation.

Eschatology of Paul.—The chief objection is that the eschatology of II Thess. contradicts that of I Thess.: the letter is in this un-Pauline. In I Thess., iv, 14–v, 3, the writer says the Parousia is imminent; in II Thess., ii, 2–12, iii, 11, the writer sets the Parousia a long time off. Non-Catholics who hold the Pauline authorship of the two letters generally admit that Paul predicted the second coming would be within his own lifetime and deem that the signs narrated in II Thess., ii, as preludes to that coming do not imply a long interval nor that Paul expected to die before these signs occurred. Catholics insist that Paul cannot have said the Parousia would be during his lifetime. Had he said so he would have erred; the inspired word of God would err; the error would be that of the Holy Spirit more than of Paul. True, the Douay Version seems to imply that the Parousia is at hand: "Then we who are alive, who are left, shall be taken up together with them in the clouds to meet Christ, into the air, and so shall we always be with the Lord" (I Thess., iv, 16). The Vulgate is no clearer: "Nos, qui vivimus, qui residui sumus" etc. (iv, 15–17). The original text solves the difficulty: *ἡμεῖs οἱ ζῶντες παραλειπόμενοι, ἅμα σὺν αὐτοῖs ἁρπαγησόμεθα.* Here the Hellenistic syntax parallels the Attic. The sentence is conditional. The two participles present stand for two futures preceded by *εἰ*; the participles have the place of a protasis. The translation is: "We, if we be alive—if we be left—[on earth], shall be taken up" etc. A similar construction is used by Paul in I Cor., xi, 29 (cf. Moulton, "Grammar of New Testament Greek", Edinburgh, 1906, I, 230). St. Paul is here no more definite about the time of the Parousia than he was in I Thess., v, 2, when he wrote "that the day of the Lord shall so come, as a thief in the night." There is in St. Paul's eschatology the very same indefiniteness about the time of the Parousia that there is in the eschatological sayings of Jesus as related in the Synoptics (Matt., xxiv, 5–45; Mark, xiii, 7–37; Luke, xxi, 20–36). "Of that day or hour no man knoweth, neither the angels in heaven, nor the Son, but the Father" (Mark, xiii, 32). In the deposit of faith given by the Father to the Son, to be given by the Son to the Church, the time of the Parousia was not contained. We readily admit that St. Paul did not know the time of the Parousia; we cannot admit that he knew it wrong and wrote it wrong as the inspired Word of God and a part of the deposit of faith.

As for the further objection that the apocalyptic character of ii, 2–12, is post-Pauline and dependent upon so late a composition as the Apocalypse of John (A. D. 93–96) or, worse still, upon the Nero *redivivus* story (Tacitus, "Hist.", II, viii), we answer that this assertion is entirely gratuitous. St. Paul got his apocalyptic ideas from the very same source as John, that is either from revelation to himself or from the Old Testament or from tradition. Most of the details of his apocalyptic description of the Parousia are given in other apocalypses (I John, ii, 18; Matt., xxiv, 24; Luke, xxi, 8; Mark, xiii, 22; Deut., xiii, 1–5; Ezech., xxxviii and xxxix; Dan., vii–ix, xi, xii, etc.). The man of sin, Antichrist, Belial, the well-nigh complete triumph of evil just before the end of time, the almost general apostasy, the portents, and other items are features familiar to Old-Testament and New-Testament apocalyptic writings.

B. *Canonicity.*—The canonicity of II Thess. has been treated together with that of I Thess.

C. *Time and Place.*—II Thess. was written at Corinth not long after I Thess., for both Timothy and Silas are still with Paul (i, 1), and the silence of the Acts shows that, once Paul left Corinth, Silas was not again his companion in the ministry. There seem to be allusions in iii, 2, to the troublous stay of a year and a half at Corinth (Acts, xviii); in ii, 14, to the letter quite recently written to the Thessalonians; and in iii, 7–9, to the ministry of Paul among them as not long passed.

D. *Occasion.*—The eschatology of I Thess. had been misunderstood by the Thessalonians; they took it, the day of the Lord was at hand (ii, 2); they were overwrought by the exaggerations of some meddlers and perhaps by a forged letter which purported to have come from Paul (ii, 2; iii, 17). Moreover the disorderly conduct of some (iii, 6, 11) gave the Apostle no little concern; this concern he showed by the letter.

E. *Contents.*—The three chapters into which the letter is now divided, aptly analyze the thought. In the first chapter are a greeting, thanksgiving for the faith and love of the Thessalonians, and an assurance of Divine recompense to them and to their persecutors. In the second chapter is the main thought of the letter—the eschatology. Certain signs are detailed which must precede the Parousia. Until these signs appear, there is no reason for terror or taking leave of their senses. The third chapter is the usual Pauline request for prayers, a charge to avoid the disorderly, a truly Pauline allusion to the example he set them, and the final identification of the letter by a greeting written with his own hand.

Of the Greek Fathers whose commentaries on I and II Thess. have come down to us, St. John Chrysostom is by far the most scholarly; Theodoret is pithy and to the point. Theodore of Mopsuestia (about A. D. 415) forces the Apostle to his ideas. Euthalius the Deacon depends on Theodore; St. John Damascene on St. John Chrysostom. Among the Latin Fathers Ambrosiaster (about 730) at times errs in matters of faith; Primasius (about 556) collated the expositions of Ambrosiaster, Pelagius, St. Augustine, and St. Jerome. The great Catholic commentators of more recent time are: Justiniani (Lyons, 1612), a Lapide (Antwerp, 1614), Cajetan (Rome, 1529), Salmerón (Madrid, 1602), Kistemaker (Münster, 1822), McEvilly (Dublin, 1875), Bisping (Münster, 1873), Maunoury (Paris, 1878), Roehm (Passau, 1885), Johannes (Dillingen, 1898), Panek (Ratisbon, 1886), Prat, *La théologie de Saint Paul* (Paris, 1908), Piconio (Paris, 1837), Peronne (Paris, 1881), Toussaint (Paris, 1910). The chief Protestant commentaries are those of Lightfoot (*Notes*, 1895), Drummond (1899), Findlay (1904), Milligan (1908), Schmiedel (1892), B. Weiss (1896).

Walter Drum.

Thessalonica (Saloniki), titular metropolis in Macedonia. It was at first a village called Alia, situated not far from Axius, the modern Vardar; it subsequently took the name of Therma, from the thermal springs east and south of it. The gulf on which it was situated was then called the Thermaic Gulf. After having sheltered the fleet of King Xerxes and having belonged to the Athenians during the Peloponnesian War, Therma passed to the kings of Macedonia after the death of Alexander. Cassander, the son of Antipater, having enlarged the village and transported thither the inhabitants of the neighbouring villages, called it Thessalonica, in honour of his wife. Thenceforth the city grew steadily in importance. Unsuccessfully besieged by Æmilius Paulus, it only opened its gates after the victory of Pydna which made the Romans masters of Macedonia (168 B. C.). The kingdom was then divided into four districts, each of which had its capital and its *conventus*. Thessalonica was the capital of the second district. In 146 B. C. Macedonia was made a single province with Thessalonica as capital. This was the arrangement until the third and fourth century of our era, when four provinces were again formed. The proconsul had his residence at Thessalonica, as did later the prefect of Illyricum Orientale, who first resided at Sirmium. During the first civil war Thessalonica was the principal headquarters of Pompey and the Roman senators; during the second it supported Anthony and Octavius against the Triumvirs, receiving from them after the battle of Philippi the title of free city and other advantages, being allowed to administer its own affairs and obeying magistrates called politarchs.

Thessalonica received the title of *colonia* under the Emperor Valerian. Theodosius the Great punished the revolt of its inhabitants (390) by a general massacre in which 7000 were slain. In 479 the Goths attacked the city. Between 675 and 681 the Slavs unsuccessfully besieged Thessalonica four times. On 31 July, 904, a Mussulman corsair, Leo of Tripoli, came unexpectedly with his fleet and attacked the city, then the second in the empire, captured and pillaged it, and took away a great many prisoners. A dramatic account of the affair was written by a priest of Thessalonica, John Cameniates, who was an eyewitness (Schlumberger, "Nicéphore Phocas", Paris, 1890, 35 sqq.). In 1083 Euthymius, Greek Patriarch of Jerusalem, was commissioned by Alexius I Comnenus to negotiate peace at Thessalonica with Tancred of Sicily, who had conquered a portion of Epirus and Macedonia and threatened to take possession of the rest. In August, 1185, Guillaume d'Hauterive, King of Sicily, besieged Thessalonica by sea with a fleet of 200 ships and by land with an army of 80,000 men; the city was captured, and all resistance from the Greeks punished with death. In the following year the city was recaptured by the Byzantines; the metropolitan Eustathius wrote an account of the campaign in a homily, which was read during the Lent of 1186. In 1204, after the Latins had occupied Constantinople and a portion of the Byzantine Empire, Boniface, Marquis of Monferrato, proclaimed himself King of Thessalonica, his Latin Kingdom depending on the Latin Empire of Byzantium. He defended it against the Bulgars, whose tsar, the terrible Calojan, was assassinated under the walls of Thessalonica in 1207, and against the Greeks from Epirus. In 1222 the latter put an end to the Frankish Kingdom and took possession of Thessalonica, setting up an independent empire, the rival of that of Nicæa, with Theodore Comnenus as first sovereign. He was defeated in 1230 at Klokotinitza by the Bulgar Tsar, Assen II, and most of his empire passed into the hands of the Bulgars. Thessalonica with the remaining cities was given to Theodore's brother, the Emperor Manuel.

In 1242 after a successful campaign against the Emperor of Thessalonica, John Vatatzes, Emperor of Nicæa, forced John Angelo to take only the title of despot and to declare himself his vassal. After the expedition of Vatatzes in 1246 Thessalonica lost all independence and was annexed to the Empire of Nicæa which in 1261 was once more removed to Constantinople. Unable to defend it against the Turks, the Greeks in 1423 sold Thessalonica to the Venetians, the city being captured 28 March, 1430, by the Sultan Murad and definitively incorporated in the Ottoman Empire. It was the scene of unheard-of cruelties on the part of the Turks. In order to weaken the Greek element, so powerful in the city and in that part of Macedonia, the Sublime Porte offered a refuge about the end of the sixteenth century to the Jews driven from Spain by Philip II. They now number 80,000 out of 120,000 inhabitants; the remainder of the population consists of Turks, Greeks, Bulgars, Armenians, and nearly 3000 Catholics. The parish is directed by the Lazarists, the schools by the Christian Brothers. Thessalonica, which is the capital of a vilayet, grows constantly in importance, owing to its situation and its commerce, as well as to the part it played in the two military revolutions of 1908 and 1909 which modified the authoritative régime of the Turkish Empire.

The establishment of Christianity in Thessalonica seems to date from St. Paul's first journey to the city (see Thessalonians, Epistles to the). Secundus and Aristarchus, companions of St. Paul, were natives of Thessalonica (Acts, xx, 4); Demas who abandoned the Apostle to go thither, seems likewise to have been born there (II Tim., iv, 9). According to Origen, who repeats an ancient tradition ("Comment. in Ep. ad Rom.", in P. G., XIV, 1289), Gaius was the first Bishop of Thessalonica. Four persons of this name are mentioned in the New Testament, but the Gaius of Origen would be a native of Corinth (I Cor., i, 14). Melito of Sardes relates that Antoniñus Pius wrote to the Thessalonians not to tolerate in their city the tumult against the Christians (Eusebius, "Hist. eccl.", IV, 26). Alexander assisted at the Council of Nicæa in 325, at Tyre in 335, and at the consecration of the Holy Sepulchre in the same year. At the end of the same century Acholius baptized Theodosius the Great. Le Quien has compiled a list of 74 Greek titulars of this city, some of whom do not belong to it. Father Petit continued his task and gives a biographical account of more than 130. The most famous were: Rufus, who in the early fifth century acted constantly as intermediary between the papacy and the Eastern Churches; Eusebius, the correspondent of St. Gregory the Great and author of a work in ten books against the Monophysites; John, who early in the seventh century compiled the first book on the miracles of St. Demetrius; St. Joseph, brother of St. Theodore the Studite, and the victim in 832 of the Iconoclast persecutions; Leo the Philosopher, professor at the Magnaura, the master of Photius and of all the literary celebrities of the period; Michael Chumnos, the author of several canonical treatises in the twelfth century; Basil of Achrida, who took part in the theological discussions with the envoys of the pope or of the Emperor of the West; Eustachius, the celebrated scholiast of Homer; Gregory Palamas, the defender of the Hesychast theories and the bitter enemy of the Catholics in the fourteenth century, who is still regarded as one of the greatest doctors of the Schismatic Church; Isidore Glabas; Simeon, liturgist and canonist, d. in 1429, a year before the capture of the city by the Turks.

When Illyricum Orientale, comprising the two civil Dioceses of Dacia and Macedonia, was ceded by Gratian in 379 to the Empire of the East, Pope St. Damasus in order to retain jurisdiction over these distant provinces appointed the Bishop of Thessalonica his vicar Apostolic. In this capacity the bishop presided at the local councils of the various provinces, judging and solving difficulties, save in more serious matters, wherein the decision was reserved to the pope. He also confirmed the election of metropolitans and simple bishops and granted authorization to proceed to ordination. Finally, he occupied a privileged place at the œcumenical councils and signed their decisions immediately after the patriarchs. He thus enjoyed the prerogatives of a patriarch, even to bearing the title, but was subject to the Patriarch of Rome. The Bishop of Constantinople sought to modify this organization by inducing Theodosius II to pass a law (14 July, 421) which attached all the bishops of Illyria to the Byzantine Church, and by having this law inserted in the Code (439); but the popes protested against this injustice and prevented the application of the law. Until 535 the Vicar Apostolic of Thessalonica exercised jurisdiction over all the provinces of Illyricum Orientale, but subsequent to Novel xi of Justinian the authority was divided between him and the new Archbishop of Justiniana Prima. The latter, likewise appointed vicar Apostolic of the pope, directed the seven provinces of the north while the Bishop of Thessalonica continued to occupy the six others: Macedonia Prima, Thessalia, Achaia, Creta, Nova and Vetus Epirus. Matters remained so until 732 when the Emperor Leo the Isaurian, after his excommunication by the pope, connected all the bishoprics of Illyria with the Patriarchate of Constantinople. Thenceforth, despite the protests of Rome, Thessalonica was dependent on the Church of Byzantium.

After the establishment of the Latin Kingdom of Thessalonica in 1205 Nivelo de Chérisy, Bishop of Soissons, who had taken an active part in the Fourth Crusade, was appointed by Innocent III (10 December, 1206) first Latin archbishop of the city. He died in the following year; his successors were at first residential and afterwards titular (see list in Le Quien, "Oriens Christ.", III, 1089–96; Eubel, "Hierarchia catholica medii ævi", I, 510; II, 275). From a letter of Innocent III written in 1212 we learn that Thessalonica had then eleven suffragans. Apart from the saintly bishops mentioned above Thessalonica had other saints: Agape, Irene, and Chionia, martyred under Diocletian; Agothopodus, deacon, and Theodulus, rector, martyred under Diocletian; Anysia, martyred under Maximian; Demetrius, martyr, the protector of the city, from whose tomb flowed an oil which worked miracles, and whose superb basilica has been converted into a mosque; David, solitary (sixth century); Theodora, d. in 892; etc. The Vicariate Apostolic of Macedonia, for the Bulgars, whose titular resides at Thessalonica, was established in 1883. It has upwards of 6000 Catholics, 26 residential stations, 33 secular priests, most of them married, 10 Lazarist priests, 21 churches and chapels, 27 primary schools for boys and girls with 1110 pupils. The seminary, directed by the Lazarists, is at Zeitenlik, near Thessalonica. The Sisters of Charity and the Bulgarian Eucharistine Sisters also have schools and orphanages.

S. Vailhé.

Theveste, titular see of Numidia. The city seems to have had some importance even prior to Christianity. During the first century of our era the Legio III Augusta resided there before being transferred to Lambæsis. It was made a *colonia* probably under Trajan. There is mention of a council held there by the Donatists. Among its saints were St. Lucius, its bishop, who in 256 assisted at the Council of Carthage and died for the Faith two years later; St. Maximilianus, martyred 12 March, 295; St. Crispina, martyred 5 December, 304. Some of its bishops are known: Romulus in 349; Urbicus in 411; Felix exiled by the Vandals in 484; Palladius mentioned in an inscription. It was rebuilt by the patrician Solomon at the beginning of the reign of Justinian, and he built a tomb there which still exists. Under the Turks Theveste had a garrison of janizaries. Since 1851 it has been occupied by the French. Under the name of Tebessa it is the capital of a canton of the Department of Constantine in Algeria. It has 7000 inhabitants, of whom about 1200 are Europeans. It has a Catholic parish. Tebessa is very rich in ancient monuments, among them being a triumphal arch of Caracalla, a temple, a Christian basilica of the fourth century 216 feet long by 72 feet wide, near which are buried a number of pious persons.

S. Vailhé.

Thibaris, titular see in Byzacena (Africa), not mentioned by any ancient author. The official list of the Roman Curia places it in Byzacena, but in reality it belonged to Africa Proconsularis. An inscription fixes the exact site at the ruins now called Henshir Hamamet, in a plain watered by the Wady Tibar which has retained the name of the town. These ruins are situated about five miles north-east of Djebba, near the Djebel Gorra Tunaiai. There are galena and calamine mines at Djebba. The former were worked even in ancient times and are mentioned in a letter from St. Cyprian to the faithful of Thibaris (Ep. lvi). The chief ruins are those of an aqueduct and a Christian church. Nearby is the native orphanage of St. Joseph of Tibar, where the White Fathers receive chiefly Algerian Kabyles. Two bishops of Thibaris are known: Vincent, present at the Council of Carthage in 256, and Victor, at the Conference of Carthage in 411, where his rival was the Donatist, Victorian.

S. Pétridès.

Thibaut de Champagne.—Thibaut IV, Count of Champagne and King of Navarre, a French poet, b. 1201, at Troyes; d. 8 July, 1253. He was the posthumous son of Thibaut III, Count of Champagne and Blois, and Blanche, sister of Sancho VII, King of Navarre. He had to defend his rights to his countship first in 1221 against his uncle, Count of Brienne, and later against his aunt, Alice, Queen of Cyprus. During the minority of Louis IX, he first sided with the nobles against Blanche of Castile, but he soon separated from them, and being attacked by them, he was defended by the queen. In 1234, his uncle Sancho VII having died childless, he succeeded him as King of Navarre. He was the leader of the crusade organized in 1239 by Gregory IX, and landed at Acre on the first of September, fought several unsuccessful battles, and after his troops were decisively defeated at Gaza, he left Syria on 1 September, 1240. In order to arouse the zeal of the nobility for the defence of the Holy Land, he composed four songs, known as Crusade songs, which rank among his best; their literary value is equal to their Christian inspiration. Very little is known of his life after he returned from his campaign in Palestine. There is some uncertainty concerning the place where he died, at Provins, Troyes, or in Navarre. He is regarded as one of the greatest lyrical poets of the thirteenth century. His rhythms are most harmonious, his combinations of metres show a real skill, while his expressions are full of refinement and true sentiment. His verses have been published, under the title of "Poésies du Roi de Navarre", by Lévesque de la Ravallière (Paris, 1742). They consist of sixty-six poems, divided as follows: thirty-nine love sings, twelve *jeux-partis*, or debating songs, four Crusade songs, and eight *serventois*. Dante and Petrarch had the greatest regard for this poet and spoke of him in most laudatory terms.

Thibaut, Comte de Champagne
After a Painting by Jouannin

D'Arbois de Jubainville, *Hist. des comtes de Champagne* (Paris, 1866); Petit de Julleville, *Hist. de la langue et de la littérature française*, II (Paris, 1894); Bedier, *Chansons de croisade* (Paris, 1909).

Louis N. Delamarre.

Thierry of Freiburg (or of Saxony), a philosopher and physician of the Middle Ages, and a member of the Order of Saint Dominic. We cannot with any degree of certainty identify him with Frater Theodoricus, who in 1283, was named prior of the convent of Würzburg, but there is abundant evidence that at the Chapter General held at Strasburg (1293) he was made superior general of the province of Germany, holding this post until 1296. In 1297 we find him at Paris, teaching the "Sentences" of Peter Lombard; in 1303, at Coblenz; and in 1304, at Toulouse, taking part in the Chapter General of his order. In 1310, the Chapter General of Plaisance appointed him *Vicarius Provinciæ Teutonicæ*, while awaiting the nomination of a new provincial. Nothing is known of his after life.

Thierry was a very active writer. A list of the works of Dominican authors, compiled in 1330, ascribes to him thirty-one different treatises, twenty-one of which are still in existence, on the most diverse subjects of theology, metaphysics, and cosmology. But the one which especially redounds to the glory of Thierry is that composed in 1304 "De Fride" for the Chapter General of Toulouse, at the request of Améric de Plaisance, superior-general of the order. Therein with wonderful clearness Thierry describes the different reflections and refractions of every ray which forms either the first or second rainbow. This experiment was made with a spherical drop of water. Furthermore, with the help of spherical glass vases filled with water, he verified experimentally the phenomena which he planned. This work, which made its author a precursor of Descartes, is a model of the art of logically combining experiments.

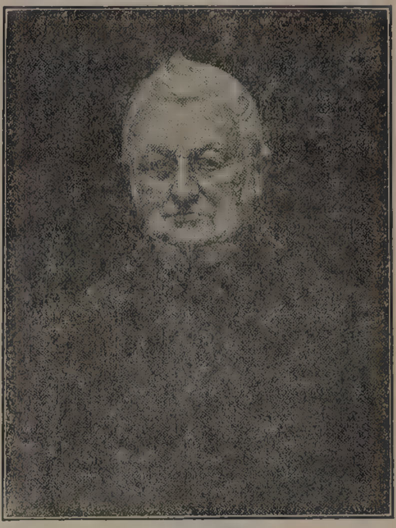
Pierre Duhem.

Thiers, Louis-Adolphe, French statesman and historian, first president of the Third French Republic, b. at Marseilles, 16 April, 1797; d. at Paris, 3 Sept., 1877. Established at Paris in 1821 he at once took an important place in the Liberal Opposition Press as editor of the "Constitutionnel", and in the literary world through his "Histoire de la révolution française" (10 vols., 1823-27). The foundation in 1829 of "Le National" by Thiers, Mignet, and Armand Carrel provided the Liberals with a powerful weapon against the Polignac ministry, and furthered the movement which resulted in 1830 in the fall of the Bourbons. A proclamation drawn up by Thiers 29 July, 1830, directed the attention of the people to the Duc d'Orléans who became King Louis-Philippe. Thiers became a member of the French Academy in 1834 and between 1830 and 1840 was several times minister under the July Monarchy. When the long Guizot ministry freed him from political occupations he undertook the "Histoire du consulat et de l'émpire" (20 vols., 1845–62). It was he who caused the adoption by the Chamber of Deputies, 3 May, 1845, of an order of the day aimed at the Jesuits and stipulating that the Chamber should rely on the Government to enforce the laws of the State. The result of this vote was the negotiation undertaken at Rome by the ambassador Rossi in behalf of the Government of Louis-Philippe to secure the suppression of the Jesuits in France. In 1846 Thiers accused the Guizot ministry of making concessions to the Catholic party at the expense of the university. But after the advent of the Second Republic, having taken fright at the rise of certain Revolutionary ideas, he served the interests of the Church, and as early as March, 1848, he acknowledged in a letter to Madier de Montjan that his ideas had changed with regard to liberty of instruction. In the committee which prepared the vote for the *loi Falloux* Thiers was influenced by Dupanloup and declared to Cousin: "The abbé is right. In fighting against the congregations we have fought against justice and virtue and we owe them reparation." He voted also for the Roman expedition.

Under the Second Empire Thiers was elected (1863) deputy of the Opposition, but on several occasions he criticised in the Chamber the Italian revolution and besought the Government of Napoleon not to permit the downfall of the temporal power. After having eloquently opposed the policy of the Second Empire with regard to Prussia he was sent to various European courts by the Bureau of National Defence, which



Adolphe Thiers
From the Portrait by Bonnat

was seeking assistance for defeated France. On 8 Feb., 1871, he was elected deputy by twenty-six departments, and nine days later the National Assembly almost unanimously elected him chief executive. He negotiated the Treaty of Frankfort and induced the Assembly of Bordeaux (1 March, 1871) to ratify the peace preliminaries. The rigorous measures by which he overcame the Commune of Paris made many enemies for him. It is still a debated question whether he might have saved the life of Mgr Darboy by consenting to release the revolutionist Blanquil. Several episcopal nominations made under Thiers by the philosopher Jules Simon, minister of public worship, redounded to the glory of the French episcopate. After the treaty with Germany (15 March, 1873) for the evacuation of French territory the National Assembly declared that Thiers deserved well of his country. But the defeat at Paris of his friend Rémusat by the Radical Barodet and the subsequent disturbances among the Monarchists in the Assembly induced Thiers to resign his office 24 May, 1873. He was succeeded by MacMahon. Having thus given up power Thiers took his seat in the Left Centre of the Assembly amid the applause of the Left; and although the advanced members of the Left, because of his severity during the Commune, deliberately treated him as "a sinister old man", he upheld with all his strength and prestige during his last years a policy designed to bring about the defeat of the Right and of MacMahon. His long career sometimes seems inconsistent. After having contributed by his historical works to the prestige of Napoleon I and by his vote to the election of the future Napoleon III to the presidency of the Republic, he became the adversary of the Empire. After having supported anti-religious Liberalism under the Restoration and the monarchy of July, he supported the Catholic claims under the Second Republic, and during his old age under the Third Republic he assisted the anti-clerical parties. But the unity of his life consisted in his always being the defender of a certain category of ideas, aspirations, and interests proper to a social class—the *bourgeoisie;* and his book on the right of ownership (1848), besides being very interesting as a document, is the expression of an individualistic conception, more pagan than Christian, of the right of ownership, one which is the very antithesis of social Christianity. He was buried with the rites of the church.

Thignica, titular see in Numidia. The Roman Curia's official list of titular sees places Thignica in Numidia. It belonged to Proconsular Africa. Its ruins are called Ain Tounga, south-west of Testour, Tunisia. They are very extensive and cover the summit and slopes of a series of hills. One inscription calls it "Civitas Thignicensis" and states that it was divided into three parts, another that it became a *municipium* at the beginning of the third century under the name of "municipium Septimium Aurelium Antoninianum Herculeum Frugiferum Thignica". Towards the centre of the ruins is a Byzantine fortress, trapezoidal in shape, flanked by five square towers. Here an inscription makes mention of the proconsul Domitius Zenophilus (326–32), famous in the annals of Christian Africa. Among the other ruins are a small triumphal arch, a temple, a Christian church, the remains of the enclosure, etc. Despite the splendour and importance of this town we know only one bishop, Aufidius, who assisted in 411 at the Conference of Carthage where he had a Donatist rival.

S. PÉTRIDÈS.

Thijm, JOSEPH ALBERT ALBERDINGK, b. at Amsterdam, 8 July, 1820; d. there, 17 March, 1889. After finishing his studies in his native city, he took up a commercial career. But this prosaic occupation did not smother his talents. Art and literature had a great attraction for him. He made his entry into the literary world as an art critic in the "Spectator" in 1842, and immediately attracted great attention by his views and his style. The following year he published an essay on the spelling of hybrid words, in which he came out as a philologist. In his poems, which are numerous and take rank with what is best in the Dutch poetry of the nineteenth century, he shows that he is a disciple of Bilderdijk. This he himself declares in his celebrated poem "U min ik, Oude met uw stroefgeplooide trekken" (I love you, old one, with your rugged features). In his triple capacity of art critic, philologist, and poet, Thijm did so much from 1842 to 1889 that he not only led the way for Catholics and laid the foundation of Catholic literature, but became one of the foremost writers of the Netherlands of the nineteenth century.

His whole activity, all his writings, bear the stamp of Catholicity. No one attacked Catholic art or Catholic history without having to reckon with Thijm. "Nil nisi per Christum" was his motto. By his writings and the earnest character of his Catholicism Thijm played one of the most influential rôles in the Catholic revival. To him is due no less than to Dr. W. Cramer and Mgr. J. Smits, first editor-in-chief of "De Tyd," the restoration of the hierarchy in the Netherlands. In 1852 Thijm sent a memorial to Rome setting forth the historic reasons for considering Utrecht to be the traditional archiepiscopal see of Holland, and the anxiety of the Catholics at that time that the historic tradition be not broken. Besides the periodical "Dietsche Warande" which he edited from 1855 to 1886, the people's almanac for the Catholics of the Netherlands (1852–89), and numberless brochures in defence of the Church and church history, his most important works are: "Het Voorgeborchte", "Palet en Harp", "Portretten van Joost van den Vondel", "Verspreide Verhalen", "Kerstliederen", "De la Litérature Néerlandaise", "Karolingische Verhalen", "De Heilige Linie". His last efforts were devoted to the preparation of a complete edition of the works of van den Vondel.

P. ALBERS.

Thijm, PETER PAUL MARIA ALBERDINGK, brother of the foregoing, b. at Amsterdam, 21 Oct., 1827, d. at Louvain, 1 Feb., 1904. He made his studies in his home city, at first at the Gymnasium and later at the Athenæum, from which he was graduated in letters and history in 1857. For some years he was instructor in history in Maestricht. After being called to a professorship in the University of Louvain in 1870, he succeeded in establishing a chair for the special study of the history of Holland's literature. Although not as gifted as his elder brother, he had a great deal of the latter's enthusiasm for literature and art and was an ever ready champion of the Christian ideal in art. This savant of artistic temperament and zeal contributed not a little to the revival of the Flemish spirit in the University of Louvain. He was President of the Association Tijd en Vlijt and of Constantius Buter. He was also a member of the Flemish Academy, and, for a time, its President. From 1888 on, Paul Thijm edited the periodical "Dietsche Warande", which was in this way transplanted into Belgium. His chief works are: "De H. Willibrord, Apostel der Nederlanden" (1867); "Karel de groote en zijne eeuw" (1866); "Gestichten van liefdadigehied in België, van Karel den Groote tot aan de XVI eeuw", awarded a prize by the Royal Academy of Brussels (1883); "Schets der Algemeene Geschiedenis" (1870); "Vroolijke historie van Ph. van Marnix" (1876); "Spiegel van Nederlandsche letteren" (1877).

EDWARD P. SPILLANE.

Third Orders.—I. GENERAL.—Third Orders signify in general lay members of religious orders, i. e. men and women who do not necessarily live in community and yet can claim to wear the habit and participate in the good works of some great order.

A. *Origin.*—The general idea of lay people affiliated to religious orders, as seen in the Benedictine Oblates (q. v.) or *confraters* (Taunton, "Black Monks of St. Benedict", London, 1897, I, 60–63; for Norbertines cf. Hurter, "Papst Innocenz III", Schaffhausen, 1845, IV, 148), is too natural for there to be any need to seek its origin. Founders and benefactors of monasteries were received in life into spiritual fellowship, and were clothed in death in some religious habit. So too the Templars had a whole system whereby layfolk could partake in some sort in their privileges and in the material administration of their affairs (English Hist. Rev., London, April, 1910, 227). But the essential nature of the tertiary is really an innovation of the thirteenth century. At that date many of the laity, impatient of the indolent and sometimes scandalous lives of the clergy in lower Europe, were seized with the idea of reforming Christendom by preaching. This admirable intention caused the rise of the Vaudois under Valdez of Lyons ("Anecdotes Historiques tirés du Recueil inédit d'Etienne de Bourbon, O.P.", ed. by Lecoq de La Manche, Paris, 1878, 290–314), and under somewhat more curious conditions the Fratres Humiliati. The Vaudois were at first welcomed by the pope, Alexander III, who authorized their preaching, but as they were unacquainted with theological teaching and had pursued no clerical studies, their sermons were not seldom dogmatically inaccurate and eventually defiantly heretical. The Humiliati also soon became suspect and were forbidden by Lucius III to preach, till in 1207 Innocent III gave a section of them permission to resume their work, provided that they limited themselves to moral questions and did not venture on doctrinal subjects ("De articulis fidei et sacramentis ecclesiæ", cf. Denifle, O.P., "Archiv für Litteratur und Kirchengeschichte des Mittelalters", I, 419). Moreover some became priests, were gathered into a cloister, and took up religious life. The others remained outside, yet spiritually dependent on the clerical portion, and now for the first time in history called a Third Order, *Tertius Ordo* (Mandonnet, "Les Origines de l'Ordo de Penetentia"; the Bull is to be found in Tiraboschi, "Vetera Humiliatorum monumenta", II, Milan, 1766–68, 139).

B. *Division.*—The Third Orders can each be divided into (a) regulars, i. e. living in convents, and (b) seculars, i. e. living in the world. Of these the first take vows, the latter can only make a solemn promise (except that Carmelite Tertiaries apparently take some sort of vows of obedience and chastity, cf. Angelus a S.S. Corde, O.C.D., "Manuale juris communis Regularium", Ghent, 1899, q. 1067), which, however, distinguishes them from members of mere confraternities and constitutes them legally a religious order (Constitution of Leo XIII, "Misericors Dei Filius").

C. *Members.*—Any Catholic may join a Third Order, but may not at once belong to more than one, nor may he without grave cause leave one for another. The laying aside of the distinctive sign or prayers for any space of time does not in itself put an end to membership with a Third Order, but the deliberate wish to dissociate oneself from it is sufficient to produce that effect (S. Cong. Indulg., 31 Jan., 1893).

D. *Privileges.*—The Regular Third Order participates in all the indulgences granted to the First and Second Orders (S. Cong. Indulg., 28 Aug., 1903), but not in those granted to the Secular Third Order (ibid.). This latter no longer participates in any privileges save those directly granted to itself (S. Cong. Indulg., 31 Jan., 1893; S. Cong. Indulg., 18 July, 1902; S. Cong. Indulg., 28 Aug., 1903).

BEDE JARRETT.

II. THIRD ORDER OF OUR LADY OF MOUNT CARMEL.—Soon after the Order of Our Lady of Mount Carmel was established in Europe in the thirteenth century, lay persons, not bound by religious vows, seem to have attached themselves to it more or less closely. There is evidence of the existence of a "Confrairie N.-D. du Mont-Carmel" at Toulouse in 1273, and of a "Compagnia di Santa Maria del Carmino" at Bologna in 1280, but the exact nature of these bodies is uncertain owing to a lack of documents. Somewhat later mention is frequently made of trade-guilds having their seat in churches of the order, members of which acted as their chaplains. Thus the master-bakers, innkeepers and pastrycooks at Nîmes, the barbers and surgeons of the same town, who were also connected with the Dominicans, the goldsmiths at Avignon. Benefactors of the order received letters of fraternity with the right of participation in the privileges and good works of the friars. Others, under the name of *bizzoche* and *mantellatæ*, wore the habit and observed the rule, e. g. "M. Phicola nostra Pinzochera" at Florence in 1308. Others again became recluses in the anchorages attached to Carmelite churches, and made profession under the form: "Ego frater N. a Spiritu Sancto ad anachoreticam vitam vocatus offero me, coram Deo, Patri et Filio et Spiritui Sancto, et promitto me in servitio Dei secundum Scripturam sacram Novi et Veteris Testamenti more anchoreticæ vitæ usque ad mortem permansurum." Among the tertiaries not living in community must be mentioned Blessed Louis Morbioli of Bologna (d. 1495).

The canonical institution of the third order dates from the middle of the fifteenth century, when a community of Beguines at Guelders sought affiliation to the order, and Blessed John Soreth, General of the Carmelites, obtained a Bull (7 Oct., 1452) granting the superiors of his order the faculties enjoyed by the Hermits of St. Augustine and the Dominicans of canonically establishing convents of "virgins, widows, beguines and mantellatæ". Further legislation took place in 1476 by the Bull "Mare magnum privilegiorum", and under Benedict XIII and his successors. The rule observed by the tertiaries, whether living in the world or gathered into communities, was originally that of the friars with modifications as required by their status. Theodor Stratius, General of the Calced Carmelites, composed in 1635 a new rule, revised in 1678, which is still observed among the tertiaries of the Calced and the Discalced Carmelites. It prescribes the recitation of the canonical office, or else of the Little Office of the Blessed Virgin, or, in its place, of the Pater noster and Ave Maria to be said thirty-five times a day, five times in lieu of each of the canonical hours; also half an hour's meditation every morning and evening; fasting on all Fridays and also on Wednesdays and Saturdays from 14 September till Easter, abstinence during Advent and Lent, and various works of mortification, devotion, and charity. Superiors may in their discretion dispense from some of these obligations.

It is impossible to estimate even approximately the number of tertiaries living in the world. Besides these there are numerous corporations of tertiaries established in different countries, viz. two communities of tertiary brothers in Ireland (Drumcondra and Clondalkin near Dublin) in charge of an asylum for the blind and of a high-school for boys; eighteen communities of native priests in British India belonging partly to the Latin and partly to the Syro-Malabar rites; four houses of Brothers of Christian Education in Spain. Far more numerous are the communities of nuns, namely twenty-three in India (Latin and Syro-Malabar rites) for the education of native girls, and four convents in Syria in connexion with the missions of the Order; two congregations of tertiaries in Spain with nineteen and forty-eight establishments respectively, and one unattached, for educational work. In Spain there are also tertiary nuns called "Carmelitas de la caridad" engaged in works of charity with 150 establishments. The Austrian congregation of nuns numbers twenty-seven houses, while the most recent branch, the Carmelite Tertiaries of the Sacred Heart, founded at Berlin towards the end of the last century for the care and education of orphans and neglected children, have spread rapidly through Germany, Holland, England, Switzerland, Italy, Austria, and Hungary, and have twenty houses. In Italy there are three different congregations with thirty-two convents. There are smaller branches of the tertiaries in South America with two houses at Santiago, Chile, in Switzerland with four convents, and in England with one.

Bullarium Carmelitanum (Rome), 1715 sqq.; *Catalogus conventuum religiosorum et Monialium carmelitarum discalceatorum* (Rome, 1911).

BENEDICT ZIMMERMAN.

III. THE THIRD ORDER SECULAR OF THE ORDER OF OUR LADY OF MOUNT CARMEL has been introduced into the United States. There are at present two congregations, with 125 members.

FERDINAND HECKMANN.

IV. THIRD ORDER OF ST. DOMINIC.—*Origin.*—This was one of the earliest developments of St. Francis's Ordo de Pœnitentia. It was not indeed the primal organism from which the Friars Preachers evolved, but rather represents that portion of the Order of Penance which came under Dominican influence. At first vaguely constituted and living without system or form, its members gradually grew more and more dependent on their spiritual guides. The climax was reached, and the work of St. Francis received its final perfection, when Muñon de Zamora, the seventh master-general of the Friars Preachers, formulated a definite rule in 1285. By this the Ordo de Pœnitentia was to be ruled in each local centre by a Dominican priest (Federici, "Istoria de cavalieri Gaudenti", Venice, 1787, Codex Diplomaticus, II, 35) and was to be subject to the obedience of the Dominican provincials and master-generals. No longer were there to be any of those vague transitions and extravagant vagaries (ibid., 28) which disfigured in history these Orders of Penance. Henceforward this branch was linked to the fortunes of the Friars Preachers, wore their habits of black and white (with few minor differences varying according to time and country), and was to participate in all their good works. They were not called a third order indeed until after the thirteenth century (Mandonnet, "Les règles et le gouvernement de l'ordo de Pœnitentia", Paris, 1902, p. 207) but continued to be known as "Brothers and Sisters of Penance" with the addition "of St. Dominic", that is "The Brothers and Sisters of the Penance of St. Dominic".

Simultaneously with them there came into being another and very different institution which, however, subsequently amalgamated with the Ordo de Pœnitentia to form the Dominican Third Order. This was a military order, called the *Militia Jesu Christi* (soldiery of Jesus Christ) created for the defence of the Church against the Albigenses. It owed its origin to Bishop Foulques of Toulouse, Simon de Montfort (Federici, "Istoria de cavalieri Gaudenti", Codex Diplomaticus, I), and not improbably to St. Dominic, then a canon of St. Augustine. This connexion with the founder of the Friars Preachers is first definitely propounded by Bl. Raymund of Capua, who became a Dominican about 1350. But the truth of this assertion is borne out by several other indications. As early as 1235, Gregory IX confided the Militia to the care of Bl. Jordan of Saxony, second master-general, by a Bull of 18 May (Federici, op. cit., 10); and in the same year he decreed for the knights a habit of black and white (op. cit., 14). Further, when the Militia was brought across the Alps and established in Italy it is found to be always connected with some Dominican church (op. cit., I, 13). Lastly, it was very largely influenced by a famous Dominican, Fra Bartolomeo of Braganza, or of Vicenza, as he is sometimes called (op. cit., I, 12, 42, etc.). Originally working side by side and independent of each other, owing to the fact that both received the same spiritual administration of the Friars Preachers, they appear to have been merged together at the close of the thirteenth century. This is what Raymund of Capua implies as the result of his researches. So too their ultimate coincidence is hinted at by Honorius III in 1221 when he designates the Militia "nomine pœnitentiæ" (Federici, Codex Diplomaticus), and a comparison also of the rules of the two institutions: that of Gregory IX for the Militia in 1235 (op. cit., 12–16) and that of Muñon de Zamora for the Order of Penance of St. Dominic in 1285 (op. cit., 28–36) would lead one to the same conclusion. The only considerable difference that could be cited against this identity is that Muñon de Zamora expressly forbids the carrying of arms. But this is in reality but a further proof of their approximation, for he allows for the one exception which could possibly apply to the Militia, viz. in defence of the Church (ibid., 32). This amalgamation is admitted by the Bollandists to have become general in the fourteenth century (Acta Sanctorum, Aug., I, 418–422). From this double movement therefore, i. e. from the Ordo de Pœnitentia S. Dominici and the Militia Jesu Christi, was born the modern Third Order of St. Dominic. Though its source is therefore anterior to the First Order, its full perfection as an organized society, with a distinctive habit, a definite rule, and a declared *ethos* or spirit, is due to the genius of the children of St. Dominic. They took up the work of St. Francis, and, with their characteristic love of order and systematic arrangement, brought it into something compact and symmetrical. From them this idea of subjection to a First Order was taken up by the Franciscans and has been adopted by all subsequent Third Orders.

Spirit.—Primarily the work of the Third Order and its definite spirit may be summed up by saying that it was established first to help in reform of church discipline. Its initial purpose was the preaching of penance; but under Dominican influences it rather leaned to the intellectual aspect of the Faith and based its message to the world on the exposition of the Creed; it was to reform church discipline by the more widespread knowledge of the mysteries of faith. Secondly, to defend the Church. Originally this was a military necessity, demanding physical force with which to restrain equally material opposition. Thirdly, to develop the communion of prayer. The medieval ideal of Christ's Mystical Body which has captivated all spiritual-minded people implies a harmony of prayer. To achieve this end the contemplative and monastic orders were begun; and the Third Order of St. Dominic endeavours to link pious souls to this great throng of religious (Proctor, "The Dominican Tertiary's Daily Manual", London, 1900, 15–20).

Reformation.—Only for one period in its history was there any real fear of suppression. Many held that the condemnation passed on the Beguines and Beghards at the Council of Vienna in 1312 applied no less to the Orders of Penance. In consequence the master-general petitioned Pope John XXII in 1326 to settle definitely the difficulty. As a result he answered by a Bull of 1 June, 1326 (Cum de Mulieribus), which is a long eulogium on the work of the Dominican Third Order. After the plague of 1348, a great deal of laxity and disorganization crept into the Third Order, but a wonderful throng of saints soon caused its rejuvenation. The influence of St. Catherine of Siena gave a powerful impetus to the movement in Italy and her work was carried on by Bl. Clara Gambacorta (d. 1419) and Bl. Maria Mancini (d. 1431). This new spiritual vigour reached across the Alps to the sisterhoods of Germany, where the effect was almost abnormal (Heimbucher, "Die Orden und Kongregationen der katholischen Kirche", Paderborn, 1907, II, 169–177). But there has never been any reform in the sense of a separate organization with a change of rule or habit. As in the First Order, there has been a peculiar gift of unity which has enabled it to last undivided for seven hundred years.

Divisions.—The Third Order as it exists to-day can be divided into two categories: regular, i. e. comprising Tertiaries, whether men or women, who live in community and wear the habit externally; and secular, i. e. whether married or single, cleric or lay, who live their lives like others of their profession, but who privately take up practices of austerity, recite some liturgical Office, and wear some symbol of the Dominican habit. The origin of the conventual women Tertiaries has never been very clearly worked out. It is usual to trace them back to Bl. Emily Bicchieri, about the year 1255 ("Manual of Third Order of St. Dominic", London, 1871, 9). But if the view taken above of the origin of the Third Order in the Ordo de Pœnitentia be correct, we are forced to the conclusion that the communities of women established by St. Dominic at Prouille, S. Sisto, etc. were really of this Third Order. Their constitutions, approved first for S. Sisto, though previously observed at Prouille, expressly speak of the nuns as "de Pœnitentia S. Mariæ Magdalenæ" ("Analecta Ord. Præd.", Rome, 1898, 628 sqq.). It would seem then that the Ordo de Pœnitentia did not exclude convents of enclosed nuns from its ranks, and this was due probably to St. Dominic himself. Very much later came a conventual order of men, originated by the genius of Père Lacordaire. He considered that the democratic spirit of the Dominican Order fitted it especially for the task of training the youth. But he knew how impossible it was for his preaching associates to tie themselves down to schoolwork among boys; as a consequence, he began, in 1852, a Third Order of men, wearing the habit, living in community yet without the burdens of monastic life. The rule was approved provisionally in 1853 and definitely in 1868 (for the rule cf. "Acta Capituli Generalis Ord. Præd.", Rome, 1904, 106 sqq.). But by far the greatest portion of the Third Order consists of secular Tertiaries. These are of every rank of society, and represent the old Ordo de Pœnitentia and the old Militia. In certain countries they are grouped into chapters, having a lay prior and sub-prior or prioress and sub-prioress, and hold monthly meetings. Since the Rule of Muñon de Zamora (1285), they have always been subject to a Dominican priest appointed by the Dominican provincial. For the actual reception of the habit, the master-general can give faculties to any priest. The full habit is the same as that of the members of the First and Second Orders, but without the scapular (granted, however, to communities since 1667). Though the habit is not worn during life many procure it so that they may be buried in the recognized dress of St. Dominic's children.

Extent.—It is practically impossible to obtain, even in a vague way, the number of the secular Dominican Tertiaries. No general register is kept, and the records of each priory would have to be searched. From the time of St. Louis—who wished to join the Dominican and Franciscan Orders (Acta Sanctorum, August, V, 545), and is represented in old illuminations, sometimes in the habit of one, sometimes in the habit of the other (Chapotin, "Histoire des dominicains de la province de France", Rouen, 1898, p. 497), but probably never joined either—to our own time, it can be stated only that with the rise and fall of the First Order's greatness rose and fell the number of the Tertiaries. In England during the thirteenth century very many are said to have become Tertiaries. But of this nothing for certain can be specified. At the time of St. Catherine of Siena the Mantellate (women secular Tertiaries) made difficulties about receiving her to the habit as they included at the date only widows (Gardner, "St. Catherine of Siena", London, 1907, II), and there were no men at all in the Third Order in Italy at that date (Acta Sanctorum, April, III, 1881). Under Bl. Raymund of Capua, her confessor and, after her death, twenty-third master-general, attempts were made to re-establish the order and no doubt much was done (Mortier, "Maîtres généraux", III, 605–606). But by the time of St. Antoninus (d. 1450) the numbers had again dwindled down to insignificance ("Summa Moralis", Verona, 1750, III, 23, 5, 5, pp. 1291–2). Just previous to the Reformation there are a few isolated notices; thus Bl. Adrian Fortescue, the martyr, notes in his diary: "Given to the Black Friars of Oxford to be in their fraternity 12d" ("Letters and Papers of the Reign of Henry VIII", London, 1883, Rolls Series, VII, 101). But these give us no ground at all for any surmise as to statistics. In America the first canonized saint (St. Rose of Lima, d. 1617) and the first beatified negro (Bl. Martin Porres, d. 1639) were both Dominican Tertiaries, and later in France were men like M. Olier and Bl. Grignion de Montfort.

Then came the influence of Lacordaire, from whose time there dates a new enthusiasm in the Third Order ("Année Dominicaine", Paris, 1910, 149–65). Of the regular Tertiaries it is easier to speak more definitely. The numbers of all the sixteen approved congregations existing in 1902 are given, and they amount to some 7000 nuns ("Analecta Ord. Præd.", Rome, 1902, 389). To these must be added another 7000 of congregations not yet definitively authorized by Rome. But every year fresh convents are opened and the numbers continually increase. In England they began under Mother Margaret Hallahan (d. 1868) in 1842, and now in all the separate groupings there are 22 convents with some 500 sisters; in the United States their success has been remarkable. Founded in 1846 by Mother Amalie Barth (d. 1895), the congregation in 1902 included 34 convents and over 2000 nuns. In 1876 they passed into California, where they are rapidly increasing. In Ireland they have many establishments, especially for educational purposes, for their work is as varied as the needs of humanity require. Some are enclosed, others teach, visit the sick, nurse the lepers, look after old people, take care of penitent girls, work among the poor in the slums, etc. As for the congregation of teaching men, they have been greatly disorganized since their expulsion from France. At present they comprise but a half-dozen colleges in Fribourg, San Sebastian, and South America, and do not amount to more than 100 members in all. Finally, a citation from Faber's "Blessed Sacrament" (2nd ed., p. 565) may be made: "Those who are conversant with, indeed who find the strength and consolation of their lives in, the Acts of the Saints well know that there is not a nook in the mystical Paradise of our heavenly spouse where the flowers grow thicker or smell more fragrantly than this order of multitudinous child-like saints. Nowhere in the Church does the Incarnate Word show His delight at being with the children of men in more touching simplicity, with more unearthly sweetness, or more spouse-like familiarity than in this, the youngest family of S. Dominic."

V. Third Order Regular of St. Dominic, in the United States.—*Congregations of Women.*—A. Sisters of St. Dominic:—

(1) Congregation of St. Catherine of Siena, with mother-house at St. Catherine of Siena Convent, Springfield, Kentucky. Founded in 1822 by Rev. Thomas Wilson, O.P. Sisters, 300; novices, 30; postulants, 7; academies, 6; schools, 13; pupils, 5000. By this congregation were founded: (a) Congregation of Dominican Tertiaries of the Blessed Virgin, with mother-house at St. Mary's of the Springs, Sheppard, Ohio, in 1830. Sisters, 195; novices, 28; academies, 3; schools, 12; pupils, 4493. From this congregation were founded (i) Congregation with mother-house at Sacred Heart Convent, Galveston, Texas. Sisters and novices, 81; postulants, 3; schools, 6; pupils, 1130. (b) Congregation with mother-house at the Convent of Our Lady of the Sacred Heart, West Springfield, Illinois, in 1873. Sisters, 120; schools, 19; pupils, 4000, academy, 1. (2) Congregation with mother-house at St. Cecilia's Convent, Nashville, Tennessee. Founded in 1860 by sisters from St. Mary's, Somerset, Ohio. Sisters, 98; novices, 15; academy, 1; orphan asylum, 1; institute for young ladies, 1; schools, 6; pupils, 1042. (3) Congregation of the Most Holy Name of Jesus, with mother-house at San Rafael, California. Founded in 1850 by Most Rev. Joseph Alemany, O.P., Archbishop of San Francisco, at Benicia, California. Sisters, 135; academies, 3; schools, 6.

(4) Congregation of the Holy Rosary, with mother-house at St. Clara's Convent, Sinsinawa, Wisconsin. Founded in 1847 by Rev. Samuel Ch. Mazzuchelli, O.P. Sisters, 650; college, 1; academies, 9; schools, 46; pupils, 14,800. (5) Congregation of the Holy Cross, with mother-house at Holy Cross Convent, Brooklyn, New York. Founded in 1853 by 4 sisters from Holy Cross Convent, Ratisbon, Bavaria. Sisters, 518; novices, 25; postulants, 17; training school, 1; academies, 3; schools, 33; hospitals, 2; sanatorium, 1; infirmary, 1; orphan asylums, 6. From this congregation were founded: (a) Congregation of the Most Holy Rosary with mother-house at Mission San José, California, in 1876. Sisters, 193; novices, 20; postulants, 16; academy, 1; orphan asylum, 1; schools, 9; pupils, 2926. (b) Congregation of the Immaculate Conception, with mother-house at Great Bend, Kansas, in 1902. Sisters, 17; novice, 1; postulant, 1; hospital, 1; school, 1; pupils, 194. (6) Congregation with mother-house at Holy Rosary Convent, Second Street, New York City. Founded in 1859 by sisters from Holy Cross Convent, Ratisbon, Bavaria. Sisters, 600; academies, 8; hospitals, 2; schools, 60; pupils, 25,000. From this congregation were founded (a) Congregation with mother-house at Grand Rapids, Michigan, in 1877. Sisters, 187; novices, 50; postulants, 15; high school, 1; academies, 2; orphan asylum, 1; schools 32; pupils, 5000. (b) Congregation with mother-house at St. Dominic's Convent, Blauvelt, New York. Sisters, 139; novices, 11; postulants, 3; schools, 8; asylum, 1. (c) Congregation with mother-house at St. Dominic's Academy, Jersey City, New Jersey, in 1882. Sisters, 215; academies, 3; schools, 21; pupils, 4427. From this congregation was founded: (i) Congregation with mother-house at St. Thomas Aquinas Convent, Tacoma, Washington, in 1888. Sisters, 52; schools, 3; pupils, 300.

(7) Congregation with mother-house at St. Joseph's Convent, Adrian, Michigan. Sisters, 180; novices, 28; academies, 3; schools, 29. (8) Congregation with mother-house at St. Catherine of Siena's Convent, Racine, Wisconsin. Founded in 1862 by Mother Benedicta Bauer and Sister Thomasina Gincker from Holy Cross Convent, Ratisbon, Bavaria. Sisters, 286; postulants, 24; academies, 2; home for ladies, 1; schools, 38; pupils, 6307. (9) Congregation with mother-house at St. Mary's Convent, New Orleans, Louisiana. Founded in 1860 by sisters from Cabra, Dublin, Ireland. Sisters, 57; academies, 2; schools, 2; pupils, 565. (10) Congregation with mother-house at Reno, Nevada; founded by sisters from New Orleans, Louisiana. Sisters, 4. (11) Congregation with mother-house at St. Catherine of Siena Convent, Fall River, Massachusetts. Founded in 1891 by sisters from Carrollton, Missouri. Sisters, 52.

B. Dominican Sisters of the Third Order of St. Dominic:—

Congregation with mother-house at the Convent of Our Lady of the Rosary, 63rd Street, New York City. Founded in 1867 by Father Rochford, O.P. Sisters, 160; novices, 10; postulants, 5; academy, 1; orphan asylums, 2; schools, 11; pupils, 4000.

C. Third Order Secular of St. Dominic was introduced into the United States by the early Dominican missionaries. There are at present congregations of Dominican Tertiaries in almost all the churches in charge of Dominican Fathers, numbering from 100–600 members, and many hundred tertiaries throughout the country not belonging to any congregation.

born, 1907); *The Catholic Church in the United States*, I, II (New York, 1909); *Official Catholic Directory* (New York,)

FERDINAND HECKMANN.

VI. THIRD ORDER OF ST. FRANCIS (REGULAR AND SECULAR; MALE AND FEMALE), a branch of the great Franciscan family. We deal here: A. with the secular Third Order; B. with the regular.

A. *Origin, Development, and Present State of the Secular Third Order.*—It has been believed for some time that the Third Order of St. Francis was the oldest of all Third Orders, but historical evidence is against such an opinion. For, besides similar institutions in some monastic orders in the twelfth century, we find, before the foundation of St. Francis, a Third Order, properly so called, among the Humiliati, confirmed together with its rule by Innocent III in 1201 (see text in Tiraboschi, "Vetera Humiliatorum monumenta", II, Milan, 1767, 128). But if the Third Order of St. Francis was not the first of its kind, it was, and still is, undoubtedly the best known and most widely distributed and has the greatest influence. About its origin there are two opposite opinions. According to Karl Müller, Mandonnet, and others, the Secular Third Order is a survival of the original ideal of St. Francis, viz. a lay-confraternity of penitents, from which, through the influence of the Church, the First and Second Orders of the Friars Minor and the Poor Clares have been detached. According to others, St. Francis merely lent his name to pre-existing penitential lay-confraternities, without having any special connexion with or influence on them. The two opinions are equally at variance with the best texts we have on the subject, such as Thomas of Celano, "Vita prima", I, 15; Julian of Spires, "Office of St. Francis: Third Antiphon at Lauds"; Gregory IX, Bull of 7 June, 1230 (Bull. Franc., I, 65); St. Bonaventure, "Leg. Maior", IV, 6; Bernard of Besse, in "Anal. Franc.", III, 686. According to these sources, St. Francis really founded a Third Order and gave it a Rule. If we complete these notices with some early papal Bulls bearing on the penitential movement and with the account given by Mariano of Florence (end of the fifteenth and beginning of the sixteenth century) we can state what follows:

The preaching of St. Francis, as well as his own living example and that of his first disciples, exercised such a powerful attraction on the people that many married men and women wanted to join the First or the Second Order. This being incompatible with their state of life, St. Francis found a middle way: he gave them a rule animated by the Franciscan spirit. In the composition of this rule St. Francis was assisted by his friend Cardinal Ugolino, later Gregory IX. As to the place where the Third Order was first introduced nothing certain is known. Of late however the preponderance of opinion is for Florence, chiefly on the authority of Mariano of Florence, or Faenza, for which the first papal Bull (Potthast, "Regesta Pontificum", 6736) known on the subject is given, whilst the "Fioretti" (ch. xvi), though not regarded as an historical authority, assigns Cannara, a small town two hours' walk from Portiuncula, as the birthplace of the Third Order. Mariano and the Bull for Faenza (16 Dec., 1221) point to 1221 as the earliest date of the institution of the Third Order, and in fact, besides these and other sources, the oldest preserved rule bears this date at its head. This Rule was published by P. Sabatier and H. Boehmer (see bibliography), and contained originally twelve chapters, to which at the time of Gregory IX (1227) a thirteenth was added. It prescribes simplicity in dress (1), considerable fasting and abstinence (2–3), the canonical office or other prayers instead (4–5), confession and communion thrice a year, and forbids carrying arms or taking solemn oaths without necessity (6); every month the brothers and sisters have to assemble in a church designated by the ministers, and a religious has to give them an instruction (7); they also exercise the works of charity with their brothers (8); whenever a member dies the whole confraternity has to be present at the funeral and to pray for the departed (9); everyone has to make his last will three months after his reception; dissensions among brothers and sisters or other persons are to be settled peaceably; if any troubles arise with local authorities the ministers ought to act with the counsel of the bishop (10). No heretic or anyone suspected of heresy can be received, and women only with the consent of their husbands (11); the ministers have to denounce shortcomings to the visitor, who will punish the culprits; every year two new ministers and a treasurer are to be elected; no point of the rule obliges under pain of sin (12). On account of the prohibition of arms and unnecessary oaths, the followers of this rule came into conflict with local authorities, a fact of which we have evidence in many papal Bulls all through the thirteenth century, issued to safeguard the privileges of the Tertiaries (see list of these Bulls in Mandonnet, "Les Règles", 146–47).

Wadding ("Annales Min.", ad a. 1321, n. 13) gives another longer redaction of the rule, which is almost identical with the one solemnly confirmed by Nicholas IV through the Bull "Supra montem", 17 Aug., 1289. This last form has for long been considered as the work of St. Francis, whilst Karl Müller denied any connexion of St. Francis with it. If we compare the rule published and approved by Nicholas IV with the oldest text of 1221, we see that they substantially agree, slight modifications and different dispositions of chapters (here 20 in number) excepted. Through a most interesting text published by Golubovich (Arch. Franc. Hist., II, 1909, 20) we know now that this Rule of Nicholas IV was approved on the petition of some Italian Tertiaries. Another recent publication by Guerrini (Arch. Franc. Hist., I, 1908, 544 sq.) proves that there existed in the thirteenth century Third Order Confraternities with quite different rules. On the whole, it can safely be affirmed that until Nicholas IV there was no Rule of the Third Order generally observed, but besides the one quoted above, and probably the most widely spread, there were others of more local character. The same might be said as to the government of the confraternities. Besides their own officials, they had to have a visitor, who seems to have been usually appointed by the bishop. In 1247 Innocent IV ordered that the Friars Minor were to assume the direction of the Tertiaries in Italy and Sicily (Bull. Franc., I, 464), but about twenty years later when St. Bonaventure wrote his question: "Why do not the Friars Minor promote the Order of 'Penitents'?" (Op. om., VIII, 368) the contrary had practically prevailed. Nicholas IV introduced unity of rule and of direction into the Third Order, which henceforward was entrusted to the care of the Friars Minor.

If we except a few points, bearing especially on fasts and abstinence, mitigated by Clement VII in 1526 and Paul III in 1547, the Rule as given by Nicholas IV remained in vigour till 1883, when Leo XIII, himself a tertiary, through the Apostolic Constitution "Misericors Dei Filius", modified the text, adapting it more to the modern state and needs of the society. All substantial points, however, remained; only the daily vocal prayers were reduced, as also the fasts and abstinences, whilst the former statute of confession and communion thrice a year was changed into monthly communion. Other points of the modified Rule of Leo XIII are of great social and religious importance, such as the prohibition of pomp in dressing, of frequenting theatres of doubtful character, and keeping and reading papers and books at variance with faith and morals. The direction is entrusted to the three branches of the First Order: Friars Minor, Conventuals, Capuchins, and to the Regular Third Order. By delegation, confraternities can be established and directed by any parish priest. Those who for serious reasons cannot join a confraternity may be received as single tertiaries. Finally, great spiritual privileges are granted to all members of the Third Order.

The beneficent influence of the secular Third Order of St. Francis cannot be highly enough appreciated. Through the prohibition against carrying arms a deadly blow was given to the feudal system and to the ever-fighting factions of Italian municipalities; through the admission of poor and rich, nobles and common people, the social classes were brought nearer each other. How far the religious ideal of St. Francis was carried out by the secular Third Order we may judge from the great number (about 75) of saints and blessed of every condition it produced. It may suffice to mention: St. Elizabeth of Hungary; St. Louis, King of France; St. Ferdinand, King of Castile; St. Elizabeth of Portugal; St. Rosa of Viterbo; St. Margaret of Cortona; Bl. Umiliana Cerchi; Bl. Angela of Foligno; Bl. Raymond Lullus; Bl. Luchesius of Poggibonsi, who passes as the first tertiary received by St. Francis; St. Ivo; and in our times Bl. Jean-Baptiste Vianney, the curé of Ars; of names celebrated in history for literature, arts, politics, inventions, etc., Dante, Giotto, Petrarch, Cola di Rienzo, Columbus, Vasco da Gama, Cervantes, Lope de Vega, Thomas More, Galvani, Volta, Garcia Moreno, Liszt, and, finally, Lady Georgiana Fullerton. Popes Pius IX and Leo XIII were members of the Third Order, as also is Pope Pius X. Since the adaptation of the rule by Leo XIII the Third Order has grown more active than ever. At present the total number of members is esteemed about two and a half millions, spread all over the world. National and local congresses have been held in different countries: seven in the period from 1894 to 1908 in France, others in Belgium, some in Italy, the first general congress in Assisi (1895), many local ones from 1909 to 1911; others have been held in Spain, the last one at Santiago in 1909; in Argentina the last one at Buenos Aires in 1906; in India, Canada, and in Germany and Austria, in the last two instances in connexion with general congresses of Catholics. There exist almost in all civilized languages numerous monthly periodicals which, whilst keeping up the union amongst the different confraternities, serve also for the instruction and edification of its members. The "Acta Ordinis Frat. Min.", XXVI, Quaracchi, 1907, 255–58, gives the names of 122 such periodicals. French periodicals are indicated by P. B. Ginnet, O.F.M., "Le Tiers Ordre et le Prêtre", Vanves, 1911, p. 51 sq.; German periodicals by Moll, O.M. Cap., "Wegweiser in die Literatur des Dritten Ordens", Ratisbon, 1911. In Italy even a regular newspaper was founded, "Rinascita Francescana", Bologna, 1910; another in Germany, "Allgemeine deutsche Tertiaren-Zeitung", Wiesbaden, 1911. —We may mention also the special organs for directors of the Third Order, e. g. "Der Ordensdirektor", published at Innsbruck by the Tyrolese Franciscans, "Revue sacerdotale du Tiers-Ordre de Saint François", published by French Capuchins. Both reviews appear once every two months.

B. Third Order Regular (*Male and Female*). (1) Its origin and general development till Leo X.—The origin of the Regular Third Order, both male and female, can be traced back to the second half of the thirteenth century, but no precise date can be indicated. It was organized, in different forms, in the Netherlands, in the south of France, in Germany, and in Italy. Probably some secular tertiaries, who in many cases had their house of meeting, gradually withdrew entirely from the world and so formed religious communities, but without the three substantial vows of religious orders. Other religious associations such as the Beguines (women) and Beghards (men) in the Netherlands, sometimes passed over to the Third Order, as has been clearly shown from recent study. Towards the end of the thirteenth and the beginning of the fourteenth century some suspicion of heretical opinions fell on some of these free religious unions of the Third Order (*bizocchi*), as we can infer from the Bull of John XXII "Sancta Romana", Dec., 1317 (Bull. Franc., V, 134). More than a century later St. John of Capistran (1456) had to defend the Tertiaries in a special treatise: "Defensorium tertii ordinis d. Francisci", printed with other minor works of the saint at Venice in 1580. Throughout the fourteenth century the regular tertiaries of both sexes had in the most cases no common organization; only in the following century we can observe single well-ordered religious communities with solemn vows and a common head. Martin V submitted in 1428 all tertiaries, regular and secular, to the direction of the Minister-General of the Friars Minor (Bull. Franc., VII, 715), but this disposition was soon revoked by his successor Eugene IV. We meet thus in the same fifteenth century with numerous independent male congregations of regular tertiaries with the three vows in Italy, Sicily, Dalmatia, Spain, Portugal, France, Germany, and in the Netherlands. Contemporaneously there existed sister congregations of the Third Order with solemn vows, for instance, the Grey sisters of the Third Order, serving in hospitals, spread in France and the Netherlands, whose remarkable statutes of 1483 have recently been published by H. Lemartre in "Arch. Franc. Hist.", IV, 1911, 713–31, and the congregation still existing founded at Foligno in 1397 by Blessed Angelina of Marsciano (1435). Leo X, in order to introduce uniformity into the numerous congregations, gave in 1521 a new form to the rule, now in ten chapters, retaining of the rule as published by Nicholas IV all that could serve the purpose, adding new points, especially the three solemn vows, and insisting on subjection to the First Order of St. Francis. For this last disposition the Rule of Leo X met with resistance, and never was accepted by some congregations, whilst it serves till the present day as the basis of the constitutions of many later congregations, especially of numerous communities of sisters.

(2) Single congregations after Leo X, of women.—The two Italian congregations, the Lombardic and Sicilian, which had constituted themselves in the course of the fifteenth century, were united by Paul III, and since Sixtus V enjoyed entire independence from the First Order. It had then already 11 provinces. In the seventeenth century the congregations of Dalmatia and the Netherlands (of Zeppern) were united with the Italian family. In 1734 Clement XIII confirmed their statutes. Whilst the French Revolution swept away all similar congregations, the Italian survived with four provinces, of which one was in Dalmatia. In 1906 a small congregation of Tertiary lay brothers in the Balearic Islands and a little later two convents with colleges in the United States joined the same congregation, which in 1908 numbered about 360 members. The dress is that of the Conventuals, from whom they can hardly be distinguished. The residence of the minister-general is at Rome, near the Church of Sts. Cosmas and Damian. After the time of Leo X the Spanish congregation often had troubles on the question of its submission to the First Order. After Pius V (1568) had put the whole Third Order again under the care of the Minister-General of the Friars Minor, the superiors of the three provinces constituted in Spain could, after 1625, partake at the General Chapters of the Friars Minor and since 1670 they have had even a definitor-general to represent them. The French congregation, named from their house at Paris "of Picpus",

was reformed by V. Mussart (d. 1637), and maintained close ties with the First Order till its extinction in the French Revolution. A well-known member of this congregation is Hyppolit Hélyot, the author of an important history of the religious orders. In 1768 it had four provinces with 61 convents and 494 religious. Other congregations of Tertiaries existed after the fifteenth century in Germany, Bohemia, Hungary, Ireland, and England. They perished either at the time of the Reformation or in the French Revolution. We may mention also the Obregonians, the "Bons-Fils" in northern France founded in 1615, and the "Pénitents gris" at Paris after the sixteenth century, all now extinct. In the nineteenth century some new congregations arose, e. g. the Poor Brothers of St. Francis, the Brothers of St. Francis at Waldbreitbach (Rhine) after 1860, the "Frati bigi", founded in 1884 at Naples by Ludovic of Casoria, O.F.M. The most of these modern tertiary communities consist only of lay brothers and depend on the diocesan bishop.

(3) Congregation of Sisters.—Whilst Leo X in the reform of the rule had left it free to the congregations to adopt papal enclosure or not, Pius V (1568) prescribed it to all convents of tertiary sisters with solemn vows. Still this order was not carried out everywhere. In this regard the custom prevailed that the Friars Minor refused to take the direction of those convents which had only episcopal enclosure. Besides those already mentioned above, we may add the different offshoots of the Sisters of St. Elizabeth in Austria, Germany, the Netherlands, and France (there, under the name of Sœurs du Refuge, some of them still exist). The first Ursulines, also, founded by St. Angela Merici (1540), belonged to the Third Order.

In the nineteenth century many of the new congregations adopted the Rule of the Third Order, but most of them have no further connexion with the First Order. Many of them have widely varying names; a good many are of mere local character, others again are of international importance. As to their activities, almost all dedicate themselves to works of charity, either in hospitals, homes, or ateliers; others work in schools, not a few are in foreign missions. We can give here scarcely more than a list of the names, with the dates of the foundation. In Germany there are the Poor Sisters of St. Francis, founded 1845 (1851) by M. Schervier at Aachen, with some houses in America; the Franciscan Sisters of the Holy Family, founded in 1857 at Eupen, Diocese of Cologne; the Franciscan Sisters, at Münster, Westphalia, founded in 1850; the Poor Franciscan Sisters of the Perpetual Adoration, at Olpe, Diocese of Paderborn (1857); the Poor Franciscan Sisters of the Sacred Hearts of Jesus and Mary, at Salzkotten, near Paderborn (1863); the Sisters of Mercy of the Third Order, at Thuine, Diocese of Osnabrück (1869); the Sisters of Mercy of St. Francis, at Waldbreitbach, Diocese of Trier (1863); the Franciscan Sisters at Nonnenwerth, an island on the Rhine, founded in 1872 at Heythuizen in Holland; Franciscan Sisters of Maria-Stern, at Augsburg, whose first foundation can be followed back to the thirteenth century; Franciscan Sisters at Dillingen, Diocese of Augsburg, founded in the fourteenth century; the Poor Franciscan Sisters, at Mallersdorf, Diocese of Ratisbon (1855); the Congregation of Ursperg (1897); the Franciscan Sisters of Kaufbeuren, Diocese of Augsburg, founded in the fifteenth century, to which had belonged Blessed Crescentia Hess (1744). In the Diocese of Rottenburg, in Würtemberg, we note the communities of Bonlanden near Erolzheim (1855); of Heiligenbronn (1857); of the Sisters of Christian Charity, at Reute, founded 1849 at the same place where in the fifteenth century Blessed Elizabeth of Reute, called also the "good Beta" (d. 1420), had professed the Third Order; the Franciscan Sisters of Süssen (1853). In Baden is noteworthy the Congregation of Gengenbach (1867), since 1876 also in the United States, Joliet, Illinois. At Mainz there is the Convent of Perpetual Adoration (1860).

In Austria-Hungary the School Sisters of the Third Order (1723), with mother-houses at Hallein, Diocese of Salzburg, at Vienna (III), and at Judenau, Diocese of St. Pölten; the Sisters of the Third Order of St. Francis at Vienna (V), (1857); the Poor School Sisters at Voklabruck, Diocese of Linz (1850); the Sisters of Mercy of the Third Order of St. Francis at Troppau, Diocese of Olmütz (1853); Congregation of School Sisters of the Third Order of St. Francis, at Mährisch-Trübau, Diocese of Olmütz (1851); the School Sisters of the Third Order of St. Francis at Marburg on the Drau, Diocese of Lavant (1864); the Grey Sisters of the Third Order of St. Francis, at Prague (I), 1856; and three small communities in Tyrol. In Luxemburg there is the Congregation of Pfaffental; the Sisters of Mercy of St. Francis with the mother-house in the town of Luxemburg, and communities in Sweden and the Carolines. In Holland there are the Congregations of Rosendaal, of Breda, of Heythuizen, all of which have communities in foreign missions; lastly the Congregation of Heerlen. In Belgium there exist, besides the old congregation of the Grey Sisters of Hospitals (see above) at Antwerp, Léau, Tirlemont, Hasselt, and Tongres, the more recent communities of Ghent (founded 1701), of Hérines, Diocese of Malines, of Macon-lez-Chimay, of Opwyk, Diocese of Malines (1845). In Switzerland there once existed many congregations of the Third Order, and even now there are several convents of strict enclosure. Of the active congregations the most noteworthy are the two founded by the Capuchin Theodosius Florentini, viz. the Sisters of the Holy Cross for schools, with mother-house at Menzingen (1844), with numerous convents outside Switzerland, and the Sisters of the Holy Cross for hospital work (1852), with mother-house at Ingenbohl.

In France, before the last suppression of convents, there were about fifty communities of the Third Order; the most important was that of the Missionaries of Mary, founded by Mother de Chapotin de Neuville (d. 1904) in India, with actual mother-house at Rome, with communities spread all over the world. In Italy there are the Stigmatins, founded near Florence by Mother Lapini (d. 1860); the Sisters of Egypt, for missionary work, with mother-house at Rome; the Sisters of Gemona; finally, the Sisters of the Child Jesus, with mother-house at Assisi. On the whole, the sisters professing the Rule of the Third Order amount at least to 50,000.

The Regular Third Order produced one saint, Hyacintha of Mariscotti, and five Blessed: Lucia of Callagirone, Elizabeth of Reute, Angelina of Marsciomo, Jeremias Lambertenghi and Crescentia Höss of Kaufbeuren.

LIVARIUS OLIGER.

VII. THIRD ORDER OF ST. FRANCIS, IN CANADA.—The Third Order of St. Francis was established by the Friars Minor Recollects at Quebec in 1671, and some years later at Three Rivers and Montreal. Considering the population of the country, it was in a flourishing condition. In 1681 a Recollect notes that "many pious people of Quebec belong to the Third Order". After the cession of Canada to England the Third Order, deprived of its directors, the Recollects, seemed to have disappeared gradually, only to flourish anew thirty years after the death at Montreal, 1813, of the last Recollect priest. The Third Order was re-established about 1840 by Mgr Ignatius Bourget, Bishop of Montreal. Fervent fellow-labourers helped the holy prelate to spread the Third Order in Montreal, notably Canon J. A. Paré and the Sulpicians C. E. Gilbert and A. Giband. Mgr Bourget established a fraternity of women, 6 May, 1863, and one of men, 13 June, 1866; both were directed by the Sulpicians till 1874, by Canon P. E. Dufresne from 1874 till 1881, by the Jesuits from 1881 till 1888, and by the Sulpicians from 1888 till 1890; since then by the Friars Minor. Mgr Fabre, successor to Bishop Bourget, in a letter (3 Sept., 1882) to the priests and faithful of his diocese, says: "We have in our midst the tertiaries of St. Francis, who are known to you all by the edification they give, and by the good odour of all the virtues which they practise in the world." The Third Order was re-introduced at Quebec almost at the same time as at Montreal. On 19 Nov., 1859, Father Flavian Durocher, O. M. I., received the profession of two women, after a year's novitiate. These were joined by others, until in 1876 Quebec possessed over 2000 tertiaries, while in the Province of Quebec several parishes had groups of tertiaries. Among priests zealous for the spread of the Third Order at this epoch we must name, besides the above-mentioned Montreal priests: Father Durocher, St. Sauveur, Quebec; L. N. Bégin, now Archbishop of Quebec; James Sexton, Quebec; Oliver Caron, Vicar-General of Three Rivers; E. H. Guilbert, L. Provancher, and G. Fraser, all three of the Quebec diocese. Father Provancher was one of the most zealous. In 1866, having received faculties from the General of the Friars Minor, he established a very fervent fraternity in his parish of Portneuf. He propagated the Third Order by his writings. For two years he edited a review, in which he published nearly every month an article on the Third Order, or answered questions appertaining thereto. At that epoch (1876) the brothers' fraternity at Montreal counted 137 members; the sisters, a still greater number. At Three Rivers the tertiaries were less numerous—enough, however, to form a fraternity a little later. Quebec with its 200 tertiaries did not have a fraternity till 1882.

In 1881 the arrival in Canada of Father Frederic of Ghyvelde gave new spirit to the Third Order. He spent eight months in Canada, and worked actively for the Third Order. He began at Quebec, where he held the Holy Visit prescribed by the rule and admitted 100 new members. At Three Rivers he found "a numerous and fervent fraternity". His visit to the fraternities of Montreal was followed by a notable increase in membership. Shortly afterwards Leo XIII published his Encyclicals on the Third Order. The Canadian bishops, in obedience to the pope's wishes, recommended the Third Order to their clergy and faithful. But the Friars of the First Order alone could give the Third a fitting development; hence, when Father Frederic returned in 1888, several bishops, among them Bishop Laflêche of Three Rivers and Archbishop Taschereau, welcomed him as its promoter. The foundation of a convent of Friars Minor at Montreal in 1890 inaugurated a new era of prosperity for the Third Order. The Franciscans took over the direction of the Third Order at Montreal. The fraternities of other districts were visited regularly, and new ones were formed. The Third Order has since spread rapidly. To-day the Third Order in Canada numbers nearly 200 fraternities with over 50,000 members, under the jurisdiction of the Friars Minor. The Capuchins have a small number of fraternities. The Friars Minor have also the direction of 20 fraternities with 5000 members in the Franco-Canadian centres of the United States. All these with large numbers of isolated tertiaries give a total of nearly 60,000. These tertiaries are mostly French Canadians. There are very few fraternities for English-speaking tertiaries; of these there are two very flourishing ones at Montreal. It is in the Province of Quebec that the Third Order is most flourishing. Three monthly reviews, treating specially of the Third Order, are published in Canada: (1) "La Revue du Tiers Ordre", founded in 1884 by the tertiaries of Montreal, and directed since 1891 by the Friars Minor of that city; (2) "The Franciscan Review and St. Anthony's Record", founded in 1905 by the Friars Minor of Montreal; (3) "L'Echo de St. François", published since 1911 by the Capuchins of Ottawa. The principal social works of the Third Order in Canada are: three houses of the Third Order in Montreal and one in Quebec, directed by lady tertiaries; a lodging-house and an industrial school at Montreal, directed also by lady tertiaries; several work-rooms for the benefit of the poor; and public libraries, one in Quebec and two in Montreal.

The Third Order Regular is represented in Canada by three flourishing institutions: A. *Little Franciscan Sisters of Mary*, founded at Worcester, Massachusetts, in 1889 and transferred to Baie-St-Paul, Canada, in 1891; their constitutions were approved in 1903. They follow the Rule of the Third Order Regular. Their habit comprises a brown tunic and scapular, a white hood and wimple, and a white woollen cord; they wear a silver crucifix. Work.—Assistance of the sick, the poor, the aged, of orphans and instruction of the young—in a word, all the works of mercy. Development.—This congregation possesses 8 houses, nearly all in the United States. The mother house is at Baie-St-Paul, Province of Quebec, Canada. The institution numbers 150 professed sisters, 7 novices, 30 postulants, and 8 associates.

B. *Franciscan Missionaries of Mary*, founded in India, and following the Rule of the Third Order Regular. They have six houses in Canada: (1) Quebec, founded 1892; novitiate, perpetual adoration, printing, embroidery, workshop, house of probation for aspirants, patronage, visiting the sick. (2) St. Anne of Beaupré (1894); patronage, workshop, hospitality for pilgrims, visiting the sick. (3) St. Lawrence, Manitoba (1897); boarding-school, parochial schools, dispensary, visiting the sick. (4) Pine Creek, Manitoba (1899); school, model farm, dispensary, visiting the sick. (5) St. Malo, Quebec (1902); day nursery, primary schools, school of domestic economy, dispensary, pharmacy, visiting the sick. (6) Winnipeg (1909); day nursery, embroidery, patronage, visiting the poor and the hospitals. These houses possess 150 sisters, novices included. Since its establishment in Canada, the congregation has had 290 Canadian members, many of whom are now engaged in mission work in China, Japan, India, Ceylon, Congo, Zululand, Natal, Mozambique, Madagascar, and South America. The mother-house of Quebec has founded six others in the United States: Woonsocket in 1904; New York and New Bedford in 1906; Boston in 1907; Providence in 1909; Fall River in 1910.

C. *Religious of St. Francis of Assisi*, founded at Lyons, France, in 1838. Their object is the care of the sick and of orphans and the education of the young. They were introduced into Canada in 1904, and have at present 5 houses, comprising a hospital, a boarding-school for girls, and model and elementary schools.

Third Order Secular: Leclercq, *Premier Etablissement de la foi* (Paris, 1691); *Eclaircissements sur l'établissement d'un hospice à Québec* (1681), *Archives de Versailles, Fonds Récollets; Gazette des Familles, Bulletin Mensuel* (Quebec, 1869–76); *Revue du Tiers-Ordre; Fr. Bienvenu d'Osimo, tertiaire, Notice historique sur le Tiers-Ordre à Quèbec* (Quebec, 1903). Third Order Regular: information furnished by the congregations themselves.

Odoric M. Jouve.

VIII. Third Order of St. Francis in Great Britain and Ireland.—A. *In Great Britain.*—The Third Order Secular comprises ninety-six congregations of which forty are under the jurisdiction of the Friars Minor of the Leonine Union and fifty-four under that of the Friars Minor Capuchin, and about 12,000 members, amongst whom are several diocesan bishops, a number of the clergy, and laity of all ranks. In their organization the British tertiary congregations follow the common rule, but many of them add some corporal works of mercy, reclaiming negligent Catholics, and so forth. All the tertiaries are governed by a commissary-provincial appointed by the minister-provincial of the first order. His duty is to grant the necessary faculties to directors of congregations, to hold visitations, and generally supervise the affairs of the Third Order under his jurisdiction. A national conference of British tertiaries with a view to strengthening and consolidating the order, was held in 1898 at Liverpool in the hall attached to the Jesuit church, and was presided over by the bishop of the diocese. The opening address was delivered by the Archbishop of Paris. A second national conference was held at Leeds. Since the institution of the English national Catholic congress, in 1910, the tertiaries have taken part in these and have had their sectional meeting in the congress.

Of the Third Order in Great Britain in pre-Reformation days little is known. It is, however, certain that there existed in Scotland several houses of Sisters of the Third Order Regular. Blessed Thomas More is frequently spoken of as a tertiary of St. Francis, but there seems to be no historical evidence to support this statement. The Third Order, however, was known in England in the penal days. Fr. William Staney, the first commissary of the order in England after the Dissolution, wrote "A Treatise of the Third Order of St. Francis" (Douai, 1617). An interesting fact in connexion with the Third Order in England is the appointment in 1857, as commissary-general, of Dr. (afterwards Cardinal) Manning, by a letter patent, dated 10 April, 1857, given by the minister-general of the Capuchin Friars Minor, empowering him to act as "Superior, visitor and Our Commissary of each and all the brothers and sisters of the Third Order Secular dwelling in England". Amongst notable English tertiaries of modern times, besides Cardinal Manning, may be mentioned Cardinal Vaughan, Lady Herbert of Lea, the late Earl of Denbigh, and the poet Coventry Patmore. The Third Order Regular is represented in England by nineteen convents of sisters and in Scotland by six convents. There are no communities of brothers. These convents belong to various congregations, most of which are of English institution. They devote themselves either to education or to parochial works of mercy or to the foreign missions. Most notable historically amongst these congregations are the convents at Taunton and Woodchester, which represent the English convent of the Third Order established at Brussels, Belgium, in 1621. Their founder was Father Gennings, the brother of the martyr Edmund Gennings. This was, in fact, the first convent of the Third Order Regular, enclosed, founded for English women. The community later on migrated to Bruges where it remained until 1794, when, owing to the troubles caused by the French Revolution, it crossed over into England and, after eleven years' residence at Winchester, settled finally at Taunton in Somerset. The congregation was under the jurisdiction of the Friars Minor until 1837 when, owing to the dissolution of the Recollect province, it came under the jurisdiction of the diocesan bishop. In 1860 a second foundation was made at Woodchester.

B. *In Ireland.*—The congregations of the Third Order Secular in Ireland are almost exclusively attached to churches of the First Order. Under the jurisdiction of the Friars Minor of the Leonine Union are fourteen congregations with 9741 members, and subject to the Capuchin Friars Minor are four congregations with 5100 members. The Third Order Regular comprises two houses of brothers at Clara and Farragher, and eleven in the Archdiocese of Tuam, all devoted to educational work. At Drumshambo the sisters of the order have a convent where perpetual adoration is maintained day and night. There is also one convent of the Franciscan Missionary Sisters of Mary.

Franciscan Annals (Pantasaph, North Wales), a monthly magazine; *Franciscan Monthly* (Forest Gate, London); various details will be found in THADDEUS, *The Franciscans in England* (London, 1898) and in the statistical tables published yearly in *Acta ord. ff. min.* and *Analecta ord. ff. min. capp.*

FATHER CUTHBERT.

IX. THIRD ORDER REGULAR OF ST. FRANCIS, IN THE UNITED STATES.—A. *Congregations of Men.*— (1) Province of the Sacred Heart of Jesus of the Fathers of the Third Order Regular of St. Francis. In 1847 Bishop O'Connor of Pittsburgh obtained from the Irish congregation six brothers, who founded a monastery and college at Loretto, Pennsylvania. Pius IX, by a Rescript of 12 Nov., 1847, erected this foundation into an independent congregation under the obedience of the Bishop of Pittsburgh. This congregation in 1908 joined the Italian congregation, and together with the community at Spalding, Nebraska, which in 1906 had joined the Italian congregation, was erected into a province, 24 Sept., 1910. Houses, 4; colleges, 2; religious, 62; novices, 5. (See below.)

(2) Congregation of the Franciscan Brothers, of Brooklyn, New York. Founded 31 May, 1858, by 2 brothers from the Irish congregation, Pius IX, by a Rescript of 15 Dec., 1859, erected it into an independent congregation. The ordinary of the Diocese of Brooklyn is the superior-general, and governs the congregation through a provincial superior with an assistant and seven consultors, chosen by the brothers from among themselves for a term of three years. Brothers, 67; novices, 8; academy, 1; college, 1; schools, 14; pupils, 9875. (See below.)

(3) Congregation of the Brothers of the Poor of St. Francis Seraphicus. Founded 25 Dec., 1857, at Aachen by John Hoever for the protection and education of poor, homeless boys, it was introduced into the United States in 1866. Brothers, 43; novices, 5; postulants, 3; candidates, 13; homes for boys, 2.

B. *Congregations of Women.*—(1) Sisters of the Third Order Regular of St. Francis:—(a) Congregation with mother-house at Oldenburg, Indiana. Founded in 1851 by Rev. F. J. Rudolf, its rules and constitutions were approved by the Holy See. Sisters, 536; novices, 41; postulants, 7; schools, 67; pupils, 12,273. (b) Congregation with mother-house at Mt. St. Clare, Clinton, Iowa. Founded in 1867 by Rt. Rev. Bishop Lavialle of Louisville, Kentucky. Sisters, 130; novices and postulants, 40; hospital, 1; schools, 16; pupils, 2590.

(2) Sisters of the Third Order of St. Francis:—(a) Congregation with mother-house at Glen Riddle, Pennsylvania. Founded by the Ven. John Nepomucene Neumann, C.SS.R., Bishop of Philadelphia, who on 9 April, 1855, invested three devout women, Marianne Bachmann (Mother M. Francis), Barbara Boll (Sister M. Margaret), and Anna Dorn (Sister M. Bernardina), with the habit of St. Francis. In 1896 the mother-house was transferred from Philadelphia to Glen Riddle. This congregation is divided into three provinces. Houses, 80; sisters, 818; novices, 48; postulants, 15; academies, 4; seminaries, 2; orphan asylums, 9; hospitals, 12; schools, 42; schools for Indians and negroes, 8. By and from this congregation were established (i) Congregation with mother-house at 337 Pine Street, Buffalo, New York in 1861. Sisters, 277; novices, 30; postulants, 16; asylums for aged, 3; schools, 30; pupils, 6540; orphan asylum, 1; hospitals, 2. From this congregation were founded (*α*) Congregation with mother-house at Mt. Alvernia, Millvale Station, Pennsylvania, in 1868. Sisters, 210; novices, 17; postulants, 13; schools, 14; pupils, 6429; orphan asylum, 1; hospital, 1; home for ladies, 1. (*β*) Congregation with mother-house at Mt. Hope, Westchester Co., New York, 1893. Legal title: Sisters of St. Francis, Conventuals of the Third Order of the M.I.V. Sisters, 182; novices, 19; postulants, 9; academy, 1; schools, 6; (ii) Congregation with mother-house at St. Anthony's Convent, Syracuse, New York, 1862. Sisters, 173; novices, 9; candidates, 6; schools, 17; pupils, 4500; hospitals, 3; home for aged, 1; home for children, 1; convents at Hawaiian Islands, 4. (b) Congregation with mother-house at St. Francis's Hospital, Peoria, Illinois; founded in 1867 by Rt. Rev. John L. Spalding, Bishop of Peoria, and sisters from the House of Bethlehem, Herford, Germany. Sisters, 163; novices, 38; postulants, 26; hospitals, 10; patients, 5320. (c) Congregation with mother-house at Tiffin, Ohio. Founded in 1867 by Rev. J. L. Bihn. Sisters, 56; novices, 9; postulants, 4; hospital, 1; orphan asylums, 2; homes for aged, 2; schools, 13. (d) Congregation with provincial house at Peekskill, New York. Founded by Mother M. Gertrude and two sisters from the general mother-house, Gemona, Italy, who, at the request of Rev. Andrew Feifer, O.F.M., came to this country in 1865. Sisters, 284; novices, 18; postulants, 15; academy, 1; schools, 18; day nurseries, 3; institution for destitute children, 1; home for working girls, 1; children in charge of sisters, 7768. (e) Congregation with mother-house at Bay Settlement, Wisconsin, founded 6 Dec., 1867. Sisters, 35.

(3) Sisters of St. Francis:—(a) Congregation with mother-house at St. Elizabeth's Convent, Allegany, New York. Founded in 1857 by Very Rev. Pamfilo di Magliano, O.F.M. Sisters, 300; novices, 25; postulants, 12; schools, 11; hospitals, 2; homes, 4. (b) Congregation with mother-house at St. Francis's Convent, Dubuque, Iowa. Founded in 1876 by Mother Xaveria Termehr and sisters from the house of Bethlehem, Herford, Germany, who on account of the infamous "May laws", were compelled to leave Germany. Sisters, 399; novices, 34; postulants, 20; orphan asylums, 2; industrial school, 1; academy, 1; home for aged, 1; schools, 43; pupils, 6829. (c) Congregation with mother-house at St. Joseph's Hospital, Maryville, Missouri. Founded with the approbation of Rt. Rev. M. F. Burke, Bishop of St. Joseph, Missouri, in 1894. Sisters, 45; novices, 7; postulants, 1; hospitals, 6. (4) Sisters of St. Francis of Penance and Christian Charity:—Congregation with mother-house at Stella Niagara, near Lewiston, New York. Established in 1874 by Mother M. Aloysia and three sisters from Nonnenwerth, near Rolandseck, Rhenish Prussia, Germany. Sisters, 253; academies, 5; schools, 18; pupils, 6348; orphan asylum, 1; Indian schools, 2; pupils, 577; foundling-house, 1.

(5) Franciscan Sisters:—(a) Congregation with mother-house, Grand Avenue and Chippewa Street, St. Louis, Missouri. Founded in 1872 by sisters from the general mother-house at Salzkotten, Germany. Sisters, 224; hospitals, 6; schools, 1; orphan asylums, 2; house of providence, 1; convent, 1; (b) Congregation with mother-house at Mill Hill, London, England, for coloured missions. Introduced into the United States in 1881. Sisters, 58; industrial school, 1; parochial schools, 4; pupils, 765. (6) Sisters of St. Francis of the Sacred Heart:—Congregation with mother-house at Mercy Hospital, Burlington, Iowa. Sisters, 22; hospital, 1. (7) Franciscan Sisters, Minor Conventuals:—Congregation with mother-house at St. Joseph's Convent, Buffalo, New York. Sisters, 58; novices, 16; postulants, 21. (8) Sisters of the Third Order of St. Francis of Assisi, M.C.:—Congregation with mother-

house at St. Francis, Wisconsin. Founded in 1849 by sisters from Bavaria. Its rules and constitutions were compiled by Rev. M. Heiss in 1852, and approved by Rt. Rev. J. M. Henni, Bishop of Milwaukee. In June, 1873, this congregation was affiliated to the Order of Minor Conventuals, and Pius X on 6 Dec., 1911, gave it its definite approbation. Sisters, 303; novices, 22; postulants, 30; academy, 1; orphanage, 1; institute for deaf mutes, 1; for feeble minded, 1; schools, 36; pupils, 4500. (9) School Sisters of St. Francis:—Congregation with mother-house, Greenfield and Twenty-Second Avenues, Milwaukee, Wisconsin. The sisters conduct schools in Wisconsin, Minnesota, South Dakota, Nebraska, Iowa, Missouri, Illinois, Michigan, and Oregon. There are two branch-houses of this congregation in Europe, one in Luxemburg, the other at Erlenbad, Baden. Sisters, 814.

(10) Franciscan Sisters of the Perpetual Adoration:—Congregation with mother-house at St. Rose Convent, La Crosse, Wisconsin. Founded by six sisters from Bavaria, and rules compiled in 1853 by Most Rev. M. Heiss, Archbishop of Milwaukee. The Perpetual Adoration was introduced in 1878. Sisters, 420; novices, 42; postulants, 40; schools, 63; pupils, 8448; orphan asylums, 2; Indian school, 1; domestic science schools, 2. (11) Franciscan Sisters of Christian Charity:—Congregation with mother-house at Holy Family Convent, Alverno, Wisconsin. Founded in 1869 at Manitowoc, Wisconsin, by Rev. Joseph Fessler, it was affiliated to the Order of Friars Minor Conventual 19 March, 1900. Sisters, 303; novices, 40; postulants, 10; hospitals, 2; home for aged, 1; schools, 53; pupils, 8500. (12) Franciscan Sisters of the Sacred Heart:—Congregation with mother-house at St. Joseph's Hospital, Joliet, Illinois. Founded in 1867 at Avila, Indiana, by sisters from Germany. Sisters, 325; novices, 40; postulants, 12; hospitals, 10; home for aged, 1; orphan asylum, 1; schools, 9. (13) Sisters of the Third Order of St. Francis of Perpetual Adoration:—Congregation with mother-house at St. Francis's Convent, Nevada, Missouri. Established in 1893 by Sister M. John Hau and sisters from the mother-house at Grimmenstein, Switzerland. Sisters, 25; orphan asylum, 1. (14) Hospital Sisters of St. Francis:—Congregation with provincial house at St. John's Hospital, Springfield, Illinois. Founded in 1875 by sisters from the general mother-house, Münster, Germany. Sisters, 299; novices, 29; postulants, 11; hospitals, 12. (15) The Poor Sisters of St. Francis Seraph of the Perpetual Adoration:—Congregation with provincial house at St. Francis Convent, Lafayette, Indiana. Introduced into this country in 1875 by sisters from the general mother-house at Olpe, Germany. Sisters, 613; novices, 35; postulants, 21; academies, 3; orphan asylum, 1; home for aged, 1; schools, 36; hospitals, 18; high schools, 2. (16) Sisters of the Poor of St. Francis. See Poor of St. Francis, Sisters of the.

(17) Franciscan Sisters of St. Kunegunda (Polish):—(a) Congregation with mother-house at Chicago, Illinois. Founded in 1896. Sisters, 107; novices, 22; postulants, 18; orphan asylum, 1; home for aged and crippled, 1; day-nursery, 1; schools, 11; pupils, 2070. (b) Congregation with mother-house at Chicago Heights, Illinois. Foundation of English-speaking Franciscan Sisters. Sisters, 17. (18) Sisters of St. Francis of the Immaculate Conception:—Congregation with mother-house at Peoria, Illinois. Founded in 1890. Sisters, 47; novices, 20; postulants, 17; schools, 6; homes, 2; asylum, 1. (19) Missionary Franciscan Sisters of the Immaculate Conception:—Congregation with mother-house, Rome, Italy. The sisters conduct establishments in the Archdioceses of New York and Boston, the Diocese of Newark, Pittsburgh, and Savannah. (20) Franciscan Sisters of the Immaculate Conception:—(a) Congregation with mother-house at Little Falls, Minnesota. Sisters, 60; postulants, 3; orphan asylum, 1; hospitals, 3. (b) Congregation with mother-house at St. Anthony's Hospital, Rock Island, Illinois. Sisters, 18; novices, 6.

(21) Polish Franciscan School Sisters:—Congregation with mother-house, 3419 Gasconde Street, St. Louis, Missouri. Founded 29 May, 1901, by Most Rev. John J. Kain, Archbishop of St. Louis. Sisters 63; schools, 9; pupils, 700. (22) Felician Sisters, O.S.F.:—Congregation with general mother-house, Cracow, Austria. Founded in 1855 by Sophia Truszkowska at Warsaw, Russia. Introduced into the United States in 1874. (a) Western Province of the Presentation B. V. M. Mother-house, Detroit, Michigan. Sisters, 273; novices, 30; postulants, 55; candidates in preparatory course, 65; schools, 33; pupils, 12,500; orphan asylum, 1. (b) Eastern Province. Mother-house at Buffalo, New York, established 20 Aug., 1900. Choir Sisters, 278; novices, 32; postulants, 93; lay sisters, 66; novices, 6; postulants, 21; candidates in preparatory course, 73; schools, 55; pupils, 21,556; orphan asylums, 2; home for aged, 1; emigrant home, 1; working-girls' home, 1; day nursery, 1. (c) North-western Province of the Presentation B. V. M. Mother-house, St. Joseph's Orphanage, Milwaukee, Wisconsin, established 1910. Sisters, 170; novices, 17; postulants, 27; schools, 24; pupils, 6482; orphan asylums, 3. (23) Sisters of the Third Order of St. Francis of the Congregation of Our Lady of Lourdes. Mother-house, Rochester, Minnesota. Established 1877 by sisters of St. Francis, Joliet, Illinois. Sisters, 336; novices, 9; postulants, 16; academies, 5; normal school, 1; schools, 20; pupils, 5767; hospital, 1; nurses' training school, 1.

X. Province of the Sacred Heart of Jesus.—Prior to 1906 several communities of the Third Order existed in the United States, all lay institutes dedicated to teaching and other works of charity. Amongst these were three branches of Franciscan Brothers: at Brooklyn, New York; at Loretto, Pennsylvania; and at Spalding, Nebraska. The communities at Loretto and Brooklyn were founded more than half a century ago from Mount Bellew Monastery, Archdiocese of Tuam, Ireland; Spalding Institute was a branch of the Brooklyn community. In 1905 Brother Linus Lynch, then superior of the institute, asked the ordinary of the diocese for permission to have some of his subjects ordained priests. This request the bishop refused, as the community had been introduced into the diocese for the care of parish schools, and he feared that in the event of its members becoming priests this work would suffer. A petition was then sent to the minister-general, Rt. Rev. Angelus de Mattia, asking for union with the third Order Regular; as this union could not be effected, some of the community determined to ask for a dispensation from their vows in order to enter the institute. In 1907 fifteen were dispensed; these, together with eleven novices, went to Spalding, Nebraska, where a small community of brothers had been united to the order in 1906. They were received by Very Rev. Dr. Stanislaus Dujmoric, commissary-general, and by dispensation of Pius X from the ordinary year of probation they made the vows of the order. A college was then opened at Spalding, giving the order its first house in the United States.

In 1908 the diocesan community of Franciscan Brothers at Loretto, Pennsylvania, were admitted to the solemn profession, and eight young men were received into the novitiate.

In 1910–11 Rt. Rev. Eugene A. Garvey, D.D., Bishop of Altoona, requested the fathers to take charge of the Italian Church of St. Anthony of Padua at Johnstown, Pennsylvania, and the Church of Our Lady of Mount Carmel, Altoona, Pennsylvania. The four houses in the United States were erected into a province, 24 Sept., 1910, Very Rev. Dr. Jerome Zazzara being elected provincial. The Archbishop of Chicago has since given the fathers charge of Sts. Peter and Paul's Slavic Church in that city, and a new college is to be opened at Sioux City, Iowa, in 1912. The provincial mother-house is at St. Francis's College, Loretto, Pennsylvania. The American Province has now five convents, two colleges, sixty-five professed members, and twenty novices and postulants.

XI. THE THIRD ORDER SECULAR OF ST. FRANCIS was established in the United States by the early Franciscan missionaries for the white settlers and soldiers and Indian converts, especially in the Southern States. A confraternity existed at Santa Fé long before 1680. Another confraternity existed in New Mexico almost from the time of the reconquest (1692–1695). The document stating this fact is a report of the Father custos, José Bernal, dated Santa Fé, 17 Sept., 1794. There is no documentary evidence of the existence of a Third Order for lay people as a regularly organized confraternity anywhere else, though we learn from documents that single individuals were termed tertiaries among the Indians. It is most probable, however, that a confraternity existed at St. Augustine, Florida, before the close of the sixteenth century, and at San Antonio, Texas, before the middle of the eighteenth century. The establishment of provinces of the order of Friars Minor brought about the establishment of many confraternities. There are at present 186 confraternities of Franciscan Tertiaries in this country, with a membership of 35,605. Of these, 142 congregations with 27,805 members are under the direction of the Friars Minor, 32 with 6800 members under the direction of the Friars Minor Capuchin, and 12 congregations with 1000 members under the direction of the Friars Minor Conventual. Besides these, there are many hundreds of tertiaries throughout the country not belonging to any congregation.

XII. THE THIRD ORDER SECULAR OF THE SERVITES was established in the United States in 1893. There are at present 2 congregations, with a membership of 400.

XIII. THE THIRD ORDER REGULAR OF SERVITES. See MARY, SERVANTS OF.

FERDINAND HECKMANN.

Thirty Years War, THE.—The Thirty Years War (1618–48), though pre-eminently a German war, was also of great importance for the history of the whole of Europe, not only because nearly all the countries of Western Europe took part in it, but also on account of its connexion with the other great European wars of the same era and on account of its final results.

I. CAUSES OF THE WAR.—The fundamental cause was the internal decay of the empire from 1555, as evidenced by the weakness of the imperial power, by the gross lack of patriotism manifested by the estates of the empire, and by the paralysis of the imperial authority and its agencies among the Protestant estates of South-western Germany, which had been in a state of discontent since 1555. Consequently the whole of Germany was in a continual state of unrest. The decay of the empire encouraged the other nations of Western Europe to infringe upon its territory. Spain and the Netherlands made use of the period of the twelve-years truce to secure a footing in the neighbouring district of the Lower Rhine so as to increase their strategic base. For nearly a hundred years France had made treaties with many of the estates hostile to the emperor. Henry IV of France was murdered in 1610 at the very moment he was about to interfere in the war over the Jülich-Cleve succession. James I of England was the father-in-law of the head of the Protestant party of action in Germany, Elector Frederick V of the Palatinate, and was inclined to take part in a continental quarrel. Denmark sought obstinately to obtain the power of "administration" over the dioceses of Northern Germany that had become Protestant, and to get control of the mouth of the Elbe. Gustavus Adolphus (1611–32), of Sweden, also showed a strong desire to interfere in German affairs. At the outbreak of the Thirty Years War all these countries, it is true, were prevented from taking part in it by internal difficulties or by wars in other directions. Still the disposition to do so existed everywhere.

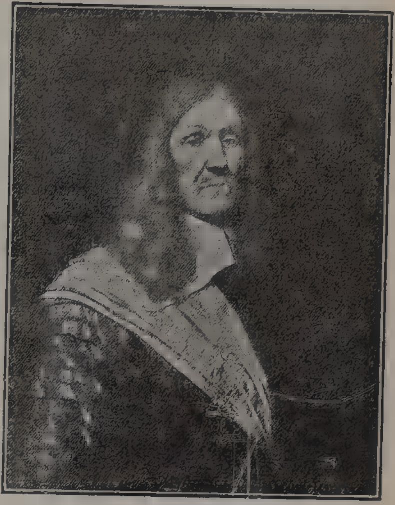
Another cause of the war was that the countries forming the Austrian provinces belonged to the empire. For, in the first place, the empire, owing to the geographical position of these countries, became involved in the contemporary affairs in Eastern Europe. The general aristocratic reaction that appeared throughout Europe at the end of the fifteenth and in the sixteenth centuries gradually became so powerful in the eastern and northern countries that a life-and-death struggle between its representatives and the sovereign power broke out at the beginning of the seventeenth century in the more active districts of these sections. These causes gave the first impulse to the Thirty Years War (see section II below). In addition the dynasty ruling the countries forming Austria was a branch of the Habsburg family, whose most distinguished line at that era ruled Spain. From the reign of Philip II (1556–98) the Spanish Habsburgs were the champions of Catholicism in Western Europe and the chief rivals of France in the struggle for supremacy in Europe. From about 1612, especially during the administration of Philip IV (1621–65) and his distinguished minister, Olivarez, they displayed increased energy and tried to induce the German Habsburgs to support their plans. The empire was all the more affected by this Spanish policy as the head of the German Habsburgs was Emperor of Germany.

A further important cause was the religious sectarianism which, after diminishing for a short time, grew more intense early in the seventeenth century. In the Catholic movement (about 1592) which followed the Council of Trent only Catholic theologians and a few princes had taken part; the second movement, on the contrary, carried with it the masses of the clergy and laity, and was marked by an ardent spirit of faith and a passionate demand for the spread of Catholicism. If among Protestants the idealistic enthusiasm was perhaps not so great, still their partisan feeling was equally violent and their combativeness no less ardent. After the war began it soon became manifest that social and economic reasons made Germany a favourable soil for its growth. Economic life, which for a long time had flourished greatly, from the second half of the sixteenth century had grown stagnant. Consequently there existed a large number who were glad to have the opportunity of supporting themselves as paid soldiers and of enriching themselves by plunder. The nobles, also, who were numerous in proportion to the rest of the population, took advantage of the opportunity to indulge their private feuds and robberies. As only a small number of them were attracted by foreign wars, they were ready therefore for internal disorders. Soon there appeared leaders of ability who gathered both nobles and burghers under their banners and retained them in their service by indulging their evil instincts. On the other hand, the people of Germany, who had been long unaccustomed to war and were not trained to bear public burdens, chafed under the hardships now imposed upon them. This discontent, combined with the ease with which troops were equipped, aided in prolonging the war.

II. The Bohemian Revolt.—At the beginning of the seventeenth century the regions ruled by the German Habsburgs included Upper and Lower Austria, Bohemia together with Moravia and Silesia, the lesser part of Hungary which had not been conquered by the Turks, Styria, Carinthia, Carniola, the Tyrol, and the provinces bordering on Germany. This territory, however, was divided among three branches of the family, the main line, the Styrian, and that of Tyrol-Vorarlberg. Although the main line of the German Habsburgs held by far the larger part of these landed possessions yet its territories did not form a compact whole, but were only a number of loosely connected countries, each having its own provincial estates, which were largely composed of nobles and which maintained an incessant opposition to the dynasty, and therefore largely desired religious freedom, that is the right to become Protestant and to introduce Protestantism into their domains. The struggle of the nobility against the dynasty reached its height during the last decade of the reign of Rudolph II (1576–1612). Even at that time the nobility maintained relations with the active Protestant party in the empire. In 1604 the Hungarian nobles revolted with the aid of the ruler of Transylvania, and in 1607 they rebelled again and became the allies of the Turks. On 25 June, 1608, Rudolph was obliged to transfer the government of Hungary, Austria, and Moravia to his more compliant brother Matthias; he did not, however, give up his rights as King of Bohemia, and in 1609 was able to pacify an outbreak of the Bohemian nobility only by granting the Imperial Charter (*Majestätsbrief*) which gave religious liberty not only to the nobles and their dependents in Bohemia but also to those living on the crown lands. This concession greatly strengthened the power of the nobles.

After Rudolph's death Cardinal Klesl sought, as the councillor of Matthias (1612–19), to avoid above all any new crisis, so as to gain time to reorganize the resources of the ruling dynasty. Matthias, like Rudolph, had no son and the royal family chose as his successor Ferdinand, the head of the Styrian branch of the Habsburgs, who had restored Catholicism in Styria. In 1617 the dynasty persuaded the Bohemians to accept Ferdinand as their future king, and in 1618 they prevailed upon the Hungarians to elect him king. Before this (May, 1618) the Bohemian nobles had revolted anew under the leadership of Count von Thurn on account of the alleged infringement of the charter granted by Rudolph. The dynasty was not yet ready for war. When Matthias died (March, 1619) the Hungarians and the inhabitants of Moravia joined the revolt, and in June Thurn advanced on Vienna with an army to persuade the Austrians also to join. However, the determined attitude of Ferdinand prevented the insurrection and Thurn withdrew. Ferdinand was now able to go to Frankfort, where his election as emperor (28 August) secured the imperial dignity for his family. Two days before this the Bohemians had elected the leader of the Protestants, Frederick of the Palatinate, as rival King of Bohemia.

The inhabitants of Lower Austria now joined the revolt. Bethlen Gabor, Prince of Transylvania, made an alliance with its leaders, and in conjunction with them once more threatened Vienna at the close of 1619. Thenceforth, however, discipline steadily declined in the Bohemian army, and the leaders disagreed. The expected aid was never received from the Protestant party, excepting that a few of the less important nobles of the empire joined the insurrectionary forces. On the other hand, in October, 1619, Ferdinand obtained the help of Maximilian of Bavaria, who had the largest army in the empire, and of the Protestant Elector of Saxony. Spain and Poland also sent troops. Maximilian so greatly terrified the Protestant party, which since 1608 had formed the Union, that it was broken up. He then advanced into Bohemia supported by Austrian troops and decisively defeated the Bohemians in the battle of the White Mountain, near Prague. The Elector Frederick, called the "Winter King" on account of the brief duration of his rule, fled. Ferdinand took possession of his provinces and restored order there. The war with Transylvania, however, was carried on with interruptions until 1626.



Marshal Turenne
Philippe de Champaigne, the Pinakothek, Munich

III. The War in the Palatinate and the War with Denmark.—The emperor placed Frederick, the Elector Palatine, under the ban of the empire on 22 January, 1621; the latter refused to beg for pardon. Reconciliation was made more difficult by the demand of Maximilian of Bavaria of that part of the Palatine lands called the Upper Palatinate, as recompense for the expenses of the war; he also desired, in accordance with a traditional claim of the Bavarian ruling family, the electoral dignity belonging to the Palatinate; this the emperor gave him with hesitation and under certain conditions (21–25 February, 1623). Maximilian gained for himself the desired land by transplanting the war to the territory of the Palatinate. Spanish troops had established themselves in these districts as early as 1620, and aimed at retaining possession of the Palatinate for the purpose of establishing communication between the Italian possessions of Spain and its territories in Burgundy and the Netherlands. In carrying out this scheme the Spaniards in the same year (1620) had seized the Valtellina and the territory of the Rhætian League. Before this, in 1617, when Ferdinand became the head of the German-Habsburg dynasty, Spain had expressed its desires for the reversion of the Austrian possessions in Alsace.

None of the victors desired to continue the war. The emperor was fully occupied with the restoration of his power in his hereditary possessions and with the war against Transylvania. The Spaniards had only a small military force, as was shown by the spiritless manner in which they recommenced war with the Netherlands in 1621. Maximilian, it is true, desired to obtain possession of his conquests; but he had no confidence in the Spaniards, and found it very difficult to bear the burdens of war, as he received no outside aid of importance. On the other hand, the Count Palatine received no active help either from the Protestant estates of the empire or from abroad, but by the beginning of 1622, several adventurous partisans of his—Ernest of Mansfeld, Christian of Brunswick (called "mad Christian"), and Margrave George

Frederick of Baden—collected 50,000 mercenaries, an army of unusual size for that era. This force was intended to oppose the army of Maximilian and the Spaniards, and as quickly as its numbers decreased they were recruited afresh. The Bavarian commander-in-chief Tilly defeated this force when it attempted to prevent his army and the Spaniards from occupying the fortified towns of the Electoral Palatinate (undecisive engagement at Wiesloch, 27 April, 1622; complete defeat of the army of the margrave at Baden at Wimpfen, 6 May, 1622; severe defeat of Christian at Höchst, 20 June, 1622). After this, however, the Netherlands, the foe of Spain, allowed the still unconquered Mansfeld to enter their territory; from here he advanced in 1623 into East Frisia. The plan was that Christian should come to his support with a new army. Tilly, however, pursued Christian and completely defeated him on 6 August, 1623, at Stadtlohn in Westphalia, but was not able at that moment to attack Mansfeld. Under these circumstances Tilly was obliged to remain in north-western Germany; the estates of this territory had taken no part in the war, and soon the quartering of the soldiers and the forced contributions aroused violent discontent among them.

GVSTAVVS ADOLPHVS D.G. REX SVEC.GOTH.
ET VAND. MAGNVS PRINCEPS FINLANDIÆ DVX ETC

A denominational movement now also gradually made itself felt. In 1623 for the first time a Catholic was elected bishop in the Diocese of Osnabrück. Hereupon the estates of Lower Saxony demanded the emperor's guarantee for the security of their lands which had formerly belonged to the Church. The emperor, however, was willing only to promise security against force, not against a judgment of dispossession. In 1624 Maximilian began to make the Upper Palatinate once more Catholic. In Swabia the Catholic estates sought to regain the many ecclesiastical foundations that had been acquired by the Protestants. A large number of suits concerning ecclesiastical property were still in litigation before the courts of the empire. There developed on the one side the desire, and on the other the dread, that all the changes in the entire empire made by the Protestants contrary to the Religious Peace of Augsburg might be done away with. Foreign countries began to give increasing attention to the war. France sought especially to separate Maximilian from the emperor; the Netherlands granted subsidies; in 1624 a French embassy intrigued against the Habsburg dynasty at the German and northern Courts; England and Holland negotiated both with King Christian IV of Denmark and with Gustavus Adolphus to induce these rulers to take part in the war. Christian, who belonged to the estates of the empire as Count of Holstein, was elected commander of their forces by the oppressed and aroused estates of the lower Saxon circle, and on 9 December, 1625, he came to an agreement with England and Holland and marched into the empire.

Thus the enemies of the emperor and the Duke of Bavaria became so powerful that the emperor could no longer leave the burdens or the direction of the war to a single prince of the empire, even though this prince were as able as Maximilian. The struggle now threatened to engage all Europe. Wallenstein, a Bohemian noble, and the ablest of all the leaders of mercenaries, offered to collect and maintain in the same way as the enemy a force larger and better equipped than that of the Protestants. Ferdinand accepted Wallenstein's offer, and on 7 April, 1625, appointed him general. For some unknown reason Wallenstein and Tilly did not come to an understanding. In 1626 Wallenstein took up a position on the Elbe. Mansfeld planned to surround him and establish communication with the Prince of Transylvania, but Wallenstein defeated him on 25 April at the bridge over the Elbe at Dessau. However, Mansfeld was able to march to Transylvania, where he found that Bethlen Gabor had decided to make peace. Shortly after his arrival he died of fever. Wallenstein increased his army to 70,000 men and in the summer of 1627 he defeated Mansfeld's troops, now without a leader, at Kosel in Silesia on 9 July. In the meantime Tilly had defeated the Danish King Christian on 27 August, 1626, in a hotly-contested battle at Lutter on the Barenberg. During the winter Christian equipped a new army; nevertheless, Tilly drove him from the lower Weser and Elbe, but did not take Stade.

IV. THE EDICT OF RESTITUTION.—The success of the imperial and Bavarian armies in Northern Germany enabled the Catholics to reclaim the lands of the Church. In 1626 the energetic Francis William of Wartenberg, a relative of Maximilian, became Bishop of Osnabrück. He sought to be made bishop also of the dioceses of Minden and Verden, which had become Protestant. In 1627 the Austrian Archduke Leopold William became Bishop of Halberstadt; in the early part of 1628 he was defeated by a prince of Saxony in his attempt to secure the Archdiocese of Magdeburg, but in the summer of 1628 he obtained the right of succession to the Archdiocese of Bremen. In Southern Germany Maximilian undertook in 1627 to make the Electoral Palatinate Catholic again. Catholic demands were now sent to the emperor from all sides. In accordance with the Habsburg method of administration and with the emperor's own way of thinking, these demands were all turned over in September, 1628, to the Aulic Council for judicial investigation. Following this, Ferdinand issued in March, 1629, the Edict of Restitution. In its first part the edict settled the meaning of the disputed ordinances of the Religious Peace; it then ordered that all legal suits arising from the Religious Peace which were pending before the imperial courts were to be settled summarily in accordance with the edict. It further appointed three commissions which were to determine and correct the infringements of the Religious Peace in all parts of the empire. The Guelphs in Northern Germany were obliged to surrender what they had taken of the Diocese of Hildesheim in 1523 with the exception of a small part; in March, 1630, imperial commissioners took possession of Magdeburg, and in May and July, 1630, Francis William of Wartenberg established himself at Verden and Minden. In Southern Germany Würtemberg, in particular, was forced to make restitution.

In the beginning of the trouble, at the period of the Bohemian revolt the more powerful of the Protestant estates had held to the emperor. The transfer of the electorate to Maximilian, however, had made Saxony and Brandenburg indignant because it put an end to the parity of religions in the Electoral College. To keep Brandenburg from joining the other side Wallenstein devastated it between 1626 and 1627. The Edict of Restitution, however, alienated all the Protestant rulers and nobles from the emperor. From desire of peace and from lack of strength they took no steps against him. It was not until the Catholic estates also became estranged from the emperor that a crisis arose in the internal affairs of the empire which largely influenced the continuance of the war.

Wallenstein's method of recruiting and maintaining his army required the establishment of extremely large divisions of the army. Following a custom introduced by Ferdinand in Austria, he assigned to each of these divisions a definite district for the collection of recruits and supplies. At first these districts were in the domains of the rulers and nobles hostile to the emperor; gradually, however, the territories of the spiritual princes who had been united by Maximilian in the League were thus assigned and finally, in May, 1628, the domains of the Elector of Saxony who had, in other respects, been protected by the Habsburgs. The estates resisted, appealing to the Law of the Imperial Diet of 1570, and complaining that their countries were used as recruiting depots without their consent. They protested against the extraordinary amount of the enforced contributions, their long duration, and against the amount of plunder. They emphasized these complaints by threats to take the law in their own hands. They watched the emperor with suspicion when, after he had placed (1621) the Elector Palatine under the ban of the empire without the consent of the Electors, he revived other imperial privileges that had fallen into disuse. Thus he declared the estates of Lower Saxony, which had taken part in the Danish war against his orders, guilty of treason punishable by the loss of their territories. The estates knew instinctively that their territorial sovereignty, which had existed as a fact from 1555, depended solely on the passivity of the empire in foreign affairs, and that they would have to be more submissive to the emperor's authority should the civil war develop into a European one, as appeared more likely from year to year. This thought troubled them greatly. Their horizon was narrow; they were ignorant of European politics. They said that under Wallenstein's influence Ferdinand would make the imperial power absolute, and that German liberty, that is their freedom as princes, was endangered. The fact that Wallenstein's army was composed of Catholics and Protestants alike, and that he appointed as general so zealous a Lutheran as Hans Georg von Arnim, impressed the Catholic estates with the idea that their community of interests with the emperor had become weaker, and induced them through self-interest to unite with the Protestant estates in opposition to the emperor. Maximilian in particular was anxious and discontented. An Italian Capuchin, Valerio Magni, irritated him by reports about Wallenstein and the intentions of the emperor, while Wallenstein fanned the flame by his harsh treatment of the Bavarian Elector, by his constant demands for greater military authority from the emperor, and by securing his own appointment as prince of the empire (April, 1628).

The first clear symptoms of the tension between the emperor and the estates of the empire were: the meeting of the League at Würzburg in January, 1627; the session of the Electors at Mülhausen in October-November, 1627; and the meeting of the Catholic Electors at Bingen in June, 1628. The assembly at Mülhausen already demanded a change in the military organization and the dismissal of Wallenstein. At first Ferdinand sought to reduce the tension by working upon Maximilian; in the Treaty of Munich, 1628, he guaranteed to him the Electoral dignity and the possession both of the Upper Electoral Palatinate and of that on the right bank of the Rhine for thirty years. In the course of 1628, however, the emperor's markedly advantageous position over the estates was seriously injured by his desire, after completing the reorganization of his Austrian territories, to secure the continuance of the imperial crown in his family by the election of his son as King of the Romans. This desire made him dependent on the good will of the Electors. In the spring of 1628 he forced Wallenstein to reduce the size of his army a little, and in the autumn of the same year to make a much larger reduction. Encouraged thereby the Electors refused to accede to the emperor's wish for the convocation of the Electoral College, and wanted to defer it until the end of the war. The Edict of Restitution also deferred the meeting, but only for a short time. At Ferdinand's demand the Elector of Mainz finally convoked the college for June, 1630. Before it met the emperor again forced Wallenstein to dismiss a large part of his troops. The meeting of the Electors, which was held at Ratisbon from 3 July till 12 November, 1630, the two Protestant Electors not attending, took place under entirely changed political and military conditions.

V. The War Becomes a European Conflict.—About 1625 the Spanish Habsburgs began to develop an energetic policy, as they had done in the sixteenth century. They believed a great opportunity had come to give Protestantism a crushing blow; they even hoped for the aid of France, although this hope proved vain. The Spanish troops were sent first against the Netherlands; in 1626 Spinola took the important fortress of Breda. In the meantime Austria and Bavaria were to aid Spain by cutting off the Netherlands from its main source of commercial revenue, the Baltic. In this way the Spaniards thought to use against the Dutch the same means which the latter had employed against them when they strove to cut off the Spanish fleets carrying to Spain the product of the silver mines of America. At first Ferdinand hesitated and Maximilian still more. However, it was agreed at the Brussels conference of 1626 to blockade the coast of the North Sea and at least one port on the Baltic. Austria soon found that it could further its own interests in this enterprise. Ferdinand planned to gain a free water-route to the sea for his products by treaties with the countries on the banks of the Elbe and Oder, and by treaties with the large Dutch commercial cities to obtain a good outlet for his exports, especially in sending Hungarian copper to Spain. In 1627 the Dukes of Mecklenburg were deprived of their possessions for aiding the King of Denmark, and Wismar was confiscated as a good port on the Baltic. In pursuance of the scheme the Spaniards were now to appear with a fleet in the Baltic so as to enable Wallenstein to gain the supremacy at sea. During this period, however, Spain's performances on sea were a disappointment, and on this occasion, also, no fleet appeared. Upon this the Hanseatic towns, whose aid in carrying out the plan had been counted on from the first, were intimidated by Denmark from sending ships. Wallenstein attempted to build a fleet himself, but only a small flotilla, capable of inflicting occasional surprises under Gabriel Leroy, came into existence. The last hope of aid from Spain vanished when the Spanish fleet carrying silver was destroyed in the autumn of 1628. The defects of Wallenstein's method of carrying on war appeared at the same time in consequence of the peculiar character of the problems he was to solve. He did not dare to use his army for difficult sieges or sudden attacks; where he was forced to do so his projects failed. He left the strongly fortified city of Magdeburg, which controlled the passage over the Elbe, untaken in his rear. He wished to take by storm in May, 1628, the city of Stralsund, which formed the connexion between the German Baltic coast and Sweden, but he gave up this plan, and besieged it from the land side. He could not force the city to surrender, however, as Danish and Swedish troops came to its aid. His victory in August, 1628, over a Danish army of relief at Wolgast did not change the result. Denmark, it is true, signed the Peace of Lubeck, 22 May, 1629, on condition that all conquered territories should be restored. But this brought Gustavus Adolphus on the scene of war.

Christian IV, King of Denmark
From a contemporary print

In the autumn of 1629, Gustavus Adolphus declared before the Swedish Diet that the emperor wanted to conquer Sweden and the Baltic, and that he should be prevented from doing so, but that if Sweden were victorious on German soil the German states would become the booty of Sweden. Up to this time, notwithstanding many offered inducements, the king had limited himself to wars with weaker opponents. He had, however, always carried on war, not only from love of it, but also from the necessity of supporting his army in foreign countries, as Sweden, being a poor country, could not otherwise maintain it. In the meantime the king neglected nothing to increase the prosperity of Sweden. Just then he hoped to secure the wealth of the north German cities and princes. But now, the politico-commercial plans of the emperor threatened to put an end to Sweden's trade in copper, its one valuable natural source of wealth, while Wallenstein's troops threatened to expel the Swedish forces from the country beyond the Baltic, from the revenues of which, especially the customs, it largely drew its pecuniary means. Self-defence as well as the spirit of adventure forced the king to put some check upon the emperor. Nevertheless, he hesitated until the summer of 1630, when on 6 June he landed on the German coast of Pomerania. Except for a few persons of importance Gustavus was not welcomed, even by the Protestants, and was obliged to make his way in Pomerania by force of arms. In a short time his money was entirely gone, and he debated for months whether he might venture inland. Wallenstein could, perhaps, have crushed him but instead, he left the way open to him, for, through resentment at the emperor's command in the spring of 1630 to reduce the number of his troops, he had disbanded the greater part of the imperial forces in the districts now entered by Gustavus, and had allowed other detachments to be sent to fight in the Netherlands and Italy. The year previous Tilly had vainly begged Maximilian's permission to attack the Netherlanders at the right moment in their own country, giving as his reason that the money of the Dutch was constantly used to renew the opposition to the Bavarian troops. Maximilian, however, had not the courage to enter into open conflict with a foreign foe. Thus the Dutch stadtholder, Frederick Henry, in 1629, after the great Spanish general Spinola had been recalled, was able to besiege Bois-le-Duc, and thus give the first great rebuff to Spain. It was not Tilly who now hastened to the aid of the Spaniards; an imperial force, detached from Wallenstein's army, was sent. But when the Dutch seized the fortification of Wesel and thus endangered the retreat of the imperial troops, a part of the imperial force fell back. Bois-le-Duc surrendered on 14 September, and the Dutch were able to take the offensive.

In France Richelieu had, from 1624 to 1628, reestablished the internal authority of the government to such an extent that after twenty years of cautious foreign policy more positive measures could be adopted. This change was first of all made evident to the Habsburgs in Lorraine. Duke Charles of Lorraine (from 1624), a vassal of the emperor, laid claim as heir to the Duchy of Barr in Alsace; but Richelieu disputed his rights and harassed the secular authority of the Bishop of Verdun so that the latter took refuge in the empire. In 1627 the male line of the Dukes of Mantua-Montferrat in upper Italy became extinct. The next heir was the Duke of Nevers, a relative of the Bourbons. He took possession at once of Mantua, and hoped to secure Montferrat also by the marriage of his son with the daughter of his predecessor, for the succession to Montferrat was in the female line. Montferrat, though, lay far below Mantua in the western part of upper Italy. Consequently Spain and Savoy were able to seize the district for themselves before the Duke of Nevers could enter it. Spain wished to maintain controlling influence in upper Italy, which it had acquired during the reign of Charles V. France, on the other hand, now saw Savoy, which had become dependent on it, suddenly taking sides with Spain. Spain asked for the decision of the emperor, who was suzerain of Mantua. Ferdinand interfered in the quarrel, not only because his dynasty had always considered the imperial rights in Italy of much value, but also because he had constantly, from the time he ruled Styria, been opposed to Venice, which he believed might become dangerous. Still, neither he nor Spain carried on the negotiations rapidly nor with insistence, as their attention was claimed in other directions. Thus Richelieu had time to punish Savoy (1628–29). After this Ferdinand's troops besieged Mantua and the Spaniards under Spinola besieged Casale. Richelieu did not yet consider France strong enough to oppose the Habsburgs directly. When Mantua was taken and Casale's position became very precarious, Richelieu proposed a truce; this was signed at Rialto on 4 September, 1630. Then Richelieu sent his most adroit negotiator, Père Joseph, to Ratisbon, where the electors were still in session. He hoped to withdraw France from the struggle but to raise up enemies enough against Austria elsewhere.

On 17 June, 1630, Richelieu made a treaty with the Netherlands by which he gave them a subsidy for the continuance of the war against Spain. By means of the truce, which was brought about by France, between Gustavus Adolphus and Poland at Altmark in September, 1629, Gustavus was at liberty to take part in the war within the empire. Nevertheless, he hesitated to assume responsibilities which would permit France to interfere with his management of the war. From March, 1629, negotiations had been actively carried on by Richelieu with the imperial estates but so far to little purpose. His aim was to separate them from the emperor by bringing them into a neutral confederation under his guidance. By representing that the friendship of France, an essentially peaceful country, would protect them against the pretensions of the warlike emperor, and that their alliance with France would guarantee their "German liberties" against Austria, he hoped to separate them from the emperor in a neutral confederacy. However, Maximilian was not slow to make the counter-proposal that France should form an alliance only with the Catholic estates, abandoning all the agreements made so far with the Protestants. In this way it would be possible to isolate the Habsburgs and yet complete the Catholic restoration in western Europe. The basis of these negotiations from October, 1629, was the draft of a treaty between France and Bavaria. Richelieu transferred the negotiations with the emperor to the place where the College of Electors was in session, because he hoped here to come to a settlement with the estates. Success in these undertakings, however, was made difficult for Richelieu by the landing of Gustavus Adolphus on German soil in June. When the emperor announced (13 August, 1630) Wallenstein's resignation to the Electors, they declared themselves ready to aid him against Gustavus on condition that both the imperial troops and those of the different estates should be united under Maximilian as commander-in-chief. Ferdinand used the friendliness of the Electors to exert pressure upon the French negotiator. Although the latter was only to come to an agreement regarding upper Italy, still Ferdinand made him promise in the Peace of Ratisbon (13 October) that when the Duke of Nevers received Mantua and Montferrat in fief, France would neither attack the empire itself nor aid others in any manner to attack it, and that the Duke of Lorraine should be included in this agreement. This imperial success, however, came to nothing, because the estates and the emperor did not reach an agreement. The Protestant Electors, instead, invited the Protestant estates to meet at Leipzig and form a neutral party (Assembly of the Princes at Leipzig, February-April, 1631). The Catholics came to an agreement with the emperor that the imperial troops should be under the command of Tilly, but Maximilian had made up his mind that Tilly should only be employed to protect Bavaria against a possible attack by Gustavus Adolphus. He insisted, therefore, that the imperial troops and his own should not be united into one army. This enabled Richelieu, whose overthrow seemed certain in November, 1630, to avoid confirming the Peace of Ratisbon, and, contrary to agreement, to make the treaty of Bärwalde (23 January, 1631) with Gustavus Adolphus. In this treaty Gustavus, whom the need of money had finally made compliant, pledged himself to carry on war against the emperor for four years.

VI. The War With Sweden Within the Empire.—After Wallenstein's deposition Gustavus was able to clear the entire lower course of the Elbe of the imperial troops, which were disbanding and had no commander. His farther advance would take him through the territories of the Electors of Brandenburg and Saxony, and these princes refused to let him pass. Tilly thus gained time to assume command on the Elbe and Oder, and immediately attempted (February, 1631) to force Gustavus to a battle; but the latter was not to be drawn into one. During this period, in which no decisive action took place, Tilly's position became critical, because, as had happened at Stralsund, a Swedish detachment under Dietrich von Falkenberg had thrown itself into Magdeburg, in September, 1630, and, supported by the citizens, refused to permit the imperial troops to enter. Magdeburg was the city which Wallenstein had so carefully avoided. Tilly determined to take it, and stormed it on 20 May, 1631. But a fire, which the Swedes are accused of starting when they saw that the city was lost, laid it in ashes, and took from Tilly the advantage he had gained. In the meantime Gustavus had taken advantage of the withdrawal of his opponents towards Magdeburg to seize the fortresses of Frankfort and Landsberg on the middle course of the Oder, and to wring from the Elector of Brandenburg Küstrin and the fortress of Spandau at the junction of the Spree and the Havel Rivers. Fearing that the Elector of Saxony would also yield to Gustavus, Tilly tried to terrify the wavering ruler; this, however, forced the latter under the influence of the Lutheran general, von Arnim, who had formerly been an officer of Wallenstein's, and forming a temporary alliance with Sweden, on 17 September, 1631, the combined troops of Saxony and Sweden destroyed Tilly's army at Breitenfeld, near Leipzig. The victory had a great moral effect, but did not decide the war. In north-western Germany Pappenheim had an excellent position which enabled him to control the line of the Weser for the emperor, and the emperor and Bavaria had sufficient means to raise new troops. The strength of Gustavus Adolphus was always much below that of his enemies. Conscious of this, he felt the necessity of entering rich districts which he could use for the support and strengthening of his troops; in addition he wished to come into communication with the Protestant estates of south-western Germany that were favourable to him, and perhaps hoped when there to persuade France to undertake a common war against the emperor. These views probably influenced his military decisions after the battle of Breitenfeld. He left the Saxons to occupy the Austrians by an attack on Prague, and without moving against Pappenheim he went straight towards the dioceses on the Main and the middle course of the Rhine in order first to defeat them, and then their chief, Maximilian, before striking a decisive blow against the emperor. While living in the centre of the empire during the winter of 1631–32 he prepared his plans to secure absolute Swedish control over the Protestant estates and to secularize the dioceses that had remained Catholic. He also carried out his schemes for using German money to increase the prosperity of Sweden.

The Emperor Ferdinand II (1578–1637)
From an old print

Maximilian's fear of Sweden constantly increased, and in May, 1631, he made his first treaty with France. It was, however, very hard for him to assume a neutral position towards the Protestant princes who opposed the emperor and the empire. Gustavus Adolphus on his part was not inclined to spare the champion of Catholicism in the empire for the sake of Richelieu. Finally, Maximilian so completely lost courage that negotiations for a truce were begun in December, 1631, and the truce was concluded in January, 1632. For the emperor, this was the most dangerous moment of the war. The Saxons had taken Prague. Richelieu continued to be hostile although the emperor had agreed to the Treaty of Cherasco (April, 1631), in which he waived the recognition by the Duke of Nevers of his suzerainty over Mantua; this treaty replaced that of Ratisbon. Contrary to the agreement made at Cherasco, Richelieu did not withdraw his troops from Piedmont, but, through the treachery of Pignerolo, retained it. He made the flight to Lorraine of Gaston of Orléans, who lived in discord with his brother Louis XIII, a pretext to carry the war into Lorraine and there to seize one fortress after another. In this way his troops were kept near the seat of war, between the Germans and Dutch. In January, 1632, Gustavus Adolphus urged that Richelieu should take Hagenau and Zabern in Alsace from the Habsburgs. Richelieu hesitated, and Père Joseph persuaded him for religious reasons to reject the proposal. During all these months the emperor had had no commander to whom he could entrust the direction of his forces. His son, Ferdinand III, was still too young, so from necessity he turned again to Wallenstein. The latter kept him in suspense and only consented when granted powers so great as to raise suspicion against himself. The contract was made on 13 April, 1632, although Wallenstein actually assumed command several weeks earlier. Gustavus reopened the campaign in February, 1632, and began the siege of Bamberg. But Tilly came with fresh troops and relieved the city. He wished to open communications with Wallenstein at Eger and thus force Gustavus to withdraw from the interior of Germany, but Wallenstein did not stir; consequently Gustavus was free to advance directly towards Bavaria. On 15 April there was an undecided battle at Rain on the Lech; Tilly was mortally wounded and the Bavarians withdrew from the battlefield. This left the road to Munich open to the Swedes and permitted them to plunder the Bavarian lowlands. However, Maximilian retained Ingolstadt and Ratisbon, the two strategically important points of his country. Gustavus Adolphus simply lost time in the Bavarian campaign. In north-western Germany Pappenheim was successful in his undertakings. New imperial forces gathered both in Bohemia and Swabia. In June Wallenstein conquered Bohemia, formed a junction then with Maximilian, and kept Gustavus inactive at Nuremberg for weeks. In vain Gustavus tried to draw Wallenstein into a battle, and when he attempted to storm Wallenstein's position (3 September) he was defeated. For about six weeks he marched aimlessly through Franconia and Swabia pursued by Wallenstein. The latter suddenly drew off towards Saxony in order to unite there with Pappenheim, and cut off Gustavus's road to the Baltic. Gustavus followed and on 16 November, forced a battle at Lützen near Leipzig, just as the forces of Wallenstein and Pappenheim met. The Swedes gained the victory, but they paid for it with the life of Gustavus Adolphus. On the imperial side Pappenheim, the emperor's most daring and capable cavalry general, was killed.

Bernhard, Duke of Saxe-Weimar
From an old engraving

The death of the Swedish king did not make any essential change. His policies were carried on in the same manner and with equal skill by his trusted councillor Axel Oxenstiern. The strength of the Swedish forces had been declining throughout the year 1632. The important questions to be decided were: whether, as the Swedish power declined, the Protestant princes would act independently of it under the leadership of Saxony, taking upon themselves the cause of Protestantism and of the independence of the princely rulers; also whether the emperor could find a commander who would make the unreliable and sluggish Wallenstein unnecessary. On account of these difficulties the next two years were more occupied with negotiations than with battles. Oxenstiern brought Duke Bernhard of Saxe-Weimar, who had been trained under Gustavus Adolphus and who was the ablest of the younger commanders among the German Protestants, and with him Saxony into closer union with Sweden; he also made an agreement with the Protestant rulers of the central German states at the assembly at Heilbron (March, 1633). In November, 1633, Bernhard by a daring advance took Ratisbon; Austria lay open to him, while a revolt of the Bavarian peasants crippled Bavaria's strength. The duke, however, did not venture into Austria and by January Maximilian had subdued the peasants. Sweden rapidly lost its popularity even among the Protestants of central Germany, for it demanded much. In addition, Oxenstiern flooded these states with Swedish copper coin and sent their good silver to Sweden, thus ruining them economically. As early as 1634 the influence of Richelieu over these states was greater than that of Sweden. Wallenstein used his army but little in 1633. He was constantly occupied with negotiations, chiefly with Saxony, but also with Sweden, with a view to imposing a peace on the Habsburgs. The commander of the Saxon forces, von Arnim, persuaded him to agree to one truce after another. In this way Saxony saved its strength and gained time to improve its position in the empire both as regards Sweden and the emperor. Although he afterwards denied it, even Richelieu believed early in 1634 that Wallenstein was ready to enter into relations with France also. Ferdinand and Maximilian, however, had already planned his downfall; he was murdered at Eger on 25 February, 1634.

France was the only country successful in war and politics from 1632 to the middle of 1634. An increasing number of fortresses in Lorraine came under its control. In the spring of 1632, after making a treaty with the Archbishop of Trier to protect him from the Swedes, French troops occupied Coblenz and Ehrenbreitstein on the opposite side of the Rhine. Richelieu also carried on negotiations with the Archbishop of Cologne, who was Bishop of Liège as well, by which he hoped to bring French troops into north-western Germany in the flank of the imperial forces there, and also to garrison Dinan which belonged to the Diocese of Liège. From this latter point France would be able to exercise a strong influence on the war between Spain and the Netherlands. Dinan was not obtained owing to a revolt of the citizens of Cologne. However, from this time on, Richelieu pressed steadily forward towards Alsace. He wished the Protestant princes to request him to garrison the fortified Alsatian towns, and for a time in 1634 he occupied Montbéliard, which belonged to Wurtemberg, and the Diocese of Basle. Spain had already, in 1633, sent troops both from Italy and from the Netherlands to the upper Rhine as protection. Richelieu's plans were held in check by the slow progress of the war in the Netherlands. Notwithstanding the treaty of 1630, by which France granted subsidies, the States General showed but little warlike spirit, while the southern part of the Netherlands was positively averse to war. A Spanish attack by sea on the Netherlands ended in September, 1632, in a complete defeat. On the other hand, an attack by the Stadtholder of the Netherlands on Maastricht in 1633 led to the capture of the fortress, not, as hoped and planned, to a revolt of the southern provinces against Spain. Neither did it force France to openly take part in the war. Negotiations for peace were begun and it was only by his greatest efforts, and by his promise that France also should declare war on Spain, that Richelieu was able to frustrate them.

In the autumn of 1634 conclusive action was also taken in the empire. Ferdinand's son assumed command of the imperial troops, and Maximilian drove the Swedes out of Ratisbon. In this year the command of the Bavarian army was assumed by the Duke of Lorraine who had been obliged to fly from his country. Von Arnim's attempt to take Prague a second time failed. In south-western Germany the Swedes had undoubtedly the strongest army. Early in September the imperial and Bavarian armies united at Nördlingen, which the Swedes under Hom had wished to capture, and completely destroyed (6 September, 1634) the remainder of the finely-disciplined troops to which Gustavus Adolphus had owed his successes. After this the men who fought under the Swedish flag were only mercenaries, greedy for plunder, like those of the other armies of the time. To prevent the emperor from becoming absolute master in the empire, Richelieu had to declare war on him. Almost at the time of his declaration, war was also proclaimed by Ferdinand and Philip IV (May, 1635).

VII. War of the Empire and Spain Against France and Sweden up to its Turning Point.—The prospect of the interference of France had led Saxony to make friends with the emperor. Both desired by the Treaty of Prague (30 May, 1635) to lay the foundation for a general peace between the estates of the empire and the emperor and for their union against a foreign foe. To this end amnesty was to be granted to all the estates which, within a definite time, agreed to the treaty. The treaty also sought to readjust the constitutional relations between the emperor and the estates suitably to the historical development and yet so as to make the empire an organic whole. From 1555 the estates had almost forgotten the advantages of their union in the empire until the Swedish supremacy had reawakened this consciousness. France's declaration of war also aroused the sense of nationality; most of the German rulers, following the example of Brandenburg, agreed to the treaty between the emperor and Saxony. On 12 May, 1636, it was proclaimed as a peace of the empire. Some, indeed, signed it very unwillingly at Strasburg; the widowed Landgravine of Hesse Cassel put off her agreement without daring openly to reject the treaty. Finally, in December, 1636, Ferdinand's son was elected King of the Romans, and on 15 February, 1637, he succeeded his father as emperor.

The emperor, Bavaria, and Spain, decided to begin energetic offensive operations against France. In 1635 a combined imperial and Bavarian army forced back the French in Alsace and Lorraine, but the commanders of these forces lacked courage and caution. In 1636 the combined troops had to be withdrawn, finally, across the Rhine, after their numbers had been greatly reduced. In 1635 the Spaniards had seized and rendered powerless the Elector of Trier, and, by skilful Fabian movements, had destroyed two armies of French and Dutch which had entered the Spanish Netherlands. In 1636, it is true, the forces of Spain and Holland soon balanced each other. Spain now turned with superior forces against France. The German cavalry general, Jan van Werth, who shared in the direction of the campaign, wished to advance straight towards Paris, but the heads of the expedition allowed themselves to be detained before the small fortress Corbie, until the French had brought together 50,000 men. This army forced the Spaniards to withdraw once more. Saxony made an unfortunate attempt, with the aid of imperial troops, to drive the remains of the Swedish forces completely out of Germany; the campaign ended in the severe defeat of the combined army by the Swedish general, Baner, at Wittstock (4 October, 1636). The fantastic plan of the Spaniards to revenge the defeat, by a combined attack of their fleet and the imperial and Saxon land forces on Livonia so as to strike the Swedes in the rear, failed because the fleet, while on its way, was defeated (1639) by the Dutch in the English Channel. By a desperate defence, Brandenburg sought to save at least its fortresses from the Swedes. In 1639 Baner twice made forced marches as far as Prague, plundering and terrifying as he went. From the close of 1536 the Habsburgs were placed in an unfavourable defensive position in the west. France took into its service the army fighting under Bernhard of Saxe-Weimar, on the upper Rhine, and in December, 1638, Bernhard conquered Briesach on the right bank of the Rhine. In 1637, after a celebrated siege, Holland retook the town of Breda which had been lost in 1626. Neither the Dutch nor the French made any further progress in the Netherlands, nor could they derive the expected advantages from the capture of Arras (August, 1640), by which they had pierced the line of fortresses protecting the southern Netherlands. Even in 1639, the Habsburgs maintained their superiority in numbers, but their enemies conducted the war with greater skill. Consequently the imperialists gained but little when Piedmont in 1639 proclaimed its independence of France.

Godefroy Henry Conte de Papenheim du Conseil . . . de Sa Mté Imperiale son Marechal de Camp General

The union of the German estates consequent upon the French attack did not beget any warlike enthusiasm. They longed for peace and hoped that the peace congress proposed in 1636 would assemble. Soon the prolongation of the war, and its disasters, aroused renewed discontent with the imperial policy. The complaint was everywhere heard that the emperor was continuing the war only for the advantage of Spain. The negotiations between Maximilian and France, which had been carried on almost from the beginning of the war, were renewed in 1637, although, as usual, without result. In 1639 Duke Bernhard died unexpectedly. France enlisted his troops and placed them under the command of the able General Guébriant; and in this way acquired, what it had not had before, an experienced army of its own on German soil. In the winter of 1639–40 Guébriant boldly forced his way into the interior of the empire intending to unite with Baner. As he advanced the Landgravine of Hesse broke off the negotiations with the emperor; thus once more foreigners gained allies in the heart of Germany. In January, 1641, Baner planned to capture Ratisbon again, but the thaw that set in discouraged him. Guébriant also saw that he could not long maintain himself in so advanced a position; as in 1631, the imperial forces controlled the line of the Weser and threatened him on that side. In the spring of 1641 Saxony and the emperor prepared to repeat against Sweden the offensive operations which had failed in 1663. The plan failed, owing to the simultaneous deaths of von Arnim, the Brandenburg statesman, Count Schwarzenberg, and Baner. The young Frederick William became Elector of Brandenburg in December, 1640, and early in the summer of 1641 issued a proclamation of neutrality. This gave the Swedes time to place their troops under the command of Torstenson, who was much superior to Baner in energy. Moreover, the rising of the French nobility was not as successful as the Habsburgs had hoped. Guébriant, indeed, was obliged to withdraw from the empire to aid in its suppression, but on his way to France he defeated at Kempen in January, 1642, the imperial and Spanish troops, who were going to the help of the French nobles. In the meantime the war had taken a decisive turn in favour of the French, in an unexpected place. The inhabitants of Barcelona, oppressed by the Spanish soldiers quartered upon them, revolted and were soon joined by the whole of Catalonia (June, 1640). Richelieu at once sent aid to the rebels. In December, 1640, Portugal also shook off the Spanish yoke. For several years Spain was crippled at the chief seat of war by these conflicts in the Pyrenean peninsula. On the other hand the French, under the leadership of young commanders, Turenne and Condé, became experts in the art of war. By June, 1642, Piedmont was again under control. In 1643 Condé completely destroyed the finest and most celebrated troops of the Spanish army at Rocroi in the Netherlands. The Provinces of Hainault and Luxemburg in the southern Netherlands fell into his hands. In 1644, Holland seized the mouth of the Scheldt and France Grevelingen, and in 1645 France occupied the greater part of Flanders and in 1646 Dunkirk. Henceforth, the Spaniards held only a few of the large cities in the Spanish Netherlands. The people, excepting the nobility, remained loyal to them.

VIII. The Results of the War.—The German Habsburgs were forced to take the defensive and their cause was in great danger. Allied with Maximilian they were compelled to use their main force to prevent the occupation of southern Germany by the French. They bravely fought in this part of Germany under Mercy during the years 1643–45, but were continually obliged to fall back. On 5 May, 1645, they gained a famous victory over Turenne at Mergentheim; on 3 August, 1645, the French were victorious at Allersheim and Mercy was killed. Still the imperial and Bavarian troops were always at least strong enough to save Bavaria from the incursions of the French. In the meantime, however, the imperial forces had not been able to bring a sufficiently large army against the Swedes. These, it is true, were obliged to encounter (1642) a new enemy in Denmark. But the Danes accomplished just as little as their imperial allies. The imperial forces were severely defeated by Torstenson at Breitenfeld in November, 1642, and at Jüterbogk and Magdeburg in October, 1644. After these two victories, Torstenson formed an alliance with George Rákóczy, the successor to Bethlen Gabor as Prince of Transylvania. Resolved to carry the war directly into the hereditary lands of the emperor, Torstenson advanced at once as far as Brünn, but there saw that he was too weak for such an undertaking. The result of the Swedish victories in this year was the permanent loss by the imperialists of the control of the Weser, and of their position in north-western Germany. Denmark concluded a treaty of peace in 1645.

During the years 1642–45 the German estates unceasingly demanded peace. As early as 1640, at a session of the Electors at Nuremberg, the opinion was expressed, that a part of Pomerania should be ceded to the Swedes if this would content them. In 1641, at the suggestion of the electors the first Diet held since 1613 met at Ratisbon, and its success proved that the effort made in the Peace of Prague to revive the organization of the empire had borne good fruit. The Diet granted the emperor considerable subsidies. The estates, however, showed very plainly that they believed the emperor was over-considerate of Spain. France and Sweden encouraged this view by expressing their readiness to open negotiations. The opinion gained ground among the estates that if Austria did not break off its connexion with Spain the estates would once more abandon the emperor, form a union among themselves, and make a treaty of peace for the empire with France and Sweden. The estates hoped that these two countries would consent not to interfere in the internal affairs of the empire, especially as regards religion. The economic suffering and misery of the population of the empire had greatly increased, largely through the marauding expeditions of the Swedes, and final success in the war was clearly out of the question. John Philip von Schönborn, Bishop of Würzburg, was especially active in supporting the proposal that the estates should separate from the emperor and establish peace in the empire without him. Maximilian encouraged the bishop, though reluctantly. One after another, the smaller German estates brought letters of protection from the Swedes in order to escape being plundered by them. In this way these territories became neutral without any further formalities. Of the larger principalities Brandenburg abandoned its neutrality in 1644 without, however, becoming friendly to the emperor on this account. On the other hand, Saxony, which was exhausted and desperate, made a direct treaty of neutrality with Sweden in 1645. Under these circumstances the emperor early in 1643 also declared himself ready to negotiate. He wished, however, that the treaty of peace should be general, not limited in geographical extent as was the case in 1630. The negotiations were to be carried on with France at Münster, with Sweden at Osnabrück, where the Swedish embassy had been since the spring of 1643. About the middle of 1643 the imperial delegates appeared at both designated places, and the French delegates followed in the spring of 1644. At the close of 1644, the imperial delegates presented their first proposition, to which the French did not reply until November, 1645. A last dispute had arisen over the question whether the emperor alone should negotiate for the empire or whether the estates should also be represented. The quarrel was practically settled by the invitation to be present sent to the various estates by France and Sweden. On 26 August, 1645, the emperor also invited them. In the same year representatives of Spain and Holland also appeared at Münster. An ambassador of Venice and a papal nuncio likewise took part as mediators between France and the emperor.

The course of the negotiations was influenced by the results of the last events of the war, and it was decided by the military conditions of 1646. In this year the Swedes under Wrangel united with Turenne and the two armies occupied Bavaria. This led Maximilian to make a treaty of neutrality with Sweden in March, 1647. The entire empire was now occupied by the armies of France and Sweden, but the emperor retained undisputed possession of his hereditary lands. The outbreaks of the years 1647–48 were directed against him. The French, however, could not aid these revolts, as internal troubles in France claimed their attention and made them desirous of coming to a settlement with the emperor and the empire. While Turenne marched back to France (1647) Wrangel seized Prague, but was expelled by the emperor and Maximilian, who broke his agreement with Sweden. In 1648 Turenne appeared again and, allied with the Swedes, defeated the imperial and Bavarian forces at Zusmarhausen and cruelly ravaged Bavaria. The attack on Prague was renewed by the Swedes alone in July, 1648, under Königsmark. They took part of the city, but the Austrians brought together a larger army and forced them to withdraw in November, 1648.

At the opening of the negotiations for peace the emperor had hoped to be able to indemnify Sweden and to separate it from France, but on Sweden's refusal to accept his proposals he was obliged to give up his intention of making peace only if Spain were included in it. Supported by Maximilian, France induced the emperor and empire to remain neutral during the Franco-Spanish war. This success for France, however, did not prevent Holland from concluding peace with Spain on 5 June, 1648. But France received recompense for this disappointment in a new and great victory of Condé at Lens in the Netherlands, on 20 August, 1648. To secure peace for the empire, Austria consented in 1648 to give up its hereditary lands in Alsace and the city of Breisach to France; it also finally recognized the incorporation of the territories of Metz, Toul, and Verdun into France. It postponed, however, the decision as to the claims of France on the Duchy of Lorraine, and prevented France being made an estate of the empire for its conquests in Alsace. Sweden received the land around the mouth of the Oder with Stettin and Hither Pomerania, the territory near the outlet of the Weser, and the dioceses of Bremen and Verden, as well as Wismar, and was made an estate of the empire, because it, and not the Electorate of Saxony, had been the leader of the Protestant estates in the negotiations for peace. In addition it was to receive money to pay its mercenaries.

Taken in general, all the states and territories of the empire were confirmed in the possessions that they had had in 1618. The exceptions were: Electoral Saxony was confirmed in the possession of Lusatia which had been conceded to it in 1620; Bavaria was left in possession of the Upper Palatinate and of the fourth electorship, while a new, eighth electorate was created for the Palatinate; by the intervention of France, Brandenburg received, besides Further Pomerania, a number of dioceses with the right to secularize them. This and the similar concession to Sweden for Bremen and Verden undermined one of the main foundations of the organization of the empire, which for hundreds of years had rested on the existence and importance of the spiritual domains. In other particulars it was evident that the more important states sought, and probably sincerely, not to damage the efforts made in the Peace of Prague to revive the organization of the empire, yet in various instances they inflicted much injury upon it. It was contrary to the organization of the empire that the negotiations, deviating from the original intention, were not limited to external matters. Sweden and a large number of the Protestant estates were not willing to consent to this. To settle the claims made by the different religious denominations to one and the same territory the year 1624 was taken as the normal year, and the denomination which had prevailed in that year in a territory, was, as a rule, to be the permanent religion of that territory. Calvinism was included in the religious peace. The compulsory force of the principle, *cujus regio, ejus religio*, was restricted by granting private liberty of conscience, but only to a limited extent. The result of these regulations was in the main that the period of the violent religious disputes which had divided the empire was closed. It was also hoped that an effective working of the organic parts of the empire—the imperial and provincial diets, the supreme court, the Aulic Council, and the district constitution—would be secured for the future by an arrangement of their relations with one another and of their authority. The details of this reconstruction were left to the decision of a future Diet. It was settled, however, that grants of supplies were to be made not by majority votes, but by the voluntary agreement of the estates. All the rulers, even the petty ones in southern and western Germany, were declared sovereign in the internal government of their territories with certain exceptions. Moreover, the right to have diplomatic relations with foreign countries and to make treaties with them was granted to every estate. In reality this regulation only gave legal recognition to conditions that actually existed.

Austria was exempt from all these regulations, especially from the changes in the canon law prevailing there. This showed how little injury the war had inflicted upon it, and also the increasing differentiation between its domains and those of the other estates of the empire. The seal was impressed upon this differentiation by the fact that France secured (1647) the appointment of John Philip von Schönborn as Elector of Mainz and consequently Chancellor of the Empire, and especially by the fact that the treaty conceded to France and Sweden lasting diplomatic influence in the empire in return for their evacuation of the imperial territories. To counterbalance the influence which Austria exercised within the empire in virtue of her possession of the imperial crown, France and Sweden received the right to superintend the execution of the treaty in the empire, consequently to continually interfere in imperial affairs. On this basis the Peace of Westphalia with France and Sweden was settled on 24 October, 1648. The chief results of the Thirty Years War were: the foundation and recognition of a unified Austria under the rule of the German Habsburgs; the revival, in a certain doubtful sense though, of the Holy Roman Empire; the establishment of Sweden on German soil; the permanent weakening of Denmark; the renunciation by Holland of all efforts to drive Spain out of southern Netherlands; an enormous increase of the power of France. The question whether Spain would be able to maintain itself as a great power alongside of France led to eleven more years of war between the two states, and was decided, in favour of France, by the Treaty of the Pyrenees. This treaty and that of Westphalia were the basis of the pre-eminent position of France during the second half of the seventeenth century.

Martin Spahn.

Thmuis, a titular see in Augustamnica Prima, suffragan of Pelusium; a city of Lower Egypt, on the canal east of the Nile, between its Tanitic and Mendesian branches. Herodotus (II, 166) gives it as the capital of a nome bearing its name, and Ptolemy as that of the Mendesian nome. In the fourth century it was still important, having its own administration and being exempt from the jurisdiction of the Prefect of Alexandria. It was in existence at the time of the Arabian conquest, and was later called Al-Mourad or Al-Mouradeh; it must have disappeared after the Turkish conquest. Its ruins are at Tell el-Meî, about five miles north-west of Senbelâouîn, a station on the railway from Zagazig to Mansoûrah. Le Quien ("Oriens Christ.", II, 537) names nine bishops of Thmuis, the last three being Monophysites of the Middle Ages. The others are St. Phileas, martyr (in the Martyrology, 4 Feb.); St. Donatus, his successor, martyr; Liberius (not Caius), at the Council of Nicæa in 325; St. Serapion, d. shortly before 360, the author of various works, in part preserved; Ptolemæus, at the Council of Seleucia (359); Aristobulus, at the Council of Ephesus (431).

S. Pétridès.

Thomas, Saint, the Apostle.—Little is recorded of St. Thomas the Apostle, nevertheless thanks to the fourth Gospel his personality is clearer to us than that of some others of the Twelve. His name occurs in all the lists of the Synoptists (Matt., x, 3; Mark, iii, 18; Luke, vi, 15, cf. Acts. 1, 13), but in St. John he plays a distinctive part. First, when Jesus announced His intention of returning to Judea to visit Lazarus, "Thomas", who is called Didymus [the twin], said to his fellow disciples: "Let us also go, that we may die with him" (John, xi, 16). Again it was St. Thomas who during the discourse before the Last Supper raised an objection: "Thomas saith to him: Lord, we know not whither thou goest; and how can we know the way?" (John, xiv, 5). But more especially St. Thomas is remembered for his incredulity when the other Apostles announced Christ's Resurrection to him: "Except I shall see in his hands the print of the nails, and put my finger into the place of the nails, and put my hand into his side, I will not believe" (John, xx, 25); but eight days later he made his act of faith, drawing down the kindly rebuke of Jesus: "Because thou hast seen me, Thomas, thou hast believed: blessed are they that have not seen, and have believed" (John, xx, 29).

This exhausts all our certain knowledge regarding the Apostle but his name is the starting-point of a considerable apocryphal literature, and there are also certain historical data which suggest that some of this apocryphal material may contain germs of truth. The principal document concerning him is the "Acta Thomæ", preserved to us with some variations both in Greek and in Syriac, and bearing unmistakable signs of its Gnostic origin. It may indeed be the work of Bardesanes himself. The story in many of its particulars is utterly extravagant, but it is of early date, being assigned by Harnack (Chronologie, ii, 172) to the beginning of the third century, before A. D. 220. If the place of its origin is really Edessa, as Harnack and others for sound reasons supposed (ibid., p. 176), this would lend considerable probability to the statement, explicitly made in the "Acta" (Bonnet, cap. 170, p. 286), that the relics of the Apostle Thomas, which we know to have been venerated at Edessa ("Peregrinatio Silviæ", ed. Geyer, p. 60), had really come from the East. The extravagance of the legend may be judged from the fact that in more than one place (cap. 31, p. 148) it represents Thomas (Judas Thomas, as he is called here and elsewhere in Syriac tradition) as the twin brother of Jesus. The word Thomas in Syriac is equivalent to δίδυμος in Greek, and means twin. Rendel Harris who exaggerates very much the cult of the Dioscuri, wishes to regard this as a transformation of a pagan worship of Edessa but the point is at best problematical. The story itself runs briefly as follows: At the division of the Apostles, India fell to the lot of Thomas, but he declared his inability to go, whereupon his Master Jesus appeared in a supernatural way to Abban, the envoy of Gundafor, an Indian king, and sold Thomas to him to be his slave and to serve Gundafor as a carpenter. Then Abban and Thomas sailed away until they came to Andrapolis, where they landed and attended the marriage feast of the ruler's daughter. Strange occurrences followed and Christ under the appearance of Thomas exhorted the bride to remain a virgin. Coming to India Thomas undertook to build a palace for Gundafor, but spent the money entrusted to him on the poor. Gundafor imprisoned him, but the Apostle escaped miraculously and Gundafor was converted. Going about the country to preach, Thomas met with strange adventures from dragons and wild asses. Then he came to the city of King Misdai (Syriac Mazdai), where he converted Tertia the wife of Misdai and Vazan his son. After this he was condemned to death, led out of the city to a hill, and pierced through with spears by four soldiers. He was buried in the tomb of the ancient kings but his remains were afterwards removed to the West.

Now it is certainly a remarkable fact that about the year A. D. 46 a king was reigning over that part of Asia south of the Himalayas now represented by Afghanistan, Baluchistan, the Punjab, and Sind, who bore the name Gondophernes or Guduphara. This we know both from the discovery of coins, some of the Parthian type with Greek legends, others of the Indian type with legends in an Indian dialect in Kharoshthi characters. Despite sundry minor variations the identity of the name with the Gundafor of the "Acta Thomæ" is unmistakable and is hardly disputed. Further we have the evidence of the Takht-i-Bahi inscription, which is dated, and which the best specialists accept as establishing that the King Guduphara probably began to reign about A. D. 20 and was still reigning in 46. Again there are excellent reasons for believing that Misdai or Mazdai may well be a transformation of a Hindu name made on Iranian soil. In this case it will probably represent a certain King Vāsudēva of Mathura, a successor of Kanishka. No doubt it can be urged that the Gnostic romancer who wrote the "Acta Thomæ" may have adopted a few historical Indian names to lend verisimilitude to his fabrication, but as Mr. Fleet urges in his severely critical paper "the names put forward here in connexion with St. Thomas are distinctly not such as have lived in Indian story and tradition" (Jour. of R. Asiatic Soc., 1905, p. 235).

On the other hand, though the tradition that St. Thomas preached in "India" was widely spread in both East and West and is to be found in such writers as Ephraem Syrus, Ambrose, Paulinus, Jerome, and, later, in Gregory of Tours and others, still it is difficult to discover any adequate support for the long-accepted belief that St. Thomas pushed his missionary journeys as far south as Mylapore, not far from Madras, and there suffered martyrdom. In that region is still to be found a granite bas-relief cross with a Pahlavi (ancient Persian) inscription dating from the seventh century, and the tradition that it was here that St. Thomas laid down his life is locally very strong. Certain it is also that on the Malabar or west coast of southern India a body of Christians still exists using a form of Syriac for its liturgical language. Whether this Church dates from the time of St. Thomas the Apostle (there was a Syro-Chaldean bishop John "from India and Persia" who assisted at the Council of Nicea in 325) or whether the Gospel was first preached there in 345 owing to the Persian persecution under Shapur, or Sapor, or whether the Syrian missionaries who accompanied a certain Thomas Cana penetrated to the Malabar coast about the year 745 seems difficult to determine. We know only that in the sixth century Cosmas Indicopleustes speaks of the existence of Christians at Male (?Malabar) under a bishop who had been consecrated in Persia. King Alfred the Great is stated in the "Anglo-Saxon Chronicle" to have sent an expedition to establish relations with these Christians of the Far East. On the other hand the reputed relics of St. Thomas were certainly at Edessa in the fourth century, and there they remained until they were translated to Chios in 1258 and afterwards to Ortona. The improbable suggestion that St. Thomas preached in America (American Eccles. Rev., 1899, pp. 1–18) is based upon a misunderstanding of the text of the Acts of the Apostles (i, 8; cf. Berchet "Fonte italiane per la storia della scoperta del Nuovo Mondo", II, 236, and I, 44).

Besides the "Acta Thomæ" of which a different and notably shorter redaction exists in Ethiopic and Latin, we have an abbreviated form of a so-called "Gospel of Thomas", originally Gnostic, but as we know it now merely a fantastical history of the childhood of Jesus, without any notably heretical colouring. There is also a "Revelatio Thomæ", condemned as apocryphal in the Decree of Pope Gelasius, which has recently been recovered from various sources in a fragmentary condition (see the full text in the Revue bénédictine, 1911, pp. 359–374).

The most recent and thorough work is: Dahlmann, *Die Thomas-Legende* (Freiburg, 1912). See also: Wecker in *Theol. Quartalschrift* xcii (Tübingen, 1910), 538–565; Dahlmann, *Indische Fahrten*, II (Freiburg, 1908), 130 sqq.; Pick, *The Apocryphal Acts of Paul, Peter and Thomas* (Chicago, 1909) gives a tr. of the *Acta Thomæ*; Wright, *Apocryphal Acts of the Apostles* (London, 1871), in Syriac, with tr.; Lipsius and Bonnet, *Acta apostol. apocr.* (Leipzig, 1891–1903), the third part of this collection gives the full Greek text of the *Acts of Thomas*, critically edited; Burkitt in *Jour. of Theol. Studies* (I, 280 sqq.; III, 94 sqq.) has shown that the Syriac is probably the original language; Idem, *Texts and Studies* (Cambridge, 1897 and 1903), V; Malan, *The Conflicts of the Holy Apostles* (London, 1871), 187–220; Medlycott, *India and the Apostle Thomas* (London, 1905), a work written by a Catholic vicar Apostolic but uncritical in tone; Peeters in *Analecta bollandiana* (1906), 197, (1908), 207; Richards, *Indian Christians of St. Thomas* (London, 1908); Rendel Harris, *Cult of the Heavenly Twins* (1906), 105–25; Fleet in *Jour. of R. Asiatic Society* (London, 1905), 223–36, (1906), 706–11; Burkitt-Preuschen, *Urchristentum in Orient* (Tübingen, 1907); Milne Rae, *The Syrian Church in India* (Edinburgh, 1892); Wilhelm, *Deutsche Legenden und Legendare* (Leipzig, 1907); Michel and Peeters, *Evangiles apocryphes; I Evangile de Thomas* (Paris, 1911); Tischendorf, *Evangelia apocr.* (Leipzig, 1876); Hauler in *Wiener Studien* (Vienna, 1908), 308–340; Bihlmeyer in *Revue bénédictine*, XXVIII (Maredsous, 1911).

Herbert Thurston.

Thomas, Charles L. A., French composer, b. at Metz, 5 Aug,. 1811; d. at Paris, 12 Feb., 1896. He gained the Grand Prix at the Paris Conservatoire in 1832, having previously won first prize for piano and for harmony. Continuing his studies with Kalkbrenner, Barbereau, and Lesueur, he composed much during the years 1836–50, including three motets and a requiem mass. Turning his attention to comic opera he produced a number of ballets, of which "Le Caid" showed great promise. In 1851 he became a member of the Institute, and in the following year was appointed professor of composition at the Conservatoire. At length he captured the opera-going public with "Mignon", produced on 17 Nov., 1866. This success he followed up with "Hamlet", a five-act opera first given on 9 March, 1868. In 1871, on the death of Auber, he was appointed Director of the Conservatoire, a position he held till his death. Among his sacred compositions, his "Messe Solennelle" was given on 22 November, 1857, the feast of St. Cecilia, at the Church of St. Eustache, for the benefit of the Society of Artist Musicians. On the same feast, in 1865, his "Marche Religieuse" was performed. His merit was recognized by several decorations including the Grand Cross of the Legion of Honour in 1894. From a musical standpoint, Thomas holds a high place by reason of his dramatic instinct, admirably shown in "Mignon" and "Hamlet". He just falls short of being in the first rank, but his "Mignon" retains its popularity, after close on half a century.

Thomas, Gospel of Saint. See Apocrypha, subtitle III.

Thomas Abel, Blessed (also Able, or Abell), priest and martyr, b. about 1497; d. 30 July, 1540. He was chaplain to Queen Catharine, and defender of the validity of her marriage with Henry VIII, for which reason he was eventually put to death. He was a graduate of Oxford, and appears to have taught the queen modern languages and music. After a journey to Spain in her behalf, he received the parochial benefice of Bradwell in Sussex. He soon published (May, 1532?) in defence of the queen's marriage a work entitled: "Invicta Veritas, an answer to the determination of the most famous Universities, that by no manner of law it may be lawful for King Henry to be divorced from the Queen's grace, his lawful and very wife". For this he was thrown (1532) into Beauchamp Tower, and after a year's liberation again imprisoned, in December, 1533, on the charges of disseminating the prophecies of the Maid of Kent, encouraging the queen "obstinately to persist in her wilful opinion against the same divorce and separation", and maintaining her right to the title of queen. He was kept in close confinement until his execution at Tyburn, two days after the execution of Cromwell himself. There is extant a very pious Latin letter written by him to a fellow-martyr, and another to Cromwell, begging for some slight mitigation of his "close prison"—i. e. "license to go to church and say Mass here within the Tower and for to lie in some house upon the Green". It is signed "by your daily bedeman, Thomas Abell, priest". His act of attainder states that he and three others "have most traitorously adhered themselves unto the bishop of Rome, being a common enemy unto your Majesty and this your Realm, refusing your Highness to be our and their Supreme Head of this your Realm of England". There is in Beauchamp Tower a rebus of the Martyr, probably executed by himself; the figure of a bell carved on the wall, the letter A in front and the word "Thomas" above. He is one of the fifty-four English martyrs beatified by Leo XIII 29 Dec., 1886.

Pollen, *Lives of the English Martyrs*, I (London, 1904). 462–83.

Thomas J. Shahan.

Blessed Edward Powell.—With Blessed Thomas Abel there suffered Edward Powell, priest and martyr, b. in Wales about 1478; M. A. Oxon.; Fellow of Oriel, 1495; D.D. 26 June, 1506 and styled *perdoctus vir* by the university. He was rector of Bleadon, Somerset, and prebendary of Centum Solidorum in Lincoln, which he exchanged for Carlton-cum-Thurlby in 1505, and the latter for Sutton-in-Marisco in 1525. He also held the prebends of Lyme Regis, Calstock, Bedminster, and St. Mary Redcliffe, Bristol, and the living of St. Edmond's Salisbury. A court preacher in high favour with Henry VIII, he was ordered to publish a reply to Luther ("Propugnaculum summi Sacerdotii Evangelici, ac septem Sacramentorum, æditum per virum eruditum, sacrarum literarum professorem Edoardum Poelum adversus Martinum Lutherum fratrem famosum et Wiclifistan insignem", London, 1523, three books in the form of a dialogue between Powell and Luther). The University of Oxford commended this work, and styled Powell "the glory of the university" in a letter to the king. Powell was one of the four theologians selected to defend the legality of the marriage of Catharine of Aragon, in connexion with which he wrote the very rare "Tractatus de non dissolvendo Henrici Regis cum Catherina matrimonio" (London).

In March, 1533, Powell was selected to answer Latimer at Bristol, and was alleged to have disparaged his moral character. Latimer complained to Cromwell, and Powell fell into further disfavour by denouncing Henry's marriage with Anne Boleyn. He was discharged from the proctorship of Salisbury in Jan., 1534, and in November he was attainted, together with Blessed John Fisher, for high treason in refusing to take the oath of succession, deprived of his benefices, and imprisoned in the Tower of London. His confinement was very rigorous: the keeper himself was sent to the Marshalsea Prison for allowing Powell and Abel out on bail. The sentence was not carried out until 30 July, 1540. Three Catholics (Powell, Abel, and Richard Featherstone) and three Protestants suffered together. The victims were dragged on hurdles from the Tower to Smithfield, a Catholic and a Protestant on each hurdle. Powell's companion was Robert Barnes, the Protestant divine. A dialogue in verse was published shortly after, "The metynge of Doctor Barnes and Dr. Powell at Paradise Gate and of theyre communicacion bothe drawen to Smithfylde fro the Towar" (London, 1540), in the British Museum. The Catholics were hanged, drawn, and quartered as traitors; the others were burned as heretics.

Churton, *Lives of the Founders of Brasenose*, 118, 181, 245, 363.

C. F. Wemyss Brown.

Thomas á Jesu (Diaz Sanchez de Avila), Discalced Carmelite, writer on mystical theology, b. at Bæza, Andalusia, 1564; d. in Rome, 24 (or 27) May, 1627. Son of Don Baltasar de Avila and Doña Teresa de Herrera, he took degrees in the humanities at an unusually early age, applied himself afterwards to the study of Divinity, and in 1583 to that of law at the university of Salamanca. Having heard one of the professors extol the writings of St. Teresa (as yet unpublished) he procured a copy, the study of which resulted in a determination to embrace her manner of life. He took the habit at Valladolid, April, 1586, and made his profession in the following year. As a novice he was commissioned to write a ceremonial according to the Roman Rite lately introduced into the order, which remained in force until the last century. He filled the posts of reader of Divinity at Seville, prior at Saragossa, and provincial of Old Castile. At the expiration of his term of office he withdrew to the Desert of Las Batuecas situated in a mountain gorge of difficult access near Alberca. Later he became prior of this convent. He himself had been the originator of this peculiar kind of life. The Carmelite Rule was written for hermits, but the strictly eremitical life, at least on a large scale, being incompatible with the exigencies of modern times, he devised a compromise by restricting the number of such convents to one for each province, and limiting that of the religious to four permanent ones, and volunteers from other houses who were to reside there only one year at the time. He established the first Desert at Bolarque (New Castile) in 1592, Las Batuecas (Old Castile) during his provincialship, and later on a similar house in Belgium. He was called to Italy by Paul V who desired to evangelize the Congo States. Unlike the Spanish Congregation of the Order, the Italian had decided on principle to engage in missionary work, and Thomas being noted for his zeal was selected for it. The expedition, however, was frustrated, but he, with a view to furthering missionary enterprise, established with the pope's consent a new branch of the order under the title of Congregation of St. Paul, which was to cultivate exclusively missionary work (22 July, 1608). Both the Spanish and the Italian superiors resented this step on the ground that it might lead to a split in the order; the pope withdrew his approval, and Thomas remained two years under a cloud.

He wrote his large work, "Stimulus missionum" (Rome, 1610), and soon afterwards another, "De procuranda salute omnium gentium" (Antwerp, 1613), in which he outlined the organization and functions of a papal congregation with such wisdom that Gregory XV when instituting Propaganda in 1622 followed the lines suggested by Thomas. The latter had been sent by Paul V to the Low Countries where he was favourably received by the archdukes, and founded convents at Brussels (1610), Louvain (1611), Cologne (1613), Douai (1613), Lille (1616), Liège (1617), Antwerp (1618), Marlagne (Desert, 1619), Louvain (missionary college for the East, and also for England and Holland, 1621), and Namur (1622). From 1617 he filled the post of Provincial of Flanders. While at Brussels he placed the Carmelite Nuns who had come there from Spain and France under the jurisdiction of the Italian superiors, and assisted them in the establishment of numerous convents. In 1621 he was recalled to Rome as definitor general, and died there three years later in the odour of sanctity. By order of Urban VIII his writings were collected in two volumes, and were published at Cologne in 1684, while a third volume was never carried through the press. Besides the works already mentioned there are some on subjects connected with his order (its antiquity, Salamanca, 1599; the privileges of the confraternity, 1599, commentaries on various points of the rule, notices of prominent men, etc.). Other works deal with mystical theology, of which the principal are: "De contemplatione divina", Antwerp, 1620, and "Divinæ orationis methodus", Antwerp, 1623. The small treatise "La meilleure part, ou la Vie contemplative", translated and edited by Berthold-Ignace de Ste Anne (Brussels, 1686), is from an unpublished work. In his mystical writings Thomas á Jesu systematized St. Teresa's teaching on the basis of St. Thomas Aquinas, II–II, QQ. clxxi–clxxv.

Not less active than Thomas á Jesu in helping to establish the Propaganda was Venerable Dominic á Jesu Maria (Ruzzola), b. at Calatajud, 16 May, 1559; d. at Vienna, 16 Feb., 1630. At an early age he entered the convent of Calced Carmelites in his native town where his uncle was prior, and was sent after his profession to Saragossa and Valencia, receiving Holy orders at Tortosa. The desire of a stricter life led him to the Discalced Carmelites at Pastrana (1589), who sent him as master of novices to Madrid, and afterwards to Alcalá for his higher studies. He assisted the plague-stricken at Barcelona, and was five years subprior at Valencia. He resigned the priorship of Toledo at the command of Philip III who desired his presence at Madrid. After a short time he withdrew to the Desert of Bolarque. The papal nuncio sent him to Rome where he filled the posts of master of novices and prior at the convent of La Scala. The pope entrusted him with a mission to the Viceroy of Naples at Palermo, but would not consent to his permanently absenting himself from Rome. In 1614 he became procurator general, and three years later general, in which capacity he undertook the canonical visitation of the northern Italian convents, and founded the Desert of Varazzo near Genoa, having previously established a convent at Loano in Liguria. The struggle between the Catholic and Protestant powers which ultimately developed into the Thirty Years War having broken out, Paul V sent Dominic to Ferdinand II, who was preparing to engage in what was hoped would prove a decisive battle. With a crucifix in his hand and a picture of the Madonna, which had been shamefully mutilated by the heretics, suspended from his neck, he moved among the combatants, animating the Catholics to fight for their Faith and to gain the victory he promised would be theirs. The Battle of Prague proved indeed a signal success (8 Nov., 1620). Dominic continued his journey through Vienna, Lorraine, Cologne, Brussels, (where he assisted Archduke Albert on his deathbed), Paris, and Marseilles, being everywhere hailed as a hero. Back in Rome towards the end of 1621 he assisted the pope in the establishment of Propaganda, towards which end he had collected considerable funds during his apostolic journey; he was nominated a member of the Congregation. Urban VIII sent him to Vienna to bring about a settlement of the differences between the Court of Austria and the House of Mantua, but he was taken ill and died, surrounded by the imperial family. His body, partly incorrupt, now rests in the Carmelite church at Unter Doebling near Vienna. His biographers relate numberless miracles alleged to have been wrought by him during life (for which he was called the Thaumaturgus of his time), and after his death, but until the conclusion of the process of beatification it is impossible to speak of these. He wrote, besides some works which remained in MS.: "Sententiæ spirituales' (on mystical theology), translated into French (Paris, 1623), German, and Flemish; "Argumenta psalmorum" (Rome, 1623); "De protectione B. Virginis" (French translation, Paris, 1645); "Concordia spiritualis" (Spanish translation, Brussels, 1626).

Eliæ*, see BERTHOLD-IGNACE DE STE ANNE, *Vie de la Mère Anne de Jésus* (Mechlin, 1882), II, 344–386, concerning Thomas á Jesu. PHILIPPUS A SS. TRINITATE, *Vita Ven. P. Dominici* (Lyons, 1659), also in French, and MARIA GABRIELA, *Leben des ehrw. Dominikus* (Innsbruck, 1902).

BENEDICT ZIMMERMAN.

Thomas a Kempis, author of the "Imitation of Christ", b. at Kempen in the Diocese of Cologne, in 1379 or 1380; d. 25 July, 1471. His parents, John and Gertrude Haemerken, were of the artisan class; it is said that Gertrude kept the village school, and most probably the father worked in metals, a common calling in Kempen, whence perhaps the surname Haemerken, or Haemerlein, Latinized *Malleolus* (a little hammer). We have certain information of only two children, John, the senior by about fourteen years, and Thomas. Thomas was only thirteen when he set out for the schools of Deventer, in Holland. His brother had preceded him thither by ten or twelve years, and doubtless Thomas expected to find him still there. On his arrival, however, he learned that he had gone two years since with five other Brothers of the Common Life to lay the foundations of a new congregation of Canons Regular at Windesheim, about twenty miles from Deventer, where he then went and was lovingly received by his brother who provided him with a letter of introduction to the superior of the Brothers of Common Life at Deventer, Florentius Radewyn. Radewyn gave a warm welcome to the young brother of John Haemerken of Kempen, placed him for the time being in the house and under the maternal care of "a certain noble and devout lady", presented him to the rector of the schools, and paid his first fees, though the master returned the money when he learned whence it came. These particulars we have from the pen of Thomas himself in the biographies, written in his old age, of Gerard Groote, Florentius Radewyn, and their followers (see "The Founders of the New Devotion", London, 1905). For seven years he remained at Deventer, numbered from the first among the disciples of Radewyn, and for a good portion of the time living in his house under his immediate care. It is impossible to exaggerate the influence of those years in the formation of his character. The "new devotion", of which Deventer was then the focus and centre, was a revival in the Low Countries in the fourteenth century of the fervour of the primitive Christians at Jerusalem and Antioch in the first. It owed its inception to the fervid preaching of the Deacon Gerard Groote, its further organization to the prudence and generous devotedness of Florentius Radewyn. Its associates were called the "Devout Brothers and Sisters", also the "Brothers and Sisters of the Common Life". They took no vows, but lived a life of poverty, chastity, and obedience, as far as was compatible with their state, some in their own homes and others, especially clerics, in community. They were forbidden to beg, but all were expected to earn their living by the labour of their hands; for the clerics this meant chiefly the transcribing of books and the instruction of the young. All earnings were placed in a common fund at the disposal of the superior; the one ambition of all was to emulate the life and virtues of the first Christians, especially in the love of God and the neighbour, in simplicity, humility, devotion. Furthermore, partly to provide the Devout Brothers and Sisters with effective protectors and experienced guides, partly to afford an easy transit to the religious state proper for those of their number who should desire it, Gerard Groote conceived the idea of establishing a branch of the canonical order, which should always maintain the closest relations with the members of the new devotion. This scheme was carried into effect after his untimely death, at the early age of forty-three, by the foundation of the congregation of Windesheim, as it was afterwards called from the tract of land where the first priory was established (1386). These details are given as helpful to a better understanding of the life and character of a Kempis, a typical and exemplary Brother, and for seventy-two years he was one of the most distinguished of the Canons Regular.

THOMAS A KEMPIS
From the Getruidenberg Portrait

At Deventer Thomas proved an apt pupil, already noted for his neatness and skill in transcribing manuscripts. This was a life-long labour of love with him; in addition to his own compositions he copied numerous treatises from the Fathers, especially St. Bernard, a Missal for the use of his community, and the whole Bible in four large volumes still extant. After completing his humanities at Deventer, in the autumn of 1399, with the commendation of his superior, Florentius Radewyn, Thomas sought admission among the Canons Regular of Windesheim at Mount St. Agnes, near Zwolle, of which monastery his brother John was then prior. The house had been established only the previous year, and as yet there were no claustral buildings, no garden, no benefactors, no funds. During his term of office, which lasted nine years, John a Kempis built the priory and commenced the church. In these circumstances we find the explanation of the fact that Thomas was not clothed as a novice until 1406, at which date the cloister was just completed, nor ordained priest until 1413, the year after the church was consecrated. The point is worth noting, as some writers in their eagerness to discredit the claims of a Kempis to the authorship of the "Imitation" have actually fastened upon the length of this period of probation to insinuate that he was a dullard or worse. Thomas was himself, to within a few months of his death, the chronicler of Agnetenberg. The story which he tells of the early struggles of the priory on the Mount, its steady progress, and eventual prosperity is full of charm and edification ("The Chronicle of the Canons Regular of Mount St. Agnes", London, 1906). These records reveal to us the simplicity and holiness of his religious brethren. He was twice elected subprior, and once he was made procurator. The reason assigned by an ancient biographer for the latter appointment is one that does honour both to Thomas and his brethren, his love for the poor. However, we can scarcely imagine the author of the "Imitation" a good business manager, and after a time his preference for retirement, literary work, and contemplation prevailed with the Canons to relieve him of the burden. The experience thus gained he made use of in a spiritual treatise, "De fideli dispensatore".

His first tenure of office as subprior was interrupted by the exile of the community from Agnetenberg (1429), occasioned by the unpopular observance by the Canons of Windesheim of an interdict laid upon the country by Martin V. A dispute had arisen in connexion with an appointment to the vacant See of Utrecht and an interdict was upon the land. The Canons remained in exile until the question was settled (1432). The community of Mount St. Agnes had dwelt meanwhile in a canonry of Lunenkerk, which they reformed and affiliated to Windesheim. More than a year of this trying period Thomas spent with his brother John in the convent of Bethany, near Arnheim, where he had been sent to assist and comfort his brother, who was ailing. He remained until his death (November, 1432). We find record of his election as subprior again in 1448, and doubtless he remained in office until age and infirmity procured him release. It was part of the subprior's duties to train the young religious, and to this fact no doubt we owe most of his minor treatises, in particular his "Sermons to the Novices Regular" (tr. London, 1907). We also know from early biographers that Thomas frequently preached in the church attached to the priory. Two similar series of these sermons are extant (tr. "Prayers and Meditations on the Life of Christ" and "The Incarnation and Life of Our Lord", London, 1904, 1907). They treat of a Kempis's favourite subjects, the mystery of our Redemption, and the love of Jesus Christ as shown in His words and works, but especially in the sufferings of His Passion. In person Thomas is described as a man of middle height, dark complexion and vivid colouring, with a broad forehead and piercing eyes; kind and affable towards all, especially the sorrowful and afflicted; constantly engaged in his favourite occupations of reading, writing, or prayer; in time of recreation for the most part silent and recollected, finding it difficult even to express an opinion on matters of mundane interest, but pouring out a ready torrent of eloquence when the conversation turned on God or the concerns of the soul. At such times often he would excuse himself, "My brethren," he would say, "I must go: Someone is waiting to converse with me in my cell." A possibly authentic portrait, preserved at Gertruidenberg, bears as his motto the words: "In omnibus requiem quæsivi et nusquam inveni nisi in een Hoecken met een Boecken" (Everywhere I have sought rest and found it nowhere, save in little nooks with little books). He was laid to rest in the eastern cloister in a spot carefully noted by the continuator of his chronicle. Two centuries after the Reformation, during which the priory was destroyed, the holy remains were transferred to Zwolle and enclosed in a handsome reliquary by Maximilian Hendrik, Prince-Bishop of Cologne. At present they are enshrined in St. Michael's Church, Zwolle, in a magnificent monument erected in 1897 by subscriptions from all over the world and inscribed: "Honori, non memoriæ Thomæ Kempensis, cujus nomen perennius quam monumentum" (To the honour not to the memory of Thomas a Kempis, whose name is more enduring than any monument). It is interesting to recall that the same Maximilian Hendrik, who showed such zeal in preserving and honouring the relics of a Kempis, was also eager to see the cause of his beatification introduced, and began to collect the necessary documents; but little more than a beginning was made when he died (1688) and since that date no further steps have been taken.

A few words on Thomas's claim, once disputed but now hardly so, to the authorship of the "Imitation of Christ". The book was first issued anonymously (1418) and was soon accorded a wide welcome, copied by different scribes, and attributed to various spiritual writers, among others St. Bernard, St. Bonaventure, Henry de Kalkar, Innocent III, Jean Charlier de Gerson, and John a Kempis. In 1441 Thomas completed and signed his name to a codex still extant (Royal Library, Brussels, 5855–61), containing the four books of the "Imitation" and nine minor treatises. Then for two hundred years no serious attempt was made to dispossess a Kempis of his title; but early in the seventeenth century a fierce and prolonged controversy was commenced with the object of establishing the claim either of Jean Charlier de Gerson, Chancellor of Paris, or of his Italian variant, Giovanni Gersen, alleged Benedictine Abbot of Vercelli. At one period an Englishman, Walter Hilton, Canon Regular of Thurgarton, the author of the "Scale (Ladder) of Perfection", was brought forward, but his claim was not long maintained. Incredible as it may sound, the very existence of Giovanni Gersen of Vercelli is yet to be proved. Of Jean Charlier de Gerson the following facts have been established and they may be found demonstrated at length in such works as Cruise, "Thomas à Kempis", and Kettlewell, "The Authorship of the De Imitatione Christi". Not a single contemporary witness is found in Gersen's favour; not a single manuscript during his life or for thirty years after his death ascribes the work to him; internal evidence, style, matter, etc. are in every respect unfavourable. On the other hand we find the title of a Kempis proved by the following: several contemporary witnesses of unimpeachable authority, including members of his own order, name Thomas as the author; contemporary MSS., including one autograph codex, bear his name; internal evidence is wholly favourable. Sir Francis Cruise summarizes this last item under three headings: (1) identity of style, including peculiarities common to the "Imitation" and other undisputed works of a Kempis, viz.: barbarisms, Italianized words, Dutch idioms, systematic rhythmical punctuation, and the word *devotus* as used primarily of associates of the new devotion; (2) The "Imitation" breathes the whole spirit of the Windesheim school of mysticism; (3) it is impregnated throughout with the Scriptures and the writings of the Fathers, especially St. Augustine and Bernard, all favourite founts of inspiration for a Kempis and his fellow Canons of Windesheim. The "Imitation" itself, the best known and the first in order of merit of his original writings, comprises in bulk about one-tenth of the works of a Kempis. Many were originally instructions for the novices and junior Canons of whom, as subprior, Thomas had charge; others are spiritual treatises of wider application and some of these indeed, as the "Oratio de elevatione mentis in Deum", rise to sublime heights of mysticism. There are numerous prayers of sweet devotion and quaint Latin hymns of simple rhythm and jingling rhyme. One work, of which Thomas was editor rather than author, is a "Life of (St.) Lydwine, Virgin" (tr. London, 1911). The best complete edition so far of the "Opera omnia" of a Kempis is that of the Jesuit Sommalius, published by Nut of Antwerp, 1607; even this does not contain the "Chronicon Montis Sanctæ Agnetis", which was edited by H. Rosweyd, S.J., and published in one volume with the "Chronicon Windesemense" (Antwerp, 1621). Of the innumerable editions of the "Imitation", doubtless by far the most interesting is a facsimile from the 1441 codex, published in London, 1879. A splendid critical edition of the "Opera omnia" is now being published by Herder under the able editorship of Dr. Pöhl; five of eight projected volumes have appeared (1911). Messrs. Kegan Paul have published in a uniform edition five volumes of translation, already mentioned in the course of this article. Messrs. Burns and Oates have brought out a sixth. It is hoped eventually to offer a complete translation. This series will prove a boon to students of a Kempis, as, although several lesser works, such as "The Soliloquy of the Soul", "The Discipline of the Cloister", the "Manuale Parvulorum", etc., have been rendered into English, the work hitherto accomplished has been of unequal merit. Perhaps in this connexion we may quote the enthusiastic commendation of Prior Pirkhamer addressed to Peter Danhausser, the publisher of the first edition of Thomas a Kempis's works, 1494: "Nothing more holy, nothing more honourable, nothing more religious, nothing in fine more profitable for the Christian commonweal can you ever do than to make known these works of Thomas à Kempis."

Vincent Scully.

Thomas Alfield (Aufield, Alphilde, Hawfield, Offeldus), Venerable (alias Badger), priest, b. at Gloucestershire; martyred at Tyburn, 6 July, 1585. He was educated at Eton and Cambridge (1568). He was afterwards converted and came to Douai College in 1576, but the troubles there compelled him to intermit his studies for four years, and he was eventually ordained and sent forth from Reims in 1581. Here he was associated with the celebrated mission of Blessed Edmund Campion and Father Persons, and he persuaded the latter to take as his servant his brother Robert Alfield, then recently converted, but who afterwards became a traitor of note. Thomas seems to have laboured chiefly in the north, where after a time he was arrested and sent to the Tower of London, 2 May, 1582. Here he at first made a "glorious" confession, and even endured torture; but being afterwards sent back to the north, he fell, and went to the Protestant Church. Upon regaining liberty he was deeply penitent for his fall, and returned to Dr. Allen at Reims to gather new resolution. Returning again to England he was induced by the famous seaman John Davis (about March, 1584) to make for him offers—presumably insincere on Davis's part—of services to Spain. In August of the same year Dr. Allen's celebrated "True and modest Defence" appeared in answer to Burghley's "Execution of Justice". To circulate such books as Allen's was of the greatest service to the Faith. Alfield undertook the dangerous task with the help of a dyer by the name of Thomas Webley, and of one Crabbe. After some months he was again arrested, and again sent to the Tower, whence he was removed to Newgate and tried. Crabbe renounced the pope and thereby saved his life; the other two were hanged. A reprieve had, for some unknown reason, been granted for Alfield, but it arrived too late.

Challoner, *Missionary Priests* (Edinburgh, 1877); Gillow, *Bibl. Dict. Eng. Cath.*, s. v. *Alfield, Thomas;* Knox, *Letters of Cardinal Allen* (London, 1882); there are also several references to Alfield in the Record Office, London, many of which are given by Simpson in *The Rambler*, new ser., VII, 420–431.

Thomas Anglicus. See Thomas of Jorz.

Thomas Aquinas, Saint, philosopher, theologian, doctor of the Church (*Angelicus Doctor*), patron of Catholic universities, colleges, and schools, b. at Rocca Secca in the Kingdom of Naples, 1225 or 1227; d. at Fossa Nuova, 7 March, 1274.

I. Life.—The great outlines and all the important events of his life are known, but biographers differ as to some details and dates. Death prevented Henry Denifle from executing his project of writing a critical life of the saint. Denifle's friend and pupil, Dominic Prümmer, O.P., professor of theology in the University of Fribourg, Switzerland, has taken up the work and is publishing the "Fontes Vitæ S. Thomæ Aquinatis, notis historicis et criticis illustrati"; and the first fascicle (Toulouse, 1911) has appeared, giving the life of St. Thomas by Peter Calo (1300) now published for the first time. From Tolomeo of Lucca (see Bartholomew of Lucca) we learn that at the time of the saint's death there was a doubt about his exact age (Prümmer, op. cit., 45). The end of 1225 is usually assigned as the time of his birth. Father Prümmer, on the authority of Calo, thinks 1227 is the more probable date (op. cit., 28). All agree that he died in 1274.

Landulph, his father, was Count of Aquino, Theodora, his mother, Countess of Teano. His family was related to the Emperors Henry VI and Frederick II, and to the Kings of Aragon, Castile, and France. Calo relates that a holy hermit foretold his career, saying to Theodora before his birth: "He will enter the Order of Friars Preachers, and so great will be his learning and sanctity that in his day no one will be found to equal him" (Prümmer, op. cit., 18). At the age of five, according to the custom of the times, he was sent to receive his first training from the Benedictine monks of Monte Cassino. Diligent in study, he was thus early noted as being meditative and devoted to prayer, and his preceptor was surprised at hearing the child ask frequently: "What is God?" About the year 1236 he was sent to the University of Naples. Calo says that the change was made at the instance of the Abbot of Monte Cassino, who wrote to Thomas's father that a boy of such talents should not be left in obscurity (Prümmer, op. cit., 20). At Naples his preceptors were Pietro Martini and Petrus Hibernus. The chronicler says that he soon surpassed Martini in grammar, and he was then given over to Peter of Ireland, who trained him in logic and the natural sciences. The customs of the times divided the liberal arts into two courses: the Trivium, embracing grammar, logic, and rhetoric; the Quadrivium, comprising music, mathematics, geometry, and astronomy (see Arts, The Seven Liberal). Thomas could repeat the lessons with more depth and lucidity than his masters displayed. The youth's heart had remained pure amidst the corruption with which he was surrounded, and he resolved to embrace the religious life.

St. Thomas Aquinas
Piero della Francesca, Poldi-Pezzoli Gallery, Milan

Some time between 1240 and August, 1243, he received the habit of the Order of St. Dominic, being attracted and directed by John of St. Julian, a noted preacher of the convent of Naples. The city wondered that such a noble young man should don the garb of a poor friar. His mother, with mingled feelings of joy and sorrow, hastened to Naples to see her son. The Dominicans, fearing she would take him away, sent him to Rome, his ultimate destination being Paris or Cologne. At the instance of Theodora, Thomas's brothers, who were soldiers under the Emperor Frederick, captured the novice near the town of Aquapendente, and confined him in the fortress of San Giovanni at Rocca Secca. Here he was detained nearly two years, his parents, brothers, and sisters endeavouring by various means to destroy his vocation. The brothers even laid snares for his virtue, but the pure-minded novice drove the temptress from his room with a brand which he snatched from the fire. Towards the end of his life, St. Thomas confided to his faithful friend and companion, Reginald of Piperno, the secret of a remarkable favour received at this time. When the temptress had been driven from his chamber, he knelt and most earnestly implored God to grant him integrity of mind and body. He fell into a gentle sleep, and, as he slept, two angels appeared to assure him that his prayer had been heard. They then girded him about with a white girdle, saying: "We gird thee with the girdle of perpetual virginity." And from that day forward he never experienced the slightest motions of concupiscence.

The time spent in captivity was not lost. His mother relented somewhat, after the first burst of anger and grief; the Dominicans were allowed to provide him with new habits, and through the kind offices of his sister he procured some books—the Holy Scriptures, Aristotle's Metaphysics, and the "Sentences" of Peter Lombard. After eighteen months or two years spent in prison, either because his mother saw that the hermit's prophecy would eventually be fulfilled or because his brothers feared the threats of Innocent IV and Frederick II, he was set at liberty, being lowered in a basket into the arms of the Dominicans, who were delighted to find that during his captivity "he had made as much progress as if he had been in a *studium generale*" (Calo, op. cit., 24). Thomas immediately pronounced his vows, and his superiors sent him to Rome. Innocent IV examined closely into his motives in joining the Friars Preachers, dismissed him with a blessing, and forbade any further interference with his vocation. John the Teutonic, fourth master general of the order, took the young student to Paris and, according to the majority of the saint's biographers, to Cologne, where he arrived in 1244 or 1245, and was placed under Albertus Magnus, the most renowned professor of the order (on chronology of this period see Prümmer, op. cit., p. 25). In the schools Thomas's humility and taciturnity were misinterpreted as signs of dulness, but when Albert had heard his brilliant defence of a difficult thesis, he exclaimed: "We call this young man a dumb ox, but his bellowing in doctrine will one day resound throughout the world."

In 1245 Albert was sent to Paris, and Thomas accompanied him as a student. In 1248 both returned to Cologne. Albert had been appointed regent of the new *studium generale*, erected that year by the general chapter of the order, and Thomas was to teach under him as Bachelor. (On the system of graduation in the thirteenth century see Preachers, Order of.—II, A, 1, d; Fleury, "Hist. Eccl.", diss. V.; Touron, "Vie de S. Thomas d'Aquin", Paris, 1740, II, v; Drane, "Christian Schools and Scholars", London, 1881, 413; Douais, "L'organisation des études dans l'ordre des FF. Prêcheurs, au 13$^{\text{ème}}$ siècle", Paris, 1884.) During his stay in Cologne, probably in 1250, he was raised to the priesthood by Conrad of Hochstaden, archbishop of that city. Throughout his busy life, he frequently preached the Word of God, in Germany, France, and Italy. His sermons were forceful, redolent of piety, full of solid instruction, abounding in apt citations from the Scriptures (see "D. Th. Aquinatis sermones et opuscula concionatoria", 2 vols., Paris, 1881). In the year 1251 or 1252 the master general of the order, by the advice of Albertus Magnus and Hugo a S. Charo (Hugh of St. Cher), sent Thomas to fill the office of Bachelor (sub-regent) in the Dominican *studium* at Paris. This appointment may be regarded as the beginning of his public career, for his teaching soon attracted the attention both of the professors and of the students. His duties consisted principally in explaining the "Sentences" of Peter Lombard, and his commentaries on that text-book of theology furnished the materials and, in great part, the plan for his chief work, the "Summa theologica".

In due time he was ordered to prepare himself to obtain the degree of Doctor in Theology from the University of Paris, but the conferring of the degree was postponed, owing to a dispute between the university and the friars. The conflict, originally a dispute between the university and the civic authorities, arose from the slaying of one of the students and the wounding of three others by the city guard. The university, jealous of its autonomy, demanded satisfaction, which was refused. The doctors closed their schools, solemnly swore that they would not reopen them until their demands were granted, and decreed that in future no one should be admitted to the degree of Doctor unless he would take an oath to follow the same line of conduct under similar circumstances. The Dominicans and Franciscans, who had continued to teach in their schools, refused to take the prescribed oath, and from this there arose a bitter conflict which was at its height when St. Thomas and St. Bonaventure were ready to be presented for their degrees (see Vaughan, "Life and Labours of St. Thomas of Aquin", 2 vols., London, 1871–72, I, xxi). William of St-Amour extended the dispute beyond the original question, violently attacked the Friars, of whom he was evidently jealous, and denied their right to occupy chairs in the university. Against his book, "De periculis novissimorum temporum" (The Perils of the Last Times), St. Thomas wrote a treatise "Contra impugnantes religionem", an apology for the religious orders (Touron, op. cit., II, cc. vii sqq.). The book of William of St-Amour was condemned by Alexander IV at Anagni, 5 October, 1256, and the pope gave orders that the mendicant friars should be admitted to the doctorate.

About this time St. Thomas also combated a dangerous book, "The Eternal Gospel" (Touron, op. cit., II, cxii). The university authorities did not obey immediately; the influence of St. Louis IX and eleven papal Briefs were required before peace was firmly established, and St. Thomas was admitted to the degree of Doctor in Theology. The date of his promotion, as given by many biographers, was 23 October, 1257. His theme was "The Majesty of Christ". His text, "Thou waterest the hills from thy upper rooms: the earth shall be filled with the fruit of thy works" (Ps. ciii, 13), said to have been suggested by a heavenly visitor, seems to have been prophetic of his career. A tradition says that St. Bonaventure and St. Thomas received the doctorate on the same day, and that there was a contest of humility between the two friends as to which should be promoted first. From this time St. Thomas's life may be summed up in a few words: praying, preaching, teaching, writing, journeying. Men were more anxious to hear him than they had been to hear Albert, whom St. Thomas surpassed in accuracy, lucidity, brevity, and power of exposition, if not in universality of knowledge. Paris claimed him as her own; the popes wished to have him near them; the *studia* of the order were eager to enjoy the benefit of his teaching; hence we find him successively at Anagni, Rome, Bologna, Orvieto, Viterbo, Perugia, in Paris again, and finally in Naples, always teaching and writing, living on earth with one passion, an ardent zeal for the explanation and defence of Christian truth. So devoted was he to his sacred task that with tears he begged to be excused from accepting the Archbishopric of Naples, to which he was appointed by Clement IV in 1265. Had this appointment been accepted, most probably the "Summa theologica" would not have been written.

Yielding to the requests of his brethren, he on several occasions took part in the deliberations of the general chapters of the order. One of these chapters was held in London in 1263. In another held at Valenciennes (1259) he collaborated with Albertus Magnus and Peter of Tarentasia (afterwards Pope Innocent V) in formulating a system of studies which is substantially preserved to this day in the *studia generalia* of the Dominican Order (cf. Douais, op. cit.). It is not surprising to read in the biographies of St. Thomas that he was frequently abstracted and in ecstasy. Towards the end of his life the ecstasies became more frequent. On one occasion, at Naples in 1273, after he had completed his treatise on the Eucharist, three of the brethren saw him lifted in ecstasy, and they heard a voice proceeding from the crucifix on the altar, saying "Thou hast written well of me, Thomas; what reward wilt thou have?". Thomas replied, "None other than Thyself, Lord" (Prümmer, op. cit., p. 38). Similar declarations are said to have been made at Orvieto and at Paris. On 6 December, 1273, he laid aside his pen and would write no more. That day he experienced an unusually long ecstasy during Mass; what was revealed to him we can only surmise from his reply to Father Reginald, who urged him to continue his writings: "I can do no more. Such secrets have been revealed to me that all I have written now appears to be of little value" (*modica*, Prümmer, op. cit., p. 43).

The "Summa theologica" had been completed only as far as the ninetieth question of the third part (De partibus pœnitentiæ). Thomas began his immediate preparation for death. Gregory X, having convoked a general council, to open at Lyons on 1 May, 1274, invited St. Thomas and St. Bonaventure to take part in the deliberations, commanding the former to bring to the council his treatise "Contra errores Græcorum" (Against the Errors of the Greeks). He tried to obey, setting out on foot in January, 1274, but strength failed him; he fell to the ground near Terracina, whence he was conducted to the Castle of Maienza, the home of his niece the Countess Francesca Ceccano. The Cistercian monks of Fossa Nuova pressed him to accept their hospitality, and he was conveyed to their monastery, on entering which he whispered to his companion: "This is my rest for ever and ever: here will I dwell, for I have chosen it" (Ps. cxxxi, 14). When Father Reginald urged him to remain at the castle, the saint replied: "If the Lord wishes to take me away, it is better that I be found in a religious house than in the dwelling of a lay person." The Cistercians were so kind and attentive that Thomas's humility was alarmed. "Whence comes this honour", he exclaimed, "that servants of God should carry wood for my fire!" At the urgent request of the monks he dictated a brief commentary on the Canticle of Canticles.

The end was near; extreme unction was administered. When the Sacred Viaticum was brought into the room he pronounced the following act of faith: "If in this world there be any knowledge of this sacrament stronger than that of faith, I wish now to use it in affirming that I firmly believe and know as certain that Jesus Christ, True God and True Man, Son of God and Son of the Virgin Mary, is in this Sacrament." Then he added: "I receive Thee, the price of my redemption, for Whose love I have watched, studied, and laboured. Thee have I preached; Thee have I taught. Never have I said anything against Thee: if anything was not well said, that is to be attributed to my ignorance. Neither do I wish to be obstinate in my opinions, but if I have written anything erroneous concerning this sacrament or other matters, I submit all to the judgment and correction of the Holy Roman Church, in whose obedience I now pass from this life" (Prümmer, op. cit., p. 48). He died on 7 March, 1274. Numerous miracles attested his sanctity, and he was canonized by John XXII, 18 July, 1323. The monks of Fossa Nuova were anxious to keep his sacred remains, but by order of Urban V the body was given to his Dominican brethren, and was solemnly translated to the Dominican church at Toulouse, 28 January, 1369. A magnificent shrine erected in 1628 was destroyed during the French Revolution, and the body was removed to the Church of St. Sernin, where it now reposes in a sarcophagus of gold and silver, which was solemnly blessed by Cardinal Desprez on 24 July, 1878. The chief bone of his left arm is preserved in the cathedral of Naples. The right arm, bestowed on the University of Paris, and originally kept in the St. Thomas's Chapel of the Dominican church, is now preserved in the Dominican Church of S. Maria Sopra Minerva in Rome, whither it was transferred during the French Revolution.

A description of the saint as he appeared in life is given by Calo (Prümmer, op. cit., p. 401), who says that his features corresponded with the greatness of his soul. He was of lofty stature and of heavy build, but straight and well proportioned. His complexion was "like the colour of new wheat":

his head was large and well shaped, and he was slightly bald. All portraits represent him as noble, meditative, gentle yet strong. St. Pius V proclaimed St. Thomas a Doctor of the Universal Church in the year 1567. In the Encyclical "Æterni Patris", of 4 August, 1879, on the restoration of Christian philosophy, Leo XIII declared him "the prince and master of all Scholastic doctors". The same illustrious pontiff, by a Brief dated 4 August, 1880, designated him patron of all Catholic universities, academies, colleges, and schools throughout the world.

II. Writings.—A. *General Remarks.*—Although St. Thomas lived less than fifty years, he composed more than sixty works, some of them brief, some very lengthy. This does not necessarily mean that every word in the authentic works was written by his hand; he was assisted by secretaries, and biographers assure us that he could dictate to several scribes at the same time (Vaughan, op. cit., vol. I, p. 469). Other works, some of which were composed by his disciples, have been falsely attributed to him. The most recent, and probably the most satisfactory, treatise on the authenticity of his works is the series of articles by P. Mandonnet, "Des écrits authentiques de S. Thomas d'Aquin" (Fribourg, 1910), originally written for the "Revue Thomiste" (March-April, 1909). The "Dissertationes in singula opera D. Th. Aquinatis" (Venice, 1750) of Bernard de Rubeis are given in all important editions of the saint's works. A reliable and convenient list is given by Fr. Sertillanges, O. P., in his "S. Thomas d'Aquin" (2 vols., Paris, 1910).

In the "Scriptores Ordinis Prædicatorum" (Paris, 1719) Fr. Echard devotes eighty-six folio pages to St. Thomas's works, the different editions and translations (I, pp. 282–348). Touron (op. cit., pp. 691 sqq.) says that manuscript copies were found in nearly all the libraries of Europe, and that, after the invention of printing, copies were multiplied rapidly in Germany, Italy, and France, portions of the "Summa theologica" being one of the first important works printed. Peter Schoeffer, a printer of Mainz, published the "Secunda Secundæ" in 1467. This is the first known printed copy of any work of St. Thomas. The first complete edition of the "Summa" was printed at Basle, in 1485. Many other editions of this and of other works were published in the sixteenth and seventeenth centuries, especially at Venice and at Lyons. The principal editions of all the works (Opera Omnia) were published as follows: Rome, 1570; Venice, 1594, 1612, 1745; Antwerp, 1612; Paris, 1660, 1871–80 (Vivès); Parma, 1852–73; Rome, 1882 (the Leonine). The Roman edition of 1570, called "the Piana", because edited by order of St. Pius V, was the standard for many years. Besides a carefully revised text it contained the commentaries of Cardinal Cajetan and the valuable "Tabula Aurea" of Peter of Bergamo. The Venetian edition of 1612 was highly prized because the text was accompanied by the Cajetan-Porrecta commentaries (see Porrecta, Serafino). The Leonine edition, begun under the patronage of Leo XIII, now continued under the master general of the Dominicans, undoubtedly will be the most perfect of all. Critical dissertations on each work will be given, the text will be carefully revised, and all references will be verified. By direction of Leo XIII (Motu Proprio, 18 Jan., 1880) the "Summa contra gentiles" will be published with the commentaries of Sylvester Ferrariensis, whilst the commentaries of Cajetan go with the "Summa theologica". The latter has been published, being vols. IV–XII of the edition (last in 1906). St. Thomas's works may be classified as philosophical, theological, scriptural, and apologetic, or controversial. The division, however, cannot always be rigidly maintained. The "Summa theologica", e. g., contains much that is philosophical, whilst the "Summa contra gentiles" is principally, but not exclusively, philosophical and apologetic. His philosophical works are chiefly commentaries on Aristotle, and his first important theological writings were commentaries on Peter Lombard's four books of "Sentences"; but he does not slavishly follow either the Philosopher or the Master of the Sentences (on opinions of the Lombard rejected by theologians, see Migne, 1841, edition of the "Summa" I, p. 451).

B. *His Principal Works in Detail.*—Amongst the works wherein St. Thomas's own mind and method are shown, the following deserve special mention:—

(1) "Quæstiones disputatæ" (Disputed Questions).—These were more complete treatises on subjects that had not been fully elucidated in the lecture halls, or concerning which the professor's opinion had been sought. They are very valuable, because in them the author, free from limitations as to time or space, freely expresses his mind and gives all arguments for or against the opinions adopted. These treatises, containing the questions "De potentia", "De malo", "De spirit. creaturis", "De anima", "De unione Verbi Incarnati", "De virt. in communi", "De caritate", "De corr. fraterna", "De spe", "De virt. cardinal.", "De veritate", were often reprinted, e. g. recently by the Association of St. Paul (2 vols., Paris and Fribourg, Switzerland, 1883). (2) "Quodlibeta" (may be rendered "Various Subjects", or "Free Discussions").—They present questions or arguments proposed and answers given in or outside the lecture halls, chiefly in the more formal scholastic exercises, termed *circuli*, *conclusiones*, or *determinationes*, which were held once or twice a year. (See Mandonnet, "Siger de Brabant", 2nd ed., Louvain, 1911, IV, p. 85; Turner, "Hist. of Philosophy", Boston, 1903, p. 346.) (3) "De unitate intellectus contra Averroistas".—This *opusculum* refuted a very dangerous and widespread error, viz., that there was but one soul for all men, a theory which did away with individual liberty and responsibility. (See Averroes; Mandonnet, op. cit.) (4) "Commentaria in Libros Sententiarum" (mentioned above).—This with the following work are the immediate forerunners of the "Summa theologica". (5) "Summa de veritate catholicæ fidei contra gentiles" (Treatise on the Truth of the Catholic Faith, against Unbelievers).—This work, written at Rome, 1261–64, was composed at the request of St. Raymond of Pennafort, who desired to have a philosophical exposition and defence of the Christian Faith, to be used against the Jews and Moors in Spain. It is a perfect model of patient and sound apologetics, showing that no demonstrated truth (science) is opposed to revealed truth (faith). The best recent editions are those of Rome, 1878 (by Uccelli), of Paris and Fribourg, Switzerland, 1882, and of Rome, 1894. It has been translated into Greek, Hebrew, and Syriac, and quite recently Father Rickaby, S. J., gave to the world an annotated translation into English (with some abridgment) under the title "Of God and His Creatures" (London and St. Louis, 1905). It is divided into four books: I. Of God as He is in Himself; II. Of God the Origin of Creatures; III. Of God the End of Creatures; IV. Of God in His Revelation. It is worthy of remark that the Fathers of the Vatican Council, treating the necessity of revelation (Const. "Dei Filius", c. 2), employed almost the very words used by St. Thomas in treating that subject in this work (I, cc. iv, v), and in the "Summa theologica" (I, Q. i, a. 1).

(6) Three works written by order of Urban IV (see Mandonnet, "Ecrits authentiques", p. 128).—(a) The "Opusculum contra errores Græcorum" refuted the errors of the Greeks on doctrines in dispute between them and the Roman Church, viz., the procession of the Holy Ghost from the Father and the Son, the primacy of the Roman pontiff, the Holy Eucharist, and purgatory. It was used against the Greeks with telling effect in the Council of Lyons

(1274) and in the Council of Florence (1493). In the range of human reasonings on deep subjects there can be found nothing to surpass the sublimity and depth of the argument adduced by St. Thomas to prove that the Holy Ghost proceeds from the Father and the Son (cf. Summa theol., I, Q. xxxvi, a. 2); but it must be borne in mind that our Faith is not based on that argument alone. (b) "Officium de festo Corporis Christi".—Mandonnet (Ecrits, p. 127) declares that it is now established beyond doubt that St. Thomas is the author of the beautiful Office of Corpus Christi, in which solid doctrine, tender piety, and enlightening Scriptural citations are combined, and expressed in language remarkably accurate, beautiful, chaste, and poetic. Here we find the well-known hymns, "Sacris Solemniis", "Pange Lingua" (concluding in the "Tantum Ergo"), "Verbum Supernum" (concluding with the "O Salutaris Hostia"), and, in the Mass, the beautiful sequence "Lauda Sion". In the responses of the office, St. Thomas places side by side words of the New Testament affirming the real presence of Christ in the Blessed Sacrament and texts from the Old Testament referring to the types and figures of the Eucharist (see Vaughan, op. cit., pp. 810 sqq.; Caswall, "Lyra Catholica", London, 1840; Guéranger, "The Liturgical Year; Feast of Corpus Christi"). Santeuil, a poet of the seventeenth century, said he would give all the verses he had written for the one stanza of the "Verbum Supernum": "Se nascens dedit socium, convescens in edulium: Se moriens in pretium, Se regnans dat in præmium"—"In birth, man's fellow-man was He, His meat, while sitting at the Board: He died his Ransomer to be, He reigns to be his Great Reward" (tr. by Marquis of Bute). Perhaps the gem of the whole office is the antiphon "O Sacrum Convivium" (cf. Conway, "St. Thomas Aquinas", London and New York, 1911, p. 61). (c) The "Catena Aurea", though not as original as his other writings, furnishes a striking proof of St. Thomas's prodigious memory and manifests an intimate acquaintance with the Fathers of the Church. The work contains a series of passages selected from the writings of the various Fathers, arranged in such order that the texts cited form a running commentary on the Gospels. The commentary on St. Matthew was dedicated to Urban IV. An English translation of the "Catena Aurea" was edited by John Henry Newman (4 vols., Oxford, 1841–1845; see Vaughan, op. cit., vol. II, pp. 529 sqq.).

(7) The "Summa theologica".—This work immortalized St. Thomas. The author himself modestly considered it simply a manual of Christian doctrine for the use of students. In reality it is a complete, scientifically arranged exposition of theology and at the same time a summary of Christian philosophy (see Summæ, Summulæ). In the brief prologue St. Thomas first calls attention to the difficulties experienced by students of sacred doctrine in his day, the causes assigned being: the multiplication of useless questions, articles, and arguments; the lack of scientific order; frequent repetitions, "which beget disgust and confusion in the minds of learners". Then he adds: "Wishing to avoid these and similar drawbacks, we shall endeavour, confiding in the Divine assistance, to treat of these things that pertain to sacred doctrine with brevity and clearness, in so far as the subject to be treated will permit." In the introductory question, "On Sacred Doctrine", he proves that, besides the knowledge which reason affords, Revelation also is necessary for salvation, first, because without it men could not know the supernatural end to which they must tend by their voluntary acts; secondly, because, without Revelation, even the truths concerning God which could be proved by reason would be known "only by a few, after a long time, and with the admixture of many errors". When revealed truths have been accepted, the mind of man proceeds to explain them and to draw conclusions from them. Hence results theology, which is a science, because it proceeds from principles that are certain (a. 2). The object, or subject, of this science is God; other things are treated in it only in so far as they relate to God (a. 7). Reason is used in theology not to prove the truths of faith, which are accepted on the authority of God, but to defend, explain, and develop the doctrines revealed (a. 8). He thus announces the division of the "Summa": "Since the chief aim of this sacred science is to give the knowledge of God, not only as He is in Himself, but also as He is the Beginning of all things, and the End of all, especially of rational creatures, we shall treat first of God; secondly, of the rational creature's advance towards God (*de motu creaturæ rationalis in Deum*); thirdly, of Christ, Who, as Man, is the way by which we tend to God." God in Himself, and as He is the Creator; God as the End of all things, especially of man; God as the Redeemer—these are the leading ideas, the great headings, under which all that pertains to theology is contained.

(a) Sub-divisions.—(i) The First Part is divided into three tracts: (α) On those things which pertain to the Essence of God; (β) On the distinction of Persons in God (the mystery of the Trinity); (γ) On the production of creatures by God and on the creatures produced. (ii) The Second Part, On God as He is in the End of man, is sometimes called the Moral Theology of St. Thomas, i. e., his treatise on the end of man and on human acts. It is subdivided into two parts, known as the First Section of the Second (I–II, or 1a 2æ) and the Second of the Second (II–II, or 2a 2æ). (α) The First of the Second.—The first five questions are devoted to proving that man's last end, his beatitude, consists in the possession of God. Man attains to that end or deviates from it by human acts, i. e. by free, deliberate acts. Of human acts he treats, first, in general (in all but the first five questions of the I–II), secondly, in particular (in the whole of the II–II). The treatise on human acts in general is divided into two parts: the first, on human acts in themselves; the other, on the principles or causes, extrinsic or intrinsic, of those acts. In these tracts, and in the Second of the Second, St. Thomas, following Aristotle, gives a perfect description and a wonderfully keen analysis of the movements of man's mind and heart. (β) The Second of the Second considers human acts, i. e., the virtues and vices, in particular. In it St. Thomas treats, first, of those things that pertain to all men, no matter what may be their station in life, and, secondly, of those things that pertain to some men only. Things that pertain to all men are reduced to seven headings: Faith, Hope, and Charity; Prudence, Justice, Fortitude, and Temperance. Under each title, in order to avoid repetitions, St. Thomas treats not only of the virtue itself, but also of the vices opposed to it, of the commandment to practise it, and of the gift of the Holy Ghost which corresponds to it. Things pertaining to some men only are reduced to three headings: the graces freely given (*gratiæ gratis datæ*) to certain individuals for the good of the Church, such as the gifts of tongues, of prophecy, of miracles; the active and the contemplative life; the particular states of life, and duties of those who are in different states, especially bishops and religious. (iii) The Third Part treats of Christ and of the benefits which He has conferred upon man, hence three tracts: On the Incarnation, and on what the Saviour did and suffered; On the Sacraments, which were instituted by Christ, and have their efficacy from His merits and sufferings; On Eternal Life, i. e., on the end of the world, the resurrection of bodies, judgment, the punishment of the wicked, the happiness of the just who, through Christ, attain to eternal life in heaven.

Eight years were given to the composition of this work, which was begun at Rome, where the First Part and the First of the Second were written (1265–69). The Second of the Second, begun in Rome, was completed in Paris (1271). In 1272 St. Thomas went to Naples, where the Third Part was written, down to the ninetieth question of the tract On Penance (see Leonine edition, I, p. xlii). The work has been completed by the addition of a supplement, drawn from other writings of St. Thomas, attributed by some to Peter of Auvergne, by others to Henry of Gorkum. These attributions are rejected by the editors of the Leonine edition (XI, pp. viii, xiv, xviii). Mandonnet (op. cit., 153) inclines to the very probable opinion that it was compiled by Father Reginald de Piperno, the saint's faithful companion and secretary. The entire "Summa" contains 38 Treatises, 612 Questions, subdivided into 3120 articles, in which about 10,000 objections are proposed and answered. So admirably is the promised order preserved that, by reference to the beginning of the Tracts and Questions, one can see at a glance what place it occupies in the general plan, which embraces all that can be known through theology of God, of man, and of their mutual relations (see accompanying chart, reproduced by permission of "The Rosary Magazine"). "The whole Summa is arranged on a uniform plan. Every subject is introduced as a question, and divided into articles. . . . Each article has also a uniform disposition of parts. The topic is introduced as an inquiry for discussion, under the term *Utrum*, whether—e. g. *Utrum Deus sit?* The objections against the proposed thesis are then stated. These are generally three or four in number, but sometimes extend to seven or more. The conclusion adopted is then introduced by the words, *Respondeo dicendum*. At the end of the thesis expounded the objections are answered, under the forms, *ad primum, ad secundum*, etc." (Eng. tr., see below). The "Summa" is Christian doctrine in scientific form; it is human reason rendering its highest service in defence and explanation of the truths of the Christian religion. It is the answer of the matured and saintly doctor to the question of his youth: What is God? Revelation, made known in the Scriptures and by tradition; reason and its best results; soundness and fulness of doctrine, order, conciseness and clearness of expression, effacement of self, the love of truth alone, hence a remarkable fairness towards adversaries and calmness in combating their errors; soberness and soundness of judgment, together with a charmingly tender and enlightened piety—these are all found in this "Summa" more than in his other writings, more than in the writings of his contemporaries, for "among the scholastic doctors, the chief and master of all, towers Thomas Aquinas, who, as Cajetan observes (In 2am 2æ, Q. 148, a. 4) 'because he most venerated the ancient doctors of the Church in a certain way seems to have inherited the intellect of all'" (Encyclical, "Æterni Patris", of Leo XIII).

(b) Editions and Translations.—It is impossible to mention the various editions of the "Summa", which has been in constant use for more than six hundred years. Very few books have been so often republished. The first complete edition, printed at Basle in 1485, was soon followed by others, e. g., at Venice in 1505, 1509, 1588, 1594; at Lyons in 1520, 1541, 1547, 1548, 1581, 1588, 1624, 1655; at Antwerp in 1575. These are enumerated by Touron (op. cit., p. 692), who says that about the same time other editions were published at Rome, Antwerp, Rouen, Paris, Douai, Cologne, Amsterdam, Bologna, etc. The editors of the Leonine edition deem worthy of mention those published at Paris in 1617, 1638, and 1648, at Lyons in 1663, 1677, and 1686, and a Roman edition of 1773 (IV, pp. xi, xii). Of all old editions they consider the most accurate two published at Padua, one in 1698, the other in 1712, and the Venice edition of 1755. Of recent editions the best are the following: the Leonine; the Migne editions (Paris, 1841, 1877); the first volume of the 1841 edition containing the "Libri quatuor sententiarum" of Peter Lombard; the very practical Faucher edition (5 vols. small quarto, Paris, 1887), dedicated to Cardinal Pecci, enriched with valuable notes; a Roman edition of 1894. The "Summa" has been translated into Greek and Armenian, and some parts have been translated into Chinese (see De Rubeis in Leonine ed., I, p. cxcvii; Echard, "Script. Ord. Præd.", I, p. 345; Touron, op. cit., VI, ix; Vaughan, op. cit. II, p. 167). In 1896 Father Joseph Rickaby, S.J., published "Aquinas Ethicus", a translation of the principal portion of the Second Part of the "Summa theologica". At the present time Father Thomas Pègues, O.P., is publishing a French translation of the whole "Summa" with commentaries, under the title "Commentaire français littéral de la Somme Théologique de S. Thomas d'Aquin". The five volumes which have appeared (Paris, 1907–10) bring the work down to the end of the First Part. (For reviews, see "Cath. University Bulletin", Jan., 1908; Jan., 1909; March, 1910; April, 1911.) For the English-speaking world "The Summa Theologica of St. Thomas Aquinas, literally translated by Fathers of the English Dominican Province," is being prepared. The first number (London and New York, 1911) contains the treatise on the Divine Essence (De Deo Uno, QQ. i–xxvi). Interesting introductory chapters treat of "The Scholastic Philosophy", "The Summa theologica", "The Method of St. Thomas", and "The Leonine Edition".

C. *Method and Style of St. Thomas.*—It is not possible to characterize the method of St. Thomas by one word, unless it can be called eclectic. It is Aristotelean, Platonic, and Socratic; it is inductive and deductive; it is analytic and synthetic. He chose the best that could be found in those who preceded him, carefully sifting the chaff from the wheat, approving what was true, rejecting the false. His powers of synthesis were extraordinary. No writer surpassed him in the faculty of expressing in a few well-chosen words the truth gathered from a multitude of varying and conflicting opinions; and in almost every instance the student sees the truth and is perfectly satisfied with St. Thomas's summary and statement. Not that he would have students swear by the words of a master. In philosophy, he says, arguments from authority are of secondary importance; philosophy does not consist in knowing what men have said, but in knowing the truth (In I lib. de Cœlo, lect. xxii; II Sent., D. xiv, a. 2, ad 1^{um}). He assigns its proper place to reason used in theology (see below: Influence of St. Thomas), but he keeps it within its own sphere. Against the Traditionalists the Holy See has declared that the method used by St. Thomas and St. Bonaventure does not lead to Rationalism (Denzinger-Bannwart, n. 1652). Not so bold or original in investigating nature as were Albertus Magnus and Roger Bacon, he was, nevertheless, abreast of his time in science, and many of his opinions are of scientific value in the twentieth century. Take, for instance, the following: "In the same plant there is the twofold virtue, active and passive, though sometimes the active is found in one and the passive in another, so that one plant is said to be masculine and the other feminine" (3 Sent., D. III, Q. ii, a 1.—For other examples see Conway, O.P., op. cit., pp. 73 sqq.; Walsh, "St. Thomas Aquinas", in "Rosary Magazine", May, 1911.).

The style of St. Thomas is a medium between the rough expressiveness of some Scholastics and the fastidious elegance of John of Salisbury; it is remarkable for accuracy, brevity, and completeness. Pope Innocent VI (quoted in the Encyclical, "Æterni Patris", of Leo XIII) declared that, with the excep-

A CHART OF THE SUMMA.

Part I

- **Sacred Doctrine.**—What it is and to what it extends.—All things are treated in it under the idea of God, either because they are God Himself or because they have relation to God .... 1. Sacred Doctrine........... Ques. i
- 1. GOD. *Threefold Consideration.*
  - 1st.—Concerning those things which pertain to the Divine essence........ 2. The One God.............. ii-xxvi
  - 2d.—Concerning those things which pertain to the distinction of persons........ 3. The Most Holy Trinity...... xxvii-xliii
  - Concerning those things which pertain to the 3d. PRODUCTION of CREATURES by GOD.
    - 1st.—The PRODUCTION of CREATURES........ 4. The Creation.............. xliv-xlix
    - 2d. The DISTINCTION of CREATURES.
      - 1st. The *distinction* of *things* in *general* .... 5. The Distinction of Things in General.............. xlvii
      - 2d. The *distinction* of *things* in *particular*.
        - (a) The distinction of *good* and *evil* .... 6. The Distinction of Good and Evil.............. xlviii-xlix
        - (b) The distinction of *corporeal* and *spiritual creatures*.
          - 1st. The *creature* purely *spiritual*...... 7. The Angels.............. l-lxiv
          - 2d. The *creature* purely *corporeal*...... 8. The Creature purely corporeal lxv-lxxiv
          - 3d. The *creature composed* of *body* and *spirit*, i. e., *man*........ 9. On Man.............. lxxv-cii
    - 3d. The PRESERVATION and GOVERNMENT of CREATURES........ 10. The Conservation and Government of Creatures...... ciii-cxix

Part II

2. The ADVANCE of the RATIONAL CREATURE to GOD.
Twofold Consideration: Those things should be considered by means of which man attains to or deviates from his end, *i. e.*, HUMAN ACTS. But because singular things are the objects of operations and acts, therefore every operative science is perfected by the consideration of things in particular. Therefore a moral consideration of human acts must be given:—

- I-II
  - THE END OF MAN........ 11. The End of Man and Beatitude.............. i-v
  - IN GENERAL.
    - 1st. The ACTS THEMSELVES. Some acts are peculiar to man; some are common to man and other living creatures; and since beatitude is the peculiar good of man inasmuch as he is rational, the acts which are peculiar to him have a more intimate connection to that good than those that are common to man and living creatures.
      - (a) Acts which are PECULIAR to MAN .... 12. Human Acts.............. vi-xxi
      - (b) Acts which are COMMON to MAN and other ANIMALS .... 13. The Passions.............. xxii-xlviii
    - 2d. The PRINCIPLES of ACTS.
      - (a) INTRINSIC PRINCIPLES. The intrinsic principles are POWERS of the soul and HABITS; but we have already treated of powers in the 1st part. Therefore we come to the consideration of HABITS:—
        - 1st. HABITS in GENERAL........ 14. Habits in General.............. xlix-liv
        - 2d. HABITS in PARTICULAR.
          - *Good* habits, *i.e.*, virtues .... 15. The Virtues.............. lv-lxx
          - *Evil* habits, *i.e.*, vices........ 16. On Vices and Sins.............. lxxi-lxxxix
      - (b) EXTRINSIC PRINCIPLES. The extrinsic principle of good is God, who instructs us by His *law*, and helps and moves us by *grace*. The external principle of evil is the DEVIL. But we treated of him in the 1st part, therefore it remains to treat of:—
        - 1st. *Laws*........ 17. On Laws.............. xc-cviii
        - 2d. *Grace*........ 18. On Grace.............. cix-cxiv
- II-II
  - IN PARTICULAR.
    - Those ACTS which pertain to ALL CONDITIONS of life (the virtues and vices affecting all men.)
      - (a) THEOLOGICAL VIRTUES.
        - (a) In the *intellect*.—*Faith*........ 19. Faith.............. i-xvi
        - (b) In the *will*
          - *Hope*........ 20. Hope.............. xvii-xxii
          - *Charity*........ 21. Charity.............. xxiii-xlvi
      - (b) CARDINAL VIRTUES.
        - *Prudence*........ 22. Prudence.............. xlvii-lvi
        - *Justice*........ 23. Justice.............. lvii-cxxii
        - *Fortitude*........ 24. Fortitude.............. cxxiii-cxl
        - *Temperance*........ 25. Temperance.............. cxli-clxx
    - 2d. ACTS which pertain in a SPECIAL MANNER to SOME men.
      - (*a*) *Graces gratuitously given* (gratiæ gratis datæ)........ 26. Graces Gratuitously Given... clxxi-clxxviii
      - (*b*) *Active* and *contemplative life*........ 27. The Active and Contemplative Life.............. clxxix-clxxxii
      - (*c*) The various *offices* and *conditions* of *men*........ 28. The Various Offices and Conditions of Men..........clxxxiii-clxxxix

Part III

3. CHRIST.
Since our Lord and Saviour Jesus Christ, redeeming His people from their sins, has shown to us in Himself the way of truth, by which we, arising from the dead, are able to arrive at the happiness of immortal life, it is necessary, in order to attain the scope of all theology, after the consideration of the final end of man and of the virtues and vices, that we should consider the Saviour of all and the benefits He has conferred on us. Therefore we should consider:—

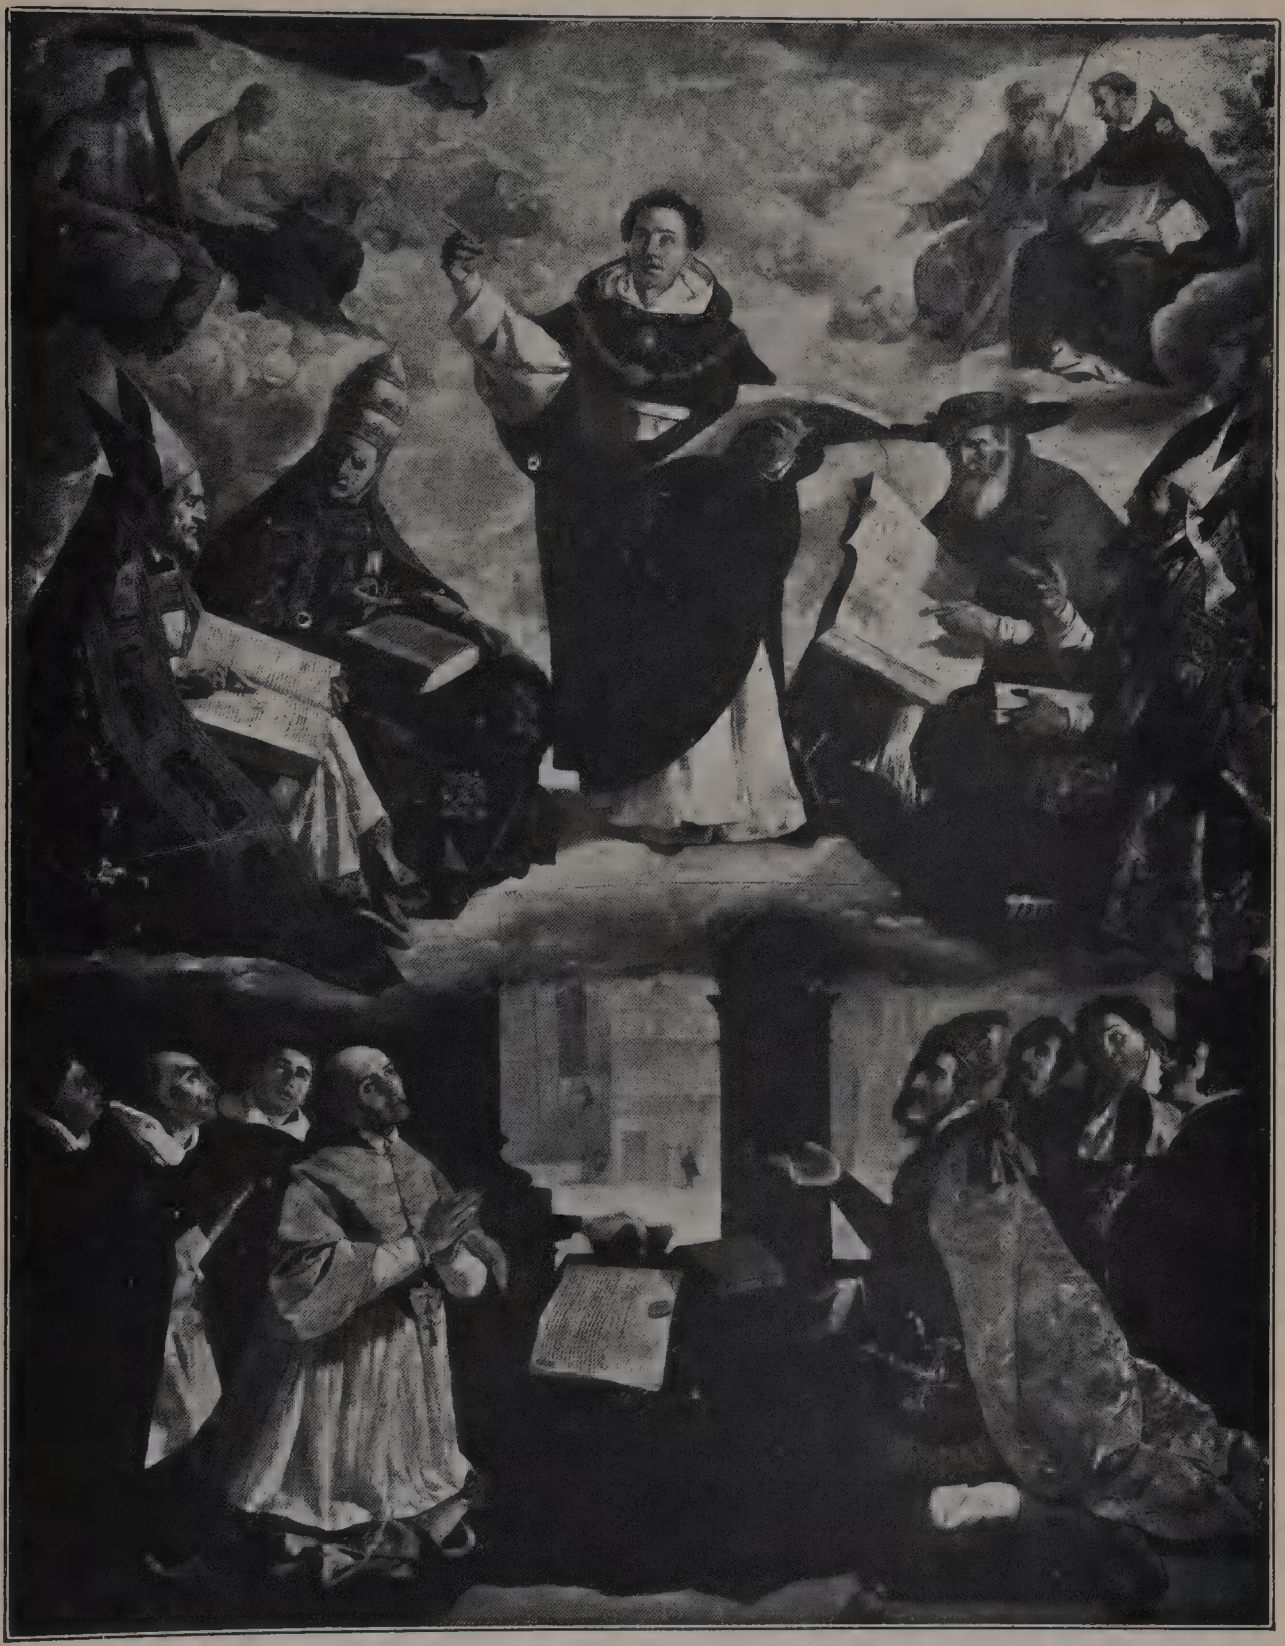
- 1st. The SAVIOUR HIMSELF, *i. e.*, the mystery of the Incarnation, what He did and suffered........ 29. The Incarnation.............. i-lix
- 2d. The SACRAMENTS, which have their efficacy from the Incarnate Word.
  - (a) In GENERAL........ 30. The Sacraments in General... lx-lxv
  - (b) In PARTICULAR.
    - *Baptism*........ 31. Baptism.............. lxvi-lxxi
    - *Confirmation*........ 32. Confirmation.............. lxxii
    - *Eucharist*........ 33. Eucharist.............. lxxiii-lxxxiii
    - *Penance*........ 34. Penance, Qu. lxxxiv-xc. Supplement.............. i-xxviii
    - *Extreme Unction*........ 35. Extreme Unction.............. xxix-xxxiii
    - *Orders*........ 36. Orders.............. xxxiv-xl
    - *Matrimony*........ 37. Matrimony.............. xli-lxvii
- 3d. IMMORTAL LIFE—the end to which we attain through Christ, both God and man, suffering, dying, and rising from the dead........ 38. The Resurrection and Four Last Things.............. lxviii-cxix

tion of the canonical writings, the works of St. Thomas surpass all others in "accuracy of expression and truth of statement" (habet proprietatem verborum, modum dicendorum, veritatem sententiarum). Great orators, such as Bossuet, Lacordaire, Monsabré, have studied his style, and have been influenced by it, but they could not reproduce it. The same is true of theological writers. Cajetan knew St. Thomas's style better than any of his disciples, but Cajetan is beneath his great master in clearness and accuracy of expression, in soberness and solidity of judgment. St. Thomas did not attain to this perfection without an effort. He was a singularly blessed genius, but he was also an indefatigable worker, and by continued application he reached that stage of perfection in the art of writing where the art disappears. "The author's manuscript of the Summa Contra Gentiles is still in great part extant. It is now in the Vatican Library. The manuscript consists of strips of parchment, of various shades of colour, contained in an old parchment cover to which they were originally stitched. The writing is in double column, and difficult to decipher, abounding in abbreviations, often passing into a kind of shorthand. Throughout many passages a line is drawn in sign of erasure" (Rickaby, op. cit., preface: see Ucelli ed., "Sum. cont. gent.", Rome, 1878).

III. Influences exerted on St. Thomas.—How was this great genius formed? The causes that exerted an influence on St. Thomas were of two kinds, natural and supernatural.

A. *Natural Causes.*—(1) As a foundation, he "was a witty child, and had received a good soul" (Wis., viii, 19). From the beginning he manifested precocious and extraordinary talent and thoughtfulness beyond his years. (2) His education was such that great things might have been expected of him. His training at Monte Cassino, at Naples, Paris, and Cologne was the best that the thirteenth century could give, and that century was the golden age of education. That it afforded excellent opportunities for forming great philosophers and theologians is evident from the character of St. Thomas's contemporaries. Alexander of Hales, Albertus Magnus, St. Bonaventure, St. Raymond of Pennafort, Roger Bacon, Hugo a S. Charo, Vincent of Beauvais, not to mention scores of others, prove beyond all doubt that those were days of really great scholars. (See Walsh, "The Thirteenth Greatest of Centuries", New York, 1907.) The men who trained St. Thomas were his teachers at Monte Cassino and Naples, but above all Albertus Magnus, under whom he studied at Paris and Cologne. (3) The books that exercised the greatest influence on his mind were the Bible, the Decrees of the councils and of the popes, the works of the Fathers, Greek and Latin, especially of St. Augustine, the "Sentences" of Peter Lombard, the writings of the philosophers, especially of Plato, Aristotle, and Boethius. If from these authors any were to be selected for special mention, undoubtedly they would be Aristotle, St. Augustine, and Peter Lombard. In another sense the writings of St. Thomas were influenced by Averroes, the chief opponent whom he had to combat in order to defend and make known the true Aristotle. (4) It must be borne in mind that St. Thomas was blessed with a retentive memory and great powers of penetration. Father Daniel d'Agusta once pressed him to say what he considered the greatest grace he had ever received, sanctifying grace of course excepted. "I think that of having understood whatever I have read", was the reply. St. Antoninus declared that "he remembered everything he had read, so that his mind was like a huge library" (cf. Drane, op. cit., p. 427; Vaughan, op. cit., II, p. 567). The bare enumeration of the texts of Scripture cited in the "Summa theologica" fills eighty small-print columns in the Migne edition, and by many it is not unreasonably supposed that he learned the Sacred Books by heart while he was imprisoned in the Castle of San Giovanni. Like St. Dominic he had a special love for the Epistles of St. Paul, on which he wrote commentaries (recent edition in 2 vols., Turin, 1891). (5) Deep reverence for the Faith, as made known by tradition, characterizes all his writings. The *consuetudo ecclesiæ*—the practice of the Church—should prevail over the authority of any doctor (II–II, Q. x. a. 12). In the "Summa" he quotes from 19 councils, 41 popes, and 52 Fathers of the Church. A slight acquaintance with his writings will show that among the Fathers his favourite was St. Augustine (on the Greek Fathers see Vaughan, op. cit., II, cc. iii sqq.). (6) With St. Augustine (II De doctr. Christ., c. xl), St. Thomas held that whatever there was of truth in the writings of pagan philosophers should be taken from them, as from "unjust possessors", and adapted to the teaching of the true religion (Sum. theol., I, Q. lxxxiv, a. 5). In the "Summa" alone he quotes from the writings of 46 philosophers and poets, his favourite authors being Aristotle, Plato, and, among Christian writers, Boethius. From Aristotle he learned that love of order and accuracy of expression which are characteristic of his own works. From Boethius he learned that Aristotle's works could be used without detriment to Christianity. He did not follow Boethius in his vain attempt to reconcile Plato and Aristotle. In general the Stagirite was his master, but the elevation and grandeur of St. Thomas's conceptions and the majestic dignity of his methods of treatment speak strongly of the sublime Plato (see Vaughan, op. cit., II, pp. 49, 627 sqq.; Huit, "Le Platonisme au treizième siècle" in "Annales de Philos. Chrétienne", Feb., 1890; "Les éléments Platoniciens de la doctrine de St Thomas" in "Revue Thomiste", Nov.–Dec., 1911).

B. *Supernatural Causes.*—Even if we do not accept as literally true the declaration of John XXII, that St. Thomas wrought as many miracles as there are articles in the "Summa", we must, nevertheless, go beyond causes merely natural in attempting to explain his extraordinary career and wonderful writings. (1) Purity of mind and body contributes in no small degree to clearness of vision (see St. Thomas, "Commentaries on I Cor., c. vii", Lesson v). By the gift of purity, miraculously granted at the time of the mystic girdling, God made Thomas's life angelic; the perspicacity and depth of his intellect, Divine grace aiding, made him the "Angelic Doctor". (2) The spirit of prayer, his great piety and devotion, drew down blessings on his studies. Explaining why he read, every day, portions of the "Conferences" of Cassian, he said: "In such reading I find devotion, whence I readily ascend to contemplation" (Prümmer, op. cit., p. 32). In the lessons of the Breviary read on his feast day it is explicitly stated that he never began to study without first invoking the assistance of God in prayer; and when he wrestled with obscure passages of the Scriptures, to prayer he added fasting. (3) Facts narrated by persons who either knew St. Thomas in life or wrote at about the time of his canonization prove that he received assistance from heaven. To Father Reginald he declared that he had learned more in prayer and contemplation than he had acquired from men or books (Prümmer, op. cit., p. 36). These same authors tell of mysterious visitors who came to encourage and enlighten him. The Blessed Virgin appeared, to assure him that his life and his writings were acceptable to God, and that he would persevere in his holy vocation. Sts. Peter and Paul came to aid him in interpreting an obscure passage in Isaias. When humility caused him to consider himself unworthy of the doctorate, a venerable religious of his order (supposed to be St. Dominic) appeared to encourage him and suggested the text for his opening discourse (Prümmer, op. cit., 29, 37; Tocco in "Acta



ST. THOMAS AQUINAS AMONG THE DOCTORS OF THE CHURCH
FRANCISCO ZURBARAN, THE MUSEUM, SEVILLE.

SS.", VII Mar.; Vaughan, op. cit., II, 91). His ecstasies have been mentioned. His abstractions in presence of King Louis IX (St. Louis) and of distinguished visitors are related by all biographers. Hence, even if allowance be made for great enthusiasm on the part of his admirers, we must conclude that his extraordinary learning cannot be attributed to merely natural causes. Of him it may truly be said that he laboured as if all depended on his own efforts and prayed as if all depended on God.

IV. Influence of St. Thomas.—A. *Influence on Sanctity.*—The great Scholastics were holy as well as learned men. Alexander of Hales, Blessed Albertus Magnus, St. Thomas, and St. Bonaventure prove that learning does not necessarily dry up devotion. The angelic Thomas and the seraphic Bonaventure represent the highest types of Christian scholarship, combining eminent learning with heroic sanctity. Cardinal Bessarion called St. Thomas "the most saintly of learned men and the most learned of saints". His works breathe the spirit of God, a tender and enlightened piety, built on a solid foundation, viz. the knowledge of God, of Christ, of man. The "Summa theologica" may be made a manual of piety as well as a text-book for the study of theology (cf. Drane, op. cit., p. 446). St. Francis de Sales, St. Philip Neri, St. Charles Borromeo, St. Vincent Ferrer, St. Pius V, St. Antoninus constantly studied St. Thomas. Nothing could be more inspiring than his treatises on Christ, in His sacred Person, in His life and sufferings. His treatise on the sacraments, especially on penance and the Eucharist, would melt even hardened hearts. He takes pains to explain the various ceremonies of the Mass ("De ritu Eucharistiæ" in "Sum. theol.", III, Q. lxxxiii, and no writer has explained more clearly than St. Thomas the effects produced in the souls of men by this heavenly Bread (ibid., Q. lxxix). The principles recently urged, in regard to frequent Communion, by Pius X ("Sacra Trid. Synodus", 1905) are found in St. Thomas (Q. lxxix, a. 8, Q. lxxx, a. 10), although he is not so explicit on this point as he is on the Communion of children. In the Decree "Quam Singulari" (1910) the pope cites St. Thomas, who teaches that, when children begin to have some use of reason, so that they can conceive some devotion to the Blessed Sacrament, they may be allowed to communicate (Q. lxxx, a. 9, ad 3^{um}). The spiritual and devotional aspects of St. Thomas's theology have been pointed out by Father Contenson, O.P., in his "Theologia mentis et cordis". They are more fully explained by Father Vallgornera, O.P., in his "Theologia Mystica D. Thomæ", wherein the author leads the soul to God through the purgative, illuminative, and unitive ways. The Encyclical Letter of Leo XIII on the Holy Spirit is drawn largely from St. Thomas, and those who have studied the "Prima Secundæ" and the "Secunda Secundæ" know how admirably the saint explains the gifts and fruits of the Holy Ghost, as well as the Beatitudes, and their relations to the different virtues (see Froget, O.P. "De L'habitation du Saint Esprit dans les âmes justes, d'après la doctrine de S. Thomas d'Aquin", Paris, 1898). Nearly all good spiritual writers seek in St. Thomas definitions of the virtues which they recommend. Recently his minor works on the religious life have been translated into English ("An Apology for the Religious Orders", by St. Thomas Aquinas, St. Louis, 1902; "The Religious State", "The Episcopate", "The Priestly Office", by St. Thomas, St. Louis, 1902).

B. *Influence on Intellectual Life.*—Since the days of Aristotle, probably no one man has exercised such a powerful influence on the thinking world as did St. Thomas. His authority was very great during his lifetime. The popes, the universities, the *studia* of his order were anxious to profit by his learning and prudence. Several of his important works were written at the request of others, and his opinion was sought by all classes. On several occasions the doctors of Paris referred their disputes to him and gratefully abided by his decision (Vaughan, op. cit., II, p. 544). His principles, made known by his writings, have continued to influence men even to this day. This subject cannot be considered in all its aspects, nor is that necessary. His influence on matters purely philosophical is fully explained in histories of philosophy (see e. g. Gonzalez, O.P., "Hist. de la philosophie", II, Paris, 1890; Turner, op. cit., pp. 343 sqq.; Vallet, C.S.S., "Hist. de la phil.", Paris, 1886; Jourdain, "La Philosophie de S. Thomas d'Aquin", 2 vols., Paris, 1858; Hauréau, "Hist. de la Phil. scolastique", Paris, 1872–80; Ueberweg, "Hist. of Philosophy", 2 vols., New York, 1903, I, pp. 443 sqq.). (Theologians who followed St. Thomas will be mentioned in Thomism. See also Preachers, Order of.—II, A, 2, d.) His paramount importance and influence may be explained by considering him as the Christian Aristotle, combining in his person the best that the world has known in philosophy and theology. It is in this light that he is proposed as a model by Leo XIII in the famous Encyclical "Æterni Patris". The work of his life may be summed up in two propositions: he established the true relations between faith and reason; he systematized theology.

(1) Faith and Reason.—The principles of St. Thomas on the relations between faith and reason were solemnly proclaimed in the Vatican Council. The second, third, and fourth chapters of the Constitution "Dei Filius" read like pages taken from the works of the Angelic Doctor. First, reason alone is not sufficient to guide men: they need Revelation; we must carefully distinguish the truths known by reason from higher truths (mysteries) known by Revelation. Secondly, reason and Revelation, though distinct, are not opposed to each other. Thirdly, faith preserves reason from error; reason should do service in the cause of faith. Fourthly, this service is rendered in three ways: (a) reason should prepare the minds of men to receive the Faith by proving the truths which faith presupposes (*præambula fidei*); (b) reason should explain and develop the truths of Faith and should propose them in scientific form; (c) reason should defend the truths revealed by Almighty God. This is a development of St. Augustine's famous saying (De Trin., XIV, c. i), that the right use of reason is "that by which the most wholesome faith is begotten . . . is nourished, defended, and made strong". These principles are proposed by St. Thomas in many places, especially in the following: "In Boethium, de Trin. Proem.", Q. ii, a. 1; "Sum. cont. gent.", I, cc. iii–ix; "Summa", I, Q. i, aa. 1, 5, 8; Q. xxxii, a. 1; Q. lxxxiv, a. 5 (cf. Vaughan, op. cit., cc. viii, ix, x; Manning, "The Vatican Council and Its Definitions", New York, 1905, pp. 206 sqq.). St. Thomas's services to the Faith are thus summed up by Leo XIII in the Encyclical "Æterni Patris": "He won this title of distinction for himself: that single-handed he victoriously combated the errors of former times. and supplied invincible arms to put to rout those which might in after times spring up. Again, clearly distinguishing, as is fitting, reason and faith, he both preserved and had regard for the rights of each; so much so, indeed, that reason, borne on the wings of Thomas, can scarcely rise higher, while faith could scarcely expect more or stronger aids from reason than those which she has already obtained through Thomas." St. Thomas did not combat imaginary foes; he attacked living adversaries. The works of Aristotle had been introduced into France in faulty translations and with the misleading commentaries of Jewish and Moorish philosophers. This gave rise to a flood of errors which so alarmed the authorities that the reading of Aristotle's Physics and Metaphysics was forbidden by Robert de Courçon in 1210,

the decree being moderated by Gregory IX in 1231. There crept into the University of Paris an insidious spirit of irreverence and Rationalism, represented especially by Abelard and Raymond Lullus, which claimed that reason could know and prove all things, even the mysteries of Faith. Under the authority of Averroes dangerous doctrines were propagated, especially two very pernicious errors: first, that philosophy and religion being in different regions, what is true in religion might be false in philosophy; secondly, that all men have but one soul. Averroes was commonly styled "The Commentator", but St. Thomas says he was "not so much a Peripatetic as a corruptor of Peripatetic philosophy" (Opusc. de unit. intell.). Applying a principle of St. Augustine (see I, Q. lxxxiv, a. 5), following in the footsteps of Alexander of Hales and Albertus Magnus, St. Thomas resolved to take what was true from the "unjust possessors", in order to press it into the service of revealed religion. Objections to Aristotle would cease if the true Aristotle were made known; hence his first care was to obtain a new translation of the works of the great philosopher (see A. Jourdain, "Recherches critiques sur l'âge et l'origine des traductions latines d'Aristote", Paris, 1819, 1843: Ueberweg, op. cit., I, p. 430; Barthélemy Saint-Hilaire). Aristotle was to be purified; false commentators were to be refuted; the most influential of these was Averroes, hence St. Thomas is continually rejecting his false interpretations.

(2) Theology Systematized.—The next step was to press reason into the service of the Faith, by putting Christian doctrine into scientific form. Scholasticism does not consist, as some persons imagine, in useless discussions and subtleties, but in this, that it expresses sound doctrine in language which is accurate, clear, and concise. In the Encyclical "Æterni Patris" Leo XIII, citing the words of Sixtus V (Bull "Triumphantis", 1588), declares that to the right use of philosophy we are indebted for "those noble endowments which make Scholastic theology so formidable to the enemies of truth", because "that ready coherence of cause and effect, that order and array of a disciplined army in battle, those clear definitions and distinctions, that strength of argument and those keen discussions by which light is distinguished from darkness, the true from the false, expose and lay bare, as it were, the falsehoods of heretics wrapped around by a cloud of subterfuges and fallacies". When the great Scholastics had written, there was light where there had been darkness, there was order where confusion had prevailed. The work of St. Anselm and of Peter Lombard was perfected by the Scholastic theologians. Since their days no substantial improvements have been made in the plan and system of theology, although the field of apologetics has been widened, and positive theology has become more important.

C. *St. Thomas's Doctrine Followed.*—Within a short time after his death the writings of St. Thomas were universally esteemed. The Dominicans naturally took the lead in following St. Thomas. The general chapter held in Paris in 1279 pronounced severe penalties against all who dared to speak irreverently of him or of his writings. The chapters held in Paris in 1286, at Bordeaux in 1287, and at Lucca in 1288 expressly required the brethren to follow the doctrine of Thomas, who at that time had not been canonized (Const. Ord. Præd., n. 1130). The University of Paris, on the occasion of Thomas's death, sent an official letter of condolence to the general chapter of the Dominicans, declaring that, equally with his brethren, the university experienced sorrow at the loss of one who was their own by many titles (see text of letter in Vaughan, op. cit., II, p. 82). In the Encyclical "Æterni Patris" Leo XIII mentions the Universities of Paris, Salamanca, Alcalá, Douai, Toulouse, Louvain, Padua, Bologna, Naples, and Coimbra as "the homes of human wisdom where Thomas reigned supreme, and the minds of all, of teachers as well as of taught, rested in wonderful harmony under the shield and authority of the Angelic Doctor". To the list may be added Lima and Manila, Fribourg and Washington. Seminaries and colleges followed the lead of the universities. The "Summa" gradually supplanted the "Sentences" as the textbook of theology. Minds were formed in accordance with the principles of St. Thomas; he became the great master, exercising a world-wide influence on the opinions of men and on their writings; for even those who did not adopt all of his conclusions were obliged to give due consideration to his opinions. It has been estimated that 6000 commentaries on St. Thomas's works have been written. Manuals of theology and of philosophy, composed with the intention of imparting his teaching, translations, and studies, or digests (*études*), of portions of his works have been published in profusion during the last six hundred years and to-day his name is in honour all over the world (see THOMISM). In every one of the general councils held since his death St. Thomas has been singularly honoured. At the Council of Lyons his book "Contra errores Græcorum" was used with telling effect against the Greeks. In later disputes, before and during the Council of Florence, John of Montenegro, the champion of Latin orthodoxy, found St. Thomas's works a source of irrefragable arguments. The "Decretum pro Armenis" (Instruction for the Armenians), issued by the authority of that council, is taken almost verbatim from his treatise, "De fidei articulis et septem sacramentis" (see Denzinger-Bannwart, n. 695). "In the Councils of Lyons, Vienne, Florence, and the Vatican", writes Leo XIII (Encyclical "Æterni Patris"), "one might almost say that Thomas took part in and presided over the deliberations and decrees of the Fathers, contending against the errors of the Greeks, of heretics, and Rationalists, with invincible force and with the happiest results. But the chief and special glory of Thomas, one which he has shared with none of the Catholic doctors, is that the Fathers of Trent made it part of the order of the conclave to lay upon the altar, together with the code of Sacred Scripture and the decrees of the Supreme Pontiffs, the Summa of Thomas Aquinas, whence to seek counsel, reason, and inspiration." Greater influence than this no man could have.

Before this section is closed mention should be made of two books widely known and highly esteemed, which were inspired by and drawn from the writings of St. Thomas. The Catechism of the Council of Trent, composed by disciples of the Angelic Doctor, is in reality a compendium of his theology, in convenient form for the use of parish priests. Dante's "Divina Commedia" has been called "the Summa of St. Thomas in verse", and commentators trace the great Florentine poet's divisions and descriptions of the virtues and vices to the "Secunda Secundæ" (see Berthier, O.P., "La divina commedia con commenti secondo la scholastica", Turin, 1893; Ozanam, "Dante et la philosophie au treizième siècle", Paris, 1845, p. 319; Jourdain, op. cit., II, p. 128).

D. *Appreciation of St. Thomas.*—(1) In the Church. —The esteem in which he was held during his life has not been diminished, but rather increased, in the course of the six centuries that have elapsed since his death. The position which he occupies in the Church is well explained by that great scholar Leo XIII, in the Encyclical "Æterni Patris", recommending the study of Scholastic philosophy: "It is known that nearly all the founders and framers of laws of religious orders commanded their societies to study and religiously adhere to the teachings of St. Thomas. . . . To say nothing of the family of St. Dominic, which rightly claims this great teacher for its own glory, the statutes of the Benedictines, the Carmelites, the

Augustinians, the Society of Jesus, and many others, all testify that they are bound by this law." Amongst the "many others" the Servites, the Passionists, the Barnabites, and the Sulpicians have been devoted in an especial manner to the study of St. Thomas. (See Berthier, "L'Etude de la Somme Théologique de S. Thomas d'Aquin", Paris, 1905, pp. 18 sqq.; Goudin, O.P., "Phil. D. Thomæ", Paris, 1886, introd. a 3; Touron, op. cit., V, cc. xi, xii.) The principal ancient universities where St. Thomas ruled as the great master have been enumerated above. The Paris doctors called him the morning star, the luminous sun, the light of the whole Church. Stephen, Bishop of Paris, repressing those who dared to attack the doctrine of "that most excellent Doctor, the blessed Thomas", calls him "the great luminary of the Catholic Church, the precious stone of the priesthood, the flower of doctors, and the bright mirror of the University of Paris" (Drane, op. cit., p. 431). In the old Louvain University the doctors were required to uncover and bow their heads when they pronounced the name of Thomas (Goudin, op. cit., p. 21). (On the universities, see Touron, op. cit., 1. V, cc. IX, X; Echard, op. cit., I, 435, pp. 15 sqq.; cf. also THOMISM.)

"The œcumenical councils, where blossoms the flower of all earthly wisdom, have always been careful to hold Thomas Aquinas in singular honour" (Leo XIII in "Æt. Patris"). This subject has been sufficiently treated above. The "Bullarium Ordinis Prædicatorum", published in 1729–39, gives thirty-eight Bulls in which eighteen sovereign pontiffs praised and recommended the doctrine of St. Thomas (see also Vaughan, op. cit., II, c. ii; Berthier, op. cit., pp. 7 sqq.). These approbations are recalled and renewed by Leo XIII, who lays special stress on "the crowning testimony of Innocent VI: 'His teaching above that of others, the canons alone excepted, enjoys such an elegance of phraseology, a method of statement, a truth of proposition, that those who hold it are never found swerving from the path of truth, and he who dare assail it will always be suspected of error'" (ibid.). Leo XIII surpassed his predecessors in admiration of St. Thomas, in whose works he declared a remedy can be found for many evils that afflict society (see Berthier, op. cit., introd.). The notable Encyclical Letters with which the name of that illustrious pontiff will always be associated show how he had studied the works of the Angelic Doctor. This is very noticeable in the letters on Christian marriage, the Christian constitution of states, the condition of the working classes, and the study of Holy Scripture. Pope Pius X, in several Letters, e. g. in the "Pascendi Dominici Gregis" (Sept., 1907), has insisted on the observance of the recommendations of Leo XIII concerning the study of St. Thomas. An attempt to give names of Catholic writers who have expressed their appreciation of St. Thomas and of his influence would be an impossible undertaking; for the list would include nearly all who have written on philosophy or theology since the thirteenth century, as well as hundreds of writers on other subjects. Commendations and eulogies are found in the introductory chapters of all good commentaries. An incomplete list of authors who have collected these testimonies is given by Father Berthier (op. cit., p. 22). Other names will be given in bibliography. (See THOMISTS.)

(2) Outside the Church.—(a) Anti-Scholastics.—Some persons have been and are still opposed to everything that comes under the name of Scholasticism, which they hold to be synonymous with subtleties and useless discussions. From the prologue to the "Summa": it is clear that St. Thomas was opposed to all that was superfluous and confusing in Scholastic studies. When people understand what true Scholasticism means, their objections will cease (see De Wulf, "Scholasticism Old and New", New York, 1907; Perrier, "The Revival of Scholastic Philosophy", New York, 1909; and especially the Encyclical "Æterni Patris"). (b) Heretics and Schismatics.—"A last triumph was reserved for this incomparable man—namely, to compel the homage, praise, and admiration of even the very enemies of the Catholic name" (Leo XIII, ibid.). St. Thomas's orthodoxy drew upon him the hatred of all Greeks who were opposed to union with Rome. The united Greeks, however, admire St. Thomas and study his works (see above, translations of the "Summa"). The leaders of the sixteenth-century revolt honoured St. Thomas by attacking him, Luther being particularly violent in his coarse invectives against the great doctor. Citing Bucer's wild boast, "Take away Thomas and I will destroy the Church", Leo XIII (ibid.) remarks, "The hope was vain, but the testimony has its value". Calo, Tocco, and other biographers relate that St. Thomas, travelling from Rome to Naples, converted two celebrated Jewish rabbis, whom he met at the country house of Cardinal Richard (Prümmer, op. cit., p. 33; Vaughan, op. cit., II, p. 795). Rabbi Paul of Burgos, in the fifteenth century, was converted by reading the works of St. Thomas. Theobald Thamer, a disciple of Melancthon, abjured his heresy after he had read the "Summa", which he intended to refute. The Calvinist Duperron was converted in the same way, subsequently becoming Archbishop of Sens and a cardinal (see Conway, O.P., op. cit., p. 96). After the bitterness of the first period of Protestantism had passed away, Protestants saw the necessity of retaining many parts of Catholic philosophy and theology, and those who came to know St. Thomas were compelled to admire him. Ueberweg says "He brought the Scholastic philosophy to its highest stage of development, by effecting the most perfect accommodation that was possible of the Aristotelian philosophy to ecclesiastical orthodoxy" (op. cit., p. 440). R. Seeberg in the "New Schaff-Herzog Religious Encyclopedia" (New York, 1911) devotes ten columns to St. Thomas, and says that "at all points he succeeded in upholding the church doctrine as credible and reasonable" (XI, p. 427). For many years, especially since the days of Pusey and Newman, St. Thomas has been in high repute at Oxford. Recently the "Summa contra gentiles" was placed on the list of subjects which a candidate may offer in the final honour schools of *Litteræ Humaniores* at that university (cf. Walsh, op. cit., c. xvii). For several years Father De Groot, O.P., has been the professor of Scholastic philosophy in the University of Amsterdam, and courses in Scholastic philosophy have been established in some of the leading non-Catholic universities of the United States. Anglicans have a deep admiration for St. Thomas. Alfred Mortimer, in the chapter "The Study of Theology" of his work entitled "Catholic Faith and Practice" (2 vols., New York, 1909), regretting that "the English priest has ordinarily no scientific acquaintance with the Queen of Sciences", and proposing a remedy, says, "The simplest and most perfect sketch of universal theology is to be found in the Summa of St. Thomas" (vol. II, pp. 454, 465).

V. ST. THOMAS AND MODERN THOUGHT.—In the Syllabus of 1864 Pius IX condemned a proposition in which it was stated that the method and principles of the ancient Scholastic doctors were not suited to the needs of our times and the progress of science (Denzinger-Bannwart, n. 1713). In the Encyclical "Æterni Patris" Leo XIII points out the benefits to be derived from "a practical reform of philosophy by restoring the renowned teaching of St. Thomas Aquinas". He exhorts the bishops to "restore the golden wisdom of Thomas and to spread it far and wide for the defence and beauty of the Catholic Faith, for the good of society, and for the advantage of all the sciences". In the pages of the Encyclical immediately preceding these words he explains why the teaching of St. Thomas would produce such most desirable results: St. Thomas is the great master to explain and defend the Faith, for his is "the solid doctrine of the Fathers and the Scholastics, who so clearly and forcibly demonstrate the firm foundations of the Faith, its Divine origin, its certain truth, the arguments that sustain it, the benefits it has conferred on the human race, and its perfect accord with reason, in a manner to satisfy completely minds open to persuasion, however unwilling and repugnant". The career of St. Thomas would in itself have justified Leo XIII in assuring men of the nineteenth century that the Catholic Church was not opposed to the right use of reason. The sociological aspects of St. Thomas are also pointed out: "The teachings of Thomas on the true meaning of liberty, which at this time is running into license, on the Divine origin of all authority, on laws and their force, on the paternal and just rule of princes, on obedience to the highest powers, on mutual charity one towards another—on all of these and kindred subjects, have very great and invincible force to overturn those principles of the new order which are well known to be dangerous to the peaceful order of things and to public safety" (ibid.). The evils affecting modern society had been pointed out by the pope in the Letter "Inscrutabili" of 21 April, 1878, and in the one on Socialism, Communism, and Nihilism ("The Great Encyclicals of Leo XIII", pp. 9 sqq.; 22 sqq.). How the principles of the Angelic Doctor will furnish a remedy for these evils is explained here in a general way, more particularly in the Letters on the Christian constitution of states, human liberty, the chief duties of Christians as citizens, and on the conditions of the working classes (ibid., pp. 107, 135, 180, 208).

It is in relation to the sciences that some persons doubt the availability of St. Thomas's writings; and the doubters are thinking of the physical and experimental sciences, for in metaphysics the scholastics are admitted to be masters. Leo XIII calls attention to the following truths: (a) The Scholastics were not opposed to investigation. Holding as a principle in anthropology "that the human intelligence is only led to the knowledge of things without body and matter by things sensible, they well understood that nothing was of greater use to the philosopher than diligently to search into the mysteries of nature, and to be earnest and constant in the study of physical things" (ibid., p. 55). This principle was reduced to practice: St. Thomas, Blessed Albertus Magnus, Roger Bacon, and others "gave large attention to the knowledge of natural things" (ibid., p. 56). (b) Investigation alone is not sufficient for true science. "When facts have been established, it is necessary to rise and apply ourselves to the study of the nature of corporeal things, to inquire into the laws which govern them and the principles whence their order and varied unity and mutual attraction in diversity arise" (p. 55). Will the scientists of to-day pretend to be better reasoners than St. Thomas, or more powerful in synthesis? It is the method and the principles of St. Thomas that Leo XIII recommends: "If anything is taken up with too great subtlety by the scholastic doctors, or too carelessly stated; if there be anything that ill agrees with the discoveries of a later age or, in a word, is improbable in any way, it does not enter into our mind to propose that for imitation to our age" (p. 56). Just as St. Thomas, in his day, saw a movement towards Aristotle and philosophical studies which could not be checked, but could be guided in the right direction and made to serve the cause of truth, so also, Leo XIII, seeing in the world of his time a spirit of study and investigation which might be productive of evil or of good, had no desire to check it, but resolved to propose a moderator and master who could guide it in the paths of truth.

No better guide could have been chosen than the clear-minded, analytic, synthetic, and sympathetic Thomas Aquinas. His extraordinary patience and fairness in dealing with erring philosophers, his approbation of all that was true in their writings, his gentleness in condemning what was false, his clear-sightedness in pointing out the direction to true knowledge in all its branches, his aptness and accuracy in expressing the truth—these qualities mark him as a great master not only for the thirteenth century, but for all times. If any persons are inclined to consider him too subtle, it is because they do not know how clear, concise, and simple are his definitions and divisions. His two *summæ* are masterpieces of pedagogy, and mark him as the greatest of human teachers. Moreover, he dealt with errors similar to many which go under the name of philosophy or science in our days. The Rationalism of Abelard and others called forth St. Thomas's luminous and everlasting principles on the true relations of faith and reason. Ontologism was solidly refuted by St. Thomas nearly six centuries before the days of Malebranche, Gioberti, and Ubaghs (see "Sum. theol.", I, Q. lxxxiv, a. 5). The true doctrine on first principles and on universals, given by him and by the other great Scholastics, is the best refutation of Kant's criticism of metaphysical ideas (see, e. g., "Post. Analyt.", I, lect. xix; "De ente et essentia", c. iv; "Sum. theol.", I, Q. xvii, a. 3, *corp.* and ad 2^{um}; Q. lxxix, a. 3; Q. lxxxiv, a. 5, a. 6, *corp.* and ad 1^{um}, Q. lxxxv, a. 2, ad 2^{um}, a. 3, ad 1^{um}, ad 4^{um}. Cf. index to "Summa": "Veritas", "Principium", "Universale"). Modern psychological Pantheism does not differ substantially from the theory of one soul for all men asserted by Averroes (see "De unit. intell." and "Sum. theol.", I, Q. lxxvi, a. 2; Q. lxxix, a.5). The Modernistic error, which distinguishes the Christ of faith from the Christ of history, had as its forerunner the Averroistic principle that a thing might be true in philosophy and false in religion.

In the Encyclical "Providentissimus Deus" (18 Nov., 1893) Leo XIII draws from St. Thomas's writings the principles and wise rules which should govern scientific criticism of the Sacred Books. From the same source recent writers have drawn principles which are most helpful in the solution of questions pertaining to Spiritism and Hypnotism (see Coconnier, "L'âme humaine", Paris, 1890; "L'hypnotisme franc", Paris, 1898; Berthier, "Spiritisme et hypnotisme d'après S. Thomas": appendix III to "L'Etude"). Are we to conclude, then, that St. Thomas's works, as he left them, furnish sufficient instruction for scientists, philosophers, and theologians of our times? By no means. *Vetera novis augere et perficere*—"To strengthen and complete the old by aid of the new"—is the motto of the restoration proposed by Leo XIII. Were St. Thomas living to-day he would gladly adopt and use all the facts made known by recent scientific and historical investigations, but he would carefully weigh all evidence offered in favour of the facts (see "L'Avenir du Thomisme" in Sertillanges, op. cit., p. 327). Positive theology is more necessary in our days than it was in the thirteenth century. Leo XIII calls attention to its necessity in his Encyclical, and his admonition is renewed by Pius X in his Letter on Modernism. But both pontiffs declare that positive theology must not be extolled to the detriment of Scholastic theology. In the Encyclical "Pascendi", prescribing remedies against Modernism, Pius X, following in this his illustrious predecessor, gives the first place to "Scholastic philosophy, especially as it was taught by Thomas Aquinas". St. Thomas is still "The Angel of the Schools".

SPECIMEN OF TEXT OF THE SUMMA; I, Q. i, a. 1. With translation by English Dominican Fathers.

Utrum sit necessarium præter philosophicas disciplinas aliam doctrinam haberi.	Whether, besides philosophy, any further doctrine is required?

Ad primum sic proceditur.	**We proceed thus to the first article:**
1. Videtur quod non sit necessarium præter philosophicas disciplinas aliam doctrinam haberi. Ad ea enim quæ supra rationem sunt, homo non debet conari, secundum illud Eccli. 3, 22: Altiora te ne quæsieris. Sed ea quæ rationi subduntur, sufficienter traduntur in philosophicis disciplinis. Superfluum igitur videtur præter philosophicas disciplinas aliam doctrinam haberi.	Objection 1.—It seems that, besides philosophical science, we have no need of any further knowledge. Man should not seek to know what is above reason: Seek not the things that are too high for thee (Ecclus., iii, 22). But whatever is not above reason is fully treated of in philosophical science. Therefore any other knowledge besides philosophical science is superfluous.
2. Præterea, doctrina non potest esse nisi de ente; nihil enim scitur nisi verum, quod cum ente convertitur. Sed de omnibus entibus tractatur in disciplinis philosophicis et etiam de Deo; unde quædam pars philosophiæ dicitur theologia, sive scientia divina, ut patet per Philosophum in 6 Metaph. (com. 2). Non fuit igitur necessarium præter philosophicas disciplinas aliam doctrinam haberi.	Objection 2.—Further, knowledge can only be concerned with being, for nothing can be known, save what is true; and all that is, is true. But everything that is, is treated of in philosophical science—even God himself—so that there is a part of philosophy called theology, or the Divine science, as Aristotle has proved. Therefore, besides philosophical science, there is no need of any further knowledge.
Sed contra est quod dicitur 2 ad Timoth., 3, 16: Omnis scriptura divinitus inspirata utilis est ad docendum, ad arguendum, ad corripiendum, ad erudiendum, ad justitiam. Scriptura autem divinitus inspirata non pertinet ad philosophicas disciplinas, quæ sunt secundum humanam rationem inventæ. Utile igitur est præter philosophicas disciplinas esse aliam scientiam divinitus inspiratam.	On the contrary, it is said: All Scripture inspired of God is profitable to teach, to reprove, to correct, to instruct in justice (II Tim., iii, 16). Scripture, inspired of God, is no part of philosophical science, which has been built up by human reason. Therefore, it is useful that, besides philosophical science, there should be other knowledge, i. e., inspired of God.
Respondeo dicendum quod, necessarium fuit ad humanam salutem esse doctrinam quamdam secundum revelationem divinam præter philosophicas disciplinas quæ ratione humana investigantur. Primo quidem quia homo ordinatur ad Deum sicut ad quemdam finem, qui comprehensionem rationis excedit, secundum illud Isai. 64, 4: Oculus non vidit, Deus, absque te, quæ præparasti expectantibus te. Finem autem oportet esse præcognitum hominibus, qui suas intentiones et actiones debent ordinare in finem. Unde necessarium fuit homini ad salutem quod ei nota fierent quædam per revelationem divinam quæ rationem humanam excedunt.	I answer that, It was necessary for man's salvation that there should be a knowledge revealed by God, besides philosophical science built up by human reason. First, indeed, because man is ordained to God, as to an end that surpasses the grasp of his reason. The eye hath not seen, besides Thee, O God, what things Thou hast prepared for them that wait for Thee (Isa., lxiv, 4). But the end must first be known by men who are to direct their thoughts and actions to the end. Hence it was necessary for the salvation of man that certain truths which exceed human reason should be made known to him by Divine Revelation.
Ad ea etiam quæ de Deo ratione humana investigari possunt, necessarium fuit hominem instrui revelatione divina; quia veritas de Deo per rationem investigata, a paucis, et per longum tempus, et cum admixtione multorum errorum homini proveniret; a cujus tamen veritatis cognitione dependet tota hominis salus, quæ in Deo est. Ut igitur salus hominibus et convenientius et certius proveniat, necessarium fuit quod de divinis per divinam revelationem instruerentur. Necessarium igitur fuit, præter philosophicas disciplinas quæ per rationem investigantur, sacram doctrinam per revelationem haberi.	Even as regards those truths about God which human reason could have discovered, it was necessary that man should be taught by a Divine Revelation; because the truth about God such as reason could discover, would only be known by a few, and that after a long time, and with the admixture of many errors. Whereas man's whole salvation, which is in God, depends upon the knowledge of this truth. Therefore, in order that the salvation of men might be brought about more fitly and more surely, it was necessary that they should be taught Divine Truths by Divine Revelation. It was therefore necessary that, besides philosophical science built up by reason, there should be a sacred science learnt through Revelation.
Ad primum ergo dicendum, quod, licet ea quæ sunt altiora hominis cognitione non sint ab homine per rationem inquirenda, sunt tamen a Deo revelata, suscipienda per fidem; unde et ibidem (Eccli., III, 25), subditur: Plurima supra sensum hominum ostensa sunt tibi. Et in hujusmodi sacra doctrina consistit.	Reply Objection 1.—Although those things which are beyond man's knowledge may not be sought for by man through his reason, nevertheless, once they are revealed by God they must be accepted by faith. Hence, the sacred text continues: For many things are shown to thee above the understanding of man (Ecclus., iii, 25). And in this the sacred science consists.
Ad secundum dicendum quod diversa ratio cognoscibilis diversitatem scientiarum inducit. Eamdem enim conclusionem demonstrat astrologus, et naturalis, puta quod terra est rotunda; sed astrologus per medium mathematicum, id est, a materia abstractum; naturalis autem per medium circa materiam consideratum. Unde nihil prohibet de eisdem de quibus philosophicæ disciplinæ tractant, secundum quod sunt cognoscibilia lumine naturalis rationis, etiam aliam scientiam tractare, secundum quod cognoscuntur lumine divinæ revelationis. Unde theologia, quæ ad sacram doctrinam pertinet, differt, secundum genus, ab illa theologia quæ pars philosophiæ ponitur.	Reply Objection 2.—Sciences are differentiated according to the various means through which knowledge is obtained. The astronomer and the physicist both may prove the same conclusion—that the earth, for instance, is round; the astronomer by means of mathematics (i.e., abstracting from matter), but the physicist by means of matter itself. Hence there is no reason why those things which may be learnt from philosophical science, so far as they can be known by natural reason, may not also be taught us by another science so far as they fall within revelation. Hence theology included in Sacred Doctrine differs in kind from that theology which is part of philosophy.

Bollandists, *Acta SS.*, VII Mar.; Hurter, *Nomencl.*, II (Innsbruck, 1906), 308; Mortier, *Histoire des maîtres généraux de l'Ordre des FF. Prêcheurs* (Paris, 1903); Chevalier, *Répertoire des sources historiques du moyen âge*, II (2nd ed., Paris, 1907), 447 sqq.; Ueberweg, tr., *Hist. of Philosophy*, I (New York, 1903), 442; Sertillanges, *S. Thomas d'Aquin*, II (Paris, 1910), 337; Perrier, *The Revival of Scholastic Philosophy* (New York, 1909), 249.

On Life and Works.—The earliest biographers were Peter Calo (d. 1310 or 1348), William de Tocco (d. about 1324), Ptolomeo of Lucca (d. 1327), and Bernard Guidonis (d. 1331). Calo, *Life*, is printed in Prümmer, *Fontes vitæ S. Thomæ* (Toulouse, 1911); Tocco is given in *Acta SS.* In vol. I of the 1588 Venetian edition of the *Summa* is found the same Life, viz., *Authoris vita R. P. Fr. Guil. de Thocco authore, qui eum vidit, et audivit legentem et prædicantem; Nunc primum edita.* Gerardus de Fracheto (d. 1271), *Vitæ Fratrum Ord. Præd.*, ed. Reichert (Louvain, 1896). Notices of these biographers are given in Echard, *Script. Ord. Præd.* (Paris, 1719–21), also an extensive account of St. Thomas and his writings, I, 271 sqq. St. Antoninus and Natalis Alexander are numbered amongst the biographers. Touron, *La vie de S. Thomas d'Aquin, avec un exposé de sa doctrine et ses ouvrages* (Paris, 1740) is a mine of valuable information. Vielmus, *De D. Th. Aquin. doctrina et scriptis* (Padua, 1564; Venice, 1575; Brescia, 1748; Vienna, 1763); Denifle, *Die Universitäten des Mittelalters* (Berlin, 1885); *Archiv für Literatur und Kirchengeschichte des Mittelalters*, II (Berlin, 1886); Denifle-Chatelain, *Chartularium Univ. Parisiensis* (Paris, 1889–91); Chevalier, *Catalogue critique des œuvres de S. Th. d'Aquin* (Romans, 1886); Mandonnet, *Siger de Brabant: Ecrits authentiques* (see above) and *Les titres doctoraux de S. Th. d'Aquin* in *Rev. Thomiste* (1909), XVII, 597–608; Frigerio, *Vita di S. Tomaso* (Rome, 1615, 1668); Werner, *Der heil. Thomas von Aquino* (Ratisbon, 1858); De Groot, *Het Leven van den H. Thomas van Aquinas* (Amsterdam, 1882; Utrecht, 1907); Bareille, *Hist. de S. Th. d'Aquin* (Paris, 1846, 1859, 1862); Didiot, *Le Docteur Angélique* (Lille, 1894); Vaughan, *Life and Labours of S. Thomas of Aquin* (2 vols., London, 1871–72: abridged, in one vol., London, 1875); Kavanaugh, *The Life of S. Th. Aquinas* (London, 1890); Conway, *St. Thomas Aquinas* (London and New York, 1911).

Commentaries.—The principal commentators on St. Thomas's works are: St. Antoninus, Bannez, Billuart, Cajetan, Capreolus, Contenson, Gonet, John of St. Thomas, Lugo, Medina, Porrecta (Capponi), Salamanticenses (see Salmanticenses and Complutenses), Soto, Suarez, Sylvester, Sylvius, Toletus, Valentia, Vasquez, Victoria, Francis. The following have appeared since the publication of the *Æterni Patris* (1879): Buonpensiere, *Comment. in Iam P. S. Theol. S. Th. Aquin.* (Rome, 1902); Billot, Janssens, *Sum. Theol. ad modum Comment. in Aquin. Sum.* (Rome, 1899, sqq.); Paquet, *Disp. Theol., seu Comment. in Sum. Theol. S. Thomæ* (Quebec, 1893–1903); Pègues, *Comment. français littéral de la Somme Théol. de S. Th. d'Aquin* (Toulouse, 1906 sqq.); Satolli, *In Sum. Theol. D. Th. Aquin. Prælectiones* (Rome, 1884–88).

Digests, Indices, Special Treatises.—Peter of Bergamo, *Tabula Aurea in omnia opera S. Th. Aquin.* (late ed., Parma, 1883); Medices (de Medicis), *Sum. Theol. S. Th. Aquin. formalis explicatio* (new ed., Vico, 1858–62), gives the whole Summa in syllogistic form. Valuable indices are given in all good editions of *Opera Omnia* and of the *Summa Theologica.* Thus, in Migne editions of the *Summa* the following are found: I. *De præcipuis rebus;* II. *In Script. Sacram* (all texts cited in the *Summa* and *Supplement);* III. *Ad præcipua doctrinæ Christ. capita;* IV. *De Hæresibus* (heresies refuted in the *Summa); V. De Antilogiis* (explanations of apparent contradictions); VI. *Aug. Hunnæi Axiomata de sacramentis, Schema de Sacram. Catæchismus Catholicus;* VII. *Catalogus Auctorum a D. Th. Laudatorum* (philosophers, poets, pontiffs, councils, Fathers mentioned in the *Summa);* VIII. *Index in Epist. et Evang. Dominicarum.* Berthier, *L'Etude de la Somme Théol. de S. Thomas d'Aquin* (Paris, 1906); *Tabulæ systematicæ et synopticæ totius Sum. Theol.* (Fribourg, 1893); *Tabulæ system. et synopt. totius Sum. Cont. Gent.* (Paris, 1900); Lépicier, *Sacr. Doctr. Thomisticæ utilitas demonstrata* (Rome, 1893).

For discussions relating to St. Thomas and the Immaculate Conception: Cajetan, *In 3 P., Q. 27, a. 2; De Conceptu B. V.;* Porrecta, *In 3 P. Q. 27, a. 2;* Joannes a St. Thoma, *De Approb. Doct. S. Th. disp. 2, a. 2;* Alexander Natalis, *Hist. Eccl., sæc. XIII et XIV; De Erroribus Joannis de Montesono;* Cornoldi, *Sent. S. Thomæ de immunitate B. V. a peccati originalis labe* (reprinted in vol. XXV, Parma ed. of St. Thomas's works); Ecalle in *Comp.* of Billuart, *Sum. Summæ S. Th.*, T. II, pp. 311 sqq. (Paris, 1889); Berthier in *Append.* to *L'Etude de la Somme Théol.*, 399 sqq., who cites many authors, not Dominicans, giving interpretations favourable to St. Thomas; Spada, *Animadversiones in opus Rmi. Malon, de dogmate Imm. Conc.* (Rome, 1862); Rouard de Card, *L'Ordre des Frères Prêcheurs et L'Immaculée Conception* (Brussels, 1864). On the other hand many authors hold either that St. Thomas did not teach the Immaculate Conception or that his opinion is doubtful.

Amongst dogmatico-devotional treatises besides works already cited (above IV) the following may be mentioned: Mézard, *Medulla S. Th. Aquin seu meditationes ex operibus S. Th.* (2 vols., Paris, 1907); Monsabré, *Exposition du Dogme Catholique* (Paris, 1873-90); Janvier, *Exposition de la morale catholique* (8 vols., Paris, 1903–10); Schwalm, *Le Christ d'après S. Thomas d'Aquin* (Paris, 1910); De la Barre, *La Morale d'après S. Thomas et les théologiens scolastiques* (Paris, 1911); Morgott, *Der Spender der. heil. Sacramente nach . . . der heil. Thomas* (Freiburg, 1886); *Mariologie des heil. Thomas v. Aquin* (Freiburg, 1878); Rousset-Massoulié, *Traité de la véritable oraison, d'après les principes de S. Thomas* (Paris, 1911); *D. Th. Aquin. Officium Parvum: Accedunt Ang. Doct. monita et preces* (Paris, 1901) contains St. Thomas's advice to students. On The Angelic Warfare, a confraternity established in honour of St. Thomas's purity and the girdle of purity, see *Acta SS.* VII Mar.; Mortier, *Hist. des maîtres gén. de l'Ordre des Frères Prêcheurs*, II (Paris, 1905), vi; *The Angelic Guide, by a Dominican Father* (Boston, 1899).

Summaries of St. Thomas's philosophy are given in all *Histories of Philosophy;* also in Jourdain, *La Phil. de S. Th. d'Aquin* (2 vols., Paris, 1858); Crolet, *Doct. Philos. de S. Th. d'Aquin, d'après le Dr. Stoeckl* (Paris, 1890); Maumus, *St. Thomas et la Philosophie Cartesienne* (2 vols., Paris, 1890); Gardier, *La Phil. de S. Thomas* (4 vols., Paris, 1892–96); Sertillanges, *S. Thomas d'Aquin* (2 vols., Paris, 1910); Gonzalez, *Phil. elementaria* (3 vols., Madrid, 1868; 7th ed., 1894); *Estudios sobra la Filosofia de S. Tomas* (Manila, 1864; Madrid, 1883); *Estudios religiosos, filosoficos, cientificos y sociales* (Madrid, 1873); Zigliara, *Saggio sui principii del Traditionalismo* (Viterbo, 1865); Idem, *Propædeutica ad S. Theol.* (Viterbo, 1884); Idem, *Summa Philosophica* (3 vols., Rome, 1876; 7th ed., Paris, 1889); Idem, *Osservazioni su alcune interpretazioni di G. C. Ubaghs sull' ideologia di S. Tommaso d'Aquino* (Viterbo, 1870); Idem, *Della luce intellectuale e dell' Ontologismo secundo la dottrina di S. Bonavent. e Tommaso d'Aquin* (2 vols., Rome, 1874); Idem, *De ment. Concilii Viennensis in definiendo dogmate unionis animæ humanæ cum corpore* (Rome, 1878); Lepidi, *Examen phil-theologicum de Ontologismo* (Louvain, 1874); *Opuscules philosophiques*, tr. Vignon (Paris, 1899); *Elementa philosophiæ christianæ: Logica* (Louvain, 1875); *Ontologia* (Louvain, 1877); *Cosmologia* (Louvain, 1879); Farges, *Etudes philosophiques pour vulgariser les théories d'Aristote et S. Thomas* (8 vols., Paris, 1887–1902); Feugeray, *Essai sur les doctrines politiques de S. Thomas* (Paris, 1857); Murgue, *Questions d'ontologie: études sur S. Thomas* (Lyons, 1876); Alibert, *La psycologie Thomiste et les théories modernes* (Lyons, 1902); O'Neill, *New Things and Old in S. Thomas Aquinas, Introd.* (London, 1909); Walker, *Essay on the origin of knowledge According to the Philosophy of St. Thomas* (London, 1858); Schumacher, *The Knowableness of God. Its Relation to the Theory of Knowledge in St. Thomas* (Notre Dame, 1905).

For St. Thomas and Social Doctrines.—Schwalm, *Leçons de philosophie sociale* (Paris, 1910), gives an excellent bibliography on p. xvii; Leo XIII, *Encyclicals, Æterni Patris; Quod Apostolici muneris; Immortale Dei; Sapientiæ Christianæ; Rerum Novarum; Graves de Communi*, in *The Great Encyclical Letters of Leo XIII* (New York, 1903): Schaub, *Die Eigentumslehre nach Thomas von Aquin und dem modernen Sozialismus* (Freiburg, 1898); Walter, *Das Eigenthum nach der Lehre des hl. Thomas von Aquin und des Sozialismus* (Freiburg, 1895); Antoniades, *Die Staatslehre des Thomas von Aquin* (Leipzig, 1890); Besone, *Der Aufsatz, De Regimine Principum, von Thomas von Aquin* (Bonn, 1894); Bliss in *Encyclopedia of Social Reform;* Ashley in *Palgrave's Dictionary of Political Economy.*

Periodicals.—Many articles on St. Thomas's doctrine have been published in the following Reviews: *Annales de Philosophie Chrétienne* (Paris, 1831——); *La Civiltà Cattolica* (Florence and Rome, 1850——); *Etudes Religieuses* (Paris, 1856); *Philosophisches Jahrbuch* (Fulda, 1888——); *Sanct Thomas Blätter* (Ratisbon, 1888——); *Revue Thomiste* (Paris, 1893); *Revue Néo-Scolastique* (Louvain, 1894——); *Revue des Sciences Philosophiques et Théologiques* (Kain, 1907——); *Catholic University Bulletin* (Washington, D. C., 1894——); *Cienza Tomista* (Madrid, 1910——).

For additional bibliography see Albertus Magnus, Blessed; Philosophy; Preachers, Order of; Neo-Scholasticism; Thomism.

D. J. Kennedy.

Thomas Becket, Saint, martyr, Archbishop of Canterbury, b. at London, 21 Dec., 1118 (?); d. at Canterbury, 29 Dec., 1170. St. Thomas was born of parents who, coming from Normandy, had settled in England some years previously. No reliance can be placed upon the legend that his mother was a Saracen. In after life his humble birth was made the subject of spiteful comment, though his parents were not peasants, but people of some mark, and from his earliest years their son had been well taught and had associated with gentlefolk. He learned to read at Merton Abbey and then studied in Paris. On leaving school he employed himself in secretarial work, first with Sir Richer de l'Aigle and then with his kinsman, Osbert Huitdeniers, who was "Justiciar" of London. Somewhere about the year 1141, under circumstances that are variously related, he entered the service of Theobald, Archbishop of Canterbury, and in that household he won his master's favour and eventually became the most trusted of all his clerks. A description embodied in the Icelandic Saga and derived probably from Robert of Cricklade gives a vivid portrait of him at this period. "To look upon he was slim of growth and pale of hue, with dark hair, a long nose, and a straightly featured face. Blithe of countenance was he, winning and loveable in his conversation, frank of speech in his discourses, but slightly stuttering in his talk, so keen of discernment and understanding that he could always make difficult questions plain after a wise manner." Theobald recognized his capacity, made use of him in many delicate negotiations, and, after allowing him to go for a year to study civil and canon law at Bologna and Auxerre, ordained him deacon in 1154, after bestowing upon him several preferments, the most important of which was the Archdeaconry of Canterbury (see Radford, "Thomas of London", p. 53).

It was just at this period that King Stephen died and the young monarch Henry II became unquestioned master of the kingdom. He took "Thomas of London", as Becket was then most commonly called, for his chancellor, and in that office Thomas at the age of thirty-six became, with the possible exception of the justiciar, the most powerful subject in Henry's wide dominions. The chroniclers speak with wonder of the relations which existed between the chancellor and the sovereign, who was twelve years his junior. People declared that "they had but one heart and one mind". Often the king and his minister behaved like two schoolboys at play. But although they hunted or rode at the head of an army together it was no mere comradeship in pastime which united them. Both were hard workers, and both, we may believe, had the prosperity of the kingdom deeply at heart. Whether the chancellor, who was after all the elder man, was the true originator of the administrative reforms which Henry introduced cannot now be clearly determined. In many matters they saw eye to eye. The king's imperial views and love of splendour were quite to the taste of his minister. When Thomas went to France in 1158 to negotiate a marriage treaty, he travelled with such pomp that the people said: "If this be only the chancellor what must be the glory of the king himself?"

In 1153 Thomas acted as justice itinerant in three counties. In 1159 he seems to have been the chief organizer of Henry's expedition to Toulouse, upon which he accompanied him, and though it seems to be untrue that the impost of "scutage" was called into existence for that occasion (Round, "Feudal England", 268–73), still Thomas undoubtedly pressed on the exaction of this money contribution in lieu of military service and enforced it against ecclesiastics in such a way that bitter complaints were made of the disproportionately heavy burden thus imposed upon the Church. In the military operations Thomas took a leading part, and Garnier, a French chronicler, who lived to write of the virtues of St. Thomas and his martyrdom, declares that in these encounters he saw him unhorse many French knights. Deacon though he was, he led the most daring attacks in person, and Edward Grim also gives us to understand that in laying waste the enemy's country with fire and sword the chancellor's principles did not materially differ from those of the other commanders of his time. But although, as men then reported, "he put off the archdeacon", in this and other ways, he was very far from assuming the licentious manners of those around him. No word was ever breathed against his personal purity. Foul conduct or foul speech, lying or unchastity were hateful to him, and on occasion he punished them severely. He seems at all times to have had clear principles with regard to the claims of the Church, and even during this period of his chancellorship he more than once risked Henry's grievous displeasure. For example, he opposed the dispensation which Henry for political reasons extorted from the pope, and strove to prevent the marriage of Mary, Abbess of Romsey, to Matthew of Boulogne. But to the very limits of what his conscience permitted, Thomas identified himself with his master's interests, and Tennyson is true to history when he makes the archbishop say:

> I served our Theobald well when I was with him:
> I served King Henry well as Chancellor:
> I am his no more, and I must serve the Church.

Entrance to the Transept of Martyrdom, Canterbury

Archbishop Theobald died in 1161, and in the course of the next year Henry seems to have decided that it would be good policy to prepare the way for further schemes of reform by securing the advancement of his chancellor to the primacy. Our authorities are agreed that from the first Thomas drew back in alarm. "I know your plans for the Church", he said, "you will assert claims which I, if I were archbishop, must needs oppose." But Henry would not be gainsaid, and Thomas at the instance of Cardinal Henry of Pisa, who urged it upon him as a service to religion, yielded in spite of his misgivings. He was ordained priest on Saturday in Whitweek and consecrated bishop the next day, Sunday, 3 June, 1162. It seems to have been St. Thomas who obtained for England the privilege of keeping the feast of the Blessed Trinity on that Sunday, the anniversary of his consecration, and more than a century afterwards this custom was adopted by the papal Court itself and eventually imposed upon the whole world.

A great change took place in the saint's way of life after his consecration as archbishop. Even as chancellor he had practised secret austerities, but now in view of the struggle he clearly saw before him he gave himself to fastings and disciplines, hair shirts, protracted vigils, and constant prayers. Before the end of the year 1162 he stripped himself of all signs of the lavish display which he had previously affected. On 10 Aug. he went barefoot to receive the envoy who brought him the pallium from Rome. Contrary to the king's wish he resigned the chancellorship. Whereupon Henry seems to have required him to surrender certain ecclesiastical preferments which he still retained, notably the archdeaconry, and when this was not done at once showed bitter displeasure. Other misunderstandings soon followed. The archbishop, having, as he believed, the king's express permission, set about to reclaim alienated estates belonging to his see, a procedure which again gave offence. Still more serious was the open resistance which he made to the king's proposal that a voluntary offering to the sheriffs should be paid into the royal treasury. As the first recorded instance of any determined opposition to the king's arbitrary will in a matter of taxation, the incident is of much constitutional importance. The saint's protest seems to have been successful, but the relations with the king only grew more strained.

Soon after this the great matter of dispute was reached in the resistance made by Thomas to the king's officials when they attempted to assert jurisdiction over criminous clerks. The question has been dealt with in some detail in the article England (V, 436). That the saint himself had no wish to be lenient with criminous clerks has been well shown by Norgate (Angevin Kings, ii, 22). It was with him simply a question of principle. St. Thomas seems all along to have suspected Henry of a design to strike at the independence of what the king regarded as a too powerful Church. With this view Henry summoned the bishops at Westminster (1 Oct., 1163) to sanction certain as yet unspecified articles which he called his grandfather's customs (*avitæ consuetudines*), one of the known objects of which was to bring clerics guilty of crimes under the jurisdiction of the secular courts. The other bishops, as the demand was still in the vague, showed a willingness to submit, though with the condition "saving our order", upon which St. Thomas inflexibly insisted. The king's resentment was thereupon manifested by requiring the archbishop to surrender certain castles he had hitherto retained, and by other acts of unfriendliness. In deference to what he believed to be the pope's wish, the archbishop in December consented to make some concessions by giving a personal and private undertaking to the king to obey his customs "loyally and in good faith". But when Henry shortly afterwards at Clarendon (13 Jan., 1164) sought to draw the saint on to a formal and public acceptance of the "Constitutions of Clarendon", under which name the sixteen articles, the *avitæ consuetudines* as finally drafted, have been commonly known, St. Thomas, though at first yielding somewhat to the solicitations of the other bishops, in the end took up an attitude of uncompromising resistance.

Then followed a period of unworthy and vindictive persecution. When opposing a claim made against him by John the Marshal, Thomas upon a frivolous pretext was found guilty of contempt of court. For this he was sentenced to pay £500; other demands for large sums of money followed, and finally, though a complete release of all claims against him as chancellor had been given on his becoming archbishop, he was required to render an account of nearly all the moneys which had passed through his hands in his discharge of the office. Eventually a sum of nearly £30,000 was demanded of him. His fellow bishops, summoned by Henry to a council at Northampton, implored him to throw himself unreservedly upon the king's mercy, but St. Thomas, instead of yielding, solemnly warned them and threatened them. Then, after celebrating Mass, he took his archiepiscopal cross into his own hand and presented himself thus in the royal council chamber. The king demanded that sentence should be passed upon him, but in the confusion and discussion which ensued the saint with uplifted cross made his way out through the mob of angry courtiers. He fled away secretly that night (13 Oct., 1164), sailed in disguise from Sandwich (2 Nov.), and, after being cordially welcomed by Louis VII of France, he threw himself at the feet of Pope Alexander III, then at Sens, on 23 Nov. The pope, who had given a cold reception to certain episcopal envoys sent by Henry, welcomed the saint very kindly, and refused to accept his resignation of his see. On 30 Nov., Thomas went to take up his residence at the Cistercian Abbey of Pontigny in Burgundy, though he was compelled to leave this refuge a year later, as Henry, after confiscating the archbishop's property and banishing all the Becket kinsfolk, threatened to wreak his vengeance on the whole Cistercian Order if they continued to harbour him.

Seal of the See of Canterbury
Showing the Martyrdom of St. Thomas

The negotiations between Henry, the pope, and the archbishop dragged on for the next four years without the position being sensibly changed. Although the saint remained firm in his resistance to the principle of the Constitutions of Clarendon, he was willing to make any concessions that could be reasonably asked of him, and on 6 Jan., 1169, when the kings of England and France were in conference at Montmirail, he threw himself at Henry's feet, but as he still refused to accept the obnoxious customs Henry repulsed him. At last in 1170 some sort of reconciliation was patched up. The question of the customs was not mentioned and Henry professed himself willing to be guided by the archbishop's council as to amends due to the See of Canterbury for the recent violation of its rights in the crowning of Henry's son by the Archbishop of York. On 1 Dec., 1170, St. Thomas again landed in England, and was received with every demonstration of popular enthusiasm. But trouble almost immediately occurred in connexion with the absolution of two of the bishops, whose sentence of excommunication St. Thomas had brought with him, as well as over the restoration by the de Broc family of the archbishop's castle at Saltwood. How far Henry was directly responsible for the tragedy which soon after occurred on 29 Dec. is not quite clear. Four knights who came from France demanded the absolution of the bishops. St. Thomas would not comply. They left for a space, but came back at Vesper time with a band of armed men. To their angry question, "Where is the traitor?" the saint boldly replied, "Here I am, no traitor, but archbishop and priest of God." They tried to drag him from the church, but were unable, and in the end they slew him where he stood, scattering his brains on the pavement. His faithful companion, Edward Grim, who bore his cross, was wounded in the struggle.

A tremendous reaction of feeling followed this deed of blood. In an extraordinarily brief space of time devotion to the martyred archbishop had spread all through Europe. The pope promulgated the bull of canonization, little more than two years after the martyrdom, 21 Feb., 1173. On 12 July, 1174, Henry II did public penance, and was scourged at the archbishop's tomb. An immense number of miracles were worked, and for the rest of the Middle Ages the shrine of St. Thomas of Canterbury was one of the wealthiest and most famous in Europe. The martyr's holy remains are believed to have been destroyed in Sept., 1538, when nearly all the other shrines in England were dismantled; but the matter is by no means clear, and, although the weight of learned opinion is adverse, there are still those who believe that a skeleton found in the crypt in January, 1888, is the body of St. Thomas. The story that Henry VIII in 1538 summoned the archbishop to stand his trial for high treason, and that when, in June, 1538, the trial had been held and the accused pronounced contumacious, the body was ordered to be disinterred and burnt, is probably apocryphal.

By far the best English life is Morris, *The Life of St. Thomas Becket* (2nd ed., London, 1885); there is a somewhat fuller work of L'Huillier, *Saint Thomas de Cantorbéry* (2 vols., Paris, 1891); the volume by Demimuid, *St. Thomas Becket* (Paris, 1909), in the series *Les Saints* is not abreast of modern research. There are several excellent lives by Anglicans, of which Hutton, *Thomas Becket* (London, 1900), and the account by Norgate in *Dict. Nat. Biog.*, s. v. *Thomas*, known as *Thomas à Becket*, are probably the best. The biography by Robertson, *Becket, Archbishop of Canterbury* (London, 1859), is not sympathetic.

Nearly all the sources of the Life, as well as the books of miracles worked at the shrine, have been edited in the *Rolls Series* by Robertson under the title *Materials for the History of Thomas Becket* (7 vols., London, 1875–1883). The valuable Norse saga is edited in the same series by Magnusson, *Thomas Saga Erkibyskups* (2 vols., London, 1884). The chronicle of Garnier de Pont S. Maxence, *Vie de St. Thomas Martyr*, has been edited by Hippeau (Paris, 1859). The miracles have been specially studied from an agnostic standpoint by Abbot, *Thomas of Canterbury, his death and miracles* (2 vols., London, 1898). Some valuable material has been collected by Radford, *Thomas of London before his Consecration* (Cambridge, 1894). On the relics see Morris, *Relics of St. Thomas* (London, 1888); Thornton, *Becket's Bones* (Canterbury, 1900); Ward, *The Canterbury Pilgrimages* (London, 1904); Warner in *Eng. Hist. Rev.*, VI (1891), 754–56.

Herbert Thurston.

Thomas Christians, Saint, an ancient body of Christians on the east and west coasts of India, claiming spiritual descent from the Apostle St. Thomas. The subject will be treated under the following heads, viz.:—I. Their early traditions and their connexion with the Apostle St. Thomas; II. The Apostle's tomb at Mylapur; III. This upheld by the Edessan Church; IV. For their earliest period they possess no written but a traditional history; V. Record of these traditions embodied in a MS. Statement dated 1604; VI. The Syrian merchant Thomas Cana arrives in Malabar, an important event in their history and the social benefits therefrom; VII. The arrival also of two pious brothers, church-builders; VIII. Ancient stone crosses and their inscriptions; IX. Their early prelates; X. Were these Christians infected with Nestorianism before 1599? XI. Medieval travellers on the Thomas Christians; XII. Their two last Syrian bishops; XIII. Archbishop Menezes and the Synod of Diamper; XIV. Their first three Jesuit bishops; XV. The Carmelite Period; XVI. Two Latin Vicars Apostolic; XVII. Divided into three vicariates with native bishops.

I. Interest in the history of these Christians arises from more than one feature. Their ancient descent at once attracts attention. Theophilus (surnamed the Indian), an Arian, sent by Emperor Constantius (about 354) on a mission to Arabia Felix and Abyssinia, is one of the earliest, if not the first, who draws our attention to them. He had been sent when very young a hostage *a Divœis*, by the inhabitants of the Maldives, to the Romans in the reign of Constantine the Great. His travels are recorded by Philostorgius, an Arian Greek Church historian, who relates that Theophilus, after fulfilling his mission to the Homerites, sailed to his island home. Thence he visited other parts of India, reforming many things—for the Christians of the place heard the reading of the Gospel in a sitting, etc. This reference to a body of Christians with church, priest, and liturgy, in the immediate vicinity of the Maldives, can only apply to a Christian Church and faithful on the adjacent coast of India, and not to Ceylon, which was well known even then under its own designation, Taprobane. The people referred to were then Christians known as a body who had their liturgy in the Syriac language and inhabited the west coast of India, i. e. Malabar. This Church is next mentioned and located by Cosmas Indicopleustes (about 535) "in Male [Malabar] where the pepper grows"; and he adds that the Christians of Ceylon, whom he specifies as Persians, and "those of Malabar" (the latter he leaves unspecified, so they must have been natives of the country) had a bishop residing at Caliana (Kalyan), ordained in Persia, and one likewise on the Island of Socotra.

II. St. Gregory of Tours (Glor. Mart.), before 590, reports that Theodore, a pilgrim who had gone to Gaul, told him that in that part of India where the *corpus* (bones) of Thomas the Apostle had first rested (Mylapur on the east or Coromandel Coast of India) there stood a monastery and a church of striking dimensions and elaborately adorned, adding: "After a long interval of time these remains had been removed thence to the city of Edessa." The location of the first tomb of the Apostle in India is proof both of his martyrdom and of his Apostolate in India. The evidence of Theodore is that of an eye-witness who had visited both tombs—the first in India, while the second was at Edessa. The primitive Christians, therefore, found on both coasts, east and west, witness to and locate the tomb at Mylapur, "St. Thomas", a little to the south of Madras; no other place in India lays any claim to possess the tomb, nor does any other country. On these facts is based their claim to be known as St. Thomas Christians.

III. Further proof may be adduced to justify this claim. A Syrian ecclesiastical calendar of an early date confirms the above. In the quotation given below two points are to be noted which support its antiquity—the fact of the name given to Edessa and the fact that the memory of the translation of the Apostle's relics was so fresh to the writer that the name of the individual who had brought them was yet remembered. The entry reads: "3 July, St. Thomas who was pierced with a lance in India. His body is at Urhai [the ancient name of Edessa] having been brought there by the merchant Khabin. A great festival." It is only natural to expect that we should receive from Edessa first-hand evidence of the removal of the relics to that city; and we are not disappointed, for St. Ephraem, the great doctor of the Syrian Church, has left us ample details in his writings. Ephraem came to Edessa on the surrender of Nisibis to the Persians, and he lived there from 363 to 373, when he died. This proof is found mostly in his rhythmical compositions. In the forty-second of his "Carmina Nisibina" (Leipzig, 1866) he tells us that the Apostle was put to death in India, and that his remains were subsequently buried at Edessa, brought there by a merchant—but his name is never given; apparently at that date the name had dropped out of popular memory. The same is repeated in varying form in several of his hymns edited by Lamy (Ephr. Hymni et Sermones, IV). "It was to a land of dark people he was sent, to clothe them by Baptism in white robes. His grateful dawn dispelled India's painful darkness. It was his mission to espouse India to the One-Begotten. The merchant is blessed for having brought so great a treasure. Edessa thus became the blessed city by possessing the greatest pearl India could yield. Thomas works miracles in India, and at Edessa Thomas is destined to baptize peoples perverse and steeped in darkness, and that in the land of India."

For fuller proof of the Apostleship of St. Thomas the reader is referred to the work of the present writer "India and the Apostle Saint Thomas" (London, 1905). This short excursus was necessary to establish the claim of the Christians on the coast and especially that of the Malabar Syrian Church to be the daughter of the Apostle St. Thomas.

IV. These Christians have no written records of the incidents of their social life from the time of their first conversion down to the arrival of the Portuguese on the coast, just as India had no history until the arrival of the Mohammedans.

V. Fortunately the British Museum has a large collection consisting of several folio volumes containing MSS. letters, reports, etc., of Jesuit missions in India and elsewhere; among these in addl. vol. 9853, beginning with the leaf 86 in pencil and 525 in ink, there is a "Report" on the "Serra" (the name by which the Portuguese designated Malabar), written in Portuguese by a Jesuit missionary, bearing the date 1604 but not signed by the writer; there is evidence that this "Report" was known to F. de Souza, author of the "Oriente Conquistado", and utilized by him. The writer has carefully put together the traditional record of these Christians; the document is yet unpublished, hence its importance. Extracts from the same, covering what can be said of the early part of this history, will offer the best guarantee that can be offered. The writer of the "Report" distinctly informs us that these Christians had no written records of ancient history, but relied entirely on traditions handed down by their elders, and to these they were most tenaciously attached.

Of their earliest period tradition records that after the death of the Apostle his disciples remained faithful for a long time, the Faith was propagated with great zeal, and the Church increased considerably. But later, wars and famine supervening, the St. Thomas Christians of Mylapur got scattered and sought refuge elsewhere, and many of them returned to paganism. The Christians, however, who were on the Cochin side, fared better than the former, spreading from Coulac (Quilon) to Palur (Paleur), a village in the north of Malabar. These had fared better, as they lived under native princes who rarely interfered with their Faith, and they probably never suffered real persecution such as befell their brethren on the other coast; besides, one of the paramount rajahs of Malabar, Cheruman Perumal, had conferred on them a civil status. The common tradition in the country holds that from the time of the Apostle seven churches were erected in different parts of the country, besides the one which the Apostle himself had erected at Mylapur. This tradition is most tenaciously held and is confirmed by the "Report". It further asserts that the Apostle Thomas, after preaching to the inhabitants of the Island of Socotra and establishing there a Christian community, had come over to Malabar and landed at the ancient port of Cranganore. They hold that after preaching in Malabar the Apostle went over to Mylapur on the Coromandel Coast; this is practicable through any of the many paths across the dividing mountain ranges which were well known and much frequented in olden times. The Socotrians had yet retained their Faith when in 1542 St. Francis Xavier visited them on his way to India. In a letter of 18 Sept. of the same year, addressed to the Society at Rome, he has left an interesting account of the degenerate state of the Christians he found there, who were Nestorians. He also tells us they render special honours to the Apostle St. Thomas, claiming to be descendants of the Christians begotten to Jesus Christ by that Apostle. By 1680 when the Carmelite Vincenzo Maria di Santa Catarina landed there he found Christianity quite extinct, only faint traces yet lingering. The extinction of this primitive Christianity is due to the oppression of the Arabs, who now form the main population of the island, and to the scandalous neglect of the Nestorian Patriarchs who in former times were wont to supply the bishop and clergy for the island. When St. Francis visited the island a Nestorian priest was still in charge.

VI. There is one incident of the long period of isolation of the St. Thomas Christians from the rest of the Christian world which they are never tired of relating, and it is one of considerable importance to them for the civil status it conferred and secured to them in the country. This is the narrative of the arrival of a Syrian merchant on their shores, a certain Mar Thoma Cana—the Portuguese have named him Cananeo and styled him an Armenian, which he was not. He arrived by ship on the coast and entered the port of Cranganore. The King of Malabar, Cheruman Perumal, was in the vicinity, and receiving information of his arrival sent for him and admitted him to his presence. Thomas was a wealthy merchant who had probably come to trade; the king took a liking to the man, and when he expressed a wish to acquire land and make a settlement the king readily acceded to his request and let him purchase land, then unoccupied, at Cranganore. Under the king's orders Thomas soon collected a number of Christians from the surrounding country, which enabled him to start a town on the ground marked out for his occupation. He is said to have collected seventy-two Christian families (this is the traditional number always mentioned), and to have installed them in as many separate houses erected for them; attached to each dwelling was a sufficient piece of land for vegetable cultivation for the support of the family as is the custom of the country. He also erected a dwelling for himself and eventually a church. The authorization to possess the land and dwellings erected was granted to Thomas by a deed of the paramount Lord and Rajah of Malabar, Cheruman Perumal, said to have been the last of the line, the country having been subsequently divided among his feudatories. (The details given above as well as what follows of the copper plate grant are taken from the "Report".) The same records also speak of several privileges and honours by the king to Thomas himself, his descendants, and to the Thomas Christians, by which the latter community obtained rank and a social status above the lower classes, and which made them equal to the Nayars, the middle class in the country.

The deed read as follows:—"May Cocurangon [personal name of the king] be prosperous, enjoy a long life and live 100,000 years, divine servant of the gods, strong, true, just, full of good deeds, reasonable, powerful over the whole earth, happy, conquering, glorious, rightly prosperous in the service of the gods, in Malabar, in the city of the Mahadeva [the great idol of the temple in the vicinity of Cranganore] reigning in the year of Mercury on the seventh day [Portuguese text: elle no tepo de Mercurio de feu to no dia, etc.] of the month of March before the full moon the same king Cocurangon being in Carnallur there landed Thomas Cana, a chief man who arrived in a ship wishing to see the farthest parts of the East. And some men seeing how he arrived informed the king. The king himself came and saw and sent for the chief man Thomas, and he disembarked and came before the king, who spoke graciously to him. To honour him he gave him his name, styling him Cocurangon Cana, and he went to rest in his place, and the king gave him the city of Mogoderpatanam (Cranganore) for ever. And the same king being in his great prosperity went one day to hunt in the forest, and he hastily sent for Thomas, who came and stood before the king in a propitious hour, and the king consulted the astrologer. And afterwards the king spoke to Thomas that he should build a town in that forest, and he made reverence and answered the king: 'I require this forest for myself', and the king granted it to him for ever. And forthwith another day he cleared the forest and he cast his eyes upon it in the same year on the eleventh of April, and in a propitious time gave it to Thomas for a heritage in the name of the king, who laid the first stone of the church and of the house of Thomas Cana, and he built there a town for all, and he entered the church and prayed there on the same day. After these things Thomas himself went to the feet of the king and offered his gifts, and after this he asked the king to give that land to him and his descendants: and he measured out two hundred and sixty-four elephant cubits and gave them to Thomas and his descendants for ever, and jointly sixty-two houses which immediately were erected there, and gardens with their enclosures and paths and boundaries and inner yards. And he granted him seven kinds of musical instruments and all honours and the right of travelling in a palanquin, and he conferred on him dignity and the privilege of spreading carpets on the ground and the use of sandals, and to erect a pavilion at his gate and ride on elephants, and also granted five taxes to Thomas and his companions, both men and women, for all his relations and to the followers of his law for ever.

The said king gave his name and these princes witnessed it. . . ."

Then follow the names of eight witnesses, and a note is added by the Portuguese translator that this is the document by which the Emperor of all Malabar gave the land of Cranganore to Thomas Cana and also to the Christians of St. Thomas. This document, transcribed from the MS. "Report", has been carefully translated into English, as it forms the "Great Charter" of the St. Thomas Christians. The "Report" adds: "and because at that time they reckoned the era in cycles of twelve years according to the course, therefore they say in the *Olla* [Malayalam term for a document written on palm leaf] that the said settlement was founded in the year of Mercury . . . that mode of reckoning is totally forgotten, because for the last seven hundred and seventy-nine years in all this Malabar time has been reckoned by the Quilon era. However, since the said Perumal, as we have said above, died more than a thousand and two hundred years, it follows: that the same number of years have elapsed since the Church and Christians were established at Cranganore." The writer of the "Report" had previously stated "it is one thousand and two hundred and fifty and eight years since Perumal died on the first of March". Deducting the date of the "Report" this would give A. D. 346 for his death. Diego de Couto (Decada XII), quoting the above grant in full, says that the Syrian Christians fix A. D. 811 as corresponding to the date borne on the grant; the first is far too early, and the second is an approximately probable date. The "Report" informs us that the copper plates on which this deed or grant was inscribed were taken away to Portugal by Franciscan Fathers, who left behind a translation of the same. It is known that the Syrian Bishop of Malabar, Mar Jacob, had deposited with the Factor of Cochin all the Syrian copper grants for safe custody; providing however that when necessary access could be had to the same. Gouvea at p. 4 of his "Jornada" says that after having remained there for some long time they could not be found and were lost through some carelessness; de Couto asserts the same in the passage quoted above and also elsewhere. In 1806 at the suggestion of Rev. Claude Buchanan, Colonel Macaulay, the British resident, ordered a careful search for them and they turned up in the record room of Cochin town. The tables then found contained (1) the grant to Irani Cortton of Cranganore, and (2) the set of plates of the grant to Maruvan Sopir Iso of Quilon, but those of the grant to Thomas Cana were not among them; had they not been removed they would have been found with the other plates; this confirms the statement of the writer of the "Report" that they had been taken to Portugal. From what is stated in the royal deed to Thomas Cana it may be taken for granted that the latter brought with him a small colony of Syrians from Mesopotamia, for the privileges conceded include his companions, both men and women, and all his relations.

VII. Besides the arrival of Thomas Cana and his colony, by which the early Christians benefited considerably, the "Report" also records the arrival on this coast of two individuals named Soper Iso and Prodho; they are said to have been brothers and are supposed to have been Syrians. The "Report" gives the following details: they came to possess a promontory opposite Paliport on the north side, which is called Maliankara, and they entered the port with a large load of timber to build a church; and in the Chaldean books of this Serra there is no mention of them, except that they were brothers, came to Quilon, built a church there, and worked some miracles. After death they were buried in the church they had erected; it is said that they built other smaller churches in the country; they were regarded as pious men and were later called saints, their own church was eventually dedicated to them as well as others in the country. Archbishop Alexis Menezes afterwards changed the dedication of these churches to other saints in the Roman Calendar. There is one important item that the "Report" has preserved: "the said brothers built the church of Quilon in the hundredth year after the foundation of Quilon." (This era commences from 25 August, A. D. 825, and the date will thus be A. D. 925). The second of the aforesaid copper-plates mentions Meruvan Sober Iso, one of the above two brothers. The "Report" also makes mention of pilgrims coming from Mesopotamia to visit the shrine of the Apostle at Mylapur; some of these at times would settle there and others in Malabar. It may be stated here that the Syrians of Malabar are as a body natives of the land by descent, and the Syriac trait in them is that of their liturgy, which is in the Syriac language. They call themselves Syrians by way of distinction from the other body of Christians on the coast, who belong to the Latin Rite. The honorific appellation bestowed upon them by the rulers of the country is that of *Mapla*, which signifies great son or child, and they are commonly so called by the people; this appellation had also been given to the descendants of Arabs in the country; the St. Thomas Christians now prefer to be called *Nasrani* (Nazarenes), the designation given by the Mohammedans to all Christians.

VIII. There are certain stone crosses of ancient date in southern India, bearing inscriptions in Pahlavi letters. Extraordinary legends have been spread about them in some parts of Europe; the present writer was shown an engraving purporting to reproduce one of them, with a legend of the Apostolate and martyrdom of St. Thomas, a reproduction of the inscription on his cross. This was attached to the calendar of one of the dioceses of France, and this writer was asked if it were authentic.

To prevent the spreading of such reports it may be useful to state here that of these crosses one is in the Church of Mount St. Thomas, Mylapur, discovered in 1547 after the arrival of the Portuguese in India; the other is in the church of Kottayam, Malabar. Both are of Nestorian origin, are engraved as a bas-relief on a flat stone with ornamental decorations around the cross, and bear an inscription. The inscription has been variously read. Dr. Burnell, an Indian antiquary, says that both crosses bear the same inscription, and offer the following reading: "In punishment by the cross was the suffering of this one. Who is the true Christ, God above and Guide ever pure." These crosses bear some resemblance to the Syro-Chinese Nestorian monument discovered in 1625 at Singan-fu, an ancient capital of China, but erected in 781, and commemorating the arrival in China of Chaldean Nestorian missionaries in 636.

IX. Of the prelates who governed the Church in India after the Apostle's death very little is known; that little is collected and reproduced here. John the Persian, who was present at the Council of Nice (325), is the first known to history claiming the title. In his signature to the decrees of the council he styles himself; John the Persian [presiding] over the churches in all Persia and Great India. The designation implies that he was the [primate] Metropolitan of Persia and also the Bishop of Great India. As metropolitan and chief bishop of the East he may have represented at the council the Catholics of Seleucia. His control of the Church in India could only have been exercised by his sending priests under his jurisdiction to minister to those Christians. It is not known at what date India first commenced to have resident bishops; but between the years 530–35 Cosmas Indicopleustes in his "Topographia" informs us of the presence of a bishop residing at Caliana, the modern Kalyan at a short distance from Bombay. That residence was, in all probability, chosen because it was then the chief port of commerce on the west coast of India, and had easy access and communication with Persia. We know later of a contention which took place between Jesuab of Adiabene the Nestorian Patriarch and Simeon of Ravardshir, the Metropolitan of Persia, who had left India unprovided with bishops for a long period. The patriarch reproached him severely for this gross neglect. We may take it that up to the period 650–60 the bishops sent to India, as Cosmas has said, were consecrated in Persia, but after this gross neglect the patriarch reserved to himself the choice and consecration of the prelates he sent out to India, and this practice was continued till the arrival of the Portuguese on the coast in 1504.

Le Quien places the two brothers Soper Iso and Prodho on the list of bishops of India, but Indian tradition gives it no support, and in this the British Museum MS. Report and Gouvea (Jornada, p. 5) concur. The brothers were known as church-builders, and were reputed to be holy men. Moreover, to include Thomas Cana in the list of bishops is preposterous on the face of the evidence of the copper-plate grant. The "Report" mentions a long period when there was neither bishop nor priest surviving in the land, for they had all died out; the only clerical survival was a deacon far advanced in age. The ignorant Christians, finding themselves without prelates, made him say Mass and even ordain others, but as soon as prelates came from Babylon they put a stop to this disorder. The next authentic information we have on this head comes from the Vatican Library and has been published by Assemani (Bibl. Or., III, 589). It consists of a statement concerning two Nestorian bishops and their companions and a letter from the former written in Syriac to the patriarch announcing their arrival, dated 1504; there is a translation in Latin added to the documents. In 1490 the Christians of Malabar despatched three messengers to ask the Nestorian Patriarch to send out bishops; one died on the journey, the other two presented themselves before the patriarch and delivered their message; two monks were selected and the Patriarch consecrated them bishops, assigning to one the name of Thomas and to the other that of John. The two bishops started on their journey to India accompanied by the two messengers. On arrival they were received with great joy by the people, and the bishops commenced consecrating altars and ordaining a large number of priests "as they had been for a long time deprived of bishops". One of them, John, remained in India, while the other, Thomas, accompanied by Joseph, one of the two messengers, returned to Mesopotamia, taking with them the offerings collected for the patriarch. Joseph returned to India in 1493, but Thomas remained in Mesopotamia.

After about ten years, when the next patriarch ordained three other bishops for India, Thomas went back with them. These new bishops were also chosen from the monks, one was named Jaballa (he was the metropolitan), the second was named Denha, and the third Jacob. These four bishops took ship from Ormus and landed at Kananur; they found there some twenty Portuguese who had recently arrived and presented themselves to them, said they were Christians, explained their condition and rank, and were kindly treated. Of this large number of bishops only one remained to work, and this was Mar Jacob; the other three, including the metropolitan, after a short time returned to their country. Gouvea adds that they were either dissatisfied with their charge or did not like the country. The Portuguese writers mention only two bishops as residents, John who had come before their arrival in India and Mar Jacob. Nothing further is known of John, but Jacob lived in the country till his death. St. Francis Xavier makes a very pretty *elogium* of him in a letter written to King John III of Portugal on 26 Jan., 1549. "Mar Jacob [or Jacome Abuna, as St. Francis styles him] for forty-five years has served God and your Highness in these parts, a very old, a virtuous, and a holy man, and at the same time unnoticed by your Highness and by almost all in India. God rewards him . . . He is noticed only by the Fathers of St. Francis, and they take so good care of him that nothing more is wanted. . . . He has laboured much among the Christians of St. Thomas, and now in his old age he is very obedient to the customs of the Holy Mother Church of Rome." This *elogium* of St. Francis sums up his career for the forty-five years he worked in Malabar (1504–49). He came out as a Nestorian, remained such during his early years, but gradually as he came in touch with the Catholic missionaries he allowed them to preach in his churches and to instruct his people; in his old age he left Cranganore and went to live in the Franciscan convent at Cochin and there he died in 1549. There remain two others—the last of the Mesopotamian prelates who presided over these Christians—Mar Joseph and Mar Abraham; their career will be detailed further on.

X. When Cosmas gave us the information of the existence of a Christian community in "Male (Malabar) where the pepper is grown" he also supplied us with additional details: that they have a bishop residing at Kalyan; that in Taprobano [Ceylon] "an island of interior India where the Indian Ocean is situated" there is a "Christian Church with clergy and the faithful; similarly in the island of Dioscordis [Socotra] in the same Indian Ocean". Then he enumerates the churches in Arabia Felix, Bactria, and among the Huns; and all these churches are by him represented to be controlled by the Metropolitan of Persia. Now at that time the holder of this dignity was Patrick, the tutor, as Assemani designates him, of Thomas of Edessa, a prominent Nestorian to which sect Cosmas also belonged; hence his interest in supplying all these details. The bishop and clergy whom the Metropolitan, Patrick, would send out to all the above-mentioned places and churches would and must have been undoubtedly infected with one and the same heresy. Hence it is quite safe to conclude that at the time of the visit of Cosmas to India (A. D. 530–35) all these churches, as also the Church in India, were holding the Nestorian doctrine of their bishops and priests. Nor should this historical fact cause surprise when we take into consideration the opportunities, the bold attitude and violent measures adopted by the promoters of this heresy after expulsion from the Roman Empire. When the Emperor Zeno ordered Cyrus, Bishop of Edessa, to purge his diocese of that heresy (A. D. 489), the Nestorians were forced to seek refuge across the Roman boundary into Persia. Among them were the banished professors and students of the Persian School of Edessa, the centre of the Nestorian error, and they found refuge and protection with Barsumas, Metropolitan of Nisibis, himself a fanatical adherent of Nestorius. Barsumas at this time also held from the Persian king the office of governor of the frontier.

With the influence Barsumas possessed at court it was an easy thing for him to make the king, already so disposed, believe that the actual bishops holding sees in his territory were friendly to his enemies, the Romans, and that it would be better to replace them by men he knew who would owe allegiance only to the Persian monarch. This stratagem rapidly succeeded in capturing most of those sees; and the movement became so strong that although Barsumas predeceased Acka (Acacius), the occupant of the chief see of Seleucia, a Catholic, yet a Nestorian was selected to succeed the latter (A. D. 496). Thus within the short space of seven years the banished heresy sat mistress on the throne of Seleucia, in a position to force every existing see eastward of the Roman Empire to embrace the heresy and to secure its permanence. Thus the Indian Church suffered the same fate which befell the Churches of Persia, and by 530–35 we find that she has a Nestorian prelate consecrated in Persia and presiding at Kalyan over her future destiny. If further proof is wanted to uphold the above finding, we offer the following historical facts of the control exercised by the Nestorian Patriarch. In 650–60, as above stated, Jesuab of Adiabene claimed authority over India and reproached Simeon of Revardshir, the Metropolitan of Persia, for not having sent bishops to India and so deprived that Church of the succession of her ministry. In 714–28 Saliba Zacha, another Nestorian Patriarch, raised the see of India to metropolitan rank. Again in 857 Theodosius, another Nestorian Patriarch, included the See of India among the exempted which, owing to distance from the patriarchal see, should in future send letters of communion but once in six years. This ruling was subsequently incorporated in a synodal canon.

If we look to the general tradition of the St. Thomas Christians it will be found that all their prelates came from Babylon, the ancient residence as they say, of the Patriarch or Catholicos of the East. It is further known and acknowledged by them that whenever they remained deprived of a bishop for a long time they used to send messengers to that Patriarchate asking that bishops be sent out to them. Sufficient proof of this practice has been given above when discussing the arrival of four bishops in 1504. The Holy See was fully aware that the Malabar Christians were under the control of the Nestorian Patriarch. When Julius III gave Sulaka his Bull of nomination as the Catholic Chaldean patriarch, he distinctly laid down the same extent of jurisdiction which had been claimed and controlled by his late Nestorian predecessor; hence in the last clause it is distinctly laid down: "In Sin Massin et Calicuth et tota India." It becomes necessary to fix this historical truth clearly, because during this decade some of the younger generation in Malabar have begun to deny this historical fact. They would wish people to believe that all the Portuguese missionaries, bishops, priests, and writers were completely mistaken when they styled them Nestorians in belief, and because of this false report all subsequent writers continued to call them Nestorians. The reader who has gone through the statement of facts above related must be conscious that such an attempt at distorting or boldly denying public facts is utterly hopeless. They maintain, in support of their false view, that there always had been a small body among the Chaldeans in Mesopotamia who remained attached to the true Faith, and from them they received their bishops. This plea is historically false for the bishops they received all came to them from the Nestorians, and as to the hypothesis of the existence during all these centuries back of a Catholic party among the Nestorian Chaldeans, it is too absurd to be discussed. It was only after the conversion of Sulaka in 1552 that the Chaldeans in part returned to the unity of faith. The truth is that the Malabar Church remained from A. D. 496 up till then in heresy.

XI. During the centuries that these Christians were isolated from the rest of Christendom their sole intercourse was limited to Mesopotamia whence the Nestorian Patriarch would from time to time supply them with prelates. But from the close of the thirteenth century Western travellers, chiefly missionaries sent out by the popes, sent to the West occasional news of their existence. Some of these it will be useful to reproduce here. The first who informed the world of the existence of these St. Thomas Christians was Friar John of Monte Corvino. After he had spent several years as a missionary in Persia and adjoining countries, he proceeded to China, passing through the Indian ports between the years 1292 and 1294. He tells us in a letter written from Cambales (Peking) in 1305 that he had remained thirteen months in that part of India where the Church of St. Thomas the Apostle stood (Mylapore); he also baptized in different places about one hundred persons. In the same letter he says that there were in Malabar a few Christians and Jews, but they were of little worth; he also says that "the inhabitants persecute much the Christians" (Yule, "Cathay and the Way Thither", I).

The next visitor is Marco Polo, who on his return from China (c. 1293)touched the India of St. Thomas. Of his tomb he tells us: "The body of Messer Saint Thomas the Apostle lies in the province of Malabar, at a certain little town having no great population; 'tis a place where few traders go . . . Both Christians and Saracens however greatly frequent it in pilgrimage, for the Saracens also hold the Saint in great reverence. . . . The Christians who go in pilgrimage take of the earth from the place where the Saint was killed and give a portion thereof to any who is sick, and by the power of God and of St. Thomas the sick man is incontinently cured. . . . The Christians", he resumes later, "who have charge of the church have a great number of Indian nut trees [cocoanuts], and thereby get their living" (Marco Polo, Yule's, 2nd edit., II, 338). Friar Jordan, a Dominican, came to India as a missionary in 1321; he then had as companions four Franciscan friars, but on approaching India he had parted from them to make diversion; in the meanwhile the vessel conveying the others was by stress of weather compelled to enter Tana, a port on the west coast, where the Khasi of the place put them to death as they would not embrace Mohammedanism; the feast of Blessed Thomas of Tolentino and his companions is fixed on 6 April in the "Martyrologium Romanum". Later Jordanus, hearing what had happened, rescued their bodies and gave them burial. He must then have gone back to Europe, for he is next heard of in France in 1330, when Pope John XXII consecrated him at Avignon Bishop of Quilon. He left for the East the same year with two letters from the pope, one to the chief of the Christians of Quilon and the other to the Christians at Molephatam, a town on the Gulf of Manaar. In the first the pope beseeches "that divisions cease and clouds of error stain not the brightness of faith of all generated by the waters of baptism . . . and that the phantom of schism and wilful blindness of unsullied faith darken not the vision of those who believe in Christ and adore His name".

Much the same in other words is repeated in the second letter, and they are urged to unity with the Holy Catholic Roman Church. The pope recommends the bishop to the kindness of the people, and thanks them for that shown to the friars who are working among them. All we know is that Bishop Jordanus was sent out with these letters, but nothing further is heard of him. He wrote a small book named "Mirabilia", edited by Col. A. Yule for the Hakluyt Society, published in 1863 (see also "Cathay", I, 184). The next visitor is Blessed Oderic of Pordenone, who about 1324–25 landed at Tana, recovered the bodies of the four friars, Thomas and his companions who had there suffered martyrdom, and conveyed them to China. On his way he halted at Quilon, which he calls *Palumbum;* thence he took passage on a Chinese junk for a certain city called Zayton in China. He mentions the Christians at Quilon, and that at Mylapore there were fourteen houses of Nestorians ("Cathay", I, 57). A few years later Giovanni de Marignolli, the papal delegate to China, arrived at Quilon. He stayed there at a church dedicated to St. George, belonging to the Latin Rite, and he adorned it with fine paintings and taught there the Holy Law. After dwelling there for upwards of a year he sailed to visit the shrine of the Apostle; he calls the town *Mirapolis.* After describing the culture of pepper on the coast he adds: "the pepper does not grow in forests but in gardens prepared for the purpose; nor are the Saracens the proprietors, but the Christians of St. Thomas, and these are the masters of the public weighing-office" [customs' office]. Before quitting Quilon he erected a monument to commemorate his visit, and this was a marble pillar with a stone cross on it, intended to last, as he says, till the world's end. "It had the pope's arms", he says, "and my own engraved on it, with an inscription both in Indian and Latin characters. I consecrated and blessed it in the presence of an infinite multitude of people." The monument stood there till late in the nineteenth century, when by the gradual erosion of the coast it fell into the sea and disappeared. He concludes his narrative by saying that after staying a year and four months he took leave of the brethren, i. e. the missionaries who were working in that field.

XII. The two last Syrian bishops were Mar Joseph Sulaka and Mar Abraham; both arrived in Malabar after the arrival of the Portuguese. Their case presents two questions for discussion; were they canonically appointed, and had they completely rejected Nestorianism? As to the first there is no doubt that his appointment was canonical, for he, the brother of the first Chaldean patriarch, was appointed by his successor Abed Jesu and sent out to Malabar, and both the above patriarchs had their jurisdiction over the Church in Malabar confirmed by the Holy See. Mar Joseph was sent to India with letters of introduction from the pope to the Portuguese authorities; he was besides accompanied by Bishop Ambrose, a Dominican and papal commissary to the first patriarch, by his *socius* Father Anthony, and by Mar Elias Hormaz, Archbishop of Diarbekir. They arrived at Goa about 1563, and were detained at Goa for eighteen months before being allowed to enter the diocese. Proceeding to Cochin they lost Bishop Ambrose; the others travelled through Malabar for two and a half years on foot, visiting every church and detached settlement. By the time they arrived at Angamale war broke out. Then Mar Elias, Anthony the *socius* of the deceased prelate, and one of the two Syrian monks who had accompanied them, left India to return; the other monk remained with Archbishop Joseph Sulaka. For some time the new prelate got on well with the Portuguese and the Jesuit missionaries, in fact, they praised him for having introduced order, decorum, and propriety in the Church services and all went harmoniously for some time. Later, friction arose because of his hindering the locally-ordained Syrians from saying Mass and preaching and instructing his flock. Eventually an incident revealed that Mar Joseph had not dropped his Nestorian errors, for it was reported to the Bishop of Cochin that he had attempted to tamper with the faith of some young boys in his service belonging to the Diocese of Cochin. This came to the knowledge of the bishop, through him to the Metropolitan of Goa, and thence to the viceroy; it was decided to remove and send him to Portugal, to be dealt with by the Holy See.

The following is the nature of the incident. Taking these youths apart, he instructed them that they should venerate the Blessed Virgin as the refuge of sinners, but were not to call her the Mother of God, as that was not true; but she should be styled Mother of Christ (Nestorius, refusing at the Council of Ephesus the term *Theotokos* proposed by the council, substituted that of *Christokos*, which the Fathers refused to accept because under this designation he could cloak his error of two persons in Christ). Mar Joseph was sent to Portugal; arriving there he succeeded in securing the good-will of the queen, then regent for her young son; he abjured his error before Cardinal Henry, expressed repentance, and by order of the queen was sent back to his diocese. Gouvea tells us that as he continued to propagate his errors on his return he was again deported and Cardinal Henry reported his case to St. Pius V. The pope sent a Brief to Jorge, Archbishop of Goa, dated 15 Jan., 1567, ordering him to make enquiries into the conduct and doctrine of the prelate; in consequence of this the first provincial council was held; the charges against Mar Joseph were found to be true and he was sent to Portugal in 1568, thence to Rome, where he died shortly after his arrival.

While the former was leaving India there arrived from Mesopotamia an impostor named Abraham, sent by Simeon the Nestorian Patriarch. He succeeded in entering Malabar undetected. At the appearance of another Chaldean who proclaimed himself a bishop the people were greatly delighted and received him with applause; he set about at once acting as bishop, holding episcopal functions, and conferring Holy orders and quietly established himself in the diocese (Gouvea, p. 7, col. 2). Later the Portuguese captured him and sent him to Portugual, but *en route* he escaped at Mozambique, found his way back to Mesopotamia, and went straight to Mar Abed Jesu, the Chaldean Patriarch, having realized from his Indian experience that unless he secured a nomination from him it would be difficult to establish himself in Malabar. He succeeded admirably in his devices, obtained nomination, consecration, and a letter to the pope from the patriarch. With this he proceeded to Rome, and while there at an audience with the pope he disclosed his true position (Du Jarric, "Rer. Ind. Thesaur.", tom. III, lib. II, p. 69). He avowed to the pope with his own lips that he had received Holy orders invalidly. The pope ordered the Bishop of San Severino to give him orders from tonsure to the priesthood, and a Brief was sent to the Patriarch of Venice to consecrate Abraham a bishop. The facts were attested, both as to the lesser orders and the episcopal consecration, by the original letters which were found in the archives of the Church of Angamale where he resided and where he had died.

Pope Pius IV used great tact in handling this case. Abed Jesu must have taken Abraham to be a priest; he is supposed to have abjured Nestorianism, and professed the Catholic faith, and conferred on him episcopal consecration; the pope had to consider the position in which the patriarch had been placed by his consecration and nomination of the man: the defects were supplied, and Abraham succeeded also in obtaining his nomination and creation as Archbishop Angamale from the pope, with letters to the Archbishop of Goa, and to the Bishop of Cochin dated 27 Feb., 1565. Such was the success of this daring man. On arrival at Goa he was detained in a convent, but again escaped and entered Malabar. His arrival was a surprise and a joy to the people. He kept out of the reach of the Portuguese, living among the churches in the hilly parts of the country. As time passed on he was left in peaceful occupation. As is usual in such cases the old tendencies assumed once more their ascendency, and he returned to his Nestorian teaching and practices. Complaints were made; Rome sent warnings to Abraham to allow Catholic doctrine to be preached and taught to his people. At one time he took the warning seriously to heart. In 1583 Father Valignano, then Superior of the Jesuit Missions, devised a means of forcing a reform. He persuaded Mar Abraham to assemble a synod, and to convene the clergy and the chiefs of the laity. He also prepared a profession of faith which was to be made publicly by the bishop and all present. Moreover, urgent reforms were sanctioned and agreed to. A letter was sent by Pope Gregory XIII, 28 Nov., 1578, laying down what Abraham had to do for the improvement of his diocese; after the above-mentioned synod Abraham sent a long letter to the pope in reply, specifying all that he had been able to do by the aid of the Fathers (see letter, pp. 97–99, in Giamil). This is called the first reconciliation of the Syrians to the Church. It was formal and public, but left no improvement on the general body, the liturgical books were not corrected nor was Catholic teaching introduced in the Church.

In 1595 Mar Abraham fell dangerously ill (Du Jarric, tom. I, lib. II, p. 614). Unfortunately he survived the excellent sentiments he then had and recovered. After about two years, in 1597 (Gouvea, p. ii) he was a second time again dangerously ill; Archbishop Aleixo de Menezes wrote and exhorted him to reform his people, but for answer he had only frivolous excuses. He would not even avail himself of the exhortations of the Fathers who surrounded his bed, nor did he receive the last sacraments. Thus he died. The viceroy made known his death to Archbishop Menezes, then absent on a visitation tour, by letter of 6 Feb., 1597.

XIII. Archbishop Menezes received intelligence of the death of Mar Abraham while on a tour of pastoral visitation at Damão. Fearing the work on hand could not be postponed, he decided to act on the powers delegated to him by the pope in his last Brief, and nominated Father Francisco Roz of the Society of Jesus who undoubtedly fulfilled the requirements demanded by the pope for the appointment. On receipt of the letter and the instructions accompanying it, the superior, knowing that the late Abraham before his death had assigned to his archdeacon the government of the church pending the arrival of another bishop from Babylon, and the same had been accepted by the people, and foreseeing also the insecurity of the position, decided that it would be prudent to await the return of the archbishop before taking any further step. The archbishop on returning to Goa weighed the gravity of the case, and felt bound in conscience to put aside every other duty for the time being, and safeguard the Syrian Christians from falling again into the hands of a new heretical intruder. He decided on visiting the Serra personally. Father Nicholáo Pimenta, then the superior of the Jesuit missions in India, writing to the General of the Society, Father Claudius Acquaviva, takes up the narrative as follows: "It was not small comfort to all that Alexius Menezes, the Lord Archbishop of Goa, moved by his zeal for the salvation of souls and at our persuasion undertook to visit the ancient Christians of St. Thomas, spread through the hilly parts of Malabar. There was great danger that after the death of Archbishop Abraham at Angamale, and the succession of the Archdeacon George to the government of the Church on the demise of the prelate, she would lapse again under the sway of Nestorian prelates; nor were there wanting persons of ecclesiastical rank possessed of means who proposed to proceed to Babylon and bring thence another archbishop. To the Archbishop of Goa not only by metropolitan right, but also in virtue of Apostolic letters appertained the right to assume the administration of that Church *sede vacante;* and he took upon himself the task of retaining the vacillating archdeacon in due submission to the Holy See and avoiding schism."

He therefore issued instructions to the rector of the Vaipicotta College, enclosing a letter of appointment naming the archdeacon administrator of the diocese provided he in the presence of the rector made a solemn profession of faith. The archdeacon expressed his satisfaction on receiving the intimation and promised to make the profession demanded on a feast day. But later on he would neither make the profession, nor would he accept the nomination of administrator as coming from the archbishop of the diocese. Afterwards he caused it to be reported that he had so acted on the advice of others. The Archbishop of Goa, after taking counsel with the Fathers, decided on starting on the visitation of the Archdiocese of Angamale to induce that Church to receive a prelate from the Sovereign Pontiff. On this coming to be known all sorts of difficulties were raised to induce him to abandon his project, even from ecclesiastics, with such pertinacity that the archbishop wrote to Pimenta: "Heaven and earth have conspired against my design." But he manfully faced the work before him, and went through it with singular firmness of character and prudence, and supported by Divine aid he began, continued, and completed the arduous task he had undertaken with complete success.

During the visitation (full details of which are given by Gouvea in the "Jornada", the one source whence all other writers have obtained their information, some even going so far as entirely to distort the facts to satisfy their prejudice) the archbishop underwent all sorts of hardships, visiting the principal parishes, addressing the people, holding services, and everywhere conferring the sacraments, of which these people were deprived. He caused the Nestorian books in the possession of the churches and in the hands of the people to be expurgated of their errors, and they were then restored to their owners. All the books then existing among the Syrians were in MS. form; printed books among them did not exist at this period. Passages that denied the supreme authority of the Apostolic See of Rome were similarly deleted. He also caused capable priests to be sought out, and these he placed in charge of parishes. Eventually he established eighty parishes. Thus he prepared his ground for the reform of this Church which he intended to carry out. The synod was opened with great solemnity and pomp on 20 June, 1599, at the village of Udiamparur, whence it is known as the Synod of Diamper. The Acts were published in Portuguese as an appendix to the "Jornada"; they were also translated into Latin. The opening Act of the synod was the profession of faith. The archbishop was the first to make his profession, then followed the archdeacon who made his in Malayalam, a translation of the former prepared for the purpose. Subsequently the clergy in turn made theirs in the hands of the archbishop as the archdeacon also had done. The Latin text may be found with the Latin text of the synod, and separate in "Juris Pontificii de Propaganda Fide", Pars. I, vol. VI, part II, p. 243. Besides the archbishop and certain Jesuit Fathers who assisted him there were some 153 Syrian priests and about 600 laymen deputed by the congregation to represent them; all these signed the decrees that were passed by the synod and proclaimed the orthodox faith embodied in the act of profession taken by the entire clergy. The archbishop addressed the synod on the falsity of the errors of Nestorius up till then held by that Church, the assembly denounced them, anathematized the Nestorian Patriarch, and promised obedience and submission to the Roman Pontiff.

Among the calumnies spread against Menezes and the synod the most prominent is that all the Syriac books of the community were burnt and destroyed by order of the synod. What was done in this matter under the decree passed in the fifth session is thus described in the "Jornada" (tr. Glen, book I, ch. xxiii, p. 340). After the above condemnation of errors it was decided that certain books which had been named and were current in the Serra and full of errors should be burnt; that others were to be censured only until they were corrected and expurgated. The list of books to be burnt is given in the 14th decree of the third session. The books consist: (1) of those *ex professo* teaching Nestorian errors; (2) containing false legends; (3) books of sorceries and superstitious practices. None of these were capable of correction. In all other books that had any statements containing doctrinal errors, the latter were erased. The "Jornada" (p. 365) gives the system adopted during the visitation of the churches for the correction of books: after Mass was said all books written in Syriac, whether the property of the Church or of private individuals, were handed over to Father Francisco Roz, who with three *Cathanars* (Syrian priests) specially selected for the purpose would retire to the vestry and there correct the books in conformity with the directions given by the synod; those that were condemned and forbidden were handed over to the archbishop, who would order them to be burnt publicly. Under his orders no book capable of being purged from heretical error would be destroyed, but those *ex professo* teaching heresy would be destroyed. After the conclusion of the synod Archbishop Menezes continued his visitation of the churches down to Quilon and then returned to Goa. He did not forget to send from thence a letter of warm thanks to Father Pimenta for the continuous and important aid given him by the Fathers of the Society all through the work he had to perform in Malabar.

XIV. In making provision for the future government of the Syrian Church in Malabar Clement VIII had to adopt such measures as would secure its permanency in the faith and exclude the danger of a relapse. He decided that it would be the safest course to appoint a Latin prelate in sympathy with the people and fully acquainted with their liturgical language. The selection fell on Father Roz, no doubt after hearing the opinion of Archbishop Menezes. Father Roz was consecrated by the Archbishop at Goa under the title of Bishop of Angamale in 1601. Four years later Paul V transferred him (1605) to the new See of Cranganore, which he created an archbishopric in order that the faithful brought to unity should not feel that the honour of their see had suffered any diminution of honour. The new prelate made a visitation tour through the diocese, correcting the liturgical books at every church where this had not been done, and enforcing everywhere the rules sanctioned by the Synod of Diamper. In 1606 he convened and held a diocesan synod; no further details of his administration are handed down to us. After twenty-three years of strenuous episcopate he died at Parur, his ordinary residence, 18 Feb., 1624, and was buried in the church. Besides the Latin Canon of the Mass he had also translated the Latin ritual into Syriac for the administration of the Holy Sacraments by the clergy. Years later, on the occasion of the first pastoral visit of the first Vicar Apostolic of Trichur to the church of Parur in 1888, on enquiring after the tomb of the archbishop, he was told that no tomb of his was known to exist there, but after careful search had been made the tombstone, with its Malayalam inscription in ancient Tamil characters, was found and is now affixed to the inner wall of the church. The loss of all knowledge of the tombstone was caused by the sacking and burning of this church with many others by the soldiers of Tippoo Sultan on his second invasion of the coast. Paulinus a Sancto Bartholomæo, who had visited the church in 1785 and had taken a transcript of the inscription at the time, of which he gives a Latin translation in his "India Christ. Orient.", p. 64, did not read the name Roz on the stone, however the name is there in a flaw of the stone and has been read on rediscovery.

Father Estevão de Brito, also a Jesuit, was designated successor, and was consecrated by the Archbishop of Goa in the Church of Bom Jesus, Goa, on 29 Sept., 1624, and left Goa for his diocese on 4 Nov. He died on 2 Dec., 1641, having governed the see for over seventeen years. The third of the series was Francisco Garcia, of the same society. He was consecrated Bishop of Ascalon on 1 Nov., 1637, with right of succession by the Archbishop of Goa in the Jesuit Church of Bom Jesus, Goa, and succeeded to the See of Cranganore in 1641. Under this prelate a frightful schism broke out (1653) and his entire flock, with all his clergy and churches, withdrew from his allegiance. Out of the entire body of 200,000 Syrian Christians only some 400 individuals remained faithful. This misfortune has by most writers been attributed to Garcia's want of tact, obstinacy, and sarcastic disposition: as to the latter defect there is one instance, and that at the last opportunity for reconciliation, which fell through owing to his harsh treatment of the delegates sent to him by his revolted flock. But he was not responsible for the schism. This had been hatched many years previously during the lifetime of his predecessor de Brito, secretly and unknown to him. Here the dates only of documents can be quoted. On 1 Jan., 1628 (see German, p. 440) the Archdeacon George wrote a letter to the papal nuncio at Lisbon complaining that no answer was given to a letter sent some twenty years earlier regarding the spiritual wants of this Christian people. In 1630 Rome was informed of these complaints the substance of which was that Jesuits only controlled these Christians, that they were unsuited, and had controlled them for over forty years, and they wanted other religious orders to be sent. The Sacred Congregation sent instructions that other orders should be admitted into the diocese.

Paulinus (op. cit., pp. 70 sq.) adduces further evidence of the trickery and treachery of Archdeacon George. In 1632 a meeting was convened by him at Rapolin consisting of clergy and laity, when a letter of complaint was sent to the King of Portugal against the Jesuit Fathers; these very same complaints formed the heads of their grievances in 1653, when open schism was proclaimed to secure independence and oust the Jesuits. The plot had been hatched for a good number of years; it was begun by Archdeacon George (d. 1637) who was succeeded in office by a relative, another Thomas de Campo (Thoma Parambil) who in 1653 headed the revolt. After the schism had broken out the intruder Ahatalla, a Mesopotamian prelate, was deported by the Portuguese, who took him by ship off Cochin and there lay at anchor. The Christians, coming to know of the fact, threatened to storm the fort, which the governor had to man with his soldiers, while the ship sailed away to Goa during the night. The revolted seeing their last attempt to secure a Bagdad prelate frustrated, leaders and people took a solemn vow that they would never again submit to Archbishop Garcia. Finding themselves in this position they thought of calling to their aid the Carmelite Fathers who had visited Malabar but were then at Goa. When Alexander VII came to know the calamity which had befallen the Syrian community, he sent out (1656) the Carmelites, Fathers José de Sebastiani and Vincente of St. Catherine, to work for the return to unity and resubmission to their archbishop of this revolted church. Later other Carmelite Fathers joined in the good work. Within a year of their arrival (1657) the Carmelites had succeeded in reconciling forty-four churches. Although Archdeacon George had remained obdurate, a relative of his, Chandy Perambil (Alexander de Campo), headed the return movement, but they would have nothing to do with Archbishop Garcia.

XV. Under these circumstances Father José de Sebastiani decided to return to Rome and inform the pope of the real difficulty which stood in the way of permanent reconciliation. The pope on learning the state of the case had Father José consecrated and appointed him Commissary Apostolic for Malabar, with power to consecrate two other bishops, naming them vicars Apostolic. Provided with these powers he returned to Malabar in 1661 and took up his work. By this time Archbishop Garcia had been removed from the scene by death. Between 1661 and 1662 the Carmelite Friars under Bishop José had reclaimed the large number of eighty-four churches, leaving to the leader of the revolt, the aforesaid Archdeacon Thomas, only thirty-two churches. Both these figures are of great importance for the subsequent history of the Malabar Syrians. The eighty-four churches and their congregations were the body from which all the Romo-Syrians have descended, while the other thirty-two represent the nucleus whence the Jacobites and their subdivisions, Reformed Syrians, etc., have originated. In January, 1663, the political situation regarding these Christians was entirely changed. The Dutch had arrived on the coast and had captured Cochin. The Portuguese power fell. The new masters expelled not only all the Portuguese clergy but also forced Bishop José and his religious to leave the country. In this predicament the bishop selected and consecrated the native priest Chandy Perambil (Alexander de Campo) and made him a vicar Apostolic over the flock he was forced to leave.

Before departing, however, he handed to the Dutch Government of Cochin a list of the eighty-four churches that were under his control and commended Bishop Chandy and the Christians of these churches to his protection. This the governor undertook to fulfil. Though the Dutch did not trouble themselves about the Syrian Christians, yet they would not permit any Jesuit or Portuguese prelate to reside in Malabar, although simultaneously with Bishop José de Sebastiani the other Carmelite missionaries had also to depart. However, they were not absent long, for eventually they returned by ones and twos and were not molested. Later, in 1673, they established themselves at Verapoly and built a church there, having obtained the land rent-free from the Rajah of Cochin; it is yet the headquarters of the Carmelites in Malabar. One of the Carmelite Fathers named Matthew even came into friendly relations with the Dutch Governor van Rheede, and aided him in compiling his voluminous work on local botany known as "Hortus Malabaricus". The Carmelites working among the Syrians under Bishop Chandy remained on good terms with him; the bishop died in 1676. Raphael, a priest of the Cochin diocese, was selected to succeed the former, but he turned out a failure and died in 1695. The year following, Father Peter-Paul, a Carmelite, was created titular Archbishop of Ancyra, and was appointed vicar Apostolic for Malabar. With his arrival in 1678 there was a considerable improvement in the relations between the Dutch Government and the Carmelite Fathers. The Archbishop Peter-Paul was a prince of the House of Parma, and his mother was the sister of Pope Innocent XII; before coming out to Malabar he had obtained a decree from the Government of Holland authorizing the residence in Malabar of one bishop and twelve Carmelite priests who had to be either Italians, Germans, or Belgians; but they were not admitted into Cochin.

The French traveller Anquetil du Perron, who visited Malabar in 1758, offers the following statistics regarding the number of Christians on the coast which he had obtained from Bishop Florentius, the Carmelite Vicar Apostolic of Malabar. He tells us that the bishop believed the total number of Christians to amount to 200,000; of these 100,000 were Catholic Syrians, another 50,000 were of the Latin Rite; both these were under his jurisdiction, while the revolted Syrians, who may be classed as Jacobites, were under Mar Thomas VI (who on his consecration in 1772 assumed the name and style of Dionysius I), and numbered 50,000. From the death of Archbishop Garcia in 1659 the See of Cranganore had no resident bishop till 1701, when Clement XI appointed João Rebeiro, a Jesuit. When the latter assumed charge the Carmelite Vicar Apostolic, Angelus Francis, told his Syrian flock that his jurisdiction had ceased and they must now pass over to that of the new Archbishop of Cranganore. The Syrians refused to acknowledge the new archbishop and sent a petition to Rome that they preferred to remain under the Carmelites, who had seventy-one churches in complete submission and eighteen in partial union (i. e., the parish was divided and part had submitted to Rome), while only twenty-eight churches remained altogether separate. Pope Clement, after informing the King of Portugal of the state of things, extended in 1709 the jurisdiction of Bishop Angelus over the dioceses of Cranganore and Cochin, and the pope assigned as a reason for doing so that the Dutch would not tolerate any Portuguese prelate in the country, and the Christians threatened rather to return to schism than accept the bishop sent out. For fuller particulars of this period the reader is referred to: G. T. Mackenzie, "History of Christianity in Travancore", in Census Report of 1901, Trevandrum; and Paulinus a Sancto Bartholomæo, "India Orientalis Christ." (Rome, 1794.)

On the arrival of the Dutch and the capture of Cranganore it became impossible for the Jesuits to retain the college at Vipicotta; they abandoned the place and removing to the interior beyond the reach of their open enemies, opened a new college, called St. Paul's College, at Ambalacad, whence they controlled their new missions on the east coast. Bishop Rebeiro returned there and carried on his work; eventually several of the Syrian Catholic parishes went over to the succeeding Archbishop of Cranganore, and these eventually lapsed under the control of the Archbishops of Goa. Bishop Rebeiro died at the college of Ambalacad on 24 Sept., 1716, is buried in the church of Puttencherra and has a tombstone with an inscription in Portuguese. His successors fixed Puttencherra as their residence, and the parish church became a pro-cathedral. The following particulars of their nomination and death are here recorded. Archbishop Rebeiro was succeeded by Antonio Carvallo Pimental also a Jesuit, consecrated as the former had been at the church of Bom Jesus, Goa, by the archbishop on 29 Feb., 1722, d. at Puttencherra on 6 March, 1752. Paulinus says of him: "vir doctus et Malabarensibus gratus, qui eum nomine Budhi Metran, sapientis et eruditi præsulis compellebant." He has a tombstone with inscription. João Luiz Vasconcellos, also a Jesuit, was consecrated at Calicut by Bishop Clemente of Cochin in 1753, and d. at Puttencherra in 1756; the church contains his tomb-stone with inscription. Salvador Reis, the last of the series who resided in India, was also a Jesuit; he was consecrated by the same Bishop Clemente at Angengo on 5 Feb., 1758, d. on 7 April, 1777, at Puttencherra and has his tombstone with inscription in the same church. Paulinus records of him "vir sanctimonia vitæ præclarus"; he survived the suppression of his order. This closes the list of the bishops who have governed the See of Cranganore.

To complete the historical account of the Syrian Malabar Church, brief mention should also be made of the line of prelates who ruled over the schismatics who eventually became Jacobites, embracing that error through their prelates: Thomas I, proclaimed a bishop by those he had led (1653) into the aforesaid schism after the imposition of the hands of twelve priests his followers, and the placing on his head of a mitre and in his hand a pastoral staff. He continued obdurate and died a sudden death in 1673. Thomas II, brother of the former, proclaimed in 1674, died eight days later struck by lightning. Thomas III, nephew of the former, received the mitre in 1676, a Jacobite. Thomas IV of the same family, succeeded in 1676 and d. in 1686, a Jacobite. Thomas V, a nephew of the former, made every effort to obtain consecration but failed, d. in 1717, a Jacobite. Thomas VI received the mitre from his dying uncle and the imposition of hands of twelve priests. He wrote to the Jacobite Patriarch of Antioch to send bishops. Eventually the Dutch authorities helped him and obtained for him three bishops, on condition of his defraying the expenses. Three Jacobite bishops came out to India in 1751, Mar Basil, Mar Gregory, and Mar John. The first named died a year after arrival; the second years later consecrated Mar Thomas VI a bishop in 1772, and he assumed the name of Dionysius I. The Dutch authorities found great difficulty in obtaining payment for the expenses incurred; a suit was instituted against the Jacobites in the Travancore Rajah's court in 1775 and payment of the amount, twelve thousand pounds, was obtained. He died in 1808.

For the long period between 1678 and 1886, the Catholic Syrians remained under the uninterrupted control of about fifteen Carmelite Bishops as vicars Apostolic. During this period there had often arisen severe troubles which cannot here be detailed, quarrels between Syrian and Latin Christians, agitation against the control of some bishops; over and above these the ordinary trials of controlling such a large, factious, and difficult body. There had also been two most serious schismatical intrusions within this Syrian fold by Catholic Chaldean prelates who had come from Mesopotamia with the full connivance of the Chaldean Patriarch and against the express orders of the Roman Pontiff. The Carmelites had to face and surmount all these difficulties and keep the flock in due submission to ecclesiastical regime. Of the two intrusions, the first was that of the Chaldean Bishop Mar Roccos, who entered Malabar in 1861. Pius IX denounced him to the faithful as an intruder, yet he met with a complacent reception in many of the churches, succeeded in stirring up the dormant hydra of schism, and caused a great agitation. Fortunately for the peace of the Church he was persuaded to return to Mesopotamia within the year. The second, who came to Malabar in 1874, caused much greater harm, the evil effects of which seem to be permanent in the principal church of Trichur, though elsewhere in process of time those evil effects have been remedied. This was the Bishop Mellus, whom the patriarch had sent over in spite of the strict prohibition of the same pope. It was only when after repeated admonitions, the pope had fixed a limit of time after which should he continue refractory he would be excommunicated, that he yielded and sent Bishop Mellus instructions to return. When the troublesome character of these people is taken into consideration it reflects great credit on the Carmelite Order that the bishops in charge were successful in retaining them as a body in the unity of Holy Church.

XVI. The Mellusian schism, though broken by the adverse judgments of the Madras High Court, was by no means yet extinct when in the autumn of 1878 the Holy See decided on placing the Syrian Christians under separate administration, appointing two vicars Apostolic of the Latin Rite for the purpose. These were Rev. A. E. Medlycott, Ph.D., Military Chaplain in the Punjab, educated in the Propaganda College, Rome, and consecrated by the Apostolic Delegate Mgr. A. Ajuti on 18 Dec., 1887, at Ootacamund, titular Bishop of Tricomia, appointed to the Vicariate Apostolic of Trichur; and the Rev. Charles Lavigne S.J., former private secretary of the late Father Beckx, General of the Society, consecrated in Belgium before coming out, appointed to the See of Kottayam, later called of Changanacherry. Under the Concordat of Leo XIII with the King of Portugal an important advantage had been gained by the suppression of the Padroado jurisdiction (Cranganore Archbishops) over the Syrian churches. The first task the new bishops had to face was to amalgamate into one harmonious whole the two sections of this Church, that which had been under the Carmelites with that which had belonged to the Goan or Padroado jurisdiction, for the two had been for long years in open antagonism. This union fortunately was successfully effected. The other task was to establish something like a proper administration and control over the churches. This took longer time. The northern churches belonging to Trichur had not seen their prelates for perhaps a century, the two Chaldean Bishops had utilized the fact to their own advantage, and the troubles caused by them in these churches can be easily imagined; but with firmness and patience a fair working administration was introduced.

The result may thus be briefly summed up. The Vicariate of Trichur had a Catholic Syrian population of 108,422 with eighty-three parish churches and twenty-two chapels-of-ease, served by 118 priests of the Syrian Rite, besides 23 Syrian Carmelite Tertiary monks, in two monasteries; there was also a convent of 24 native Tertiary nuns with a middle-class school of 33 girls. The bishop on taking charge found that there were practically no schools, except one provided for clerics; he took early steps to open as many elementary parish schools as possible; within nine years (1888-96) the vicariate was provided with no less than 231 elementary parish schools for both sexes, educating over 12,000 children, besides a high school (St. Thomas's College), with 95 students; there were also 56 boys in St. Aloysius's High School, under the Tertiary monks. A catechumenate was opened, where annually about 150 heathen converts were baptized; a fine building was under construction for a suitable residence, and plans were prepared to house the above college in a handsome structure. This was the condition of things when the bishop went to Europe on sick leave. The Vicariate of Kottayam had a Catholic population of 150,000, with 108 parish churches and 50 dependent chapels, served by a numerous clergy of over 300 priests; it had 35 Tertiary monks, besides novices, in five monasteries; also three convents of native Tertiary Carmelite nuns educating girls, two orphanages under Tertiary Sisters of St. Francis, four catechumenates, two seminaries, with 96 students. The higher class clerical students of both vicariates attended the central Pontifical Seminary at Puttenpally. The parochial schools numbered 200, but the number of pupils was not published. There were three English Schools: Mananam, 60; Campalam, 80; and another with 20 students.

In 1895 both vicars Apostolic happened to be absent on leave. During this period the Holy See decided on a change of régime, yielding to the wishes of the people to grant them native bishops.

XVII. The two vicariates described above were split into three, and they were styled Trichur, Ernakulam, and Changanacherry; the new vicariate was formed of the southern portion of that of Trichur and of the northern portion of Changanacherry. The changes were carried out under Leo XIII by Brief of 28 July, 1896, "Quæ Rei Sacræ". Rev. John Menachery, as Bishop of Paralus, was appointed to Trichur. Rev. Aloysius Pareparambil, titular Bishop of Tio, was appointed to Ernakulam, and Rev. Matthew Makil, Bishop of Tralles, was appointed to Changanacherry; all three received consecration from the Apostolic Delegate Mgr. Zaleski, at Kandy on 15 Oct., 1896.

The latest ecclesiastical returns of these three vicariates (1911) give: *Trichur:* Catholic population, 91,064; children being educated, 19,092; *Ernakulam:* Catholic population, 94,357; children being educated, 9950; *Changanacherry:* Catholic population, 134,791; children being educated, 2844.

The future of this people depends very largely on education for their welfare and technical training for their development.

A. E. MEDLYCOTT.

Thomas Cottam, BLESSED, martyr, b. 1549, in Lancashire; executed at Tyburn, 30 May, 1582. His parents, Laurence Cottam of Dilworth and Anne Brewer, were Protestants. Having completed his studies at Brasenose, Oxford (M.A., 14 July, 1572) he became master of a grammar school in London. Converted there to the faith by Thomas Pound he went over to Douai, and was ordained deacon at Cambrai, Dec., 1577. Desirous of the Indian mission, he went to Rome and was received (8 April, 1579) as a Jesuit novice at Sant' Andrea. Attacked by fever about October, he was sent to Lyons to recuperate, and went thence to the College at Reims, considering himself as accepted for India, if his health improved by a visit to England. In May (probably 28th), 1580, he was ordained priest at Soissons, and started (5 June) with four companions for England. Through the treachery of an English spy by the name of Sledd he was immediately arrested at Dover, but by a ruse of Dr. Ely, one of his fellow-travellers, reached London safely. Ely being imperilled through this friendly act, Cottam voluntarily surrendered himself and was committed "close prisoner" to the Marshalsea, where he perhaps said his first Mass. After being tortured, he was removed, 4 December, 1580 (Catholic Record Society, III, 10) to the Tower, where he endured the rack and the "Scavenger's Daughter". He was arraigned with Campion and others and (16 November, 1581) condemned to death. His execution was deferred till 30 May, 1582 (see Munday's "Breefe Reporte"), when with William Filby, Luke Kirby and Laurence Richardson, secular priests (all beatified 29 Dec., 1886), he was drawn to Tyburn and executed. His portrait, with martyrdom misdated, is reproduced in Foley, "Records", VII (1) 174; his relics are the Mass corporal used by him and four other martyrs in the Tower (cf. Camm, English Martyrs, II, 563) and perhaps his autograph in the registers of Sant' Andrea.

CHALLONER, *Memoirs:* FOLEY, *Records*, II, 145 sqq., with ample bibliography and VII (1) 174; GILLOW, *Bibl. Dict. Eng. Cath.*, I; *Dict. Nat. Biog.*, XII; CAMM, *English Martyrs*, II (London, 1905), 536–63.

PATRICK RYAN.

Thomas Ford, Blessed, b. in Devonshire; d. at Tyburn, 28 May, 1582. He incepted M.A. at Trinity College, Oxford, 14 July, 1567, and was a fellow, Woods says president, of the college. He went to the English College, Douai, in 1570, and was one of the first three of its students to be ordained, receiving all orders in March, 1573, at Brussels. After becoming B.D. at Douai he left for England, 2 May, 1576, and soon became chaplain to Edward Yate and his Bridgettine guests at Lyford, Berkshire. Arrested with Blessed Edmund Campion (q. v.) 17 July, 1581, and committed to the Tower 22 July, he was thrice tortured. He was brought before the Queen's Bench 16 November, with his fellow martyr Blessed John Shert, on an absurd charge of conspiracy at Rome and Reims, where he had never been, on dates when he was in England, and both were condemned 21 November. With him suffered John Shert and Robert Johnson.

John Shert, Blessed, a native of Cheshire, took the degree of B. A. at Brasenose College, Oxford, in 1566. Successively schoolmaster in London, and servant to Dr. Thomas Stapleton at Douai, he entered the seminary in 1576, and was ordained subdeacon. He was ordained priest from the English College, Rome, of which he was senior of the first six scholars. He left Reims for England 27 August, 1579, and was sent to the Tower, 14 July, 1581.

Robert Johnson, Blessed, b. in Shropshire, entered the German College, Rome, 1 Oct., 1571. Ordained priest at Brussels from the English College Douai, in April, 1576, he started immediately for England. After a pilgrimage to Rome in 1579 he returned to England in 1580, and was committed to the Poultry Counter 12 July, whence he was transferred to the Tower 5 Dec. On 16 December he was terribly racked, and then thrust into an underground dungeon. He was brought before the Queen's Bench 14 Nov., and condemned 20 Nov.

John B. Wainewright.

Thomas Green, Blessed. See Thomas Johnson, Blessed.

Thomas Johnson, Blessed, Carthusian martyr, d. in Newgate gaol, London, 20 Sept., 1537. On 18 May, 1537, the twenty choir monks and eighteen brothers remaining in the London Charterhouse were required to take the Oath of Supremacy. Of these choir monks Thomas Johnson, Richard Bere, Thomas Green (priests), and John Davy (deacon), refused; and of the brothers Robert Salt, William Greenwood, Thomas Redyng, Thomas Scryven, Walter Pierson, and William Horne. On 29 May all were sent to Newgate, where they were chained standing and with their hands tied behind them to posts in the prison, and so left to die of starvation. However Margaret Clement, who as Margaret Giggs had been brought up in the household of Blessed Thomas More, bribed the gaoler to let her have access to the prisoners, and disguised herself as a milkmaid and carried in a milk-can full of meat, wherewith she fed them. After the king's inquiry as to whether they were not already dead, the gaoler was afraid to let her enter again; but she was allowed to go on the roof, and uncovering the tiles, she let down meat in a basket as near as she could to their mouths. However they could get little or nothing from the basket, and as the gaoler feared discovery even this plan was soon discontinued. Greenwood died first (6 June), then Davy (8 June), Salt (9 June), Pierson and Green (10 June), Scryven (15 June), Redyng (16 June). It is probable that then Cromwell interfered and ordered those still living to be given food in order that they might be preserved for execution; for Bere did not die till 9 August, nor Johnson till 20 September. Horne survived, and, though he could never be induced to quit his religious habit, was not attainted till 1540, when he was hanged, disembowelled, and quartered at Tyburn (4 August) with the five *Prætermissi* Robert Bird (layman), Lawrence Cook (Carmelite Prior of Doncaster), Thomas Empson (Benedictine), Giles Heron (layman), and probably with William Bird (Rector of Fittleton and Vicar of Bradford, Wiltshire). All ten Carthusians were beatified by Leo XIII on 29 Dec., 1886. Blessed Richard Bere was a nephew of Richard Bere (Abbot of Glastonbury 1493–1525), and became a Carthusian on 20 Feb., 1523. Blessed Thomas Green has been identified by Dom Bede Camm with Thomas Greenwood (B. A., Oxon, M.A., Cantab, 1511), who became Fellow of St. John's College Cambridge in 1515 and D.D. in 1532.

John B. Wainewright.

Thomas Marshall, Blessed. See Beche, John, Blessed.

Thomas More, Blessed, knight, Lord Chancellor of England, author and martyr, b. in London, 7 February, 1477–78; executed at Tower Hill, 6 July, 1535. He was the sole surviving son of Sir John More, barrister and later judge, by his first wife Agnes, daughter of Thomas Graunger. While still a child Thomas was sent to St. Anthony's School in Threadneedle Street, kept by Nicholas Holt, and when thirteen years old was placed in the household of Cardinal Morton, Archbishop of Canterbury and Lord Chancellor. Here his merry character and brilliant intellect attracted the notice of the archbishop, who sent him to Oxford, where he entered at Canterbury Hall (subsequently absorbed by Christ Church) about 1492. His father made him an allowance barely sufficient to supply the necessaries of life and, in consequence, he had no opportunity to indulge in "vain or hurtful amusements" to the detriment of his studies. At Oxford he made friends with William Grocyn and Thomas Linacre, the latter becoming his first instructor in Greek. Without ever becoming an exact scholar he mastered Greek "by an instinct of genius" as witnessed by Pace (De fructu qui ex doctrina percipitur, 1517), who adds "his eloquence is incomparable and twofold, for he speaks with the same facility in Latin as in his own language". Besides the classics he studied French, history, and mathematics, and also learned to play the flute and the viol. After two years' residence at Oxford, More was recalled to London and entered as a law student at New Inn about 1494. In February, 1496, he was admitted to Lincoln's Inn as a student, and in due course was called to the outer bar and subsequently made a bencher. His great abilities now began to attract attention and the governors of Lincoln's Inn appointed him "reader" or lecturer on law at Furnival's Inn, his lectures being esteemed so highly that the appointment was renewed for three successive years.

It is clear however that law did not absorb all More's energies, for much of his time was given to letters. He wrote poetry, both Latin and English, a considerable amount of which has been preserved and is of good quality, though not particularly striking, and he was especially devoted to the works of Pico della Mirandola, of whose life he published an English translation some years later. He cultivated the acquaintance of scholars and learned men and, through his former tutors, Grocyn and Linacre, who were now living in London, he made friends with Colet, Dean of St. Paul's, and William Lilly, both renowned scholars. Colet became More's confessor, and Lilly vied with him in translating epigrams from the Greek Anthology into Latin, their joint productions being published in 1518 (Progymnasmata T. More et Gul. Lilii sodalium). In 1497 More was introduced to Erasmus, probably at the house of Lord Mountjoy, the great scholar's pupil and patron. The friendship at once became intimate, and later on Erasmus paid several long visits at More's Chelsea house, and the two friends corresponded regularly until death separated them. Besides law and the Classics More read the Fathers with care, and he delivered, in the Church of St. Lawrence Jewry, a series of lectures on St. Augustine's "De civitate Dei" which were attended by many learned men, among whom Grocyn, the rector of the church, is expressly mentioned. For such an audience the lectures must have been prepared with great care, but unhappily not a fragment of them has survived. These lectures were given somewhere between 1499 and 1503, a period during which More's mind was occupied almost wholly with religion and the question of his own vocation for the priesthood.

Blessed Thomas More
From an etching by Wickenden of the Dürer portrait preserved in Laval University, Montreal.

This portion of his life has caused much misunderstanding among his various biographers. It is certain that he went to live near the London Charterhouse and often joined in the spiritual exercises of the monks there. He wore "a sharp shirt of hair next his skin, which he never left off wholly" (Cresacre More), and gave himself up to a life of prayer and penance. His mind wavered for some time between joining the Carthusians or the Observant Franciscans, both of which orders observed the religious life with extreme strictness and fervour. In the end, apparently with the approval of Colet, he abandoned the hope of becoming a priest or religious, his decision being due to a mistrust of his powers of perseverance. Erasmus, his intimate friend and confidant, writes on this matter as follows (Epp. 447): "Meanwhile he applied his whole mind to exercises of piety, looking to and pondering on the priesthood in vigils, fasts and prayers and similar austerities. In which matter he proved himself far more prudent than most candidates who thrust themselves rashly into that arduous profession without any previous trial of their powers. The one thing that prevented him from giving himself to that kind of life was that he could not shake off the desire of the married state. He chose, therefore, to be a chaste husband rather than an impure priest." The last sentence of this passage has led certain writers, notably Mr. Seebohm and Lord Campbell, to expatiate at great length on the supposed corruption of the religious orders at this date, which, they declare, disgusted More so much that he abandoned his wish to enter religion on that account. Father Bridgett deals with this question at considerable length (Life and Writings of Sir Thomas More, pp. 23–36), but it is enough to say that this view has now been abandoned even by non-Catholic writers, as witness Mr. W. H. Hutton: "It is absurd to assert that More was disgusted with monastic corruption, that he 'loathed monks as a disgrace to the Church'. He was throughout his life a warm friend of the religious orders, and a devoted admirer of the monastic ideal. He condemned the vices of individuals; he said, as his great-grandson says, 'that at that time religious men in England had somewhat degenerated from their ancient strictness and fervour of spirit'; but there is not the slightest sign that his decision to decline the monastic life was due in the smallest degree to a distrust of the system or a distaste for the theology of the Church."

The question of religious vocation being disposed of, More threw himself into his work at the Bar and scored immediate success. In 1504 he was elected a member of Parliament, but as the returns are missing his constituency is unknown. Here he immediately began to oppose the large and unjust exactions of money which King Henry VII was making from his subjects through the agency of Empson and Dudley, the latter being Speaker of the House of Commons. In this Parliament Henry demanded a grant of three-fifteenths, about £113,000, but thanks to More's protests the Commons reduced the sum to £30,000. Some years later Dudley told More that his boldness would have cost him his head but for the fact that he had not attacked the king in person. Even as it was Henry was so enraged with More that he "devised a causeless quarrel against his father, keeping him in the Tower till he had made him pay a hundred pounds fine" (Roper). Meanwhile More had made friends with one "Maister John Colte, a gentleman" of Newhall, Essex, whose eldest daughter, Jane, he married in 1505. Roper writes of his choice: "albeit his mind most served him to the second daughter, for that he thought her the fairest and best favoured, yet when he considered that it would be great grief and some shame also to the eldest to see her younger sister preferred before her in marriage, he then, of a certain pity, framed his fancy towards" the eldest of the three sisters. The union proved a supremely happy one; of it were born three daughters, Margaret, Elizabeth, and Cecilia, and a son, John; and then, in 1511, Jane More died, still almost a child. In the epitaph which More himself composed twenty years later he calls her "uxorcula Mori", and a few lines in one of Erasmus' letters are almost all we know of her gentle, winning personality.

Of More himself Erasmus has left us a wonderful portrait in his famous letter to Ulrich von Hutten dated 23 July, 1519 (Epp. 447). The description is too long to give in full, but some extracts must be made. "To begin then with what is least known to you, in stature he is not tall, though not remarkably short. His limbs are formed with such perfect symmetry as to leave nothing to be desired. His complexion is white, his face fair rather than pale and though by no means ruddy, a faint flush of pink appears beneath the whiteness of his skin. His hair is dark brown or brownish black. The eyes are greyish blue, with some spots, a kind which betokens singular talent, and among the English is considered attractive, whereas Germans generally prefer black. It is said that none are so free from vice. His countenance is in harmony with his character, being always expressive of an amiable joyousness, and even an incipient laughter and, to speak candidly, it is better framed for gladness than for gravity or dignity, though without any approach to folly or buffoonery. The right shoulder is a little higher than the left, especially when he walks. This is not a defect of birth, but the result of habit such as we often contract. In the rest of his person there is nothing to offend. . . . He seems born and framed for friendship, and is a most faithful and enduring friend. . . . When he finds any sincere and according to his heart, he so delights in their society and conversation as to place in it the principal charm of life. . . . In a word, if you want a perfect model of friendship, you will find it in no one better than in More. . . . In human affairs there is nothing from which he does not extract enjoyment, even from things that are most serious. If he converses with the learned and judicious, he delights in their talent, if with the ignorant and foolish, he enjoys their stupidity. He is not even offended by professional jesters. With a wonderful dexterity he accommodates himself to every disposition. As a rule, in talking with women, even with his own wife, he is full of jokes and banter. No one is less led by the opinions of the crowd, yet no one departs less from common sense. . . ." (see Father Bridgett's Life, p. 56–60, for the entire letter). More married again very soon after his first wife's death, his choice being a widow, Alice Middleton. She was older than he by seven years, a good, somewhat commonplace soul without beauty or education; but she was a capital housewife and was devoted to the care of More's young children. On the whole the marriage seems to have been quite satisfactory, although Mistress More usually failed to see the point of her husband's jokes.

More's fame as a lawyer was now very great. In 1510 he was made Under-Sheriff of London, and four years later was chosen by Cardinal Wolsey as one of an embassy to Flanders to protect the interests of English merchants. He was thus absent from England for more than six months in 1515, during which period he made the first sketch of the "Utopia", his most famous work, which was published the following year. Both Wolsey and the king were anxious to secure More's services at Court. In 1516 he was granted a pension of £100 for life, was made a member of the embassy to Calais in the next year, and became a privy councillor about the same time. In 1519 he resigned his post as Under-Sheriff and became completely attached to the Court. In June, 1520, he was in Henry's suite at the "Field of the Cloth of Gold", in 1521 was knighted and made sub-treasurer to the king. When the Emperor Charles V visited London in the following year, More was chosen to deliver the Latin address of welcome; and grants of land in Oxford and Kent, made then and three years later, gave further proof of Henry's favour. In 1523 he was elected Speaker of the House of Commons on Wolsey's recommendation; became High Steward of Cambridge University in 1525; and in the same year was made Chancellor of the Duchy of Lancaster, to be held in addition to his other offices. In 1523 More had purchased a piece of land in Chelsea, where he built himself a mansion about a hundred yards from the north bank of the Thames, with a large garden stretching along the river. Here at times the king would come as an unbidden guest at dinner time, or would walk in the garden with his arm round More's neck enjoying his brilliant conversation. But More had no illusions about the royal favour he enjoyed. "If my head should win him a castle in France," he said to Roper, his son-in-law, in 1525, "it should not fail to go." The Lutheran controversy had now spread throughout Europe and, with some reluctance, More was drawn into it. His controversial writings are mentioned below in the list of his works, and it is sufficient here to say that, while far more refined than most polemical writers of the period, there is still a certain amount that tastes unpleasant to the modern reader. At first he wrote in Latin but, when the books of Tindal and other English Reformers began to be read by people of all classes, he adopted English as more fitted to his purpose and, by doing so, gave no little aid to the development of English prose.

In October, 1529, More succeeded Wolsey as Chancellor of England, a post never before held by a layman. In matters political, however, he in nowise succeeded to Wolsey's position, and his tenure of the chancellorship is chiefly memorable for his unparalleled success as a judge. His despatch was so great that the supply of causes was actually exhausted, an incident commemorated in the well-known rhyme,

"When More some time had Chancellor been
"No more suits did remain.
"The like will never more be seen,
"Till More be there again."

As chancellor it was his duty to enforce the laws against heretics and, by doing so, he provoked the attacks of Protestant writers both in his own time and since. The subject need not be discussed here, but More's attitude is patent. He agreed with the principle of the anti-heresy laws and had no hesitation in enforcing them. As he himself wrote in his "Apologia" (cap. 49) it was the vices of heretics that he hated, not their persons; and he never proceeded to extremities until he had made every effort to get those brought before him to recant. How successful he was in this is clear from the fact that only four persons suffered the supreme penalty for heresy during his whole term of office. More's first public appearance as chancellor was at the opening of the new Parliament in November, 1529. The accounts of his speech on this occasion vary considerably, but it is quite certain that he had no knowledge of the long series of encroachments on the Church which this very Parliament was to accomplish. A few months later came the royal proclamation ordering the clergy to acknowledge Henry as "Supreme Head" of the Church "as far as the law of God will permit", and we have Chapuy's testimony that More at once proffered his resignation of the chancellorship, which however was not accepted. His firm opposition to Henry's designs in regard to the divorce, the papal supremacy, and the laws against heretics, speedily lost him the royal favour, and in May, 1532, he resigned his post of lord chancellor after holding it less than three years. This meant the loss of all his income except about £100 a year, the rent of some property he had purchased; and, with cheerful indifference, he at once reduced his style of living to match his straitened means. The epitaph which he wrote at this time for the tomb in Chelsea church states that he intended to devote his last years to preparing himself for the life to come.

For the next eighteen months More lived in seclusion and gave much time to controversial writing. Anxious to avoid a public rupture with Henry he stayed away from Anne Boleyn's coronation, and when, in 1533, his nephew William Rastell wrote a pamphlet supporting the pope, which was attributed to More, he wrote a letter to Cromwell disclaiming any share therein and declaring that he knew his duty to his prince too well to criticise his policy. Neutrality, however, did not suit Henry, and More's name was included in the Bill of Attainder introduced into the Lords against the Holy Maid of Kent and her friends. Brought before four members of the Council, More was asked why he did not approve Henry's anti-papal action. He answered that he had several times explained his position to the king in person and without incurring his displeasure. Eventually, in view of his extraordinary popularity, Henry thought it expedient to remove his name from the Bill of Attainder. The incident showed what he might expect, however, and the Duke of Norfolk personally warned him of his grave danger, adding "indignatio principis mors est". "Is that all, my lord," answered More, "then, in good faith, between your grace and me is but this, that I shall die to-day, and you to-morrow." In March, 1534, the Act of Succession was passed which required all who should be called upon to take an oath acknowledging the issue of Henry and Anne as legitimate heirs to the throne, and to this was added a clause repudiating "any foreign authority, prince or potentate". On 14 April, More was summoned to Lambeth to take the oath and, on his refusal, was committed to the custody of the Abbot of Westminster. Four days later he was removed to the Tower, and in the following November was attainted of misprision of treason, the grants of land made to him in 1523 and 1525 being resumed by the Crown. In prison, though suffering greatly from "his old disease of the chest . . . gravel, stone, and the cramp", his habitual gaiety remained and he joked with his family and friends whenever they were permitted to see him as merrily as in the old days at Chelsea. When alone his time was given up to prayer and penitential exercises; and he wrote a "Dialogue of comfort against tribulation", treatise (unfinished) on the Passion of Christ, and many letters to his family and others. In April and May, 1535, Cromwell visited him in person to demand his opinion of the new statutes conferring on Henry the title of Supreme Head of the Church. More refused to give any answer beyond declaring himself a faithful subject of the king. In June, Rich, the solicitor-general, held a conversation with More and, in reporting it, declared that More had denied Parliament's power to confer ecclesiastical supremacy on Henry. It was now discovered that More and Fisher, the Bishop of Rochester, had exchanged letters in prison, and a fresh inquiry was held which resulted in his being deprived of all books and writing materials, but he contrived to write to his wife and favourite daughter, Margaret, on stray scraps of paper with a charred stick or piece of coal.

On 1 July, More was indicted for high treason at Westminster Hall before a special commission of twenty. More denied the chief charges of the indictment, which was enormously long, and denounced Rich, the solicitor-general and chief witness against him, as a perjuror. The jury found him guilty and he was sentenced to be hanged at Tyburn, but some days later this was changed by Henry to beheading on Tower Hill. The story of his last days on earth, as given by Roper and Cresacre More, is of the tenderest beauty and should be read in full; certainly no martyr ever surpassed him in fortitude. As Addison wrote in the Spectator (No. 349) "that innocent mirth which had been so conspicuous in his life, did not forsake him to the last . . . his death was of a piece with his life. There was nothing in it new, forced or affected. He did not look upon the severing of his head from his body as a circumstance that ought to produce any change in the disposition of his mind". The execution took place on Tower Hill "before nine of the clock" on 6 July, the body being buried in the Church of St. Peter *ad vincula*. The head, after being parboiled, was exposed on London Bridge for a month when Margaret Roper bribed the man, whose business it was to throw it into the river, to give it to her instead. The final fate of the relic is somewhat uncertain, but in 1824 a leaden box was found in the Roper vault at St. Dunstan's, Canterbury, which on being opened was found to contain a head presumed to be More's. The Jesuit Fathers at Stonyhurst possess a remarkable collection of secondary relics, most of which came to them from Father Thomas More, S.J. (d. 1795), the last male heir of the martyr. These include his hat, cap, crucifix of gold, a silver seal, "George", and other articles. The hair shirt, worn by him for many years and sent to Margaret Roper the day before his martyrdom, is preserved by the Augustinian canonesses of Abbots Leigh, Devonshire, to whom it was brought by Margaret Clements, the adopted child of Sir Thomas. A number of autograph letters are in the British Museum. Several portraits exist, the best being that by Holbein in the possession of E. Huth, Esq. Holbein also painted a large group of More's household which has disappeared, but the original sketch for it is in the Basle Museum, and a sixteenth-century copy is the property of Lord St. Oswald. Bl. Thomas More was formally beatified by Pope Leo XIII, in the Decree of 29 December, 1886.

WRITINGS.—More was a ready writer and not a few of his works remained in manuscript until some years after his death, while several have been lost altogether. Of all his writings the most famous is unquestionably the "Utopia", first published at Louvain in 1516. The volume recounts the fictitious travels of one Raphael Hythlodaye, a mythical character, who, in the course of a voyage to America, was left behind near Cape Frio and thence wandered on till he chanced upon the Island of Utopia (οὐ, τόπος or "nowhere") in which he found an ideal constitution in operation. The whole work is really an exercise of the imagination with much brilliant satire upon the world of More's own day. Real persons, such as Peter Giles, Cardinal Morton, and More himself, take part in the dialogue with Hythlodaye, so that an air of reality pervades the whole which leaves the reader sadly puzzled to detect where truth ends and fiction begins, and has led not a few to take the book seriously. But this is precisely what More intended, and there can be no doubt that he would have been as delighted at entrapping William Morris, who discovered in it a complete gospel of Socialism; or Cardinal Zigliara, who denounced it as "no less foolish than impious"; as he must have been with his own contemporaries who proposed to hire a ship and send out missionaries to his non-existent island. The book ran through a number of editions in the original Latin version and, within a few years, was translated into German, Italian, French, Dutch, Spanish, and English.

A collected edition of More's English works was published by William Rastell, his nephew, at London in 1557; it has never been reprinted and is now rare and costly. The first collected edition of the Latin Works appeared at Basle in 1563; a more complete collection was published at Louvain in 1565 and again in 1566. In 1689 the most complete edition of all appeared at Frankfort-on-Main, and Leipzig. After the "Utopia" the following are the most important works: "Luciani Dialogi . . . compluria opuscula . . . ab Erasmo Roterodamo et Thoma Moro interpretibus optimis in Latinorum lingua traducta . . ." (Paris, 1506); "Here is conteigned the lyfe of John Picus, Earle of Myrandula . . ." (London, 1510); "Historie of the pitiful life and unfortunate death of Edward the fifth and the then Duke of Yorke his brother . . .", printed incomplete in the "English Works" (1557) and reissued with a completion from Hall's Chronicle by Wm. Sheares (London, 1641); "Thomae Mori v. c. Dissertatio Epistolica de aliquot sui temporis theologastrorum ineptiis . . ." (Leyden, 1625); Epigrammata . . . Thomae Mori Britanni, pleraque e Graecis versa. (Basle, 1518); Eruditissimi viri Gul. Rossi Opus elegans quo pulcherrime retegit ac refellit insanas Lutheri calumnias (London, 1523), written at the request of Henry VIII in answer to Luther's reply to the royal "Defensio Septem Sacramentorum"; "A dyaloge of Syr Thomas More Knt . . . of divers maters, as of the veneration and worshyp of ymages and relyques, praying to sayntys and goyng on pylgrymage . . ." (London, 1529); "The Supplycacyon of Soulys" (London, 1529[?]), written in answer to Fish's "Supplication of the Beggars"; "Syr Thomas More's answer to the fyrste parte of the poysoned booke . . . named 'The Souper of the Lorde'" (London, 1532); "The Second parte of the Confutacion of Tyndal's Answere . . ." (London, 1533); these two works together form the most lengthy of all More's writings; besides Tindal, Robert Barnes is dealt with in the last book of the whole; "A Letter impugnynge the erronyouse wrytyng of John Fryth against the Blessed Sacrament of the Aultare" (London, 1533); "The Apologye of Syr Thomas More, Knyght, made by him anno 1533, after he had given over the office of Lord Chancellour of Englande" (London, 1533); "The Debellacyon of Salem and Bizance" (London, 1533), an answer to the anonymous work entitled "Salem and Bizance", and vindicating the severe punishment of heresy; "A Dialogue of Comfort against Tribulation . . ." (London, 1553). Among the other writings in the collected volume of "English Works" are the following which had not been previously published: An unfinished treatise "uppon those words of Holy Scripture, 'Memorare novissima et in eternum non peccabis'", dated 1522; "Treatise to receive the blessed Body of our Lorde, sacramentally and virtually both"; "Treatise upon the Passion" unfinished; "Certein devout and vertuouse Instruccions, Meditacions and Prayers"; besides some letters written while in the Tower, including his touching correspondence with his daughter Margaret. A complete bibliography of More's writings will be found in Gillow, "Bibliographical Dictionary of English Catholics" (London, s. d.), V, 99–116.

For fullest list yet published see *Catalogue of books of or on Sir Thomas More, collected by Alfred Cock, Q.C., and now at the Guildhall Library* (London, 1903), also *Transactions of the Bibl. Soc.*, V (1901), 177–180.

Original sources, besides the above: *Letters and Papers of the reign of Henry VIII*, ed. Brewer, Gairdner, and Brodie, III–VIII (London, 1875–85); *Calendar of State Papers, Venetian*, ed. Browne, III, IV (London, 1869, 71); Idem, *England and Spain*, ed. Bergenroth and Gayangos, II–V (London, 1866–86); *D. Erasmi Epistolæ*, ed. Le Clerc (Leyden, 1706), contains 19 letters from More to Erasmus and 24 from Erasmus to More; *Baga de Secretis*, pouch 7, bundle 3, contains the records of the trial.

Complete lives: Roper, *The Life, Arraignement and Death of that Mirrour of all true Honour and Vertue, Syr T. More* (Paris, 1626), re-ed. from a better MS. with valuable notes by Lewis (1729), reprinted in the *King's Classics* (1903); Harpsfield, *Life of Sir T. More*, founded on Roper, several copies exist in MS., e. g. British Museum, Harleian MS., 6253; Stapleton, *Tres Thomae* (Antwerp, 1588); Barnstaple (?), *Life of More*, printed in Dr. Wordsworth's *Ecclesiastical Biog.*, II, 181, from a MS. in the Lambeth Library the preface to which is signed Ro. Ba., which Gillow proposes to read as Robert Barnstaple; Cresacre More, *Life and Death of Sir Thomas More . . .* (Paris, 1626), re-ed. G. Roger Hudleston.

Thomas of Beckington (Bekynton), Bishop of Bath and Wells, b. at Beckington, Somerset, about 1390; d. at Wells, 14 Jan., 1465. He was educated at Winchester (1404) and New College, Oxford (1406). After his ordination as priest he acquired much ecclesiastical preferment, including the archdeaconry of Buckingham and a canonry at Wells. Being a skilled canon lawyer he was made dean of the Arches in 1423. He was also frequently employed as English ambassador abroad. His influence with the young King Henry VI was so great that he was appointed lord privy seal in 1442; and in the following year the pope nominated him Bishop of Bath and Wells. He was consecrated, 13 Oct., 1442, at the new foundation of Eton College, in which he took great interest. As bishop he rebuilt the episcopal palace at Wells, and greatly improved the city. He was a lover of learning and a munificent patron to houses of education, particularly Winchester School and Lincoln College, Oxford.

S.* (London, 1872); Nicolas, *Journal by one of the suite of Beckington during embassy to negotiate marriage between Henry VI and the Count of Armagnac's daughter* (London, 1828); Monro, *Letters of Margaret of Anjou, Bishop Beckington and others* (Camden Society, London, 1863); Gairdner in *Dict. Nat. Biog.*, s. v. *Beckington* or *Bekynton, Thomas*.

Edwin Burton.

Thomas of Bradwardine (Bragwardin, Brandnardinus, Bredwardyn, Bradwardyn, de Bredewardina), b. about 1290; d. in London, 26 August, 1349. His birthplace is variously assigned to Bradwardine, Hertfield, or Cowden; but he himself states that he was born at Chichester. He was educated at Merton College, Oxford, and in 1325 was one of the proctors of the university who took part in the litigation between the university and Cardinal Galhardus de Mora, Archdeacon of Oxford. As a theologian he attained great fame, being known as the *Doctor Profundus*. His theological lectures delivered at Oxford were expanded into the famous treatise on grace known as "Summa Doctoris Profundi" or "De causa Dei contra Pelagium et de virtute causarum ad suos Mertonenses". Chaucer couples him as a theologian with St. Augustine and Boethius,—a testimony to his popular reputation. In 1335 he was called to London by Richard de Bury, Bishop of Durham, who appointed him his chaplain and obtained for him the chancellorship of St. Paul's Cathedral. He also became one of the king's chaplains, and accompanied Edward III on his continental journeys and French wars. To his apostolical labours among the English soldiers many attributed the success achieved. After the victories of Crécy and Neville's Cross, he acted as a commissioner to treat of peace with King Philip. In 1348 the chapter of Canterbury elected Bradwardine to the vacant archbishopric; but the king, offended by their omission to wait for the *congé d'élire*, requested the pope to appoint John Ufford instead. Ufford, however, died of the Black Death before consecration, and Bradwardine was then elected with the king's approval. He was consecrated at the pope's court at Avignon on 19 July, 1349; and then returned to England. But the pestilence was raging there, and immediately on his arrival in London he fell a victim to it. His European reputation as a scholar was based not only on his famous theological treatise but also on his mathematical works: "De proportionibus" (Paris, 1495); "De quadratura circuli" (Paris, 1495); "Arithmetica speculativa" (Paris, 1502); and "Geometria speculativa" (Paris, 1530). Other works of a similar nature exist in MS.

Savile, *Preface* to Bradwardine's *De Causa Dei* (London, 1618); Pitts, *De illustribus Angliæ scriptoribus* (Paris, 1623); Hook, *Lives of the Archbishops of Canterbury* (London, 1860–84); Lechler, *De Thoma Bradwardino Commentatio* (Leipzig, 1862); Stephens, in *Dict. Nat. Biog.*, s. v., *Bradwardine, Thomas*.

Edwin Burton.

Thomas of Cantimpré, medieval writer, preacher, and theologian, b. of noble parentage at Leuw St-Pierre near Brussels, in the Duchy of Brabant, 1201;

d. 15 May, 1272. At the age of five his education began at Liège, where he spent eleven years mastering the difficulties of the *trivium* and *quadrivium*. At the age of sixteen he received the habit of the Canons Regular of St. Augustine in the Abbey of Cantimpré, where he was eventually elevated to the priesthood. In 1232, after fifteen years at Cantimpré, during which he was a constant source of edification to his religious brethren, he entered the Order of St. Dominic at Louvain. Immediately after his profession in the following year, he was sent to Cologne to pursue the higher theological studies of the order, under the tutelage of the illustrious Albert the Great. From Cologne, where he spent four years, he went to Paris, to the Dominican *studium* of St. James, to perfect himself in the sciences and to prepare for the apostolate of preaching. Returning to Louvain in 1240, he was made professor of philosophy and theology—an office he filled with rare distinction. He achieved equal success in the apostolate of preaching, in recognition of which the title of "Preacher General" was conferred upon him. His missionary activities extended throughout Brabant and into Germany, Belgium, and France. To his reputation for missionary zeal and eloquence he added the fame of authorship. In all, seven works, treating of philosophy, theology, and hagiology, are attributed to his pen. His first and most important work is entitled "Opus de natura rerum". In the composition of this great work, which contains twenty books, he spent fifteen years. "Bonum universale de apibus" is an allegory in which, employing the figure of bees, he treats of precepts concerning conduct and of the duties of superiors and subjects. This work, which had a wide vogue among spiritual writers for many centuries, was printed at Deventer (before 1478), at Paris, and three times at Douai (1597, 1605, 1627). His other works treat of hagiology and are as follows: (1) "Vita Christinæ virginis mirabilis dictæ"; (2) "Vita B. Margaritæ Iprensis"; (3) "Vita Piæ Lutgardia"; (4) "Vita Joannis abbatis primi monasterii Cantimpratensis et ejus Ecclesiæ undatoris"; (5) "Supplementum ad vitam B. Mariæ d'Oignies a B.M. Jacobo de Vitriaco".

John B. O'Connor.

Thomas of Celano, Friar Minor, poet, and hagiographical writer, b. at Celano in the Province of the Abruzzi, about 1200; d. about 1255. He was one of the first disciples of St. Francis of Assisi and joined the order probably in 1215. In 1221 Thomas accompanied Cæsar of Speyer on his mission to Germany. The following year he became *custos* of the convents at Mayence, Worms, Speyer, and Cologne, and soon after Cæsar of Speyer, on his return to Italy, made him his vicar in the government of the German province. Before September, 1223, Thomas returned to Italy, and lived there in familiar intercourse with St. Francis. Soon after the canonization of St. Francis (16 July, 1228) he wrote his "Vita prima", or "First Life" of St. Francis of Assisi, by order of Gregory IX. Between 1244 and 1247, he compiled his "Vita secunda", or "Second Life" of St. Francis, which is in the nature of a supplement to the first one, by commission of Crescentius of Jessi, then minister general of the order. About ten years later Thomas wrote a treatise on the miracles of St. Francis at the bidding of Blessed John of Parma, the successor of Crescentius as minister general. In addition to these works, around which a large controversial literature has grown up in recent years, Thomas of Celano wrote two beautiful sequences in honour of St. Francis: "Fregit victor virtualis" and "Sanctitatis nova signa", and, in all probability, he is also the author of the "Dies Iræ" and of the "Life of St. Clare of Assisi", written between 1255 and 1261 (cf. Robinson, "Life of St. Clare", Introduction, pp. xxii sq.). The best critical edition of the works of Thomas of Celano is that of Père Edouard d'Alençon.

Ferdinand Heckmann.

Thomas of Dover, martyr; d. 2 or 5 Aug., 1295. On the above date the French ravaged Dover with fire and sword, and eventually attacked the Benedictine priory of St. Martin. All the inmates fled, with the exception of one, an old and infirm monk named Thomas Hales or de Halys, whom the sailors found in the dormitory, and slew for refusing to disclose the place where the treasures of the church were hidden. Numerous miracles [for which see Horstmann, "Nova legenda Angliæ" (Oxford, 1901), and Bishop Challoner's work cited below] are recorded by John of Tynemouth as having been wrought through his relics. Friar Simon Simeon, in the narrative of his pilgrimage to the Holy Land about 1322, bears witness to the honour paid to him as a martyr at "the Black Monks under Dover Castle" ("Itin. Sim. Simeon. et Will. de Worc.", ed. Nasmith, Cambridge, 1778, p. 7). Richard II at the instance of his mother requested the pope to canonize Thomas; but though an enquiry was set on foot in 1382 nothing further seems to have been done. He was, however, popularly regarded in the neighbourhood as a saint. In 1500 Thomas Rich, Vicar of Buckland, near Dover, left eightpence for the altar of Blessed Thomas de Halys at Dover Priory. His own church contained a chapel of St. Thomas, which may possibly have been dedicated to Thomas of Dover. He is very generally given the title of saint, and it is remarkable that he is represented (fig. 26) in the copper-plate reproduction of the pictures formerly at the English College, Rome, which resulted in the equivalent beatification of sixty-three martyrs mentioned by name therein (see English Confessors and Martyrs). On neither day is he mentioned in the "Acta Sanctorum".

John B. Wainewright.

Thomas of Hereford (Thomas de Cantelupe), Saint, b. at Hambledon, Buckinghamshire, England, about 1218; d. at Orvieto, Italy, 25 August, 1282. He was the son of William de Cantelupe and Millicent de Gournay, and thus a member of an illustrious and influential family. He was educated under the care of his uncle, Walter de Cantelupe, Bishop of Worcester, first at Oxford then at Paris. During his studies he attended the Council of Lyons in 1245, when he became a papal chaplain. Returning to Oxford, he taught canon law, and in 1262 was elected chancellor of the university. In the Barons' Wars he took the popular side and stated the Barons' case before St. Louis at Amiens, 1263. After the defeat of Henry III at the battle of Lewes he was made Chancellor of England (22 Feb., 1265), gaining wide renown for his judicial wisdom and fairness. Deprived of the chancellorship on the death of Simon de Montfort, he went into exile, lecturing at Paris on theology and Scripture (1265–72). He then resumed teaching at Oxford till 1274 when he attended the second Council of Lyons. He held several benefices which he administered most zealously, appointing responsible vicars, visiting them regularly, and showing himself a model pastor by his holiness and wide charity. In June, 1275, he was appointed Bishop of Hereford, and was consecrated by his friend Cardinal Kilwardby (8 Sept., 1275). As bishop he continued his apostolic life, labouring incessantly for the good of his people, maintaining the privileges and property of his diocese against Gilbert of Gloucester, Llewellyn, and others, supporting Edward I in his struggle with Llewellyn, combating the unjust practices of the Jews, and reforming the clergy, secular and regular. He came into conflict with Archbishop Peckham on questions of jurisdiction, and at the Council of Reading (July, 1279) led the resistance of the bishops to the policy of Peckham. (For the articles embodying the points in dispute see Wilkins, "Concilia", II, 75.) His personal differences with Peckham led first to his withdrawal to Normandy that he might avoid an interdict and appeal to Rome, and subsequently in 1282 to his actual excommunication by the archbishop. He then went to Rome to plead his own cause before Pope Martin IV, who received him kindly. But his failing health succumbed to the fatigue of the journey and the summer heat. He was buried at Orvieto, but subsequently his relics were brought back to Hereford, where many miracles were wrought by his intercession and his shrine became second only to that of St. Thomas of Canterbury. He was canonized by John XXII (17 April, 1320), and his festival, formerly observed on 2 October, is now kept in England on 3 October.

Edwin Burton.

Thomas of Jesus (Thomas de Andrada), reformer and preacher, b. at Lisbon, 1529; d. at Sagena, Morocco, 17 April, 1582. He was educated by the Augustinian Hermits from the age of ten, entered the order at Lisbon in 1534, completed his studies at Coimbra, and was appointed novice-master. In his zeal for primitive observance he attempted a thorough reform of the order, but the opposition was such that he was obliged to desist. However, the eventual establishment of the Discalced or Reformed Augustinians is attributed to the initiative of Thomas de Andrada (see Hermits of St. Augustine). High in favour at Court, Thomas assisted, in 1578, at the death of John III, of which he has left an interesting narrative in a letter still extant.

John's successor, Sebastian, immediately set out on his ill-starred expedition to Africa (see Portugal), and he insisted that Thomas should accompany the forces. The holy Hermit laboured among the soldiery with his accustomed zeal until wounded and taken captive at Alcacer, 1578. A Mohammedan monk became his master and, first by kindness then by torture, strove to secure his perversion. Into the dungeon where he was confined a faint gleam penetrated for a short period at midday, and by that light, day after day, Thomas composed for the comfort of his fellow-prisoners his great work, "Os trabalhos de Jesus", contemplations on the sufferings of Jesus, which have since proved the nourishment and edification of countless souls. The Portuguese ambassador, learning of his pitiable plight, rescued Thomas and placed him under the care of a Christian merchant. But he begged to be sent on at once to Sagena, where some two thousand of the poorest captives were detained. There he commenced an apostolate which was soon blessed with marvellous fruit; the jail seemed transformed into a monastery, numbers were saved from apostasy or reconciled, and several of his penitents suffered a glorious martyrdom. Meanwhile vigorous efforts were being made to procure his complete liberation, but Thomas declared that, captive or free, he would remain to the end in the service of the Christian slaves of the Moors. His enfeebled frame at last succumbed to the combined effects of his sufferings, toils, and austerities. He spent his dying breath in reassuring some poor Christians on the point of apostasy that their ransom would arrive by a certain date if they persevered, as indeed it did.

Since early in the eighteenth century there have been several English editions of Thomas's famous work on the Passion, but the last complete version has long been out of print.

For biography see *Introduction* to *Sufferings of Jesus* (tr., London, 1863). For interesting and complete account of various English versions of *Os trabalhos de Jesus* see Prestage in *Bõletim da segunda classe: Academia das Sciencias de Lisboa*, IV, No. 1 (Lisbon, 1911).

Vincent Scully.

Thomas of Jorz (often but erroneously called Joyce and frequently referred to as Anglus or Anglicus), theologian and cardinal, date of birth and circumstances of his education unknown; d. at Grenoble, 13 December, 1310. He entered the Order of Preachers in England, and was remarkable for his piety, erudition, and executive ability. He was master of theology at Oxford, acted as prior of the Dominican convent there, and afterwards served as Provincial of the English Province for seven years (1296–1303). He stood in special favour with Edward, King of England, acting as his confessor and executing several commissions for him. While at Lyons on a commission for the king, 15 Dec., 1305, he was created Cardinal Priest of Santa Sabina by Clement V. This pope also appointed him legate to Henry VII, King of Germany, but in fulfilling the appointment he was taken sick and died. His body was afterwards transferred to Oxford and buried under the choir of the Dominican church. His writings are often confused with those of Thomas of Wales, O.P., also called Anglus or Anglicus. His most important work is "Commentaria in IV libros Sententiarum". The commentary on the first book (Venice, 1523) still enjoys popularity, and offers a concise and complete refutation of the attacks made by Scotus on the teachings of Saint Thomas.

Biog.*, s. v. *Jorz*, Lelong, *Bibl. sac.*, II (Paris, 1723), 799, 988; Tanner, *Bibl. brit.-hib.* (London, 1748), 749; Hurter, *Nomenclator.*

Ignatius Smith.

Thomas of Strasburg, a fourteenth-century scholastic of the Augustinian Order, b., according to some writers, at Hagenau in Alsace, according to others, at Strasburg; d. 1357. It was probably at Strasburg that he entered the Augustinian Order, and there he began his career as a teacher. About the year 1341 he went to Paris and became famous as a teacher in the university. In 1345 he was elected general of his order, a position which he held until his death. As general, he undertook the revision of the constitution of his order, and published the revised statutes under the title "Constitutiones Ordinis Sui". He interested himself also in the promotion of study among the members of his order, and was instrumental in founding at Verona in 1351 a *studium generale*, or university, for the study of logic, philosophy, and theology. His best known work is a commentary on the "Books of Sentences" of Peter the Lombard, published at Strasburg in 1490 (other editions: Venice, 1564 and 1588; Genoa, 1585; Geneva, 1635). He was also the author of sermons, meditations, and letters, still unpublished.

As a teacher and commentator he adhered closely to the doctrines of Giles of Rome (Ægidius Romanus, or de Columna), who since 1287 had been recognized as the *doctor ordinis* of the Augustinians. He opposed the innovations of Henry of Ghent and the abstruse distinctions of the Scotists. For example, on the question of the distinction between the nature of God and the Divine attributes, he taught that there can be no formal distinction, nor any distinction of any kind except by comparison of the external effects of those attributes. Similarly there is, he maintained, no formal distinction between God and the Divine ideas; whatever distinction exists among the ideas themselves or between the ideas and the Divine essence is the work of the Divine intellect. In regard to the origin of the universe, he maintained that the doctrine of creation can be proved by strict demonstration, the starting-point of the proof being the fact that the power of God, being unlimited, could not postulate a material as a necessary condition of action: just as the existence of God does not postulate any other being, so the Divine action does not postulate a material on which to act. This refers, however, to creation in general. Whether the material universe was created in time or with time, or, on the contrary, was created *ab æterno*, is a question which, he believed, the human mind cannot solve without the aid of revelation.

Stöckl, *Gesch. der Phil. des Mittelalters*, II (Mainz, 1865), 1045 sqq.; Fabricius, *Biblioth. lat. med. et infimae latin.*, V (Florence, 1858), 537 sqq. Ossinger, *Bibl. augustiniana*, (Ingolstadt, 1768), 71, sqq. De Wulf, tr. Coffey, *Hist. of Med. Phil.* (New York, 1909), 437, 438, has a paragraph on the Ægidian School.

William Turner.

Thomas of Villanova, Saint, educator, philanthropist, b. at Fuentellana, Spain, 1488; d. at Valencia, 8 Sept., 1555. Son of Alonzo Tomas García and Lucía Martínez Castellanos, the saint was brought up in the practices of religion and charity. Every Friday his father was wont to give in alms all the meal he earned at his mill, besides his usual daily dole of bread. On great feast-days he added wood, wine, and money; while to poor farmers he loaned money and seed. On the death of her husband, Lucía continued the usual alms, and supplied indigent maidens in the neighbourhood with clothing and money. When sixteen years old, Thomas entered the University of Alcalá, where, after proceeding master of arts and licentiate in theology, he filled the chair (1514) of arts, logic, and philosophy. Among his auditors were the famed scholars Ferdinand de Encina and Dominic Soto. With Alcalá, however, ended his university associations, he having declined the chair of natural philosophy at Salamanca, where he joined the Augustinians in 1516, his vows following a year later, and his ordination to priesthood the year after; his first Mass was celebrated at Christmas, 1518. At Salamanca Convent Thomas was given the class of Scholastic theology because of his attachment for books, chiefly the Lombard and St. Thomas, and his exemplary life. Preaching in the chief pulpits of Spain was soon added to his duties, among other places at Valencia, the field of his later trials, and Valladolid, seat of the imperial Court and residence of the Emperor Charles V when on his visits from the Low Countries. In this last-named city St. Thomas was named by the emperor his court preacher, and one of his councillors of State. Rarely, however, did the saint pay visits of ceremony to the then master of Europe, though his written correspondence with Charles, who held his opinions in high esteem, was voluminous. Towards the close of his life, while at Valencia, he had all the emperor's letters destroyed; his own letters to the emperor, however, are now stored at Simancas.

Apart from these burdens Thomas held many offices of trust in his order, e. g. as convent prior in various cities, among others at Valladolid in 1544, the very year he was called to the See of Valencia. Moreover, he was twice provincial-prior, first of Andalusia and Castile in 1527, then six years later of Castile alone, whence the first mission band of his brethren was sent across the Atlantic in 1533 to establish houses of their order in Mexico. On 5 Aug., 1544, he received his nomination to the Archbishopric of Valencia, a post that for well-nigh a hundred years had witnessed no bishop in residence, an appointment that was confirmed by Paul III. Previously St. Thomas had declined the See of Granada, offered him by the emperor, while that of Valencia he accepted only through obedience to his superiors. He was consecrated in the church of his order at Valladolid by Juan, Cardinal Tavera de Pardo, Archbishop of Toledo. On his entrance to his see on 1 Jan., 1545, of which he was thirty-second bishop and eighth archbishop, St. Thomas opened his career as legislator and philanthropist, which won for him the titles of "Almsgiver", "Father of the Poor", and "Model of Bishops", given him at his beatification in 1618 by Paul V. During his eleven years of episcopal rule his most noteworthy deeds were as follows: a visitation of his diocese, opened a few weeks after entrance into his see. Among other amendments he inhibited his visitators from accepting any gifts whatever. He then held a synod, the first at Valencia for many years, whereby he sought to do away with a number of abuses, as bloodshed, divorce, concubinage, and many excessive privileges or unreasonable exemptions; he abolished the underground prisons; rebuilt the general hospital at Valencia which had just been destroyed by fire; founded two colleges, one for young ecclesiastics, the other for poor students; laboured for the conversion of the *nuevos Cristianos*, whose profession of Christianity was largely mere outward show; established a crèche near his palace for foundlings and the offspring of indigent parents; had Mass said at early hours for the working-classes; and in brief, by statutes, by preaching, and by example, strove to reform the morals of churchman and layman.

Towards the poor especially his heart was ever alive with pity; to them his palace gate was always open; daily he had a repast for every poor person that applied for help, as many even as four to five hundred thus getting their meals at his hands. In every district of the city he had almoners appointed with orders especially to search out the respectable persons who shrank from asking alms; these he had supplied with money, food, clothing, while as to indigent workmen, poor farmers, and mechanics, he replenished their stock and bought them tools, thus putting them in the way of making a living. His whole life was replete with acts of practical kindness. He spent his spare time chiefly in prayer and study; his table was one of simple fare, with no luxuries. His dress was inexpensive; he mended with his own hands whatever needed repairs. Numberless are the instances of St. Thomas's supernatural gifts, of his power of healing the sick, of multiplication of food, of redressing grievances, of his ecstasies, of his conversions of sinners. He was taken ill in August, 1555, of angina pectoris, of which he died at the age of 67, at the termination of Mass in his bedroom. His last words were the versicles: "In manus tuas, Domine", etc.; his remains were entombed at the convent Church of Our Lady of Help of his order outside the city walls, whence later they were brought to the cathedral. The saint was of well-knit frame, of medium height, with dark complexion, brilliant eyes, ruddy cheeks, and Roman nose. He was beatified by Paul V (7 Oct., 1618), who set his feast-day for 18 Sept., and canonized by Alexander VII on 1 Nov., 1658.

Various reasons are given to account for St. Thomas's non-appearance at the Council of Trent, among them that he was ill, unable to stand the fatigue of travel; that his people would not brook his absence; and that the emperor felt unable to do without his aid at home. The writings of St. Thomas, mainly sermons, are replete with practical norms of mystic theology. Some twenty editions have been published, the best and most complete being probably that of Manila, 1882–1884, in 5 tomes.

Thomas Percy, BLESSED, Earl of Northumberland, martyr, b. in 1528; d. at York, 22 August, 1572. He was the eldest son of Sir Thomas Percy, brother of the childless Henry Percy, sixth Earl of Northumberland, and Eleanor, daughter of Sir Guiscard Harbottal. When Thomas was eight years old his father was executed at Tyburn (2 June, 1537) for having taken a leading part in the Pilgrimage of Grace, and he also is considered a martyr by many. Thomas and his brother Henry were then removed from their mother's keeping and entrusted to Sir Thomas Tempest.

In 1549, when Thomas Percy came of age, an Act was passed "for the restitution in blood of Mr. Thomas Percy". Shortly afterwards he was knighted, and, three years later, in Queen Mary's reign, he regained his ancestral honours and lands. Declared governor of Prudhoe Castle he besieged and took Scarborough Castle, which was seized by rebels in 1557. In reward the Earldom of Northumberland together with the Baronies of Percy, Poynings, Lucy, Bryan, and Fitzpane were restored to him. He was installed at Whitehall with great pomp, and soon after was named Warden General of the Marches, in which capacity he fought and defeated the Scots. In 1558 he married Anne Somerset, daughter of the Earl of Worcester, a valiant woman who subsequently suffered much for the Faith.

On Elizabeth's accession the earl, whose steadfast loyalty to the Catholic Church was known, was kept in the North while the anti-Catholic measures of Elizabeth's first Parliament were passed. Elizabeth continued to show him favour, and in 1563 gave him the Order of the Garter. He had then resigned the wardenship and was living in the South. But the systematic persecution of the Catholics rendered their position most difficult, and in the autumn of 1569 the Catholic gentry in the North, stirred up by rumours of the approaching excommunication of Elizabeth, were planning to liberate Mary, Queen of Scots, and obtain liberty of worship. Earl Thomas with the Earl of Westmoreland wrote to the pope asking for advice, but before their letter reached Rome circumstances hurried them into action against their better judgment. After a brief success the rising failed, and Thomas fled to Scotland, where he was captured and, after three years, sold to the English Government. He was conducted to York and beheaded, refusing to save his life by abandoning his religion. He was beatified by Leo XIII on 13 May, 1895, and his festival was appointed to be observed in the Dioceses of Hexham and Newcastle on 14 November. His daughter Mary founded the Benedictine convent at Brussels from which nearly all the existing houses of Benedictine nuns in England are descended.

Thomas Scryven, BLESSED. See THOMAS JOHNSON, BLESSED.

Thomas Sherwood, BLESSED, martyr, b. in London, 1551; d. at Tyburn, London, 7 February, 1578. His parents also suffered for their conscience, both enduring imprisonment for the Faith. After leaving school in 1566, Thomas assisted his father, a London woollen draper, for about ten years; then, feeling that his vocation was to the priesthood, he made arrangements to go to Douay College and was in London settling his affairs, and obtaining the means for his support and education. While so engaged he was recognized in Chancery Lane and betrayed by George Marten, son of Lady Tregonwell. Being examined before the Recorder as to his opinion of the Bull of Pius V and as to whether an excommunicated queen held lawful sovereignty, he denied all knowledge of both Bull and excommunication, but expressed his opinion that if the queen were indeed excommunicated her rule could not be lawful. He was detained at Westminster, where the attorney-general visited him and found him constant in that opinion. On 17 November, 1577, he was committed to the Tower by the Privy Council to be retained close prisoner, from conference with any person, and if he did not willingly confess such things as were demanded of him, he was to be committed to the dungeon amongst the rats. He was repeatedly examined, and twice racked in order to elicit where he had heard Mass and who had been present thereat, but his constancy was unshaken. After being racked, he was cast into a dark and fetid dungeon, where he was kept absolutely without clothes, without food, and with nothing but the bare earth to lie upon. His friends were not allowed to supply his needs, and the utmost concession that William Romper could obtain was permission to supply him with straw to lie upon. He was brought to trial on 3 February, and pronounced guilty of high treason for denying the queen's supremacy; four days later he was executed. He was a man of good wit and judgment and, being well instructed in religious matters, was very helpful to many poor Catholics. Small in stature, he was of healthy constitution and of a cheerful disposition, which he maintained even amidst his torture.

Thomassin, LOUIS, theologian and French Oratorian, b. at Aix-en-Provence 28 Aug., 1619; d. in Paris, 24 Dec., 1695. At the age of thirteen he entered the Oratory and for some years was professor of literature in various colleges of the congregation, of theology at Saumur, and finally in the seminary of Saint Magloire, in Paris, where he remained until his death. His chief works are: "Ancienne et nouvelle discipline de l'église touchant les bénéfices et les bénéficiers" (3 vols. in fol., Paris, 1678–79), which passed through several French and Latin editions and several abridgments; "Dogmatum theologicorum....de Incarnatione, de Dei proprietatibus....etc." (3 vols.

in fol., Paris, 1680–89), likewise re-edited several times (the treatise on the Incarnation is regarded as Thomassin's masterpiece); a series of "Traités historiques et dogmatiques" on ecclesiastical fasts, feasts, the Divine Office, the unity of the Church, truth and lying, alms, business and usury (1680–97), a series of methods of studying and teaching the humanities, philosophy, grammar, history (1681–92); the "Glossarium universale hebraicum" (in fol., Paris, 1697); "Traité dogmatique et historique des édits et d'autres moyens....dont on s'est servi....pour établir et maintenir l'unité de l'église" (3 vols. in 4°, Paris, 1705). The last-named two posthumous works were published by P. Bordes, who wrote a life of Thomassin at the beginning of the "Glossarium". Thomassin was one of the most learned men of his time, "Vir stupendæ plane eruditionis", as Hurter says, in his "Nomenclator", II (Innsbruck, 1893), 410.

A. INGOLD.

Thomas Woodhouse, BLESSED, martyr, suffered at Tyburn 19 (not 13) June, 1573, being disembowelled alive. Ordained in Mary's reign, he was a Lincolnshire rector for under a year, and in 1560 acted as a private tutor in Wales. On 14 May, 1561, he was committed to the Fleet, London, having been arrested while saying Mass. For the rest of his life he remained in custody, uncompromising in his opposition to heresy, saying Mass in secret daily, reciting his Office regularly, and thirsting for martyrdom; but treated with considerable leniency till on 19 Nov., 1572, he sent the prison washerwoman to Lord Burghley's house with his famous letter. In it he begs him to seek reconciliation with the pope and earnestly to "persuade the Lady Elizabeth, who for her own great disobedience is most justly deposed, to submit herself unto her spiritual prince and father". Some days later in a personal interview he used equally definite language. Confined then by himself he wrote "divers papers, persuading men to the true faith and obedience", which he signed, tied to stones, and flung into the street. He was repeatedly examined both publicly and privately. Once, when he had denied the queen's title, someone said, "If you saw her Majesty, you would not say so, for her Majesty is great". "But the Majesty of God is greater," he answered. After being sentenced at the Guildhall either in April or on 16 June, he was taken to Newgate. He was admitted to the Society of Jesus in prison, though the Decree of the Cong. of Rites, 4 Dec., 1886, describes him as a secular priest. He is not to be confused with Thomas Wood (q. v.).

JOHN B. WAINEWRIGHT.

Thomism.—I. THE DOCTRINE IN GENERAL.—In a broad sense, Thomism is the name given to the system which follows the teaching of St. Thomas Aquinas in philosophical and theological questions. In a restricted sense the term is applied to a group of opinions held by a school called Thomistic, composed principally, but not exclusively, of members of the Order of St. Dominic, these same opinions being attacked by other philosophers or theologians, many of whom profess to be followers of St. Thomas. To Thomism in the first sense are opposed, e. g. the Scotists, who deny that satisfaction is a part of the proximate matter (*materia proxima*) of the Sacrament of Penance. Anti-Thomists, in this sense of the word, reject opinions admittedly taught by St. Thomas. To Thomism in the second sense are opposed, e. g. the Molinists, as well as all who defend the moral instrumental causality of the sacraments in producing grace against the system of physical instrumental causality, the latter being a doctrine of the Thomistic School. Anti-Thomism in such cases does not necessarily imply opposition to St. Thomas: It means opposition to tenets of the Thomistic School. Cardinal Billot, for instance, would not admit that he opposed St. Thomas by rejecting the Thomistic theory on the causality of the sacraments. In the Thomistic School, also, we do not always find absolute unanimity. Bañez and Billuart do not always agree with Cajetan, though all belong to the Thomistic School. It does not come within the scope of this article to determine who have the best right to be considered the true exponents of St. Thomas.

The subject may be treated under the following headings: A. Thomism in general, from the thirteenth century down to the nineteenth; B. The Thomistic School; C. Neo-Thomism and the revival of Scholasticism.

A. *Thomism in General.*—(1) Early opposition overcome.—Although St. Thomas (d. 1274) was highly esteemed by all classes, his opinions did not at once gain the ascendancy and influence which they acquired during the first half of the fourteenth century and which they have since maintained. Strange as it may appear, the first serious opposition came from Paris, of which he was such an ornament, and from some of his own monastic brethren. In the year 1277 Stephen Tempier, Bishop of Paris, censured certain philosophical propositions, embodying doctrines taught by St. Thomas, relating especially to the principle of individuation and to the possibility of creating several angels of the same species. In the same year Robert Kilwardby, a Dominican, Archbishop of Canterbury, in conjunction with some doctors of Oxford, condemned those same propositions and moreover attacked St. Thomas's doctrine of the unity of the substantial form in man. Kilwardby and his associates pretended to see in the condemned propositions something of Averroistic Aristoteleanism, whilst the secular doctors of Paris had not fully forgiven one who had triumphed over them in the controversy as to the rights of the mendicant friars. The storm excited by these condemnations was of short duration. Blessed Albertus Magnus, in his old age, hastened to Paris to defend his beloved disciple. The Dominican Order, assembled in general chapter at Milan in 1278 and at Paris in 1279, adopted severe measures against the members who had spoken injuriously of the venerable Brother Thomas. When William de la Mare, O.S.F., wrote a "Correptorium fratris Thomæ", an English Dominican, Richard Clapwell (or Clapole), replied in a treatise "Contra corruptorium fratris Thomæ". About the same time there appeared a work, which was afterwards printed at Venice (1516) under the title, "Correctorium corruptorii S. Thomæ", attributed by some to Ægidius Romanus, by others to Clapwell, by others to Father John of Paris. St. Thomas was solemnly vindicated when the Council of Vienna (1311–12) defined, against Peter John Olivi, that the rational soul is the substantial form of the human body (on this definition see Zigliara, "De mente Conc. Vienn.", Rome, 1878).

The canonization of St. Thomas by John XXII, in 1323, was a death-blow to his detractors. In 1324 Stephen de Bourret, Bishop of Paris, revoked the censure pronounced by his predecessor, declaring that "that blessed confessor and excellent doctor, Thomas Aquinas, had never believed, taught, or written anything contrary to the Faith or good morals". It is doubtful whether Tempier and his associates acted in the name of the University of Paris, which had always been loyal to St. Thomas. When this university, in 1378, wrote a letter condemning the errors of John de Montesono, it was explicitly declared that the condemnation was not aimed at St. Thomas: "We have said a thousand times, and yet, it would seem, not often enough, that we by no means include the doctrine of St. Thomas in our condemnation." An account of these attacks and defences will be found in the following works: Echard, "Script. ord. præd.", I, 279 (Paris, 1719); De Rubeis, "Diss. crit.", Diss. xxv, xxvi, I, p. cclxviii; Leonine edit. Works of St. Thomas; Denifle, "Chart. univ. Paris" (Paris, 1890–91), I, 543, 558, 566; II, 6, 280; Duplessis d'Argentré, "Collectio judiciorum de novis erroribus" (3 vols., Paris, 1733–36), I, 175 sqq.; Du Boulay, "Hist. univ. Par.", IV, 205, 436, 618, 622, 627; Jourdain, "La phil. de s. Thomas d'Aquin" (Paris, 1858), II, i; Douais, "Essai sur l'organization des études dans l'ordre des ff. prêcheurs" (Paris and Toulouse, 1884), 87 sqq.; Mortier, "Hist. des maîtres gén. de l'ordre des ff. prêch.", II, 115–142, 571; "Acta cap. gen. ord. præd.", ed. Reichert (9 vols., Rome, 1893–1904, II; Turner, "Hist. of Phil." (Boston, 1903), xxxix.

B. *Progress of Thomism.*—The general chapter of the Dominican Order, held at Carcassonne in 1342, declared that the doctrine of St. Thomas had been received as sound and solid throughout the world (Douais, op. cit., 106). His works were consulted from the time they became known, and by the middle of the fourteenth century his "Summa theologica" had supplanted the "Libri quatuor sententiarum" of Peter Lombard as the text-book of theology in the Dominican schools. With the growth of the order and the widening of its influence Thomism spread throughout the world; St. Thomas became the great master in the universities and in the *studia* of the religious orders (see Encyc. "Æterni Patris" of Leo XIII). The fifteenth and sixteenth centuries saw Thomism in a triumphal march which led to the crowning of St. Thomas as the Prince of Theologians, when his "Summa" was laid beside the Sacred Scriptures at the Council of Trent, and St. Pius V, in 1567, proclaimed him a Doctor of the Universal Church. The publication of the "Piana" edition of his works, in 1570, and the multiplication of editions of the "Opera omnia" and of the "Summa" during the seventeenth century and part of the eighteenth show that Thomism flourished during that period. In fact it was during that period that some of the great commentators (for example, Suárez, Sylvius, and Billuart) adapted his works to the needs of the times.

C. *Decline of Scholasticism and of Thomism.*—Gradually, however, during the seventeenth and eighteenth centuries, there came a decline in the study of the works of the great Scholastics. Scholars believed that there was need of a new system of studies, and, instead of building upon and around Scholasticism, they drifted away from it. The chief causes which brought about the change were Protestantism, Humanism, the study of nature, and the French Revolution. Positive theology was considered more necessary in discussions with the Protestants than Scholastic definitions and divisions. Elegance of diction was sought by the Humanists in the Greek and Latin Classics, rather than in the works of the Scholastics, many of whom were far from being masters of style. The discoveries of Copernicus (d. 1543), Kepler (d. 1631), Galilei (d. 1642), and Newton (d. 1727) were not favourably received by the Scholastics. The experimental sciences were in honour; the Scholastics, including St. Thomas, were neglected (cf. Turner, op. cit., 433). Finally, the French Revolution disorganized all ecclesiastical studies, dealing to Thomism a blow from which it did not fully recover until the last quarter of the nineteenth century. At the time when Billuart (d. 1757) published his "Summa Sancti Thomæ hodiernis academiarum moribus accomodata" Thomism still held an important place in all theological discussion. The tremendous upheaval which disturbed Europe from 1798 to 1815 affected the Church as well as the State. The University of Louvain, which had been largely Thomistic, was compelled to close its doors, and other important institutions of learning were either closed or seriously hampered in their work. The Dominican Order, which naturally had supplied the most ardent Thomists, was crushed in France, Germany, Switzerland, and Belgium. The province of Holland was almost destroyed, whilst the provinces of Austria and Italy were left to struggle for their very existence. The University of Manila (1645) continued to teach the doctrines of St. Thomas and in due time gave to the world Cardinal Zephyrinus González, O.P., who contributed in no small degree to the revival of Thomism under Leo XIII.

D. *Distinctive Doctrines of Thomism in General.*—(1) In Philosophy. (a) The angels and human souls are without matter, but every material composite being (*compositum*) has two parts, prime matter and substantial form. In a composite being which has substantial unity and is not merely an aggregate of distinct units, there can be but one substantial form. The substantial form of man is his soul (*anima rationalis*) to the exclusion of any other soul and of any other substantial form. The principle of individuation, for material composites, is matter with its dimensions: without this there can be no merely numerical multiplication: distinction in the form makes specific distinction: hence there cannot be two angels of the same species. (b) The essences of things do not depend on the free will of God, but on His intellect, and ultimately on His essence, which is immutable. The natural law, being derived from the eternal law, depends on the mind of God, ultimately on the essence of God; hence it is intrinsically immutable. Some actions are forbidden by God because they are bad: they are not bad simply because He forbids them [see Zigliara, "Sum. phil." (3 vols., Paris, 1889), ccx, xi, 11, M. 23, 24, 25]. (c) The will moves the intellect *quoad exercitium*, i. e. in its actual operation: the intellect moves the will *quoad specificationem*, i. e. by presenting objects to it: *nil volitum nisi præcognitum*. The beginning of all our acts is the apprehension and desire of good in general (*bonum in communi*). We desire happiness (*bonum in communi*) naturally and necessarily, not by a free deliberate act. Particular goods (*bona particularia*) we choose freely; and the will is a blind faculty, always following the last practical judgment of the intellect (Zigliara, 51). (d) The senses and the intellect are passive, i. e. recipient, faculties; they do not create, but receive (i. e. perceive) their objects (St. Thomas, I, Q. lxxviii, a. 3; Q. lxxix, a. 2; Zigliara, 26, 27). If this principle is borne in mind there is no reason for Kant's "Critique of Pure Reason". On the other hand those faculties are not like wax, or the sensitive plate used by photographers, in the sense that they are inert and receive impressions unconsciously. The will controls the exercise of the faculties, and the process of acquiring knowledge is a vital process: the moving cause is always within the living agent. (e) The Peripatetic axiom: "Nihil est in intellectu quod non prius in sensu" (Nothing is in the intellect that was not first in the senses), is admitted; but St. Thomas modifies it by saying: first, that, once the sense objects have been perceived, the intellect ascends to the knowledge of higher things, even of God; and, secondly, that the soul knows its own existence by itself (i. e. by its own act), although it knows its own nature only by reflection on its acts. Knowledge begins by sense perception, but the range of the intellect is far beyond that of the senses. In the soul as soon as it begins to act are found the first principles (*prima principia*) of all knowledge, not in the form of an objective illumination, but in the form of a subjective inclination to admit them on account of their evidence. As soon as they are proposed we see that they are true; there is no more reason for doubting them than there is for denying the existence of the sun when we see it shining (see Zigliara, op. cit., pp. 32–42). (f) The direct and primary object of the intellect is the universal, which is prepared and presented to the passive intellect (*intellectus possibilis*) by the active intellect (*intellectus agens*) which illuminates the phantasmata, or mental images, received through the senses, and divests them of all individuating conditions. This is called abstracting the universal idea from the phantasmata, but the term must not be taken in a materialistic sense. Abstraction is not a transferring of something from one place to another; the illumination causes all material and individuating conditions to disappear, then the universal alone shines out and is perceived by the vital action of the intellect (Q. lxxxiv, a. 4; Q. lxxxv, a. 1, ad 1^{um}, 3^{um}, 4^{um}). The process throughout is so vital, and so far elevated above material conditions and modes of action, that the nature of the acts and of the objects apprehended proves the soul to be immaterial and spiritual. (g) The soul, by its very nature, is immortal. Not only is it true that God will not annihilate the soul, but from its very nature it will always continue to exist, there being in it no principle of disintegration (Zigliara, p. 9). Hence human reason can prove the incorruptibility (i. e. immortality) of the soul. (h) The existence of God is not known by an innate idea, it cannot be proved by arguments *a priori* or *a simultaneo;* but it can be demonstrated by *a posteriori* arguments. Ontologism was never taught by St. Thomas or by Thomists (see Lepidi, "Exam. phil. theol. de ontologismo", Louvain, 1874, c. 19; Zigliara, Theses I, VIII). (i) There are no human (i. e. deliberate) acts indifferent *in individuo*.

(2) In Theology. (a) Faith and science, i. e. knowledge by demonstration, cannot co-exist in the same subject with regard to the same object (Zigliara, O., 32, VII); and the same is true of knowledge and opinion. (b) The metaphysical essence of God consists, according to some Thomists, in the *intelligere actualissimum*, i. e. fulness of pure intellection, according to others in the perfection of *aseitas*, i. e. independent existence (Zigliara, Th. VIII, IX). (c) The happiness of heaven, formally and in the ultimate analysis, consists in the vision, not in the fruition, of God. (d) The Divine attributes are distinguished from the Divine nature and from each other by a virtual distinction, i. e. by a *distinctio rationis cum fundamento a parte rei*. The *distinctio actualis formalis* of Scotus is rejected. (e) In attempting to explain the mystery of the Trinity—in as far as man can conceive it—the relations must be considered *perfectiones simpliciter simplices*, i. e. excluding all imperfection. The Holy Ghost would not be distinct from the Son if He did not proceed from the Son as well as from the Father. (f) The angels, being pure spirits, are not, properly speaking, in any place; they are said to be in the place, or in the places, where they exercise their activity (Summa, I, Q. lii, a. 1). Strictly speaking, there is no such thing as an angel passing from place to place; but if an angel wishes to exercise its activity first in Japan and afterwards in America, it can do so in two instants (of angelic time), and need not pass through the intervening space (Q. liii). St. Thomas does not discuss the question "How many angels can dance on the point of a needle?" He reminds us that we must not think of angels as if they were corporeal, and that, for an angel, it makes no difference whether the sphere of his activity be the point of a needle or a continent (Q. lii, a. 2). Many angels cannot be said to be in the same place at the same time, for this would mean that whilst one angel is producing an effect others could be producing the same effect at the same time. There can be but one angel in the same place at the same time (Q. lii, a. 3). The knowledge of the angels comes through ideas (*species*) infused by God (QQ. lv, a. 2, lvii, a. 2, lviii, a. 7). They do not naturally know future contingents, the secrets of souls, or the mysteries of grace (Q. lvii, aa. 3, 45). The angels choose either good or evil instantly, and with full knowledge; hence their judgment is naturally final and irrevocable (Q. lxiv, a. 2). (g) Man was created in the state of sanctifying grace. Grace was not due to his nature, but God granted it to him from the beginning (I, Q. xcv, a. 1). So great was the perfection of man in the state of original justice, and so perfect the subjection of his lower faculties to the higher, that his first sin could not have been a venial sin (I–II, Q. lxxxix, a. 3). (h) It is more probable that the Incarnation would not have taken place had man not sinned (III, Q. i, a. 3). In Christ there were three kinds of knowledge: the *scientia beata*, i. e. the knowledge of things in the Divine Essence; the *scientia infusa*, i. e. the knowledge of things through infused ideas (*species*), and the *scientia acquisita*, i. e. acquired or experimental knowledge, which was nothing more than the actual experience of things which he already knew. On this last point St. Thomas, in the "Summa" (Q. ix, a. 4), explicitly retracts an opinion which he had once held (III Sent., d. 14, Q. iii, a. 3). (i) All sacraments of the New Law, including confirmation and extreme unction, were instituted immediately by Christ. Circumcision was a sacrament of the Old Law and conferred grace which removed the stain of original sin. The children of Jews or of other unbelievers may not be baptized without the consent of their parents (III, Q. lxviii, a. 10; II–II, Q. x, a. 12; Denzinger-Bannwart, n. 1481). Contrition, confession, and satisfaction are the proximate matter (*materia proxima*) of the Sacrament of Penance. Thomists hold, against the Scotists, that when Transubstantiation takes place in the Mass the Body of Christ is not made present *per modum adductionis*, i. e. is not brought to the altar, but they do not agree in selecting the term which should be used to express this action (cf. Billuart, "De Euchar.", Diss. i, a. 7). Cardinal Billot holds ("De eccl. sacr.", Rome, 1900, Th. XI, "De euchar.", p. 379) that the best, and the only possible, explanation is the one given by St. Thomas himself: Christ becomes present by transubstantiation, i. e. by the conversion of the substance of bread into the substance of His body (III, Q. lxxv, a. 4; Sent., d. XI, Q. i, a. 1, q. 1). After the consecration the accidents (*accidentia*) of the bread and wine are preserved by Almighty God without a subject (Q. lxxxvii, a. 1). It was on this question that the doctors of Paris sought enlightenment from St. Thomas (see Vaughan, "Life and Labours of St. Thomas", London, 1872, II, p. 544). The earlier Thomists, following St. Thomas (Suppl., Q. xxxvii, a. 2), taught that the sub-diaconate and the four minor orders were partial sacraments. Some recent Thomists—e. g., Billot (op. cit., p. 282)—and Tanquerey (De ordine, n. 16) defend this opinion as more probable and more in conformity with the definitions of the councils. The giving of the chalice with wine and of the paten with bread Thomists generally held to be an essential part of ordination to the priesthood. Some, however, taught that the imposition of hands was at least necessary. On the question of divorce under the Mosaic Law the disciples of St. Thomas, like the saint himself (Suppl., Q. lxvii, a. 3), wavered, some holding that a dispensation was granted, others teaching that divorce was merely tolerated in order to avoid greater evils.

II. The Thomistic School.—The chief doctrines distinctive of this school, composed principally of Dominican writers, are the following:—

A. *In Philosophy.*—(1) The unity of substantial form in composite beings, applied to man, requires that the soul be the substantial form of the man, so as to exclude even the *forma corporeitatis*, admitted by Henry of Ghent, Scotus, and others (cf. Zigliara, P. 13; Denzinger-Bannwart, in note to n. 1655). (2) In created beings there is a real distinction between the *essentia* (essence) and the *existentia* (existence); between the *essentia* and the *subsistentia;* between the real relation and its foundation; between the soul and its faculties; between the several faculties. There can be no medium between a *distinctio realis* and a *distinctio rationis*, or conceptual distinction; hence the *distinctio formalis a parte rei* of Scotus cannot be admitted. For Thomistic doctrines on free will, God's knowledge, etc., see below.

B. *In Theology.*—(1) In the beatific vision God's essence takes the place not only of the *species impressa*, but also of the *species expressa.* (2) All moral virtues, the acquired as well as the infused, in their perfect state, are interconnected. (3) According to Billuart (De pecc., diss. vii, a. 6), it has been a matter of controversy between Thomists whether the malice of a mortal sin is absolutely infinite. (4) In choosing a medium between Rigorism and Laxism, the Thomistic school has been Antiprobabilistic and generally has adopted Probabiliorism. Some defended Æquiprobabilism, or Probabilism *cum compensatione.* Medina and St. Antoninus are claimed by the Probabilists. (5) Thomistic theologians generally, whilst they defended the infallibility of the Roman pontiff, denied that the pope had the power to dissolve a *matrimonium ratum* or to dispense from a solemn vow made to God. When it was urged that some popes had granted such favours, they cited other pontiffs who declared that they could not grant them (cf. Billuart, "De matrim.", Diss. v, a. 2), and said, with Dominic Soto, "Factum pontificium non facit articulum fidei" (The action of a pope does not constitute an article of faith, in 4 dist., 27, Q. i, a. 4). Thomists of to-day are of a different mind, owing to the practice of the Church. (6) The hypostatic union, without any additional grace, rendered Christ impeccable. The Word was hypostatically united to the blood of Christ and remained united to it, even during the interval between His death and resurrection (Denzinger-Bannwart, n. 718). During that same interval the Body of Christ had a transitory form, called *forma cadaverica* (Zigliara, P. 16, 17, IV). (7) The sacraments of the New Law cause grace not only as instrumental moral causes, but by a mode of causality which should be called instrumental and physical. In the attrition required in the Sacrament of Penance there should be at least a beginning of the love of God; sorrow for sin springing solely from the fear of hell will not suffice. (8) Many theologians of the Thomistic School, especially before the Council of Trent, opposed the doctrine of Mary's Immaculate Conception, claiming that in this they were following St. Thomas. This, however, has not been the opinion either of the entire school or of the Dominican Order as a body. Father Rouard de Card, in his book "L'ordre des frères prêcheurs et l'Immaculée Conception" (Brussels, 1864), called attention to the fact that ten thousand professors of the order defended Mary's great privilege. At the Council of Trent twenty-five Dominican bishops signed a petition for the definition of the dogma. Thousands of Dominicans, in taking degrees at the University of Paris, solemnly pledged themselves to defend the Immaculate Conception (see bibliog. to THOMAS AQUINAS, SAINT; also Kennedy, "The Imm. Con." in "Cath. Univ. Bulletin", March, 1910). (9) The Thomistic School is distinguished from other schools of theology chiefly by its doctrines on the difficult questions relating to God's action on the free will of man, God's foreknowledge, grace, and predestination. In the articles on these subjects will be found an exposition of the different theories advanced by the different schools in their effort to explain these mysteries, for such they are in reality. As to the value of these theories the following points should be borne in mind: (a) No theory has as yet been proposed which avoids all difficulties and solves all doubts; (b) on the main and most difficult of these questions some who are at times listed as Molinists—notably Bellarmine, Suárez, Francis de Lugo, and, in our own days, Cardinal Billot ("De deo uno et trino", Rome, 1902, Th. XXXII)—agree with the Thomists in defending predestination ante *prævisa merita.* Bossuet, after a long study of the question of physical premotion, adapted the Thomistic opinion ("Du libre arbitre", c. viii). (c) Thomists do not claim to be able to explain, except by a general reference to God's omnipotence, how man remains free under the action of God, which they consider necessary in order to preserve and explain the universality of God's causality and the independent certainty of His foreknowledge. No man can explain, except by a reference to God's infinite power, how the world was created out of nothing, yet we do not on this account deny creation, for we know that it must be admitted. In like manner the main question put to Thomists in this controversy should be not "How will you explain man's liberty?" but "What are your reasons for claiming so much for God's action?" If the reasons assigned are insufficient, then one great difficulty is removed, but there remains to be solved the problem of God's foreknowledge of man's free acts. If they are valid, then we must accept them with their necessary consequences and humbly confess our inability fully to explain how wisdom "reacheth . . . from end to end mightily, and ordereth all things sweetly" (Wis., viii, 1). (d) Most important of all, it must be clearly understood and remembered that the Thomistic system on predestination neither saves fewer nor sends to perdition more souls than any other system held by Catholic theologians. In regard to the number of the elect there is no unanimity on either side; this is not the question in dispute between the Molinists and the Thomists. The discussions, too often animated and needlessly sharp, turned on this point: How does it happen that, although God sincerely desires the salvation of all men, some are to be saved, and must thank God for whatever merits they may have amassed, whilst others will be lost, and will know that they themselves, and not God, are to be blamed?—The facts in the case are admitted by all Catholic theologians. The Thomists, appealing to the authority of St. Augustine and St. Thomas, defend a system which follows the admitted facts to their logical conclusions. The elect are saved by the grace of God, which operates on their wills efficaciously and infallibly without detriment to their liberty; and since God sincerely desires the salvation of all men, He is prepared to grant that same grace to others, if they do not, by a free act, render themselves unworthy of it. The faculty of placing obstacles to Divine grace is the unhappy faculty of sinning; and the existence of moral evil in the world is a problem to be solved by all, not by the Thomists alone. The fundamental difficulties in this mysterious question are the existence of evil and the non-salvation of some, be they few or be they many, under the rule of an omnipotent, all-wise, and all-merciful God, and they miss the point of the controversy who suppose that these difficulties exist only for the Thomists. The truth is known to lie somewhere between Calvinism and Jansenism on the one hand, and Semipelagianism on the other. The efforts made by theologians and the various explanations offered by Augustinians, Thomists, Molinists, and Congruists show how difficult of solution are the questions involved. Perhaps we shall never know, in this world, how a just and merciful God provides in some special manner for the elect and yet sincerely loves all men. The celebrated Congregatio de Auxiliis (q. v.) did not forever put an end to the controversies, and the question is not yet settled.

III. NEO-THOMISM AND THE REVIVAL OF SCHOLASTICISM.—When the world in the first part of the nineteenth century began to enjoy a period of peace and rest after the disturbances caused by the French Revolution and the Napoleonic Wars, closer attention was given to ecclesiastical studies and Scholasticism was revived. This movement eventually caused a revival of Thomism, because the great master and model proposed by Leo XIII in the Encyclical "Æterni Patris" (4 Aug., 1879) was St. Thomas Aquinas. (For information concerning this movement, its leaders, and their work, see Neo-Scholasticism. The principal works pertaining to this period will be mentioned below in bibliography.) The Thomistic doctrine had received strong support from the older universities. Among these the Encyclical "Æterni Patris" mentions Paris, Salamanca, Alcalá, Douai, Toulouse, Louvain, Padua, Bologna, Naples, and Coimbra as "the homes of human wisdom where Thomas reigned supreme, and the minds of all, teachers as well as taught, rested in wonderful harmony under the shield and authority of the Angelic Doctor". In the universities established by the Dominicans at Lima (1551) and Manila (1645) St. Thomas always held sway. The same is true of the Minerva school at Rome (1255), which ranked as a university from the year 1580, and is now the international Collegio Angelico. Coming down to our own times and the results of the Encyclical, which gave a new impetus to the study of St. Thomas's works, the most important centres of activity are Rome, Louvain, Fribourg (Switzerland), and Washington. At Louvain the chair of Thomistic philosophy, established in 1880, became, in 1889–90, the "Institut supérieur de philosophie" or "Ecole St. Thomas d'Aquin," where Professor Mercier, now Cardinal Archbishop of Mechlin, ably and wisely directed the new Thomistic movement (see De Wulf, "Scholasticism Old and New", tr. Coffey, New York, 1907, append., p. 261; "Irish Eccl. Record", Jan. 1906). The theological department of the University of Fribourg, Switzerland, established in 1889, has been entrusted to the Dominicans. By the publication of the "Revue thomiste" the professors of that university have contributed greatly to a new knowledge and appreciation of St. Thomas. The Constitution of the Catholic University of America at Washington enjoins special veneration for St. Thomas; the School of Sacred Sciences must follow his leadership ("Const. Cath. Univ. Amer.", Rome, 1889, pp. 38, 43). The University of Ottawa and Laval University are the centres of Thomism in Canada. The appreciation of St. Thomas in our days, in Europe and in America, is well set forth in Perrier's excellent "Revival of Scholastic Philosophy in the Nineteenth Century" (New York, 1909).

IV. Eminent Thomists.—After the middle of the fourteenth century the vast majority of philosophical and theological writers either wrote commentaries on the works of St. Thomas or based their teachings on his writings. It is impossible, therefore, to give here a complete list of the Thomists: only the more important names can be given. Unless otherwise noted, the authors belonged to the Order of St. Dominic. Those marked (*) were devoted to Thomism in general, but were not of the Thomistic School. A more complete list will be found in the works cited at the end of this article.

Thirteenth Century.—Thomas de Cantimpré (1270); Hugh of St. Cher (1263); Vincent of Bauvais (1264); St. Raymond de Pennafort (1275); Peter of Tarentaise (Pope Innocent V—1276); Giles de Lassines (1278); Reginald de Piperno (1279); William de Moerbeka (1286); Raymond Marti (1286); Bernard de Trilia (1292); Bernard of Hotun, Bishop of Dublin (1298); Theodoric of Apoldia (1299); Thomas Sutton (1300).

Fourteenth Century.—Peter of Auvergne (1301); Nicholas Boccasini, Benedict XI (1304); Godfrey of Fontaines (1304); Walter of Winterburn (1305); Ægidius Colonna (Ægidius Romanus), O.S.A. (1243–1316); William of Paris (1314); Gerard of Bologna, Carmelite (1317); four biographers, viz. Peter Calo (1310); William de Tocco (1324); Bartolommeo of Lucca (1327); Bernard Guidonis* (1331); Dante (1321); Natalis Hervæus (1323); Petrus de Palude (Paludanusi—1342); Thomas Bradwardin, Archbishop of Canterbury (1349); Robert Holkott (1349); John Tauler (1361); Bl. Henry Suso (1365); Thomas of Strasburg, O.S.A. (1357); Jacobus Passavante (1357); Nicholas Roselli (1362); Durandus of Aurillac (1382), sometimes called Durandulus, because he wrote against Durandus a S. Portiano*, who was first a Thomist, afterwards an independent writer, attacking many of St. Thomas's doctrines; John Bromyard (1390); Nicholas Eymeric (1399).

Fifteenth Century.—Manuel Calecas (1410); St. Vincent Ferrer (1415); Bl. John Dominici (1419); John Gerson*, chancellor of the University of Paris (1429); Luis of Valladolid (1436); Raymond Sabunde (1437); John Nieder (1437); Capreolus (1444), called the "Prince of Thomists"; John de Montenegro (1445); Fra Angelico (1455); St. Antoninus (1459); Nicholas of Cusa*, of the Brothers of the Common Life (1464); John of Torquemada (de Turrecrematai, 1468); Bessarion, Basilian (1472); Alanus de Rupe (1475); John Faber (1477); Petrus Niger (1471); Peter of Bergamo (1482); Jerome Savonarola (1498).

Sixteenth Century.—Felix Faber (1502); Vincent Bandelli (1506); John Tetzel (1519); Diego de Deza (1523); Sylvester Mazzolini (1523); Francesco Silvestro di Ferrara (1528); Thomas de Vio Cajetan (1534); commentaries by these two are published in the Leonine edition of the works of St. Thomas. Conrad Koellin (1536); Chrysostom Javelli (1538); Santes Pagnino (1541); Francisco de Vitoria (1546); Franc. Romæus (1552); Ambrosius Catherinus* (Lancelot Politi, 1553); St. Ignatius of Loyola (1556) enjoined devotion to St. Thomas; Matthew Ory (1557); Dominic Soto (1560); Melchior Cano (1560); Ambrose Pelargus (1561); Peter Soto (1563); Sixtus of Siena (1569); John Faber (1570); St. Pius V (1572); Bartholomew Medina (1581); Vincent Justiniani (1582); Maldonatus* (Juan Maldonado, 1583); St. Charles Borromeo* (1584); Salmerón* (1585); Ven. Louis of Granada (1588); Bartholomew of Braga (1590); Toletus* (1596); Bl. Peter Canisius* (1597); Thomas Stapleton*, Doctor of Louvain (1598); Fonseca (1599); Molina* (1600).

Seventeenth Century.—Valentia * (1603); Domingo Bañez (1604); Vásquez* (1604); Bart. Ledesma (1604); Sánchez * (1610); Baronius * (1607); Capponi a Porrecta (1614); Aur. Menochio * (1615); Petr. Ledesma (1616); Suárez * (1617); Du Perron *, a converted Calvinist, cardinal (1618); Bellarmine * (1621); St. Francis de Sales * (1622); Hieronymus Medices (1622); Lessius * (1623); Becanus * (1624); Malvenda (1628); Thomas de Lemos (1629); Alvarez; Laymann* (1635); Joann. Wiggers *, doctor of Louvain (1639); Gravina (1643); John of St. Thomas (1644); Serra (1647); Ripalda*, S. J. (1648); Sylvius (Du Bois), doctor of Douai (1649); Petavius * (1652); Goar (1625); Steph. Menochio *, S. J. (1655); Franc. Pignatelli * (1656); De Lugo * (1660); Bollandus* (1665); Jammy (1665); Vallgornera (1665); Labbe* (1667); Pallavicini * (1667); Busenbaum * (1668); Nicolai * (1673); Contenson (1674); Jac. Pignatelli * (1675); Passerini * (1677); Gonet (1681); Bancel (1685); Thomassin * (1695); Goudin (1695); Sfrondati * (1696); Quétif (1698); Rocaberti (1699); Casanate (1700). To this period belong the Carmelite Salmanticenses, authors of the "Cursus theologicus" (1631–72).

Eighteenth Century.—Guerinois (1703); Bossuet, Bp. of Meaux; Norisins, O.S.A. (1704); Diana (1705); Thyrsus González * (1705); Massoulié (1706); Duhamel* (1706); Wigandt (1708); Piny (1709); Lacroix*

(1714); Carrières * (1717); Natalis Alexander (1724); Echard (1724); Tourney *, doctor of the Sorbonne (1729); Livarius de Meyer * (1730); Benedict XIII * (1730); Graveson (1733); Th. du Jardin (1733); Hyacintha Serry (1738); Duplessis d'Argentré * (1740); Gotti (1742); Drouin * (1742); Antoine * (1743); Lallemant * (1748); Milante * (1749); Preingue (1752); Concina (1759); Billuart (1757); Benedict XIV * (1758); Cuiliati (1759); Orsi (1761); Charlevoix * (1761); Reuter * (1762); Baumgartner * (1764); Berti * (1766); Patuzzi (1769); De Rubeis (1775); Touron (1775); Thomas de Burgo (1776); Gener * (1781); Roselli (1783); St. Alphonsus Liguori (1787); Mamachi (1792); Richard (1794).

Nineteenth Century.—In this century there are few names to be recorded outside of those who were connected with the Thomistic revival either as the forerunners, the promoters, or the writers of the Neo-Scholastic period.

See also FREE WILL; GRACE; PHILOSOPHY; PREDESTINATION; NEO-SCHOLASTICISM; SCOTISM AND SCOTISTS; THEOLOGY.

For rise and progress of Thomism see works referred to in the first part of this article.

For Thomists, a complete list of theological writers of all schools is found in HURTER, *Nomenclator literarius*, in *Tabulæ chronologicæ* at end of each volume. For writers of the Dominican Order, down to the first quarter of the eighteenth century, see QUÉTIF-ECHARD, *Script. ord. præd.* (2 vols., Paris, 1719–21). Many writers of this school are mentioned in the article PREACHERS, ORDER OF, *Academic Organization, Doctrinal activity;* also in GARCIA, *Tomismo y Neo-Tomismo* (San Luis Potosi, 1905).

For Thomistic Philosophers: HAURÉAU, *Hist. de la phil. scolastique* (Paris, 1872–80); DE WULF, *Hist. de la phil. médiévale* (Louvain, 1900; 4th ed., 1912); JOURDAIN, *La phil. de S. Th. d'Aquin* (2 vols., Paris, 1858); GONZÁLEZ, *Hist. de la phil.* (4 vols., Paris, 1890–91); UEBERWEG-HEINZE, *Gesch. der phil.* (Berlin, 1902); TURNER, *Hist. of Phil.* (Boston, 1903).

Neo-Thomism.—Lists of publications pertaining to this period [illegible] found in UEBERWEG-HEINZE, II, 297 sqq.; IV, 209 sqq., 561 sqq.; SERTILLANGES, *S. Thomas d'Aquin* (2 vols., Paris, 1910), bibliography at end of II; PERRIER, *Revival of Schol. Philosophy* (New York, 1909) (the bibliography, pp. 249 to 337, is excellent and the most available for English readers).

Publications on Thomism in general and on the doctrines of the Thomistic school have been multiplied so rapidly since 1879 that volumes would be required for a complete list. The principal works reviving disputes concerning special doctrines of the Thomistic school are: SCHNEEMAN, *Controversiarum de divinæ gratiæ liberique arbitrii concordia initia et progressus* (Freiburg, 1881); DUMMERMUTH, *Thomas et doctrina præmotionis physicæ* (Louvain, 1886); FRINS, *Thomas Aquinatis doctrina de cooperatione Dei cum omni creatura præsertim libera* (Paris, 1893); DUMMERMUTH, *Defensio doctrinæ S. Thomæ Aquin.* (Louvain, Paris, 1895); DU PONT, *La prédetermination physique et la doctrine de S. Thomas* in *Rev. Cath.* (Louvain, 1882–83); DE REGNON, *Bannez et Molina* (Paris, 1883); LESSERTUR, *S. Thomas et le thomisme; S. Th. et la prédestination* (Paris, 1888); GAYRAUD; *Le thomisme et le molinisme* (Paris, 1889–92); IDEM, *St. Thomas et le prédeterminisme* (Paris, 1895); GUILLERMIN, *St. Thomas et le prédeterminisme* (Paris, 1895); DEL PRADO, *De gratia et libero arbitrio* (3 vols., Fribourg, 1907); *De veritate fundamentali philosophiæ christianæ* (Fribourg, 1889), 1911, the latter ed. treating the distinction between essence and existence.

See also THOMAS AQUINAS, SAINT, for list of reviews devoted to Thomism. For comparison of St. Thomas and Scotus, see VACANT, *Etudes comparées sur la philosophie de S. Thomas d'Aquin et sur celle de Duns Scot* (Paris and Lyons, 1891); *Etudes franciscaines* (Jan., 1912); *Revue néo-scolastique*, Aug., 1911, 430; Feb., 1912, 136.

D. J. KENNEDY.

Thompson, the name of two English converts: (1) Edward Healy and (2) Harriet Diana.

EDWARD HEALY, b. at Oakham, Rutlandshire, England; d. at Cheltenham, Gloucestershire, on 21 May, 1891. He was educated at Oakham school and Emmanuel College, Cambridge; and having taken Anglican orders, obtained a curacy at Calne, Wiltshire. After some years of the Anglican ministry at Marylebone, Ramsgate, and elsewhere, he became a Catholic in 1846 and published as his defence: "Remarks on certain Anglican Theories of Unity" (1846); "The Unity of the Episcopate considered" (1847); and "A few earnest thoughts on the Duty of Communion with the Catholic Church" (1847). In 1851 jointly with James Spencer Northcote (q. v.) he undertook the editorship of the valuable series of controversial pamphlets known as "The Clifton Tracts". The rest of his life, the latter years of which were spent at Cheltenham, he devoted to religious literature. His chief works were: lives of M. Olier (1861), Marie Harpain (1869), St. Stanislaus Kostka (1869), Baron de Rentz (1873), and Henri-Marie Boudon (1881); "Devotion to the Nine Choirs of Holy Angels" (1869); "The Life and Glories of St. Joseph" (1888); and "Before and After Gunpowder Plot" (1890). Most of this useful work consisted in the skilful adaptations of foreign books which he thought were of value to English-speaking Catholics.

HARRIET DIANA, wife of Edward Healy Thompson, and daughter of Nicholson Calvert of Humsden, b. at Humsden, Hertfordshire, 1811; d. at Cheltenham, Gloucestershire, 21 Aug., 1896. On her husband's conversion she also joined the Catholic Church, and like him devoted herself to literary work. Her chief work is the "Life of Charles Borromeo", but her stories of Catholic life won considerable popularity. These include: "Mary, Star of the Sea" (1848); "The Witch of Malton Hill"; "Mount St. Lawrence" (1850); "Winefride Jones" (1854); "Margaret Danvers" (1857); "The Wyndham Family" (1876); and others, as well as articles in "The Dublin Review".

GILLOW, *Bibl. Dict. Eng. Cath.*, s. v.; GORMAN, *Converts to Rome* (London, 1910); GONDON, *Motifs de conversion de dix ministres anglicanes.*

EDWIN BURTON.

Thompson, FRANCIS, poet, b. at Preston, Lancashire, 18 Dec., 1859; d. in London, 13 Nov., 1907. He came from the middle classes, the classes great in imaginative poetry. His father was a provincial doctor; two paternal uncles dabbled in literature; he himself referred his heredity chiefly to his mother, who died in his boyhood. His parents being Catholics, he was educated at Ushaw, the college that had in former years Lingard, Waterton, and Wiseman as pupils. There he was noticeable for love of literature and neglect of games, though as spectator he always cared for cricket, and in later years remembered the players of his day with something like personal love. After seven years he went to Owens College to study medicine. He hated this proposed profession more than he would confess to his father; he evaded rather than rebelled, and finally disappeared. No blame, or attribution of hardships or neglect should attach to his father's memory; every careful father knows his own anxieties. Francis Thompson went to London, and there endured three years of destitution that left him in a state of incipient disease. He was employed as bookselling agent, and at a shoemaker's, but very briefly, and became a wanderer in London streets, earning a few pence by selling matches and calling cabs, often famished, often cold, receiving occasional alms; on one great day finding a sovereign on the footway, he was requested to come no more to a public library because he was too ragged. He was nevertheless able to compose a little—"Dream-Tryst", written in memory of a child, and "Paganism Old and New", with a few other pieces of verse and prose.

Having seen some numbers of a new Catholic magazine, "Merry England", he sent these poems to the editor, Mr. Wilfrid Meynell, in 1888, giving his address at a post-office. The manuscripts were pigeonholed for a short time, but when Mr. Meynell read them he lost no time in writing to the sender a welcoming letter which was returned from the post-office. The only way then to reach him was to publish the essay and the poem, so that the author might see them and disclose himself. He did see them, and wrote to the editor giving his address at a chemist's shop. Thither Mr. Meynell went, and was told that the poet owed a certain sum for opium, and was to be found hard by, selling matches. Having settled matters between the druggist and his client, Mr. Meynell wrote a pressing invitation to Thompson to call upon him. That day was the last of the poet's destitution. He was never again friendless or without food, clothing, shelter, or fire. The first step was to restore him to better health and to overcome the opium habit. A doctor's care, and some months at Storrington, Sussex, where he lived as a boarder at the Premonstratensian monastery, gave him a new hold upon life. It was there, entirely free temporarily from opium, that he began in earnest to write poetry. "Daisy" and the magnificent "Ode to the Setting Sun" were the first fruits. Mr. Meynell, finding him in better health but suffering from the loneliness of his life, brought him to London and established him near himself. Thenceforward with some changes to country air, he was either an inmate or a constant visitor until his death nineteen years later.

In the years from 1889 to 1896 Thompson wrote the poems contained in the three volumes, "Poems", "Sister Songs", and "New Poems". In "Sister Songs" he celebrated his affection for the two elder of the little daughters of his host and more than brother; "Love in Dian's Lap" was written in honour of Mrs. Meynell, and expressed the great attachment of his life; and in the same book "The Making of Viola" was composed for a younger child. At Mr. Meynell's house Thompson met Mr. Garvin and Coventry Patmore, who soon became his friends, and whose great poetic and spiritual influence was thenceforth preeminent in all his writings, and Mrs. Meynell introduced him at Box Hill to George Meredith. Besides these his friendships were few. In the last weeks of his life he received great kindness from Mr. Wilfrid Blunt, in Sussex. During all these years Mr. Meynell encouraged him to practise journalism and to write essays, chiefly as a remedy for occasional melancholy. The essay on Shelley, published twenty years later and immediately famous, was amongst the earliest of these writings; "The Life of St. Ignatius" and "Health and Holiness" were produced subsequently.

Did Francis Thompson, unanimously hailed on the morrow of his death as a great poet, receive no full recognition during life? It was not altogether absent. Patmore, Traill, Mr. Garvin, and Mr. William Archer wrote, in the leading reviews, profoundly admiring studies of his poems. Public attention was not yet aroused. But that his greatness received no stinted praise, then and since, may be seen in a few citations following. Mr. Meynell, who perceived the quality of his genius when no other was aware of it, has written of him as "a poet of high thinking, of 'celestial vision', and of imaginings that found literary images of answering splendour"; Mr. Chesterton acclaimed him as "a great poet", Mr. Fraill as "a poet of the first order"; Mr. William Archer wrote, "It is no minor Caroline simper that he recalls, but the Jacobean Shakespeare"; Mr. Garvin, "the Hound of Heaven seems to us the most wonderful lyric in our language"; Burne-Jones, "Since Gabriel's [Rossetti's] 'Blessed Damozel' no mystical words have so touched me"; George Meredith, "A true poet, one of a small band"; Coventry Patmore, "the 'Hound of Heaven' is one of the very few great odes of which the language can boast". Of the essay on Shelley (Dublin Review) a journalist wrote truly, "London is ringing with it". Francis Thompson died, after receiving all the sacraments, in the excellent care of the Sisters of St. John and St. Elizabeth, aged forty-eight.

Carroll B. Chilton.

Thompson, Right Honourable Sir John Sparrow David, jurist and first Catholic Premier of Canada, b. at Halifax, Nova Scotia, 10 Nov., 1844; d. at Windsor Castle, England, 12 Dec., 1894. He was the son of John Sparrow Thompson, queen's printer in Nova Scotia, superintendent of the money order system, and native of Waterford, and of Catherine Pottinger, who was of Scottish descent. The parents on both sides were rigid Protestants. Young Thompson made a short course in the common schools and in the Free Church Academy in his native city. At the age of fifteen he began the study of law and at the same time of stenography. He was admitted to the bar in 1865 and for a short period he assisted in reporting the debates in the Nova Scotia Legislature. In 1870 he married Miss Annie E. Affleck and shortly afterwards became a Catholic. His progress in public life was rapid and brilliant. Beginning as an alderman in Halifax in 1871, he became a member of the House of Assembly in 1877, attorney-general in 1878, Premier of Nova Scotia in 1882, and a judge of the Supreme Court in the same year. In 1885 he became Minister of Justice of Canada, and from the time of his first great speech on the Riel question in 1886, his position as one of the greatest of Canadian parliamentarians was never disputed. In the federal arena his successes were brilliant and unbroken. In 1887 he went to Washington as legal adviser of the British Government in connexion with the Fisheries Commission, and for this service was knighted by Queen Victoria. In 1892 he became Premier of Canada, and a year later he sat as one of the British arbitrators on the Behring Sea Commission at Paris. In recognition of this service he was appointed a member of the Privy Council of Great Britain. He died suddenly at Windsor Castle whither he was summoned by the queen, and his remains were conveyed to Halifax on H.M.S. Blenheim. A state funeral attended by state and church dignitaries from all parts of Canada, took place on 1 Jan., 1895. His remains were buried in Holy Cross cemetery. "All things considered", says Mr. J. S. Willison, a distinguished Canadian writer, "his is the most remarkable career which Canadian politics have developed."

Joseph A. Chisholm.

Thompson River Indians (Thompson Indians), an important tribe of British Columbia of Salishan linguistic stock, also known as Knife Indians, occupying the country about the junction of Thompson and Fraser Rivers, Yale district, from about Yale up nearly to Lillooet on the Fraser, and as far as Ashcroft on the Thompson. They surrounded the cognate Lillooet, and Shuswap on the north; the Sechelt, Squamish, Cowichan, and Songish on the west and south-west; and the Okanagan on the south-east. They are now gathered upon a number of small reservations under jurisdiction of the Kamloops-Okanagan agency, of which the principal are Lytton (470), Lower Nicola (355), Cooks Ferry (183), Boothroyd (158), Spuzzum (157), Coldwater (107). Their original population may have been near to 4000 souls, but is now reduced (1910) by smallpox and other causes, consequent upon the advent of the whites, to 1782. The proper name of the tribe is Ntlakyapamuk or Nhlakapmuh, and they recognize five subtribes among themselves. In their primitive condition they subsisted chiefly by hunting and fishing, together with the gathering of wild roots and berries. In arts, organization, religious belief and ceremonial, and general custom they resembled in all essentials their neighbouring kindred, particularly the Lillooet, Shuswap, Sechelt, and Squamish (q. v.), with whose history also their own is closely interwoven. In 1808 Simon Fraser in descending the river which bears his name passed through their territory, and shortly afterward the Hudson's Bay Company established posts throughout the region. In 1845 the Jesuit missionary Father John Nobili visited the Thompson River, Okanagan, Shuswap, and other tribes of the Fraser River country, preaching and baptizing in temporary chapels built by the Indians

About 1860 the noted missionary Oblate father (afterwards bishop), Paul Durieu, spent a short time with the tribe. In 1861 Rev. John B. Good, acting for the Episcopalians, established a regular mission work among them, continuing for nearly twenty years with the result that most of the tribe are now of that denomination. In 1862 in common with the other Fraser River tribes, they were terribly wasted by smallpox. In 1880 the distinguished Oblate missionary and philologist Father John M. R. Le Jeune, best known for his invention of a Salishan system of shorthand, began work among the Thompson River Indians extended after some years to the Okanagan and Shuswap. The entire tribe is now Christian, about 1500 being Episcopalian, the rest Catholic, including all of the Coldwater band. Valuable ethnologic studies of the Thompson River tribe have been made by Teit and Hill-Tout. Important linguistic contributions are a grammatic sketch and vocabulary and several religious publications by Rev. Mr. Good of the Episcopalian (Anglican) mission, and a number of prayer, hymn, catechism, and primer compilations by Father Le Jeune, all in the Salishan shorthand characters of his own invention. The official report for the Coldwater band (Catholic) will answer for all: "They have a good class of buildings and are steadily improving them. They are industrious, steady and extremely law-abiding. They have made good progress in farming. They class among our most temperate and moral Indians."

JAMES MOONEY.

Thomson, WILLIAM, VENERABLE. See SERGEANT, RICHARD, VENERABLE.

Thonissen, JEAN-JOSEPH, professor of law at the University of Louvain, minister in the Belgian Government, b. at Hassett, Limbourg, 21 Jan., 1817; d. at Louvain, 17 Aug., 1891. After a brilliant career as a student he first performed duties in the magistracy and the administration of the province, but even then was occupied with juridical works on penal law. When dismissed by the Liberal (anti-clerical) ministry, the University of Louvain appointed him in 1848 to the chair of criminal law. In 1863 he was elected to Parliament. It is difficult to summarize briefly Thonissen's activity. Although he achieved his fame in his chosen field of penal law, his writings covered the most varied points of history and social science, as was evidenced by the fact that in 1886 the national jury of social sciences awarded him the prize. In penal matters he began with commentaries on the penal code and devoted himself especially to the reform of the penal procedure which he advocated while he was minister, and for the history of which he wrote important works. He had conceived the vast plan of a history of criminal law, but realized only a part of it. The first part, which met with considerable success, dealt with Brahminical India, Egypt, and Judea, and contained a "Penal Code of the Pentateuch". He published a work on the penal law of the Athenian Republic. Considering the Roman period as sufficiently well-known, he took up the Frankish period, which he was unable to finish. These works are his chief title to fame from the scientific standpoint as are his reports on penal procedure from the practical standpoint. He aroused lively controversy by advocating the suppression of the death penalty, which his influence brought about in Belgium. While not rejecting it [illegible] absolutely unlawful, Thonissen considered it useless in the social condition of the time. In fact, although the death sentence is still legal, capital punishment is no longer inflicted in Belgium.

Detailed lists of Thonissen's numerous publications are given in the Bibliography of the Académie Royale and in that of the Catholic University of Louvain, to which the reader is referred. He showed a marked preference for national political history, his principal work on the subject being the "History of the Reign of Leopold I". He also published biographies of prominent Belgians such as Félix de Mérode. He had been impressed by the events of 1848 which determined his career and he devoted himself to a laborious study of innovating systems, especially of those men who are sometimes called the romanticists of Socialism, St. Simon, Fourier, Cabet, Owen, Louis Blanc, and others, being led eventually to write a history of Socialism from ancient times to 1852. These works and many others secured his admission to the Royal Academy of Belgium and the Institute of France; he was commissioned by the former institution to write the volume devoted to its centenary (1872).

JEAN-JOSEPH THONISSEN

Thonissen's political life began in 1863 and was never interrupted by his constituents. In the Chamber his value as a jurisconsult was much appreciated and he drafted many of the parliamentary reports. He occupied a unique position owing to his characteristic independence which made him disagree with the Right on certain points, for instance, on military matters. He was deeply attached to the Belgian Constitution of 1831, which contained articles proclaiming liberty of worship, of the press, etc. Although profoundly religious he was imbued like many men of his generation with the errors of Liberalism, and he wrongly regarded these liberties as of natural right and defended this opinion in his commentary on the Constitution (1844). After the papal decisions on these matters, he corrected his ideas, but always had a leaning towards solutions favouring broad tolerance. Although tempered by great geniality Thonissen's independence of character was such that even the Right feared him and did not desire his participation in affairs. Thus when the king during a period of stress entrusted him with the formation of a ministry (1872), he was not supported by his party, which dreaded concessions to the Left or to the Crown. When he finally entered the ministry (1884), age had rendered him unfit for laborious work, though he was able to enforce the new school law which the victorious Right had substituted for the lay regime of 1879; this task consumed the last of his strength and left him unable to resume his scientific pursuits in his retirement (1887); his faculties soon became clouded. Thonissen was an intrepid worker, a firm Christian, an upright and simple man, with just a touch of artless vanity, though sometimes brusque in manner and given to occasional outbursts. He was one of the most important members of the faculty of law at Louvain and he will be chiefly remembered in the sphere of penal law, where his name is destined to survive.

Numerous articles have been devoted to Thonissen and to his works. The list of the latter will be found in the bibliography mentioned above. See also LAMY in *Annuaire de l'Académie royale de Belgique* (1892); NYSSENS in *Annuaire de l'université catholique de Louvain* (1892).

VICTOR BRANTS.

Thorney Abbey (i. e. "the isle of thorns", anciently called ANCARIG), in Cambridgeshire, England, was for some three centuries the seat of Saxon hermits, or of anchorites living in community, before it was refounded in 972 for Benedictine monks by Ethelwold, Bishop of Winchester, with the aid of King Edgar. The founder brought thither the body of St. Botulph and of other Saxon saints, including, possibly, St. Benet Biscop; and the church, originally dedicated to Jesus Christ and His Blessed Mother, became known thereafter as St. Mary and St. Botulph's. The structure built by Ethelwold stood for a century, and was replaced after the Norman Conquest by a new church 290 feet long, which was finished in 1108. The long series of charters granted to Thorney in the twelfth and thirteenth centuries attests the prosperity of the abbey and the number of its benefactors. In Domesday Book its value is reckoned as equal to that of Peterborough; and William of Malmesbury describes it, in the reign of Henry II, as "an image of Paradise", and flourishing in all respects. Of the thirty-eight abbots whose names are recorded, the first was Godeman, and the last Robert Blyth, who was also Bishop of Down and Connor, in Ireland. Blyth and his community of nineteen monks surrendered the abbey to Henry VIII in 1539, receiving a pension in exchange. The buildings and most of the property were granted by Edward VI to John Earl of Bedford, whose family still owns them. The original Norman nave of five bays, with its perpendicular clerestory, remains, and is used as the parish church. The choir has disappeared, and the nave aisles were demolished in 1636, the material being used to fill up the nave arches. The west front, flanked by square turrets with octagonal terminations 100 feet high, and displaying an elaborate screen, with niches containing nine statues over the west window, is extremely picturesque.

D. O. HUNTER-BLAIR.

Thorns, FEAST OF THE CROWN OF.—The first feast in honour of the Crown of Thorns (*Festum susceptionis coronæ Domini*) was instituted at Paris in 1239, when St. Louis brought thither the relic of the Crown of Thorns, which was deposited later in the Royal Chapel, erected in 1241–8 to guard this and other relics of the Passion. The feast, observed on 11 August, though at first special to the Royal Chapel, was gradually observed throughout the north of France. In the following century another festival of the Holy Crown on 4 May was instituted and was celebrated along with the feast of the Invention of the Cross in parts of Spain, Germany, and Scandinavia. It is still kept in not a few Spanish dioceses and is observed by the Dominicans on 24 April. A special feast on the Monday after Passion Sunday was granted to the Diocese of Freising in Bavaria by Clement X (1676) and Innocent XI (1689) in honour of the Crown of Christ. It was celebrated at Venice in 1766 on the second Friday of March. In 1831 it was adopted at Rome as a double major and is observed on the Friday following Ash-Wednesday. As it is not kept throughout the universal Church, the Mass and Office are placed in the appendices to the Breviary and the Missal. The hymns of the Office, which is taken from the seventeenth-century Gallican Breviary of Paris, were composed by Habert. The "Analecta hymnica" of Dreves and Blume contains a large number of rythmical offices, hymns, and sequences for this feast.

F. G. HOLWECK.

Thorpe, ROBERT, VENERABLE, priest and martyr, b. in Yorkshire; suffered at York, 15 May, 1591. He reached the English College at Reims 1 March, 1583–4, was ordained deacon in December following, and priest by Cardinal Guise in April, 1585. He was sent on the mission, 9 May, 1585, and laboured in Yorkshire. He was arrested in bed very early on Palm Sunday, 1595, at the house of his fellow-martyr, Thomas Watkinson, at Menthorpe in the East Riding of Yorkshire, someone having seen palms being gathered the night before, and having informed John Gates of Howden, the nearest justice of peace. Watkinson, an old Catholic yeoman who lived a solitary life, is described by the treacherous priest John Cecil as a clerk, so it is possible he was in minor orders. Both, though naturally timorous, met their deaths with great fortitude. Thorpe, condemned as a traitor merely for being a priest, was hanged, drawn, and quartered. Watkinson, condemned as a felon merely for harbouring priests, was only hanged. He was offered his life if he would go to church.

JOHN B. WAINEWRIGHT.

Thou, JACQUES-AUGUSTE DE, French historian, b. at Paris, 8 October, 1553; d. there, 7 May, 1617. The son of Christophe de Thou, first president of the *Parlement* of Paris, he studied at several French universities, especially at Valence, where he knew Scaliger. Both when he accompanied the ambassador Paul de Foix to Italy (1572–76) and when he went to live in Guienne (1581), it was always his aim to make the acquaintance of the most celebrated men of intellect, such as Muretus, P. Manutius, the Pithous, and Montaigne. During his sojourn in Guienne he knew Henry of Navarre, the future Henry IV. As Master of Petitions of the *Parlement* of Paris in 1585 and in 1588 as councillor of State, he was the opponent of the League. After the assassination of the Duke of Guise he did much to further the reconciliation between Henry III and Henry of Navarre (April, 1589) and set out for Germany with Gaspard de Schomberg to ask the help of Protestant princes against the League. After the death of Henry III he entered the service of Henry of Navarre, with whom he lived for five years in camp. He had an important share in the conferences of Surênnes, which prepared the entry of Henry IV into Paris (22 May, 1594) and especially in compiling the Edict of Nantes (1598) which established the religious liberty and political influence of the Protestants. During the regency of Maria de' Medici he took part in the negotiation of the Treaties of Sainte Menehould (1614) and Loudun (1616) between the Court and the rebellious Condé. His influence in the royal councils was exercised in behalf of Gallican ideas and he was victorious in his opposition to the reception in France of the Tridentine decrees.

JACQUES-AUGUSTE DE THOU
From a contemporary pastel portrait

An eminent Latinist, De Thou published several collections of Latin poems, but his fame is chiefly due to his "Historiæ" written in Latin. His father, Christophe de Thou (1508–82), having left numerous materials for a national history, De Thou set to work writing it in 1591. His correspondence with foreign scholars procured for him valuable documents. In 1604 he published the first part, 1546–60; in 1606, the second, to 1572; in 1607, the third, 1572-74; and in 1608, the fourth part, 1574–84. He intended carrying it down to the end of the reign of Henry IV (1610), but his narrative had reached only the year 1607, when he died. The last and unfinished portion of his work was published in 1620 by his friends Dupuy and Rigault. The best edition of the Latin text was prepared in the eighteenth century by the Englishman Thomas Carte, published at London in seven volumes by Samuel Buchley (1733); there are French translations and summaries. At first the influence of Cardinal d'Ossat and of Du Perron put off the condemnation of his work at Rome, but in 1609 to De Thou's great sorrow the Congregation of the Index pronounced against it. The *Parlement* of Paris replied by condemning Cardinal Bellarmine's book on the power of the pope. In his work De Thou commits errors of fact and of appreciation. In his judgment of Mary Stuart, for example, he is too often influenced by Buchanan, an impassioned enemy of the queen's memory. But such as it is his work has a certain value; Bossuet often made use of it in his "Histoire des variations", and he speaks of De Thou as a "great author, a faithful historian".

In 1620 were published his "Memoirs" in Latin: they cover the period between 1553 and 1601 and are an important source for the religious and literary history of the period. Some writers have claimed that his friend, Nicolas Rigault, was their chief author. The eldest son of Jacques-Auguste de Thou, François-Auguste de Thou (1607–42), was beheaded at the command of Richelieu for having kept secret the conspiracy between Cinq-Mars and the Spaniards. The library collected by Jacques-Auguste was famous; it was open to scholars and foreigners. In his will De Thou appointed Pierre Dupuy his children's librarian. The library remained in the family until 1680 when it was bought almost entirely by President de Menars and in the eighteenth century passed to the Rohan Soubise family. It then contained 12,729 works. Successive catalogues published during the seventeenth century are very important bibliographical documents.

GEORGES GOYAU.

Thou, NICOLAS DE, Bishop of Chartres, uncle of the historian Jacques-Auguste de Thou, b. at Paris, 1528; d. at Villebon, 5 Nov., 1598. He became a canon of the cathedral of Paris in 1547, and Bishop of Chartres by a Bull of 8 April, 1573. His antipathy for the League, shared by his brother, President Christophe de Thou (1508–82), made the bishop's position difficult when the people of Chartres, who were devoted to the League, shut their gates (17 Jan., 1589) to the troops of Henry III, subsequently welcomed the Duc de Mayenne, and recognized the aged Cardinal de Bourbon as king. Nicolas de Thou temporized, and on 20 April, 1591, received in his palace Henry of Navarre, the future Henry IV. On 21 Sept., 1591, he attended the assembly of bishops which declared "null, unjust and suggested by the malice of the enemies of France" Gregory XIV's Bull of excommunication against Henry of Navarre, and on 25 July, 1593, he assisted at Henry IV's abjuration in St.-Denis. As Reims was still in the power of the Duc de Mayenne, Chartres was the city chosen for the coronation. To end the dispute with Renaud de Beaune, Archbishop of Bourges, who had just been appointed Archbishop of Sens and who claimed the honour of anointing the king, de Thou by a skilful move had himself appointed by the Archbishop of Reims as his representative and was thus commissioned to proceed with the coronation. Instead of the Sainte Ampoule there was brought from Tours a miraculous oil preserved in the Abbey of Marmoutier. The anointing took place 27 Feb., 1594, and the next day Nicolas de Thou bestowed on the king the Collar of the Order of the Holy Ghost. He left various pastoral writings and a book entitled "Cérémonies observées au sacre et couronnement d'Henri IV, roi de France".

CAYET, *Chronologie novennaire*, bk. VI; FISQUET, *La France pontificale: Chartres* (Paris, 1873).

GEORGES GOYAU.

Three Chapters.—The Three Chapters (τρία κεφάλαια) were propositions anathematizing: (1) the person and writings of Theodore of Mopsuestia; (2) certain writings of Theodoret of Cyrus; (3) the letter of Ibas to Maris. At a very early stage of the controversy the incriminated writings themselves came to be spoken of as the "Three Chapters". In consequence those who refused to anathematize these writings were said to defend the Three Chapters; and, vice versa, those who anathematized them, to condemn the Three Chapters. Thus, that most important work, the "Defensio trium capitulorum" by Facundus, Bishop of Hermiane, was an attack on the anathematization of the writings of Theodore, etc. The history of the controversy may be divided into three periods: the first ending with the arrival of Vigilius at Constantinople; the second with his ratification of the Second Council of Constantinople in which the Three Chapters were condemned; the third with the final healing of the schisms in the West caused by the papal ratification of the aforesaid council. We shall treat very cursorily of the second and third periods, referring the reader for fuller details to the articles on the council, Pelagius I, Pelagius II, and Vigilius.

At the end of 543 or the beginning of 544 an edict was issued in the name of the Emperor Justinian in which the Three Chapters were anathematized. Justinian's purpose was to facilitate the return of the Monophysites to the Church. These heretics accused the Church of Nestorianism, and, when assured that Nestorius was regarded as a heretic, pointed to the writings of his teacher Theodore of Mopsuestia, which were quite as incorrect, and yet had never been condemned. They added that Theodoret, the friend and defender of Nestorius, had been restored to his see by the Council of Chalcedon, and that the epistle of Ibas had even been treated as harmless by the council. It was sincerely hoped by Justinian that when grounds of complaint against the council had been removed, the Monophysites might be induced to accept the decisions of the council and the letters of St. Leo, which they now insisted on misinterpreting in a Nestorian sense. As a temporal ruler he wished to heal religious divisions which threatened the security of the empire, and as a good amateur theologian he was probably rather pleased with himself at being able to lay his finger upon what seemed to him an important omission on the part of the Council of Chalcedon. But upright as he was, he was really being engineered by Origenists who were desirous of escaping his attention. (For Justinian's campaign against the Origenists see XI, 311.) Evagrius (Hist. eccl., IV, xxviii) tells us that Theodorus Ascidas, the leader of the Origenists, came to Justinian who was consulting about further measures against the Origenists, and raised the question of the Three Chapters to divert the attention of the emperor. According to Liberatus (Breviarium, c. 24) Ascidas wished to take his revenge on the memory of Theodore of Mopsuestia, who had written much against Origen: and finding the emperor engaged upon a treatise which was to convert a sect of Monophysites known as the Acephali, suggested a more expeditious plan. If the writings of Theodore and the epistle of Ibas were anathematized, the Council of Chalcedon being thus revised and expurgated (Synodus . . . retractata et expurgata) would no longer be a stumbling block to the Monophysites. The admissions, quoted by Facundus (Def., I, 2; IV, 4), made by Domitian, Bishop of Ancyra, to Vigilius, tell the same story of an Origenist intrigue.

The leading Eastern bishops were coerced, after a short resistance, into subscribing. Mennas, Patriarch of Constantinople, first protested that to sign was to condemn the Council of Chalcedon, and then yielded on the distinct understanding, as he told Stephen the Roman apocrisarius at Constantinople, that his subscription should be returned to him if the Apostolic See disapproved of it. Stephen and Dacius, Bishop of Milan, who was then at Constantinople, broke off communion with him. Mennas had next to coerce his suffragans. They also yielded, but lodged protests with Stephen to be transmitted to the pope, in which they declared that they acted under compulsion. Ephraim, Patriarch of Alexandria, resisted, then yielded and sent a message to Vigilius, who was in Sicily, affirming that he had signed under compulsion. Zoilus, Patriarch of Antioch, and Peter, Bishop of Jerusalem, made a like resistance and then yielded (Facundus, "Def.", IV, 4). Of the other bishops, those who subscribed were rewarded, those who refused were deposed or had to "conceal themselves" (Liberatus, "Brev.", 24; Facundus, "Def.", II, 3 and "Cont. Moc.", in Gallandi, XI, 813). While the resistance of the Greek-speaking bishops collapsed, the Latin, even those like Dacius of Milan and Facundus, who were then at Constantinople, stood firm. Their general attitude is represented in two letters still extant. The first is from an African bishop named Pontianus, in which he entreats the emperor to withdraw the Three Chapters on the ground that their condemnation struck at Chalcedon. The other is that of the Carthaginian deacon, Ferrandus; his opinion as a most learned canonist was asked by the Roman deacons Pelagius (afterwards pope, at this time a strong defender of the Three Chapters) and Anatolius. He fastened on the epistle of Ibas—if this was received at Chalcedon, to anathematize it now was to condemn the council. An even stronger use of the benevolence of the council towards this epistle was made by Facundus at one of the conferences held by Vigilius before he issued his "Judicatum". He wished it to protect the memory of Theodore of Mopsuestia because Ibas had spoken of him in terms of commendation (Cont. Moc., loc. cit.). When in January, 547, Vigilius arrived at Constantinople while Italy, Africa, Sardinia, Sicily, and the countries of Illyricum and Hellas through which he journeyed were up in arms against the condemnation of the Three Chapters, it was clear that the Greek-speaking bishops as a whole were not prepared to withstand the emperor.

With regard to the merits of the controversy, theological errors and, in the case of Theodore, very serious ones, were to be found in the incriminated writings (Theodore was practically a Nestorian before Nestorius); the mistakes of Theodoret and Ibas were chiefly but not wholly due to a misunderstanding of St. Cyril's language. Yet these errors even when admitted did not make the question of their condemnation an easy one. There were no good precedents for thus dealing harshly with the memory of men who had died in the peace of the Church. St. Cyprian, as Facundus argued ("Cont. Moc.", in Gallandi, X, 815), had erred about the rebaptism of heretics, yet no one would dream of anathematizing him. The condemnation was not demanded to crush a heresy, but to conciliate heretics who were implacable enemies of the Council of Chalcedon. Both Ibas and Theodoret had been deprived of their bishoprics by heretics, and had been restored by the Holy See and the Council of Chalcedon on anathematizing Nestorius. Yet the council had their writings before it, and, in the case of the epistle of Ibas, things were said which could easily be construed into an approval of it. All this made the condemnation look like an oblique blow at St. Leo and Chalcedon.

The matter was further complicated by the fact that the Latins, Vigilius among them, were for the most part ignorant of Greek and therefore unable to judge the incriminated writings for themselves. Pelagius II in his third epistle to Elias, probably drawn up by St. Gregory the Great, ascribes all the trouble to this ignorance. All they had to go upon was the general attitude of the Fathers of Chalcedon. These facts should be remembered in judging the conduct of Vigilius. He came to Constantinople in a very resolute frame of mind, and his first step was to excommunicate Mennas. But he must have felt the ground was being cut from under his feet when he was supplied with translations of some of the worst passages in the writings of Theodore. In 548 he issued his "Judicatum" in which the Three Chapters were condemned, and then temporarily withdrew it when the storm it raised showed how ill-prepared the Latins were for it. Next he and Justinian agreed to a general council in which Vigilius pledged himself to bring about the condemnation of the Three Chapters, it being understood that the emperor should take no further steps till the council should be arranged. The emperor broke his pledge by issuing a fresh edict condemning the Chapters. Vigilius had twice to take sanctuary, first in the Basilica of St. Peter, and then in the Church of St. Euphemia at Chalcedon, from which he issued an Encyclical to the whole Church describing the treatment he had received. Then an agreement was patched up and Vigilius agreed to a general council but soon withdrew his assent. Nevertheless, the council was held, and, after refusing to accept the "Consitutum" of Vigilius (see Vigilius, Pope), it then condemned the Three Chapters. Finally Vigilius succumbed, confirmed the council, and was set free. But he died before reaching Italy, leaving his successor Pelagius the task of dealing with the schisms in the West. The most enduring of these were those of Aquileia and Milan. The latter came to an end when Fronto, the schismatical bishop, died about 581.

Original Sources.—The writings of Facundus in *P.L.*, LXVII, 527–878, Gallandi, XI, 661–821; Fulgentius Ferrandus, *Epist. VI* in *P.L.*, LXVII, Gallandi, XI; Liberatus, *Breviarium* in *P.L.*, LXVIII, Mansi, IX (Florence, 1759), 659–700, Gallandi, XII; Pontianus, *Epist.* in *P.L.*, LXVI, 995; Hardouin, *Concilia*, III. The *Chronicon* of Victor Tunnunensis is contained in *P.L.*, LXVIII, 957 sqq., and Gallandi, XII; this is especially valuable for the history of the suppression of the schism in Africa. For the schism in Italy the most important documents are certain epistles of Pelagius I, Pelagius II, and St. Gregory the Great. For editions see Pelagius I, Pope; Pelagius II, Pope; Gregory I (the Great), Saint, Pope.

Three Rivers, Diocese of (Trifluvianensis), formed from the Archdiocese of Quebec, to which it is now suffragan, founded on 8 June, 1852. The diocese at first comprised on the northern shore of the St. Lawrence, the Counties of Champlain and of St. Maurice—the County of Maskinongé being at that time a part of the County of St. Maurice; on the southern bank, the Counties of Yamaska, Nicolet, Drummond, and

twenty-four townships in the County of Sherbrooke. Later on, this territory was divided, especially for the erection of the Diocese of Sherbrooke and of the Vicariate-Apostolic of Pontiac. Lastly, in July 1885, all the parishes of the southern shore were erected into the Diocese of Nicolet. It now comprises forty-three parishes and eight missions. The Catholic population is 84,000; non-Catholic 800, of whom 600 are Protestants.

The first bishop, Mgr. Thomas Cooke, died in 1870 and was succeeded by Mgr. Louis-François Laflèche, administrator of the diocese from 1869 to 1898, year of his death. Mgr. F.-X. Cloutier is the present and third Bishop of Three Rivers; born at Ste-Geneviève de Batiscan, Champlain, Quebec, 2 November, 1848, he was ordained priest, 22 September, 1872, appointed Bishop of Three Rivers, 8 May, 1899, and consecrated on 25 July following by Mgr. L.-N. Bégin, Archbishop of Quebec. The diocese contains 100 secular priests; 1 convent of Franciscan Fathers; 1 house of Oblate Fathers; 10 schools of brothers; commercial colleges, academies, etc., 4 under the direction of the Brothers of the Christian Schools, 3 under the direction of the Brothers of Christian Instruction, 2 under the direction of the Brothers of St. Gabriel, 1 under the direction of the Brothers of the Sacred Heart. There is also a juniorate in charge of the Brothers of Christian Instruction.

The institutes of women are: Ursulines, 7 convents; Sisters of the Congregation of Notre-Dame, 2 convents; Sisters of the Assumption, 4 convents; Sisters of the Good Shepherd, 1 convent; Gray Nuns of the Cross, 1 convent; Daughters of Jesus, 2 convents, 1 kindergarten for boys and 13 schools for girls and boys; the Sisters of Charity of Providence, with 4 orphanages, 2 boarding-schools for girls, 4 asylums, and 1 hospital; Dominican Sisters of the Holy Rosary, 1 orphanage, they also have charge of 2 religious institutions; Sisters Adorers of the Precious Blood, 1 monastery.

The churches, mostly all of them remodeled, are remarkable in structure and in size. The cathedral, erected in 1854, and restored in 1904, is a magnificent monument of Gothic architecture. The schools in each parish are numerous and well conducted. The Seminary of Three Rivers, founded in 1860, has a yearly attendance of 300 students. Religious and benevolent societies are numerous and flourishing. The diocese has also literary circles, Young Men's Associations, savings' banks, parochial libraries, and temperance societies.

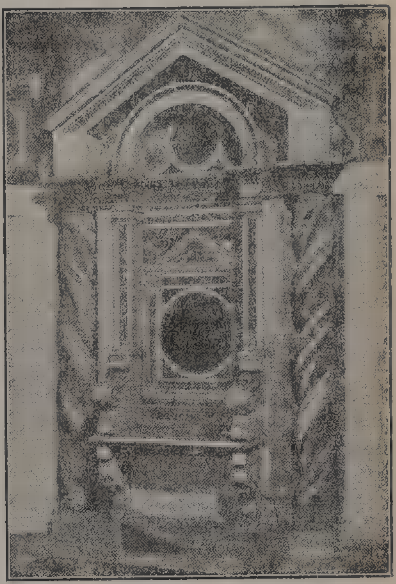
Throne (Lat. *thronus*, *cathedra*, *sedes episcopalis*), the seat the bishop uses when not engaged at the altar. If the altar stands near the entrance to the choir, then, according to the "Cæremoniale episcoporum", the throne is to be placed at the apex of the apse in the centre of the stalls of the canons that join it to the right and left. If, however, the altar is placed close to the wall of the apse, or is only a short distance from this wall, the throne must be placed on the Gospel side of the choir. According to the "Cæremoniale episcoporum" the throne is to be made *in modum cathedræ et throni immobilis* (in the fashion of an immovable chair or throne) such as is still to be seen in many old churches. Consequently an ordinary chair, used temporarily or only for the moment, does not suffice as the throne of a bishop. Further directions are *forma præalta et sublimis*, that is, the chair must have a high back and arms, and be raised above the floor so that three steps lead up to it. The steps are to be covered by a carpet, the throne itself is to have spread over it a silk cover of the same colour as the bishop's vestments, but not of cloth of gold, unless the bishop should be a cardinal. The throne can be surmounted by a baldachino only when there is a baldachino above the altar, or when the altar has a ciborium altar over it. When in another diocese, a bishop can only use the throne by virtue of a letter of dispensation from the diocesan bishop. Should a cardinal be present, the bishop must yield the throne to the cardinal and use a *faldistorium* placed on the Gospel side of the altar, that is, a four-legged faldstool with arms. Auxiliary bishops must always use a *faldistorium*. Abbots have the right to a throne in their own churches, but this throne can only have two steps leading to it, and cannot have a baldachino over it.



EPISCOPAL THRONE, WITH MOSAIC DECORATION, CHURCH OF S. CESAREO IN PALATIO, ROME

Time has made no essential changes in the episcopal *cathedra*. At different periods, especially in the twelfth and thirteenth centuries, the throne had the form of a *faldistorium*, but as a rule it always showed the ancient characteristic type of a seat, secured to the spot where it stood, with arms and a back of some height. The modifications that it underwent in the course of time resulted solely from the changes in the style of the art, and were therefore merely conventional. The episcopal throne in the pre-Carlovingian period has been already treated in the article CATHEDRA. Other examples of the same era are the throne at Naples in the Church of St. Januarius, and the one in the Church of Santa Maria della Sanità; at Rome in San Pietro in Vincoli, San Gregorio in Celio, San Alessandro, in the Via Nomentana; at Ravenna, in San Apollinare Nuovo, besides other thrones that are in part ancient stools, especially stools for the bath. Thrones belonging to the Middle Ages and the twelfth century are to be found at Canossa, Bari, in the grotto church of Monte Gargano, in St. Emmeram at Ratisbon, in Santa Maria in Cosmedin and in San Clemente at Rome. Excellent examples of thirteenth-century thrones are those in the Churches of San Cesario, SS. Nereo ed Achilleo, and San Lorenzo fuori le mura, at Rome. There are surprisingly few thrones of the late medieval period still in existence. Episcopal thrones that are or were surmounted by a structure similar to a baldachino are those at Torcello, Grado, and Augsburg. That as early as the eighth or ninth century the throne did not always stand at the apex of the apse, but was also placed to the right of the altar, is evident from the Roman "Ordines" of that era. However, what may have been less usual at that period became from the twelfth century customary, because it became usual to place the altar near the wall of the apse, and also to place a reredos upon the table, at least on feast days.

JOSEPH BRAUN.

Thuburbo Minus, a titular see in Africa Proconsularis, suffragan of Carthage. Thuburbo Minus is mentioned in the "Itinerar. Antonin.", 44, and the "Tabula

Peutinger. It is to-day Tebourba, a city of 2500 inhabitants, on the left bank of the Medjerda (ancient Bagradas), 21 miles by railway west of Tunis. Situated on a hill, the city proper occupies only a part of the ancient site. It was rebuilt in the fifteenth century by the Andalusian Moors. The Roman amphitheatre was still standing at the end of the seventeenth century, when it was destroyed in order to build a bridge. It was at Thuburbo Minus that the illustrious martyrs St. Perpetua and St. Felicitas with their companions were arrested. The two bishops of this city of whom we know anything are: Victor, present at the Conference of Carthage (411), where he had as his competitor the Donatist Maximinus; and Germanus, who signed (646) the letter of the bishops of the proconsulate to the Patriarch Paul of Constantinople against the Monothelites. Thuburbo Majus, another bishopric of Africa Proconsularis, was a Roman colony the full name of which was Julia Aurelia Commoda Thuburbo Majus. Its many ruins may be seen at Henshir Kasbat, on the banks of the Oued Melian about 34 miles south of Tebourba. It is the country of St. Servus (7 December, Roman Martyrology), who suffered for the Faith under Genseric and Huneric. Four of its bishops are known: Sedatus, present at the Council of Carthage, 256; Faustus, at the Council of Arles, 314; Cyprianus, at the Conference of Carthage, 411, with his competitor, the Donatist, Rufinus; Benenatus, exiled by Huneric, 484. It is impossible to decide to which of these two cities belongs the great number of martyrs, known especially by the "Martyrologium Hieronymianum" as having suffered at Thuburbo.

S. PÉTRIDÈS.

Thugga, titular see of Numidia, perhaps the Numidian fortress of Tocai mentioned about 305 B. C. by Diodorus Siculus (XX, v, 4). King Masinissa probably captured Thugga from Carthage in the second century B. C. A pagus under Claudius I, Thugga was dependent on the Roman colony of Carthage. Under Marcus Aurelius it included a pagus and a *civitas;* Septimius Severus erected it into the municipium, Septimianum Aurelium liberum Thugga, which became a colony in 261 under Gallian. Justinian built a fortress there which is still partly preserved (Procopius, "De ædificiis", VI, 5). The existence of a pagus and a *civitas* explains why there were two bishops, Saturninus and Honoratus, who assisted at the Council of Carthage in 256. A Donatist bishop, Paschasius, went to the Council of Carthage in 411. Thugga is now Dougga, a village of Tunis, famous for its ruins, among which are the temple of the Capitol built under Marcus Aurelius, a theatre, three triumphal arches, Roman necropoli, and a Punic mausoleum.

S. VAILHÉ.

Thugut, JOHANN AMADEUS FRANZ DE PAULA, Austrian statesman, b. at Linz, 31 March, 1736; d. at Vienna, 28 May, 1818. He was the son of a paymaster of the imperial army, Johann Thugut. Until the time of his grandfather the family name was written "Thunichtgut". Although baptized Johann Amadeus, Thugut was called through life Franz. A great many mythical stories are told of his childhood, such as the following. One day Maria Theresa found an abandoned infant on the steps of the Hofburg at Vienna, had compassion on it, and named the infant "Thugut". Another tale relates that the empress while crossing the Danube to Maria-Taferl was attracted by the large eyes of the boy who steered the boat. She was told that he was a foundling, a good-for-nothing (*Thunuchtgut*). The truth is that Maria Theresa, on account of the services of the father, had the boy educated at the academy of Oriental languages that had just been opened. In 1754 Thugut entered the imperial service, first as a translator at Constantinople. Kaunitz praised his linguistic knowledge and abilities and made him secretary of the state chancery. While here he accepted an annual income of 13,000 livres from Louis XV as a secret agent of France. He still received the same pension from France when secretary from 1769 of the Austrian embassy at Constantinople. In 1771, at the request of Kaunitz, he was raised to the ranks of the lower nobility on account of his meritorious services. Joseph II greatly desired to obtain the Province of Bukovina, as this would make a connexion between Galicia and Transylvania. Thugut persuaded the Turkish Government in 1775 to cede the province. To reward him Thugut was made a *Freiherr* or baron. During the war of the Bavarian succession Maria Theresa employed Thugut to negotiate with Frederick the Great, but the negotiations led to nothing. His employments varied greatly during the reign of Joseph II. During the years 1780–85 he was Ambassador at Warsaw, and during 1787–89, Ambassador at Naples; in the intervening years he had an official position at Paris where he was on terms of friendship with Mirabeau and Lafayette.

Emperor Francis II first used Thugut as a military diplomat in Belgium, and finally in 1794, after the death of Prince Kaunitz, appointed him minister of foreign affairs. While holding this office his aim was to check the growth of Prussia's power, and to subdue the wild forces of the French Revolution. Austria was to become a well-rounded, compact whole. Consequently, after the unfortunate occurrences in Belgium, which was too far from Austria to be easily held and ruled, he sought to obtain compensation in the Third Partition of Poland and in Italy. In 1795 he was able to make an offensive and defensive treaty with Russia that opened the way for Austria to gain Bosnia, a part of Servia, and the territories on the Venetian coast. At the same time, during the negotiations concerning the Rhine as a boundary between France and Germany, and on the question of secularization, Thugut spoke emphatically in regard to justice, morality, and the uncompromising duties of the emperor as the head of the empire. It was impossible for him to consent to the robbing of spiritual princes and other estates of the empire of their possessions. After strong opposition he only yielded to necessity when he agreed in the Treaty of Campo Formio to cede the left bank of the Rhine to France and to give compensation in Germany to the princes whose possessions had been encroached upon. He called this peace "an unfortunate peace, the infamy of which would make an era in the annals of Austria, unless, what was much to be feared, the annals of Austria did not soon themselves disappear". Thugut's greatest success, the alliance of Austria, Russia, and England in the second French war, led to his overthrow. In 1801 he resigned his position.

Both in life and in history Thugut seems to have been a kind of Jekyll and Hyde. Baptized Johann and called Franz, in the service of the emperor and sold to France, grasping and yet often rejecting opportunities with indignation, passionately hated and genuinely honoured, it is difficult to consider "Thugut" and "Thunichtgut" as one and the same person. Concerning Thugut, whom he succeeded after eight years as minister of foreign affairs, the courtly Metternich said: "France owed her enormous success above all to the inconsistency of the ministries that had charge of the conduct of affairs. The ideas which underlay the Austrian policy were clearly conceived by them, but probably at no time were they carried out more negligently. The ministry of Baron Thugut shows only an unbroken succession of blunders and false calculations. Sprung from the lower classes Thugut was educated in the Oriental Academy and trained for the subordinate service of the State. Skilful and cunning he owed the good luck of his political life to these qualities, which, aided by great talent for dissimulation and inclination to intrigue, pass current only too easily for real talents" (Aus Metternichs nachgel. Papieren, I, 29 sq.). Count Franz Dietrichstein on the other hand was an enthusiastic admirer of Thugut. He had Thugut buried in the Dietrichstein ancestral vault, and in an obituary expressed the hope that history might finally do honour to Thugut's great qualities. This was the aim of Vivenot's biography of Thugut, on which the author spent many years.

Cölestin Wolfsgruber.

Thulis, John, Venerable, English martyr, b. at Up Holland, Lancashire, probably about 1568; suffered at Lancaster, 18 March, 1615 or 1616. He arrived at the English College, Reims, 25 May, 1583, and received tonsure from Cardinal Guise on 23 September following. He left for Rome, 27 March, 1590, where he was ordained priest, and was sent on the mission in April, 1592. He seems to have been a prisoner at Wisbech, Cambridgeshire, when he signed the letter of 8 November, 1598, in favour of the institution of the archpriest, and the letter of 17 November, 1600, against it. Later he laboured in Lancashire, where he was arrested by William, fifteenth earl of Derby, and was committed to Lancaster Castle, where his fellow-martyr Roger Wrenno, a weaver, was confined. They managed to escape one evening just before the Lent assizes, but were recaptured the next day. After that he was imprisoned with thieves, four of whom he converted. These were executed with the martyrs. Thulis suffered after three thieves. His quarters were set up at Lancaster, Preston, Wigan, and Warrington. Wrenno was hanged next, and, the rope breaking, he was once more offered his life for conformity, but ran swiftly to the ladder and climbed it as fast as he could, saying to the sheriff, who remonstrated, "If you had seen that which I have just now seen, you would be as much in haste to die as I am now". A curious metrical account of their martyrdom, as well as portions of a poem composed by Thulis, are printed by Father Pollen in his "Acts of the English Martyrs" (London, 1891), 194–207.

John B. Wainewright.

Thundering Legion (*legio fulminata*, or *fulminea*, not *fulminatrix*).—The story of the Thundering Legion is in substance as follows: When the Emperor Marcus Aurelius led an expedition against the Quadi in 174, his army, exhausted by thirst, was on the point of falling an easy prey to the enemy. It was then that the soldiers of the Twelfth Legion, which was composed of Christians, prayed to their God for help. Forthwith a heavy thunderstorm arose, bringing the desired relief to the Romans, but terrifying and dispersing the barbarians. Hereupon the emperor issued a decree forbidding the persecution of the Christians and to the Twelfth Legion he gave the surname of *fulminata*, or *fulminea*, that is, "thundering". The earliest reference to this occurrence from a Christian source was made by Tertullian ("Apologeticum", v, and "Ad Scapulam", iv). He is quoted by Eusebius (Hist. eccl., V, v), who also cites Apollinaris of Hierapolis, a contemporary of Aurelius, as an authority for the alleged miracle. Later Christian authorities are Orosius (Hist. adv. paganos, VII, xv), Gregory of Nyssa (Oratio II in XL martyres), Jerome (Eusebii Chron., adn. 174), and Xiphilinus (Dionis Nicæi rer. Rom. epitome, LXXI, ix, x). Pagan writers also testify to the miraculous thunderstorm, but they ascribe it either to the prayers of the emperor (Julius Capitolinus, "Vita Marci Antonini philosophi" xxiv; Themistius, "Oratio XV", ed. Harduin, 191; Claudianus, "In VI consulatum Honorii", carmen 28; "Oracula Sibyllina", ed. Alexandre, XII, 194–200) or to the incantations of the Egyptian magician Arnuphis who accompanied the Roman army (Dion Cassius, "Hist. rom.", LXXI, viii-x; Suidas, s. v. Ιουλιανός). On a coin, struck by the emperor (Eckhel, "Doctrina nummorum vet.", III, 64), and on the Antonine Column in Rome, the "miracle of the thunderstorm" is represented as wrought by Jupiter.

The mass of historical evidence, as seen above, leaves no room for doubting the occurrence of the thunderstorm, but there has been a long controversy concerning various circumstances which early Christian writers mention as connected with it. The researches of Moyle, Mosheim, and especially the more recent ones of Lightfoot, Harnack, and others (see bibliography) have led to the following almost universally accepted results: A detachment of the Twelfth Legion, which was regularly stationed at Melitene in Armenia and comprised many Christians, took part in the expedition against the Quadi, and it is probable, though not certain, that the "miraculous thunderstorm" was an answer to their prayers. The name *fulminatrix* was not given to the legion on this occasion, but there existed since the time of Augustus (Dion Cassius, LV, xxiii) a *legio fulminata* or *fulminea*, probably called thus from the representation of lightning on their armour. The letter (generally appended to the "Apology" of Justin), which Marcus Aurelius is said to have written to the Senate, concerning the miraculous thunderstorm, and in which he is said to have forbidden the further persecution of the Christians, is either a forgery or it was interpolated to suit the Christians. It is an established fact that the persecution of the Christians became even more cruel shortly after this incident.

Michael Ott.

Thun-Hohenstein, Count Leo, Austrian statesman, b. at the family castle of Tetschen in Bohemia, 7 April, 1811; d. at Vienna, 17 December, 1888. He received his early education under the direction of the distinguished teacher, John Rohrwerk, and later studied law and philosophy at the University of Prague. After graduation he travelled through Germany, France, and England. The bent of his mind was towards politics, and he studied with especial interest the political system of England. In Paris he studied the prison system and the various benevolent institutions for working-men. As soon as he reached home he began to make use of the knowledge he had acquired and issued his first publication: "Die Notwendigkeit der moralischen Reform der Gefängnisse mit Hinweisung auf die zur Einführung derselben in einigen Ländern getroffenen Massregeln beleuchtet".

Shortly afterwards he entered political life and became a member of the Bohemian Diet. He also interested himself in the revival of the Czech language and literature, and in 1842 published a treatise entitled: "Ueber den gegenwärtigen Stand der böhmischen Literatur und ihre Bedeutung". In 1846 a revolt broke out in Galicia, and Thun was appointed a member of the administrative board under Francis Stadion. He took up his residence at Lemberg with his wife, Countess Caroline Clam-Martinitz, whom he had recently married. At the outbreak of the revolution in the spring of 1848, Thun was appointed president of the administrative board and became the actual ruler of Bohemia, for the Archduke Francis Joseph, who had been selected as viceroy, was unable to assume the position. During the outbreak at Prague Thun was captured by the insurgents and imprisoned; they were willing to release him if he would give certain assurances, which he refused to do. When finally set free he supported the commander of the troops in Prague in quelling the revolt by force of arms.

Thun rose rapidly, and in July, 1849, was appointed by the emperor minister of worship and education, the two offices being united for the first time in the person of Thun. He immediately set about reforming the methods of instruction to meet the demands of the times. He improved the primary schools and practically reorganized the administration and courses of study of the gymnasia and the universities. He took a special interest in industrial education and was the first to place trade and technical schools on a firm basis. He also did much to encourage art, especially by making an art university of the Academy of Fine Arts, and by giving employment to artists. Thun's work as minister of worship deserves equal attention. In his memorials to the emperor of 7 and 13 April, 1850, on the religious condition, he made his first attempt to loosen the fetters in which Josephinism had bound the Church. In his first paper he demanded the annulment of the *Placitum regium*, in the second he insisted that no teacher of religion or professor of theology should be appointed without the consent of the bishop. In September, 1852, the emperor appointed Archbishop Rauscher as his plenipotentiary for drawing up a concordat, and Pius IX appointed the nuncio Viale Préla as his representative. The agreement between the two was laid before the committee of ecclesiastical affairs composed of five members, among which the predominating influence was naturally that of the minister of worship and education. Thun said himself that his share in the drawing up of this agreement was one of the "proudest and happiest recollections" of his life.

Thun acted both in his capacity as minister of education and minister of worship entirely in accordance with a rigid sense of duty, but he kept the two departments during his administration entirely distinct, so that Rauscher, who was associated a great deal with Thun, said of him: "Thun has a Catholic heart and a Protestant head." Grillparzer, who was less in agreement with Thun's policy, said: "I have a suicide to announce. The minister of worship has killed the minister of education." Austria now entered on a new era; it became a constitutional monarchy on 20 October, 1860, and Thun's office was abolished. The next year, however, the emperor appointed him a life member of the Upper House of the Imperial Parliament and he was a member of the Bohemian Diet for several terms. In both bodies he was always the pillar of the conservative Catholic party, was the leader of the Federalist party in Bohemia, and upheld the claims of Bohemia for a full autonomy. He founded the "Vaterland", the organ of the Federalist party, and a powerful influence in the politics of the day.

CÖLESTIN WOLFSGRUBER.

Thurible. See CENSER.

Thuringia.—The name Thuringia is given to a large part of Central Germany, bounded on the west by the Werra River, on the east by the Saale, on the north by the Harz Mountains, and on the south by the Thuringian Forest. The extent of territory is not exactly defined. Besides the Thuringian states, which include the Grand Duchy of Saxe-Weimar-Eisenach, the Duchies of Saxe-Coburg and Gotha, Saxe-Altenburg, and Saxe-Meiningen, Thuringia comprises some parts of Prussian territory, as the cities of Erfurt, Merseburg, Naumburg, etc.; the two principalities of Schwarzburg and the two principalities of Reuss extend beyond the natural limits of Thuringia, especially in the south and east. The early inhabitants of Thuringia were a German tribe called Hermunduri; about A. D. 420 they became known as Thuringians. The powerful kingdom of the Thuringians, which at the beginning of the sixth century extended to the Danube, was overthrown in 531 by the Franks. Christianity had been introduced in various places through the intermarriage of the royal families of the Thuringians and the Visigoths. The Gospel was preached in Southern Thuringia by the Apostles of the Franks, Kilian and his two companions Coloman and Totnan, and in Northern Thuringia by Willibrord, the Apostle of the Frisians; but these missionaries had little success. The real Apostle of Thuringia is St. Boniface. From the monasteries of Fulda and Hersfeld in Hesse, Christianity spread throughout this region. In 742 St. Boniface established Erfurt as the See of Thuringia, making it an important centre of civilization. After the death of the first Bishop of Erfurt, St. Adelar, the diocese was suppressed and Thuringia was united with the Archdiocese of Mainz. The episcopal assistants of the Archbishop of Mainz, who since the fourteenth century had been auxiliary bishops, resided at Erfurt and in the course of time became almost entirely independent of Mainz. The extreme southern part of Thuringia always belonged to the Diocese of Würzburg, the extreme northern to the Diocese of Halberstadt, and the central or main part to Erfurt-Mainz; in the tenth century Eastern Thuringia was divided between the newly-found Dioceses of Merseburg and Zeitz-Naumburg.

The first monastery established by St. Boniface in Thuringia proper was Ohrdruf, now a city of the Duchy of Saxe-Gotha. Contrary to canon law, no church tithes were paid by the inhabitants of Thuringia up to the time of the Reformation, and they obstinately maintained this right, that had become theirs by custom, against the Archbishop of Mainz. The tribal characteristics of the Thuringians gradually disappeared. The southern Thuringians were absorbed by the Franks, the northern Thuringians adopted the character and racial peculiarities of the Saxons, whose territory closely adjoined theirs. In 804 Charlemagne established the Thuringian mark as a defence against the advance of the Slavs. In the tenth century the country was seized by the Duke of Saxony, and during the reign of Emperor Otto I it came under the suzerainty of the Margraves of Meissen. The Saxon dynasty founded the monasteries of Nordhausen, Memleben, and Wahlbeck. In the eleventh century a family of counts from Franconia arose to great importance in Thuringia. The ancestor of this family was Louis the Bearded (d. 1056). His son Louis the Springer built the Castle of Wartburg near Eisenach. In 1089 he founded the Benedictine Abbey of Reinhardsbrunn near Friedrichroda, which was the burial place of the Thuringian landgraves until 1440. This monastery, which has become known through a series of much controverted historical works called the "Reinhardsbrunner Annalen", was badly damaged in the Peasants War of 1525 and was turned into a hunting castle in 1543; it now belongs to the Duke of Saxe-Coburg and Gotha. Other important Benedictine abbeys founded by the landgraves during the eleventh century were the Abbeys at Heiligenstadt and Saalfeld, and during the twelfth century those at Paulinzella, Gosek, and Bosau. The Cistercian Abbeys of Volkenroda, Pforta, and Georgenthal were of great value in civilizing the country, especially Eastern Thuringia.

In 1130 the Emperor Lothair appointed Louis I (d. 1140), son of Louis the Springer (d. 1123), Landgrave of Thuringia. Landgrave Louis IV of Thuringia (1217–27) married St. Elizabeth of Hungary (q. v.); he was succeeded by his brother Henry (d. 1247), with whom the first dynasty of Thuringian landgraves became extinct. The war of succession which now broke out raged until 1263, when the branch of the Wettin family that ruled Saxe-Meissen assumed control of Thuringia. In 1440 a quarrel arose as to the possession of the country, and by the family compact made at Leipzig in 1485 Thuringia was assigned to the Ernestine branch of the house of Wettin. Thuringia now formed a constituent part of the Electorate of Saxony (q. v.), where the great schism of the sixteenth century had its beginnings. As early as 1520 the Catholic Faith was abolished, priests that remained loyal were driven away and churches and monasteries were largely destroyed, especially during the Peasants War of 1525. The Anabaptists found many adherents in Thuringia, particularly at Mülhausen where the founder of the sect, Thomas Münzer, laboured for it. Within the borders of Thuringia the Catholic Faith was maintained only in the district called Eichsfeld, which was ruled by the Archbishop of Mainz, and to a small degree in the city and vicinity of Erfurt, a result also due to the energetic measures of this archbishop. By the Capitulation of Wittenberg of 1547 that closed the Smalkaldic War, John Frederick the Magnanimous lost both the electoral dignity and the country of Saxe-Wittenberg, retaining only Thuringia, which was partitioned by his sons into numerous duchies (see Saxe-Altenburg; Saxe-Coburg and Gotha; Saxe-Meiningen; Saxe Weimar-Eisenach). While Thuringia still remained a landgravate, there were a number of independent counts and nobles in the country whose possessions were finally absorbed either by the Saxon-Thuringian duchies or by Prussia. Only the principalities of Schwarzburg and the principalities of Reuss have remained independent.

Hermann Sacher.

Thurmayr, Johannes (called Aventinus from the place of his birth), b. at Abensberg, Bavaria, 4 July, 1477; d. at Ratisbon, 9 January, 1534. He studied at the Universities of Ingolstadt, Vienna, Cracow, and Paris. In 1507 he returned to Ingolstadt, and in 1509 was appointed tutor to the younger brothers of Duke William IV of Bavaria. In his zeal for learning he founded the "Sodalitas litteraria Angilostadensis", which, however, soon ceased to exist (1520). In 1512 he wrote the "Rudimenta grammaticæ latinæ". In 1517 he was appointed historiographer of Bavaria and was commissioned to write the history of the country. Many of the important authorities which he collected for this purpose have been preserved only in his copies. He embodied a critical treatment of them in a complete history of Bavaria, "Annales Bojorum", down to the year 1460. His condensed German version of it, the "Bayerische Chronik", is the first important history in the German language. Though he ranked as a Catholic, Thurmayr was in sympathy with the Humanists, inclined to the opinions of the Reformers, rejected auricular confession, objected to pilgrimages and indulgences, and opposed in violent language the claims of the hierarchy as excessive. For this reason his history was not published at Ingolstadt until 1554, and then only with omission of the passages hostile to the Church. The "Bayerische Chronik" was published at Frankfort-on-the-Main, 1566. The Bavarian Academy issued a critical complete edition of his works in five volumes (Munich, 1880–86).

Patricius Schlager.

Thwing, Edward, Venerable. See Nutter, Robert, Venerable.

Thwing, Thomas, Venerable, martyr, b. at Heworth Hall, near York, in 1635; suffered at York, 23 Oct., 1680. His father was George Thwing, Esq., of Kilton Castle and Heworth, nephew of Venerable Edward Thwing; his mother was Anne, sister of the venerable confessor Sir Thomas Gascoigne, of Barnbrow Hall. Educated at Douai, he was sent to the mission in 1664 and laboured in his native county. Until April, 1668, he was chaplain at Carlton Hall, the seat of his cousins the Stapletons. He next opened a school at Quosque, the dower-house of the Stapletons. When in 1677 the "Institute of Mary" began their foundation in the house given by Sir Thomas Gascoigne at Dolebank, Thwing became their chaplain, three of his sisters being of the community. It was there that he was arrested in the early part of 1679. At the time of the Titus Oates scare, two servants who had been discharged from Sir Thomas Gascoigne's employ for dishonesty, sought vengeance and reward by disclosing a pretended plot on the part of Gascoigne and others to murder the king. In their first allegation no mention was made of Thwing. Gascoigne, Thwing, and others were removed to London for trial at Newgate. All were acquitted except Thwing, who was brought back to York for trial in March, 1680. Owing to his challenging the jurors, his trial was postponed to the summer assizes, and he was brought to the bar on 29 July. He was refused an impartial jury, and was found guilty on the very same evidence upon which his relatives had been acquitted. Upon receiving sentence, which in consideration of his gentle birth was passed on him apart from the felons and murderers found guilty at the same assizes, humbly bowing his head he replied "Innocens ego sum." The king at first reprieved him, but owing to a remonstrance of the Commons the death-warrant was issued on the day after the meeting of Parliament. He was drawn from York Castle, past the convent where his sisters were dwelling, to Tyburn, where the sentence was carried out. He declared his innocence, protested his loyalty to the king and his charity to his neighbour; prayed for the king and royal family, and begged the prayers of all true Catholics. His dying words were "Sweet Jesus, receive my soul". His mangled body was given to his friends, and buried in the churchyard of St. Mary, Castlegate. Relics of the martyr are now preserved at the Bar Convent, York, and at Oscott College.

Soc.*, IV, IX; Dodd, *Church History*, III; Challoner, *Memoirs of Missionary Priests* (Edinburgh, 1877).

J. L. Whitfield.

Thyatira, a titular suffragan see of Sardes in Lydia. According to Stephanus Byzantius, the name was given to the city by Seleucus I Nicator; it is more probable that it is of Lydian origin. A Macedonian colony was established there (Strabo, XIII, 4); several divinities were worshipped there, such as Æsculapius, Bacchus, Artemis, above all Apollo, in whose honour games were instituted. Vespasian began great undertakings at Thyatira; it was visited by Hadrian in the year 123, and by Caracalla in 215. Lydia, the woman converted by St. Paul at Philippi, was from Thyatira (Acts, xvi, 13–15); St. John addressed an epistle to the "angel of the church", to whom he gives great commendation, but after having criticised a false prophetess (Apoc., ii, 18–29). Paprylus, martyred about the year 250 at Pergamus, venerated 13 October, was also from this city; we know from testimony given by St. Epiphanius (Contra hær., LI, 33), that at the beginning of the third century almost all Thyatira was Christian. Among the bishops mentioned by Le Quien (Oriens christianus, I, 875–78), we may note Seras, in 325; Fuscus, at the Council of Ephesus in 431; Diamonius, in 458; Basilius, in 878. The bishopric was suffragan to Sardes as late as the tenth century (Gelzer, "Ungedruckte . . . Texte der notitiæ episcopatuum", 537, 553); it is not known when it disappeared. In the Middle Ages the Turks changed the name of Thyatira to that of Ak-Hissar (the white fortress), which it still bears. It numbers 22,000 inhabitants, 7000 of whom are Greek schismatics, 1000 Armenians and Jews, and 14,000 Mussulmans; it is a caza of the sandjak of Saroukhan and of the vilayet of Smyrna.

Thynias, a titular see, suffragan of Nicomedia, in Bithynia Prima. It is an island situated in the Black Sea, mentioned by all ancient geographers, and which was only 1421 yards wide. Its original name was Apollonia, because it had a temple to the god Apollo. It also bore the name of Daphne, whence came the name Daphnusia, almost as ancient as that of Apollonia, and which is the only one met with in the "Notitiæ episcopatuum". Its name of Thynias is derived from the Thynii, a people of Thracian origin, who occupied all the coast of Bithynia. Le Quien (Oriens Christ., I, 629) mentions three bishops of Daphnusia: St. Sabas, venerated on 1 May; Leo, present at the Eighth Œcumenical Council in 869; Anthony, at the Photian Council of 878. One John was exiled to Daphnusia and martyred under Copronymus; his feast is observed on 28 November. In the legendary "Vita" of St. Andrew the Apostle (P. G., CXX, 221) it is said that the relics of Sts. Zoticus, Anicetus, and Photius were preserved in the island. The Diocese of Daphnusia is first mentioned in the "Notitia episcopatuum" of Leo the Wise about 900 (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 553), then in that of Constantine Porphyrogenitus about 940 ("Georgii Cyprii Descriptio orbis romani", ed. Gelzer, 65), and finally in "Notitia 13" of Parthey in the thirteenth century (Hierocles Synecdemus, 247). In 1261 the Latin fleet was engaged in the siege of the island when the Greek Emperor of Nicæa, Michael VIII Palæologus, captured Constantinople and thus put an end to the Latin Empire. The island of Daphnusia is now called Kefken or Kerpe-Adasi, and lies west of the mouth of the Sangarius in the caza of Chile and the vilayet of Constantinople.

Thyräus, HERMANN, German Jesuit, b. at Neuss on the Rhine, 1532; d. at Mainz, 26 October, 1591. He studied first at Cologne, and then, after 1522, at the Collegium Germanicum at Rome. On 26 May, 1556, he was received into the Society of Jesus by St. Ignatius Loyola, two months before the latter's death. In the same year, Thyräus was made a professor of theology at Ingolstadt, where he taught for three years the "Magister sententiarum", and in the fourth year controversial theology. In 1560 he became a professor at Trier, and lectured on the Epistles of St. Paul. He was rector of the college at Trier (1565–70), provincial of the Jesuit province of the Rhine (1571–8), and from 1578 until his death rector of the college at Mainz. He did excellent service to the Catholic cause and the Counter-Reformation in Germany. The "Liber de religionis libertate", ascribed to him, was written most probably by his younger brother Peter, also a Jesuit. His "Confessio Augustana", with controversial notes, appeared at Dillingen in 1567. He also left several volumes of sermons. According to the testimony of van Reiffenberg ("Historia Soc. Jesu ad Rhenum infer."), he was skilful, industrious, frank, unaffected, and not lacking in shrewdness; and was in consequence highly esteemed by the archbishops of the Rhine, who often employed him in important matters. He was also a noted preacher, and left several volumes of sermons. When he occupied the pulpit at Trier as many as 4000 people often came together to hear him.

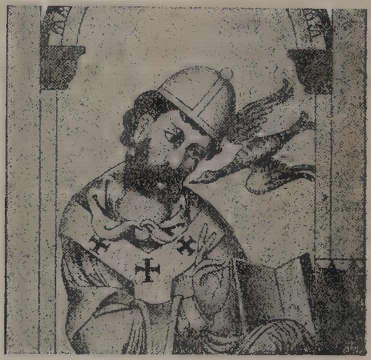
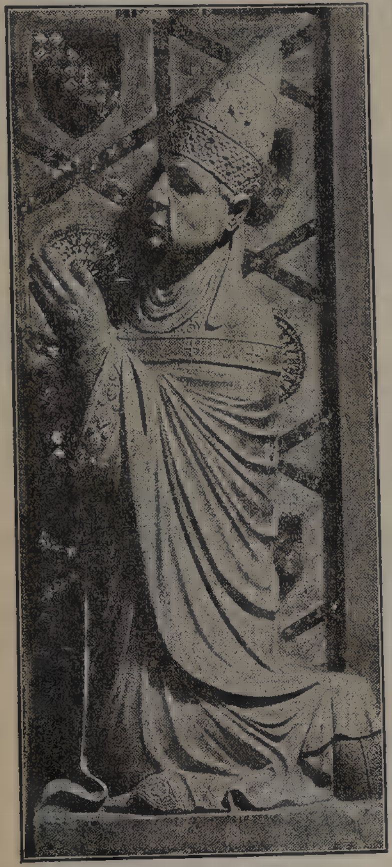
Tiara, the papal crown, a costly covering for the head, ornamented with precious stones and pearls, which is shaped like a bee-hive, has a small cross at its highest point, and is also equipped with three royal diadems. On account of the three diadems it is sometimes called *triregnum*. The tiara is a non-liturgical ornament, which, therefore, is only worn for non-liturgical ceremonies, ceremonial procession to church and back, ceremonial papal processions, such as took place upon stated occasions until Rome was occupied by the Piedmontese, and at solemn acts of jurisdiction, as, for example, solemn dogmatic decisions. The pope, like the bishops, wears a mitre at pontifical liturgical functions. The tiara is first mentioned in the "Vita" of Pope Constantine (708–715) contained in the "Liber Pontificalis". It is here called *camelaucum;* it is then mentioned in what is called the "Constitutum Constantini", the supposed donation of the Emperor Constantine, probably forged in the eighth century. Among the prerogatives assigned to the pope in this document there is especially a white ornament for the head called *phrygium*, which distinguished him; this naturally presupposes that, at the era the document was written, it was customary for the pope to wear such a head-covering. Three periods may be distinguished in the development of the tiara. The first period extends to the time when it was adorned with a royal circlet or diadem; in this period the papal ornament for the head was, as is clear from the "Constitutum Constantini" and from the ninth Ordo of Mabillon (ninth century), merely a helmet-like cap of white material. There may have been a trimming around the lower rim of the cap, but this had still in no way the character of a



ST. GREGORY THE GREAT WEARING THE PAPAL CAP OF WHITE MATERIAL
From an XI-century MS. in the library of the University of Leipzig

royal circlet. It is not positively known at what date the papal head-covering was adorned with such a circlet. At the time the Donation of Constantine appeared, that is in the eighth century, the papal head-covering had still no royal circlet, as is evident from the text of the document. In the ninth century also such circlet does not seem to have existed. It is true that the Ninth Ordo calls the papal cap *regnum*, but in the description that the Ordo gives of this cap we hear nothing at all of a crown, but merely that the *regnum* was a helmet-like cap made of white material. The monumental remains give no clue as to the period at which the papal head-covering became ornamented with a royal circlet. Up into the twelfth century the tiara was not only seldom represented in art, but it is also uncertain whether the ornamental strip on the lower edge is intended to represent merely a trimming or a diadem. This is especially true of the representations of the tiara on the coins of Sergius III (904–911) and Benedict VII (974–983), the only representations of the tenth century and also the earliest ones. Probably the papal head-covering received the circlet at the time when the mitre developed from the tiara, perhaps in the tenth century, in order to distinguish the mitre and tiara from each other. In any case the latter was provided with a circlet by about 1130, as is learned from a statement of Suger of St. Denis. The first proven appearance of the word *tiara* as the designation of the papal head-covering is in the life of Paschal II (1099–1118), in the "Liber Pontificalis".



BONIFACE VIII WITH DOUBLE-CROWNED TIARA
XIV-Century figure in the Lateran Basilica

The second period of the development of the tiara extends to the pontificate of Boniface VIII (1294–1303). There are a large number of representations of the tiara belonging to this period, and of these the Roman ones have naturally the most value. The diadem remained a simple although richly-ornamented ring up into the second half of the thirteenth century; it then became an antique or tooth-edged crown. The two lappets (*caudæ*) at the back of the tiara are first seen in the pictures and sculpture in the thirteenth century, but were undoubtedly customary before this. Strange to say they were black in colour, as is evident both from the monumental remains and from the inventories, and this colour was retained even into the fifteenth century. When the tiara is represented in sculpture and painting as a piece of braiding, this seems to arise from the fact that in the thirteenth century the tiara was made of strips braided together. Of much importance for the tiara was the third period of development that began with the pontificate of Boniface VIII. It is evident from the inventory of the papal treasures of 1295 that the tiara at that era had still only one royal circlet. A change, however, was soon to appear. During the pontificate of Boniface VIII a second crown was added to the former one. Three statues of the pope which were made during his lifetime and under his eyes, and of which two were ordered by Boniface himself, leave no doubt as to this. Two of these statues are in the crypt of St. Peter's, and the third, generally called erroneously a statue of Nicholas IV, is in the Church of the Lateran. In all three the tiara has two crowns. What led Boniface VIII to make this change, whether merely love of pomp, or whether he desired to express by the tiara with two crowns his opinions concerning the double papal authority, cannot be determined. The first notice of three crowns is contained in an inventory of the papal treasure of the year 1315 or 1316. As to the tombs of the popes, the monument of Benedict XI (d. 1304) at Perugia shows a tiara of the early kind; the grave and statue of Clement V at Uzeste in the Gironde were mutilated by the Calvinists, so that nothing can be learned from them regarding the form of the tiara. The statue upon the tomb of John XXII is adorned with a tiara having two crowns. The earliest representation of a tiara with three crowns, therefore, is offered by the effigy of Benedict XII (d. 1342), the remains of which are preserved in the museum at Avignon. The tiara with three crowns is, consequently, the rule upon the monuments from the second half of the fourteenth century, even though, as an anachronism, there are isolated instances of the tiara with one crown up into the fifteenth century. Since the fifteenth century the tiara has received no changes worthy of note. Costly tiaras were made especially in the pontificates of Paul II (d. 1464), Sixtus IV (d. 1484), and above all in the pontificate of Julius II, who had a tiara valued at 200,000 ducats, made by the jeweller Caradosso of Milan.

Various hypotheses, some very singular, have been proposed as to the origin of the papal head-covering, the discussion of which here is unnecessary. The earliest name of the papal cap, *camelaucum*, as well as the Donation of Constantine, clearly point to the Byzantine East; it is hardly to be doubted that the model from which the papal cap was taken is to be found in the *camelaucum* of the Byzantine court dress. The adoption by the popes of the *camelaucum* as an ornament for the head in the seventh or at the latest in the eighth century is sufficiently explained by the important position which they had attained just at this period in Italy and chiefly at Rome; though they could not assume a crown, as they were not sovereign, they could wear a *camelaucum*, which was worn by the dignitaries of the Byzantine Empire.

JOSEPH BRAUN.

Tibaldi, PELLEGRINO, known also as Pellegrino da Bologna and as Pellegrino Pellegrini, decorator, mural painter, and architect, b. at Bologna, 1527; d. at Milan about 1592. Tibaldi was a pupil of Bagna Cavello, and a profound student of the works of Michelangelo. His early decorative works were executed for Cardinal Poggi, for whom he carried out a large number of commissions, in his palace at Bologna, the chapel he erected in Loretto, his rooms in Rome, and a chapel in the Church of San Giacomo in Bologna. In 1586 he went to Spain on the invitation of Philip II, and painted in the lower cloisters of the Escorial, after first erasing the work of his predecessors, with which he professed to be much dissatisfied. His greatest work was the decoration of the library in that building. He resided for nine years in Spain, returned to Italy, settled at Milan, was appointed architect of the cathedral, and died in that place. His works can be studied in Bologna and Dresden.

G. C. Williamson.

Tiberias, titular see, suffragan of Scythopolis, in Palæstina Secunda. The town of Tiberias was founded on the lake in A. D. 17 by Herod Antipas, tetrarch of Galilee, who gave it the name of the reigning emperor, Tiberius. As tombs were discovered there at the time of its foundation the Jews refused to dwell there, and Herod was forced to populate it with foreigners and people of low extraction (Josephus, "Ant. jud.", XVIII, ii, 3). What it was previously called is not known; St. Jerome makes it the site now of Reccath, now of Emath, now of Cenereth or Kinnereth, towns of Nephthali (Jos., XIX, 35). The town seems to have been a little more than three miles in circumference. Although Tiberias gave its name to the neighbouring lake and is mentioned several times in the Gospels, it seems never to have been dwelt in by Christ. At the death of Herod Antipas in 41, Nero gave the town to Herod Agrippa the Younger who made Sephoris or Diocæsarea his capital. At the revolt of the Jews against the Romans the people of Tiberias sided now with one party, now with the other, and the Jewish historian Josephus, who was Governor of Galilee, only took it after several attempts ("Bell. jud.", II, xxi, 6; "Vita Josephi", 18 and 54). At the approach of Vespasian it submitted without resistance and was not disturbed; the Jews secured the privilege of dwelling there alone, to the exclusion of pagans, Christians, and Samaritans. Towards the end of the second century the Sanhedrin was removed thither from Sephoris together with the Talmudic school of Jamnia, whence issued many celebrated Rabbis, among them Juda Hakkodesh, who shortly afterwards codified the vast body of laws and customs known as the Mishna. Between 230 and 270 Rabbi Jochanan composed the Gemara, supplement of the Mishna, and these two codes are called the Jerusalem Talmud. In the sixth century the school of Tiberias produced the celebrated Masorah, or fixed Hebrew text of the Bible. Rabbi Bar Anina of Tiberias gave lessons in Hebrew to St. Jerome.

The introduction of Christianity dates from the time of Constantine the Great. It was Count Joseph, a Jewish convert of this town living at Scythopolis, who built its first church, perhaps on the site of the Hadrianeum (a temple founded by the Emperor Hadrian and never completed). Under Constantine also the Jewish patriarch Hillel was converted and baptized by the missionary bishop who bore the title of Tiberias but resided elsewhere (P. G., XLI, 409–29). Among its bishops were: John, present at the Robber Synod of Ephesus and the Council of Chalcedon in 449 and 451; John II, at the councils of 518 and 536; George, in 553; Basil, in the eighth century (Le Quien, "Oriens christ.", III, 705–10); Theodore, in 808 (Tobler, "Itinerar. hierosolym.", I, 304). Justinian restored the walls of the town (Procopius, "De ædificiis", V, 9). Ancient pilgrims speak of its churches and synagogues. At the Frankish occupation it was given in fief to Tancred who made it his capital. A new town was built, churches restored, and a Latin diocese was instituted, suffragan to Nazareth. Many of its residential or titular bishops are known (Du Cange, "Familles d'outre-mer", 807; Le Quien, op. cit., III, 1301–04; Eubel, "Hierarchia catholica medii ævi", I, 511; II, 275; III, 333). The Greek see never ceased to exist, but has long been titular. In 1187 after the defeat of Hattin, better known as the battle of Tiberias, the town and fortress fell into the power of Saladin. In 1239 it was given to Eudes de Montbéliard, but five years later the Sultan of Egypt recovered it and massacred the garrison and the Christian inhabitants. The last Jew died in 1620 at the passing of Quaresimus, and only Mussulmans remained. The Jews have since returned. Out of 6500 inhabitants, 4500 are Jews, 1600 Mussulmans, 185 Greek Catholics, 35 Latins, 42 Greek Schismatics, and about 20 Protestants dependent on the Scotch mission which has a school and a hospital. The Franciscans have a church and an infirmary. The town, called Tabarieh, besides ramparts has only insignificant ruins and is very dirty.

S. Vailhé.

Tiberias, Sea of, so called in John, xxi, 1 (cf. vi, 1), otherwise known as "the sea of Galilee" (Matt., iv, 18; Mark, i, 16; John, vi, 1), or as "the lake of Genesareth" (Luke, v, 1, and Rabbinical writings), or as "the sea of Cenereth" (Num., xxxiv, 11; Jos., xiii, 27; cf. Jos., xi, 2), or as "the water of Genesar" (I Mach., xi, 67), or, lastly, as "the Lake of Tarichea" (Pliny, "Hist. Nat.", V, xv). It lies in the Jordan gorge, 682 feet below the level of the Mediterranean. An irregular oval nearly thirteen miles long, its maximum width, near the northern end, is about seven and a half miles. The lake is enclosed on the east and west by mountains; the former, a uniform wall 2000 feet high sloping steeply to within half a mile of the shore; the latter, lower and more broken, gradually approaching the water as they advance northwards till, about half way up the coast, they leave only a narrow strip of littoral. At the north-west corner the mountain inclines somewhat westward and the littoral widens into a triangular plain of marvellous fertility which stretches eastwards for four miles—the Plain of Genesareth. East of this the ground is broken and sterile, overgrown with bush, and strewn with volcanic rock. The lake is fed by several torrents and by copious hot springs on the north and west, but principally by the Jordan, which enters at the north-east corner and rushes out at the south-western extremity. The depth of the lake nowhere exceeds 150 feet. Its water is sweet and good to drink. Fish are so abundant that catches of 600 pounds are not rare, and in one exceptional season (1896) 9200 pounds of fish were hauled ashore in one huge net. Storms are alarmingly sudden and frequent. The hot atmosphere of the gorge (averaging in the shade 93°F. in summer, and 50° in winter) sucks down the cool air of the heights through the narrow wadis to the east and west at the north end, and in half an hour the surface of the lake tosses furiously. Half an hour again suffices to restore the lake to a mirror-like calm.

To-day the shores are barren and desolate, with gloomy patches of volcanic soil to the north and west. There is scarcely a tree to be seen, nor even any verdure except where an overflowing torrent waters the north-western plain, nor any human habitation save the sombre houses of Tiberias to the west and a few straggling villages. But in the days of Christ nature and man united to render these shores singularly attractive. The vine and the fig flourished ten months in the year, and every variety of fruit ripened in the various seasons: thick woods surrounded the lake even down to the eighth century of the present era, and the plains yielded rich harvests twice in the year. Nine, perhaps ten, cities encircled the lake with an almost unbroken front of wharves and harbours. Ruins of theatres, hippodromes, temples, synagogues, baths, and villas witness to the presence of all the refinements of Græco-Roman culture. Fishing was an important industry (cf. *Beth Saida*="Fishing-House", and *Taricheæ*="Pickling Factories"), and the fishermen, though reputed generally pious by the Rabbis, were a force to be reckoned with in troubled times. The fish were exported to all parts of the Roman world. The standing population of the towns, of which the smallest had at least 15,000 inhabitants, was largely increased by multitudes of sick who flocked, especially in summer, to the world-renowned springs near Tiberias.

JEREMIAH HARTIGAN.

Tiberiopolis, titular see in Phrygia Pacatiana. Tiberiopolis is mentioned by Ptolemy (V, 2, 25); Socrates (Hist. eccl., VII, 46); and Herocles (Synec., 668, 9). It struck its own coins at least from the time of Trajan. Its exact site is unknown, but it was situated in the region of Egri Gueuz, caza of Kutahia, vilayet of Brusa. Ancient Greek "Notitiæ episcopatuum" mention it among the suffragans of Laodicea. In the eighth century it was attached to the metropolitan See of Hierapolis and as such appears in the "Notitiæ episcopatuum" until the thirteenth century. Le Quien (Oriens christ., I, 797) mentions five of its bishops known by their presence at councils: Eustathius at Constantinople (536); Silas at Constantinople (553); Anastasius at Constantinople (692); Michael at Nicæa (787); Theoctistus at Constantinople (879).

S. PÉTRIDÈS

Tiberius, the second Roman emperor (A. D. 14–37), **b. 16 November, 42 B. C.; d. 16 March, A. D. 37.** He was the son of Tiberius Claudius Nero and Livia. By the marriage of his mother with Emperor Augustus he became the latter's stepson, and was adopted by Augustus in A. D. 4. In the year 10 he was appointed coregent with Augustus. Hard and secretive by nature and embittered by the neglect with which his step-father allowed him to be treated, he did not arouse personal enthusiasm, and until recently was described by historians as a bloody tyrant. It is only during the last sixty years that he has been more fairly judged, and at present the opinion begins to prevail that he was a genuine Roman, a ruler faithful to his duties, just, wise, and self-contained. In his internal policies especially he is one of the most distinguished of all Roman emperors. Like Augustus he reformed and improved every department of the government, and promoted in every direction the prosperity of the empire of which Augustus had laid the foundation. He developed imperial power by declining to have his authority renewed from time to time by the Senate, as Augustus had done. The strong opposition which grew up against him was due to his taciturn and domineering disposition, and to the influence of the prefect of the guard, Ælius Sejanus, who alone possessed his confidence. The persecutions and executions for lese-majesty, which rapidly increased during the second half of his reign, and the gloom which pervaded Rome induced Tiberius to leave the capital altogether in the year 26 and to live partly in Campania and partly on the Island of Capri. Before this date the question as to the succession to the empire had led to a terrible family tragedy. By his first marriage Tiberius had a son called Drusus, while his second marriage with the immoral Julia, daughter of Augustus, was childless. After the death of his nephew Germanicus (A. D. 19), whom he had been obliged to adopt at the command of Augustus to the exclusion of his own son, he hoped to secure the succession for Drusus. A low intrigue was formed against this plan, in which the wife of Drusus, Livilla, who had illicit relations with Sejanus, took part. In the year 23 Drusus was poisoned by Sejanus and Livilla. However, when in 31 Sejanus formed a conspiracy to secure the throne for himself, Tiberius was warned at the last moment and had Sejanus executed. Tiberius spent his last years in constantly increasing seclusion, misanthropy, and cruelty on the Island of Capri, where it is said he abandoned himself to debauchery. However, these reports are at least coloured by prejudice and have not been satisfactorily proved. Neither is it probable that Tiberius was murdered.

TIBERIUS
Antique Fragment in the Lateran Museum

The ministry and death of John the Baptist and of Jesus Christ occurred during the reign of Tiberius. According to St. Luke (iii, 1), St. John the Baptist was called by God, in the fifteenth year of the reign of Tiberius, to prepare the way for Christ as His precursor. Shortly before his death Tiberius recalled the procurator Pontius Pilate from Judea. Tertullian (Apologeticum, v, xxi), from whom Eusebius and Orosius take the story, relates that Tiberius received a report concerning Christ and that he called upon the Senate to place Christ among the gods. The Senate rejected the request; Tiberius then threatened the accusers of the Christians with punishment. The narrative is not worthy of belief, still it is probable that Tertullian knew a document that professed to be a report of Pilate.

KLEMENS LÖFFLER.

Tibet, a vast plateau, about 463,320 square miles, about 1240 miles in its greatest length from east to west, and 740 miles in its greatest breadth from north to south, with an elevation from 13,000 to 16,500 feet, and with a population of some 6,500,000 inhabitants, according to Chinese estimates; other estimates place it as low as 2 or 3,000,000. It is bounded on the north by Kan-su and Sin-kiang; on the west by India; on the south by India, Nepal, Sikkim, and Bhutan; on the east by Yun-nan, Sze-ch'wan, and Kan-su; or rather the plateau on the north is bounded by the Kwenlun Mountains which limit on the south the Desert of Gobi; and on the south by the Himalaya Mountains with their high peak, Mount Everest, 29,000 feet.

HYDROGRAPHY.—From this plateau flow the following rivers: to the south, the Indus, with its tributary Sutlej, which runs into the Gulf of Oman; to the north of the Himalayas, the Ts'anpo or Brahmaputra River, which falls into the Gulf of Bengal after meeting in an estuary the Ganges, which follows a similar course on the southern side of the Himalayas; to the east, the great Chinese rivers, Hwang-ho or Ma-chu, and Yang-tze; to the south-east, the streams of Indo-China, the Lutze-kiang (Irrawadi), the Lu-kiang (Salwen), and the Lan ts'an kiang (Me-kong). The principal lakes are: on the north-east, the Kuku-nor or Ts'ing hai; on the south, Lake Palti or Yamdok; on the plateau, the Iki-Namur, the Pang-kong, the Tengri-nor, and the famed Mansarovar and Rakas.

GEOGRAPHY.—Many roads lead to Lhasa: (1) by Si-ning in the Kan-su Province and the Kuku-nor; (2) from Sze-ch'wan to Ta-Tsienlu, Ba-tang, Litang and Chamdo; (3) from Yun-nan by Li-kiang (these are the three main routes from China); (4) from Sikkim, in the south, through the Chumbi Valley and Gyan-tze; (5) from the west, by Leh, in Ladakh; (6) from Khotan, through the Aksai Chin, to Rudok. Tibet includes five provinces: (1) Amdo, part of the Chinese province of Kan-su and the Kuku-nor region (Ts'ing-hai), inhabited by Tibetans and administered by a Chinese official at Si-ning; the other four provinces form Tibet proper which is controlled by the viceroy of Sze-Ch'wan; (2) Ts'ien-tang, Eastern or Anterior Tibet (or K'ang, Kham, Khu, Khamdo, Chamdo), which extends between the Chinese Provinces of Sze-Ch'wan and Yun-nan, and the district of Lhorong djong, frontier of Lhasa; (3) Wei, Wu, or Chung-Tsang, Central Tibet, Kingdom of Lhasa; (4) Tsang or Hou Tsang, Ulterior Tibet, i. e. south-west Tibet, extending to Lake Mansarovar, with the town of Shigatze, near which stands the Tashilumbo Monastery at the junction of the Nyang-chu and the Ts'an-po; (5) Ngari (O-li), Western Tibet, which includes the upper courses of the Indus and the Sutlej, and generally north-western Tibet with the towns of Gartok and Rudok, the Kailas Mountain, the Refuge of Siva; it is bounded by the British district of Kumaun.

LAMAIST HIERARCHY AND SECULAR ADMINISTRATION.—At the head of the lamaist hierarchy of Tibet are the dalai lama and the *panch'en erdeni lama;* the word "lama" is derived from a Tibetan word, in Chinese, *wu shang*, meaning "unsurpassed". The dalai lama is a re-embodiment of one of the disciples of the reformer Tsong K'apa, and at the same time an incarnation of the Bodhisattwa Avalokiteçvara; he lives at the monastery Po-ta-la at Lhasa; his title is *Cheptsun Djamts'o Rinpoch'é* (Venerable Ocean Treasure). The *panch'en erdeni lama* lives at Tashilumbo. The supporters of the faith may receive the title of *Nomên 'Hân* (regent), or *Dharmâ Râja*. Celibacy would render impossible the re-embodiment if the *'hut'ukht'u* or saints were not chosen to represent the principles of the transmission of authority; these saints are known as the "Living Buddhas". The third lama in the hierarchy is the *Cheptsun Dampa 'Hut'ukht'u*, Patriarch of the Khalkhas, living at Urga; the *Ch'ahan Nomên 'Han* is the descendant of a counsellor sent in the sixteenth century by the dalai lama to the chief of the Ordos; his residence is at Kuku-Khoto; the metropolitan lama, *Ch'ang Kia 'Hut'ukht'u*, has his see at Dolonnor; the head of lamaist monasteries is called *K'anpu* (abbot). The secular administration of Tibet includes a council (*ka hia*) of four ministers (*kalon* or *kablon*) of the third rank of Chinese officials, elected as a rule by the Peking Government, on presentation by the Chinese *amban;*

the treasury (*shang shang*) presided over by a *kalon* with three first-class councillors (*tsai peng*), and two second-class councillors (*shang chodba*); two controllers of the revenue (*yerts' angba*); two controllers of streets and roads (*hierbang*); two superintendents of police (*shediba*); two controllers of the stud (*tapêng*); there are six military commanders (*taipêng*), with the fourth degree of Chinese rank, with twelve commanders of 200 men (*jupêng*), twenty-four *kiapêng*, and 120 *ting pêng*. Civil and military officials are designed under the general term of *fan muh*.

History.—Little is known of the ancient history of Tibet, the first dynasty having been founded by the Indian prince Rupati; but the historical period begins at the end of the sixth century A. D. when the first king, Luntsang, made inroads to India. Luntsang's son is the celebrated Srong-tsang Gam-po, one of the great champions of Buddhism; in 639 he married Bribtsun, daughter of Ançuvarman, sovereign of Nepal, and in 641 the princess of Wen ch'eng, daughter of the Chinese emperor T'ai-tsung. Under their influence, the Tibetan prince gave a great extension to Buddhism in his empire; he founded in 639 Lhasa, formerly Lha-ldan, where for centuries his heirs governed the country with the title of *gialbo* in Tibetan, and of *tsanp'o* in Chinese. The Tibetans were the allies of the Khalif of Bagdad and they invaded the Chinese provinces of Yun-nan, Sze-ch'wan and Kan-su, as far as Ch'ang ngan, capital of the T'ang emperors. The two most ancient historical edicts have been found by Dr. L. A. Waddell upon a lofty pillar of victory which stands at the foot of Potala Hill, under the castles of the ancient kings, now incorporated in the palace of the dalai lama; they date between A. D. 730 and 763, are the earliest historical Tibetan documents hitherto discovered, and throw a sidelight on the ancient history and geography of China. The eighth century is the culminating point of Tibetan power, which was destroyed when the Uighurs became the masters of the whole country between Peit'ing and Aksu.

During the eleventh century the priests of the Sakya Monastery began to be predominant in Tibet; they were called *Hung Kiao*, Red Church, on account of the colour of their garments and of their headgear. The laxness of their morals, the marriage of monks, and sorcery were the chief causes of the reform undertaken by Tsong K'apa or Je Rinpoch'e (b. at Amdo near Kuku-nor in 1358), founder of the Gelupa Sect, who adopted a yellow dress (*hwang kiao*), and obliged his followers to return to the primitive religion of Buddha; he founded the Monasteries of Gadan and of Sera, and died in 1418, having established the lamaist hierarchy. His successor, Gedundub, built the Monastery of Tashilumbo, which became in the seventeenth century the residence of the second lama, the *panch'en rinpoch'é*, while the first lama or dalai lama settled in 1641 to the west of Lhasa. The *panch'en lama*, Paldan-yeshes, died at Peking on the 27 Nov., 1780, during a visit to the Emperor of China. During the eighteenth century the Chinese Emperor, K'ien-lung, began to establish his supremacy over Tibet; already in 1725 two high Chinese commissioners had been appointed to control the temporal affairs of the country, and in the first moon of 1793 an imperial edict ordered that future dalai lamas were to be chosen from the names of children drawn from a "golden urn".

Chinese Administration.—The Chinese administration of Tibet includes an imperial resident (*chu tsang ta ch'ên*) or *amban* (*ngang pai*) with an assistant resident (*pang pan ta ch'ên*); among their duties, they act as intermediary between China and Nepal (Ghorkhas Country); a secretary (*yi ts'ing chang-king*) has to deal with native affairs. Three Chinese commissioners (*liang t'ai*), of the class of sub-prefect, are stationed at Lhasa, Tashilumbo, and Ngari. The imperial resident is Chao Erh-fung (appointed March, 1908), formerly Director-General of the Sze-ch'wan Hu-Pe Railway and acting viceroy of Szech'wan.

Travellers in Tibet.—Marco Polo and Rubruk mention Tibet but did not visit it; the first European traveller who appears to have visited Lhasa is the Franciscan Odoric of Pordenone in the first half of the fourteenth century. It was but in 1624 that we have real information on this country in a letter of the Portuguese Jesuit, Antonio de Andrade, dated Agra, 8 Nov., 1624, relating the journey of this father to Lake Mansarovar and to Rudok; Andrade erroneously called the country he visited, Cathay. Two years later, two other Jesuits, Grueber and d'Orville, (1661) left Peking, and by the route of Si-ning reached Lhasa, where they resided two months; they returned to India via Nepal. Two other Jesuits, Desideri and Freyre, went (1715–16) from Leh to Lhasa, where the former lived until 1729, when he was obliged to leave on account of the intrigues of the Capuchins, who had founded a mission which lasted to 1760, when they were expelled by the Tibetans. One of these monks, Francesco Orazio della Penna di Billi, has written an account of Tibet. A most remarkable journey was made by the Dutchman Samuel Van de Putte (d. at Batavia, 27 Sept., 1745), who went from India to Peking via Lhasa, and returned by the same road. In 1774 Warren Hastings, Governor of Bengal, sent George Bogle to the Court of the *panch'an lama;* Captain Samuel Turner went on a visit in 1783 to the Court of the new *panch'en lama;* finally the Englishman Thomas Manning visited Lhasa in 1811. Next we come to the celebrated journey to Lhasa of the Lazarists Huc (q. v.) and Gabet in 1844. For many years afterwards the exploration of Tibet was carried on by "pundits" in the Indian Government service, especially by Naîn Sing and the lama, Ugyen Gyatso. We must mention also among the travellers to Tibet the Russian, Prjevalsky (1880–85); the American, W. W. Rockhill (1888–89, 1891–92), who went to the north-east of Tengri-nor, 110 miles west of Lhasa; the Frenchmen, Gabriel Bonvalot and Prince Henri d'Orléans with the Belgian missionary, De Deken (1889–90); Captain Hamilton Bower (1891–92); Miss A. R. Taylor (1892); the Frenchman, Dutreuil de Rhins (who was murdered, 5 June, 1894, at Tungbumdo by the red lamas), and his companion, Fernand Grenard (who escaped); Sir George K. Littledale (1895); Captain M. S. Wellby and Lieut. Malcolm (1896); Captain H. H. P. Deasy (1896); the celebrated Swedish explorer, Sven Hedin; and finally the Russian captain, P. K. Kozlov.

Relations with China, Russia, and England.—By a separate article of the Che-fu Convention (13 Sept., 1876) it had been stipulated that the English Government might in the next year send a mission of exploration by way of Peking through Kan-su and Kuku-nor, or by way of Sze-ch'wan to Tibet, and thence to India. The Tsung-li-Yaman, having due regard to the circumstances, was, when the time arrived, to issue the necessary passports, and address letters to the high provincial authorities, and to the imperial resident in Tibet. The English did not take advantage of this article and countermanded the mission by Article 4 of the Convention signed at Peking, 24 July, 1886, regarding Burmah and Tibet. A convention with China was signed on 17 March, 1890, at Calcutta, settling the boundary frontiers between Sikkim and Tibet, and trade regulations were also signed in December, 1893. But the Tibetans occupied land inside the treaty boundary; on the other hand Russian activity in Tibet was causing great anxiety to the Indian Government; Lord Curzon had attempted to open direct communication with the dalai lama; there were rumours of a Russo-

Tibetan agreement. Notwithstanding Russia's protest, the Indian Government proposed sending a mission to Lhasa. Finally this mission was organized in July, 1903, with Major Francis E. Younghusband at its head; this first mission was turned into a second mission with Younghusband as a commissary and General James R. L. Macdonald as commander of the military escort. The English crossed the Jelep Pass (12 Dec., 1903), occupied Phari (19 Dec.), stormed Gyantse (12 April, 1904), and entered Lhasa on 3 August; the dalai lama was in flight. A treaty was signed on 7 September; the British troops left Lhasa and they were back in India on 25 October. The treaty was ratified by the Viceroy of India on 11 Nov., 1904; it included ten articles: The Government of Tibet engaged to respect the Anglo-Chinese Convention of 1890 and to recognize the frontier between Sikkim and Tibet; undertook to open forthwith trade-marts, to which all British and Tibetan subjects should have free right of access at Gyantse and Gastok as well as at Yatung; the roads to Gyantse and Gastok from the frontier were to be kept clear of all obstructions; an indemnity of £500,000, reduced since to one-third this amount, was to be paid to the British Government for the expense incurred in the despatch of armed troops to Lhasa; all forts and fortifications were to be razed and all armaments removed which might impede the course of free communication between the British frontiers and the towns of Gyantse and Lhasa. These terms were really very moderate. On 27 April, 1906, a convention was signed at Peking by Sir Ernest Mason Satow for Great Britain and by Tang Shao-yi for China, including six articles: the Lhasa Convention was confirmed; Great Britain engaged not to annex Tibetan territory or to interfere in the administration of Tibet; China also undertook not to permit any other foreign state to interfere with the territory or internal administration of Tibet. Finally, in 1907, Russia and Great Britain also signed a convention: both parties engaged to respect the territorial integrity of Tibet and to abstain from all interference in its internal administration, not to send representatives to Lhasa, neither to seek nor to obtain, whether for themselves or for their subjects, any concessions for railways, roads, telegraphs, and mines, or other rights in Tibet. From this time the Tibetan frontier has been closed to all foreigners, though the prohibition has been eluded by the daring Swedish explorer, Sven Hedin. The dalai lama had fled to Urga, in Mongolia, which he left in the summer of 1907 to settle at the Kun Bum Monastery; afterwards, in 1908, he went to the celebrated pilgrimage of Shan-si, Wu tai Shan, whence he repaired to Peking. An audience was granted to him by the emperor and he was allowed to leave the Chinese capital on 21 Dec., 1908, and return to Lhasa, where he was not to stay long; a body of Chinese troops invaded Tibet, the dalai lama fled to Darjeeling, and the result of the policy of both Great Britain and Russia has been the virtual annexation of Tibet by China.

Missions.—Since the Capuchins were expelled in 1760, except the Lazarists Huc and Gabet, who paid a visit to Lhasa in 1844, no missionary entered Tibet proper. The Vicar Apostolic of Hindu Tibet, Giuseppe Antonio Borghi, Bishop of Batsaïda, begged to be relieved of part of his work, and consequently on 21 March, 1846, Gregory XVI created the Vicariate Apostolic of Lhasa. The new vicariate was placed in charge of the Foreign Missions of Paris, and in 1847 Mgr Pérocheau, of Sze-ch'wan, sent Father Charles-René Renou (b. 22 Aug., 1812; d. 18 Oct., 1863) through Bat'ang to Cha-mu-to, some thirty days in the interior of Tibet, but being discovered, he was sent back to Ch'eng-tu. Renou being appointed Prefect Apostolic of Eastern Tibet was to enter his mission via Yun-nan, while Rabin, Prefect Apostolic of Southern Tibet, was to penetrate into the country by the way of Northern India with Fathers Krick and Bernard. Nicholas-Michel Krick (b. 2 March, 1819) and Auguste-Etienne Bourry (b. 26 Dec., 1826) were murdered by the Abors on 1 Sept., 1854. Finally the vicariate was established in the eastern portion of Tibet and the western portion of Sze-ch'wan with Jacques-Léon-Thomine Desmazures (b. 17 Feb., 1804; d. 25 Jan., 1869), Bishop of Sinopolis (1857), who resigned in 1864. His successors have been Joseph-Marie Chauveau (b. 24 Feb., 1816; d. 21 Dec., 1877), Bishop of Sebastopolis (1850) and Vicar Apostolic of Tibet (1864–77); Félix Biet (b. 21 Oct., 1838; d. 9 Sept., 1904), Bishop of Diana. The present vicar Apostolic is Pierre-Philippe Giraudeau (b. 17 March, 1850), since 1901, Bishop of Tiniade (12 Dec., 1897), with his residence at Ta-Tsien-lu. The mission includes (1910) 21 European priests, 2407 Catholics, and 600 catechumens. It has endured cruel persecutions during recent years. Among the missionaries of Tibet must be mentioned the well-known traveller and scholar, Auguste Desgodins (b. 1826), now living at Darjeeling, author of a large "Dictionnaire thibétain-latin-français", and of a Tibetan grammar, printed at Hong-Kong in 1899.

Henri Cordier.

Tiburtius, Valerian, and Maximus, Saints. See Cecilia, Saint.

Tiburtius and Susanna, Saints, Roman martyrs, feast 11 August. The story is related in the legend of St. Sebastian that Chromatius, prefect of Rome, condemned several Christians to death. The prefect, however, was converted by St. Tranquillinus and baptized by Polycarp. Tiburtius, the only son of Chromatius, was also baptized through the persuasion of St. Sebastian, who was his godfather in baptism. Tiburtius during the persecution of Diocletian lay hidden in his father's house. Accused by a traitor, he was brought before the prefect Fabianus and tried. He confessed his faith which he confirmed by a miracle, for protecting himself only by the sign of the cross he walked over red-hot coals barefoot without suffering any injury. But the miracle was ascribed to magic and Tiburtius was beheaded at the third mile-stone of the Via Lavicana. This was in the year 286. The spot of execution was called, "at the two laurel trees".

Saint Susanna, virgin and martyr, is said to have been the daughter of St. Gabinius. She was beheaded about the year 295, at the command of Diocletian, in her father's house. This house and the adjoining one belonging to her uncle, the prefect Caius, which were near the two laurel trees, were turned into a church, later the titular church of St. Susanna *ad duas domos* (cf. Kehr, "Italia pontificia", I, 61 sq.). The authenticity of the Acts of Sts. Sebastian and Susanna has been rightly questioned; however, the martyrdoms and the day of death (11 August) are established by the witness of the oldest Martyrologies and the earliest places of worship.

Acta SS., II Feb., 271–7; III April, 14–6; and II August, 613–32.

Gabriel Meier.

Ticelia, titular see, suffragan of Cyrene, in the Libya Pentapolis. Under this name it is not found in any "Notitia episcopatuum", nor in any geography sacred or profane. Nevertheless, at the Robber Synod of Ephesus (449), we find a Theodulus, Bishop of Ticelia in Libya (Mansi, "Conciliorum Collectio", VI, 610); the name of the city is much corrupted in the Greek text. It is doubtful if Ticelia is the correct name of this city or see. In a "Notitia episcopatuum", published by Gelzer (Byzantinische Zeitschrift, II, 26), we find the see of Sicelia, evidently the same as ours. Which is the correct name? At the Council of Ephesus (431), among the subscribers is Sosipater, Bishop of Septimiace, a city otherwise unknown, which seems likewise to have been situated in Libya (Mansi, op. cit., IV, 1128, 1221). Just now it is impossible to say if these various names relate to the same city, or what is the correct name of this diocese.

S. Vailhé.

Tichborne, Nicholas, Venerable, martyr, b. at Hartley Mauditt, Hampshire; suffered at Tyburn, London, 24 Aug., 1601. He was a recusant at large in 1592, but by 14 March, 1597, had been imprisoned. On that date he gave evidence against various members of his family. Before 3 Nov., 1598, he had obtained his liberty and had effected the release of his brother, Venerable Thomas Tichborne, a prisoner in the Gatehouse, Westminster, by assaulting his keeper. He is to be distinguished from the Nicholas Tichborne who died in Winchester Gaol in 1587.

With him suffered Venerable Thomas Hackshot (b. at Mursley, Buckinghamshire), who was condemned on the same charge, viz. that of effecting the escape of the priest Thomas Tichborne. During his long imprisonment in the Gatehouse he was "afflicted with divers torments, which he endured with great courage and fortitude".

Challoner, *Missionary Priests*, I, no. 127; Pollen, *English Martyrs 1584–1603* (London, privately printed for the Catholic Record Soc., 1908), 361, 395; *Historical MSS. Commission, Cecil MSS.*, IV (London, 1892), 270.

John B. Wainewright.

Tichborne, Thomas, Venerable, b. at Hartley, Hampshire, 1567; martyred at Tyburn, London, 20 April, 1602. He was educated at Rheims (1584–87) and Rome, where he was ordained on Ascension Day, 17 May, 1592. Returning to England on 10 March, 1594, he laboured in his native county, where he escaped apprehension till the early part of 1597. He was sent a prisoner to the Gatehouse in London, but in the autumn of 1598 was helped to escape by his brother, Ven. Nicholas Tichborne, and Ven. Thomas Hackshot, who were both martyred shortly afterwards. Betrayed by Atkinson, an apostate priest, he was re-arrested and on 17 April, 1602, was brought to trial with Ven. Robert Watkinson (a young Yorkshire man who had been educated at Rome and ordained priest at Douai a month before) and Ven. James Duckett, a London bookseller. On 20 April he was executed with Ven. Robert Watkinson and Ven. Francis Page, S. J. The last named was a convert, of a Middlesex family though born in Antwerp. He had been ordained at Douai in 1600 and received into the Society of Jesus while a prisoner in Newgate. Ven. Thomas Tichborne was in the last stages of consumption when he was martyred.

Edwin Burton.

Ticonius (also Tyconius, Tychonius, etc.), an African Donatist writer of the fourth century who appears to have had some influence on St. Augustine. He defended a milder form of Donatism than Parmenianus. He admitted a church outside his own sect and rejected the re-baptism of Catholics. Parmenianus wrote a letter against him, quoted by St. Augustine (Contra ep. Parmeniani, I, i; P. L., XVIII, 33). Otherwise almost all we know of him is contained in Gennadius (De vir illustr., XVIII): "Tichonius an African was learned in theology, sufficiently instructed in history, not ignorant of secular knowledge. He wrote books, 'De bello intestino' and 'Expositiones diversarum causarum' [these are both Donatist apologies]: in which, to defend his side, he quotes ancient synods; from which he is seen to have been of the Donatist party. He composed eight [should be seven] rules for discovering the meaning of the Scriptures, which he arranged in one book. He also explained the whole Apocalypse of John, understanding all of it in a spiritual sense, nothing carnally. In this exposition he said that the body [of man] is the dwelling-place of an angel. He denied the idea of a kingdom of the righteous on earth lasting a thousand years after the resurrection. Nor did he admit two future resurrections of the dead in the flesh, one of the good and one of the bad, but only one of all, in which the misbegotten and deformed will rise too, so that no part of the human race ever animated by a soul shall perish. He showed the distinction of the resurrection really to be that we must believe that there is a revelation of the righteous now in this world, when those justified by faith rise by baptism from the death of sin to the reward of the eternal life, and the second [resurrection] to be the general one of all flesh. He flourished at the same time as Rufinus; in the reign of Theodosius and his son" (ed. Bernoulli, Freiburg and Leipzig, 1895, pp. 68–69). This gives us 379–423 as extreme dates. Ticonius's best known work is the "Seven rules of interpretation" (for the Bible). They are quoted and explained by St. Augustine in "De doctrina christiana" (III, 30–37; P. L., XXXIV, 81–90) and his authority gave them great importance for many centuries in the West. St. Bede too quotes them (Explanatio apocalypsis; P. L., XCIII, 130–132). Ticonius's "Commentary on the Apocalypse" (Bede, op. cit., 132–134) is now lost. It was extant in the library of St. Gallen in the ninth century (No. 242; cf. G. Becker, "Catalogi biblioth. antiqui.", Bonn, 1885, p. 48) and is used by Primasius of Hadrumetum (P. L., LXVIII, 793–936), Ambrose Autpert (Bibl. Max., XIII, 403–657), and others. The "Commentary" ascribed to St. Augustine (P. L., XXXV, 2415–52) is believed to be a modified version of Ticonius. St. Augustine reproaches Ticonius with an anticipation of Pelagian ideas (De doctr. Christ., III, 33).

Adrian Fortescue.

Ticuna Indians, a tribe of Indians of some importance, constituting a distinct linguistic stock, inhabiting the river settlements or wandering in the forests along the north bank of the upper Amazon (Marañon or Solimoes), about the confluence of the Javari, ranging from about Loreto in Peru to below Tabatinga in Brazil. They number about 2500 souls, nearly equally divided between the two governments. About one-third are more or less Christianized, the others retaining their primitive wild habits. Physically they are one of the finest tribes of the upper Amazon. In character they are frank, honest, and of affectionate disposition. The wandering Ticuna, some of whom at times reside temporarily in the river villages, go naked except for the G-string and a collar of jaguar or monkey teeth, to which is added a painted robe on ceremonial occasions. They wear the hair cut across the forehead and hanging down full length behind. They wear armlets of bright-coloured feathers and paint and tattoo their faces in various patterns. They live by hunting and fishing, and the preparation and sale of the curari poison, here called from them the "Ticuna" poison, for use upon blow-gun arrows. In this manufacture they are recognized experts and hold the process a secret, although it is known that *Strychnos castelneana* and *Cocculus toxicofera* are among the ingredients. The poison is kept in cane tubes or clay pots of their making, and is the chief object of intertribal trade throughout the upper Amazon region. They also gather the forest products, as wax, rubber, gum, and sarsaparilla, for sale to the traders. They believe in a good spirit, Nanuola, and a dreaded evil spirit, Locasi. There is a sort of circumcision and baptismal ceremony in connexion with the naming of children. They are fond of elaborate masked dances. Girls on arriving at puberty are closely secluded for a long period, terminating with a general feast and drinking orgy, the liquor being the masato, or chicha, prepared from chewed and fermented corn or bananas. Wives are obtained by purchase. The dead are buried in great earthen jars, together with food and, in the case of a warrior, broken weapons, the ceremony concluding with a drinking feast.

A Ticuna Indian, Carrying Blowgun
From a Narrative of the Explorations of Smyth and Lowe, published in 1836

Some effort at the conversion of the Ticuna was made by the Portuguese Carmelites from Brazil about the middle of the eighteenth century, but without result, owing to the Indian dread of the Portuguese slave-hunters. About 1760 the Jesuit Father Franciscus, of the neighbouring mission of San Ignacio among the Peva, friends and allies of the Ticuna, succeeded in gathering some of the latter into a new mission village which he called Nuestra Señora de Loreto (now Loreto, Peru), one of the "lower missions" of the Jesuit province of Mainas. At the time of the expulsion of the Jesuits in 1768 it was in charge of Father Segundo del Castillo and contained 700 souls, being one of the largest of the province. After the withdrawal of the Jesuits the missions were given over to the Franciscans, under whom the work was continued until interrupted by the long Revolutionary struggle beginning in 1810. Under the new republican government the missions were neglected and rapidly declined, but the Christian Ticuna are still served by resident priests at Loreto and Tabatinga, including the auxiliary villages. Marcoy gives a vocabulary of the language.

From the American officer, Lieut. Herndon, we have the following interesting account (condensed) of the Ticuna mission village of Caballococha near Loreto, as he found it in 1851: "The village is situated on the *caño* (river inlet), about a mile and a half from the entrance and at the same distance from the lake. It contains 275 inhabitants, mostly Ticunas Indians. These are darker than the generality of the Indians of the Marañon, though not so dark as the Marubos, and they are beardless, which frees them from the negro look that these last have. Their houses are generally plastered with mud inside, and are far neater looking and more comfortable than the other Indian residences that I have seen. This is however entirely owing to the activity and energy of the priest, Father Flores, who seems to have them in excellent order. They are now building a church for him, which will be the finest in the Montaña (forest region). The men are all decently clad in frocks and trousers; and the women, besides the usual roll of cotton cloth around the loins, wear a short tunic covering the breast Father Flores keeps the Indians at work, sees that they keep themselves and houses clean, and the streets of the village in order, and I saw none of the abominable drinking and dancing with which the other Indians invariably wind up the Sunday." Through the kindness of Father Flores he was able to witness a heathen incantation over a sick man. On approaching the house they heard a number of persons singing inside, and, says Herndon, "I was almost enchanted myself. I never heard such tones, and think that even instrumental music could not be made to equal them. I have frequently been astonished at the power of the Indians to mock animals, but I had heard nothing like this before. The tones were so low, so faint, so guttural, and at the same time so sweet and clear, that I could scarcely believe they came from human throats, and they seemed fitting sounds in which to address spirits of another world." When they entered, the singers fled, and they found only two men sitting by a fire of blazing copal gum, filling an earthen pot with the juice of chewed tobacco, and plainly showing by their manner that the ceremony was not intended for strangers.

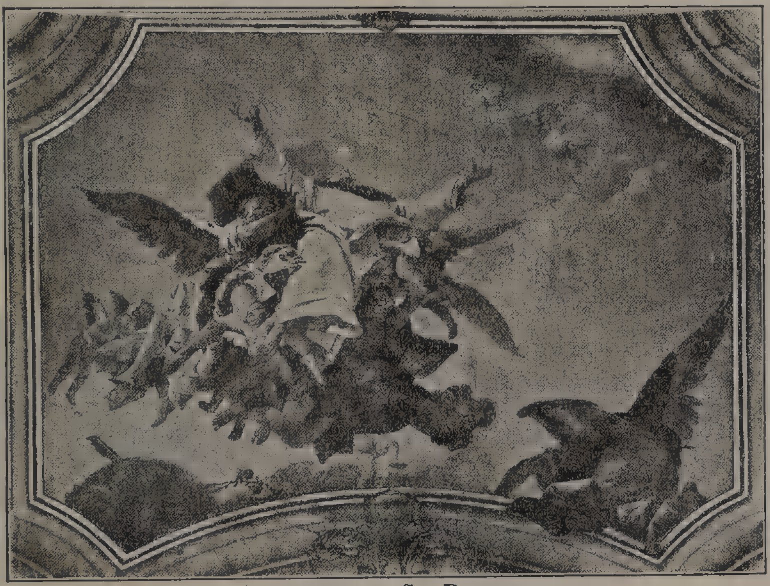
James Mooney.

Tieffentaller, Joseph, Jesuit missionary and noted geographer in Hindustan, b. at Bozen in the Tyrol, 27 August, 1710; d. at Lucknow, 5 July, 1785. He entered the Society of Jesus 9 October, 1729, and went in 1740 to the East Indian mission where he occupied various positions, chiefly in the empire of the Great Mogul. After the suppression of the Society he remained in India, and on his death was buried in the mission cemetery at Agra, where his tombstone still stands. He was a fine scholar with an unusual talent for languages; besides his native tongue he understood Latin, Italian, Spanish, French, Hindustani, Arabic, Persian, and Sanscrit. He was the first European who wrote an exact description of Hindustan. A brief list of his works is the best proof of his extraordinary power of work and his varied scholarship.

In geography, he wrote a "Descriptio Indiæ", that is a circumstantial description of the twenty-two provinces of India, of its cities, fortresses, and the most important smaller towns, together with an exact statement of geographical positions, calculated by means of a simple quadrant. The work also contains a large number of maps, plans, and sketches drawn by himself, and the list of geographical positions fills twenty-one quarto pages. He also prepared a large book of maps on the basin of the Ganges, entitled: "Cursus Gangæ fluvi Indiæ maximi, inde Priaga seu Elahbado Calcuttam usque ope acus magneticæ exploratus atque litteris mandatus a J. T. S. J." (1765).

The original map of the lower course of the river measures 15′, that of the middle course, from Benares to Patna, measures 4′ 3″ square. In addition there is a map of similar dimensions of the Gagra, the whole accompanied by numerous notes, sketches of particular parts, and maps giving details—an "enormous labour", as Bernoulli calls it. He also wrote a work on the regions containing the sources of the chief rivers of India. In the field of religions he wrote on Brahminism a work directed against the errors of the Englishmen Z. Holwell and Alexander Dow. Others of his writings were on Indian idolatry, Indian asceticism, the religion of the Parsees, Mohammedanism, the relations of these religions to one another, etc. His writings in the department of the natural sciences are: astronomical observations on the sun-spots and the zodiacal light, studies on the astronomy, astrology, and cosmology of the Hindus, descriptions and observations of the flora and fauna of India. The department of history is represented by writings in Latin on the origin of the Hindus and of their religion, an account in German of the expeditions of Nadir Shah to India, the deeds of the Great Mogul Shah Alam in Persian, and in French the incursions of the Afghans and the conquest of Delhi, and the contemporary history of India for the years 1757–64. In linguistics he wrote a Sanscrit-Parsee lexicon, treatises in Latin on the language of the Parsees, on the proper pronunciation of Latin, etc.



Apotheosis of St. Dominic
Giambattista Tiepolo, Church of the Gesuati, Venice

Tieffentaller sent these works in manuscript partly to the Danish scholar Dr. Kratzenstein at Copenhagen, partly to the celebrated French Orientalist and geographer A. H. Anquetil-Duperron (1731–1805). The latter gave due credit to the value and importance of the works, especially those on geography, in his addresses before the French Academy of Sciences ("Journal des Scavans", Dec., 1776), and made the writings of Tieffentaller partly accessible to the learned world in his "Recherches hist. et géogr. sur l'Inde" (1786), and also in his "Carte générale du cours du Gange et du Gagra dressée par les cartes particulières du P. Tieffenthaler" (Paris, 1784). A part of the manuscripts at Copenhagen were obtained by the German scholar Johann Bernoulli of Berlin who used them in connexion with the "Recherches" of Anquetil for the great work "Des Pater Joseph Tieffenthalers d. Ges. Jesu und apost. Missionarius in Indien historisch-geographische Beschreibung von Hindustan . . ." (3 volumes, quarto, Berlin-Gotha, 1785–87). The greater part of the first two volumes is devoted to Tieffentaller's writings, his maps, and sketches. The French edition, entitled: "Description hist. et géogr. de l'Inde . . .", appeared at Berlin in three vols., 4to (1786–91). A large part of his manuscripts are probably still extant in Paris and Copenhagen.

A. Huonder.

Tiepolo, Giovanni Battista (Giambattista), b. in Venice in 1696; d. at Madrid, 27 March, 1770. The son of a sea-captain and marine merchant, who left behind him a considerable fortune, Tiepolo married, in 1721, Cecilia, the sister of the painter Guardi, by whom he had nine children. His earliest master was Lazzerini, but his artistic career was derived from a careful study of the works of Titian, Piazzeta, Ricci, and especially Veronese. Up to 1750 he worked in Venice and various places in the north of Italy, painting some remarkable works at Milan, in Brescia, and in one or two villas near Venice. He then, accompanied by his son, travelled to Würzburg, where he resided for three years, executing some magnificent ceiling paintings in the palace of the archbishop. He was back again in Venice in 1753, full of commissions, elected President of the Academy of Padua, and holding high distinction in his native town. In 1761 he accepted the invitation of Charles III, King of Spain, to come to that country to decorate the royal palace of Madrid. Unfortunately, during his residence there he incurred the jealousy and the bitter opposition of Raphael Mengs. He is the last of the great Venetian painters; his works are magnificent in force, brilliance, and skill. As a draughtsman and colourist, few have approached him; as an etcher, he took a high position.

Giovanni Domenico, son and pupil of the elder Tiepolo, b. in Venice, 30 August, 1727; d. there, 3 March, 1804. He was his father's assistant but far inferior in every respect in draughtsmanship and colouring. His best work is the ceiling in the Palazzo Ducale at Genoa. In his latter years, having satisfactory means, he retired to a villa near Venice and lived in comfort. His marriage had taken place in 1776, and was a scene of great pomp and magnificence. His widow married again after his decease, and the male line of Tiepolo died out with him.

George Charles Williamson.

Tierney, Mark Aloysius, b. at Brighton, Sept., 1795; d. at Arundel, 19 Feb., 1862. After his early schooling with the Franciscans at Baddesley Green, Warwickshire, he was educated at St. Edmund's College, Old Hall, which he entered in 1810 and where he was ordained priest, 19 Sept., 1818. He remained at the college as professor and procurator in 1818–19. He then served as assistant priest at Warwick Street, London, and afterwards at Lincoln's-Inn Fields till his ill-health necessitated his removal to the country mission of Slindon in Sussex. In 1824 he was appointed chaplain to the Duke of Norfolk at Arundel, where he spent the rest of his life, devoting himself to historical and antiquarian studies. His chief object was to bring out a new edition of Dodd's "Church History of England", which should incorporate all the documents collected by himself and Kirk. The first volume appeared in 1839, but on the publication of the fifth volume in 1843 the work was unfortunately discontinued, as the revival of the history of the seventeenth-century disputes between seculars and regulars was thought inopportune and gave offence. Meanwhile his position as an antiquarian had received public recognition, for in 1833 he was elected a Fellow of the Society of Antiquaries and in 1841 a Fellow of the Royal Society. He also acted as secretary to the Sussex Archæological Society. After the restoration of the hierarchy he became the first canon penitentiary of the Diocese of Southwark, having long been a member of the old chapter. Shortly afterwards, his relations with Cardinal Wiseman, whose policy he disliked and mistrusted, became very strained. Arising out of Tierney's biographical sketch of Lingard, a controversy began between them on the well-known question whether Lingard had been created a cardinal *in petto*, by Leo XII, and Cardinal Wiseman addressed to his chapter a letter complaining of Tierney's criticism of his "Recollections of the last Four Popes". In answer to this Tierney wrote the "Reply to Cardinal Wiseman's Letter to his Chapter" (1858), which was not published. He also wrote "The History and Antiquities of the Castle of Arundel" (London, 1834) and several controversial pamphlets. For a time he acted as editor of the "Dublin Review", succeeding Quin the first editor.

EDWIN BURTON.

Tigris, SAINT, Irish saint, sister of St. Patrick. Much obscurity attaches to her life, and she has been frequently confounded with St. Darerca, another of the five sisters, who are treated of at length by Colgan. St. Tigris was the mother of five sons, all of whom became bishops: Sts. Lomam of Trim; Munis of Forgney; Broccaid of Emlagh; Broccen of Breaghwy; and Mugenoc of All Duimi Gluin. Jocelyn credits the saint with seventeen sons and five daughters, but Tirechan and the "Tripartite Life" are preferable authorities. Her husband's name was Gollit. The time and place of her death are uncertain.

STOKES, *Tripartite Life of St. Patrick* (London, 1887); HEALY, *Life and Writings of St. Patrick* (Dublin, 1905).

W. H. GRATTAN-FLOOD.

Tillemont, LOUIS-SÉBASTIEN LE NAIN DE, French historian and priest, b. at Paris, 30 November, 1637; d. there, 10 January, 1698; he was educated at the *petites écoles* of Port-Royal, where Nicole instructed him in logic. His natural inclination was towards history. In reading Baronius he conceived the idea of going back to the sources from which that historian had drawn. At the age of eighteen, therefore, he began to make notes and extracts—a work he continued throughout his life. He spent several years at Beauvais, partly in the seminary and partly with Canon Hermant, who was an authority on the early ages of Christianity. He received Holy orders somewhat late in life, becoming a subdeacon in 1672 and a priest four years later, when he was 39. At that time he resided in Port-Royal, but a little later, in 1679, when its community was dispersed, he withdrew to his small estate at Tillemont, between Montreuil and Vincennes, where he remained till his death twenty years later in 1698, devoting his time to exercises of piety and to historical work. He supplied several of his learned friends with much material for their writings. Thus he spent two years collecting notes on St. Louis for Lemaistre de Lacy, who did not live, however, to make use of them. They were published by the Société de l'histoire de France in 1847 (6 vols.). Tillemont wrote in addition: "Histoire des empereurs et autres princes qui ont régné pendant les six premiers siècles de l'Eglise" (6 volumes in 4°), and "Mémoires pour servir à l'histoire ecclésiastique des six premiers siècles" (16 volumes in 4°). Only the first four volumes of each of these works appeared in the lifetime of the author. Tillemont's style is dry, but he is an accurate and learned historian.

GEORGES BERTRIN.

Tilly, JOHANNES TSERCLÆS, COUNT OF, b. at Brabant in 1559; d. at Ingolstadt in April, 1632. He was a member of a noble family of Brabant named Tserclæs. His mother was a devoted Catholic; his father took part at first in the revolt of the Netherlands against Spain, but by 1574 became a loyal adherent of Philip II. The son was educated by the Jesuits at Cologne. Like all the great men who fought for the Church and the empire during the era of the Reformation and the Counter-Reformation, Tilly has long been calumniated by Protestant and rationalist historians. In reality he was a man of genuine piety, remarkable self-control, moderation, and disinterestedness, a "monk in the garb of a general". He was honest, even to the enemy, a father to his soldiers, and humane to the common people, whom he protected as far as he could against acts of violence. As a general he was celebrated for his caution, his able grasp of situations, for the excellent preparatory training he gave his troops, and his never-failing readiness to meet the enemy and force him to give battle. He learned the art of war under the celebrated general, Alexander Farnese; at a later date Tilly surpassed his teacher. Up to 1594 he took part in the wars, some political and some religious, which laid waste the country from the mouth of the Rhine to the Seine: the War of Cologne, the revolt in the Netherlands, the War of the Holy League. In 1594 Henry IV would have been glad to have Tilly as one of his generals. During the years 1600–08, Tilly served Emperor Rudolph II and fought in Hungary against the Turks; in 1604 he rescued Gran; in 1605 he was commander-in-chief of the imperial forces; but the quarrels in the House of Austria and Rudolph's mental decay made success impossible. During the period 1610–30 Tilly commanded the army of Maximilian of Bavaria. Maximilian was a man very similar to Tilly; they seemed made to work together. Tilly was to command the army of the newly-founded League of the Catholic States of the empire.

TILLY, FROM AN ENGRAVING AFTER VANDYKE

During the era of peace up to 1620, Tilly created the Bavarian army, the flower of the army of the League, and the first standing army in the empire that was paid and fed, not by plundering and enforced contributions, but out of the regular revenues of the State. With these troops as his mainstay he took part in the prolonged war in Bohemia and the empire during the years 1620–30. In 1620 the force of his attack gained the victory at the battle of the White Mountain (8 November) over the Bohemians who had revolted against the emperor. For four years Tilly was engaged in a contest with Ernst of Mansfeld and his confederates. Ernst transferred the war from Bohemia to the lands of the empire, so that Tilly was often hampered by political considerations. In 1622 Tilly forced Mansfeld to give battle at Wiesloch, but the result was indecisive. He then destroyed the army of George Frederick of Baden at Wimpfen, and that of Christian of Halberstadt at Höchst, and took Heidelberg and Mannheim. After this Mansfeld's army dispersed and Tilly had now the strategic control of the whole of southern Germany. But in the next year, Mansfeld and Christian entered north-western Germany with fresh armies. As the estates of Hesse and some of those of Lower Saxony were still adherents of the imperial cause, Tilly was able to make an energetic advance against Mansfeld and to defeat him at Stadtlohn in 1623. Political considerations, however, prevented his pursuit of Mansfeld. The inhabitants of north-western Germany were roused to fanaticism against Tilly by the suggestion that he would force them to become Catholics. The districts on the middle course of the Weser which he garrisoned after his victory at Stadtlohn yielded so little that, in spite of all his efforts to feed his army by orderly methods, the soldiers suffered privations and took to plundering, which increased still more the animosity against them. The danger that the King of Denmark would take part in the war led Tilly in 1625 to beg the emperor to raise an army in the empire and to place it under Wallenstein's command. Wallenstein kept all the prosperous territories for himself and limited Tilly more than ever to the districts poor in revenue of south-western Germany. Tilly now found it increasingly difficult to maintain discipline because Wallenstein collected mercenary soldiers by the promise of rich booty, and raised these troops on a larger scale and more successfully than any previous commander on account of his imposing personality. Moreover, from 1627, and especially after the Edict of Restitution of 1629 Tilly was obliged to carry out numerous orders to restore to the Church lands which had been taken from it contrary to the religious peace; in this way he gained the reputation of being a bitter enemy of Protestantism. By force of character, however, he overcame all difficulties.

In 1626 Tilly prevented the union of the Danes with the Landgrave of Hesse who had revolted, and later, in August, destroyed the Danish army at Lutter on the Barenberg. In 1627 he drove the Danes over the Elbe, but on account of a wound, which prevented him from partaking in the war, Wallenstein gained the honours of the victory in the campaign in Holstein. When he had recovered Tilly took Stade at the mouth of the Elbe, and thus gained control over the whole of north-western Germany excepting Bremen. He was not able to advance against this latter city on account of the effects of Wallenstein's failures about the same time at Stralsund and Magdeburg. The great success he had later led him to hope for a time that peace could be restored in the empire, but in this he was disappointed. Once more for political reasons he could not gain permission to attack the Dutch, who exerted themselves to keep alive the disorders in the empire. On the other hand, the leaders of the League, owing to their hostility to Wallenstein, refused to give Tilly permission to go to Wallenstein's aid at Stralsund, and thus to bar Gustavus Adolphus from entering the empire. They also obliged Tilly and Wallenstein to dismiss a large part of their troops, a course that aroused a bitter and suspicious feeling in the experienced general and politician. Shortly after the arrival of Gustavus Adolphus, Wallenstein was dismissed and Tilly was entrusted by the emperor with the command of the imperial army in addition to his own. It was a difficult task to reorganize the imperial troops which were in process of being disbanded. The last period of Tilly's activities as a general began when he took command of the imperial army. As usual, he took the offensive as soon as he could and began operations near the Baltic coast. Gustavus Adolphus, however, avoided a battle and sought to tire Tilly out by marching about so as to wrest the initiative from him. Tilly put an end to this by marching against Magdeburg in March, 1630; this was the boldest stroke of his entire career as a commander. Gustavus seized the opportunity to advance up the Oder into the territories ruled by the emperor; probably, however, Tilly's bold measures forced Gustavus to follow him, in order to relieve Magdeburg.

When Tilly stormed Magdeburg on 20 May, its Swedish garrison laid the city in ashes, and it lost its strategic importance; he was, therefore, obliged to retreat towards Thuringia. Gustavus Adolphus now showed himself to be superior to Tilly in tactics at the battle of Breitenfeld on 17 September. Tilly followed the methods of Alexander Farnese, but these proved unsuccessful against Gustavus Adolphus's more modern generalship. Tilly's army was nearly destroyed, and he, now seventy-two years old, was for a short time crushed by the blow. However, in the same autumn he advanced from the Weser with new troops to prevent the Swedes from marching into the territories of the chiefs of the League in Franconia. But on account of the insufficient means at his disposal, the fear of the Swedes, and the timidity of the emperor and of the Catholic estates, his army disbanded on the way. Undismayed, Tilly began again on a smaller scale. In March, after carefully making his arrangements, he stormed Bamberg, which had fallen into the hands of the Swedes, and gained here the first victory over them. He now planned to advance towards Eger in order to join Wallenstein, who had again entered the imperial service, but the latter kept him waiting. In the meantime Gustavus Adolphus had advanced from the Main towards Tilly. Abandoning Donauwörth, Tilly took up a position at the Village of Rain on the Lech, being supported by Aldringen, the imperial quartermaster-general. The battle took place 15 April, and at its very beginning Tilly and Aldringen were severely wounded; this gave Gustavus Adolphus the victory. Before his death Tilly provided for the timely garrisoning of Ingolstadt and Ratisbon by the Bavarian troops, a measure which proved of importance for the subsequent course of the war. Tilly was always victorious in every campaign in which he had sufficient resources. He died when the campaign against Gustavus had hardly begun. It is, therefore, unjust to judge of his ability as a commander by his failure at the beginning of this campaign. He was inferior to no commander of his own time.

KLOPP, *Tilly im 30-jährigen Kriege* (Stuttgart, 1861); VILLERMONT, *Tilly ou la guerre de trente ans* (Tournay, 1860).

MARTIN SPAHN.

Timbrias, a titular see in Pisidia, suffragan of Antioch. It is called Thymbrium in the official lists of the Roman Curia, the name being more or less misspelled in documents, but the spelling here adopted is that found on coins where the inhabitants are called, in the genitive plural, τιμβριαδέων. At a late period we find the form *Timbriada*, neuter plural, or perhaps *Thymbriada*. The exact site of the city is unknown. It is mentioned by Strabo (XII, 7, 2); the coins, bearing the figure of the Eurymedon, would indicate a locality near the upper part of that river, the lower part belonging to Byzantine Pamphylia. It was probably situated somewhere in the plain called Yilandi Ovassi, in the vilayet of Koniah. In ecclesiastical writings it is mentioned as late as the thirteenth century. Le Quien (Oriens Christianus, I, 1059) names three of its bishops: Constantine, present at the Councils of Constantinople, 680 and 692; John, at the Council of Nicæa, 787; Theodosius, at the Photian Council of Constantinople (879).

RAMSAY, *Asia Minor*, 406. S. PÉTRIDÈS.

Time.—The problem of time is one of the most difficult and most keenly debated in the field of natural philosophy. To arrive at a satisfactory orientation in regard to this discussion, it is important to distinguish two questions: (1) What are the notes, or elements, contained in our subjective representation of time? (2) To what external reality does this representation correspond?

(1) As to the first question, philosophers and scientists in general agree in this: that the notion, or concept, of time contains three distinct ideas fused into one indivisible whole. (a) First there is the idea of succession. Every mind distinguishes in time the past, the present, and the future, that is parts which essentially exclude simultaneity and can be realized only one after the other. (b) Again, time implies continuity. Speaking of events here below, in our own life, we cannot conceive the possibility of an interval of duration, however short, in which we should cease to grow older, or in which moment should cease to follow moment. The march of time knows neither pause nor interruption. (c) Lastly, a continuous succession cannot be a continuous succession of nothing. Therefore the concept of time represents to us a reality the parts of which succeed each other in a continuous manner. It matters little here whether this reality is purely ideal, or is realized outside of us, for we are dealing only with the concept of time. Such are the three essential elements of the subjective representation. From these considerations it appears that the question of time belongs to the domain of cosmology. By reason of its character as continuous, successive, divisible, and measurable, time belongs to the category of quantity, which is a general attribute of bodies, and cosmology has for its object the essence and general attributes of matter.

(2) The second question, relating to the objectivity of the concept of time, is one upon which philosophers, as well as scientists, are divided: no fewer than fifteen different opinions may be enumerated; these, however, may be grouped in three classes. One class embraces the subjectivist opinions, of which Kant is the chief representative; these regard time as completely a creation of the knowing subject. To Kant and his followers time is an a priori form, a natural disposition by virtue of which the inner sense clothes the acts of the external senses, and consequently the phenomena which these acts represent, with the distinctive characteristics of time. Through this form internal and external phenomena are apprehended by us as simultaneous or successive, anterior or posterior, to one another, and are submitted to necessary and universal time-judgments. To this class, also, belong a group of opinions which, without being so thoroughly subjective, attribute to time only a conceptual existence. To Leibniz and others time is "the order of successions", or a relation between things that follow one another; but if these things are real, the mind perceives them under the form of instants between which it establishes a relation that is purely mental. According to Balmes, time is a relation between being and non-being; subjective time is the perception of this relation; objective time is the relation itself in things. Though the two ideas of being and non-being are found in every succession, the relation between these two ideas cannot represent to us a real continuousness, and therefore it remains in the ideal order. Locke considers time as a part of infinite duration, expressed by periodic measures such as the revolution of the earth around the sun. According to Spencer, a particular time is the relation between two states in the series of states of consciousness. The abstract notion of a relation of aggregated positions between the states of consciousness constitutes the notion of time in general. To this relation Spencer attaches an essentially relative character, and attributes relative objectivity to psychological time alone. For Bergson homogeneous time is neither a property of things nor an essential condition of our cognitive faculty; it is an abstract schema of succession in general, a pure fiction, which nevertheless makes it possible for us to act upon matter. But besides this homogeneous time, Bergson recognizes a real duration, or, rather, a multiplicity of durations of unequal elasticities which belong to the acts of our consciousness as well as to external things. The systems of Descartes and of Baumann must also be classified as idealistic.

In opposition to this class of opinions which represent the existence of time as purely conceptual, a second class represent it as something which has complete reality outside of our minds. These opinions may fairly be described as ultra-realist. Certain philosophers, notably Gassendi and the ancient Greek Materialists, regard time as a being *sui generis*, independent of all created things and capable of surviving the destruction of them all. Infinite in its extension, it is the receptacle in which all the events of this world are enclosed. Always identical with itself, it permeates all things, regulating their course and preserving in the uninterrupted flow of its parts an absolutely regular mode of succession. Other philosophers, e. g. Clarke and Newton, identify time with the eternity of God or regard it as an immediate and necessary result of God's existence, so that, even were there no created beings, the continuation of the Divine existence would involve as its consequence, duration, or time. These ultra-realist philosophers substantialize time; others again make it a complete being, but of the accidental order. For de San time is an accident *sui generis*, distinct from all ordinary accidents; it is constituted as the local movement of parts which succeed each other in a continuous manner, but with perfect uniformity; by this accident, which is always inherent in substance, being and the accidents of being continue their existence enveloped in a succession which is everywhere and always uniform. Lastly, according to Dr. Hallez, the substantial existence of beings itself increases intrinsically without cessation, and this regular and continuous increase is by no means occasional or transitory, but always remains a veritable acquisition to the being which is its subject. Of this quantitative increment time is the representation. To sum up, all systems of this second class have as their distinctive characteristic the assertion of an external concrete reality—whether substantial or accidental—which adequately corresponds to the abstract concept of time, so that our representation of time is only a copy of that reality.

Between these two extreme classes of opinions is the system proposed by the majority of the Scholastics, ancient and modern. For them the concept of time is partly subjective, partly objective. It becomes concrete in continuous, notably in local, movement; but movement becomes time only with the intervention of our intelligence. Time is defined as the measure of movement according to an order of anteriority and posteriority (*numerus motus secundum prius et posterius*). Once local movement is divided into parts by thought, all the elements of the concept of time are found in it. Motion, being objectively distinct from rest, is something real; it is endowed with true continuity; nevertheless, in so far as it is divided by the intelligence, it contains successive parts actually distinct among themselves—some anterior, some posterior—between which we place a fleeting present. In the elaboration of the idea of time, therefore, movement furnishes the intelligence with a successive, continuous reality which is to be the real object of the concept, while the intelligence conceives it in that which it has in common with all movement—that is without its specific and individual notes—and makes it, formally, time, by dividing the continuity of the movement, making actual that distinction of parts which the movement possesses only potentially. In fact, say the Scholastics, we never perceive time apart from movement, and all our measures of temporal duration are borrowed from local movement, particularly the apparent movement of the heavens.

Whatever be its objectivity, time possesses three inalienable properties. First, it is irreversible; the linking of its parts, or the order of their succession, cannot be changed; past time does not come back. According to Kant, the reason of this property is found in the application to time of the principle of causality. As the parts of time, he says, are to each other in the relation of cause to effect, and as the cause is essentially antecedent to its effect, it is impossible to reverse this relation. According to the Scholastics, this immutability is based upon the very nature of concrete movement, of which one part is essentially anterior to another. Secondly, time is the measure of events in this world. This raises a knotty problem, which has so far not been theoretically solved. Time can be a permanent measure only if it is concretized in a uniform movement. Now, to know the uniformity of a movement, we must know not only the space traversed, but the velocity of the transit, that is the time. Here there is unquestionably a vicious circle. Lastly, for those who concretize time in movement, a much debated question is, whether time or movement can be infinite, that is without beginning. St. Thomas and some of the Scholastics see no absolute impossibility in this, but many modern thinkers take a different view.

D. Nys.

Timotheus and Symphorian, Saints, martyrs whose feast is observed on 22 August. During the pontificate of Melchiades (311–13), St. Timotheus came from Antioch to Rome, where he preached for fifteen months and lived with Sylvester, who later became pope. The prefect of the city, Tarquinus Perpenna, threw him into prison, tortured, and finally beheaded him in 311. A Christian woman named Theon buried him in her garden. This is related in the legend of Sylvester. The name of Timotheus occurs in the earliest martyrologies.

According to a legend of the early fifth century, St. Symphorian of Autun was beheaded, while still a young man, during the reign of Marcus Aurelius. His mother, the Blessed Augusta (?), encouraged him on his way to execution, 22 August, 178. Bishop Euphronius (d. 490) built a handsome church over his grave, connected with a monastery, which belonged to the Congregation of Sainte-Geneviève from 1656 until its suppression in 1791. Abbot Germanus later became Bishop of Paris, where he dedicated a chapel to the saint. St. Symphorian is the patron saint of Autun. His veneration spread at an early date through the empire of the Franks. His cult was especially popular at Tours; St. Gregory relates a miracle wrought by the saint.

Timothy and Titus, Epistles to (The Pastorals).—Timothy and Titus.—Saints Timothy and Titus were two of the most beloved and trusted disciples of St. Paul, whom they accompanied in many of his journeys. Timothy is mentioned in Acts, xvi, 1; xvii, 14, 15, 1; xviii, 5; xix, 22; xx, 4; Rom., xvi, 21; I Cor., iv, 17; II Cor., i, 1, 19; Phil., i, 1; ii, 19; Col., i, 1; I Thess., i, 1; iii, 2, 6; II Thess., i, 1; I Tim., i, 2, 18; vi, 20; II Tim., i, 2; Philem., i, 1; Heb., xiii, 23; and Titus in II Cor., ii, 13; vii, 6, 13, 14; viii, 6, 16, 23; xii, 18; Gal., ii, 1, 3; II Tim., iv, 10; Tit., i, 4. St. Timothy has been regarded by some as the "angel of the church of Ephesus", Apoc., ii, 1–17. According to the ancient Roman martyrology he died Bishop of Ephesus. The Bollandists (24 Jan.) give two lives of St. Timothy, one ascribed to Polycrates (an early Bishop of Ephesus, and a contemporary of St. Irenæus) and the other by Metaphrastes, which is merely an expansion of the former. The first states that during the Neronian persecution St. John arrived at Ephesus, where he lived with St. Timothy until he was exiled to Patmos under Domitian. Timothy, who was unmarried, continued Bishop of Ephesus until, when he was over eighty years of age, he was mortally beaten by the pagans. According to early tradition Titus continued after St. Paul's death as Archbishop of Crete, and died there when he was over ninety.

Epistles to Timothy and Titus.—Authenticity.—I. *Internal Evidence.*—The remainder of this article will be devoted to the important question of authenticity, which would really require a volume for discussion. Catholics know from the universal tradition and infallible teaching of the Church that these Epistles are inspired, and from this follows their Pauline authorship as they all claim to have been written by the Apostle. There was no real doubt on this question until the beginning of the nineteenth century; but since that time they have been most bitterly attacked by German and other writers. Their objections are principally based on internal evidence and the alleged difficulty of finding a place for them in the lifetime of St. Paul.

A. Objection from the absence of Pauline vocabulary.—Moffatt, a representative writer of this school, writes (Ency. Bib., IV): "Favourite Pauline phrases and words are totally wanting. . . . The extent and significance of this change in vocabulary cannot adequately be explained even when one assigns the fullest possible weight to such factors as change of amanuensis, situation or topic, lapse of time, literary fertility, or senile weakness." Let us examine this writer's list of favourite Pauline words of the absence of which so very much is made:

Ἄδικος (unjust).—This is found in Rom., iii, 5; I Cor., vi, 1, 9, but not in any of the other Pauline epistles, admitted to be genuine by this writer. If its absence be fatal to the Pastorals, why not also to I and II Thess., II Cor., Gal., Philip., Col., and

Philem.? Moreover, the noun *ἀδικία* is found in the Pastorals, II Tim., ii, 19.

Ἀκαθαρσία (uncleanness) does not occur in I Cor., Phil., II Thess., and Philem. If that does not tell against these Epistles why is it quoted against the Pastorals?

Υἱοθεσία (adoption).—This word is three times in Rom., once in Gal., but it does not occur at all in I and II Cor., I and II Thess., Phil., Col., and Philem. Why its omission should be used against the Pastorals is not easy to understand.

Πατὴρ ἡμῶν (Our Father).—Two expressions, God "our Father" and God "the Father" are found in St. Paul's Epistles. The former is frequent in his earlier Epistles, viz., seven times in Thess., while the latter expression is not used. But in Romans "God our Father" appears but once, and "the Father" once. In I Cor. we read God "our Father" once, and "the Father" twice; and the same has to be said of II Cor. In Gal. we have "our Father" once and "the Father" three times. In Phil. the former occurs twice and the latter once; in Col. the former only once, and the latter three times. "The Father" occurs once in each of the Pastoral Epistles, and from the above it is evident that it is just as characteristic of St. Paul as "our Father", which is found but once in each of the Epistles to the Romans, I and II Cor., Gal., and Col., and it would be absurd to conclude from this that all the remaining chapters were spurious.

Διαθήκη (covenant) occurs twice in Rom., once in I Cor., twice in II Cor., thrice in Gal., and not at all in I and II Thess., Phil., Col., and Philem., admitted to be genuine by Moffatt.

Ἀποκαλύπτειν (reveal), a word not found in II Cor., I Thess., Col., and Philem., and only once in Phil.

Ελεύθερος (free), is not in I and II Thess., II Cor., Phil., and Philem., so it is no test of Pauline authorship. Its compounds are not met in I and II Thess., Phil., Col., or Philem., and, with the exception of Gal., in the others sparingly.

Ενεργεῖν (to be operative) is seen but once in each of Rom., Phil., Col., I and II Thess.; and no one would conclude from its absence from the remaining portions of these Epistles, which are longer than the Pastorals, that they were not written by St. Paul.

Κατεργάζεσθαι (perform), though several times in Rom. and II Cor., and once in I Cor. and in Phil., is wanting in I and II Thess., Gal., Col., and Philem., which are genuine without it.

Καυχᾶσθαι (boast), only once in Phil., and in II Thess., and not at all in I Thess., Coloss., and Philem.

Μωρία (folly) is five times in I Cor., and nowhere else in St. Paul's Epistles.

But we need not weary the reader by going through the entire list. We have carefully examined every word with the like results. With perhaps a single exception, every word is absent from several of St. Paul's genuine Epistles, and the exceptional word occurs but once in some of them. The examination shows that this list does not afford the slightest argument against the Pastorals, and that St. Paul wrote a great deal without using such words. The compilation of such lists is likely to leave an erroneous impression on the mind of the unguarded reader. By a similar process, with the aid of a concordance, it could be proved that every Epistle of St. Paul has an appearance of spuriousness. It could be shown that Galatians, for instance, does not contain many words that are found in some of the other Epistles. A method of reasoning which leads to such erroneous conclusions should be discredited; and when writers make very positive statements on the strength of such misleading lists in order to get rid of whole books of Scripture, their other assertions should not be readily taken for granted.

B. Objection from the use of particles.—Certain particles and prepositions are wanting. Jülicher in his "Introd. to the New Test.", p. 181, writes: "The fact that brings conviction [against the Pastorals] is that many words which were indispensable to Paul are absent from the Pastoral Epistles, e.g. *ἄρα*, *διό*, *διότι*." But, as Jacquier points out, nothing can be concluded from the absence of particles, because St. Paul's employment of them is not uniform, and several of them are not found in his unquestioned Epistles. Dr. Headlam, an Anglican writer, pointed out in a paper read at the Church Congress, in 1904, that *ἄρα* occurs twenty-six times in the four Epistles of the second group, only three times in all the others, but not at all in Col., Phil., or Philem. *Διό* occurs eighteen times in Rom., Gal. and Cor., but not at all in Col. or II Thess. The word *διότι* does not occur in II Thess., II Cor., Eph., Col., or Philem. We find that *ἔπειτα* does not appear at all in Rom., II Cor., Phil., Col., II Thess., and Philem., nor *ἔτι* in I Thess., Col., and Philem. It is unnecessary to go through the entire catalogue usually given by opponents, for the same phenomenon is discovered throughout. Particles were required in the argumentative portions of St. Paul's Epistles, but they are used very sparingly in the practical parts, which resemble the Pastorals. Their employment, too, depended greatly on the character of the amanuensis.

C. Objection from *Hapax Legomena*.—The great objection to the Pastorals is the admittedly large number of *hapax legomena* found in them. Workman (Expository Times, VII, 418) taking the term "hapax legomenon" to mean any word used in a particular Epistle and not again occurring in the New Testament, found from Grimm-Thayer's "Lexicon" the following numbers of *hapax legomena:* Rom. 113, I Cor. 110, II Cor. 99, Gal. 34, Eph. 43, Phil. 41, Col. 38, I Thess. 23, II Thess. 11, Philem. 5, I Tim. 82, II Tim. 53, Titus 33. The numbers have to be somewhat reduced as they contain words from variant readings. These figures would suggest to most people, as they did to Dean Farrar, that the number of peculiar words in the Pastorals does not call for any special explanation. Mr. Workman, however, thinks that for scientific purposes the proportionate length of the Epistles should be taken into account. He calculated the average number of *hapax legomena* occurring on a page of Westcott and Hort's text with the following results: II Thessalonians 3·6, Philemon 4, Galatians 4·1, I Thessalonians 4·2, Romans 4·3, I Corinthians 4·6, Ephesians 4·9, II Corinthians 6·10, Colossians 6·3, Philippians 6·8, II Timothy 11, Titus and I Timothy 13. The proportion of *hapax legomena* in the Pastorals is large, but when compared with Phil., it is not larger than that between II Cor. and II Thess. It has to be noted that these increase in the order of time.

Workman gives a two-fold explanation. First, a writer as he advances in life uses more strange words and involved constructions, as is seen on comparing Carlyle's "Latter-Day Pamphlets" and his "Heroes and Hero-Worship". Secondly, the number of unusual words in any author is a variable quantity. He has found the average number of *hapax legomena* per page of Irving's one-volume edition of Shakespeare's plays to be as follows: "Love's Labour Lost" 7·6, "Comedy of Errors" 4·5, "Two Gentlemen of Verona" 3·4, "Romeo and Juliet" 5·7, "Henry VI, pt. 3" 3·5, "Taming of the Shrew" 5·1, "Midsummer Night's Dream" 6·8, "Richard II" 4·6, "Richard III" 4·4, "King John" 5·4, "Merchant of Venice" 5·6, "Henry IV, pt. I" 9·3, "pt. II" 8, "Henry V" 8·3, "Merry Wives of Windsor" 6·9, "Much Ado About Nothing" 4·7, "As You Like It" 6·4, "Twelfth Night" 7·5, "All's Well" 6·9, "Julius Cæsar" 3·4, "Measure for Measure" 7, "Troilus and Cressida" 10·1, "Macbeth" 9·7, "Othello" 7·3, "Anthony and Cleopatra" 7·4, "Coriolanus" 6·8, "King Lear" 9·7, "Timon" 6·2, "Cymbeline" 6·7, "The Tempest" 9·3, "Titus Andronicus" 4·9, "Winter's Tale" 8, "Hamlet" 10·4, "Henry VIII" 4·3, "Pericles" 5·2. For a similar argument on Dante see Butler's "Paradise", XI. The totals of *hapax legomena* for some of the plays are: "Julius Cæsar" 93, "Comedy of Errors" 88, "Macbeth" 245, "Othello" 264, "King Lear" 358, "Cymbeline" 252, "Hamlet" 426, "The Merchant of Venice" 148. This scrutiny of the words peculiar to each play throws light on another difficulty in the Pastorals, viz. the recurrence of such expressions as "a faithful saying", "sound words", etc. "Moon-calf" occurs five times in "The Tempest", and nowhere else; "pulpit" six times in one scene of "Julius Cæsar" and never elsewhere; "hovel" five times in "King Lear"; "mountaineer" four times in "Cymbeline", etc. Compare, "God forbid", μὴ γένοιτο of Gal., Rom., once in I Cor.—not in the other Epistles of St. Paul. "Sound words" was used by Philo before St. Paul, in whom it may be due to intercourse with St. Luke. (See Plumptre's list of words common to St. Luke and St. Paul, quoted in Farrar's "St. Paul", I, 481.)

Mr. Workman has overlooked one point in his very useful article. The *hapax legomena* are not evenly distributed over the Epistles; they occur in groups. Thus, more than half of those in Col. are found in the second chapter, where a new subject is dealt with (see Abbott, "Crit. . . . Comment. on Ep. to the Ephes. and to the Coloss." in "Internat. Crit. Comment."). This is as high a proportion as in any chapter of the Pastorals. Something similar is observable in II Cor., Thess., etc. Over sixty out of the seventy-five *hapax legomena* in I Tim. occur in forty-four verses, where the words, for the most part, naturally arise out of the new subjects treated of. The remaining two-thirds of the Epistle have as few *hapax legomena* as any other portion of St. Paul's writings. Compounds of φιλ-, οἰκο-, διδασκ-, often objected to, are also found in his other Epistles.

The "Authorship of the Pastoral Epistles" was discussed in "The Church Quarterly" in October, 1906, and January, 1907. In the first the writer pointed out that the anti-Pauline hypothesis presented more difficulties than the Pauline; and in the second he made a detailed examination of the *hapax legomena*. Seventy-three of these are found in the Septuagint, of which St. Paul was a diligent student, and any of them might just as well have been used by him as by an imitator. Ten of the remainder are suggested by Septuagint words, e. g. ἀνεξίκακος II Tim., ii, 24, ἀνεξικακία Wisd., ii, 9; ἀντίθεσις I Tim., vi, 20, ἀντίθετος Job, xxxii, 3; αὐθεντεῖν I Tim., ii, 12, αὐθέντης Wisd., xii, 6; γενεαλογία I Tim., i, 4, Tit., iii, 9; γενεαλογεῖν I Par., v, 1; πάροινος I Tim., iii, 3, Tit., i, 7, παροινεῖν Is., xli, 12, etc. Twenty-eight of the words now left are found in the classics, and thirteen more in Aristotle and Polybius. Strabo, born in 66 B. C., enables us to eliminate γραώδης. All these words formed part of the Greek language current up to St. Paul's time and as well known to him as to anybody at the end of the first century. Any word used by an author contemporary with St. Paul may reasonably be supposed to have been as well known to himself as to a subsequent imitator. In this way we may deduct eight of the remaining words, which are common to the Pastorals and Philo, an elder contemporary of St. Paul. In dealing with the fifty remaining words we must recall the obvious fact that a new subject requires a new vocabulary. If this be neglected, it would be easy to prove that Plato did not write the Timæus. Organization and the conduct of practical life, etc., cannot be dealt with in the same words in which points of doctrine are discussed. This fairly accounts for eight words, such as ξενοδοχεῖν, οἰκοδεσποτεῖν, τεκνογονεῖν, φίλανδρος, ἑτεροδιδασκαλεῖν, etc., used by the author. His detestation of the errorists doubtless called forth κενοφονία, λογομαχεῖν, λογομαχία, μεταιολογία, μεταιολόγος, several of which were probably coined for the occasion. The element of pure chance in language accounts for "parchments", "cloak", and "stomach": he had no occasion to speak about such things previously, nor of a pagan "prophet". Seven of the remaining words are dealt with on the modest principle that words formed from composition or derivation from admittedly Pauline words may more reasonably be supposed to come from St. Paul himself than from a purely hypothetical imitator, e. g. αἱρετικός, adj., Tit., iii, 10; αἵρεσις, I Cor., xi, 19; Gal., v, 20; διώκτης, I Tim., i, 13; διώκειν, Rom., xii, 14, etc.; ἐπισωρεύειν, II Tim., iv, 3; σωρεύειν ἐπί Rom., xii, 20; LXX, etc. Five other words are derived from Biblical words and would as easily have occurred to St. Paul as to a later writer. The remaining words, about twenty, are disposed of separately.

'Επιφάνεια instead of παρουσία, for the second coming of Christ, is not against the Pastorals, because St. Paul's usage in this matter is not uniform. We have ἡ ἡμέρα κυρίου in I Thess., v, 2, I Cor., i, 8, v, 5; ἡ ἀποκάλυψις in II Thess., i, 17; and ἡ ἐπιφάνεια τῆς παρουσίας αὐτοῦ in II Thess., ii, 8. Lilley ("Pastoral Epistles", Edinburgh, 1901, p. 48) states that out of the 897 words contained in the Pastorals 726 are common to them and the other books of the New Testament, and two-thirds of the entire vocabulary are found in the other Epistles of St. Paul; and this is the proportion of common words found in Galatians and Romans. The same writer, in his complete list of 171 *hapax legomena* in the Pastorals, points out that 113 of these are classical words, that is, belonging to the vocabulary of one well acquainted with Greek; and it is not surprising that so many are found in these Epistles which were addressed to two disciples well educated in the Greek language. Another point much insisted upon by objectors is a certain limited literary or verbal affinity connecting the Pastorals with Luke and Acts and therefore, it is asserted, pointing to a late date. But in reality this connexion is in their favour, as there is a strong tendency of modern criticism to acknowledge the Lucan authorship of these two books, and Harnack has written two volumes to prove it (see LUKE, GOSPEL OF SAINT). He has now added a third to show that they were written by St. Luke before A. D. 64. When the Pastorals were written, St. Luke was the constant companion of St. Paul, and may have acted as his amanuensis. This intercourse would doubtless have influenced St. Paul's vocabulary, and would account for such expressions as ἀγαθοεργεῖν of I Tim., vi, 18, ἀγαθοποεῖν of Luke, vi, 9, ἀγαθουργεῖν, contracted from αγαθοεργεῖν, Acts, xiv, 17. St. Paul has ἐργαζομένῳ τὸ ἀγαθόν Rom., ii, 10.—From all that has been said, it is not surprising that Thayer, in his translation of Grimm's "Lexicon", wrote: "The monumental misjudgments committed by some who have made questions of authorship turn on vocabulary alone. will deter students, it is to be hoped, from misusing the lists exhibiting the peculiarities of the several books."

D. Objection from style.—"The comparative absence of rugged fervour, the smoother flow, the heaping up of words, all point to another sign-manual than that of Paul" (Ency. Bib.).—Precisely the same thing could be urged against some of St. Paul's other Epistles, and against large sections of the remainder. All critics admit that large portions of the Pastorals are so much like St. Paul's writings that they actually maintain that they are taken from fragments of genuine letters of the Apostle (now lost). Various discordant attempts have been made to separate these portions from the rest, but with so little success that Jülicher confesses that the thing is impossible. On the other hand, it is the general opinion of the best scholars that all three Epistles are from the pen of one and the same writer. That being the case, and it being impossible to deny that portions indistinguishable from the rest are by St. Paul, it follows that the early and universal tradition ascribing the whole of them to the Apostle is correct.

As we pass from one to another of the four groups of St. Paul's Epistles—(1) Thessalonians; (2) Galatians, Corinthians, Romans; (3) Captivity Epistles; (4) Pastorals—we observe considerable differences of style side by side with very marked and characteristic resemblances, and that is precisely what we find in the case of the Pastorals. There are some striking points of connexion between them and Phil., the Epistle probably nearest to them in date; but there are many resemblances in vocabulary, style, and ideas connecting them with portions of all the other Epistles, especially with the practical parts. There are, for instance, forty-two passages connecting I Tim. with the earlier Epistles. The terms are nearly identical, but display an amount of liberty denoting the working of the same independent mind, not a conscious imitation. The Pastorals show throughout the same marks of originality as are found in all the writings of the Apostle. There are similar anacolutha, incomplete sentences, play on words, long drawn periods, like comparisons, etc. The Pastorals are altogether practical, and therefore do not show the rugged fervour of style confined, for the most part, to the controversial and argumentative portions of his large epistles. (See the very valuable book by James, "Genuineness and Authorship of the Pastoral Epistles", London, 1906; also Jacquier, and Lilley.) It may be well to note, in this connexion, that Van Steenkiste, professor at the Catholic Seminary of Bruges, asserted, as long ago as 1876, that the inspiration of the Pastorals and their Pauline authorship would be sufficiently safeguarded if we accepted the view that they were written in the name and with the authority of the Apostle by one of his companions, say St. Luke, to whom he distinctly explained what had to be written, or to whom he gave a written summary of the points to be developed, and that when the letters were finished, St. Paul read them through, approved them, and signed them. This, he thinks, was the way in which "Hebrews", also, was written (S. Pauli Epistolæ, II, 283).

E. Objection from the advanced state of church organization.—This objection is adequately answered in the articles HIERARCHY OF THE EARLY CHURCH, BISHOP, etc. See also "The Establishment of the Episcopate" in Bishop Gore's "Orders and Unity" (London, 1909), 115. The seven, St. Stephen, Philip, etc., were set aside for their ministry by the Apostles by prayer and the laying on of hands. Immediately after this we read that they were filled with the Holy Ghost, and preached with great success (Acts, vi, vii). From St. Luke's usual method we may conclude that a similar ceremony was employed by the Apostles on other occasions when men were set aside to be deacons, presbyters, or bishops. We read of presbyters with the Apostles at an early date in Jerusalem (Acts, xv, 2) and according to the earliest tradition, St. James the Less was appointed bishop there on the dispersion of the Apostles, and succeeded by his cousin Simeon in A. D. 62. Sts. Paul and Barnabas ordained priests in every church at Derbe, Lystra, Antioch of Pisidia, etc. (Acts, xiv, 22). Bishops and priests, or presbyters, are mentioned in St. Paul's speech at Miletus (Acts, xx, 28). In his first Epistle (I Thess., v, 12) St. Paul speaks of rulers who were over them in the Lord,—see also Rom., xii, 8; "governments" are referred to in I Cor., xii, 28, and "Pastors" in Eph., iv, 11. St. Paul wrote "to all the saints in Christ Jesus, who are at Philippi, with the bishops and deacons" (Phil., i, 1).

In Rom., xii, 6–8, 1 Cor., xii, 28, Eph., iv, 11, St. Paul is not giving a list of offices in the Church, but of charismatic gifts (for the meaning of which see HIERARCHY OF THE EARLY CHURCH). Those who were endowed with supernatural and transitory charismata were subject to the Apostles and presumably to their delegates. Side by side with the possessors of such gifts we read of "rulers", "governors", "pastors", and in other places of "bishops", "priests", and "deacons". These, we may lawfully assume, were appointed under the inspiration of the Holy Ghost by the Apostles, by prayer and laying on of hands. Amongst these so appointed before A. D. 64 there were certainly ordained deacons, priests, and possibly bishops also. If so they had bishop's orders, but the limits of their jurisdiction were not as yet, perhaps, very clearly defined, and depended altogether on the will of the Apostles. It is assuredly in the highest degree likely that the Apostles, towards the end of their lives and as the Church extended more and more, ordained and delegated others to appoint such priests and deacons as they had been in the habit of appointing themselves. The earliest tradition shows that such a thing took place in Rome by A. D. 67; and there is nothing more advanced than this in the Pastorals. Timothy and Titus were consecrated delegates to rule with Apostolic authority and appoint deacons, priests, and bishops (probably synonymous in these Epistles).

But a further objection is raised as follows: "The distinctive element, however, i. e. the prominence assigned to Timothy and Titus is intelligible only on the supposition that the author had specially in view the ulterior end of vindicating the evangelic succession of contemporary episcopi and other office bearers where this was liable for various reasons to be challenged. . . . The craving (visible in Clem. Rom.) for continuity of succession as a guarantee of authority in doctrine (and therefore in discipline) underlies the efforts of this Paulinist to show that Timothy and Titus were genuine heirs of Paul" (Ency. Bib., IV).—If this craving is visible in St. Clement of Rome, who was a disciple of the Apostles there and wrote less than thirty years after their death, it is surely more likely that he was maintaining an organization established by them than that he was defending one of which they were ignorant. If these Epistles were written against people who challenged the authority of bishops and priests about A. D. 100, why is it that these opponents did not cry out against forgeries written to confute themselves? But of all this there is not the slightest shred of evidence.

F. Objection. No room for them in the life-time of St. Paul.—The writer in the "Ency. Bib." is never tired of accusing the defenders of the Epistles of making gratuitous assumptions, though he allows himself considerable liberty in that respect throughout his article. It is a gratuitous assertion, for example, to state that St. Paul was put to death at the end of the first Roman captivity, A. D. 63 or 64. Christianity was not yet declared a *religio illicita*, and according to Roman law there was nothing deserving of death against him. He was arrested to save him from the Jewish mob in Jerusalem. The Jews did not appear against him during the two years he was kept in prison. Agrippa said he could have been delivered had he not appealed to Cæsar, so there was no real charge against him when he was brought before the emperor's or his representative's tribunal. The Epistles written during this Roman captivity show that he expected to be soon released (Philem., 22; Phil., ii, 24). Lightfoot, Harnack, and others, from the words of Clem. Rom. and the Muratorian Fragment, think that he was not only released, but that he actually carried out his design of visiting Spain. During the years from 63–67 there was ample time to visit Crete and other places and write I Tim. and Titus. II Tim. was written from his second Roman prison soon before his death.

G. Objection from the errors condemned.—It is said that the errors referred to in the Pastorals did not exist in St. Paul's time, though the most advanced critics (Ency. Bib.) have now abandoned the theory (maintained with great confidence in the nineteenth century) that the Epistles were written against Marcion and other Gnostics about the middle of the second century. It is now conceded that they were known to Sts. Ignatius and Polycarp, and therefore written not later than the end of the first century or early part of the second. It requires a keen critical sense to detect at that time the existence of errors at the time of Ignatius, the seeds of which did not exist thirty or forty years earlier, or of which St. Paul could not have foreseen the development. "The environment is marked by incipient phases of what afterwards blossomed out into the Gnosticism of the second century" (Ency. Bib.):—but the incipient phases of Gnosticism are now placed by competent scholars at a much earlier date than that indicated by this writer. No known system of Gnosticism corresponds with the errors mentioned in the Pastorals; in reply to this, however, it is said that the "errors are not given in detail to avoid undue anachronisms" (ibid.). Sometimes opponents of the authenticity unfairly attack the actual contents, but here the Epistles are condemned for "contents" which they do not contain. An amusing instance of the precariousness of the subjective method is seen in this same article (Ency. Bib.). The writer arguing against the Epistles on the subject of greetings says that "Philemon is the one private note of Paul extant". We are suddenly brought up, however, by a note (editorial?) within square brackets: "compare, however, Philemon." On turning to Philemon we find van Manen asserting, with equal confidence, that the Apostle had nothing whatsoever to do with that Epistle, and he supports his statement by the same kind of subjective arguments and assertions that we find running through the article on Timothy and Titus. He even throws out the absurd suggestion that Philemon was based on the letter of Pliny, which is given in full by Lightfoot in his edition of Philemon.

Hort in his "Judaistic Christianity" (London, 1898), 130–48, does not believe that the errors of the Pastorals had any connexion with Gnosticism, and he gives a very full reply to the objection with which we are dealing. With Weiss he clears the ground by making some important distinctions: (1) We must distinguish prophecies about future false teachers, which imply that germs, to say the least, of the future evils are already perceptible (I Tim., iv, 1–3; II Tim., iii, 1–5, iv, 3) from warnings about the present; (2) The perversities of individuals like Alexander, Hymenæus, and Philetus must not be taken as direct evidence of a general stream of false teaching; (3) Non-Christian teachers, the corrupters of Christian belief, must not be confounded with misguided Christians. The errors which St. Paul easily foresaw would arise amongst false Christians and pagans cannot be urged against the Epistles as if they had already arisen. Hort makes out a good case that there is not the smallest trace of Gnosticism in the existing errors amongst the Ephesian and Cretan Christians, which are treated more as trivialities than serious errors. "The duty laid on Timothy and Titus is not that of refuting deadly errors, but of keeping themselves clear, and warning others to keep clear of mischievous trivialities usurping the office of religion." He shows that all these errors have evident marks of Judaistic origin. The fact that St. Irenæus, Hegesippus, and others used the words of the Pastorals against the Gnostics of the second century is no proof that Gnosticism was in the mind of their author. Words of Scripture have been employed to confute heretics in every age. This, he says, is true of the expressions *ψευδώνυμος γνῶσις*, *ἄφθαρτος*, *αἰών*, *ἐπιφάνεια*, which have to be taken in their ordinary sense. "There is not the faintest sign that such words have any reference to what we call Gnostic terms."

Hort takes *γενεαλογίαι* in much the same sense in which it was employed by Polybius, IX, ii, 1, and Diodorus Siculus, IV, i, to mean stories, legends, myths of the founders of states. "Several of these early historians, or 'logographers' are known to have written books of this kind entitled *Γενεαλογίαι*, *Γενεαλογικά* (e. g. Hecatæus, Acusilanus, Simonides the Younger, who bore the title *ὁ Γενεαλόγος*, as did also Pherecydes)" (p. 136). Philo included under *τὸ γενεαλογικόν* all primitive human history in the Pentateuch. A fortiori this term could be applied by St. Paul to the rank growth of legend respecting the Patriarchs, etc., such as we find in the "Book of Jubilees" and in the "Haggada". This was condemned by him as trashy and unwholesome. The other contemporary errors are of a like Jewish character. Hort takes *ἀντίθεσις τῆς ψευδωνύμου γνώσεως* to refer to the casuistry of the scribes such as we find in the "Halacha", just as the *μῦθοι* and *γενεαλογίαι* designate frivolities such as are contained in the Haggada.

But is it not possible that these (*ἀντιθέσεις τῆς ψευδωνύμου γνώσεως*) refer to the system of interpretation developed later in the Kabbala, of which a convenient description is given in Gigot's "General Introduction to the Study of the Holy Scriptures", p. 411? (see also "Kabbala" in "Jewish Encyclopedia" and Vigoroux, "Dict. de la Bible"). He who followed only the literal meaning of the text of the Hebrew Bible had no real knowledge, or *γνῶσις*, of the deep mysteries contained in the letters and words of Scripture. By *notarikon* words were constructed from the initials of several, or sentences formed by using the letters of a word as initials of words. By *ghematria* the numerical values of letters were used, and words of equal numerical value were substituted for each other and new combinations formed. By *themura* the alphabet was divided into two equal parts, and the letters of one half on being substituted for the corresponding letters of the other half, in the text, brought out the hidden sense of the Scripture. These systems date back to time immemorial. They were borrowed from the Jews by the Gnostics of the second century, and were known to some of the early Fathers, and were probably in use before Apostolic times. Now *ἀντίθεσις* may mean not only opposition or contrast, but also the change or transposition of letters. In this way *ἀντίθεσις τῆς ψευδωνύμου γνώσεως* would mean the falsely-called knowledge which consists in the interchange of letters just referred to.

Again, we read: "The mischievous feature about them was their presence within the churches and their combination of plausible errors with apparent, even ostentatious, fidelity to principles of the faith—a trouble elsewhere reflected Acts XX. 29f, in connexion with the Ephesian church towards the end of the first century" (Ency. Bib.). We do not admit that Acts, xx, was written towards the end of the first century. The best scholars hold it was written by St. Luke long before; and so the critics of the Epistles, having without proof dated the composition of a genuine early New-Testament book at the end of the first century, on the strength of that performance endeavour to discredit three whole books of Scripture.

I. Miscellaneous objections.—We bring together under this heading a number of objections that are found scattered in the text, foot-notes, sub-foot-notes, of the article in the "Ency. Bib."—(1) "The concern to keep the widow class under the bishop's control is thoroughly sub-apostolic (cp. Ign. ad Polycarp. iv. 5)".—That would not prove that it was not Apostolic as well. On reading the only passage referring to widows (I Tim., v) we get a totally different impression from the one conveyed here. The great aim of the writer of the Epistle appears to be to prevent widows from becoming a burden on the Church, and to point out the duty of their relatives to support them. Thirty years before the death of St. Paul the Seven were appointed to look after the poor widows of Jerusalem; and it is absurd to suppose that during all that time no regulations were made as to who should receive support, and who not. Some few of those who were "widows indeed" probably held offices like deaconesses, of whom we read in Rom., xvi, 1, and who were doubtless under the direction of the Apostles and other ecclesiastical authorities. The supposition that nothing was "done in order", but that everything was allowed to go at random, has no support in St. Paul's earlier Epistles.

(2) "The curious antipathy of the writer to second marriages on the part of the presbyters, episcopi, diaconi, and widows (χήραι) is quite un-Pauline, but corresponds to the more general feeling prevalent in the second century throughout the churches."—That state of feeling throughout the churches in the second century should make an objector pause. Its Apostolic origin is its best explanation, and there is nothing whatsoever to show that it was un-Pauline. It was St. Paul who wrote as follows at a much earlier date (I Cor., vii): "I would that all men were even as myself: . . . But I say to the unmarried, and to the widows: It is good for them if they so continue, even as I . . . But I would have you to be without solicitude. He that is without a wife, is solicitous for the things of the Lord, how he may please God. But he that is with a wife, is solicitous for the things of the world, how he may please his wife: and he is divided . . . He that giveth his virgin in marriage, doth well; and he that giveth her not, doth better." It would be rash to suppose that St. Paul, who wrote thus to the Corinthians, in general, could not shortly before his death require that those who were to take the place of the Apostles and hold the highest offices in the Church should not have been married more than once.

(3) "The distinctive element, however, i. e. the prominence assigned to Timothy and Titus, is intelligible only on the supposition that the author had specially in view the ulterior end of vindicating the legitimate evangelic succession of contemporary episcopi and other office-bearers in provinces where this was liable for various reasons to be challenged" (in the beginning of the second century).—Thousands have read these Epistles, from their very first appearance until now, without such a conclusion suggesting itself to them. If this objection means anything it means that the Apostles could not assign prominent positions to any of their disciples or delegates; which runs counter to what we read of Timothy and Titus in the earlier Epistles of St. Paul.

(4) "The prominence given to 'teaching' qualities shows that one danger of the contemporary churches lay largely in the vagaries of unauthorized teachers (Did., xvi). The author's cure is simple: Better let the episcopus himself teach! Better let those in authority be responsible for the instruction of the ordinary members! Evidently teaching was not originally or usually (I Tim., v, 17) a function of presbyters, but abuses had led by this time, as the Didache proves, to a need of combining teaching with organised church authority."—What a lot of meaning is read into half a dozen words of these Epistles! In the very first Epistle that St. Paul wrote we read: "And we beseech you, brethren, to know them who labour among you, and are over you in the Lord, and admonish you: That you esteem them more abundantly in charity, for their work's sake" (I Thess., v, 12–13). The capacity for teaching was a gift, probably a natural one working through God's grace for the good of the Church (see HIERARCHY OF THE EARLY CHURCH), and there was no reason why the Apostle, who attached so much importance to teaching when speaking of his own work, should not require that those who were selected to rule the Churches and carry on his work should be endowed with the aptitude for teaching. In Eph., iv, 11, we find that the same persons were "pastors and doctors". The writer who makes this objection does not admit that real bishops and priests existed in Apostolic times; so this is what his assertion implies: When the Apostles died there were no bishops and priests. After some time they originated somewhere and somehow, and spread all over the Church. During a considerable time they did not teach. Then they began to monopolize teaching, and the practice spread everywhere, and finally the Pastorals were written to confirm this state of affairs, which had no sanction from the Apostles, though these bishops thought otherwise. And all this happened before St. Ignatius wrote, in a short period of thirty or forty years, a length of time spanned say from 1870 or 1880 till 1912—a rapid state of development indeed, which has no documentary evidence to support it, and which must have taken place, for the most part, under the very eyes of the Apostles St. John and St. Philip, and of Timothy, Titus, Clement, Ignatius, Polycarp, and other disciples of the Apostles. The early Christians had more respect for Apostolic traditions than that.

(5) "Baptism is almost a sacrament of salvation (Tit., iii, 5)."—It is quite a sacrament of salvation, not only here, but in the teaching of Christ, in the Acts, and in St. Paul's Epistles to the Romans, I Corinthians, Galatians, and Colossians, and in I Pet., iii, 21.

(6) "Faith is tending to become more than ever *fides quæ creditur.*"—But it appears as *fides qua creditur* in I Tim., i, 2, 4, 5, 14; ii, 7, 15; iii, 9, 13; iv, 6, 12; vi, 11; II Tim., i, 5, 13; ii, 18, 22; iii, 10, 15; Tit., ii, 2, etc., while it is used in the earlier Epistles not only subjectively but also objectively. See πίστις in Preuschen, "Handwörterbuch zum griech. N. Testament." Faith is *fides quæ creditur* only nine times out of thirty-three passages where πίστις occurs in the Pastorals.

(7) "The church to this unmystical author is no longer *the bride* or *the body* of Christ but God's building or rather *familia dei*, quite in the neo-Catholic style." There are several genuine Epistles of St. Paul in which the Church is neither called the body nor the bride of Christ, and in calling it a building he was only following his Master who said: "On this rock I will build my Church." The idea of a spiritual building is quite Pauline. "For we know, if our earthly house of this habitation be dissolved, that we have a building of God, a house not made with hands, eternal in heaven" (II Cor., v, 1); "And I have so preached this gospel, not where Christ was named, lest I should build upon another man's foundation" (Rom., xv, 20); "For if I build up again the things which I have destroyed, I make myself a prevaricator" (Gal., ii, 18); "Let us work good to all men, but especially to those who are of the household of the faith" (Gal., vi, 10); "You are fellow citizens with the saints, and the domestics of God, built upon the foundation of the apostles and prophets, Jesus Christ himself being the chief corner stone: in whom all the building, being framed together, groweth up into a holy temple in the Lord. In whom you also are built together into an habitation of God in the Spirit" (Eph., ii, 19–22); "You are God's building. According to the grace of God that is given to me as a wise architect, I have laid the foundation. . . . Know you not, that you are the temple of God, and that the Spirit of God dwelleth in you?" (I Cor., iii, 9–17; compare I Pet., ii, 5; "Be you also as living stones built up, a spiritual house"; and I Pet., iv, 17: "For the time is, that judgment should begin at the house of God. And if first at us, what shall

be the end of them that believe not the gospel of God?") There is a development in St. Paul's use of the comparisons body and bride, which is exactly paralleled by his use of the words building and temple. They are applied first to individuals, then to communities and finally to the whole Church (see Gayford in Hast., "Dict. of the Bibl.", s. v. Church).

(8) "Items of the creed, now rapidly crystallizing in Rome and Asia Minor, are conveyed partly in hymnal fragments, which like those in the Apocalypse of John, sprang from the cultus of the churches.'' There are fragments of the Creed in I Cor. (see CORINTHIANS, EPISTLES TO THE, *The First Epistle—Its teaching*), and there were hymns in use several years before St. Paul's death. He wrote to the Colossians (iii, 16): "Let the word of Christ dwell in you abundantly, in all wisdom: teaching and admonishing one another in psalms, hymns, and spiritual canticles" (cf. Eph., v, 19). The objections from the "Faithful Sayings" are fully answered in James, "The Genuineness of the Pastorals" (London, 1906), 132–6.

(9) "No possible circumstances could make Paul oblivious (through three separate letters) of God's fatherhood, of the believing man's union with Jesus, of the power and witness of the Spirit, or of reconciliation.'' These doctrines are not quite forgotten: I Tim., i, 15; ii, 6; II Tim., i, 2, 9; ii, 13; Tit., i, 4; iii, 4, 5, 7. There was no necessity to dwell upon them as he was writing to disciples well acquainted with his teaching, and the purpose of the Epistles was to meet new problems. Besides, this objection could be brought against large portions of the genuine Epistles.

There are several other objections but they are so flimsy that they cannot present any difficulty. What Sanday wrote in 1896 in his "Inspiration" (London) is still true: "It may be asserted without fear of contradiction that nothing really un-Pauline has been proved in any of the disputed epistles."

II. *External Evidence.*—The Pauline authorship of the Pastorals was never doubted by Catholics in early times. Eusebius, with his complete knowledge of early Christian literature, states that they were among the books universally recognized in the Church τὰ παρὰ πᾶσιν ‘ομολογούμενα ("Hist. eccl.", II, xxii, III, iii; "Præp. evang.", II, xiv, 7; xvi, 3). They are found in the early Latin and Syriac Versions. St. Clement of Alexandria speaks of them (Strom., II, III), and Tertullian expresses his astonishment that they were rejected by Marcion (Adv. Marcion, V, xxi), and says they were written by St. Paul to Timothy and Titus; evidently their rejection was a thing hitherto unheard of. They are ascribed to St. Paul in the Muratorian Fragment, and Theophilus of Antioch (about 181) quotes from them and calls them the "Divine word" (θεῖος λόγος). The Martyrs of Vienne and Lyons (about 180) were acquainted with them; and their bishop, Pothinus, who was born about A. D. 87 and martyred in 177 at the age of ninety, takes us back to a very early date. His successor, St. Irenæus, who was born in Asia Minor and had heard St. Polycarp preach, makes frequent use of the Epistles and quotes them as St. Paul's. He was arguing against heretics, so there could be no doubt on either side. The Epistles were also admitted by Heracleon (about 165), Hegesippus (about 170), St. Justin Martyr, and the writer of the "Second Epistle of Clement" (about 140). In the short letter which St. Polycarp wrote (about 117) he shows that he was thoroughly acquainted with them. Polycarp was born only a few years after the death of Saints Peter and Paul, and as Timothy and Titus, according to the most ancient traditions, lived to be very old, he was their contemporary for many years. He was Bishop of Smyrna, only forty miles from Ephesus, where Timothy resided. St. Ignatius, the second successor of St. Peter at Antioch, was acquainted with Apostles and disciples of the Apostles, and shows his knowledge of the Epistles in the letters which he wrote about A. D. 110. Critics now admit that Ignatius and Polycarp knew the Pastorals (von Soden in Holtzmann's "Hand-Kommentar", III, 155; "Ency. Bib.", IV); and there is a very strong probability that they were known also to Clement of Rome, when he wrote to the Corinthians about A. D. 96.

In judging of the early evidence it should be borne in mind that all three Epistles claim to be by St. Paul. So when an early writer shows his familiarity with them, quotes them as authoritative and as evidently well known to his readers, it may be taken as a proof not only of the existence and widespread knowledge of the Epistles, but that the writer took them for what they claim to be, genuine Epistles of St. Paul; and if the writer lived in the time of Apostles, of Apostolic men, of disciples of Apostles, and of Timothy and Titus (as did Ignatius, Polycarp, and Clement) we may be sure that he was correct in doing so. The evidence of these writers is, however, very unceremoniously brushed aside. The heretic Marcion, about A. D. 150, is held to be of much more weight than all of them put together. "Marcion's omission of the pastorals from his canon tells heavily against their origin as preserved in tradition. Philemon was accepted by him, though far more of a private note than any of the pastorals; and the presence of elements antagonistic to his own views need not have made him exclude them, since he could have easily excised these passages in this as in other cases" (Ency. Bib., IV). Marcion rejected the whole of the Old Testament, all the Gospels except St. Luke's, which he grossly mutilated, and all the rest of the New Testament, except ten Epistles of St. Paul, texts of which he changed to suit his purposes. Philemon escaped on account of its brevity and contents. If he crossed out all that was objectionable to him in the Pastorals there would be little left worth preserving. Again, the testimony of all these early writers is regarded as of no more value than the opinion of Aristotle on the authorship of the Homeric poems (ibid.). But in the one case we have the chain of evidence going back to the times of the writer, of his disciples, and of the persons addressed; while Aristotle lived several hundred years after the time of Homer. "The early Christian attitude towards 'Hebrews' is abundant evidence of how loose that judgment [on authorship] could be" (ibid.). The extreme care and hesitancy, in some quarters, about admitting the Pauline authorship of the Epistle to the Hebrews (q. v.) when contrasted with the universal and undoubting acceptance of the Pastorals tells strongly in favour of the latter.

Test. by CORNELY, SALMON, and other Scriptural scholars; HEADLAM in *Church Congress Reports* (London, 1904); *The Church Quart. Rev.* (October, 1906; January, 1907); BISPING, *Erklärung der drei Past.* (Münster, 1866); WEISS, *Tim. und Tit.* (Göttingen, 1902); BERNARD, *The Pastoral Epistles* (Cambridge, 1899); LILLEY, *The Pastoral Epistles* (Edinburgh, 1901); GORE, *Orders and Unity* (London, 1909); WORKMAN, *The Hapax Legomena of St. Paul* in *Expository Times*, VII (1896), 418· HORT, *Judaistic Christianity* (London, 1898); BELSER, *Die Briefe des Apostels Paulus an Timoth. u. Titus* (Freiburg); KNOWLING has a good defence of the Pastorals in *The Testimony of St. Paul to Christ;* see also his article in the *Critical Review* (July, 1896); RAMSEY, *Expositor* (1910).

C. AHERNE.

Timucua Indians, a principal group or confederacy of ancient Florida, notable for the successful missions established among them by the Spaniards and subsequently utterly destroyed by the English of Carolina and their savage Indian allies. The name—written also *Atimuca*, *Thimapoa*, *Tomoco*, by the Spaniards, French, and English respectively—appears to be derived from a word in their own language, *atimoqua*, "lord, or chief", and was probably a title mistaken by the early Spaniards for the name of the chief or tribe.

Habitat.—The cognate tribes of the Timucuan linguistic stock held all of north Florida from about Cape Canaveral and Tampa Bay on the south to beyond the St. Mary's River on the north and westward to about the Ocilla River, where they bordered upon the celebrated Apalachee, of another (Muskhogean) stock. The tribes forming the Timucua group proper centred chiefly along the St. John's River, the principal being the Timucua along the upper part of the river and about the present St. Augustine, whose chief, known to the French as Outina, had his settlement about the present Welaka, and ruled some forty villages, with perhaps 6000 souls. On the lower course of the river were the Satuniba, the enemies of the Timucua and nearly as numerous, and west of them, toward the Suwanee River, were the Potano, with over a thousand warriors or perhaps four thousand souls. Several other tribes were of minor importance.

Customs.—The Timucua were sedentary and semi-agricultural, but depended largely upon game, fish, wild fruits, and bread prepared from the starchy *koonti* root. Their houses were circular, of upright poles, thatched with palmetto leaves, and with granaries elevated on stakes to keep them out of reach of wild animals. Their villages were strongly stockaded and each important settlement had a large central town-house of logs, for tribal ceremonies and the reception of guests. They had large dug-out canoes. Their pottery, the work of the women, was of the finest type found east of the Mississippi. The principal weapon of the warriors was the bow, and a sort of spade-shaped club of hard wood. The numerous embankments and ancient roadways found in their country may be due in part to Spanish influence. Women wore a short fringed skirt, perhaps of some bark fibre, with their hair flowing loosely. Men went naked, except for the breechcloth, but had the whole body elaborately tattooed. They bunched the hair in a knot on top of the head, and wore inflated fish-bladders through holes in their ears. They were tall and well-made, described as of great strength and agility and remarkable swimmers.

The government by the chiefs was despotic, as was frequently the case among the Gulf State tribes. There were two hereditary classes, nobles, or chiefs, and common people, and each tribe was organized into clans or hereditary family groups, usually bearing animal names. This clan system was so much interwoven with the tribal life that it persisted even under the mission system. Prisoners of war and their descendants constituted a slave class. Their military organization and methods were superior to what was found among the northern tribes. Scalping and mutilation of the slain enemy were universal, and the dismembered limbs were carried from the field as trophies or to serve for cannibal feasts. Polygamy was customary. Gross sensuality was prevalent. The chief gods were the Sun and the Moon, the Deer and other animals. They were extremely ceremonious, celebrating planting and harvest seasons, fishing and hunting expeditions, the going and return of war parties, marriages and funerals, each with special rites of prayer, fasting, feasting, dancing and purification by means of the "black drink" brewed from the leaves of the *Ilex cassine.* On certain great ceremonial occasions the first-born male infants of the tribe were delivered up by their mothers to be sacrificed to the Sun, in whose honour also a sacred fire was kept always burning in their temples. The dead were buried in the ground with protracted mourning rites, which included fasting and cutting off the hair. Over the body of a dead chief was raised a mound of earth upon which was placed his shell drinking cup, surrounded by a circle of arrows stuck in the ground. From the pictures of the artist Le Moyne we get a vivid idea of the appearance and customs of the Timucua tribes, while the questions in Father Pareja's "Confessionario" throw curious light upon their beliefs, tabus, and ceremonial observance.

History.—The history of the Timucua tribes begins with the landing of the ill-fated Ponce de Leon near the present St. Augustine in 1513. The expeditions of Narvaez in 1528 and de Soto in 1539–41, landing at Tampa Bay, passed through the territory of the cognate tribes, but did not encounter the Timucua proper. In 1562–64 the French Huguenots under Ribault and Laudonnière attempted settlements at the mouth of St. John's River, explored the middle course of the stream, and made acquaintance with the principal tribes. In 1565 the Spaniards under Menendez destroyed the French posts, butchering all the defenders, immediately after which Menendez founded the city of St. Augustine and began the permanent colonization of the country. Jesuit missionaries arrived and began their labours, but seem to have devoted their attention chiefly to the coast tribes of South Carolina, Virginia, and western Florida, probably because of the fact that the Indians of the St. John's region had been won over by the French and for a long time resisted the Spanish occupation. In 1573 a party of Franciscan missionaries arrived at St. Augustine, where some of their order had been from the beginning, and proceeded to organize work among the Indians of the vicinity. The work met a serious check from the recall of Governor Menendez to Spain, where he died in 1574, but in 1594, on request of Father Marron, custos of the Franciscan convent at St. Augustine, twelve other priests of the order were sent out, and the labour of Christianizing the Timucua was taken up with vigour.

Among those who arrived with this party was the noted Father Francisco Pareja, to whom we are indebted for almost all that is known of the language and customs of the tribe. He was stationed at first among the Yamassee on the Georgia coast, in whose language, according to Shea, he composed a summary of Christian doctrine. Later he was in charge at the Timucua mission of San Juan, apparently on Little Talbot Island, north of St. Augustine, and later still was custos of the monastery in that city, until transferred to the Mexican province in 1610, where he died in 1628. His various works in the Timucua language were published in Mexico. Of the priests who arrived from Spain with Father Pareja, several went to the Yamassee, while the others devoted attention to the Timucua, whose principal mission settlements were San Juan, already mentioned; San Pedro, on Cumberland Island; San Mateo, probably about the mouth of the St. John's; and Santa Lucia de Acuera, south of Cape Canaveral; besides the settlement immediately adjoining St. Augustine. The more western cognate Potano tribe, being hostile alike to the Timucua and the Spaniards, were not Christianized until a much later period, but were also brought likewise into the mission fold. In 1597 the mission growth was interrupted by a disastrous revolt of the Yamassee in which several missionaries lost their lives, the Christian Timucua being also attacked. Some years later, however (1612?), following a visit from the Bishop of Havana in 1602, Florida was erected into a Franciscan province, under the name of Santa Elena. From 1612 to 1615 inclusive, 43 Franciscans were added to the workers in addition to those already on the ground.

In 1655 the Christian Indian population of the Florida province, which included north Florida and the coast country of Georgia and South Carolina, was estimated at 26,000 souls, chiefly among the Timucua, Apalachee, and Yamassee. In 1687 a second outbreak of the Yamassee, apparently instigated by the English of Carolina, who claimed northern Florida within their chartered limits, resulted in the removal of that tribe bodily into (South) Carolina. In 1715 the same restless people headed a war against the English, resulting in their own expulsion and return to Florida. In 1688, following the outbreak of the Yamassee, by which the Timucua missions had also suffered, the chiefs of the latter tribe, as also the Apalachee chiefs, forwarded to the King of Spain an address of loyalty and of commendation for their Spanish governor. These documents, in the Indian and Spanish languages, are still in existence. The Timucua address is signed by the chiefs of five towns, San Mateo, San Pedro, Asile, Machaua, and San Juan de Guacara. In 1699 the Quaker Dickenson, from Philadelphia, shipwrecked on the south coast of Florida and rescued from the savages by the Spanish governor at St. Augustine, was sheltered for a time at the Timucua missions, and has left us a pleasant picture of their prosperous and orderly condition, and the friendly and religious character of their occupants, in striking contrast to that of the unchanged barbarians among whom he had been a prisoner.

It was near the end. The growing hostility of the Carolina colony instigated the Creeks and other heathen tribes to constant inroads upon the Florida missions, furnishing them with arms and ammunition for the purpose, with the further inducement of a profitable sale for all captives to supply the Carolina slave market. Even as early as 1699 Carolina slaves were thus decimating the Indian tribes as far even as the Mississippi. While the wild tribes were thus armed and encouraged in their raids by the English, the Christian mission Indians, on the contrary, in accordance with a fixed, but suicidal, rule of the Spanish colonial government, were refused the use of firearms, even in self-defence and on their most urgent appeal.

In May, 1702, war having again been declared between the two home governments, the Creek allies of the English raided Santa Fe mission of the Timucua and burned the church. Later in the same year a combined English and Indian force from Carolina under Governor Moore, co-operating with a naval force, destroyed three flourishing Timucua missions along the coast—the same where Dickenson had been so hospitably cared for—burned the churches and carried off the missionaries, and then, going farther south, burned St. Augustine, with the church, convent, and library. The fortress held out until relieved by a Spanish fleet. In 1704 Moore invaded the Apalachee country with some fifty Carolina men and a thousand savage Creek, Catawba, and Yamassee, all armed with guns, and completely destroyed ten of the eleven missions towns, with their churches and orange groves, carrying off or destroying the vestments and sacred vessels. Four priests, a Spanish officer, and four soldiers were killed, and their bodies hacked to pieces, two of the missionaries being tortured and burned at the stake. Several hundred Apalachee warriors were killed and 1400 of the tribe carried away as slaves. In 1706 a similar raid into the Timucua country completed the ruin of the missions. The remnant of the Apalachee fled for protection to the French at Mobile. The scattered Timucua were gathered together and formed into small settlements under the walls of St. Augustine. With the English colonization of Georgia and the ensuing war of 1740 all attempt at rehabilitating the Florida missions was abandoned. In 1753 only 136 Indians remained in the vicinity of St. Augustine. On the English occupation in 1763 they were expelled from their two villages and again became refugees. Somewhat later these, or a kindred remnant, were colonized at a new settlement called Pueblo de Atimucas, on Tomoco River, near Mosquito lagoon, in the present Volusia county. A few seem to have resided there as late as the transfer of the territory to the United States in 1821 and it is possible that their descendants may still be found among the Seminole of Florida or Oklahoma.

Language.—With the exception of the Timucua-Spanish document of 1688, already referred to, of which a copy was printed by Buckingham Smith in 1859, and another, with English translation, by Gatschet in 1880 (Am. Philos. Soc. Proc., XVIII), our knowledge of the Timucua language and dialects, as of the tribal customs and beliefs, rests almost entirely upon the works of Father Pareja and of Father Gregorio de Monilla, missionary in the same order and tribe, with the analysis deduced thereupon by Gatschet. A few words, mostly personal or place names, also occur in the early French and Spanish historians. Father Pareja's works include: "Cathecismo en lengua Castellana y Timuquana" (Mexico, 1612); "Catechismo y breve exposicion de la doctrina Cristiana . . . en Lengua Castellana y Timuquana" (Mexico, 1612); "Confessionario en Lengua Timuquana" (Mexico, 1612); "Confessionario en lengua Castellana y Timuquana" (Mexico, 1613); "Gramatica [or Arte?] de la Lengua Timuquana" (Mexico, 1614); "Catecismo de la Doctrina cristiana en dicha [Timuquana] Lengua" (Mexico, 1617); "Catechismo y Examen . . . en Lengua Castellana y Timuquana" (Mexico, 1627). The works of Father Monilla include an "Explicacion de la Doctrina . . . en Lengua Floridiana" (Madrid, 1631?, and Mexico, 1635–36); and a "Forma Breve de administrar los Sacramentos . . . en lengua Floridiana" (Mexico, 1635). Of these works the Pareja "Catechismo" (1612), "Catechismo y breve exposicion" (1612), and "Confessionario" (1613), and the Monilla "Explicacion" (1635–36), and "Forma breve" (1635) form the subject of an extended study of "The Timucua Language" by Dr. Albert S. Gatschet, in the "Proceedings of the American Philosophical Society", vols. XVI–XVIII, Philadelphia, 1877–1880.

James Mooney.

Tincker, Mary Agnes, novelist, b. at Ellsworth, Maine, 18 July, 1833; d. at Boston, Massachusetts, 4 Dec., 1907. At the age of thirteen she began teaching in the public schools. At fifteen her first literary work was printed. At twenty she became a Catholic, and even her Protestant relatives shared in her sufferings from Knownothing bigotry. In 1863 she became a volunteer war nurse, serving in Washington until she grew ill. Boston then became her home. Short stories from her pen appeared in the early numbers of "The Catholic World", where also her first novel "The House of Yorke" was issued as a serial (1871–72). It was followed by "Grapes and Thorns" (1873–74) and "Six Sunny Months" (1876–77). The latter was the first fruit of her sojourn in Italy (1873–87). These three novels sounded a distinctly new note in Catholic literature, and the highest that has been struck by an American Catholic novelist. "Signor Monaldini's Niece" (1879), in "No Name" series; "By the Tiber" (1881); "The Jewel in the Lotus" (1884); "Aurora" (1885); "The Two Coronets" (1887); "San Salvador" (1889); were issued by the most prominent literary publishers and won her great fame as works of real art. They reflected for the most part the beauty of Italy. A lapse from the practice of her religion cast its shadow perhaps over a few of her novels written during that time. She returned to her religious duties many years before her death. Her last book, fittingly called "Autumn Leaves" (1898), was issued by a Catholic firm, and contained matter contributed not long before to "The Catholic World".

Tingis, a titular see of Mauretania Tingitana (the official list of the Roman Curia places it in Mauretania Cæsarea). Tingis, now Tangier, is an ancient Phœnician town; Greek legend ascribes its foundation to the giant Antæus, whose tomb and skeleton are pointed out in the vicinity, or to Sophax, son of Hercules and the widow of Antæus. The coins call it Tenga, Tinga, and Titga, the Greek and Latin authors giving numerous variations of the name. Under the Romans this commercial town became, first, a free city and then, under Augustus, a colony (*Colonia Julia*, under Claudius), capital of Mauretania Tingitana. Portuguese in the fifteenth century, Spanish in the sixteenth, it became an English possession by the marriage of Charles II with the Infanta Catharine of Portugual. The English vacated it in 1684. When it was bombarded by the Prince de Joinville in 1844, it belonged to Morocco. The natives call it Tandja. It has about 40,000 inhabitants, of whom half are Mussulmans, 10,000 Jews, 9000 Europeans (7500 Spanish). Towards the end of the third century Tangier was the scene of the martyrdom of St. Marcellus, mentioned in the Roman Martyrology on 30 October, and of St. Cassian, mentioned on 3 December. It is not known whether it was a diocese in ancient times. Under the Portuguese domination it was a suffragan of Lisbon, and in 1570 was united to the Diocese of Ceuta. Six of its bishops are known, the first, who did not reside in his see, in 1468. Tangier is now the residence of the Prefect Apostolic of Morocco, which mission is in charge of the Friars Minor. It has a Catholic church, several chapels, schools, and a hospital.

Tinin (Knin), See of, in Dalmatia, suffragan to Kalocsa-Bacs. Knin is a town on the right bank of the Kerka, twenty-five miles north-east of Sebenico. It was fortified by the Romans, who called it Ardula. At the request of Casimir IV, King of Croatia in 1050, a Bishopric of Knin was created, suffragan to Spalato; the bishop seems to have been attached to the court as preacher. Farlati in his "Illyricum sacrum", IV (Venice, 1775), gives a history of the prelates of Knin, from Mark in 1050 to Joseph in 1755. The residential succession was interrupted by the Saracen invasion in 1622; when Venice captured the district in 1768, the Bishop of Sebenico was appointed to administer the diocese, which was united in 1828 to Sebenico. The ruins of the old Cathedral of St. John the Evangelist are still visible. To-day the see is suffragan to Kalocsa-Bacs, according to the "Schematismus" of Kalocsa (1909); the "Gerarchia cattolica" says the see is merely titular, and this would explain the absence of statistics. The bishop, Monsignor Joseph Lányi, who resides at Nagy-Várad, was born at Német-Prona, Diocese of Neusohl, 29 June, 1868; ordained, 2 July, 1891; Abbot of St. Saviour's and canon of Nagy-Várad; appointed bishop, 7 Nov., 1906, in succession to Monsignor John Maiorosy (b. at Al-Debro, Archdiocese of Eger, 10 July, 1831; appointed, 27 July, 1885)

A. A. MacErlean.

Tinos and Mykonos, Diocese of (Tinensis et Myconensis), a Latin diocese of the Cyclades, containing over 126 square miles and numbering 13,000 inhabitants. It is called "verdant" though it is so only in comparison with the other Greek islands more arid than itself. In ancient times it was called Hydrussa, i. e. abounding in water, though this is scarcely credible, and Ophiussa because of the number of serpents which inhabited it. Near the river there was a celebrated temple of Poseidon, discovered in 1902. The island subjected itself to Xerxes at the time of his expedition against the Greeks, but afterwards defected to Salamais and Platæa; it became finally subject to Athens, then to Alexander of Pheræ, afterwards to the Rhodians, to whom it was given by Marcus Antonius, later to the Romans. It is not known when Christianity was established there. Le Quien (Oriens Christianus, I, 943) mentions three early bishops; Ecdicius, present in 553 at the Fifth Œcumenical Council; Demetrius, in 681 at the Sixth Council; Eustathius in 787 at the Seventh Council. The bishopric was a suffragan of Rhodes in the seventh and tenth centuries (Gelzer, "Ungedruckte . . . Texte der Notitiæ Episcopatuum", 542, 558); suppressed after the conquest of the island by the Venetians in 1207, it was re-established but as a metropolitan when Tinos passed into the power of the Turks in 1714. The metropolitan see was in its turn suppressed in 1833, "Echos d'Orient", III, 287. Under the Venetian domination, which lasted from 1207 to 1714, Tinos had some Latin bishops; nevertheless the earliest known date only from 1329 (Le Quien, op. cit., III, 1059; Eubel, "Hierarchia catholica medii ævi", I, 512; II, 276; III, 333)

Little by little the island became almost completely Catholic. In 1781 it had 7000 Catholics dispersed throughout 32 villages (Hilaire de Barenton, "La France catholique en Orient", 221); some were of the Latin, others of the Greek Rite, and Le Quien (I, 943) affirms that at the same epoch there were more than 120 Greek Catholic priests subject to the Latin bishop. Under the Venetian domination the schismatics were dependent on a *protopapas* who in turn depended on the Patriarchate of Constantinople. The Latin bishopric, at first a suffragan of the Archbishopric of Rhodes, afterwards of Arcadia in Crete, is now a suffragan of Naxos. Since at least the year 1400, the title of Mykonos has been joined to its own; furthermore, the bishop administers the Diocese of Andros. The see numbers 4000 Catholics, 23 secular priests, a chapter-house, 26 parishes, a seminary at Xynara with only seven or eight students; the Franciscans have 2 houses and five religious, the Jesuits one house and ten religious, the Franciscan Tertiaries have about ten, the French Ursulines maintain an orphanage and a large boarding-school at Loutra, and they also direct through the Greek Sisters schools for girls, which number about forty in all. Tinos possesses an image of the Evanghelistria or of the Annunciation discovered in 1823 which attracts each year on 25 March and 15 August from 3000 to 4000 schismatic pilgrims (Echos d'Orient, V, 315).

S. Vailhé.

Tintern Abbey, in Monmouthshire, England, was founded in 1131 by Walter de Clare for Cistercian monks, who came from the Abbey of Aumone, in the Diocese of Chartres, itself founded only ten years before. Walter's son Gilbert, first Earl of Pembroke, and probably also his grandson Richard Strongbow, conqueror of Ireland under Henry II, were buried at Tintern, the magnificent church of which dates from the end of the thirteenth century. The abbey received rich benefactions not only from the family of its founder but from other noble houses; and lists of its

TINTERN ABBEY, MONMOUTH

possessions, both from the taxation-roll of 1291, and at the time of the Dissolution under Henry VIII, are given in detail by Dugdale. The accounts submitted by the last abbot, Richard Wych, in 1535, place the net income at under £200 a year; and the abbey, containing at that time thirteen monks, was suppressed under the Act of 1536 which dissolved the smaller monasteries. The king granted it in 1537 to Henry, Earl of Worcester, in whose family (afterwards dukes of Beaufort) it remained until the sale of his Monmouthshire property by the ninth duke, when it was acquired by the Crown.

The ruins of Tintern, which stands on the right bank of the river Wye, backed by a semicircle of wooded hills, rank with Fountains Abbey in Yorkshire as the most beautiful in England. The church, measuring 245 feet in length, with transepts of 110 feet, is almost perfect, though roofless, the architecture being of the transitional style from Early English to Decorated. The window-tracery is especially fine. Hardly anything remains of the domestic buildings of the abbey, the stone having been used for cottages and farm buildings in the neighbourhood.

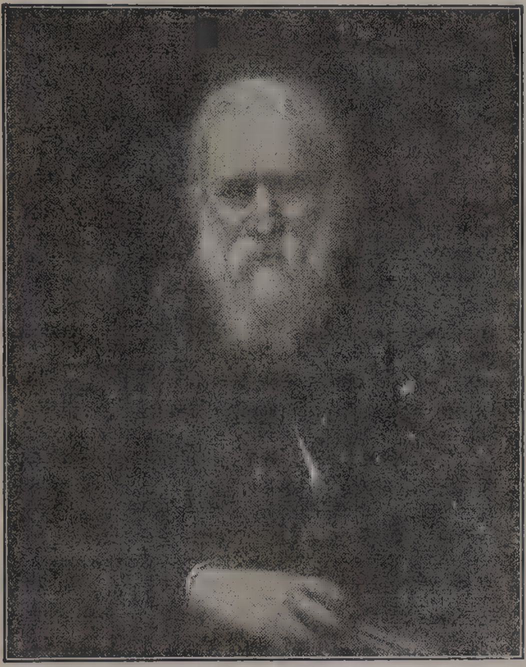
D. O. HUNTER-BLAIR.



PORTRAIT OF TINTORETTO, BY HIMSELF
Uffizi Gallery, Florence

Tintoretto, IL (JACOPO ROBUSTI), Italian painter, b. at Venice, 1518; d. there 1594. His father was a dyer; hence his surname of Tintoretto (the little dyer). In his early youth he displayed an extraordinary taste for the fine arts. He played well on the harp, but his aptitude for painting was still more pronounced. His parents made him an apprentice of the aged Titian, but Jacopo, eager to distinguish himself, soon set up a studio of his own. His ambition was nothing less than to transform Venetian painting by adding to its distinguishing qualities of brilliantly harmonious colouring and pleasant grace of form the merits of the Florentine and Roman Schools, a knowledge of anatomy which excels in the nude, dramatic *mise en scène*, a pose full of movement, a vigorous contrast of light and shade. According to his biographer, C. Ridolfi, he summarized his ideal in the ambitious formula: "The drawing of Michelangelo and the colouring of Titian" (Il disegno di Michelangelo, il colorito del Tiziano). To fit himself for carrying out this magnificent but difficult programme Robusti devoted himself to unremitting labour. He studied the ancient statues; he had sent to him from Florence the reductions which Daniel of Volterra had made in plaster of Michelangelo's masterpieces, "Dawn", "Noonday", "Twilight", and "Night"; he drew incessantly from the living model or the draped lay figure; he dissected dead bodies; he worked not only by sunlight but also by the flicker of torches in order to master the varied play of light. This intense labour was not fruitless. Being gifted with wonderful facility he executed a countless number of works, and even to the end of his life sustained a veritable fever of production.

In order to make himself known he proposed to the clergy of Santa Maria dell' Orto to paint two large pictures for that church (49 feet high, by 19 feet 6 inches wide), asking no payment but what would cover their cost. His offer was eagerly accepted, and Robusti painted the "Adoration of the Golden Calf" and the "Last Judgment". In this rapidly executed and spirited work he displayed a precocious virtuosity, assembling in a tumultuous whole a great number of figures with agitated gestures and attitudes. His aim was to attract public attention and in this he fully succeeded. He painted several other pictures for this church, in which his talent, having grown more confident, shows more poise. These were: "St. Peter venerating the Cross"; "The Martyrdom of St. Paul"; "St. Agnes recalling to life the Prefect's Son"; the "Presentation of the Blessed Virgin". His latest pictures were painted for the Ducal Palace and the Confraternity of San Rocco (*Scuola di San Rocco*). For the Doges' Palace he first painted four scenes from the life of St. Mark (now scattered). The most remarkable is the "Miracle of St. Mark" (the saint releasing a slave about to be tortured), painted in 1548, which is now in the Venetian Academy of Fine Arts. Robusti's eminent qualities as a draughtsman, colourist, and composer are most happily combined and harmonized in this picture. Other pictures painted for the Sala dello Scrutinio perished in the fire of 1577. But the Ducal Palace still preserves many of his works. As examples of plastic beauty so popular at that time may be mentioned: "Pallas in chase of Mars"; "Ariadne crowned by Venus"; "St. George overcoming the Dragon"; "The Marriage of St. Catharine". In this line he succeeded but without excelling, for his manner is not free from heaviness. Among the historic paintings may be mentioned: "The legates of the Pope and the Doge at Pavia before Frederick Barbarossa"; the "Defence of Brescia in 1483"; the "Capture of Gallipoli in 1484"; "Venice, Queen of the Sea".

In 1560 the Confraternity of San Rocco near the church of that name opened a contest for the decoration of a central ceiling whereon the "Glorification of St. Rocco" was to be depicted. Tintoretto had formidable competitors: Paolo Veronese, Giuseppe Salviati, Federigo Zuccaro. Instead of submitting the required sketch, Tintoretto, with his feverish ardour, in a short time completed a picture which he quickly put in place. It pleased the Brothers of St. Rocco, who confided to him the entire decoration, to the great displeasure of his rivals, who were offended by the indelicacy of the proceeding. Tintoretto worked on this vast undertaking from 1560 to 1594. It consists of 56 compositions, many of them, such as the "Calvary", of colossal size. "It displays such fulness of light, such a triumphant blossoming of genius and success, that one comes away from it as from too full and loud a concert, half deafened, missing the proportion of things and not knowing whether to believe one's senses" (Taine). Tintoretto also painted pictures for several Venetian churches, the chief of which were the "Crucifixion" and the "Resurrection" at San Cassiano, the "Marriage Feast of Cana" at Santa Maria della Salute, the "Baptism of Christ" at San Silvestro, the "Last Supper" at San Giorgio

Maggiore and San Giovanni, and the "Life of St. Rocco" at San Rocco.

Robusti was not without merit as a portrait painter. At the Ducal Palace there is a series of portraits of the doges; the museum of the Uffizi at Florence has the portrait of Sansovino, the Louvre that of the painter himself. His last religious composition, begun at the age of seventy and finished shortly before his death, is in the Hall of the Grand Council of the Doges' Palace. This gigantic work, measuring 32 feet 10 inches high, by 72 feet 2 inches wide, represents the "Last Judgment". "Although the colouring has grown dark we cannot but admire the broad lines, the close and picturesque grouping, the enormous masses set in motion with extraordinary vigour" (E. Müntz). Also, it may be added, we cannot but admire the spirited strength of the old man who is able to depict about 500 persons. Jacopo Robusti did not fully realize the ambitious programme he outlined for himself. He could not equal the drawing of Michelangelo, whom he took for his model, but he emphasized its defects by exaggerating the anatomical outlines and foreshortenings. These feats of skill are always out of place, but especially so in religious subjects, which Tintoretto too often treated unbecomingly. However, it is to his credit that he infused into some scenes from the Passion a communicative tragic emotion. His colour is inferior to Titian's, whom he hoped to surpass; it is heavier and less brilliant. But he discovered certain sombre tints which are wonderfully adapted to the expression of sad and sorrowful sentiments and which accentuate the bright contrasts. In point of time he is the last of the great Venetian painters, but he belongs already to the period of decadence, because he never succeeded in overcoming his unstudied impetuosity or fusing into a harmonious whole his eminent but warring qualities.

GASTON SORTAIS.

Tipasa, a titular see of Numidia. The Phœnician word signifies passage. Early in its history we find in Tipasa a Punic counting-house with a port; which passed later under the dominion of the kings of Mauretania, whose kingdom was annexed to the Roman empire in A. D. 39. Claudius I constituted Tipasa a *Colonia juris latini* (Pliny, "Hist. Natur.", V, ii, 20). Later on it became a *civitas* and in the third century an inscription styles it *colonia.* The city, which was very commercial, grew and prospered greatly under the emperors of the second and third centuries. A Jewish colony with its synagogue settled there, early in its history. An inscription belonging to the year 238 is the most ancient trace of Christianity to be found in Tipasa. In the church of Bishop Alexander, built at the end of the fourth century, we find the tombs of nine personages who are called *justi priores* and whom Duchesne considers to have been nine bishops antedating this Alexander. In the beginning of the fourth century, a young girl, Saint Salsa, was martyred by the pagans; later a basilica was erected to her memory. Under Julian the Apostate the inhabitants distinguished themselves by their adherence to Christianity, and this in spite of the violent opposition of two Donatist bishops (Optatus, "De Schismate Donatistarum", II, 18–19). Likewise in 371 or 372, when the Moorish king, Firmus, with the support of the Donatists, tried, but in vain, to take possession of the city. Mention is due to the anonymous author of "The Passion of Saint Salsa" and "The Passion of Saint Fabius of Cartenna" (Anal. bolland., IX, 123–134), who was born at Tipasa and who lived in the beginning of the fifth century.

In 429 the Vandals took possession of the city and the province; ten years later these were restored to the Emperor Valentinian, but came back again into the possession of the Vandals in 455. Bishop Reparatus was exiled in 484, and the secretary of the Arian patriarch was chosen to replace him, a choice which brought about the voluntary exile into Spain of the greater part of the inhabitants; those who remained, having refused to embrace Arianism, had their right hand and tongue cut off, but, nevertheless, continued to talk as before, according to the testimony of Victor de Vita and other contemporaries ("Historia persecutionis Africanæ provinciæ", III, vi, 29–30; Acta SS., October, XI, 847; "Mélanges d'archéologie et d'histoire de l'Ecole française de Rome", XIV, 319). Henceforth Tipasa is not mentioned in history. To-day it is a village, called Tipaza by the French, Tefassed by the natives, situated about 44 miles east of Algiers; it numbers 2400 inhabitants, of whom 600 are Europeans, and possesses a Catholic parish. There are ruins of several churches and other monuments.

S. VAILHÉ.

Tiraboschi, GIROLAMO, Italian scholar, b. in the region of Bergamo, 1731; d. 3 June, 1794. At an early age he entered the Society of Jesus. After serving as professor of rhetoric and belles-lettres (*eloquenza*) at the Brera in Milan, he was called by Francesco III, Duke of Modena, to take charge of his library (the Biblioteca Estense); this he directed with patient endeavour and skill, enriching it with many additions of books and manuscripts and providing it with catalogues. His chief work is the monumental "Storia della letteratura italiana", an exhaustive compilation of the materials within his reach. Actuated by the patriotic desire to defend his country's glory in the cultural arts against the attacks of foreign critics, he makes his history extend from Etruscan times down to 1700, and concerns himself with all matters of interest in belles-lettres, philosophy, history, the fine arts, medicine, jurisprudence, etc., accompanying the statement of his views with an abundance of precious documents. Written in a clear and attractive style, the "Storia" appeared in its first edition between 1772 and 1782. With augmentations and connexions, it was published a second time at Modena, between 1787 and 1794. His minor writings include: "Biblioteca Modenese", an account of writers born in Modena; "Memorie storiche modenesi"; "Vita di Fulvio Testi"; and many other historical and critical essays and articles.

Besides the editions of the *Storia* mentioned above, see the reprints of Florence (1805–13), Milan (in the Classici, 1822–26), and Venice (1823–25).

J. D. M. FORD.

Tiraspol (or Chersonese), Diocese of (Tiraspolensis; Chersonensis), in Southern Russia, suffragan of Mohilev, covers the governments of Saratov, Samara, Kherson, Ekaterinoslav, Taurida, and Bessarabia. It is one of the largest dioceses in the world, and has an area of 462,504 square miles. There are in the diocese 350,000 Latin Christians, chiefly the descendants of German colonists, in 100 parishes, about 40,000 Armenian Catholics in 50 parishes, and over 300 Chaldean Catholics for whom there is one parish. The priests number about 210, 60 being Armenians. The bishop lives at Saratov, the capital of the government of the same name. The ecclesiastical institutions are, besides the cathedral chapter, the seminary for priests at Saratov, which has a rector, an inspector, a spiritual director, and five professors; there is also a seminary for boys at the same place, with three professors. Religious orders are not permitted. For some years the Armenian Catholics have had an Apostolic administrator of their own (Sarkis Ter Abrahamian) to whom all Armenian Catholics in the whole of Russia are subject. In important decisions he is dependent on the Bishop of Tiraspol.

During the second half of the eighteenth century large numbers of German colonists went to Russia at the urgent request of the Empress Catherine II. These emigrants were chiefly from Bavaria, Würtemberg, Saxony, Alsace-Lorraine, the Tyrol, and Switzerland; they settled in the fruitful but uninhabited lands in the southern part of Russia. The colonies founded by them have retained their German names, as Mannheim, Munich, etc., as well as the German language and character. Among the half-million German settlers there were about 180,000 Catholics, who settled in villages of their own, apart from the members of other confessions. These Catholic villages were generally in the basin of the Volga and of the Caspian Sea. The Catholics were cared for spiritually at first by a few priests who had emigrated with them, but these pastors soon succumbed to privations and the unaccustomed climate. After this the Russian Government sent Catholic priests from the provinces on the Baltic. Alexander I transferred the pastoral care of the Catholic colonies to the Jesuits, who came among them in 1803. Unfortunately, the expulsion of the Jesuits from Russia in 1820 put an end to their fruitful labours. The Jesuits were replaced by priests from various Polish monasteries, chiefly Dominicans, Carmelites, Trinitarians, and Vincentians, many of them old, feeble men, and unacquainted with the German language. The difference in tongues, the racial antipathy between priests and settlers, and the great distance from the residence of the bishop (St. Petersburg) enormously increased the difficulties of spiritual administration. Thus religious conditions grew gradually more and more intolerable. Negotiations between Rome and St. Petersburg led finally, in 1847, to a concordat, by which, in addition to several other dioceses, a German diocese was established for the colonists of Southern Russia, to be suffragan to Mohilev.

Saratov on the right bank of the Volga was settled upon as the see of the bishop, but the diocese received its name from the small town of Tiraspol, which in the fourteenth century had been the capital of the Diocese of Kherson. Besides its vast extent, the new diocese was also singular on account of the varying nationalities of its inhabitants, who included German, French, and Italian colonists, besides Russians, Poles, Armenians, Kirghiz, Circassians, Ossetes, Daghestanians, and other peoples. The Government promised to build a cathedral, an episcopal residence, a building for the episcopal curia, and a seminary, and to provide for the endowment of the cathedral chapter. In 1850 the first bishop, the German Dominican Ferdinand Helanus Kahn, was installed. The auxiliary bishop was a Pole. The promises of the Government were not fulfilled. On account of age and ill-health the bishop was unable to correct the existing grievances, nor was he sufficiently energetic to make the Government fulfil its obligations. In 1857 a seminary was opened, it is true, but in rented and inadequate quarters; the number of German teachers was also insufficient. After Bishop Kahn's death (1864) the see remained vacant for eight years, all communication between Russia and the Holy See being at that time suspended. It was not until 1872 that the rector of the seminary, Franz Xaver Zottmann, was appointed bishop (b. at Ornbau in the Bavarian Diocese of Eichstätt in 1826). In 1864 he had visited Eichstätt and there secured some professors for the seminary.

Bishop Zottmann laboured by speech, writing, and example, and by extraordinary activity in all directions, for the spiritual, moral, and material improvement of his diocese. He collected the money necessary to build a suitable cathedral, obtained a building for the seminaries, and spared no sacrifice to train a capable body of German parish priests. Without abandoning the rights of the Church, he kept on good terms with the Government, and thus could do much that was forbidden to the Polish bishops. He could issue pastoral letters in the diocese, undertake journeys for making confirmations and for visitation, arrange collections of money, and even go to Rome, where, in 1882, he was the first Russian Catholic bishop to pay homage to the pope. On account of illness he resigned in 1888, and died in his native city on 12 December, 1901. He had made his diocese one of the best organized in Russia. His work was worthily carried on, after his resignation, by Anton Zerr, who came from a German colony near Odessa, and had been educated at the Tiraspol seminary. Zerr resigned in 1902 on account of ill-health, and was succeeded by Eduard von der Ropp. Scarcely two years had elapsed before von der Ropp was transferred to the See of Vilna. He was followed by the present bishop, Joseph Kessler, b. at Louis, a village of German colonists in the Government of Samara, in 1862; consecrated 28 October, 1904.

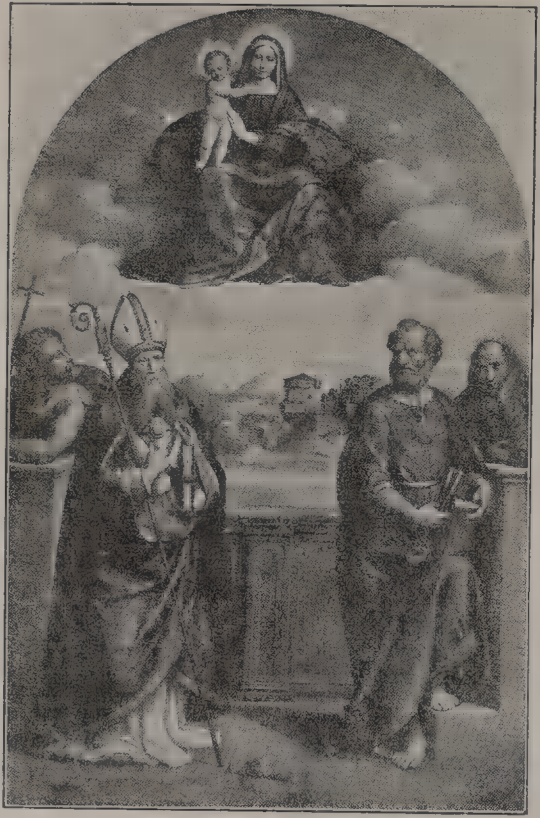
Tirso de Molina. See Tellez, Gabriel.

Tisio da Garofalo, Benvenuto, an Italian painter of the Ferrarese school; b. in 1481 at Garofalo, whence, as was the custom among artists, he took his name; d. at Ferrara, 6 (or 16) September, 1559. With Mazzolino (1481–1530) and Dosso Dossi (1479–1541), Garofalo makes up the modest triumvirate of the Ferrarese school in the sixteenth century. At an earlier date the school could boast of such men as Cosimo Tura, Francesco Cossa, and Ercole Roberti, and at one time in the sixteenth century was perhaps the foremost school of poetry and painting in Italy. In the wonderful frescoes of the Schifanója Palace (1470), depicting the life of Prince Borso d'Este, it created an æstheticism all its own, half allegory and half realism, portraying the world of the day in heroic fashion with all the pomp and circumstance of festal parade, and a magnificent display like that described in the "Trionfi" of Petrarch. These frescoes are not only the most precious document we possess of the courtier life and the worldly ideal of the fifteenth century, but they mark in Italy the beginning of what is known as "genre painting", that is, sketches from real life, but characterized by a good taste, a dignity, and a decorative sense so sadly lacking in similar work of the

Dutch school later. This new style forms the artistic glory of the House of Este, which had also the honour of pensioning Ariosto. Its spirit can be still recognized in the famous paintings (now in the Louvre) executed in 1505 for the Duchess Isabella by Mantegna, Perugino, and Lorenzo Costa. It survives in the works of Dosso Dossi—in the charming Judith of the Modena gallery, and in the incomparable Circe of the Casino Borghese.

Garofalo's real vocation lay in such work. His peculiar talent consisted in feeling and giving naïve expression to the joy of life, the charm of the world around him, the beauty of elegant and rural customs, and all that is now called "idyllic", but as it appeared to Italian courtiers of the Renaissance period. His youthful works—the Boar Hunt in the Palazzo Sciarra, the Knight's Procession in the Palazzo Colonna at Rome—gave promise of a Latin Kuyp, less commonplace, more romantic, more artistic, and more refined than the Dutch artist. This was the result of his early study under Panetti and Costa, and of his companionship with his fellow pupil Dossi. In 1495 he had lessons at Cremona from Baccaccino, who initiated him into the secrets of Venetian colouring. But a few years later, when entering on early manhood, he fell unfortunately under an influence quite alien to his own genius. It was at Rome, where he spent three years (1509–1512), that he succumbed to the charm of the new idea. Raphael was painting the "Camera" or hall of the Segnatura, and that of the Heliodorus; Michelangelo was decorating the ceiling of the Sistine Chapel. Garofalo was overcome by these masterpieces; he was unable to refrain from the contemplation of a higher beauty than that which he himself had expressed.



Virgin and Child in Glory
Benvenuto da Tisio, the Accademia, Venice

From this moment disappears the charming artist, the delicate painter of contemporary life, into which Garofalo was developing. The majesty of the Roman works imposed on him an ideal beyond his power to realize. The Ferrarese Garofalo might have been a master—of the second class of creative artists, indeed, but of true originality; after his visit to Rome, he was but a "Raphael in miniature". It is not easy to criticise harshly works which are always sincere and whose greatest defect arises from the conscientious pursuit of an ideal. All Garofalo's works bear traces of this extreme conscientiousness of execution—a quality that became ever rarer in the school of Raphael. As a moral force Garofalo has no equal in the group that surrounded the master; in this respect he is vastly superior to such a painter as Giulio Romano. Even his least successful works retain, amid their somewhat frigid and commonplace purity, that transparency, glow, and harmony which are the marks of all Venetian colouring. But though the eye is charmed, all illusion as to the artistic quality of the work soon disappears. The figures have no life, the expression is uncertain, ideal heads betray a lack of intellect. The larger the figure the more emphatic are its defects. No elegance of design or skill in execution can hide the fact that Garofalo's art consists in a clever handling of pure abstractions.

Nevertheless, despite his many ambitious but insignificant (though never vulgar) works, the natural instinct of the Ferrarese school had not quite forsaken him. It asserted itself amid all his idealistic straining, and led him to create a style of "tableaux de piété", little pious scenes as helps to private devotion, to be set up in bed-rooms and oratories. We have here the Bible interpreted in a familiar mode, reduced to the proportions of a "genre" picture and making a popular appeal. The vast number of these little paintings in the Borghese, Doria, and Capitol galleries at Rome is a sufficient indication of their vogue. This was the style so successfully developed by Elsheimer and Rembrandt in the seventeenth century. But, even in this new departure, the false ideal with which Garofalo was smitten at Rome continued to stifle his native genius. Ever more and more he condemned himself to be but the pale reflection of Raphael. One can follow step by step the progress of his self-imposed decadence. The "Virgin in the Clouds with four Saints" (1518) in the Academy of Fine Arts at Venice is an excellent work; the "Pietà" (1527) in the Brera Gallery at Milan reveals an increasing frigidity of treatment. If one Madonna (1532) in the Modena Gallery is a charming picture, another of slightly later date no longer merits this eulogy. The large "Triumph of Religion" in the Ateneo at Ferrara is a purely "bookish" work, whose ensemble is null and whose stray pleasing episodes are hard to discover. Later even his sense of colour begins to fail; year by year it grows colder and finally deserts him. Henceforth he can produce only such melancholy monochromes as the "Kiss of Judas" in the Church of San Francisco at Ferrara.

Such was the gradual process of distortion under a foreign influence of this charming genius, adapted by nature to feel and proclaim the poetry and homely realities of life, but rendered sterile by an unnatural endeavour to give expression to an ideal which was not its own. In the pursuit of this ideal, we see Garofalo lose his native qualities one by one, his exquisite sensitiveness as painter and colourist being the last to forsake him. From 1550 till his death Garofalo was blind. His history is one of the most eloquent examples of a mistaken vocation. With him the Ferrarese school loses all its originality, and abdicates the place it should have filled in the history of art. Venice soon occupies the vacancy; she is destined to translate to canvas those formulæ for "painting from life", which Ferrara had dimly foreseen; Giorgione, Titian, Palma, Bonifazio are to reap the laurels which Garofalo refused, and to deprive him of the honour of inaugurating a style so fruitful in the subsequent history of painting.

Louis Gillet.

Tissot, James (Joseph-Jacques), French draughtsman and painter, b. at Nantes, 15 Oct., 1836; d. at Buillon, Department of Doubs, 3 Aug., 1902. He studied at Paris at the Academy of Fine Arts and in the ateliers of Ingres and Flandrin. During this period of his career he became well acquainted with the darker side of the moral and political life of the city. The first paintings that he exhibited at the salon attracted great attention, especially the one picturing the meeting of Faust and Gretchen, now in the Luxemburg Museum. When the Commune came into power Tissot fled to England for fear of coming into conflict with the Government on account of the political intrigues of his brother. In England he gained a reputation as a portrait and genre painter. Tissot, however, was more of an illustrator than a painter, as is shown in the brilliant series of water-colours, "La femme à Paris", in which in careful, correct work done with much dash he lashed the follies of modern Parisian life. Later he issued a similar series of aquarelles on high life in London. The picture of the former of these series entitled "La femme qui chante dans l'église" obliged him to go repeatedly to church during the service, and this suggested to him the conception of the picture, "Christ Appears to Console two Unfortunates in a Ruin". With this last-mentioned work a new epoch began in the life of the painter and, in the course of time, of the man. The figure of Christ had so attracted him that he was never afterwards able to put it out of his mind. He went to Palestine where he spent a year in the most careful geographical and ethnographical studies. After this he spent ten years in preparing the large number of aquarelles that compose his "Life of Christ". The absolutely modern conception of this work shows a complete break with the past. The work was entitled "La vie de notre Seigneur Jésus-Christ, 865 compositions d'après les quatres évangiles, avec des notes et des dessins explicativs, par James Tissot" (Tours, 1896). The price was high, 5000 francs for the edition on Japanese paper, and 1500 francs for that on vellum. A cheaper popular edition in English was issued later. Tissot also designed a series of illustrations for the Old Testament, which, however, are not as fine as the earlier ones. The aquarelles on the New Testament have been called "a revolution in religious art".

Beda Kleinschmidt.

Tithes (Anglo-Saxon, *teotha*, a tenth), generally defined as "the tenth part of the increase arising from the profits of land and stock, allotted to the clergy for their support or devoted to religious or charitable uses". A more radical definition is "the tenth part of all fruits and profits justly acquired, owed to God in recognition of his supreme dominion over man, and to be paid to the ministers of the church". The custom of giving tithes reaches back into unknown antiquity. It is mentioned in Gen., xiv, without anything to indicate that it was something newly instituted. Just as Abraham is there represented as offering tithes of the spoils of the enemy to the royal priest, Melchisedech, so in Gen., xxviii, Jacob is recorded as giving a tithe of all his possessions to the Lord. Under the Mosaic Law the payment of tithes was made obligatory. The Hebrews are commanded to offer to God the tenth part of the produce of the fields, of the fruits of the trees, and of the firstborn of oxen and of sheep (Lev., xxvii, 30; Deut., xiv, 22). In Deuteronomy there is mention not only of an annual tithe, but also of a full tithe to be paid once every three years. While it was to God Himself that the tithes had to be paid, yet we read (Num., xviii, 21) that He transfers them to His sacred ministers: "I have given to the sons of Levi all the tithes of Israel for a possession, for the ministry wherewith they serve me in the tabernacle of the covenant." In paying the tithe, the Hebrews divided the annual harvest into ten parts, one of which was given to the Levites after the first-fruits had been subtracted. This was partitioned by them among the priests. The remainder of the harvest was then divided into ten new parts, and a second tithe was carried by the head of the household to the sanctuary to serve as a sacred feast for his family and the Levites.

If the journey to the temple was unusually long, money could be substituted for the offering in kind. At the triennial tithe, a third decimation was made and a tenth part was consumed at home by the householder with his family, the Levites, strangers, and the poor. This triennial year was called the year of tithes (Deut., xxvi, 12). As the tithes were the main support of the priests, it was later ordained that the offerings should be stored in the temple (II Par., xxxi, 11). It is to be noted that the custom of paying sacred tithes was not peculiar to the Israelites, but common to all ancient peoples. In Lydia a tithe of cattle was offered to the gods; the Arabians paid a tithe of incense to the god Sabis; and the Carthaginians brought tithes to Melkarth, the god of Tyre. The explanation of why the tenth part should have been chosen among so many different peoples is said to be (apart from a common primitive revelation) that mystical signification of the number ten, viz., that it signifies totality, for it contains all the numbers that make up the numerical system, and indeed all imaginable series of numbers, and so it represents all kinds of property, which is a gift of God. All species of property were consequently reckoned in decades, and by consecrating one of these parts to God, the proprietor recognized the Source of his goods. However, the payment of tithes was also a civil custom. They were payable to the Hebrew kings and to the rulers of Babylon, and they are mentioned among the Persians, Greeks, Romans, and later the Mohammedans.

In the Christian Church, as those who serve the altar should live by the altar (I Cor., ix, 13), provision of some kind had necessarily to be made for the sacred ministers. In the beginning this was supplied by the spontaneous offerings of the faithful. In the course of time, however, as the Church expanded and various institutions arose, it became necessary to make laws which would insure the proper and permanent support of the clergy. The payment of tithes was adopted from the Old Law, and early writers speak of it as a divine ordinance and an obligation of conscience. The earliest positive legislation on the subject seems to be contained in the letter of the bishops assembled at Tours in 567 and the canons of the Council of Macon in 585. In course of time, we find the payment of tithes made obligatory by ecclesiastical enactments in all the countries of christendom. The Church looked on this payment as "of divine law, since tithes were instituted not by man but by the Lord Himself" (C. 14, X de decim. III, 30). As regards the civil power, the Christian Roman emperors granted the right to churches of retaining a portion of the produce of certain lands, but the earliest instance of the enforcement of the payment of ecclesiastical tithes by civil law is to be found in the capitularies of Charlemagne, at the end of the eighth century. English law very early recognized the tithe, as in the reigns of Athelstan, Edgar, and Canute before the Norman Conquest. In English statute law proper, however, the first mention of tithes is to be found in the Statute of Westminster of 1285. Tithes are of three kinds: predial, or that derived from the annual crops; mixed, or what arises from things nourished by the land, as cattle, milk, cheese, wool; and personal, or the result of industry or occupation. Predial tithes were generally called great tithes, and mixed and personal tithes, small tithes. Natural substances having no annual increase are not tithable, nor are wild animals. When property is inherited or donated, it is not subject to the law of tithes, but its natural increase is. There are many exempted from the paying of tithes: spiritual corporations, the owners of uncultivated lands, those who have acquired lawful prescription, or have obtained a legal renunciation, or received a privilege from the pope.

At first, the tithe was payable to the bishop, but later the right passed by common law to parish priests. Abuses soon crept in. The right to receive tithes was granted to princes and nobles, even hereditarily, by ecclesiastics in return for protection or eminent services, and this species of impropriation became so intolerable that the Third Council of the Lateran (1179) decreed that no alienation of tithes to laymen was permissible without the consent of the pope. In the time of Gregory VIII, a so-called Saladin tithe was instituted, which was payable by all who did not take part personally in the crusade to recover the Holy Land. At the present time, in most countries where some species of tithes still exist, as in England (for the Established Church), in Austria, and Germany, the payment has been changed into a rent-charge. In English-speaking countries generally, as far as Catholics are concerned, the clergy receive no tithes. As a consequence, other means have had to be adopted to support the clergy and maintain the ecclesiastical institutions (see CHURCH MAINTENANCE), and to substitute other equivalent payments in lieu of tithes. Soglia (Institut. Canon., II, 12) says: "The law of tithes can never be abrogated by prescription or custom, if the ministers of the Church have no suitable and sufficient provision from other sources; because then the natural and divine law, which can neither be abrogated nor antiquated, commands that the tithe be paid." In some parts of Canada, the tithe is still recognized by civil law, and the Fourth Council of Quebec (1868) declared that its payment is binding in conscience on the faithful.

WILLIAM H. W. FANNING.

Titian (TIZIANO VECELLI, called TITIAN), the greatest of Venetian painters, b. at Pieve di Cadore (Friuli); d. at Venice, 27 Aug., 1577. It has always been believed that at the time of his death he was a centenarian, and he himself wrote to Philip II in 1571 that he was more than ninety-five, which would make 1477 the year of his birth. But there are good reasons for believing that he made himself out to be older than he was and that he was born about 1487, that is ten years later than the generally accepted date. Vasari makes him seventy-seven in 1566. Titian would therefore have died when he was between 85 and 90 years old, which would render more credible the marvellous freshness of his later works (cf. Herbert Cook, in the "Nineteenth Century", Jan., 1902, and "Repertorium für Kunstwissenschaft", XXV). The vigorous health which the artist inherited from his mountain race together with a habit of order, balance, and labour determined the predominant characteristic of his art. No painter better expressed, if not the highest beauty, at least that kind of beauty which springs from the deep joy of life, adorning it with an impression of calm, harmony, and serenity. The first Venetian School had already proved itself capable of expressing these sentiments. Titian was to give them a still freer and fuller expression with an external charm and a magic of colouring which has sometimes raised the question whether he is not the greatest and most complete of all painters.

At the age of ten Titian was brought to Venice and placed by his brother with the celebrated mosaicist, Sebastian Zuccato, but at the end of four or five years he entered the studio of the aged painter Giovanni Bellini, at that time the most noted artist in the city. There he found a group of young men about his own age, among them Giovanni Palma da Serinalta, Lorenzo Lotto, and Sebastiano Luciani, who were all to become renowned. The foremost of these innovators and their master was Giorgio da Castelfranco, nicknamed Giorgione. With him Titian formed a friendship of which all his early works bore traces, so much so that at this period it is difficult to distinguish the young master of Cadore from him of Castelfranco. The earliest known work of Titian, the little "Ecce Homo" of the Scuola di San Rocco, was long regarded as the work of Giorgione. And the same confusion or uncertainty is connected with more than one of the "Sacred Conversations", in which several holy persons (generally three or four) appear at half length in sweet and familiar association with the Blessed Virgin. The two young masters were likewise recognized as the two leaders of their new school of *Arte moderna*, that is of painting made more flexible, freed from symmetry and the remnants of hieratic conventions still to be found in the works of Giovanni Bellini. Together they executed in 1508 the frescoes of the Fondaco dei Tedeschi, which have unfortunately disappeared and which were to Venice what the cartoons of Leonardo and Michelangelo at the Signiory were to the Florentine School. That of Giorgione and Titian is known to us in part through the engraving of Fontana. An idea of Titian's talent in fresco may be gained from those he painted, in 1511, at Padua in the Carmelite church and in the Scuola del Santo, some of which have been preserved, among them the "Meeting at the Golden Gate", and three scenes from the life of St. Anthony of Padua, the "Murder of a Young Woman by Her Husband", "A Child Testifying to Its Mother's Innocence", and "The Saint Healing the Young Man with a Broken Limb." The arrangement and feeling are not the chief merits of these last-named works, but the beauty of the types, the grace of the female figures, the charm of the landscapes, and particularly the enchantment of the colouring must forever rank these frescoes with the most valuable works of Titian's youth.

Among the religious paintings of this period may be mentioned that of Antwerp, "The Doge Pesaro presented to St. Peter by Alexander VI" (1508), and the beautiful "St. Mark surrounded by Sts. Cosmas and Damian, Sebastian and Rocco" (Venice, S. Maria della Salute, c. 1511). Already the young master was in possession of his type of Virgins with powerful shoulders and somewhat rounded countenances, and in particular he had elaborated an extremely refined type of Christ, the most beautiful example of which is the wonderful Christ of "The Tribute Money", at Dresden, a face whose delicacy, spirituality, and moral charm have never been surpassed by any other School. From the same period seems to date the "Triumph of Faith", a subject borrowed from Savonarola's famous treatise, "The Triumph of the Cross", and treated with a magnificent fire in the spirit of Mantegna's cartoons and Dürer's prints of the "Triumph of Maximilian" (cf. Male, "L'art réligieux en France à la fin du moyen âge", 1908, 296 sqq.). These prints were executed by Andreani. But what may be called the most enduring works of Titian's youth are the profane and indeterminately allegorical ones, whose unmatched poetry of form and colouring breathe so deep a joy of living that it borders on melancholy. Such for example is the charming picture of the "Three Ages", in the Ellesmere Gallery; such especially is the masterpiece in the Cassino Borghese, "Profane and Sacred Love", whose meaning has never been successfully penetrated (cf. Olga von

Gerstfeldt, "Venus und Violante" in "Monatsheft für Kunstwissenschaft", Oct., 1910), but which none the less remains by the contrast of its two figures, the splendour of the motif, the depth of the landscape, the rhythm and mystery of the composition one of the imperishable elegies of all paintings and which even Giorgione does not equal in his "Concert".

Giorgione died in 1511 and the aged Bellini in 1515, leaving Titian after the production of such masterpieces without a rival in the Venetian School. For sixty years he was to be the absolute and undisputed head, the official master, and as it were the painter laureate of the Republic Serenissime. As early as 1516 he succeeded his old master Bellini as the pensioner of the Senate. Fifteen years later began the relations with Charles V, Francis I, Alfonso and Isabella d'Este, the Houses of Ferrara and Urbino, which made him the first of the princely painters of the Renaissance and the one whose position was most international and most glorious of all. However he rarely left Venice. Married to a tenderly loved wife, solidly established in his habits of work, and like all Venetians strongly attached to the life of Venice, he regarded nothing as being worth a separation from his home, his studio, or his country. Except for a visit to Rome in 1545, and two or three visits to Augsburg between 1548 and 1551 to meet the emperor, he never left Venice save to return to Cadore. Even the liveliest curiosity regarding his art, the ardent desire to learn, which to the end of his life impelled him to acquire all that he could concerning art, as he had already devoured all the substance of Bellini and Giorgione, could not induce him to leave his work and his easel. Venice was in this respect a most favourable centre, a meeting-place for artists from all parts of the world, from North and South, Germany and Florence. Leonardo da Vinci passed through the city in 1500, Dürer stayed there in 1506, Fra Bartolommeo in 1508, Michelangelo in 1529; and the commerce of the active city, especially in books and prints, the permanent society of artists and men of letters, could not leave Titian ignorant of what was being done in the world. No invention of art was unfamiliar to him, and all his life he displayed the same eagerness to enrich his style with new elements, the same consuming anxiety for perfection.

Portrait of Titian by Himself
Prado Gallery, Madrid

During this period (1516–30) which may be called the period of his bloom and maturity, the artist freed himself from the traditions of his youth, undertook a class of more complex subjects and for the first time attempted the monumental style. His most noteworthy work in this style, the "Assumption" of the Church of the Frari (1518), now in the Academy of Venice, is not, despite its celebrity, a very decided work. In more than one sense it is one of his coldest productions. The solution of the problem attempted—that of uniting in the same composition two or three scenes superimposed on different levels, earth and heaven, the temporal and the infinite—was continued in a series of works such as the retable of San Domenico at Ancona (1520), the retable of Brescia (1522), the retable of San Niccolo (1523, at the Vatican), each time attaining to a higher and more perfect conception, finally reaching an unsurpassable formula in the Pesaro retable, (1526), in the Church of the Frari at Venice. This perhaps is his most perfect and most studied work, whose patiently developed plan is set forth with supreme display of order and freedom, of originality and style. Here Titian gave a new conception of the traditional groups of donors and holy persons moving in aerial space, the plans and different degrees set in an architectural framework. To this period belongs a still more extraordinary work, "The Death of St. Peter of Verona" (1530), formerly in the Dominican Church of S. Zanipolo, and destroyed by an Austrian shell in 1867. There now exist only copies of this sublime picture (there is an excellent one at Paris in the Ecole des Beaux Arts). The association of the landscape with a scene of murder—a rapidly brutal scene of slaying, a cry rising above the old oak-trees, a Dominican escaping the ambush, and over all the shudder and stir of the dark branches—this is all, but never perhaps has tragedy more swift, startling, and pathetic been depicted even by Tintoretto or Delacroix.

The artist continued simultaneously his series of small Madonnas which he treated more and more amid beautiful landscapes in the manner of genre pictures or poetic pastorals, the "Virgin with the Rabbit" in the Louvre being the finished type of these pictures. Another marvellous work of the same period, also in the Louvre, is the "Entombment", surpassing all that has been done on the same subject. This was likewise the period of the exquisite mythological scenes, such as the famous "Bacchanals" of Madrid, and the "Bacchus and Ariadne" of London, perhaps the most brilliant productions of the neo-pagan culture or "Alexandrianism" of the Renaissance, many times imitated but never surpassed even by Rubens himself. Finally this was the period of perfect mastery when the artist composed the half-length figures and busts of young women, such as "Flora" of the Uffizi, or "The Young Woman at Her Toilet" in the Louvre (also called, without reason, "Laura de Dianti" or "The Mistress of Titian"), and which will always remain the ideal image of harmonious beauty and the grace of life at one of the periods which best knew the happiness of existence.

During the subsequent period (1530–50), as was foreshadowed by his "Martyrdom of St. Peter", Titian devoted himself more and more to the dramatic style. From this time date his historical scenes, of which unhappily it is difficult to judge, the most characteristic having been much injured or destroyed; thus the "Battle of Cadore", the artist's greatest effort to master movement and to express even tumult, his most violent attempt to go out of himself and achieve the heroic, wherein he rivals the "War of Pisa", "The Battle of Anghiari", and the "Battle of Constantine", perished in 1577, the year of Titian's death, in the fire which destroyed all the old pictures adorning the Doge's Palace. There is extant only a poor, incomplete copy at the Uffizi, and a mediocre engraving by Fontana. In like manner the "Speech of the Marquis del Vasto" (Madrid, 1541) was partly destroyed by fire. But this portion of the master's work is adequately represented by the "Presentation of the Blessed Virgin" (Venice, 1539), one of his most popular canvases, and by the great "Ecce Homo" (Vienna, 1541), one of the most pathetic and life-like of masterpieces. The School of Bologna and Rubens (Miracles of St. Benedict, St. Francis, etc.) many times borrowed the distinguished and magisterial *mise-en-scène*, the grand and stirring effect, and these horses, soldiers, lictors, these powerful stirrings of crowds at the foot of a stairway, while over all are the light of torches and the flapping of banners against the sky, have been often repeated. Less successful were the pendentives of the cupola at Sta. Maria della Salute ("Death of Abel", "Sacrifice of Abraham", "David and Goliath"). These violent scenes viewed in perspective from below—like the famous pendentives of the Sistine Chapel—were by their very nature in unfavourable situations. They were nevertheless much admired and imitated, Rubens among others applying this system to his forty ceilings (the sketches only remain) of the Jesuit church at Antwerp.

At this time also, the time of his visit to Rome, the artist began his series of reclining Venuses (the "Venus" of the Uffizi, "Venus and Love" at the same museum, "Venus and the Organ-Player," Madrid), in which must be recognized the effect or the direct reflection of the impression produced on the master by contact with ancient sculpture. Giorgione had already dealt with the subject in the splendid Dresden picture, but here a purple drapery substituted for its background of verdure was sufficient to change by its harmonious colouring the whole meaning of the scene. Furthermore Titian had from the beginning of his career shown himself to be an incomparable portrait-painter. Portraits like that of Alfonso d'Este (Madrid), of the "Unknown Young Man" (Munich), and the "Man with a Glove" (Louvre) would suffice to place their author in the foremost rank of painters. But a canvas like the "La Bella" (Eleanora de Gonzaga, Duchess of Urbino, at the Pitti Palace) presents something rarer still. The harmony, blue, lilac, white, and gold, is from the standpoint of colour in perfect accord with the lovely and smiling character of the countenance. In charm and magic the execution surpasses even the "Flora" of the Uffizi. "It is such portraits", says Burckhart, "and others of the same order, such as the 'Caterina Cornaro' of the Uffizi, which sometimes mislead modern painting especially the French School." "Why," he continues, "are these eternal forms, while the moderns rarely rise above beautiful sketches or studies? It is because the motif and the moment, the light, the colour, and the form, all were born and grew at the same time in Titian's soul, and whatever is created in such wise is eternal. The voluptuous pose, the harmony of the flesh-tints with the gold of the hair, the delicate tone of the linen, countless other beauties of detail merged in the harmony of the whole, nothing obtrudes itself independently." It is impossible to enumerate, even briefly, Titian's splendid gallery of portraits; princes or doges, cardinals or monks, artists or writers, no other painter was so successful in extracting from each physiognomy so many traits at once characteristic and beautiful. Holbein was also individual, but how much less the artist; Van Dyck is perhaps more graceful but how much more monotonous and affected. Among portrait-painters Titian is comparable only to the greatest, a Rembrandt or a Velásquez, with the interior life of the former, and the clearness, certainty, and obviousness of the latter. The last-named qualities are sufficiently manifested in the "Paul III" of Naples, or the sketch of the same pope and his two nephews, the "Aretino" of the Pitti Palace, the "Eleanora of Portugal" (Madrid), and the series of Charles Fifths of the same museum, the "Charles V with a Greyhound" (1533), and especially the "Charles V at Mühlenberg" (1548), an equestrian picture which as a symphony of purples is perhaps the *ne plus ultra* of the art of painting.

Presentation of the Blessed Virgin, Titian, the Academy, Rome

During the last twenty-five years of his life (1550–76) the artist, more and more absorbed in his work as a portrait-painter and also more self-critical, unable to be satisfied and insatiable of perfection, finished only a few great works. Some of his pictures he kept for ten years in his studio, never wearying of returning to them and retouching them, constantly adding new expressions at once more refined, concise, and subtle. His palette lost the incomparable freshness which characterized the great work of his maturity; the tone became softened, the matter itself grew heavier and more dense, there is less variation, resplendency, and brilliance, but in the gamut selected there were never more powerful notes nor bolder execution. The artist subjects to his ideas and methods the simplification which summed up the experiences of a long life. For each of the problems which he successively undertook he furnished a new and more perfect formula. He never again equalled the emotion and tragedy of the "Crowning with Thorns" (Louvre), in the expression of the mysterious and the divine he never equalled the poetry of the "Pilgrims of Emmaus", while in superb and heroic brilliancy he never again executed anything more grand than "The Doge Grimani adoring Faith" (Venice, Doge's Palace), or the "Trinity", of Madrid. On the other hand from the standpoint of flesh tints, his most moving pictures are those of his old age, the "Danæ" of Naples and of Madrid, the

"Antiope" of the Louvre, the "Rape of Europa" (Boston, Gardner collection), etc. He even attempted problems of chiaroscuro in fantastic night effects ("Martyrdom of St. Laurence", Church of the Jesuits, Venice; "St. Jerome," Louvre). In the domain of the real he always remained equally strong, sure, and master of himself; his portraits of Philip II (Madrid), those of his daughter, Lavinia, and those of himself are numbered among his masterpieces.

So until the end, until that tragic "Pietà" of the Academy of Venice, which was found incompleted in his studio, the aged master strove indefatigably in pursuit of an ever-changing ideal, or rather one which changed when he believed he had given it full expression. Each time a new impression, the discovery of an artist hitherto unknown to him, revealed to him a new aspect of beauty, the great old man unweariedly recommenced his work and endeavoured to incorporate in it the new elements which he had just perceived. This it is which gives to his work as a whole its great significance and to his very countenance, beneath the health and balance of an iron constitution, an air of sadness and distress the like of which is only found in Rembrandt's last portraits. In fact no one ever expended such obstinate effort in the attempt to realize perfection. It is this which gives to certain parts of his work a tense character, an aspect of deliberateness, which occasionally causes an appearance of coldness. But in the end he is always regarded as the exemplar and the greatest of painters. "Titian is one of those who come closest to the spirit of antiquity", writes Delacroix in his "Journal", and in a note for his "Dictionnaire des beaux arts", defining the antique he cites the work of Titian, and indeed there is no other modern work which shares so fully with the marbles of the Parthenon the privilege of eternally enchanting and moving us.

Title of Ordination. See Alimentation.

Titopolis (Titiopolis), titular see, suffragan of Seleucia Trachæa in Isauria. Le Quien (Oriens christ., II, 1023) mentions three of its bishops: Artemius at the Council of Constantinople in 381; Mompræus at the Council of Chalcedon in 451; Domitius at the Trullan Council in 692. The see is mentioned in the sixth century "Notitia episcopatuum" of Antioch (Echos d'Orient, X, 145). About 732 the ecclesiastical Province of Isauria was annexed to the Patriarchate of Constantinople and henceforth Titiopolis figures in the "Notitia episcopatuum" of that Church, as it does also about 900 in that of Leo the Wise (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 557), and about 940 in that of Constantine Porphyrogenitus ("Georgii Cyprii Descriptio orbis romani", ed. Gelzer, 76). The town is mentioned by "Hieroclis Synecdemus", ed. Burckhardt, 37, by George of Cyprus, 42, and by Constantine Porphyrogenitus "De them.", 36, as one of the cities of the Isaurian Decapolis. Its exact site is unknown.

S. Vailhé.

Titular Bishop. See Bishop; In Partibus Infidelium.

Titulus. In pagan times *titulus* signified an inscription on stone, and later the stone which marked the confines of property. Under Trajan it signified at Rome the limits of the jurisdiction of the priests, which is the germ of the meaning it bears in its ecclesiastico-archeological usage. Baronius explains that a cross sculptured on a church was the *titulus* which designated it as belonging to Christ, just as imperial property was indicated by the *titulus fiscalis*. Nothing remains to establish with certainty where the public Christian edifices of Rome before Constantine were situated. The earliest Christians assembled in the halls of private houses, and these oratories were therefore called *ecclesiæ domesticæ*. St. Paul mentions those at Rome and Corinth; in accordance with the most ancient Roman traditions, they were those of Aquilla and Prisca on the Aventine and the *Ecclesia Pudentianæ* on the Viminal. These *ecclesiæ domesticæ* became the *domus ecclesiæ*, and later *domus Dei*, i. e. the *dominicum;* and in this last period they received the name *tituli*, from the name of the founder or proprietor who held the property in custody for the Church. A populous Christian community, like that of Rome, by the end of the third century must have possessed a *domus Dei*, a social centre which served as church, bishop's residence, refectory, dispensary of charity, hospice, tribunal, and seat of the episcopal government, as was the case at Antioch, Carthage, Cirta, and elsewhere. In the fourth century all this was located at the Lateran, in the palace formerly belonging to Fausta, daughter of Maximinianus. The history of the Lateran begins with A. D. 313 and the most recent excavations there have revealed six Roman public and private edifices, but no Christian building earlier than Constantine. According to de Rossi the centre of episcopal administration before the Lateran was a Christian building at San Lorenzo in Damaso, where in the fourth century the archives of the church were kept, and where now the central chancery (*Cancellaria Apostolica*) of the Papal government is situated.

According to the Liber Pontificalis, Pope Fabian about 250 divided the regions of Rome among the deacons, creating ecclesiastical districts. Probably these districts were provided with an edifice which was the centre of administration and served that purpose for several centuries after Constantine, although no traces of such buildings survive. The *diaconiæ* of the seventh century had nothing to do with these diaconal districts. In the fourth century, although the *domus Lateranensis* was the chief Christian edifice of the city, Rome possessed several places of assembly for the Christian community, which Ammianus Marcellinus calls *conventicula christianorum*. In time the unity of the presbyterium was broken and other ecclesiastical groups were created within the city, similar to the present city parishes independent of one another and dependent on a common centre, under the direction of presbyters permanently appointed. To each one a basilica was assigned, *dominicum domus Dei;* the presbyters resided near this edifice, which in the language of archæology is called *titulus*. The most ancient text which alludes to a titulus is the apology of St. Athanasius against the Arians (xx). The most ancient inscription relating to a titulus goes back to A. D. 377. The Liber Pontificalis attributes the foundation of the tituli to different popes of the first half of the fourth century, and this information, which seems genuine, is in part confirmed by inscriptions and by the names given to the churches. The *tituli presbyterales* therefore go back to the peace of the Church; they were not founded all at one time, but followed the progress of the Christian propaganda among the people of Rome. At the close of the fifth century there were twenty-five tituli; the Liber Pontificalis confirms this number and attributes their foundation to Pope Evaristus at the beginning of the second century. The last titulus recorded in the Liber is that of Vestina under Innocent I. The report of the Council of Rome (1 March, 499), contains the list of the names of the presbyters and their tituli. From this and from the report of a council held by Gregory the Great in 595, we know there were twenty-five tituli, which number, with few fluctuations, remained the same until about 1120 when it is given as twenty-eight. Three or four of the Gregorian tituli do not appear in the list of the council of 499, while the list of Pope Symmachus gives five which are not found in the council of 595. This difference is explained by establishing the location and the surroundings of the disputed tituli and identifying the tituli of Pope Symmachus with those of Pope Gregory. The titular churches are all found at a distance from the classic centre of the City, and correspond to an epoch in which paganism preponderated at Rome. From the studies made and from existing monuments it is safe to attribute the foundation of many tituli to the third century and of most of them to the fourth.

After the presbyteral tituli came the *diaconiæ;* these are not found in Roman documents before the seventh century. The Liber Pontificalis mentions them for the first time in the life of Benedict II (684-85). From the beginning the *diaconiæ* were charitable institutions, and in a measure replaced for the Romans the *frumentatio* of Byzantine times and the doles of bread of the best days of the empire. They were established in the centre of the city, with the materials, or on the site of, public edifices in a period when there was no longer a motive for building Christian churches away from the Forum or the Palatine. Under Pope Adrian (772–95) their number was fixed at eighteen. From the beginning of the twelfth century cardinal deacons adopted the names of their *diaconiæ* and the number of eighteen was maintained until the sixteenth century. By the twelfth century cardinal deacons as well as the presbyters had long been dispensed from personal service at the tituli, since which time titulus of itself acquired a meaning analogous to that of the present time.

ALUIGI COSSIO.

Titus, Bishop of Bostra, b. about 362–371. Sozomen (Hist. eccl., III, xiv) names Titus among the great men of the time of Constantius; he also tells (op. cit., V, xv) of a mean trick played upon Titus by Julian the Apostate. It was expected that the re-establishment of paganism would occasion riots in Bostra as it had elsewhere. Julian wrote to Titus that he would hold him and the clergy responsible for any outbreak. Titus replied that though the Christians were equal in number to the pagans they would obey him and keep quiet. Julian then wrote to the Bostrians urging them to expel Titus because he had calumniated them by attributing their quiet conduct not to their own good dispositions but to his influence. According to Socrates (op. cit., III, xxv) Titus was one of the bishops who signed the Synodal Letter, addressed to Jovian by the Council held at Antioch (363), in which the Nicene Creed was accepted, not, however, without a clause "intended somewhat to weaken and semiarianize the expression ὁμοούσιος" (Hefele, "Councils", II, p. 283; ANTIOCH.—*Synods of Antioch*). St. Jerome (Ep. lxx) names Titus among writers whose secular erudition is as marvellous as their knowledge of Scripture; in his "De vir. ill.", cii, he speaks of his "mighty" (*fortes*) books against the Manichæan and *nonnulla alia.* He places his death under Valens. Of the *nonnulla alia* only fragments of exegetical writings have survived. These show that Titus followed the Antiochene School of Scripture exegesis in keeping to the literal as opposed to the allegorical interpretation. The "Contra Manichæos" is the most important work of the kind that has come down to us, and its historic value is very great because of the number of quotations it contains from Manichæan writers. In one passage Titus seems to favour Origen's view that the pains of the damned are not eternal (on this point see especially Ceillier, "Histoire générale des auteurs sacrés et ecclésiastiques", VI p. 54, who seems disposed to acquit him of this error). The work consists of four books of which the fourth and the greater part of the third are only extant in a Syriac translation.

The Greek and Syriac texts of the *Contra Manich.* were published by LAGARDE (Berlin, 1859). Earlier editions of the Greek text suffer from an insertion from a work of Serapion owing to the misplacement of a leaf in the original codex. For *Contra Manich.* and other writings attributed to TITUS see MIGNE and GALLANDI. The genuine exegetical fragments of this commentary were published by SICKENBERGER in *Texte u. Untersuchen,* VI, i (new series). BARDENHEWER-SHAHAN, *Patrology* (St. Louis, 1908), 270–1.

Titus, EPISTLE TO. See TIMOTHY AND TITUS, EPISTLES TO.

Titus, Roman Emperor 79–81, b. 30 Dec., 41; d. 13 Sept., 81; son of the Emperor Vespasian, and from the year 70 Cæsar and coregent; he was highly educated and a brilliant poet and orator in both Latin and Greek. He won military fame in the war in the years 69–70, against the revolted Jews. In April, 70, he appeared before the walls of Jerusalem, and conquered and destroyed the city after a siege of five months. He wished to preserve the Temple, but in the struggle with the Jews who rushed out of it a soldier threw a brand into the building. The siege and taking of the city were accompanied by barbarous cruelties. The next year Titus celebrated his victory by a triumph; to increase the fame of the Flavian dynasty the inscription on the triumphal arch represented the overthrow of the helpless people as an heroic achievement. The historical significance of the destruction of the Jewish state is that the Jews have since then been scattered among foreign nations. As ruler Titus was by no means popular; he shared in the voluptuousness of the Rome of that era, and was responsible for the acts of violence which occurred during the administration of his father. Consequently an evil reign was expected. However, in the short period of his independent authority, Titus agreeably disappointed these anticipations. His noble benevolence was exhibited in the saying that the day was lost in which he had done no one a kindness; he gained the honourable title of "amor et deliciæ generis humani" (the darling and admiration of the human race). During his reign Italy suffered from two severe calamities. On 24 Aug., 79, the celebrated eruption of Vesuvius buried the cities of Pompeii, Herculaneum, and Stabiæ, and some months later a fearful conflagration did great damage at Rome. On both occasions Titus showed a fine humanitarianism. His actions were not free from ostentation and seeking after effect. He died from the effects of his luxurious life.

KLEMENS LÖFFLER.

Tius (TIUM), titular see, suffragan of Claudiopolis in Honorias. According to Strabo (542, 545) the town was not remarkable save as the birthplace of Philetærus, founder of the royal dynasty of Pergamus. The coins give Dionysius as the founder; in fact it was the site of a temple of Dionysius and one of Jupiter. Le Quien (Oriens christ., I, 575) mentions among its bishops: Apragmonius at the Council of Ephesus in 431; Andrew in 518; Eugenius in 536; Longinus at the Sixth General Council in 681; Michael at the Seventh General Council in 787; Constantine at the Eighth General Council in 869 and author of an account of the transfer of the relics of St. Euphemia of Chalcedon (Acta SS., Sept., V, 274–83). This see figures in all the "Notitiæ episcopatuum". Novel xxix of Justinian locates the town in Paphlagonia. George Pachymerus (I, 312) mentions Tium among the Byzantine towns which escaped the ravages of the Seljuks in 1269. The modern village of Filias stands on the ruins of the ancient Tium, which included the remains of ramparts and sculptures. The village is in the caza of Hamidye and the vilayet of Castamouni, not far from the mouth of the Filias-Tchaï, the Billæus.

S. VAILHÉ.

Tivoli, DIOCESE OF (TIBURTINA), in the Province of Rome. The city is situated where the Anio, issuing from the Sabine hills, leaps down from a height of nearly 300 feet and enters the Roman Campagna. The water power of the beautiful falls, which attract many tourists to the city, is utilized in various industries and supplies the electric current that lights Rome. The slopes of the neighbouring hills are covered with olives, vineyards, and gardens; the most important local industry is the manufacture of paper. The great cascade has existed only since 1835, when the Gregorian tunnel through Monte Catillo was completed, to give an outlet to the waters of the Anio sufficient to preserve the city from inundation. The "Grotto of Neptune" and the "Cascatelle" are ancient. There are ruins of two old temples, one of Hercules Saxanus, commonly called "of the Sybil", the other of Tiburtus, both overlooking the great cascade. Near the Roman gate is the "Tempio della Tosse". Among the more important churches are the cathedral, the Gesù, S. Maria Maggiore, and S. Maria degli Olivi, containing interesting fifteenth-century frescoes; also S. Maria di Quintiliolo, built on the ruins of the villa of Quintilius Varus. In the environs are many ruins of ancient villas, the largest being the famous construction of the Emperor Hadrian, which comprised a villa, portico, theatre, gardens, baths, library, etc., and covered 173 acres of ground. Many of the treasures of the Vatican Museum were discovered here. The most notable of the modern villas are the Villa d'Este, erected by Pirro Ligorio for Cardinal Ippolito d'Este (1549), and decorated with frescoes by Zuccaro; at present it belongs to the Archduke Franz Ferdinand of Austria.

According to some of the ancient writers, Tivoli was founded by the Siculi; according to others, by a colony of Argives. It is first mentioned in Roman history in 493, as included in the alliance against the Volscians, but in 361 it sided with the Gauls against Rome; though twice conquered, it shortly afterwards (339) allied itself with Præneste (Palestrina); for some time it was in the Confederation and in the Social War became a *municipium.* It was strongly fortified by Belisarius in the Gothic War, but almost destroyed by Totila in A. D. 340. After the Lombard invasion it was in the power of the Byzantines and formed part of the Patrimony of St. Peter. It had a count, representing the emperor. In 916 Pope John X won a memorable victory there over the Saracens. In the Middle Ages it rebelled at times against the popes, under Henry IV and V, and against Innocent II; at other times it fought against the Roman rebels, as under Eugene III and Adrian IV. In the thirteenth century the Senate of Rome succeeded (under Innocent IV) in imposing a tribute on the city, and arrogated to itself the right of appointing a count to govern it in conjunction with the local consuls. In the fourteenth century it sided with the Guelphs and strongly supported Urban VI against Clement VII. King Ladislaus was twice, and later Braccio da Montone once, repulsed from the city. But its strength was undermined by internal factions, in consequence of which Pius II constructed the fortress which still exists. Alexander VI withdrew it from the jurisdiction of the Roman Senate. In 1527 it was sacked by bands of the supporters of the emperor and the Colonna, important archives being destroyed during the attack. In 1547 it was again occupied by the Duke of Alba in a war against Paul IV, and in 1744 by the Austrians.

Tivoli is the birthplace of St. Severinus (sixth century), of Popes St. Simplicius and John IX, also of the painter and musician Golia. The Church of Tivoli counts many martyrs, among them St. Getulius, St. Symphorosa with her seven sons, martyred in the days of Hadrian; at a later period a basilica was erected over the place of their martyrdom. Other martyrs were Vincentius, Majorius, and Generosus. The deacon St. Cletus was later confounded with the pope of that name, really St. Anacletus. The first known bishop was Candidus (465); among his successors were: Gualterus (1000), under whom the feast of St. Lawrence, patron of the city, was instituted; Otto (1148), during whose episcopacy Eugene IV died at Tivoli; Giovanni da Gabenna O.P. (1337), who died in the odour of sanctity; Filippo de' Rufini, O.P. (1367), sent by the Romans to Gregory IX to induce him to return to Rome; Fra Lorenzo, O.M. (1450), reformer of the clergy; Cardinal Giulio Roma (1634), restorer of the cathedral and founder of the seminary; Cardinal Marcello di Santacroce (1652), who completed the work of his predecessor; Gregorio Barnaba Chiaramonti (1782), afterwards Pius VII. The diocese is immediately subject to the Holy See. In the process of concentrating the Italian seminaries the course of theology at Tivoli was suppressed. There are: 42 parishes; 40,000 inhabitants; 69 secular and 35 regular priests; 11 convents of male religious and 6 of sisters; 1 college for boys, and 1 for girls.

U. BENIGNI.

Tlaxcala (TLAXCALENSIS), a former diocese of the colony of New Spain. It was the fifth diocese established in the Americas by order of seniority; the second established in Mexico (the first in title being Yucatán); and the first diocese of the colony of New Spain with an acting bishop, Fray Julián Garcés, Dominican, nominated by Clement VII, at the request of Charles V. At first Fray Garcés was only presented as Bishop of Yucatán; the royal provision of Charles V reads: "We present you (Rev. Father Julián Garcés) to the Bishopric of Yucatán and Santa María de los Remedios", but, as the territory discovered and conquered by Hernando Cortés became better known, Clement VII in the document sent to Bishop Garcés in 1525 says: "We grant you and the bishops who shall succeed you, that you call yourselves not bishops of Santa María (de los Remedios or of Yucatán) but 'Tenuxtitlán' and of other lands to be mentioned." This document denotes the new title of the bishop but does not determine it. Father Garcés himself in his first declaration enlightens us by saying: "We choose the town of Tlaxcala as the seat of our cathedral church." Bishop Garcés reached New Spain in 1527 and took possession of his see. Subsequently finding that it was impossible to hold the choir office at Tlaxcala because there was no cathedral, but only an altar covered with thatch work, and as a sumptuous church with three naves had been erected in the new city of Puebla de los Angeles, the bishop declared that the chapter should pass to the latter city, and transferred thither the episcopal see on 3 October, 1539. This change was approved by royal warrant of 6 June, 1543, and since then the bishops of the diocese have resided in Puebla.

THE CATHEDRAL, PUEBLA

Although the official title of the diocese was "of Tlaxcala" or *de Puebla de los Angeles*, it was not until 11 August, 1903, that the ancient See of Tlaxcala (*Angelopolitana*) was made an archbishopric under the name of Puebla de los Angeles, and the name of Tlaxcala was suppressed. The original limits of the Diocese of Puebla (Tlaxcala) comprised the present states of Puebla, Tlaxcala, Vera Cruz, Tabasco, Hidalgo, and Guerrero. As new dioceses were erected (see MEXICO) its territory was gradually reduced to its present limits, the states of Puebla and Tlaxcala, with the exception of a few parishes which belong to the jurisdiction of the dioceses of Huajuápam and Oaxaca. In the first years of its foundation almost all the churches and parishes were under the care of the regulars, the Franciscans having important convents at Tlaxcala, Huexotzingo, and Cholula. In the time of the sixth Bishop of Puebla, Diego Romano (1578–1607), the churches began to pass into the hands of the seculars, and by 1640–49, under Bishop Juan de Palafox y Mendoza, the change was finally accomplished.

The ancient Tlaxcala was a powerful republic which the Aztecs vainly tried to conquer and which waged continuous and ferocious wars against them. The Indian hieroglyphic of its name represents two hands beating a *tortilla*, or corn cake, which is the meaning of the word "tlaxcallan". In former times this republic was thickly populated, but epidemics, emigrations, and the work of constructing the canal of Nochistongo to drain the valley of Mexico brought about the almost entire extinction of the natives, reducing them to an insignificant number. In the archives of Tlaxcala is a royal document, bearing the date of 1539, which orders that the Indians of Tlaxcala be exempted from all works of servitude. This prerogative was conceded in return for their services to Hernán Cortéz during the conquest. It is doubtful whether this order was ever carried out, for a document dated 1625 states that the city of Tlaxcala contained 300,000 inhabitants in the sixteenth century, while only 7000 remained when this document was written. The city of Puebla, which is the residence of the bishop and of the governor of the state, was founded in 1531 by the auditor Juan de Salmerón and Fray Toribio de Motolinía (see MOTOLINIA). The cathedral of Puebla, one of the most beautiful in the whole republic of Mexico, was finished by Bishop Palafox in 1649. There are, counting colleges and parochial schools, about three hundred Catholic schools in the archdiocese. The Protestants have ten colleges. The conciliar seminary was raised to the rank of a Catholic university on 5 August, 1907. It has an attendance of 275 students. Among the notable churches should be mentioned that of Nuestra Señora de los Remedios situated on the top of the Pyramid of Cholula. This pyramid was built by the Indians before the advent of the Spaniards; it measures 177 feet in height and 1444 feet on each side of its base, and is, therefore, larger than, although not as high as, the great pyramid of Egypt. The level space on the top, upon which the church is built, measures 46,444 sq. feet.

Besides the two bishops already mentioned, other notable ones were the successor of Bishop Palafox, Diego Osorio de Escobar y Llamas, who was viceroy of Mexico in 1664, and D. Pelagio Antonio Labastida y Dávalos, who was driven from his see during the reform era and did not return until 1863 as Archbishop of Mexico. The present archbishop, Ramón Ibarra y González, translated from the Diocese of Chilapa, Guerrero, on 6 July, 1902, was preconized first Archbishop of Puebla in 1903, and the Diocese of Huajuápam de León, erected at the same time, was made suffragan to Puebla. Tlaxcala had in 1910 a population of 2812. The town is now silent and desolate. The ancient buildings, preserved for the traditions which cling to them, and the resident Indians transport the visitor to the time of the conquest. The State of Tlaxcala has an area of 1594 sq. m., and a population (1910) of 183,805.

CAMILLUS CRIVELLI.

Tlos, titular see in Lycia, suffragan of Myra. Tlos was one of the six cities forming the Lycian confederacy and is said to have been founded by the hero Tlos, son of Tremilus. It is mentioned by Strabo (XIV, 665); Pliny (V, 28); Ptolemy (V, 3, 5); Stephanus Byzant. (s. v.; Hierocles (684, 16). It had its own coinage. It is to-day the village of Douvar in the caza of Macri, vilayet of Smyrna; this village is beautifully situated in the midst of the ancient acropolis, 984 feet above the Xanthus valley, surrounded by precipices, whose sides form inaccessible walls. On the northern side these rocks are broken by hundreds of tombs, some of which bear inscriptions mentioning the people and the "*gerousia*" or municipal council. Among its monuments the principal is the theatre. Until the thirteenth century this see is mentioned by the "Notitiæ episcopatuum" as a suffragan of Myra. Le Quien (Oriens christ., I, 979) gives a list of five known bishops: Andreas, at Chalcedon, 451 (signed in 458 the letter of the Lycian bishops to Emperor Leo); Eustathius at Constantinople, under the patriarch Menas, 536 (also known by Novella 115 of Justinian); John, at the Council of Trullo, 692; Constantine, at Nice, 787; Constantine, at Constantinople, 879.

S. PÉTRIDÈS.

Toaldo, GIUSEPPE, priest and physicist, b. at Pianezze, 1719; d. at Padua, 1797. In his fourteenth year he entered the seminary of Padua, in which he subsequently taught mathematics and Italian literature. While connected with the seminary he edited the works of Galilei (1744), for which he wrote an appreciative preface and critical notes. In 1754 he was appointed pastor of Montegalda; and, eight years later, was called to the chair of astronomy in the University of Padua. Toaldo, like his contemporaries, Divisch and Beccaria (both priests), gave special attention to the study of atmospheric electricity and to the means of protecting buildings against lightning. He advocated the erection of lightning-rods, adopting the views of Franklin on their preventive and protective action, rather than those of the French school led by Abbé Nollet. His treatise "Della maniera di difendere gli edificii dal fulmine" (1772) and his pamphlet "Dei conduttori metallici a preservazione degli edifici dal fulmine" (1774) contributed largely to remove the popular prejudices of the time against the use of the "Franklinian rod"; and through his exertions lightning-conductors were placed on the Cathedral of Siena, on the tower of St. Mark's, Venice, on powder magazines, and ships of the Venetian navy. Toaldo was a member of many of the learned bodies of Europe, notably of the Royal Society, London.

BROTHER POTAMIAN.

Toba Indians, one of the few still unconquered savage tribes of the great Chaco wilderness of South America, and notable alike for their persistent hostility to the white man and for their close resemblance in language, customs, and manner of living to the celebrated Abipón, among whom the famous Jesuit Dobrizhoffer (q. v.) laboured one hundred and fifty years ago. They are of Guaycuran linguistic stock, which includes also the Abipón, Mocoví, and a number of other tribes of similar predatory habit, and range, in alliance with the Mocoví, through the forests and marshes of the Chaco region on the west bank of the Paraguay River about the lower Pilcomayo and Vermejo, in Paraguay and north-east Argentina, sometimes extending their forays westward to the frontiers of Oran and Tarija. They are known under various names, the most common being from the Guaraní *tobai*, signifying "opposite", i. e. those living on the opposite bank of the Paraguay from the Guaraní. They number now perhaps 2000 souls.

Physically they are tall and well-built, with fierce countenance, and from going constantly barefoot the soles of their feet are toughened to resist thorns and sharp rocks. Both sexes go nearly naked except when in the presence of strangers, and wear their hair long, the men confining it by means of a band or turban. On special occasions they wear shirts or skirts of skins or of woollen stuff, of their own weaving, from the sheep they now possess, together with head-dresses, belts, and wristlets of ostrich feathers. They tattoo their faces and upper bodies with vegetable dye. They live almost entirely by hunting and fishing, but raise a little corn. They have large herds of horses and are fine horsemen. The men are expert in the making of dug-out canoes and fish traps, while the women are expert potters and net weavers. Their huts are simple structures of willow branches covered with grass, sometimes large enough to have several compartments. Their weapons are the bow, lance, and wooden club, besides which they now have some guns. They bury the dead, the aged being sometimes killed by their own children from a feeling of pity for their helplessness. For the same reason, when a mother dies her infant is buried with her. Men have only one wife at a time. There is no head chief, the government resting principally with the old men. Little is known of their religion, which seems to consist chiefly of a special reverence for the sun and the rising moon, and the propitiation of a host of invisible spirits which are held responsible for sickness and other misfortunes. In war they are distinguished for their ferocity and barbarous cruelty, and are dreaded alike by settlers, travellers, and Christianized Indians throughout the whole northern Chaco frontier. In 1882 they massacred an entire exploring expedition of fifteen men under command of the French geographer, Crévaux. In 1854, however, the American expedition up the Paraguay, under Captain Page, held friendly intercourse with them. Some special studies of their language, which is virtually the same as that of the Abipón, have been made by Carranza and Quevedo. An interesting, though strongly anti-religious, account of their latter-day condition and habits is given by the Italian engineer, Pelleschi.

In the early colonization period of the eighteenth century the Toba, with the Abipón and Mocoví, were among the most determined and constant enemies of the Argentine-Paraguayan settlements and missions, and hardly a half year ever passed without a raid or retaliatory punitive expedition. On one occasion six hundred Toba attacked Dobrizhoffer's mission, but were repelled by the missionary himself single-handed with the aid of his firearms, of which the savages were in deadly terror. The missionary received an arrow wound in the encounter. In 1756 a number of Toba and Mataco were gathered into the Mission of San Ignacio de Ledesma, on the Rio Grande tributary of the Vermejo, where they numbered 600 souls at the time of the expulsion of the Jesuits in 1767. Some later attempt was made by the Franciscans to restore the Chaco missions, but with the end of Spanish rule the missions declined and the Indians scattered to the forests. (See MATACO INDIANS; MOCOVÍ INDIANS.)

JAMES MOONEY.

Tobias.—We shall first enumerate the various Biblical persons and then treat the book of this name.

I. PERSONS. A.—Tobias (II Par., xvii, 8), Heb. *tô^{b}yyāhû* "Yahweh is good"; Sept. Τωβιας, one of the Levites whom Josaphat sent to teach in the cities of Juda. The name is omitted in the Vatican and Alexandrian codices, but given in the other important Greek MSS. and the Vulgate.

B.—Tobias (Zach., vi, 10), Heb. *tôbyyāhû, qeri tô^{b}yyâh* which is the reading also of verse 14; Sept. *χρησίμων* (verse 10), *τοῖς χρησίμοις αὐτῆς* (verse 14), which infers the reading *tôbêhā;* Vulg. Tobia; one of the party of Jews who came from Babylon to Jerusalem, in the time of Zorobabel, with silver and gold wherewith to make a crown for the head of Jesus, son of Josedec.

C.—Tobia (I Esdr., ii, 60), Heb. *tôbyyâh*, "Jah is my good"; Sept. Τωβειά (Vat.), Τωβίας (Alex.), the same name occurring in II Esdr., vii, 62, as Τωβιά and in the apocryphal III Esdr., v, 37 as *βαενάν* (Vat.) or *βάν* (Alex.), one of the families that, on their return from exile, could show no written proof of their genealogy.

D.—Tobias (II Esdr., ii, 10), an Ammonite who together with Sanaballat the Horonite opposed the fortification of Jerusalem by Nehemias (II Esdr., ii, 19; iv, 3; vi, 17; xiii, 4, 8). He is called "the servant"; we can only conjecture what that means. Cheyne (Encyclopedia Biblica, s. v.) thinks that *háĕbéd*, servant, is a mistake for *há ărbî*, the Arab.

(E).—Tobias (II Mach., iii, 11), the father of Hircanus.

(F).—Tobias (Tob., i, 9, and *passim*), the son of the following.

(G).—Tobias the elder, the chief character in the book that bears his name.

II. Book of Tobias, a canonical book of the Old Testament.

A. *Name.*—In Cod. Alex., βίβλος λόγων Τωβίτ; in Vat., Τωβείτ; in Sinaitic, Τωβείθ; in Latin MSS. *Liber Tobiæ, Liber Tobit et Tobiæ, Liber utriusque Tobiæ.* In the Vulgate and Hebrew Fagii both father and son have the same name, Tobias, *ṭôbyyāh*. In other texts and versions, the name of the father varies: *ṭôbî*, "my good" is Jahweh, in Heb. Munster; Τωβίτ or Τωβείτ in the Sept.; *Tobis*, or *Tobit*, standing for *ṭôbîth* "goodness" of Jahweh, in the Old Latin.

B. *Text and Versions.*—The original text, supposed to have been Hebrew, is lost; the reasons assigned for an Aramaic original warrant only a probable opinion that an Aramaic translation influenced our present Greek versions.

(1) Vulgate Versions.—St. Jerome had not yet learned Aramaic, when, with the aid of a rabbi who knew both Aramaic and Hebrew, he made the Vulgate version. The rabbi expressed in Hebrew the thought of the Aramaic MSS. and St. Jerome straightway put the same into Latin. It was the work of only a day (cf. Præf. in Tobiam). The Old Latin certainly influenced this hurried version. The Vulgate recension of the Aramaic version tells the story in the third person throughout, as do the Aramaic of Neubauer and the two Hebrew texts of Gaster (HL and HG), whereas all the other texts make Tobias speak in the first person up to iii, 15. The following passages occur in the Vulgate alone: the wagging of the dog's tail (xi, 9); the comparison of the coating on Tobias's eye to the membrane of an egg (xi, 14); the wait of half an hour while the gall of the fish effected its cure (xi, 14); Tobias's closing of the eyes of Raguel and Edna in death; also ii, 12, 18; iii, 19, 24; vi, 16–18, 20, 21; viii, 4, 5; ix, 12b. Some parts of the Vulgate, such as the continence of Tobias (vi, 18; viii, 4), were looked upon at times as Christian interpolations of Jerome until they were found in one of Gaster's Hebrew texts (HL). Lastly, the Vulgate and HL omit all mention of Ahikhar; Achior of Vulg., xi, 20, is probably an addition to the text.

(2) Aramaic Versions.—Besides the Aramaic version used by Jerome and now lost, there is the extant Aramaic text recently found in an Aramaic commentary on Genesis, "Midrash Bereshit Rabba". The writing of this midrash is fifteenth-century work; it contains the Book of Tobias as a *haggada* on the promise Jacob makes to give tithes to God (Gen., xxviii, 22). Neubauer edited the text, "The Book of Tobit, a Chaldee Text from a unique MS. in the Bodleian Library" (Oxford, 1878). He thinks that it is a briefer form of Jerome's Aramaic text. This is not likely. The language is at times a transliteration of Greek and gives evidence of being a translation of one or other of the Greek texts. It agrees with the Vulgate in that from the outset the tale of Tobias is told in the third person; otherwise it is closer to Codex Vaticanus and closer still to Cod. Sinaiticus.

(3) Greek Versions.—There are three Greek recensions of Tobias. We shall refer to them by the numbers given to the Vatican and Sinaitic codices in Vigouroux, "La sainte bible polyglotte", III (Paris, 1902). (a) AB, the text of the Alexandrian (fifth century) and Vatican (fourth century) codices. This recension is found in many other codices of the Greek text, has been used for centuries by the Greek Church, is incorporated into the Sixtine edition of the Septuagint, and has been translated into Armenian as the authentic text of that rite. AB is preferred to the Sinaitic recension by Nöldeke, Grimm, and others, and yet rated by Nestle, Ewald, and Harris as a compendium rather than as a version of the entire original text. It condenses Edna's prayer (x, 13), omits the blessing of Gabael (ix, 6), and has three or four unique readings (iii, 16; xiv, 8, 10; xi, 8). (b) א, the text of the Sinaitic (fourth-century) Codex.—Its style is very much more diffuse than that of AB, which seems to have omitted of set purpose many *στίχοι* of א —cf. ii, 12, "on the seventh of Dustros she cut the web"; v, 3, the incident of the bond divided into two parts, one for Tobias and the other for Raguel; v, 5, the long conversation between Raphael and young Tobias; vi, 8; x, 10; xii, 8, etc. א omits iv, 7–19, and xiii, 6b–9, of AB. (c) The Text of Codices 44, 106, 107 for vi, 9–xiii, 8.—The first portion (i, 1–vi, 8) and the last (xiii, 9 to end) are identical with AB; the remainder seems to be an attempt at a better version of the original text. Independent work is shown by vi, 9, to vii, 17; viii, 1, to xii, 6, is very close to the Syriac and nearer to א than to AB; xii, 7–xiii, 8 resembles each text in various small details. Distinctive readings of these cursives are Edna's Gnostic prayer, "Let all the Æons praise thee" (viii, 15); and the fact that Anna saw the dog running before Tobias (xi, 5). (d) What seems to be a third recension of the second chapter is presented in Grenfell and Hunt, "Oxyrhyncus Papyri" (Oxford, 1911), part viii. The text differs from both AB and א and consequently the Greek cursives.

(4) Old Latin Versions.—Previous to the Latin Vulgate translation of the Aramaic recension (see above) there existed at least three Old Latin versions of a Greek text which was substantially א; (a) The recension of Codex Regius Parisiensis 3654 and Cod. 4 of the Library of St-Germain; (b) the recension of Cod. Vat. 7, containing i–vi, 12; (c) the recension of the "Speculum" of St. Augustine.

(5) Syriac Version.—Down to vii, 9, it is a translation of AB; thereafter, it agrees with the Greek cursive text, save that xiii, 9–18, is omitted. This second part is clearly a second recension; its proper names are not spelled as in the first part. Ahikhar (xiv, 10) is Achior (ii, 10); 'Edna (vii, 14) is 'Edna (vii, 2) 'Arag (ix, 2) is Raga (iv, 1, 20).

(6) Hebrew Versions.—There are four Hebrew versions of this deuterocanonical story: (a) HL, Hebrew Londinii, a thirteenth-century MS., found by Gaster in the British Museum, and translated by him in the "Proceedings of the Soc. of the Bibl. Archæology" (xviii and xx). Besides a cento of Scriptural exhortations, this MS. contains the narrative portion of Tobias, translated, Gaster thinks, from a text that stood in closest relation to the Aramaic used by St. Jerome. It is just possible, though not in the least probable, that the thirteenth-century Jewish author of HL made use of the Vulgate. (b) HG, Hebrew Gasteri, a text copied by Gaster from a midrash on the Pentateuch and published in the "Proc. of the Soc. of Bib. Arch." (xix). This MS., now lost, agreed with the Aramaic of Neubauer and was in a compact style like that of the Vulgate recension. (c) HF, Hebrew Fagii, a very free translation of AB, done in the twelfth century by a Jewish

scholar; it is found in Walton's "Polyglot". (d) HM, Hebrew Munsteri, published by Münster in Basle A. D. 1542, found in Walton's "Polyglot". This text agrees as a rule with Neubauer's Aramaic, even when the latter is at variance with AB. It is, according to Ginsburg, of fifth-century origin. The Hebrew versions together with the Aramaic omit reference to the dog, which plays a prominent part in the other versions.

The foregoing review of the various and diverse recensions of the Book of Tobias shows how hard it would be to reconstruct the original text and how easily textual errors may have crept into our Vulgate or the Aramaic on which it depends.

C. *Contents.*—Unless otherwise stated, these references are to the Vulgate recension, whereof the Douay is a translation. The story naturally divides itself into two parts: (1) the fidelity of Tobias the elder and of Sara to the Lord (i, l-iii, 25); (a) the fidelity of Tobias (i, l-iii, 6),—before the captivity (i, 1-10), during the captivity (i, 11-iii, 6) shown by his acts of mercy to fellow captives (i, 11-17) and especially to the dead (i, 18-25), acts that resulted in his blindness (ii, 1-18), the taunts of his wife (ii, 19-23), and the recourse of Tobias to God in prayer (iii, 1-6). (b) The fidelity of Sara, daughter of Raguel and Edna (iii, 7-23). The very day that Tobias in Ninive was taunted by his wife and turned to God, Sara in Ecbatana was taunted by her maid as the murderess of seven husbands (iii, 7-10), and turned to God in prayer (iii, 11-23). The prayers of both were heard (iii, 24-25).

(2) The fidelity of the Lord to Tobias and to Sara through the ministrations of the angel Raphael (iv, 1-xii, 22).—(a) Raphael cares for the young Tobias on his journey to Gabael in Rages of Media to obtain the ten talents of silver left in bond by his father (iv, 1-ix, 12). The young man set out, after long instruction by his father (iv, 1-23); Raphael joins him as guide (v, 1-28); Tobias while bathing in the Tigris is attacked by a large fish, catches it, and, at the advice of Raphael, keeps its heart, liver, and gall (vi, 1-22); they pass through Ecbatana, stop at Raguel's; Tobias asks Sara for wife and receives her (vii, 1-20); by continence and exorcism and the odour of the burning liver of the fish and the aid of Raphael, he conquers the devil who had slain the seven previous husbands of Sara (viii, 1-24); Raphael gets the money of Gabael in Rages, and brings him to Ecbatana to the marriage celebration of young Tobias (ix, 1-12). (b) Raphael cures the blindness of the elder Tobias, on the return of his son, and manifests the truth that he is an angel (x, 2-xii, 31). Conclusion: The hymn of thanksgiving of Tobias the elder, and the subsequent history of both father and son (xiii, 1-xiv, 7).

D. *Purpose.*—To show that God is faithful to those that are faithful to Him is evidently the chief purpose of the book. Neubauer (op. cit., p. xvi) makes out the burial of the dead to be the chief lesson; but the lesson of almsgiving is more prominent. Ewald, "Gesch. des Volkes Israel", IV, 233, sets fidelity to the Mosaic code as the main drift of the author, who writes for Jews of the Dispersion; but the book is meant for all Jews, and clearly inculcates for them many secondary lessons and one that is fundamental to the rest—God is true to those who are true to Him.

E. *Canonicity.* (1) In Judaism.—The Book of Tobias is deuterocanonical, i. e. contained not in the Canon of Palestine but in that of Alexandria. That the Jews of the Dispersion accepted the book as canonical Scripture is clear from its place in the Septuagint. That the Palestinian Jews reverenced Tobias as a sacred book may be argued from the existence of the Aramaic translation used by St. Jerome and that published by Neubauer, as also from the four extant Hebrew translations. Then, most of these Semitic versions were found as Midrashim, or *haggada*, of the Pentateuch.

(2) Among Christians.—Despite the rejection of Tobias from the Protestant Canon, its place in the Christian Canon of Holy Writ is undoubted. The Catholic Church has ever esteemed it as inspired. St. Polycarp (A. D. 117), "Ad Philippenses", x, urges almsgiving, and cites Tob., iv, 10, and xii, 9, as authority for his urging. Deutero-Clement (A. D. 150), "Ad Corinthios", xvi, has praises of almsgiving that are an echo of Tob., xii, 8, 9. St. Clement of Alexandria (A. D. 190-210), in "Stromata", vi, 12 (P. G., IX, 324), cites as the words of Holy Writ "Fasting is good with prayer" (Tob., xii, 9); and in "Stromata", i, 21; ii, 23 (P. G., VIII, 853, 1089), "What thou hatest, do not unto another" (Tob., iv, 16). Origen (about A. D. 230) cites as Scripture Tob., iii, 24, and xii, 12, 15, in "De oratione", II; Tob., ii, 1, in sec. 14; Tob., xii, 12, in sec. 31 (cf. P. G., XI, 448, 461, 553); and writing to Africanus (P. G., XI, 80) he explains that, although the Hebrews do not use Tobias, yet the Church does. St. Athanasius (A. D. 350) uses Tob., xii, 7, and iv, 19, with the distinctive phrase "as it is written", cf. "Apol. contra arianos", II, and "Apol. ad Imper. Constantium" (P. G., XXV, 268, 616). In the Western Church, St. Cyprian (about A. D. 248) very often refers to Tobias as of Divine authority just as he refers to the other books of Holy Writ; cf. "De mortalitate", x; "De opere et eleemosynis", v, xx; "De patientia", xviii (P. L., IV, 588, 606, 634); "Ad Quirinum", i, 20, for Tob., xii; iii, 1 for Tob., ii, 2; and iv, 5-11; iii, 62, for Tob., iv, 12 (P. G., IV, 689, 728, 729, 767). St. Ambrose (about A. D. 370) wrote a book entitled "De Tobia" against usury (P. L., XIV, 759), and introduced it by referring to the Biblical work of that name as "a prophetic book", "Scripture". In the entire Western Church, however, the canonicity of Tobias is clearest from its presence in the Old Latin Version, the authentic text of Scripture for the Latin Church from about A. D. 150 until St. Jerome's Vulgate replaced it. The canonical use of Tobias in that part of the Byzantine Church whose language was Syriac is seen in the writings of St. Ephraem (about A. D. 362) and of St. Archelaus (about A. D. 278). The earliest canonical lists all contain the Book of Tobias; they are those of the Council of Hippo (A. D. 393), the councils of Carthage (A. D. 397 and 419), St. Innocent I (A. D. 405), St. Augustine (A. D. 397). Moreover, the great fourth- and fifth-century MSS. of the Septuagint are proof that not only the Jews but the Christians used Tobias as canonical. For the Catholic the question of the canonicity of Tobias was infallibly settled by the decisions of the Councils of Trent, Session IV (8 April, 1546) and of the Vatican, Session III, ch. 2 (24 April, 1870).

Against the canonicity of Tobias are urged several rather trivial objections which would at first sight seem to impugn the inspiration of the narrative. (a) Raphael told an untruth when he said he was "Azarias the son of the great Ananias" (v, 18). There is no untruth in this. The angel was in appearance just what he said he was. Besides, he may have meant by ‘ăzáryāh, "the healer of Jah"; and by ‘ănányāh, "the goodness of Jah". In this event he only told the young Tobias that he was God's helper and the offspring of the great goodness of God; in this there would be no falsehood. (b) A second objection is that the angelology of Tobias is taken over from that of the Avesta either directly by Iranian influence or indirectly by the inroad of Syriac or Grecian folk-lore. For Raphael says: "I am the angel Raphael, one of the seven who stand before the Lord" (xii, 15). These seven are the Amesha Spentas of Zoroastrianism: cf. Fritzsche, "Exegetisches Handbuch zu den Apocr.", II (Leipzig, 1853), 61. The answer is that the reading seven is doubtful; it is in א, AB, Old Latin, and Vulg.; it is wanting in the Greek cursive text, Syriac, and HM. Still, admitting the reading of the Vulgate, the Amesha Spentas have infiltrated into Avestic religion from the seven Angels of Hebraistic Revelation and not vice versa. Moreover, there are not seven Amesha Spentas in the angelology of the Avesta, but only six. They are subordinated to Ahura Mazda, the first principle of good. True, he is, at times, grouped with the six lower spirits as seven Amesha Spentas; but in this grouping we have not by any means seven angels standing before the Deity.

F. *Historical Worth.* (1) To Protestants.—The destructive criticism which, among Protestants, has striven to do away with the canonical books of the Old Testament has quite naturally had no respect for those books the critics call apocryphal. The Book of Tobias is to them no more than are the Testament of Job, the Book of Jubilees, and the story of Ahikhar. From the standpoint of historical criticism it is to be grouped with these three apocryphal (J. T. Marshall, Principal of the Baptist College, Manchester, in Hastings's "Dict. of the Bible", s. v.). Simrock in "Der gute Gerhard und die dankbaren Todten" (Bonn, 1858) reduces the story to the folk-lore theme of the gratitude of the departed spirit; the yarn is spun out of this slim thread of fancy that the souls of the dead, whose remains Tobias buried, did not forget his benevolence. Erbt (Encycl. Biblica, s. v.) finds traces of Iranian legend in the name of the demon Asmodeus (Tob., iii, 8) which is the Persian *Aëshma daêva;* as also in the dog,—"with the Persians a certain power over evil spirits was assigned to the dog." And again: "the Jewish nation takes up a foreign legend, goes on repeating it until it has got it into fixed oral form, in order next to pass it on to some story-writer who is able to shape it into an edifying household tale, capable of ministering comfort to many succeeding generations." Moulton, "The Iranian background of Tobit" (Expository Times, 1900, p. 257), considers the book to be Median folk-lore, in which the Semitic and Iranian elements meet. On the Ahikhar story, cf. "The Story of Ahikhar from the Syriac, Arabic, Armenian, Ethiopic, Greek, and Slavonic versions" by Conybeare, Harris, and Mrs. Smith, a work which will be brought back to 407 B. C. in a new edition soon to appear (Expositor, March 1912, p. 212).

(2) To Catholics.—Until recently there never was question among Catholics in regard to the historicity of Tobias. It was among the historical books of the Old Testament, the Fathers had always referred to both elder and younger Tobias and to the other personages of the narratives as to facts and not to fancies. The stories of almsgiving, burial of the dead, angelophany, exorcism, marriage of Sara with Tobias the younger, cure of the elder Tobias,—all these incidents were taken for granted as fact-narrative; nor was there ever any question of likening them to the tales of "The Arabian Nights" and the "Fables of Æsop". Jahn, "Introductio in libros sacros", 2nd ed. (Vienna, 1814), 452, gives the stock objections to the historicity of Tobias, and suggests that either the entire composition is a parable to teach that the prayers of the upright are heard or at most only the main outline is fact-narrative. His book was put on the Index (26 Aug., 1822). Anton Scholz, "Die heilige Schrift", II, iii, p. 12, and Movers in "Kirchenlexicon" (first ed., I, p. 481) hold that Tobias is a poetic fiction. Cosquin, in "Revue biblique" (1899, pp. 50–82), tries to show that the sacred writer of Tobias had before his eyes a form of the Ahikhar story and worked it over rather freely as a vehicle to carry the inspired thought of the moral he wished to convey to his readers. Barry, "The Tradition of Scripture" (New York, 1906), p. 128, says: "Its relation to other stories, such as *The Grateful Dead* and the tale of *Ahichar*, has been used in illustration of the romantic nature ascribed to it by modern readers; so, too, the symbolical names of its personages, and the borrowings, as they say, from Persian mythology of Asmodeus, etc." Gigot, "Special introduction to the study of the Old Testament", I (New York, 1901), 343–7, gives at length the arguments in favour of the non-historical character of the book and attempts no refutation of the same.

With these and a few other exceptions, Catholic exegetes are unanimous in clearly defending the historicity of Tobias. Cf. Welte in "Kirchenlexikon" (first ed., s. v. *Tobias);* Reusch, "Das Buch Tobias", p. vi; Vigouroux, "Manuel biblique", II (Paris, 1883), 134; Cornely, "Introd. in utriusque testamenti libros sacros", II (Paris, 1887), i, 378; Danko, "Hist. revelationis v. t.", 369; Haneburg, "Gesch. der bibl. Offenbarung" (3d ed., Ratisbon, 1863), 489; Kaulen, "Einleitung in die heilige Schrift" (Freiburg, 1890), 215; Zschokke, "Hist. sacra A. T.", 245; Kaulen in "Kirchenlexikon" (second ed., s. v. *Tobias);* Seisenberger, "Practical Handbook for the Study of the Bible" (New York, 1911), 343. This almost unanimity among Catholic exegetes is quite in keeping with the decision of the Biblical Commission (23 June, 1905). By this Decree Catholics are forbidden to hold that a book of the Holy Writ, which has generally been looked upon as historical, is either entirely or in part not history properly so called, unless it be proven by solid arguments that the sacred writer did not wish to write history; and the solidity of the arguments against the historicity of an historical book of the Bible we are not to admit either readily or rashly. Now the arguments against the historical worth of Tobias are not at all solid; they are mere conjectures, which it would be most rash to admit. We shall examine some of these conjectures.

(a) The Ahikhar story is not in the Vulgate at all. As it is in AB, א, and the Old Latin, St. Jerome undoubtedly knew it. Why did he follow the Aramaic text to the exclusion of this episode? He may have looked upon it as an interpolation, which was not written by the inspired author. Even though it were not an interpolation, the Ahikhar episode of Tobias has not been proven to be a legend drawn from a non-canonical source. (b) The angelic apparition and all incidents connected therewith are no more difficult to explain than the angelophanies of Gen., xviii, 19, and Acts, xii, 6. (c) The demonology is not unlike to that of the New Testament. The name "Asmodeus" need not be of Iranian origin; but may just as readily be explained as Semitic. The Aramaic word *'áshmeday* is cognate with the Hebrew *háshmed,* "destruction". And even though it be a mutilated form of some Iranian ancestor of the Persian *Aëshma daêva*, what more natural than a Median name for a demon whose obsession was accomplished upon Median soil? The slaying of the seven husbands was allowed by God in punishment of their lust (Vulg., vi, 16); it is the youth Tobias, not the sacred writer, that suggests (according to AB, א, and Old Latin) the demon's lust as the motive of his killing all rivals. The binding of the devil in the desert of Upper Egypt, the farthest end of the then known world (viii, 3), has the same figurative meaning as the binding of Satan for a thousand years (Apoc., xx, 2). (d) The unlikelihood of the many coincidences in the Book of Tobias is mere conjecture (cf. Gigot, op. cit., 345). Divine Providence may have brought about these similarities of incident, with a view to the use of them in an inspired book.

(e) Certain historical difficulties are due to the very imperfect condition in which the text has reached us. (i) It was Theglathphalasar III who led Nephthali (IV Kings, xv, 29) into captivity (734 B. C.), and not, as Tobias says (i, 2), Salmanasar. Yet this reading of the Vulgate, Old Latin, and Aramaic is to be corrected by the name Enemesar of AB and א. This latter reading would be equivalent to the Hebrew ענם סר, a transliteration of the Assyrian *kenum śar*. As the appellative *śar*, "king", may precede or follow a personal name, *kenum śar* is *śar kenum*, that is Sargon (*śarru-kenu* II, B. C. 722). It can readily be that, twelve years after Theglathphalasar III began the deportation of Israel out of Samaria, Sargon's scouts completed the work and routed some of the tribe of Nephthali from their fastnesses. (ii) A like solution is to be given to the difficulty that Sennacherib is said to have been the son of Salmanasar (i, 18), whereas he was the son of the usurper Sargon. The Vulgate reading here, as in i, 2, should be that of AB and א, to wit, Enemesar; and this stands for Sargon. (iii) In B, xiv, 15, Ninive is said to have been captured by Ahasuerus (Ἀσύηρος) and Nabuchodonosor. This is a mistake of the scribe. א reads that Achiacharos took Ninive and adds that "he praised God for all He had done against the children of Ninive and Assyria". The word for Assyria is Αθουρείας, Hebrew *'ásshûr*, Aramaic *'áhûr;* this Greek word misled the scribe to write 'Ασύηρος for the name of the king, Αχιάχαρος, i. e. the Median King Cyaxares. According to Berossus, Cyaxares was, in his campaign against Ninive, allied to the Babylonian King Nabopalassar, the father of Nabuchodonosor; the scribe of B has written the name of the son for that of the father, as Nabopalassar was unknown to him. (iv) Rages is a Seleucid town and hence an anachronism. Not at all; it is an ancient Median town, which the Seleucids restored.

G. *Origin.*—It is likely that the elder Tobias wrote at least that part of the original work in which he uses the first person singular, cf. i, 1–iii, 6, in all texts except the Vulgate and Aramaic. As the entire narrative is historical, this part is probably autobiographical. After revealing his angelic nature, Raphael bade both father and son to tell all the wonders that God had done them (Vulg., xii, 20) and to write in a book all the incidents of his stay with them (cf. same verse in AB, א Old Latin, HF, and HM). If we accept the story as fact-narrative, we naturally conclude that it was written originally during the Babylonian Exile, in the early portion of the seventh century B. C.; and that all save the last chapter was the work of the elder and younger Tobias. Almost all Protestant scholars consider the book post-Exilic. Ewald assigns it to 350 B. C.; Ilgen, the bulk to 280 B. C.; Grätz, to A. D. 130; Kohut, to A. D. 226.

The introductions of CORNELY, KAULEN, DANKO, GIGOT, SEISENBERGER. Although the Fathers use Tobias, only BEDE (*P. L.*, XCI, 923–38) and WALAFRID STRABO (*P. L.*, CXIII, 725) have left us commentaries thereon. During the Middle Ages, HUGH OF ST. VICTOR, *Allegoriarum in Vetus Testamentum*, IX (*P. L.*, CLXXV, 725), and NICHOLAS OF LYRA, DENIS THE CARTHUSIAN, HUGH DE S. CARO, in their commentaries on all Scripture, interpreted the Book of Tobias. Later commentators are SERARI (Monza, 1599); SANCTIUS (Lyons, 1628); MAUSCHBERGER (Olmutz, 1758); JUSTINIANI (Rome, 1620); DE CELADA (Lyons, 1644); DREXEL (Antwerp, 1652); NEUVILLE (Paris, 1723); GUTBERLET (Münster, 1854); REUSCH (Freiburg, 1857); GILLET (Paris, 1879); SCHOLZ (Würzburg, 1889); CURCI (Naples, 1890); DE MOOR, *Tobie et Akhiahar* (Louvain, 1902); VETTER, *Das Buch Tobias und die Achikar-Sage* in *Theol. Quartalschrift* (Tübingen, 1904). The principal Protestant authorities have been cited in the body of the article.

WALTER DRUM.

Tocqueville, CHARLES-ALEXIS-HENRI-MAURICE CLEREL DE, writer and statesman, b. at Verneuil, Department of Seine-et-Oise, 29 July, 1805; d. at Cannes, 16 April, 1859. He was the great-grandson of Malesherbes, the defender of Louis XVI. As a judge at Versailles in 1830 he formed a friendship with Gustave de Beaumont, with whom he travelled to America in 1831. Tocqueville's letters show that he foresaw what strides the Church was destined to make in America and likewise the dogmatic nothingness which would result from Unitarianism and the absurdities of Illuminism. Two publications resulted from this journey: the collective work of the two friends published in 1832 under the title "Du système pénitentiaire aux Etats-Unis et de son application en France"; the second, Tocqueville's personal work, is the celebrated book "La démocratie en Amérique", of which the first volume appeared in 1835 and the second in 1840. The work won for Tocqueville admission to the Académie des sciences morales et politiques (1838) and the French Academy (1841).

The library of the Seminary of St-Sulpice preserves a copy of "La Démocratie" annotated by Mgr Bruté, first Bishop of Vincennes, who registered in the margin a number of exceptions to Tocqueville's assertions. Those notes have been transcribed by Mgr Baunard. Tocqueville held that democracy could exist only by seeking a moral support in religion, and that religion could prosper only by accommodating itself to democracy, but he is inclined to regard as too severe the doctrinal, disciplinary, and liturgical exactions of Catholicism, and in Mgr Baunard's opinion his work leaves the impression that he was only half Catholic.

CHARLES-ALEXIS DE TOCQUEVILLE
From a lithographic portrait

The work has been charged with several serious defects as regards political observation; he dealt at too great length with the constitution and organism of the central government, paying too little attention to the provincial legislation of the various states of the Union. He relegates to the end of the first part the study of what he calls "the accidental or providential causes" of the maintenance of the democracy, and his work would be clearer if he had treated in the beginning the geographical and economic conditions of America. As his work progresses he loses sight of American democracy and deals in a general way with democratic societies.

As a deputy for Valognes from 1839 Tocqueville sat with the opposition and voted for liberty of instruction. Under the Second Republic he was a member of the Constituent and Legislative Assemblies and vice-president of the latter.

The Roman expedition had been for some weeks under way when Tocqueville assumed the portfolio for foreign affairs in the Odilon Barrot cabinet (2 June–31 October, 1849). He caused it to be proceeded with, at the same time writing to the French ambassador Corcelle: "The Roman question is the mountain which threatens to bury us all." He recommended that Oudinot's army refrain from bombarding the monuments of Rome, which were, he wrote to Corcelle, "the property of the Christian world", and according to his instructions Pius IX's return should have been accompanied by an amnesty and the granting of a Constitution.

Under the Empire he returned to private life and undertook his work "L'ancien régime et la révolution", of which only the first part appeared (1856). In pages of beautiful religious psychology Mgr Baunard has shown how Tocqueville's mind and conscience, chiefly under Madame Swetchine's influence, climbed upwards toward a profoundly Christian death. These pages are an interesting document on the evolution of the Liberal ideas of the middle of the nineteenth century. After Tocqueville's death Gustave de Beaumont collected his works in nine volumes. Tocqueville's memoirs of the Republic of 1848 were published in 1893, his correspondence with Gobineau in 1908.

De Beaumont, *Notice sur Alexis de Tocqueville* (Paris, 1897); d'Eichthal, *Tocqueville et la démocratie libérale* (Paris, 1897); Faguet, *Politiques et moralistes du 19e siècle*, 3rd series (Paris, 1900); Marcel, *Essai politique sur Alexis de Tocqueville* (Paris, 1910); Falloux, *Correspondance d'Alexis de Tocqueville avec Mme Swetchine* in *Correspondant* (25 Feb., 1866); Baunard, *La foi et ses victoires*, II (Paris, 1884).

GEORGES GOYAU.

Todeschini, FRANCESCO. See PIUS III, POPE.

Todi, DIOCESE OF (TUDERTINA), in Central Italy, is immediately dependent on the Holy See. The city of Todi stands on a steep hill commanding the valley of the Tiber. Its triple walls may still be seen; the innermost, built of rough grey travertine stone, is of Umbrian or Etruscan origin; the middle wall is Roman, and the outside wall dates from the sixth or seventh century. The cathedral, in Lombard style, contains ten pillars of oriental marble. S. Fortunata is a splendid specimen of Italian Gothic. S. Maria della Consolazione, one of the most harmonious works of the Renaissance, was begun in 1508 by Cola Matteuccio; the cupola was constructed in 1606. The church of the Servites of Mary contains the body of St. Philip Benizi, whose statue is the work of Bernini. Almost all the churches possess pictures by Polinari, a native of Todi. The communal hall (1267) is also worthy of notice. On the pre-Roman coins the city is called Tutere; the Romans called it Tuder, or Tudertum. It was sacked by Crassus in the Civil War (83 B.C.); Augustus established a colony there. During the war of the Goths it withstood Totila during a long and severe siege. The Lombards failed to capture it, and Todi and Perugia remained the two chief fortresses defending the passage through the duchy from Rome to the Exarchate. It was included in Pepin's donation to the Holy See. In the eleventh century Todi was a republic, and in 1340 its municipal statutes were drawn up by the jurisconsult Bartolo. In the factions of the Middle Ages Todi was almost always Ghibelline, and was in constant conflict with Perugia. Boniface IX gave the city to the Malatesta of Rimini, but soon took it back. During the fifteenth century it often changed rulers—Biondo Michelotti, Pandolfo Malatesta, Francesco Sforza (1434), Piccinino, Gabriello Catalani (Guelph), who was treacherously slain (1475). The city fell into the hands of Giordano Orsini, who was expelled by Cardinal Giuliano della Rovere (Julius II). The factions were ended by the agreement of the Chiaravalle and the Atti. In 1503 the Orsini were again expelled, on which occasion the fortress of Gregory IX, reputed impregnable, was destroyed.

THE CATHEDRAL, TODI
Built, XIII Century; restored, XIV and XV

Todi is the birthplace of Fra Jacopone, the adversary of Boniface VIII and supposed author of the "Stabat Mater", and of the humanist Antonio Pasini (Antonio da Todi). The city honours several martyrs, its bishops, among whom are St. Terentius, or Terentianus, martyred under Diocletian. Other bishops are: St. Callistus, killed by the Goths, succeeded by Fortunatus, whose body was taken to France; Theophylactus (787), sent by Pope Adrian to England and to the Council of Frankfort (794); Rustico Brancaleone (1179), several times a papal legate; Rainuccio degli Atti (1326), expelled from the city by the partisans of Nicolas V, the antipope; Andrea degli Atti (1356), the restorer of ecclesiastical discipline; Guglielmo Dallavigna (1405), who tried to induce the antipope Benedict XIII to renounce his claim; Bartolomeo Aglioni (1436), imprisoned during the troublesome times; Marcello Sante (1606), who erected the seminary; Carpegno (1638), who promoted study and discipline; Cardinal Ulderico; Cardinal Giambattista Altieri (1643), brother of Clement X, a famous canonist; the brothers Filippo (1709) and Ludovico Gualtieri (1719), who erected a new seminary; Francesco M. Pasini (1760), under whom the restoration of the cathedral was completed. The diocese contains 49,200 inhabitants, 98 parishes, 97 secular and 15 regular priests, 6 religious houses of men and 8 of women, 1 boys' college, and 2 girls' schools.

Cappelletti, *Le chiese d'Italia*, XXII (Venice, 1857); Leoni, *Memorie storiche de Todi* (Todi, 1860).

U. BENIGNI.

Tokio, ARCHDIOCESE OF (TOKIENSIS), comprises 21 provinces or 15 departments with a population of over 16,000,000 inhabitants. From 1866 until 1876 Japan formed only one vicariate Apostolic administered by Mgr Petitjean, the first vicar Apostolic of the country (1866–1884). In 1876 it was divided into two vicariates; that of South Japan, extending from Biwa Lake to the Loochoo Islands, with Mgr Petitjean at Osaka, and that of North Japan, comprising the northern provinces from Biwa Lake to the Kurile Islands, ruled by Mgr Osouf (1876–1906), the new vicar Apostolic, residing at Tokio. In 1891 Leo XIII established the ecclesiastical hierarchy in Japan, and erected the Diocese of Hakodate out of the eight most northern provinces and the Yezo, Sado, and Kurile Islands. The same year Mgr Osouf was created Archbishop of Tokio, with the Bishops of Nagasaki, Osaka, and Hakodate as his suffragans. When, in 1866, Mgr Petitjean visited the territory of the future Archdiocese of Tokio, he found only two missionaries at Yokohama, where they had built a church (1862) especially for the use of foreigners, Japanese converts numbering only a few dozens. The actual expansion took place during the thirty years of Mgr Osouf's administration. It was also Mgr Osouf who erected the cathedral of Tokio (1878), and was the first envoy of the pope to the mikado, to whom Leo XIII, 12 Sept., 1885, had him present an autographic letter. The archdiocese numbers (1911) one archbishopric, Mgr Bonne, 27 missionaries, 2 native priests, 23 catechists and 9858 Catholics. Tokio has 4186 Catholics divided into six parishes, while Yokohama, the cradle of the mission, besides the parish for foreigners, who number 492, has another church for the Japanese, who number 1213. In different towns and villages there are 50 stations provided with chapels or oratories. Until lately a great many of these parishes and stations had their parochial schools, which, however, had all to be closed for want of means. Besides their ordinary work the missionaries direct a seminary for native priests, two homes for Catholic students, an industrial school for destitute boys (69), an asylum for the aged and homeless, and a hospital with 74 lepers. They also publish two monthly magazines. Engaged in charitable, educational, and mission work are: 42 Brothers of Mary, of whom 9 are Japanese; six Jesuit Fathers, of whom one is Japanese; four Fathers of the Divine Word; 48 Ladies of St. Maur (12 Japanese); 23 Sisters of St. Paul (4 Japanese); and 21 Ladies of the Sacred Heart. The chronological order of their work is as follows: in 1873 the Ladies of St. Maur founded in Yokohama an asylum for destitute girls (236 inmates); an academy for foreigners (1874); and a high school for Japanese (1899). In Tokio they founded an academy (1887), and a foreign language and music school for girls of the highest nobility (1898), and in Shizuoka another high school (1903). The total number of their pupils is 947. The Sisters of St. Paul established in Tokio (1881) an asylum for destitute girls (108 inmates), an academy for foreign girls, and another one for Japanese. The total number of their pupils is 477. The Brothers of Mary direct in Tokio a college (1888) with 830 pupils belonging to the best families, and in Yokohama a commercial school for foreigners (1899) with 106 pupils. The Ladies of the Sacred Heart in Tokio have charge of an academy for girls of the higher classes, both foreign and Japanese (1908). Already they have 121 pupils. The Jesuit Fathers arrived in Tokio in 1908, with the intention of starting a Catholic university. Finally, in 1909, Mgr Mugabure, coadjutor (1902) and successor of Mgr Osouf (1906–10), entrusted four of the western provinces to the care of the Fathers of the Divine Word, residing at Kanazawa. In 1911 the number of baptisms were 1383; marriages, 83; burials, 1149; confirmations 452; Easter Communions, 3512.

M. Steichen.

Toledo, Archdiocese of (Toletanensis), primatial see of Spain, whose archbishop, raised almost always to the dignity of cardinal, occupies the first place in the ranks of the higher Spanish clergy. Its suffragan dioceses are Coris, Cuenca, Madrid-Alcalá, Plasencia, and Sigüenza. In the course of its long and varied history this diocese has undergone many changes which have successively extended and contracted its vast territory. Geographically its present position is a very unique one, as it consists of four sections separated one from the other and surrounded by other dioceses. The first or principal section (in which the City of Toledo, the capital of the diocese, is situated) is in the centre of the peninsula in the region which was known as the Kingdom of Toledo or New Castile. This section comprises the greater part of the civil Province of Toledo (the district in the north-west belonging to the Diocese of Avila; the extreme eastern strip forms a part of the Diocese of Cuenca), and on the western side it takes a small strip from the eastern section of the provinces of Cáceres and Badajoz. It is bounded on the north by the dioceses of Madrid-Alcalá and Avila; on the south by the Diocese-Priorate of the Military Orders; on the east by the Diocese of Cuenca; and on the west by the Diocese of Plasencia. The second territorial section is formed by a half, approximately speaking, of the eastern portion of the Province of Guadalajara, surrounded by the dioceses of Madrid-Alcalá, Segovia, Sigüenza, and Cuenca. The third territorial section is formed by a great portion of the Province of Albacete on the western side (the ancient Vicarage of Alcaraz), surrounded by the dioceses of Cuenca, Murcia, and Jaen, and the Diocese-Priorate of the Military Orders. The last and smallest territorial section consists of the eastern portion of the Province of Jaen (rural deanery of Cazorla) and the north-eastern portion of the Province of Granada (rural deanery of Huescar) surrounded by the dioceses of Jaen, Murcia, Almeria, and Guadix.

Christianity was introduced into Carpetania in the first century. According to an ancient and venerable tradition the Roman, St. Eugenius, is named as the first Bishop of Toledo and the founder of the see. Certain chronological lists give a series of bishops of Toledo prior to and following St. Eugenius, but modern historical criticism has rejected them. A fierce persecution raged in Toledo under the emperors Diocletian and Maximus, St. Leocadia being one of the most illustrious of the martyrs (9 Dec., 306). It has been asserted that after the Edict of Milan (313) Emperor Constantine raised Toledo to the rank of a metropolitan, but there is absolutely no foundation for this, as the prelates of Toledo continued to rank simply as bishops. Among the most famous during the Roman occupation were Melantius (286?–306?), who is supposed to have consecrated the church of Toledo and who wrote the life of St. Severus, martyr; Audentius (367?), author of "De fide adversus hæreticos" (which has been lost); and Isichius (Hesychius), writer, orator, and poet, in whose time the Visigoths took possession of Carpetania and its capital Toledo (466 or 7). The diocese attained great importance during this period, as its principal city was the seat of the Visigothic Court. It was raised to the rank of a metropolitan and became the centre of a vast ecclesiastical province. At this time Toledo had as suffragan dioceses: Acci, Arcabrica, Basta, Beartia, Bigastrum, Castulo, Complutum, Dianium, Elotona, Illici, Mentesa, Oretum, Oxoma, Palentia, Setabi, Secobia, Segobriga, Segontia, Valentia, Valeria, and Urci. Under the bishop or archbishop Montanus Toledo commenced to extend its primatical jurisdiction, although it was not until many centuries afterwards that this title was conferred upon it. During the Visigothic period many bishops, illustrious for their faith and holiness, governed the See of Toledo. Among these may be mentioned: Julian I, author of various apologetic and moral treatises; Euphemius or Epiphanius, in whose time the Visigoths were converted to Christianity; and Aurasius (603–15), who successfully defended the claim of Toledo for metropolitan supremacy which was disputed by Cartagena.

The archbishops of the seventh century (615–90) were distinguished for their holiness: St. Eladius (615–33); St. Eugenius III (646–57), poet, theologian, and musician; St. Ildefonsus (659–68), the most notable prelate of Toledo during the Gothic epoch, conqueror of the Jovinian heresy, favoured with celestial manifestations, author of a celebrated book in defence of the virginity of Mary and of other dogmatic, moral, and historical treatises; and St. Julian II (680–90), author of many works, the best known of which is "Historia Rebellionis Pauli adversus Wambam". During the Mussulman occupation (a period of 373 years) the condition of the Christians who continued to live in the territories they had conquered was subject to many vicissitudes, but the See of Toledo did not cease to exist during this long period of captivity. Cixila (774?–783?) wrote the life of his predecessor, St. Ildefonsus; St.

Eulogius, the noble martyr of Córdova (859), to whom are attributed various Latin treatises, was elected to the see but never took possession of it; Bonitus (862 or 66) wrote an apologetic work in defence of the Abbot Samson. Among the archbishops of the Mozarabic period Elipandus (783–808) is a notable exception to the rest, apostatizing, and embracing and propagating Nestorianism.

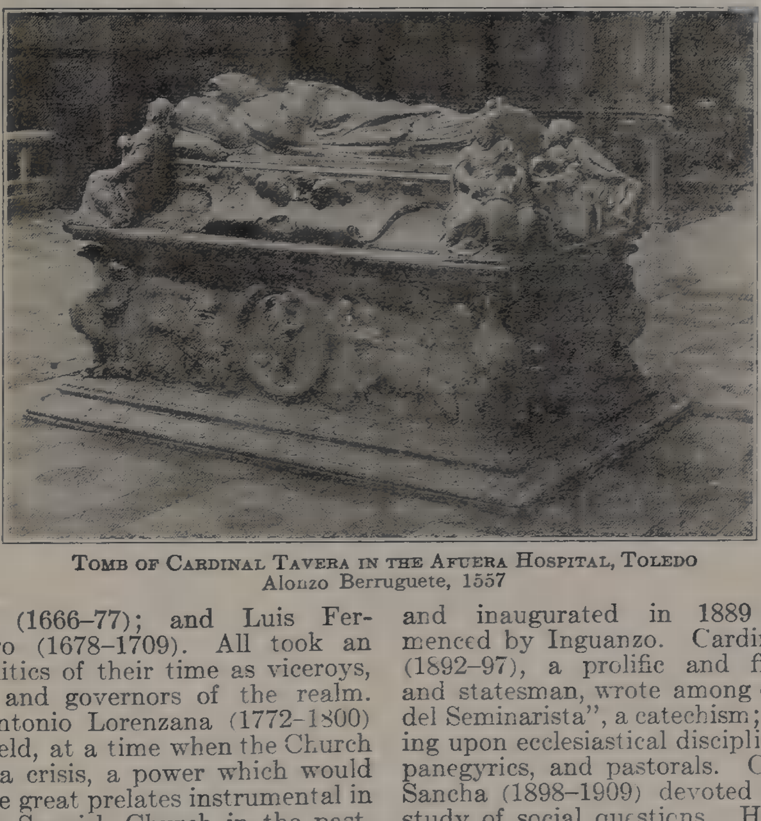
Doorway of the Hospital of S. Cruz, Toledo
Enrique de Egas, 1514

With the reconquest of Toledo in 1085 by Alfonso VI of Castile, the diocese entered upon a new and more prosperous era, favoured as it was by donations and privileges not only of the Castilian sovereigns, but of other potentates and of all social classes. It was thus that it reached that height of power and splendour which made it the envy of all the churches of the kingdom, and which enabled it to contribute such large sums to all national enterprises, to the erection of notable monuments, to the succour of the needy, and to the general diffusion of learning and culture. The first bishop of this period was the Frenchman, Bernard, a Cluniac monk and Abbot of Sahagún (1086–1124), in whose time the principal church of Toledo was once more restored to Catholic worship, and Urban II by a Bull (1088) expressly conferred on Toledo the dignity of primacy over the churches of Spain, a declaration which, however, did not prevent the other churches from disputing with Toledo this high distinction. It was during the pontificate of Urban II that the Roman Rite was substituted for the ancient Isidorian or Mozarabic Rite (1089). Archbishop Rodrigo Jiménez de Rada (1210–47) is one of the most notable figures of his time; a statesman, counsellor of kings, strenuous warrior, and a learned writer, he conferred innumerable services on the Church and the State. He assisted at the great battle of Las Navas de Tolosa; annexed the village of Quesada and the district of Cazorla to the diocese; commenced the building of the cathedral at Toledo, which is still in existence; defended and consolidated the primacy of his see; and contributed to the foundation of the first general schools (*Estudios generales*). Rodrigo began a great historic work, basing it on Christian and Arabic sources, completing the plan with the section called "De Rebus Hispaniæ", last and best of his historical works. Gil de Albornoz (1339–50), cardinal, was a great statesman and warrior, and founder of a famous college for Spaniards at the University of Bologna, which produced many celebrated men.

Pedro Tenorio (1376–99), an enterprising and energetic man, was very influential during the reigns of Henry II, John I, and Henry III; he restored buildings and works of public utility at his own expense, and founded the Hospital of Villafranca del Puente, which is still in existence and in active use. Pedro González de Mendoza (1483–95), called *el gran cardenal de España*, was of noble lineage and the counsellor of the Catholic sovereigns; he displayed a princely prodigality in the many works which he undertook and completed. Among these may be mentioned the Colegio Mayor of Valladolid and the Hospital of Santa Cruz for foundlings. His successor, Fray Francisco Ximénez de Cisneros (1495–1517), is perhaps the most illustrious of all the prelates of Toledo, and at the same time one of the most prominent figures in the history of Spain. In him were united qualities rarely found combined, for he was a learned and saintly religious, an austere and energetic reformer, a conqueror and statesman, the father of the poor, and the Mæcenas of Spanish arts and letters. Among the titles conferred on him were Cardinal of Sta. Balbina, confessor of Isabella the Catholic, inquisitor-general, and regent of the kingdom. The Church, humanity, and his diocese found in him a protector and benefactor. He extended the limits of the Diocese of Toledo to Africa, adding Oran and its territory, which he personally and at his own expense conquered (1509). Only some of the many works which he accomplished can be mentioned: among these being the foundation of the University of Alcalá de Henares; the printing of the Complutensian Polyglot Bible; the foundation of the library of the cathedral of Toledo; and the restoration of the Mozarabic Rite in a private chapel. Several monasteries owe their foundation to him, as well as the College of San Juan de la Penitencia at Toledo for the education of virtuous orphan girls, and three public wheat granaries for the benefit of poor labourers at Toledo, Alcalá, and Torrelaguna (his native place).

Some of the archbishops who succeeded Cisneros were distinguished for the liberality with which they promoted the arts, filling the cathedral of Toledo with priceless works of art, the glory of the Spanish Renaissance. Alonso de Fonseca (1524–34) gave during his lifetime to the chapter of Toledo an annual income of 400,000 maravedis to be devoted to providing marriage portions for poor girls; Juan Tavera (1534–45), cardinal, distinguished prelate, and statesman, founded the general Hospital of San Juan Bautista, outside the walls of Toledo; Juan Martínez Guijeno, better known under the latinized form of his name, Silicius (1546–57), cardinal, ardent patriot, and generous protector of the needy, founded at Toledo the College of Nuestra Señora de los Remedios (commonly known as the *Colegio de Doncellas nobles*), an important institution which is still in existence; the Colegio de Infantes, where the choir boys of the cathedral are educated and instructed; and the Monasterio de Recogidas, which he endowed and founded in the ancient synagogue of St. María la Blanca. The Dominican archbishop, Bartolomé Carranza de Miranda (1559–1576), learned theologian and canonist, was the author of the "Suma Conciliorum omnium" published at Venice (1573). Notwithstanding his learning and virtue, he was suspected of heresy, examined before the Inquisition, and eventually acquitted. The learned and pious García de Loaysa Girón (1598–99), strenuous upholder of ecclesiastical discipline, collected and published (with annotations and emendations) the "Collectio conciliorum Hispaniæ". Cardinal Bernardo de Sandoval y Rojas (1599–1618) was liberal and charitable, and a great patron of letters. His administration was advantageous to the diocese; he established its rights over the district of Cazorla; secured the ordinary episcopal jurisdiction in the diocesan territory over the Order of St. John of Jerusalem; and restored to the diocese the important town of Brigueja.

According to reliable statistics the Diocese of Toledo comprised at that time 4 cities, 183 towns, 322 villages and hamlets, with 816 parishes and 751,733 souls. The archiepiscopal estate yielded at the time a revenue of 300,000 ducats. The receipts of the chapter were also ample; the manufacturing industries yielded more than 40,000 ducats annually. The revenues of all the churches of Spain combined did not greatly exceed in value the archiepiscopal estate of Toledo. Cardinal Infante D. Fernando de Austria (1618–41), brother of Philip IV, the successor of Sandoval y Rojas, distinguished himself as an able military commander and as Viceroy of the Low Countries, where victory crowned his military efforts. The cardinal-archbishops who succeeded him were Gaspar de Borja (1643–45); Baltazar Moscoso (1646–65); Pasqual de Aragón (1666–77); and Luis Fernández Porto Carrero (1678–1709). All took an active part in the politics of their time as viceroys, counsellors of state, and governors of the realm. Cardinal Francisco Antonio Lorenzana (1772–1800) understood how to wield, at a time when the Church was passing through a crisis, a power which would have done credit to the great prelates instrumental in the restoration of the Spanish Church in the past. Generous and liberal, "Padre de los Pobres" (Father of the Poor) as he is simply styled in his epitaph, *littérateur*, patron of arts and letters, promoter of national industries and all works of public utility, he carried his zeal into all these spheres. He rebuilt many of the city and country churches of his diocese, made large bequests to the Church, improved the archiepiscopal library, defrayed the expenses of the monumental work entitled "P. P. Toletanorum quotquot extant opera", and of the Gothic Missal and Breviary of the Mozarabic Rite. In the city of Toledo the erection of the university building, the foundation of the hospital for the insane, and of the Real Alcazar (which he also restored), and *la Fonda de la Caridad* (a free lodging-house) are a few of the many works that still bear witness to his zeal. His successor, Cardinal Luis María de Borbón, an Infante of Spain, (1800–23), was president of the regency during the absence of Ferdinand VII. Cardinal Pedro de Inguanzo (1824–36) published some works in defence of the rights of the Church and of ecclesiastical discipline, and commenced the great seminary building.



Tomb of Cardinal Tavera in the Afuera Hospital, Toledo
Alonzo Berruguete, 1557

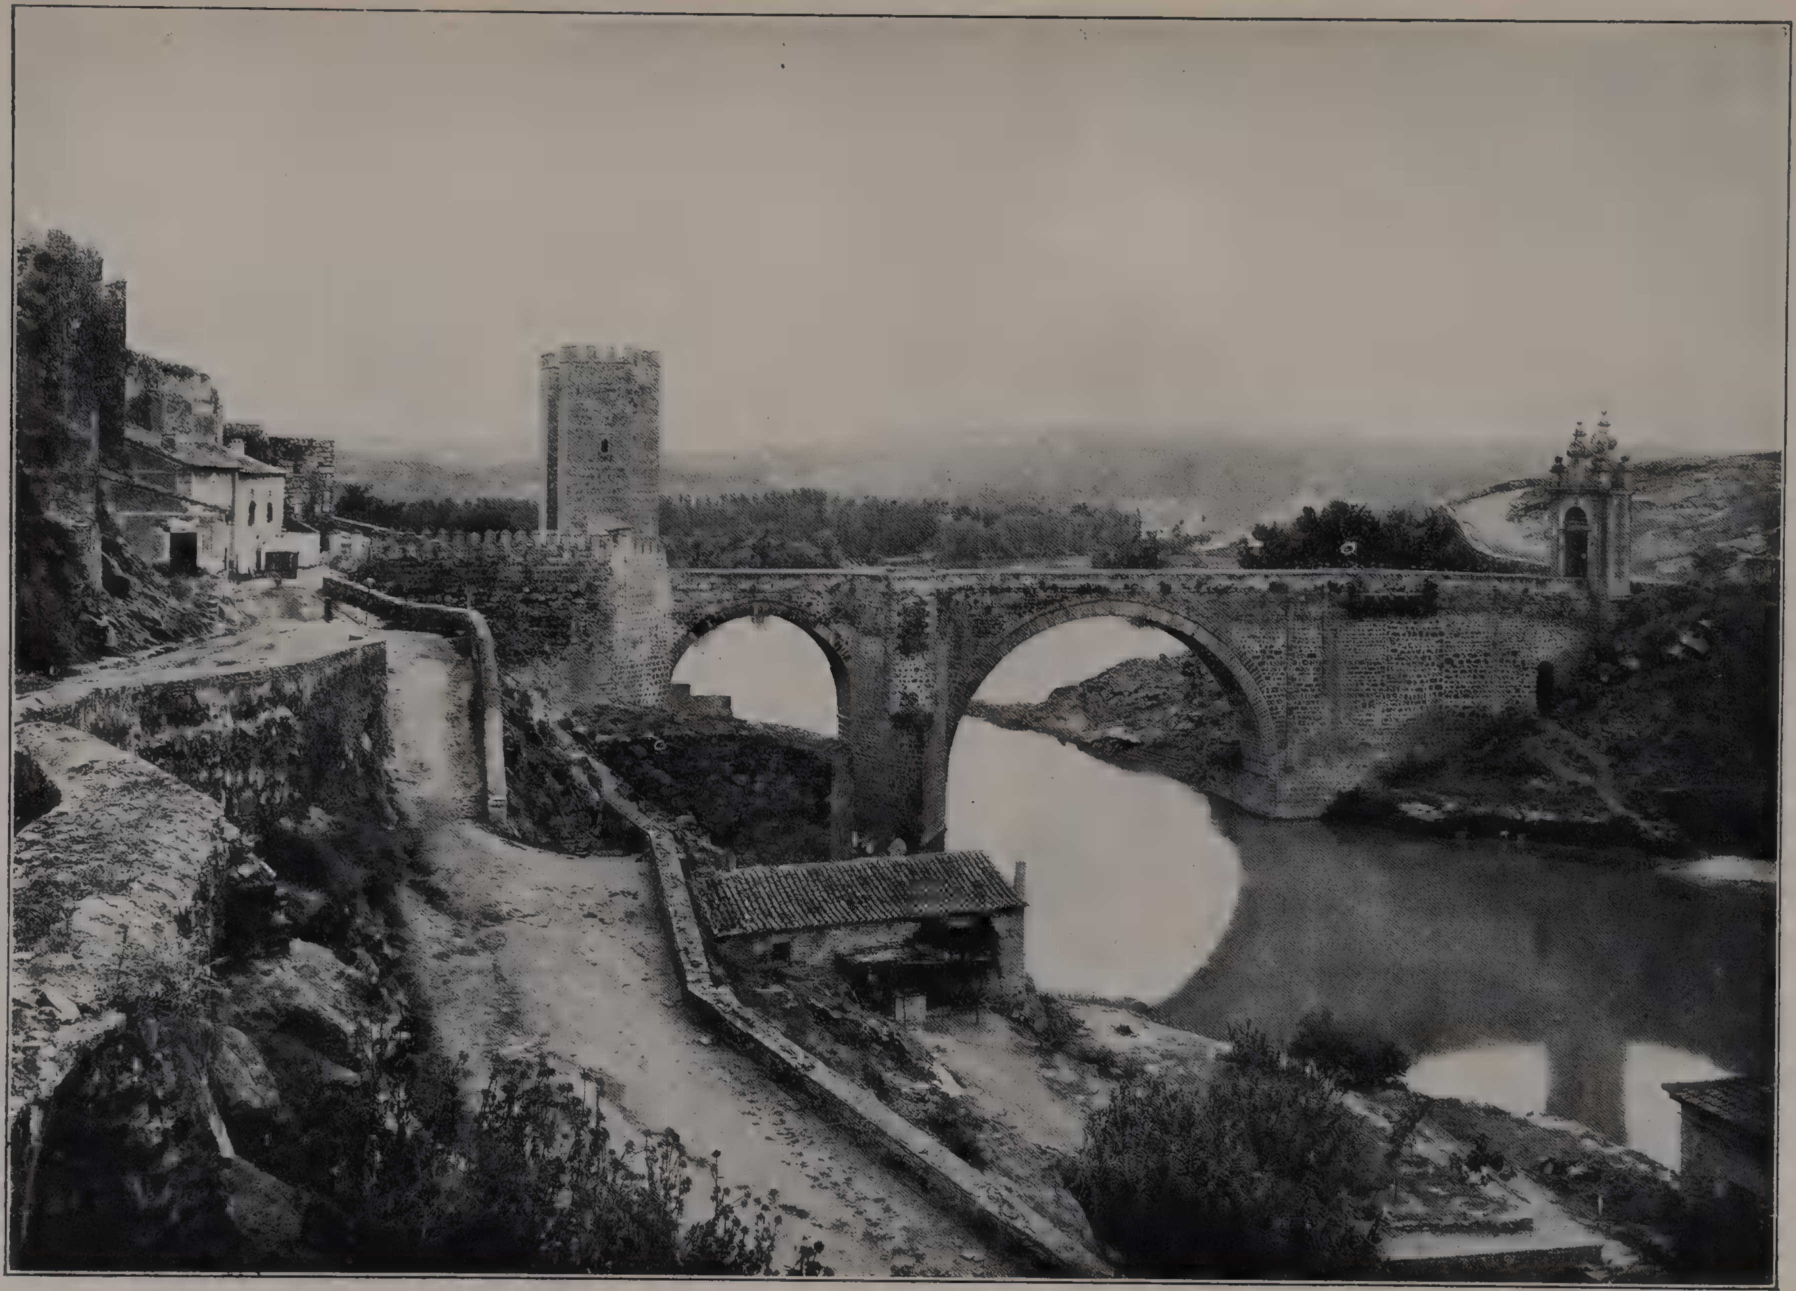
Cardinal Juan Ignacio Moreno (1875–84), in his youth professor in the Notariado, published a work entitled "Tratado sobre el ortorgamiento de poderes públicos", and as the bishop of various Spanish dioceses (lastly that of Toledo) he defended the Church against the aggressions of revolution, taking part also in Roman affairs, as his high position as cardinal demanded. At this time the Archdiocese of Toledo lost much territory by the erection of the Diocese-Priorate of the Military Orders, which takes up the entire civil Province of Ciudad Real, and was erected by Pius IX, 18 Nov., 1875. Cardinal F. Zeferino González was an illustrious Dominican and the restorer of Scholasticism, author among many other well-known works of the "Estudios sobre la Filosofía" and "Estudios Religiosos, Filosóficos, Scientíficos y Sociales". He had on various occasions declined episcopal honours, but at length, after having occupied the sees of Cordova and Seville, he was raised to that of Toledo, governing from 1884 to 1885, when he resigned the dignity. A still greater reduction in the territorial boundaries of the Diocese of Toledo took place at this time, when the Bull of 7 March, 1885, created the Diocese of Madrid-Alcalá, which comprises the entire civil Province of Madrid. Cardinal Miguel Paya y Rico (1886–92) was a conspicuous figure at the Vatican Council when, as Bishop of Cuenca, he pronounced the decisive discourse which determined the proclamation of papal infallibility. He was learned and charitable, and completed and inaugurated in 1889 the seminary commenced by Inguanzo. Cardinal Antolín Monescillo (1892–97), a prolific and finished writer, orator, and statesman, wrote among other works: "Manuel del Seminarista", a catechism; various articles touching upon ecclesiastical discipline; and many sermons, panegyrics, and pastorals. Cardinal Ciriaco María Sancha (1898–1909) devoted himself mainly to the study of social questions. He wrote "Regimen del terror en Italia Unitaria" and the "Kulturkampf", and numerous discourses and pastoral letters. Cardinal Gregorio María Aguirre, of the Franciscan Order, has, since October, 1909, occupied the primatial see of Spain.

Toledo is one of the greatest art centres not only of Spain but of the civilized world. Of its principal religious edifices, among which are to be found notable works of art in the styles prevailing from the thirteenth to the eighteenth centuries, may be mentioned: the cathedral, a magnificent five-nave Gothic structure, with numerous additional sections commenced in 1227 by King St. Ferdinand and Archbishop Jiménez de Rada; the Franciscan Monastery of San Juan de los Reyes, built in 1476 by Ferdinand and Isabella, to which is attached a church and cloister in ornate Ogival style, and which has recently been richly decorated; the church of the ancient hospital of Santa Cruz founded by Cardinal González de Mendoza, dating from the early part of the sixteenth century, is one of the most beautiful examples of the Plateresque of the early Spanish Renaissance. Of great interest also are a number of the churches of Toledo in which remains of the Visigothic period are preserved, and others built in the Moorish style, called *mudejar* by the Spaniards, which is the Arabic style adopted after the reconquest of the city by Alfonso VI. Mention must also be made of other notable buildings although not of Christian origin—the ancient mosque *del Cristo de la Luz* (reconstructed in the tenth century) and the synagogues of Santa María la Blanca (thirteenth century?) and del Transito (fourteenth century). Many excellent architects, sculptors, and painters worked in Toledo in the numberless monastic and parochial churches of the city, but especially in the construction and embellishment of the cathedral. Among the painters the most important was Dominico Theotocopulis, called “El Greco”, native of Crete, who established himself at Toledo and produced numerous works (chiefly of religious character) which are highly prized and studied at the present time, and which represent one of the most curious phases of Spanish art, marking the point of departure of the modern national art. Many important religious buildings are also to be found in various parts of the diocese, among which may be mentioned: the ancient collegiate church (at present a parish church of Talavera de la Reina), a three-naved Ogival building started by Archbishop Jiménez de Rada in 1211 and finished between the thirteenth and fifteenth centuries; the ancient collegiate church of Torrijos (also used at the present time as a parochial church), a three-naved edifice founded and endowed by Doña Teresa Enríquez (built between 1509 and 1518), an interesting example of the florid Ogival style and the Gothic Plateresque of the transition period; the parochial church of Tembleque, also of the early sixteenth century, an example of the transition period from the Gothic to the Renaissance; and the parochial church of Tepes, a magnificent temple of three naves, designed by the celebrated architect Alonzo Covarrubias and built between the years 1533 and 1552 in the style of the transition period Gothic Plateresque and Grecian Romanesque.

The Cathedral, Toledo

Famous in the history of Toledo are its councils, held in greatest veneration by the sovereign pontiffs, and the source of the purest religious and moral doctrines. They were national and provincial; those held in the years 396 and 400, first of those whose acts have been preserved, opposed the heresy of the Priscillianists and legislated for the reform of the clergy. In 440 or the beginning of 448 a national council seems to have been convoked which once more condemned the doctrines of Priscillian. The second provincial council (527) promulgated five canons in which various points of discipline were established. In the national council held in 540 decisions concerning the reformation of certain disciplinary usages and practices were adopted. The most famous of all the councils of Toledo was the third national council (held in 589), in which King Reccared, the prelates, and grandees, proclaimed their abjuration of the Arian heresy and made a profession of faith according to the doctrine of the Council of Nicæa. In addition, the bishops issued religious decrees against the remaining vestiges of ancient idolatry, restricted the rights of the Jews, commanded that the statutes of previous councils and the decrees of the sovereign pontiffs be observed, and promulgated other canons of great importance for the reformation of accepted usages and the restoration of ecclesiastical discipline. Another national council (597) promulgated two canons relative to the episcopal and priestly state. In the provincial council commonly called the Council of Gundemar (610) the metropolitan jurisdiction of the bishops of Toledo over the entire Province of Cartagena was explicitly stated. In the fourth national council (633), one of the most important held in Spain, presided over by St. Isidore of Seville, very important measures in both canonical and political matters were adopted. The fifth national council (636) was also political in its prescriptions, which were directed towards the defence of the king. The sixth (638) approved constitutions relating to discipline, morals, and political matters. The seventh (646) established certain canons which had been promulgated in previous councils. In the national council which is said to have been held in 650 the heresy of the Monothelites, who denied that Christ had two wills, was condemned. In the reign of the Visigothic king, Recesvindo, besides the councils which are classed as doubtful, were held: the eighth provincial council (653), in which some interesting points relating to discipline and civil law were decided; the ninth provincial (655), in which matters of discipline were discussed; and the tenth national (656) in which certain canons referring to the monastic life were sanctioned. The eleventh provincial council (675), held during the reign of Wamba, formulated certain prescriptions in regard to discipline and the reform of certain usages, concerning the clergy in particular. The twelfth (681) and the thirteenth (683) national, and the fourteenth (684) provincial, councils were held during the reign of Ervigius. The twelfth and thirteenth councils approved certain canons relating to discipline and other usages commonly in practice; and the fathers assembled at the fourteenth professed their adherence to the Sixth Œcumenical Council. The fifteenth national council (688) confirmed the doctrine contained in an apologetic treatise written by St. Julian, Archbishop of Toledo, who presided at the council. The sixteenth and seventeenth (694) councils were also national; the first imposed penance and declared an anathema against Archbishop Sisebert (who had plotted against King Egica), and the second discussed various disciplinary measures. It is believed that still another national council was held during the Visigothic period between 700–712, the acts of which have been lost, but it is said that canons relative to the preservation of the integrity of faith and to the regulation of certain usages were promulgated.

After the reconquest of Toledo by the Christians (1085) at least ten provincial councils were held in the city of Toledo, some of them being of great interest for the canonical history of Spain. Archbishop Raimundo convened that held in 1138, in which certain difficulties existing between the archbishop and the canons with regard to the distribution of the revenues of the Church were adjusted and the number of canonries definitely fixed. The archbishop, Infante Don Juan de Aragón, presided over the council of 1323 which prescribed a formula with regard to articles of faith, the commandments, and the sacraments, and formulated canons relative to points of discipline. The provincial councils of 1324 and



ALCANTARA BRIDGE, TOLEDO

1326 were also called by Don Juan, the first to publish certain papal constitutions and to regulate the life of clerics, and the second to deal with questions of ecclesiastical law and the chastity of the clergy. The council of 1339 convoked by Cardinal Archbishop Albornoz treated points of discipline and ordered all parish priests to take a census of their parishes. Archbishop Don Vasco convoked the council of 1355, the decisions of which were not important. The Western Schism was the occasion of the convoking of another provincial council under Archbishop Tenorio in 1379, in which it was agreed to remain neutral, professing allegiance for the moment neither to the pope at Rome nor the pope at Avignon. The provincial council of 1565–66, held during the time that the trial of Archbishop Carranza de Miranda was pending, was a very notable one giving rise to many incidents; its decrees formed a veritable encyclopedia of ecclesiastical law. The council of 1580 under Cardinal Archbishop Quiroja legislated with regard to converted Moors (Moriscos), and prescribed regulations that were conducive to the preservation of their faith. The council of 1582–83 promulgated very advantageous laws for the propagation of religion and the reform of accepted usages. At that time the suffragan bishops were seven, those of Córdova, Sigüenza, Palencia, Cuenca, Segovia, Jaén, and Osma.

Since the sixteenth century other conciliar reunions have been held, but they do not rank as provincial councils, being simply diocesan synods convoked to arrange diocesan affairs and to compile the constitutions of the archdioceses. The educational and charitable institutions founded in the diocese both in the past and in our own time have been numerous and important; among those still in existence may be mentioned: in Toledo, the Hospital General del Rey, founded in the time of Alfonso VIII of Castile, or St. Ferdinand, for the decrepit, the blind, and the crippled; the Hospital Provincial de la Misericordia, founded in the fifteenth century by Doña Guiomar de Meneses where the sick of both sexes are cared for by the Sisters of Charity; the Hospital de Dementes, commonly called "el nuncio", founded at the end of the fifteenth century by Francisco Ortiz; the Hospital de San Juan Bautista, commonly called "de Afuera", founded about 1539 by Cardinal Archbishop Juan Tavera. Besides these establishments there are in the city of Toledo free public schools for young girls and children and day nurseries, all in charge of the Sisters of Charity. The Colegio de doncellas vírgines de Na. Sa. de los Remedios, commonly called "Doncellas nobles", was founded in 1551 by Cardinal Archbishop Siliceo for the maintenance, education, and training of respectable young women in reduced circumstances, for whom the college also provides a marriage dower. The Asilio Provincial, supported by the provincial committee, shelters foundlings, orphans, the aged of both sexes, and maintains schools for boys and girls. The Little Sisters of the Poor (established at Toledo in 1879) care for the aged of both sexes; the tertiaries of the Divina Pastora (established in the city in 1885) teach girls and assist the sick in their own homes. The Asylum of the Sacred Heart (founded in 1887 by the priest, Joaquín de la Madrid) supports, educates, and obtains employment for orphan boys. The Marist Brothers (established in 1901) teach boys and young men, and the Hermanas del Servicio Doméstico (established in 1902) prepare girls for domestic service and have some orphans under their care. In various other cities, towns, and villages of the archdiocese there are also asylums, hospitals, and free schools. The recognized and authorized Catholic periodicals published to-day in the archdiocese are printed in Toledo and are as follows: "Boletín oficial del arzobispado" (founded in 1846), official ecclesiastical organ, issued on the 10th, 20th, and 30th of each month; "El Castellano", a purely Catholic publication without political affiliations (founded in January, 1903), issued every Tuesday and Saturday; "El Porvenir" (founded in August, 1903), a politico-Catholic supporter of the Carlist cause, and published weekly.

There is no complete history of the Diocese of Toledo. The bibliography of the city, of its territory, its monuments, and its illustrious men is complete and extensive, and for this reason only some books which principally concern the questions treated in this article are given.

Porreño, *Historia episcopal y real de España* (MSS. in the library of the Chapter of the Church of Toledo); Castejón y Fonseca, *Primacia de la Santa Iglesia de Toledo* (Madrid, 1645), which account of the early history of the see should be read with caution, owing to the abundant use of the "false chronicles"; Sevillano, *Defensa christiana política y verdadera de la primacia de las Españas que goza la Santa Iglesia de Toledo* (Madrid, 1726); *Espana sagrada*, V, VI, VII, VIII (Madrid, 1750–52). Lorenzana, *PP. Toletanorum quotquot extant opera* (Madrid, 1782–93); Tejada y Ramiro, *Colección de cánones de la Iglesia española* (Madrid, 1849–50); La Fuente, *Historia eclesiástica de España* (Barcelona, 1855–59); Parro, *Toledo en la mano* (Toledo, 1857); Martín Gamero, *Historia de la ciudad de Toledo* (Toledo, 1862); de Palazuelos, *Los concilios de Toledo* (Barcelona, 1888); de Cedillo, *Toledo en al siglo XVI* (Madrid, 1901).

Conde de Cedillo.

Toledo, Diocese of (Toletana in America), Ohio, U. S. A., formed out of the Diocese of Cleveland and erected into a separate jurisdiction, 15 April, 1910. It includes the Counties of Lucas (Toledo), Allen, Crawford, Defiance, Fulton, Hancock, Henry, Ottawa, Paulding, Putnam, Sandusky, Seneca, Van Wert, Williams, Wood, and Wyandot; an area of 6969 sq. miles. The principal towns are Lima, Tiffin, Fremont, Defiance, and Delphos. Estimated Catholic population, 125,000.

There are 86 parishes with resident priests and 25 missions, 95 diocesan priests and 31 of the regular clergy. The number of parish schools is 65, with an enrolment of 13,500. One college (Jesuit) and three academy-colleges provide the departments for higher education.

The work of charity and reform is supplied by three orphanages, two hospitals, one home for the aged poor, and one house of the Good Shepherd.

History.—The country bordering on Lake Erie was in the path of missioners and trading explorers, who, in the seventeenth century, made their way from Quebec to the upper Great Lakes. French settlers ventured down from Detroit, and a French fort was established on the Maumee in 1680. Traders followed this river to its source in Indiana, whence it was not difficult to reach the more important posts about Vincennes. The lake shore would also have been the natural route for the Jesuit Fathers, who, in the latter half of the eighteenth century, journeyed from Detroit to visit the Hurons, and Father Pierre-Joseph de Bonnécamps, returning to the north with Céloron's company from the expedition to the Ohio, entered Lake Erie on the way to Detroit, at the mouth of the Maumee (Miami of the Lake), 5 Oct., 1749.

Bishop Fenwick, writing to Father Badin in August, 1823 ("Catholic Church in Ohio" in "U. S. Catholic Magazine"), speaks of Catholic Indians along the Seneca River who crossed to Malden and Sandwich in Canada for marriage and baptism. Father Edmund Burke, who signs himself "Vicaire général du Haut Canada", and was stationed near the present Monroe (Frenchtown), Michigan, in 1794, visited, not Fort Meigs, as has been asserted, but Fort Miami, at the rapids of the Maumee; and in 1825 Bishop Fenwick's vicar-general, Father Gabriel Richard, who as early as 1806 had attended Monroe from Detroit, indicates that the district "de la Bai Miamy" was considered as one with that of St-Antoine on the River Raisin. This can be more easily understood, if we remember that the territory of Michigan for a long time laid claim to lands in which Toledo is now located.

Even after Detroit had become a separate diocese, the Rev. P. Carabin, pastor at Monroe, enumerates many on his lists as "inhabitants of Toledo" (1837).

The building of water-ways along the line of the Maumee River from the Ohio and the Wabash to Lake Erie did much to open up the country to German and Irish immigrants invited by Bishops Fenwick and Purcell, of Cincinnati, to avail themselves of the opportunities of labour and farming.

After 1830 organized congregations began to take the place of scattered missions, and a resident pastor was placed at St. Mary's, Tiffin, in 1831.

In 1841 Rev. Amadeus Rappe organized St. Francis de Sales's Parish, Toledo, of which he was pastor until his appointment as first Bishop of Cleveland in 1847. Associated with him and succeeding him in this pastorate was Rev. Louis de Goesbriand, first Bishop of Burlington, Vermont. Among the pioneer priests of this section were Fathers Badin, Ignatius Mullon, Edward T. Collins, Projectus J. Machebœuf (afterwards Bishop of Denver), E. Thienpont, and Henry Damien Juncker (later Bishop of Alton), men eminent for learning as well as piety; and these had the co-operation of the Redemptorist and Sanguinist Fathers, under the leadership respectively of Father Tschenhens (1832) and Father Francis de Sales Brunnet (1844). Members of the latter congregation (C.PP.S.), which was introduced by Father Brunner, are still (1912) in charge of parishes and missions in the Diocese of Toledo.

The growth of Catholicism was particularly noticeable in the city of Toledo. At the date of its erection into an episcopal see there were within the city twenty parishes. This rapid increase had been greatly promoted by a steady influx after 1870 of Poles and Hungarians, employed largely in factories, quarries, and public works.

Among the priests prominent in Toledo in this period of development were: the Rt. Rev. F. M. Boff (1859), who in 1872 was made Vicar-General of Cleveland and held the unique distinction of having served as administrator of that diocese not less than six times in a period of forty years (d. 22 March, 1912); Father Edward Hannin (1863), who was administrator of the Diocese of Cleveland from the resignation of Bishop Rappe to the appointment of Bishop Gilmour, and who when over seventy years of age undertook the building of one of the finest church edifices in the Middle West; and Rev. Patrick F. Quigley, whose widely-noticed action against state interference in parish schools, in the matter of reports and truancy, gave occasion for much hostile demonstration, especially on the part of members of the A. P. A. This priest's contention before the several courts was ably if not successfully maintained by the Hon. Frank H. Hurd, a convert to Catholicism, and a congressman, celebrated for his convincing advocacy of free trade.

The commercial advantages of the city and the numerical strength of Catholics had long drawn attention to Toledo; and on the death of Bishop Horstmann (1908) the bishops of the Province of Cincinnati recommended to the Holy See the division of the Diocese of Cleveland. The request was favourably considered, and Toledo was named as the seat of the new diocese, with St. Francis de Sales's designated as its cathedral church. Rt. Rev. John P. Farrelly, D.D., who had been consecrated Bishop of Cleveland, 1 May, 1909, was appointed temporary administrator. Rt. Rev. Joseph Schrembs, D.D., first bishop, was born at Wuzelhofen, near Ratisbon, Bavaria, 12 March, 1866. Following his elder brother, Rudesind, who had become a Benedictine monk at St. Vincent's, Pennsylvania, he came to the United States in 1877.

He completed his course of humanities when but 16 years of age at St. Vincent's College, near Pittsburg. After a few years spent in teaching, he was accepted by Bishop Richter as a student for the Diocese of Grand Rapids, and entered the Seminary of Montreal in 1884. On 29 June, 1889, Rev. Mr. Schrembs was ordained priest in the cathedral at Grand Rapids. He was successively assistant and pastor at St. Mary's Church, West Bay City, and was transferred to St. Mary's Church, Grand Rapids, Oct., 1900. In 1903 he was appointed vicar-general of the diocese, and was named domestic prelate, Jan., 1906. Meantime he had brought about the establishment of a high school at Grand Rapids, thus demonstrating the feasibility of intermediate grades for the Catholic common school. On 22 Feb., 1911, he was consecrated titular Bishop of Sophene and auxiliary to the Bishop of Grand Rapids. He at once espoused the cause of workmen in their difficulties with the employers in the furniture factories, skilfully averted a panic, and contributed much to bring about an agreement. On 11 Aug., 1911, he was transferred to the See of Toledo. A notable demonstration marked his entry into the city on Sunday, 1 Oct., and on 4 Oct. he was enthroned in his cathedral church.

JOHN T. O'CONNELL.

Toledo, FRANCISCO, philosopher, theologian, and exegete, son of an actuary, b. at Córdova, 4 Oct., 1532; d. at Rome, 14 Sept., 1596. He studied philosophy at Valencia and theology under Domingo Soto at Salamanca. At the age of twenty-three he taught philosophy at Salamanca, and, after his ordination, entered the Society of Jesus there, 3 June, 1558, and made his novitiate at Simanacas. In 1559 he went to Rome and was professed in 1564. He successively filled the posts of master of novices, professor of philosophy for three years, Scholastic and moral theology for six years, and prefect of studies of the Roman College. He was theologian of the Sacred Penitentiary and preacher to the pope and cardinals for twenty-four years, accompanied Monsignor Commendone on his mission to the Emperor Maximilian and King Sigismund of Poland, and was the envoy of various popes to Vienna, Poland, Germany, Bavaria, and Louvain, where he received Baius's abjuration of the propositions which had been condemned by Pius V and Gregory XIII. Clement VIII created him cardinal, 17 September, 1593; this dignity, it seems, he desired to renounce in 1594 so that he would be free to retire and die in one of the Jesuit houses. He was largely instrumental in the reconciliation of Henry IV to the Church and to Spain; at his death Henry had a memorial service for him in Paris. As a religious he is classed by Mariana as of ordinary virtue; he was dispensed from religious obedience by a secret papal Brief, lived in

FRANCISCO CARDINAL TOLEDO

the papal palace, sought the cardinal's hat, and in the latter years of his life intervened in Jesuit affairs with disastrous results. Gregory XIII considered him one of the most learned men of his age, and Soto ranks him as a genius.

His philosophical works, especially "De anima", adopted as a text-book in the University of Salamanca, give indications of a philosophical revival as regards both matter and method. Irrelevant questions are set aside, others are weighed or reduced, and certain problems are stated and discussed in a broader spirit. In his Scriptural commentaries he examines every sentence of the text, points out their relationship, gives Patristic references in the annotations, discusses and judges dogmatic questions learnedly and lucidly. By some he is considered the foremost interpreter of his century, and his exegetical works certainly deserve the first place. In his theological works he is clear, concise, and orderly. He proclaims himself a disciple of St. Augustine and St. Thomas, although on certain questions he is quite at variance with them, as for example the proximate cause of predestination, which for him is *prævisa bona opera.* In regard to the famous Scotist teaching that the Word would have become man even if Adam had not sinned, he says: it is neither true, probable, nor ingenious. His works may be divided into three classes: (1) Philosophical: "Introductio in dialecticam Aristotelis" (Rome, 1561), thirteen editions, apparently the first work of a Jesuit to be printed in Mexico; "Commentaria una cum quæstionibus in universam Aristotelis logicam" (Rome, 1572), seventeen editions; "Commentaria de physica auscultatione" (Venice, 1573), fifteen editions; "De generatione et corruptione" (Venice, 1575), seven editions; "De anima" (Venice, 1574), twenty editions; "Opera omnia. Opera philosophica" (Lyons, 1586–92), only one volume issued. (2) Theological: "In Summam theologiæ S. Thomæ Aquinatis enarratio" (4 vols., Rome, 1869), published by Father José Paría, S.J.; "Summa casuum sive instructio sacerdotum" (Lyons, 1599), forty-six editions (Spanish tr., Juan de Salas; Italian, Andreo Verna; French, Goffar; summaries in Latin, Spanish, French, and Italian). (3) Exegetical: "In sacrosanctum Joannis Evangelium commentarium" (Rome, 1592), nine editions; "In prima XII capita Sacrosancti Jesu Christi D. N. Evangelium secundum Lucam" (Rome, 1600), printing supervised by Father Miguel Vázquez, S. J.; "In Epistolam B. Pauli Apostoli ad Romanos" (Rome, 1602), Chaldean tr., Father Azevedo. Manuscripts: "Emmendationes in Sacra Biblia vulgata", corrected by direction of Clement VIII; "Regulæ hebraicæ pro lingua sancta intelligenda". Sermons: "Motivós y advertencias de cosas dignas de reformación cerca del Breviario".

ANTONIO PÉREZ GOYENA.

Tolentino. See MACERATA AND TOLENTINO, UNITED SEES OF.

Toleration, HISTORY OF.—In any attempt to deal historically with the attitude of the Church towards religious toleration two considerations have throughout to be kept in mind. In the first place, nearly all ecclesiastical legislation in regard to the repression of heresy proceeds upon the assumption that heretics are in wilful revolt against lawful authority, that they are, in fact, apostates who by their own culpable act have renounced the true faith into which they were baptized, breaking the engagements made by them, or by sponsors in their name, when they became members of the Church of Christ. It is easy to see that in the Middle Ages this was not an unreasonable assumption. The Church of God was then indeed as a city set upon a hill. No one could be ignorant of her claims, and if certain people repudiated her authority it was by an act of rebellion inevitably carrying with it a menace to the sovereignty which the rest of the world accepted. This at least was the case with the Cathari, the Waldenses, and the Albigenses, with the Lollards and the Hussites, and it was still the case with the immediate followers of Luther, of Calvin, of Knox, and of the other early Reformers. Only by degrees and after a considerable lapse of time did generations come into being who could be regarded as inculpably heretical, for the plea of invincible ignorance implies not only that their education took place entirely under heretical influences, but also that they could attain adult life without being effectively confronted with the claims which the true Church makes upon the loyalty of reasonable men. It might plausibly be maintained, for example, that such conditions were at no time realized among the Huguenots of France, or in the more Catholic districts of Central Europe. Hence we cannot be entirely surprised that there were those who excused such measures as the Revocation of the Edict of Nantes, or who supported the repressive legislation which was inaugurated by the Catholic sovereigns of Poland and Hungary in the sixteenth and seventeenth centuries.

In the second place it is to be remembered that owing to the fact that the canon law deals very largely with the enunciation of principles of right and wrong which are of their own nature irreformable, the direct repeal of its provisions has never or very rarely been resorted to. This course undoubtedly has the great advantage of inspiring respect for the sanctity and stability of the law, but the consequence follows that there remain upon the statute-book a number of enactments which owing to changed conditions are to all practical intents and purposes obsolete. The medieval legislation of the Church with regard to usury, testamentary dispositions, matrimony, and especially heresy, largely falls under this category, while the natural result of the retention of a considerable mass of obsolescent decretals must be the creation of an element of, at least temporary, uncertainty, under which some will favour and others resist the legislation that is passing away. For example there was bound to be a period during which rigourists would still appeal to the very uncompromising measures in dealing with heretics which were contemplated by many texts of the canon law, while on the other hand larger-minded contemporaries, who were themselves perhaps living under political conditions which forced them to appreciate the advantages of toleration, tended to treat these same provisions as a dead letter and to deny them all validity in practical life. The effect of both these considerations has been to make it extremely difficult to draw a hard-and-fast line between the circumstances under which the Church recognized the desirability of a large toleration of dissident opinions on the ground both of justice and expediency, and those under which it seemed a duty to stamp out by a policy of firm repression an evil germ which threatened indefinite mischief to the well-being of Christian society. Every lawfully-constituted society must put down on principle the propagation of such sedition as threatens its own existence, and this is not persecution so long as reason and humanity are respected in the means of suppression employed.

Persecution begins when no reasonable proportion is observed between the force used in compulsion and the importance and power of the interests which it is sought to control. To determine the exact point at which legitimate repression passes into persecution is hence a matter of extreme difficulty. For this reason we should probably obtain a clearer view of the toleration of the Church in past history by studying the relations of the papacy with those bodies which like the Jews and pagans were recognized as lying outside her direct jurisdiction. Regarded as a centre of spiritual authority the Holy See did not claim the unbaptized as subjects, but still the popes as sovereigns of a temporal state had to adopt a definite attitude towards the Jews who lived in their dominions. Tracing these relations as a whole and comparing them with the ideas which prevailed among secular rulers of the time, the principles formulated, and for the most part acted upon, by the popes, set an example of mildness to the rest of Europe. As early as A. D. 598, Gregory the Great clearly laid down that the Jews, while they were to be restrained from presuming upon the toleration accorded to them by the law, had a claim to be treated equitably and justly. They were to be allowed to keep their own festivals and religious practices, and their rights of property, even in the case of their synagogues, were to be respected (Greg. Mag. Regesta, M. G. H., II, 67 and 383). In the later Middle Ages there may be traced through a long series of pontificates the repeated confirmations of the Bull, assignable probably in the first instance to Pope Callixtus II (c. 1120) and known as "Sicut Judæis". It was a sort of papal charter of protection to the Jews and in its first sentence are embodied certain words of one of Gregory the Great's letters just referred to. "As licence", says this document, "ought not to be allowed to the Jews to presume in their synagogues beyond what is permitted by the law so they ought not to be interfered with in such things as are allowed. We therefore, although they prefer to continue in their hardness of heart rather than be guided by the hidden meaning of the prophets to a knowledge of the Christian faith, do nevertheless, since they invoke our protection and aid, following in the footsteps of our predecessors and out of the mildness of Christian piety, extend to them the shield of our protection." The document then lays down (1) that the Jews are not to be compelled by force to embrace Christianity, but are only to be baptized of their own free will; (2) that apart from a judicial sentence in a court of law no one is to injure them in life or limb or to take away their property or to interfere with such customary rights as they may have enjoyed in the places where they live; (3) that they are not to be attacked with sticks and stones on occasion of their festival celebrations, nor are they to be compelled to render any feudal services beyond such as are customary; (4) that their cemeteries in particular are not to be violated. (See M. Stern, "Urkundliche Beiträge", n. 171.) This charter reissued and confirmed as it was by some twenty or thirty pontiffs during a period of 400 years is certainly of much more weight as laying down the Church's view of the duty of toleration, as an abstract principle, than any persecuting edicts evoked by special circumstances or coloured by the prepossessions of the individual legislator.

Looking at the documents of unquestioned authenticity extracted by Stern from the papal Regesta it becomes clear that throughout the later Middle Ages the Jews in almost every emergency turned to the popes as to their natural protectors. Despite such legislation as that of the Fourth Council of Lateran (1215) imposing the wearing of a distinctive badge and excluding Jews from public offices, still even such a summary as that in the Jewish Encyclopedia (s. v. "Popes") distinctly leaves the impression that the Holy See exercised on the whole a markedly restraining influence on the persecuting spirit of the Middle Ages. In particular, more than one of the popes, beginning with Innocent IV, issued Bulls exonerating the Jews from that charge of ritual murder, which, as in the well-known story of little Hugh of Lincoln, prejudiced public opinion so strongly against them (cf. Vacandard, "La question du meurtre rituel chez les Juifs" in "Etudes de critique et d'histoire religieuse", 3d series, Paris, 1912). It was again the popes (e. g., Sixtus IV and Clement VII) who at the time of the worst excesses of the Spanish Inquisition exerted themselves to set some check upon the severities exercised against the Maranos in the Iberian Peninsula. The edicts issued at various times for the destruction of copies of the Talmud, the Bull "Cum nimis absurdum" of Paul IV constraining the Jews of Rome to live segregated in a Ghetto and subject to other harassing disabilities, represent rather the prejudices of individual pontiffs than any consistent principle of persecution. Let it also be noted that the influence of the Church has repeatedly been exerted for the protection of pagan races against forcible conversion, and that it has freely tolerated such religious rites amongst savages as were not openly debasing and immoral. The history of the preaching of Christianity in the New World shows many examples in which the fanatical zeal lay with the profligate Spanish adventurers who conquered the country, while ecclesiastical authority advocated sympathy with the natives and indulgence for their religious observances. On the other hand this indulgence shown to pagan customs, obviously enough, could not be extended without limit. Even British rule in India ultimately considered it desirable to abolish the practice of suttee by which the wives of the upper classes were required to commit suicide upon the death of their husbands. This, however, was not effectively prohibited, even in the British provinces, until 1829.

With regard to the toleration of Christian heretics and schismatics the reader will do well to consult the article Inquisition. No very systematic measures of repression seem to have come into practice before the twelfth century. The aggressive attitude adopted in the case of the Priscillianists (q. v.) and Donatists (q. v.) was owing less to the action of the bishops than to that of the emperor. On the other hand, it cannot be disputed that after the authority of the popes was firmly established, ecclesiastical campaigns were undertaken against the Cathari, the Waldenses, and Albigenses as well as later on against the followers of Wicklif and Hus. Moreover isolated executions for heresy (burning at the stake being commonly employed for this purpose) were known before the twelfth century both in East and West; though at the same time the actual infliction of the punishment, then as after, must be regarded as an act of the civil power rather than that of any ecclesiastical tribunal. But though an Inquisition of heretical practices may be regarded as having been first formally set up, at any rate in embryo, about the second half of the thirteenth century no measures of extreme severity were in the beginning prescribed or generally adopted. The Fourth Council of Lateran in 1215 imposed as a penalty the deprivation of property and civil stakes. Convicted heretics, even though repentant, were excluded from public offices and were compelled to wear a badge. If their retractation was insincere they were liable to be confined in a public prison. At the same time it must not be forgotten that all these medieval heresies, as such an historian as Gairdner has noticed (Lollardy, I, 46), struck at the foundations of social order. M. Guiraud's account of the extravagant teaching of the Cathari and Albigenses is conclusive upon the point. It cannot be doubted that the severities which then began to be exercised in the name of religion were prompted by no lust for blood. It seemed rather to orthodox churchmen that the Church was so menaced by these subversive doctrines that her very existence was at stake.

Under these circumstances it was not wonderful that the ordinances of the canon law, for the most part formulated at a time when Albigensian teachings were a present danger, should have inclined to the side of severity and that to the lawmakers of that age toleration seemed only a weakness. "The proscription of the Albigenses", says M. Guiraud, "was not the effect of any ferocious hatred of misbelievers too often attributed to the princes of that age. It was inspired by a consideration which has been happily defined by saying that heresy was at that time as much a crime against social order as against religion" (Guiraud, "Chartulaire de Prouille", I, lxxxiv). Even so anti-Roman an historian as Hase sums up the practical effects of the Lollard movement by saying "Wyclif produced no permanent religious impression upon the mass of the people. His teaching was misunderstood and caused a revolt of the peasants which resulted only in disaster" (Kirchengeschichte, 1886, p. 353). Again it was not to be expected that the first fruits of the Reformation would be likely to mitigate the prevalent view of the mischievous nature of heresy. The political and social evils to which the teaching of Luther and Calvin gave rise, as well as the fanatical persecution of the Catholics by so many of their followers, are made clear beyond dispute in such a work as that of Janssen's "History of the German People", to which the reader may be referred. It was only natural that the conception of heresy as an attack upon law and order as well as upon religion should be thereby deepened. Moreover in nearly every case where the reproach of intolerance has been cast against the Church, as for example, the Massacre of Saint Bartholomew (q. v.) or the revocation of the Edict of Nantes (see HUGUENOTS), the persecuting initiative has come far more from temporal rulers than from the Church or her representatives. On the other hand, the ferocity of the leading Reformers more than equalled that of the most fiercely denounced inquisitors. Even the "gentle" Melanchthon wrote to Calvin to congratulate him on the burning of Servetus. "The Church", he said, "both now and in all generations, owes and will owe you a debt of gratitude." "Let there be no pity", Luther exhorted his followers, "it is a time of wrath not of mercy. . . . Therefore, dear Lords, let him who can slay, smite, destroy" (see Beard, "The Reformation and Modern Thought"). "John Knox", said Acton (History of Freedom, p. 44), "thought that every Catholic in Scotland ought to be put to death." Moreover in any case there is more to be urged than a mere "tu quoque" argument. The Church has often given proof of her moderation when brought into relation with those whom she was not logically compelled to treat as rebels. No better examples can perhaps be afforded than the history of the foundation of some of the colonies in the New World, and notably that of the Province of Maryland (q. v.).

London, 1876); DEVAS, *Key of the World's Progress* (London, 1906), 189–210; ACTON, *Hist. of Freedom* (reprinted London, 1907); CREIGHTON, *Persecution and Tolerance* (London, 1895); DÖLLINGER, *Akademische Vorträge*, III (Leipzig, 1891), 274–301. These last three works can only be recommended with many reserves. See also bibl. of article INQUISITION.

HERBERT THURSTON.

Toleration, RELIGIOUS.—Toleration in general signifies patient forbearance in the presence of an evil which one is unable or unwilling to prevent. By religious toleration is understood the magnanimous indulgence which one shows towards a religion other than his own, accompanied by the moral determination to leave it and its adherents unmolested in private and public, although internally one views it with complete disapproval as a "false faith". Since, in this article, we are to treat toleration only from the standpoint of principle, leaving its historical development to be discussed in a special article, we shall consider: I. The Idea of Toleration; II. The Inadmissibility of Theoretical Dogmatical Toleration; III. The Obligation to Show Practical Civil Toleration; IV. The Necessity of Public Political Toleration.

I. THE IDEA OF TOLERATION.—Considered in the abstract, the general idea of toleration contains two chief moments: (a) the existence of something which is regarded as an evil by the tolerating subject; (b) the magnanimous determination not to interfere with the evil, but to allow it to run its course without molestation. Viewed under the former aspect, toleration is akin to patience which also connotes an attitude of forbearance in the face of an evil. Patience, however, is rather the endurance of physical sufferings (e. g. misfortune, sickness), toleration of ethical evils. When not an evil but some real good (e. g. truth or virtue) is in question, toleration gives way to interior approbation and external promotion of such good. No one will say: "We must show toleration towards science or patriotism", for both these objects are recognized by all as laudable and desirable. A second idea akin to toleration is connivance (*conniventia, dissimulatio*), which means the deliberate closing of one's eyes to evil conditions so as not to be obliged to take measures against them. The distinction between connivance and toleration lies in the fact that the latter not only closes its eyes to the tolerated evil, but also openly concedes it complete liberty of action and freedom to spread. It is indeed in this deliberate granting of liberty that the characteristic quality of toleration lies. For the intolerant person also regards what opposes him as an evil and a source of annoyance; but, it is only by combating it overtly or secretly, that he shows his intolerance. Not all intolerance, however, is a vice, nor is all tolerance a virtue. On the contrary, an exaggerated tolerance may easily amount to a vice, while intolerance keeping within just limits may be a virtue. This statement is substantially in agreement with Aristotle's definition that virtue in general holds the right mean between two extremes, which are as such both vices. Thus the intolerance shown by parents towards grave faults in their children is an obligation imposed by conscience, although, if it be carried to the extreme of cruelty, it degenerates into a vice. On the other hand, excessive toleration towards an evil becomes under certain circumstances a vice, for example, when secular rulers look with folded arms upon public immorality.

The above remarks show that manifold distinctions are necessary before we are in a position to develop the true principles which underlie real toleration. Viewing our subject partly from the ethical and religious, and partly from the political standpoint, we find three distinct kinds of tolerance and intolerance, which refer to entirely different domains and thus rest on different principles. As regards religious tolerance, which alone concerns us here, we must distinguish especially between the thing and the person, the error and the erring. According as we consider the thing or the person, we have theoretical, dogmatic, or practical civic tolerance, or intolerance. Distinct from both is political tolerance, since the distinction between the individual and the State must also be considered. We must inquire somewhat more closely into these three kinds of tolerance and their opposites before considering the principles which underlie each.

(1) By theoretical dogmatic tolerance is meant the tolerating of error as such, in so far as it is an error; or, as Lezius concisely expresses it, "the recognition of the relative and subjective right of error to existence" ("Der Toleranzbegriff Lockes u. Puffendorfs", Leipzig, 1900, p. 2). Such a tolerance can only be the outcome of an attitude which is indifferent to the right of truth, and which places truth and error on the same level. In philosophy this attitude is briefly termed scepticism, in the domain of religion, it develops into religious indifferentism which declares that all religions are equally true and good or equally false and bad. Such an internal and external indifference towards all religions, especially the Christian religion,

is nothing else than the expression of personal unbelief and lack of religious convictions. A person who is tolerant in the domain of dogma resembles the botanist who cultivates in his experimental beds both edible plants and poisonous herbs as alike valuable growths, while a person intolerant of error may be compared to a market-gardener, who allows only edible plants to grow, and eradicates noxious weeds. Just as vice possesses no real right to existence, whatever toleration may be shown to the vicious person, so also religious error can lay no just claim to forbearance and indulgence, even though the erring person may merit the greatest affection and esteem. There is, of course, a psychological freedom both to sin and to err, but this liberty is not equivalent to an inherent right to sin or to err in religion. The "freedom of thought" claimed by free thinkers is really vitiated by an internal contradiction, since the intellect is bound by the laws of thought and must in many cases yield to the force of evidence. But if by freedom of thought we are to understand the personal right of the individual to form on all questions such internal convictions as he may judge right, this ethical freedom also has its limits, since the inner spiritual life is at all events subject to conscience and to the moral order of the universe, and is, therefore, bound by ethical obligations which no man may disregard. The so-called "freedom of belief", which asserts the right of each person to believe what he pleases, is open to the same criticism. For, if the psychological liberty to accept the wildest phantasies and the most foolish stories is an undeniable prerogative of the human soul, ethical freedom and the ethical right to freedom of belief are nevertheless conditioned by the presumption that a person will spurn all false religions and cling solely to that which he has recognized as alone true and consequently alone legitimate. This obligation was justly emphasized by Leo XIII in his Encyclical "Immortale Dei" of 1 November, 1885: "Officium est maximum amplecti et animo et moribus religionem, nec quam quisque maluerit, sed quam Deus jusserit quamque certis minimeque dubitandis indiciis unam ex omnibus veram esse constiterit" (The gravest obligation requires the acceptance and practice, not of the religion which one may choose, but of that which God prescribes and which is known by certain and indubitable marks to be the only true one). (Cf. Denzinger, "Enchiridion", 9th ed., Freiburg, 1900, n. 1701.) The mere description of this kind of tolerance shows that its opposite, i. e. theoretical dogmatic intolerance, cannot be a vice. For it is essentially nothing else than the expression of the objective intolerance of truth towards error. In the domain of science and of faith alike, truth is the standard, the aim, and the guide of all investigation; but love of truth and truthfulness forbid every honourable investigator to countenance error or falsehood. It, therefore, follows that well-considered opposition to actual or supposed error, in whatever domain, is simply the antagonism between truth and falsehood translated into personal conviction; as impersonal adversaries, truth and error are as bitterly opposed to each other as yes and no, and consequently, in accordance with the law of contradiction, they can tolerate no mean between them. This theoretical dogmatic intolerance—so often misunderstood, so often confounded with other kinds of intolerance, and as a result unjustly combated—is claimed by every scholar, philosopher, theologian, artist, and statesman as an incontestable right, and is unhesitatingly accepted by everyone in daily intercourse.

(2) Practical civic tolerance consists in the personal esteem and love which we are bound to show towards the erring person, even though we condemn or combat his error. The motive for this difference of attitude is to be sought in the ethical commandment of love for all men, which Christianity has raised to the higher ideal of charity or love of neighbour for the sake of God. One of the most beautiful outgrowths of this charity is shown in the correct Christian attitude towards the heterodox. This relation, rooted solely in pure love, is commonly meant when one speaks of "religious tolerance". It springs, not from pharisaic pride or from pity pluming itself on its superiority, but chiefly from respect for another's religious convictions, which out of true charity we do not wish to disturb to no purpose. Since innocent error may attain to the firmest and sincerest conviction, the person's salvation does not seem to be greatly imperilled until good faith turns into bad faith, in which case alone the feeling of pity has no justification. The good faith of the heterodox person must, as a rule, be presumed, until the contrary is clearly established. But even in the extremest cases, Christian charity must never be wounded, since the final judgment on the individual conscience rests with Him who "searches the heart and the reins". The same measure of respect which a Catholic claims for his religion must be shown by him to the religious convictions of non-Catholics. Here obtains the principle which Gregory IX once recommended in a Brief (6 April, 1233), addressed to the French bishops concerning the attitude of Christians towards the Jews: "Est autem Judæis a Christianis exhibenda benignitas, quam Christianis in Paganismo existentibus cupimus exhiberi" (Christians must show towards Jews the same good will which we desire to be shown to Christians in pagan lands). (Cf. Auvray, "Le régistre de Grégoire IX", n. 1216.) Whoever claims tolerance must likewise show tolerance. True tolerance in the right place and under the right conditions is one of the most difficult, and also one of the most beautiful and delicate virtues, and in the possession of it the true greatness of a noble and beautiful soul is reflected. To such a soul has been communicated, as it were, a spark of the burning charity of the God of love, Who with infinite forbearance tolerates the countless evils of the world, and suffers the cockle to grow with the wheat until the harvest.

The precept of fraternal charity is transgressed by practical civic intolerance, which in more or less detestable fashion transfers intolerance of the error to the erring persons. With complete justice did the sarcastic Swift write: "In religion many have just enough to make them hate one another, not enough to make them love one another" (cf. J. S. Mackenzie, "An Introduction to Social Philosophy", Glasgow, 1890, p. 116). The intolerant man is avoided as much as possible by every high-minded person, both in society and in daily intercourse. The man who is tolerant in every emergency is alone lovable and wins the hearts of his fellowmen. Such tolerance is all the more estimable in one whose loyal practice of his own faith wards off all suspicion of unbelief or religious indifference, and whose friendly bearing towards the heterodox emanates from pure neighbourly charity and a strict sense of justice. It is also an indispensable requisite for the maintenance of friendly intercourse and co-operation among a people composed of different religious denominations, and is the root of religious peace in the state. It should, therefore, be prized and promoted by the civil authorities as a safeguard of the public weal, for a warfare of all against all, destructive of the state itself, must again break out (as at the time of the religious wars and of American Knownothingism), if citizens be allowed to assail one another on account of religious differences. A person who by extensive travel or large experience has become acquainted with the world and men, and with the finer forms of life, does not easily develop into a heretic-hunter, a sadly incongruous figure in the modern world.

(3) Public political tolerance is not a duty of the citizens, but is an affair of the State and of legislation. Its essence consists in the fact that the State

grants legal tolerance to all the religious denominations within its boundaries, either through its written constitution, through special charters, or at least through prescriptive right based on long tradition. This tolerance may under certain circumstances amount to the principle of equality of rights or parity, even to the full enjoyment of all civil rights, entirely regardless of one's religious belief. Since the modern State can and must maintain towards the various religions and denominations a more broad-minded attitude than the unyielding character of her doctrine and constitution permit the Church to adopt, it must guarantee to individuals and religious bodies not alone interior freedom of belief, but also, as its logical correlative, to manifest that belief outwardly—that is, the right to profess before the world one's religious convictions without the interference of others, and to give visible expression to these convictions in prayer, sacrifice, and Divine worship. This threefold freedom of faith, profession, and worship is usually included under the general name of religious freedom. Tolerance and religious liberty are not, however, interchangeable terms, since the right implied in state tolerance to grant full or limited religious liberty involves the further right to refuse, to contract, or to withdraw this freedom under certain circumstances, as is clear from the history of toleration laws in every age. Nor is the idea of parity identical with that of religious liberty. For the maintenance of a state Church from public funds (e. g. the Established Church of England) is an offence against parity as regards the dissidents, who must meet their religious needs out of their own means, but it does not affect the general religious liberty, which is enjoyed by the dissidents in the same degree as by the members of the state Church.

Political intolerance finds its harshest expression in the forcible imposition of a religion and its worship, which reached its climax in the drastic political maxim of the Reformation epoch: "Cuius regio, illius et religio". Since external profession and liturgical worship are but the spontaneous expression of faith, it is plain that state compulsion in the matter of worship is a grievous attempt to tyrannize over conscience and tends to breed hypocrisy. Neither political nor ecclesiastical authority can exercise a physical control over interior conviction, since into the secret sanctuary of the mind only the Deity can enter, and He alone can compel the heart. Hence, the principle of Roman law: "De internis non judicat prætor." But, inasmuch as the Church and she alone, with her authority to teach and the power of the keys, may legislate even for conscience, she and only she is justified in making a particular faith obligatory in conscience; consequently she may bring to bear upon interior conviction an *ethical* compulsion, to which corresponds the obligation to believe on the part of the subject. The State on the other hand cannot extend its jurisdiction to religion until this has become visibly embodied in external profession and worship. There are several ways in which the State may interfere. It may either adopt a friendly attitude towards a certain religion and make it the state religion (e. g. the medieval religious States, and certain modern States which have established Churches); or it may adopt a hostile attitude towards a certain religion, which it may eventually endeavour to suppress by the employment of force and the infliction of penalties, as e. g. the pagan Roman Empire tried to suppress Christianity. But the State may also remain neutral, confining itself to simple tolerance, e. g. as did Constantine the Great and Licinius in the Tolerance Edict of Milan, A. D. 313. The modern constitutional State adopts as a basic principle, not mere tolerance towards the various religious bodies, but complete religious freedom; this principle finds its truest and most consistent expression in the United States of America.

II. THE INADMISSIBILITY OF THEORETICAL DOGMATIC TOLERATION.—As already said, this kind of tolerance implies indifference towards the truth and in principle, a countenancing of error; hence it is clear that intolerance towards error as such is among the self-evident duties of every man who recognizes ethical obligations. Inasmuch as this dogmatic intolerance is a prominent characteristic of the Catholic Church, and is stigmatized by the modern spirit as obstinacy and even as intolerable arrogance, its objective justification must now be established. We will begin with the incontestable claim of truth to universal recognition and exclusive legitimacy. Just as the knowableness of truth is the fundamental presupposition of every investigator, so also are its final attainment and possession his goal. Error itself, as the opposite of truth, is intelligible only when there is an unchangeable norm of cognition by which the thinking mind is ruled. He who sees in the development of human sciences only one vast graveyard containing thousands of tombstones erected over truth, preaches the death of all science—that is, the scepticism which was avowed in antiquity by the Middle Academy of Arcesilaus and by later Greek Pyrrhonism, and which the sceptics of all the succeeding centuries down to the ingenious Pierre Bayle (d. 1706) have taken for their model. Recent Pragmatism (W. James, Schiller, and others), which denies the eternal, necessary, and unalterable character of truth, is only a dreary relapse into the scepticism of the sophist Protagoras, against which Socrates raised the banner of truth and virtue. The mutability of truth with the passage of time is also a thesis of Modernism. In the Decree "Lamentabili" of 3 July, 1907, Pius X condemned the Modernistic proposition: Veritas non est immutabilis plus quam ipse homo, quippe quæ cum ipso, in ipso et per ipsum evolvitur (Truth is no more unchangeable than man, since with him, in him, and by him it is evolved). (Cf. Denzinger-Bannwart, "Enchiridion", 11th ed., Freiburg, 1911, n. 2058.) The final consequence of this suicidal system led F. Nietzsche to intellectual Nihilism: "Nothing is true, everything is allowed." The transference of this destructive scepticism to the domain of religion breeds religious indifferentism, which is no less unreasonable and immoral, since it also sins against the sacredness of truth.

Nowhere is dogmatic intolerance so necessary a rule of life as in the domain of religious belief, since for each individual his eternal salvation is at stake. Just as there can be no alternative multiplication tables, so there can be but a single true religion, which, by the very fact of its existence, protests against all other religions as false. But the love of truth requires each man to stand forth as the incorruptible advocate of truth and of truth alone. While abstract truth, both profane and religious, asserts itself victoriously through its impersonal evidence against all opposition, its human advocate, engaging in personal contest with adversaries of flesh and blood like himself, must have recourse to words and writing. Hence the sharp, yet almost impersonal clash between opposing views of life, each of which contends for the palm, because each is thoroughly convinced that it alone is right. But the very devotion to truth which supports these convictions determines the kind of polemics which each believes himself called on to conduct. He whose sole concern is for truth itself, will never besmirch his escutcheon by lying or calumny and will refrain from all personal invective. Conscious that the truth for which he fights or in good faith believes he fights, is, by reason of its innate nobility, incompatible with any blemish or stain, he will never claim licence to abuse. Such an ideal champion of truth is fittingly designated by the English word "gentleman". He may, however, by a fair counter-stroke parry an unjust, malicious, and insulting attack, since his adversary has no right to employ invective, to falsify history, to practise sordid proselytism, etc., and may, therefore, be driven without pity from his false position. These principles obtain universally and for all men—for scholars and statesmen, for Catholics and Protestants.

If, therefore, the Catholic Church also claims the right of dogmatic intolerance with regard to her teaching, it is unjust to reproach her for exercising this right. With the imperturbable conviction that she was founded by the God-Man Jesus Christ as the "pillar and ground of the truth" (I Tim., iii, 15) and endowed with full power to teach, to rule, and to sanctify, she regards dogmatic intolerance not alone as her incontestable right, but also as a sacred duty. If Christian truth like every other truth is incapable of double dealing, it must be as intolerant as the multiplication table or geometry. The Church, therefore, demands, in virtue of her Divine commission to teach, the unconditional acceptance of all the truths of salvation which she preaches and proposes for belief, proclaiming to the world with her Divine Founder the stern warning: "He that believeth and is baptized, shall be saved: but he that believeth not shall be condemned" (Mark, xvi, 16). If, by conceding a convenient right of option or a falsely understood freedom of faith, she were to leave everyone at liberty to accept or reject her dogmas, her constitution, and her sacraments, as the existing differences of religions compel the modern State to do, she would not only fail in her Divine mission, but would end her own life in voluntary suicide. As the true God can tolerate no strange gods, the true Church of Christ can tolerate no strange Churches beside herself, or, what amounts to the same, she can recognize none as theoretically justified. And it is just in this exclusiveness that lies her unique strength, the stirring power of her propaganda, the unfailing vigour of her progress. A strictly logical consequence of this incontestable fundamental idea is the ecclesiastical dogma that outside the Church there is no salvation (*extra Ecclesiam nulla salus*). Scarcely any other article of faith gives such offence to non-Catholics and occasions so many misunderstandings as this, owing to its supposed hardness and uncharitableness. And yet this proposition is necessarily and indissolubly connected with the above-mentioned principle of the exclusive legitimacy of truth and with the ethical commandment of love for the truth. Since Christ Himself did not leave men free to choose whether they would belong to the Church or not, it is clear that the idea of the Christian Church includes as an essential element its necessity for salvation. In her doctrine the Church must maintain that intolerance which her Divine Founder Himself proclaimed: "And if he will not hear the church, let him be to thee as the heathen and publican" (Matt., xviii, 17). This explains the intense aversion which the Church has displayed to heresy, the diametrical opposite to revealed truth (cf. I Tim., i, 19; II Tim., ii, 25; Tit., iii, 10 sq.; II Thess., ii, 11). The celebrated church historian Döllinger writes very pertinently: "The Apostles knew no tolerance, no leniency towards heresies Paul inflicted formal excommunication on Hymenæus and Alexander. And such an expulsion from the Church was always to be inflicted. The Apostles considered false doctrine destructive as a wicked example. With weighty emphasis Paul declares (Gal., i, 8): 'But though we, or an angel from heaven, preach a gospel to you besides that which we have preached to you, let him be anathema'. Even the gentle John forbids the community to offer hospitality to heretics coming to it, or even to salute them" ("Christentum und Kirche", Ratisbon, 1860, pp. 236 sq.).

During the Middle Ages the Church guarded the purity and genuineness of her Apostolic doctrine through the institution of the ecclesiastical (and state) Inquisition, which, with many excellent qualities, had unfortunately also its drawbacks. As justly remarked by Cardinal Hergenröther, the Inquisition suffered internally from "serious and lamentable defects", for example, secrecy as to accusers and witnesses, the admission of suspected witnesses, excessive scope for the subjective judgment of the judge, secrecy of the procedure (see INQUISITION). Thus are explained the frightful scenes which Germany witnessed under the grim grand inquisitor, Conrad of Marburg (d. 1233). Following the example of the Apostles, the Church to-day watches zealously over the purity and integrity of her doctrine, since on this rests her whole system of faith and morals, the whole edifice of Catholic thought, ideals, and life. For this purpose the Church instituted the Index of Prohibited Books, which is intended to deter Catholics from the unauthorized reading of books dangerous to faith or morals, for it is notorious that clever sophistry coated with seductive language may render even gross errors of faith palatable to a guileless and innocent heart. The State itself is at times obliged to confiscate books that are dangerous to its existence or to morality in order to protect unsuspecting readers from contagion and to preserve the structure of the social order. But what is right for the State must be also just for the Church. The sharp attack made by Pius X on Modernism, which is undermining the foundations not alone of Christianity, but even of natural religion, is simply an act of necessary self-defence against an assault, not only upon individual dogmas, but likewise upon the whole basis of faith. Again the ancient expression "heretical poison" (*venemum seu virus hæreticum; pravitas hæreticalis*), which has passed from canon law into the set phraseology of the papal chancery and quite naturally sounds hard to Protestants, is to be explained psychologically in view of the above-mentioned fundamental conviction. It is not intended to express any offensive slur on the heterodox, who adhere to their opinions in good faith and in honest conviction. Consequently, the writers who represented Pius X as applying to the present generation of honest Protestants the historical condemnation which he passed on the Reformers of the sixteenth century in his Borromæus Encyclical, and thus ascribed to him a public rebuke which he never in the least intended, were guilty of exaggeration and evident injustice. Besides, Protestant historians have passed much harder judgments on the leaders of the Reformation. No Protestant takes umbrage at the fact established in every manual of church history, that, after long convulsions and spasms, the Lutheran Church, by the Formula of Concord (1577), expelled the "crypto-Calvinist poison" which Philip Melanchthon had instilled into the faith of Orthodox Lutheranism. And did not Crypto-Calvinism really act like blood-poisoning? The canonical expression "heretical poison" is intended to convey no other meaning than that the Catholic faith dreads as blood-poisoning heretical infection of any kind, whatever be its source.

But does the proposition that outside the Church there is no salvation involve the doctrine so often attributed to Catholicism, that the Catholic Church, in virtue of this principle, "condemns and must condemn all non-Catholics"? This is by no means the case. The foolish and unchristian maxim that those who are outside the Church must for that very reason be eternally lost is no legitimate conclusion from Catholic dogma. The infliction of eternal damnation pertains not to the Church, but to God, Who alone can scrutinize the conscience. The task of the Church is confined exclusively to the formulating of the principle, which expresses a condition of salvation imposed by God Himself, and does not extend to the examination of the persons, who may or may not satisfy this condition. Care for one's own salvation is the personal concern of the individual. And in this matter the Church shows the greatest possible consideration for the good faith and the innocence of the erring person. Not that she refers, as is often stated, the eternal salvation of the heterodox solely and exclusively to "invincible ignorance", and thus makes sanctifying ignorance a convenient gate to heaven for the stupid. She places the efficient cause of the eternal salvation of all men objectively in the merits of the Redeemer, and subjectively in justification through baptism or through good faith enlivened by the perfect love of God, both of which may be found outside the Catholic Church. Whoever indeed has recognized the true Church of Christ, but contrary to his better knowledge refuses to enter it, and whoever becomes perplexed as to the truth of his belief, but fails to investigate his doubts seriously, no longer lives in good faith, but exposes himself to the danger of eternal damnation, since he rashly contravenes an important command of God. Otherwise the gentle breathing of grace is not confined within the walls of the Catholic Church, but reaches the hearts of many who stand afar, working in them the marvel of justification and thus ensuring the eternal salvation of numberless men who either, like upright Jews and pagans, do not know the true Church, or, like so many Protestants educated in gross prejudice, cannot appreciate her true nature. To all such, the Church does not close the gate of Heaven, although she insists that there are essential means of grace which are not within the reach of non-Catholics. In his allocution "Singulari quadam" of 9 December, 1854, which emphasized the dogma of the Church as necessary for salvation, Pius IX uttered the consoling principle: "Sed tamen pro certo pariter habendum est, qui veræ religionis ignorantia laborent, si ea est invincibilis, nulla ipsos obstringi hujusce rei culpa ante oculos Domini" (But it is likewise certain that those who are ignorant of the true religion, if their ignorance is invincible, are not, in this matter, guilty of any fault in the sight of God). (Denzinger-Bannwart, 11th ed., Freiburg, 1911, n. 1647.)

As early as 1713 Clement XI condemned in his dogmatic Bull "Unigenitus" the proposition of the Jansenist Quesnel: "Extra ecclesiam nulla conceditur gratia", i. e. no grace is given outside the Church (op. cit., n. 1379), just as Alexander VIII had already condemned in 1690 the Jansenistic proposition of Arnauld: "Pagani, Judæi, hæretici aliique hujus generis nullum omnino accipiunt a Jesu Christo influxum" (Pagans, Jews, heretics, and other people of the sort, receive no influx [of grace] whatsoever from Jesus Christ) (op. cit., n. 1295). In her tolerance toward the erring the Church indeed goes farther than the large catechism of Martin Luther, which on "pagans or Turks or Jews or false Christians" passes the general and stern sentence of condemnation: "wherefore they remain under eternal wrath and in everlasting damnation." Catholics who are conversant with the teachings of their Church know how to draw the proper conclusions. Absolutely unflinching in their fidelity to the Church as the sole means of salvation on earth, they will treat with respect, as ethically due, the religious convictions of others, and will see in non-Catholics, not enemies of Christ, but brethren. Recognizing from the Catholic doctrine of grace that the possibility of justification and of eternal salvation is not withheld even from the heathen, they will show towards all Christians, e. g. the various Protestant bodies, kindly consideration. Concerning these dogmatic questions, cf. Pohle, "Dogmatik", II (5th ed., Paderborn, 1912), 444 sqq., 453 sqq.

III. THE OBLIGATION TO SHOW PRACTICAL CIVIC TOLERATION.—For the practical attitude of Catholics towards the heterodox the Church has inculcated the strict command of neighbourly love, which corresponds to Christian charity: "Thou shalt love thy neighbour as thyself." The sincerest love for the erring is indeed quite compatible with keen repugnance for the error to which they cling. From the very definition of practical civic tolerance (see above, I, 2) springs the maxim which St. Augustine expresses as follows: "Diligite homines, interficite errores; sine superbia de veritate præsumite, sine sævitia pro veritate certate" (Love men, slay error; without pride be bold in the truth, without cruelty fight for the truth) (Contra lit. Petil., I, xxix, n. 31, in P. L., XLIII, 259). God is a God of love, and consequently His children cannot be sons of hate. The gospel of the Divine paternity in heaven is also the joyous tidings of the brotherhood of all men on earth. For all without exception the Saviour prayed in His capacity of high-priest during the night before His Passion, and for all He shed His Blood on the Cross. The sublime example of Christ affords a striking indication of the manner in which we should regulate our conduct towards those who differ from us in faith, for we know that, so to speak, a drop of the redeeming Blood of Christ glistens on every human soul. To penetrate into the inner shrine of another's conscience with feelings of doubt and distrust is forbidden to all in accordance with the principle: "Nemo præsumitur malus, nisi probetur" (No one is presumed to be evil until proved to be so). And St. Paul declares: "Charity is patient, is kind: charity envieth not, dealeth not perversely . . ., is not provoked to anger, thinketh no evil" (I Cor., xiii, 4 sq.). By this Christian love alone is the truly tolerant man, the true disciple of Christ, recognized. But did not the medieval Church by her bloody persecution of heretics trample under foot this commandment of love and thus nullify in practice what in theory indeed she always inculcated with honeyed words? The enemies of the Church search eagerly the musty documents which tell of inquisitional courts, *autos-da-fé*, chambers of horror, instruments of torture, and blazing pyres. Without any palliation of the historical facts, let us examine a little more closely this reproach, and see what importance is to be attached to it.

(1) When the inglorious origin of his forbears is constantly cast in the teeth of an honest nobleman, with the spiteful idea of wounding his feelings, no upright person will regard such conduct as tactful or just. What has the Church of to-day to do with the fact that long-vanished generations inflicted, in the name of religion, cruelties with which the modern man is disgusted? The children's children cannot be held accountable for the misdeeds of their forefathers. Protestants also must take refuge in this principle of justice. However much they endeavour to blink the fact, they have also to regret similar occurrences during the Reformation epoch, when, as everyone knows, the Reformers and their successors made free use of the existing penal ordinances and punished with death many inconvenient and, according to their view, heretical persons (e. g. the anti-Trinitarians Servetus and Sylvanus, the Osiandrist Funk, the Calvinist Nicholas Krell at Dresden). Hundreds of faithful Catholics, who fell victims to the Reformation in England, are venerated to-day as the English martyrs. The greater number of executions occurred, not under Mary the Catholic, but under Queen Elizabeth. It is, however, unjust to hold modern Protestantism, in the one instance, and Catholicism in the other responsible for these atrocities.

(2) In every age the Church has drawn a fundamental distinction (which, on account of its importance, should never be overlooked) between formal and merely material heretics, and her penal legislation was directed solely against the former category. As the open and obstinate rebellion of a Catholic against the Divinely instituted teaching authority of the Church,

formal heresy still remains one of the most grievous sins. Material heresy on the other hand, i. e. an error in faith entertained undesignedly and unconsciously, is in itself neither sinful nor punishable, except where the error is itself inexcusable. In excusable error are all who possess subjectively the firm and honest conviction that they have the true faith of Christ, thus including the vast majority of non-Catholics, who were born and educated in their particular form of belief. Even in the Middle Ages, while using her punitive power only against formal heretics who through baptism had belonged to her body from birth, the Church openly proclaimed her incompetency to take action in the case of Jews and pagans, since over these she possessed no jurisdiction. The Church has been always averse to forcible conversions, as was emphasized in modern times by Leo XIII in his Encyclical "Immortale Dei" of 1 November, 1885: "Atque illud quoque magnopere cavere Ecclesia solet, ut ad amplexandam fidem catholicam nemo invitus cogatur, quia quod sapienter Augustinus monet: 'Credere non potest (homo) nisi volens'" (The Church has always taken great care that no one should be compelled against his will to embrace the Catholic Faith, because, as Augustine wisely declares: except he be willing, man cannot believe) (cf. Denzinger, op. cit., n. 1875). Hence the tolerance always displayed by the Church, especially towards the Jews, and also the prohibition in canon law to make war on pagan nations merely on account of their unbelief, except when they put to death Christian missionaries or attacked Christian States, as the Saracens formerly did (cf. Schmalzgrüber, "Jus can. de Judæis", n. 53). A decision of Gregory the Great given in the Decree of Gratian (c. 4 jam vero C. 23, qu. 6) contains no warrant for religious coercion, since the pope simply grants to the Catholic colonists on his domains certain favours which he withholds from settlers obstinately adhering to their paganism.

(3) If in medieval times the Church adopted sterner measures against formal heretics, apostates, and schismatics than she adopts to-day, she did this not as a private individual, who must show only consideration and love, but as the legitimate governing authority within whose sphere also fell the administration of penal justice. The State must also inflict on the thief and revolutionary the legal punishment for theft and revolution, which are not punishable in the abstract. However repulsive, when judged from the more refined standpoint of modern civilization, the barbarous cruelty of medieval penal ordinances may be, as expressed even in the "Cautio criminalis" of the German Emperor, Charles V, against traitors, highway robbers, and notorious debauchees (impaling, breaking on the wheel), we may not for this reason condemn the whole penal system of that age as judicial murder; for the legal punishments, while indeed inhuman, were not unjust. Now, formal heresy was likewise strongly condemned by the Catholic Middle Ages: and so the argument ran: Apostasy and heresy are, as criminal rebellions against God, far more serious crimes than high treason, murder, or adultery. But, according to Rom., xiii, 11 sqq., the secular authorities have the right to punish, especially grave crimes, with death; consequently, "heretics may be not only excommunicated, but also justly (*juste*) put to death" (St. Thomas, II–II, Q. xi, a. 3). But there is no need to go back to the Middle Ages, since the present age likewise furnishes us with examples of extreme severity in the chastisement of certain crimes. With whatever disapproval the philanthropist may view the terrible punishments inflicted on those guilty of rape in parts of the United States, adjudging such penalties as excessive in their severity, the jurist will on the other hand seek their explanation in the special circumstances of time and place. American lynch law will not be unreservedly excused or justified, but, in judging it, allowance will be made for the imperfections of the existing penal procedure. The frequent inefficacy of the ordinary procedure is only too likely to excite the enraged populace to deeds of violence. Keeping these occurrences of modern times before our eyes, we will pass a much juster verdict on the Middle Ages. Catholics have, of course, no desire for the return of an age whose liberal, and in many respects admirable, state institutions were greatly marred by sinister penal ordinances.

(4) A distinction must be drawn between the penal system as such and its external forms. The barbarous penal forms of the Middle Ages are to be credited, not to the Church, but to the State. After the Christianized Roman Empire had developed into a theocratic (religious) State, it was compelled to stamp crimes against faith (apostasy, heresy, schism) as offences against the State (cf. Cod. Justin., I, 5, de hær.: "Quod in religionem divinam committitur, in omnium fertur injuriam"). Catholic and citizen of the State became identical terms. Consequently, crimes against faith were high treason, and as such were punishable with death. This was the universal opinion in the Middle Ages. This idea of the execution of heretics had not the slightest connexion with the essence of the Church or her constitution, and to the primitive Church such a penalty was unknown. St. Cyprian (d. 258) disapproved of all external means of coercion, such as were customary in the Old Testament, and claimed for the New Testament as "spiritual weapon" (*spiritualis gladius*) excommunication, which was worse than death. The earliest example of the execution of a heretic was the beheading of the ringleader of the Priscillianists by the usurper Maximus at Trier (385); this called forth a protest from St. Martin of Tours, St. Ambrose, and Pope Siricius (cf. Histor. polit. Blätter, XC, 1890, pp. 330 sqq.). Even St. Augustine, who towards the end of his life favoured state reprisals against the Donatists, always opposed the execution of heretics (cf. Ep. c [*alias* cxxvii]: "Corrigi eos cupimus, non necari"). During the long dominion of the Merovingians and Carlovingians, heresy was never regarded as a civil crime, and was chastised with no civil penalty. A change came only in the eleventh century, when Manichæism, which had earlier experienced bloody persecution at the hands of the Eastern emperors Theodosius (d. 395) and Justinian (d. 565), revived in the orgies of the Catharists and Albigenses. These disruptive sects attacked marriage, the family, and property, wherefore even Lea has to admit: "Had Catharism become predominant, its influence would infallibly have proved fatal" (History of the Inquisition, I, 117). Influenced by the Roman code, which was rescued from oblivion, the Hohenstaufen emperor, Frederick II, who was anything but a warm supporter of the papacy, introduced the penalty of burning for heretics by imperial law of 1224 (cf. Monum. Germ., IV Leg., II, 326 sqq.). The popes, especially Gregory IX (d. 1241), favoured the execution of this imperial law, in which they saw an effective means not alone for the protection of the State, but also for the preservation of the Faith. And indeed the danger to the common weal seen in Catharism inclined neither the State nor the Church to mildness, just as in the time of St. Augustine the ill-famed Circumcilliones of the Donatists bore every sign of a public rebellion. Would not even a modern state have to proceed against these murderers and incendiaries with weapon in hand? Unfortunately, neither the secular nor the ecclesiastical authorities drew the slightest distinction between dangerous and harmless heretics, seeing forthwith in every (formal) heresy a "contumelia Creatoris", which the theocratic State was called upon to avenge with the pyre. This inability to distinguish may be easily traced even in the writings of

Luther, Calvin, Melanchthon, Butzer, Wenceslaus, Sturm, Strigel, Matthias Coler, and other Protestant leaders. We may, therefore, rightly conclude that the harsh forms of punishment are to be referred partly to the fact that the medieval heretics were a menace to the community, and partly to the excessive strictness of the ancient penal code.

(5) It follows from what has been said that the custom of burning heretics is really not a question of justice, but a question of civilization. History shows that even in an age otherwise highly civilized certain especially detestable criminals are severely dealt with. A regrettable illustration is found in the introduction of torture into the trial of heretics by Innocent IV in 1252. Here again the influence of the ancient Roman code is discernible, since it also was accustomed from the earliest times to employ torture not as a punishment, but simply as a regular means of extracting the truth from the accused. That, despite its promised "evangelical liberty", the Reformation introduced no softening of manners, the continuation of torture and the prevalence of witch-burnings even in the eighteenth century clearly show. Torture was first abolished in Prussia (1745) by Frederick the Great; the last witch was burned in Switzerland in 1783. We cannot read without a shudder how in England high treason, which term included the profession of the Catholic Faith, was punished with hanging and the tearing out of the still throbbing heart from the living body. The law against mendicancy passed in 1572 under Queen Elizabeth ordained that the harmless offence of begging was to be punished with severe scourging, with perforation of the right ear with red hot iron, and, if the offence were repeated, with death (cf. G. Kassel, "Geschichtliche Entwickelung des Deliktes der Bettelei", Breslau, 1898, p. 37). In France no less cruelty was shown. When Henry IV was assassinated by Ravaillac on 14 May, 1610, the unfortunate criminal was mercilessly tortured; he was pierced with red-hot pincers, molten lead was poured over the hand which committed the murder, and finally he was torn to pieces by four horses. Exactly the same punishment, even to the smallest details, was meted out to the half-witted Damiens, although he merely scratched the libertine Louis XV with a pen-knife (cf. Pilatus, "Der Jesuitismus", Ratisbon, 1905, pp. 183 sqq.). After the horrors of the French Revolution the methods of punishment were gradually softened, and during the course of the nineteenth century humanitarian views won the victory everywhere (see PUNISHMENT). It rests with mankind to decide whether the penal systems of the future are to be disgraced by cruelty and barbarism or not. The coming generations must see that the return of inhuman penal ordinances shall be made impossible by the refinement of morals, the deepening of ethical culture, the philanthropic training of the young, and the impression of the mild and gentle characteristics of Christ on civil, national, and religious life. Since the secularized State renounced its union with the Church, and excluded heresy from the category of penal offences, the Church has returned to her original standpoint, and contents herself again with excommunication and other spiritual penalties (irregularity, ineligibility for ecclesiastical prebends, etc.), with which the modern State no longer associates (as in the Middle Ages) any penal or civil actions.

IV. THE NECESSITY FOR PUBLIC POLITICAL TOLERATION.—Since the State may not pose either as the mouthpiece of Divine Revelation or as the teacher of the Christian religion, it is clear that in regard to matters of religion it can adopt a much more broad-minded position than the Church, whose attitude is strictly confined by her teaching. The ethical permissibility, or rather the duty, of political tolerance and freedom of religion is determined by historical presuppositions and concrete relations; these impose an obligation which neither State nor Church can disregard. We will first consider the State in itself, and then the specifically Catholic State.

(1) The State is under obligation to make external conditions subserve the public good, and to protect against arbitrariness or molestation all individuals and corporations within its territory in the enjoyment of their personal, civic, political, and religious rights. This is in an especial manner the function of the constitutional State, which has slowly developed since the end of the eighteenth century. The Church has always combated the idea that the winning of new members and the recovery of the apostate pertain to the State. Christ entrusted, not the State, but the Church with the announcement of His Gospel to the whole world. Not even the medieval "religious State", whose constitution we shall describe in greater detail below, undertook to act as bearer of a supernatural revelation or as preacher and judge of the Catholic Faith. The intimate connexion of both powers during the Middle Ages was only a passing and temporary phenomenon, arising neither from the essential nature of the State nor from that of the Church. The Church is free to enter into a more or less close association with the State, but she can also endure actual separation from the State, and, given favourable circumstances, may even prosper under such conditions, as for example in the United States of North America. For the State also certain conditions may prevail which render a close union with the Church inadvisable or indeed quite impossible. When, for example, several religions have firmly established themselves and taken root in the same territory, nothing else remains for the State than either to exercise tolerance towards them all, or, as conditions exist to-day, to make complete religious liberty for individuals and religious bodies a principle of government.

The final conversion of the old religious State into the modern constitutional State, the lamentable defection of the majority of states from the Catholic Faith, the irrevocable secularization of the idea of the state, and the coexistence of the most varied religious beliefs in every land have imposed the principle of state tolerance and freedom of belief upon rulers and parliaments as a dire necessity and as the starting-point of political wisdom and justice. The mixture of races and peoples, the immigration into all lands, the adoption of international laws concerning colonization and choice of abode, the economic necessity of calling upon the workers of other lands, etc., have so largely changed the religious map of the world during the last fifty years that propositions 77–79 of the Syllabus published by Pius IX in 1864 (cf. Denzinger, op. cit., 1777–79), from which enemies of the Church are so fond of deducing her opposition to the granting of equal political rights to non-Catholics, do not now apply even to Spain or the South American republics, to say nothing of countries which even then possessed a greatly mixed population (e. g. Germany). Since the requisite conditions for the erection of new theocratic states, whether Catholic or Protestant, are lacking to-day and will probably not be realized in the future, it is evident on the basis of hard facts that religious liberty is the only possible, and thus the only reasonable, state principle. If, in those lands where she still enjoys a privileged position as state Church (e. g. Italy and Spain), the Catholic Church would not allow herself to be driven from this position without a protest, she has not only a right, but is even under obligation to offer this protest. For a justly acquired right should not be surrendered in silence. In this matter also the Church does only what is done by Protestant princes, who steadfastly adhere to Protestantism as the state religion (e. g. the King of England). But the priceless asset of religious peace compels the modern State to concede tolerance and religious freedom. Without this peace, the undisturbed continuation of the commonwealth is inconceivable. The history of the world could not easily display before the eyes of a patriot a more revolting picture than the fratricidal struggles which resulted from the Reformation in the religious wars of Europe. Wherever separate religious parties live in the same land, they must work together in harmony for the public weal. But this would be impossible, if the State, instead of remaining above party, were to prefer or oppress one denomination as compared with the others. Consequently, freedom of religion and conscience is an indispensable necessity for the State.

From the standpoint of natural law and Christian public law, however, this political tolerance is subject to a threefold limitation, since neither the completely unreligious character of the State nor the unbridled liberty of all imaginable cults may be set up as a principle of government, nor finally may the separation of State and Church be lauded to the skies as the perfect state ideal. These three limitations can be easily justified.

(a) To propose for the State such downright irreligion as a drastic remedy against intolerance is to advise it to saw through the bough on which it sits. For the "State without God", pledged to the "Principles of 1789", would be an immoral monster, which through lack of internal vitality would as surely encounter decay and destruction as did the atheistic Revolutionary State of France at the opening of the nineteenth century. If it is true that human society as a whole is bound to recognize the supreme dominion of God, then no State can shirk the obligation of confessing this God and of publicly venerating Him. The religionless State would be nothing less than an atheistic State, bearing in its very nature the germ of disintegration; since atheism is in itself and its effects a direct peril to the State. The pantheistic is not a whit better; for Hegel's motto, "the State is God", is pure nonsense, since it makes the absurd claim that the State is the original source of all right, and sets the omnipotent State in the place of God (cf. Syllab. Pii IX, prop. 39). A commonwealth that is to endure can be erected only on a theistic basis, since the fundamental ideas of justice, fidelity, and obedience, indispensable for the preservation of the State, can exercise their full influence only in theism. Furthermore the respect for property, the observance of the laws of chastity, aversion to revolution and high treason are best secured by a lively faith in God. Consequently, not alone Christian statesmen like Montesquieu and Guizot, but also freethinkers like Macchiavelli and Voltaire, strongly defended the religious foundations of the State. Even the pagan Cicero (De nat. deor., I) frankly recognized the impossibility of a State without the fear of God, on which depend in turn fidelity and justice. A State which is not itself permeated with sentiments of religion and idly tolerates the sapping of religion and morality is preparing the way for revolution, that is for its own destruction. The state axiom of religious freedom can therefore mean only freedom for religion, not freedom from religion or irreligion. In his Encyclical "Vehementer nos", of 11 February, 1906, Pope Pius X sharply denounces for its injustice the violent breach of the Concordat by the French Government, instancing as the chief grievance that, by the official recognition of its own irreligion, the French Republic had forsworn God Himself (cf. Denzinger, n. 1995). The historian von Treitschke expressed the conviction that "atheists have strictly speaking no place in the state" ("Politik", I, Leipzig, 1897, p. 326); the philosopher John Locke would hear nothing of state tolerance towards atheists. With a strange perversity of judgment he would indeed extend this intolerance to Catholics also, the firmest believers in God among all classes of mankind and the surest supporters of throne and altar. But, as things are to-day, nothing remains for the State but to tolerate atheists in its midst so long as they do not, by unlawful deeds, render themselves liable to punishment. In its own interest, however, the State must endeavour to protect and promote belief in God among the people by the establishment of good schools, by the training of believing teachers and officials in seminaries, lyceums, secondary schools, and universities, and finally by leaving the Church free to exert her salutary influence.

(b) A well-ordered commonwealth can no more recognize the maxim of unlimited and unbridled religious freedom than it can adopt the suicidal principle of irreligion. For state toleration of all forms of religion without exception, which could be justified only on the basis of disruptive atheism or a deistic indifferentism, is in palpable contradiction to natural law and to every rational system of polity (cf. Encyclical of Pius IX "Quanta cura" of 8 December, 1864). If the State as such is under the same obligation to confess and venerate God as the individual, it must set bounds to religious freedom at least at the point where the unrestricted exercise of this freedom would lead to the subversion of state security and public morality. The history of religion shows that, to deceive unwary authorities, intrigues most immoral and most dangerous to the State have disguised themselves in the mantle of religion: the cults of Moloch and Astarte, religious prostitution and community of women, ritual child-murder and Anabaptist horrors, conventicles for debauchery and anarchistic secret societies, etc. No State with a regard for its own preservation will hesitate to raise a barrier against moral, religious, and political anarchy; and to repel with vigour all such attacks aimed, under the mask of freedom of belief, at the existence of society. Free competition between truth and error, which is sometimes urged in the name of tolerance, promises neither for the State nor the Church an enduring success; the free competition between virtue and vice could be upheld by the same reasoning. There are certain deceits and vices which display their immorality so plainly that the State must mercilessly apply her penal law and, in the interest of the community, prevent their propagation. Thus England, in general so indulgent towards paganism in her colonies, could not tolerate the continuation among the Hindus of the ritual murder of children and the burning of widows (the *Suttee*), prohibiting the former under severe penalties in 1802 and the latter in 1829 (cf. Lecky, "Democracy and Liberty", I, London, 1896, pp. 424 sqq.). Again, although the Constitution of the United States guarantees complete freedom of belief, the American people always found Mormonism unbearable, and never rested until, by forbidding polygamy to the Mormons, the Christian conception of marriage had been recognized (see MORMONS). Not even the atheistic Revolutionary State of France granted an unlimited freedom of religious opinions in its "Déclaration des droits de l'homme" (1791), since it added the clause: "pourvu que leur manifestation ne trouble pas l'ordre public établi par la loi". Almost all modern States have admitted this limitation of religious freedom into their constitutions.

(c) Christian public law erects a third barrier to complete religious freedom in forbidding that the principle of the separation of Church and State be raised to the true ideal of the State and regarded as fundamentally the best form of the State; this does not mean that in certain exceptional cases actual separation may not be more beneficial for both Church and State than their organic union. While this separation may be always viewed as relatively the better condition, it does not thereby become the ideal state. The latter is only then attained when Church and State proceed hand in hand and in perfect harmony to promote by their common efforts the temporal and eternal happiness of their common subjects. As it is unnatural for a married couple to live separated, although separation may be defended in particular instances as the better or less harmful arrangement in view of quarrels which have arisen, so also the ideal relation between Church and State is to be found, not in the separation of the two, but in their harmonious co-operation (cf. Pius IX, Encyclical "Quanta cura" of 8 December, 1864; Syllab. prop. 55). As a practical proof of the internal advantages of a separation in principle, it is usual to point to the example of the United States, which has extended the blessing of its liberal Constitution in recent years to its newly-acquired colonies of Porto Rico and the Philippine Islands. But, while it may be granted without reserve that both Church and State seem to prosper exceedingly well in their friendly juxtaposition, it would be rash to speak of the situation as ideal. It must, however, be acknowledged that no other land in the world has so honourably maintained the amicable separation of Church and State, while in some European countries the law of separation was unfortunately only a pretext for a more violent attack on the rights of the Church. Not without good reason did Leo XIII in his Brief of 1902, addressed to the American hierarchy, express his approval of a wise and patriotic adaptation to the national and legal conditions of the United States. He could do this with a good conscience, although in his Encyclical "Immortale Dei" of 1 November, 1885, he had declared the harmonious union of the two highest powers the ideal situation, and had referred to concordats as the means of arranging questions bordering on both jurisdictions. If the United States forms the sole honourable exception to the rule, this is due partly to the fact that the State neglects neither the religious factor at large nor Christianity, as is shown by the strict laws concerning Sunday observance, Christian monogamy, and the celebration of Thanksgiving Day. What F. Walter wrote fifty years ago is still true to-day: "Even in the United States of North America, to which people so readily appeal, religion is not regarded as a matter of indifference to the State, but is presupposed as the State's complement" ("Naturrecht und Politik im Lichte der Gegenwart", Bonn, 1863, p. 495).

(2) By a Catholic State we understand a community which is composed exclusively of Catholic subjects and which recognizes Catholicism as the only true religion. In this case also the relations between Church and State may be different, according as the two powers are closely united for offence and defence, or, while each maintains its independence, are less compactly joined. The first kind of union finds its truest expression in the "religious state", a distinctive feature of the Middle Ages, while the second or looser union may be realized in a constitutional state that admits various denominations and yet retains its Christian character. In view of the difference of the fundamental ideas on which these two forms of state are based, the principles of political tolerance are subject to important modifications.

(a) Every religious State, Catholic or Protestant, presupposes by its very existence that all or nearly all the citizens have the same faith, otherwise it would be contrary to natural justice and practically impossible. In certain cases such a State must take drastic measures to expel or exclude all elements which do not fit into its framework. Thus a Protestant religious State was forcibly instituted in England under Queen Elizabeth by clearing the country of all Catholics, and the Diet of Upsala in 1593 strove to preserve the strictly Lutheran character of Sweden by making the immigration of Catholics punishable with death. The situation of the Catholic religious State in the Middle Ages was somewhat, though not entirely, similar. The medieval idea required that the State should lend the secular arm to the Church for the maintenance of all her doctrines, laws, and ordinances, and that in return it should receive from the Church spiritual support in all purely secular affairs. Thus State and Church formed the two all-embracing members of the one Christian body, assisting and supporting each other in the broad field of all secular and ecclesiastical interests. Empire and papacy, like body and soul, formed an organic whole. Citizen and Catholic were interchangeable terms. The rebel against the Church was regarded as likewise a rebel against the State, and conversely the political revolutionary was by that very fact an enemy of the Church. Whoever was stricken with excommunication finally incurred also imperial ban, and the imperial ban brought excommunication in its train. It is true that many advantages must be conceded to the religious State. We see an imposing and elevating idea rendered concrete in the supreme dominion of the Christian spirit throughout the civic, national, and religious life, in the organic connexion of the secular and the religious government, and in the strengthening of the state authority by the Church and of ecclesiastical authority by the State. These great advantages, however, must not cause us to overlook the numerous drawbacks which this mystical marriage of Church and State involved. First of all, in consequence of the fusion of the objects of the State and of religion, the Catholic religious State was compelled to adopt an attitude of fundamental intolerance towards all errors of faith, which became so many crimes against the State. Viewed from the historical standpoint one may justly doubt whether the bloody persecutions resulted in greater blessings and advantages or in greater want, hate, and suffering for Christendom (cf. De Laveley, "Le gouvernement dans la démocratie", I, Paris, 1892, pp. 157–62). It is certain that the odium for all those severities and cruelties had to be borne, not by the State which inflicted them, but rather by the Church, since she seemed to stand behind all these measures as the secret motive force, even though she did not know, much less justify many of them. We endeavoured above without partiality to appraise these accusations against the Church at their true value. To refer briefly to another gloomy aspect of this question, the ecclesiastical right to meddle directly in purely secular affairs might easily become a dangerous prerogative, inasmuch as the infliction of excommunication for purely political offences must necessarily have brought ecclesiastical penalties, especially when they were unjustly inflicted, into great discredit among princes and people. On the other hand, the right of protection exercised by the sovereign in ecclesiastical matters, often without or even against the wish of the popes, had for its unavoidable consequence the loss of public respect for both authorities. The proverbial contest between *imperium* and *sacerdotium*, which practically runs through the whole history of the Middle Ages, redounded in fact to the advantage of neither. A third disadvantage, arising essentially from the religious State, may not be passed over in silence; this consists in the danger that the clergy, trusting blindly to the interference of the secular arm in their behalf, may easily sink into dull resignation and spiritual torpor, while the laity, owing to the religious surveillance of the State, may develop rather into a race of hypocrites and pietists than into inwardly convinced Christians. A Catholic clergy which relies on State assistance for its pastoral activity lacks that glowing zeal for souls which springs from heartfelt convictions, and the vitality and sincerity of religion are grievously impaired when practices of piety are made compulsory by the State. The last and most serious disadvantage associated with the religious State lies in the immanent danger that the claim of the Church to supremacy over the State must almost necessarily call forth the opposite extreme of Cæsaropapism. The early protectorate of the State thus develops finally into the complete control and enslavement of the Church. Such in fact has been the historical sequence. Not alone in the Eastern Empire, in which Byzantine Cæsaropapism won its greatest triumphs, but also in the Western Empire these unworthy tendencies were all too clearly revealed, especially under the Hohenstaufens.

(b) When various Christian denominations establish themselves in any country, the Catholic State can no longer maintain its former exclusive attitude, but is compelled for reasons of State to show tolerance towards the heterodox and to grant them religious freedom within the limits described above and determined by natural law. If religious freedom has been accepted and sworn to as a fundamental law in a constitution, the obligation to show this tolerance is binding on conscience. The Catholic Church recognizes unreservedly the inviolability of constitutions confirmed by oath, of traditional laws, and regular religious compacts, because a breach of the constitution, of allegiance, of a treaty, or of an oath is a grievous sin, and because the Christian moral law prescribes fidelity to the State as an obligation strictly binding in conscience. To justify ethically tolerance towards certain religious practices of heathen subjects, medieval theologians appealed to the principle that tolerance might be always exercised wherever either its refusal would cause more harm than good, or, vice versa, whenever the granting of it ensured greater advantage than disadvantage. Thus St. Thomas teaches (Summa theol., II–II, Q. x, a. 11): "Ritus infidelium tolerari possunt vel propter aliquod bonum, quod ex eis provenit, vel propter aliquod maum, quod vitatur" (Heathen worships can be tolerated either because of some good that results from them or because of some evil that is avoided). In all the centuries the Church displayed an admirable tolerance especially towards the Jewish religion, since the survival of Judaism offered a living proof of the truth of Christianity. The medieval principle of tolerance is specially applicable to present conditions, since the historical development of the modern State has created throughout the world so uniform a basis of rights that even Catholic States cannot without violation of oaths and loyalty and without violent internal convulsions disregard it, even if they desired to do so. Besides, there is good reason to doubt if there still exists a purely Catholic State in the world; and it is, of course, just as doubtful whether there is such a thing as a purely Protestant State. Cosmopolites have established colonies and settlements everywhere, and to these international law concedes freedom of belief and worship. Consequently, Leo XIII also supported the principle of tolerance, when he declared (cf. Denzinger, n. 1874): "Revera si divini cultus varia genera eodem jure esse quo veram religionem Ecclesia judicat non licere, non ideo tamen damnat rerum publicarum moderatores, qui magni alicujus adipiscendi boni aut prohibendi causa mali moribus atque usu patienter ferunt, ut ea habeant singula in civitate locum" (If the Church declares that the various kinds of worship should not have the same rights as the true religion, she does not thereby condemn those rulers who, in order to secure some great good or to avert some evil, permit each cult to exist).

There are, however, a number of States, which in virtue of their constitutions are committed not alone to tolerance and religious freedom, but also to parity. By parity is understood the placing of all legalized or recognized religious bodies on the same footing before the law, all show of partiality and disfavour being equally avoided. Such is the basic principle of the constitutional State, which, while ethically Christian, allows various forms of belief. On it devolves especially the duty of placing no obstacle in the way of the public promotion of religion in sermon and writing and of extending to the religious practices of all denominations the same legal protection, to the exclusion of any compulsory system that would bind the citizens to receive certain religious rites (e. g. baptism, burial) from clergymen appointed by the State. With freedom of belief are intimately associated the personal right of changing one's religion and the right of the parties in the case of mixed marriages to decide as to the religious education of the children. The State must likewise recognize and protect the right of the various denominations to hold property and their right of self-government, in so far as these rights are enjoyed by all legally constituted corporations. Wherever such a State makes contributions or grants from the budget of public ownership, all recognized religious associations must receive equal consideration, unless a particular association, in virtue of a special title (e. g. the secularization of religious property), has legal claims to exceptional treatment. Finally, legal equality must be granted to the adherents of all denominations in both their civic and national capacities, especially in the matter of appointment to public office. Concerning Christian States in which various religions exist, F. Walter, the well-known professor of public law, made the wise observation: "The government as such, entirely regardless of the personal belief of the sovereign, must maintain towards every church the same attitude as if it belonged to this Church. In the consistent and upright observance of this standpoint lies the means of being just to each religion and of preserving for the State its Christian character" (loc. cit., p. 491). Such indeed is the admirable theory; wherever deviations from it occur in practice, they are almost without exception to the detriment of Catholics.

I. Concerning the Idea of Toleration: Pelisson-Fontanier, *De la tolerance des Religions; Lettres de M. Leibniz et Réponses de M. Pelisson* (Paris, 1692); Balmes, *El protestantismo comparado con el catolicismo en sus relaciones con la civilización europea*, I (Barcelona, 1842); Lehmkuhl, *Gewissens-u. Kultusfreiheit* in *Stimmen aus Maria-Laach*, XI (1876), 184 sqq.; Reinkens, *Lessing über Toleranz* (Leipzig, 1884); Nilles, *Tolerari potest* in *Zeitschr. für kath. Theol.*, XVII (1893), 245 sqq.; Lezius, *Der Toleranzbegriff Locke's u. Puffendorf's* (Leipzig, 1900); Ruffini, *La libertà religiosa* (Turin, 1901); Simar, *Gewissen u. Gewissensfreiheit* (2nd ed., Freiburg, 1902); Cathrein, *Gewissen u. Gewissensfreiheit* (Munich, 1906).

II. Concerning Theoretical Dogmatic Toleration: James, *The Meaning of Truth* (New York, 1900); Baldwin, *Thoughts and Things, or Genetic Logic*, I (New York, 1906); Schiller, *Studies in Humanism* (London, 1907); James, *Pragmatism* (New York, 1907). In answer to the theories there advocated: De Tongedet, *La notion de la verité dans la philosophie moderne* (Paris, 1909); Leclère, *Pragmatisme, modernisme, protestantisme* (Paris, 1909); Switalski, *Der Wahreitsbegriff des Pragmatismus* (Braunsberg, 1910); Sánchez, *De tolerantia religiosa* (Madrid, 1785), antiquated; Döllinger, *Kirche u. Kirchen* (Munich, 1861); Merkle, *Die Toleranz nach kathol. Principien* (Dillingen, 1863); *De intolerantia catholica seu de sententia: Extra Ecclesiam nulla salus* (Turin, 1868); Hansjakob, *Die Toleranz u. Intoleranz der kathol. Kirche* (Freiburg, 1899); Seitz, *Die Heilsnotwendigkeit der Kirche* (Freiburg, 1903); Romeis, *Das Heil der Christen ausserhalb der wahren Kirche nach der Lehre des hl. Augustinus* (Paderborn, 1908); Mausbach, *Die Ethik des hl. Augustinus*, II (Freiburg, 1909). Concerning the Inquisition: Lea, *A Hist. of the Inquisition in the Middle Ages* (3 vols., New York, 1888); Douais, *L'Inquisition, ses origines, sa procédure* (Paris, 1906); Vacandard, *L'Inquisition. Etude historique et critique sur le pouvoir coercitif de l'église* (Paris, 1907); de Cauzons, *Hist. de l'Inquisition en France*, I (Paris, 1909). Concerning the Tolerance of the Reformers: Paulus, *Die Strassburger Reformatoren u. die Gewissensfreiheit* (Freiburg, 1895); Idem, *Protestantismus u. Toleranz im 16. Jahrh.* (Freiburg, 1911); Köhler, *Reformation u. Ketzerprozess* (Tübingen, 1901); Wappler, *Inquisition u. Ketzerprocesse in Zwickau zur Reformationszeit* (Leipzig, 1908).

III. Concerning Practical Civic Toleration: Rickaby, *Moral Philosophy or Ethics and Natural Law* (London, 1893); Dorner, *Das menschliche Handeln.* (Berlin, 1895); Lecky, *Democracy and Liberty*, I (London, 1896), 424 sqq.; Waldmann, *Die Feindesliebe in der antiken Welt* (Vienna, 1902); Cathrein, *Moralphilosophie*, II (Freiburg, 1911); Strehler, *Das Ideal der kathol. Sittlichkeit* (Breslau, 1912); Grünebaum, *Sittenlehre des Judentums anderen Bekenntnissen gegenüber* (Strassburg, 1878); Milas, *Das Kirchenrecht der morgenländ. Kirche* (Zara, 1897), 604 sqq. Concerning the Punishment of Heretics: Ficker, *Die gesetzliche Einführung der Todesstrafe für Ketzer* in *Mitteil. für osterreich. Geschichtsforschung*, I (Vienna, 1880), 177 sqq.; Havet, *L'hérésie et le bras séculier au moyen-âge jusqu'au XIIIe siècle* (Paris, 1896); Hin-

J. POHLE.

Toletus, FRANCISCUS. See TOLEDO, FRANCISCO DE.

Tolima. See GARZÓN, DIOCESE OF.

Tolomei, JOHN BAPTIST, distinguished Jesuit theologian and cardinal, b. of noble parentage, at Camberaia, between Pistoia and Florence, 3 Dec., 1653; d. at Rome in the Roman College, 19 Jan., 1726, and was buried before the high altar of the Church of Saint Ignatius. At the age of fifteen, after an early schooling at Florence, he studied law at the University of Pisa; on 18 Feb., 1673, he entered the Society of Jesus at Rome. He was master of eleven languages, Latin, Greek, Hebrew, Chaldee, Syriac, Arabic, English, French, Spanish, Illyrian, and Italian. He began his public career at Rome by expounding the Sacred Scriptures on Sunday evenings in the Church of the Gesù. At the age of thirty he was elected in the General Congregation of the Jesuits as the procurator general of the order, which office he held for five years, relinquishing it to take the chair of philosophy at the Roman College. Here his lecture-room was thronged. His lectures were printed at Rome in 1696 under the title of "Philosophia mentis et sensuum", and demonstrated that, while loyal to the principles and method of Aristotle, he welcomed every discovery of his time in the natural sciences and wove these into his course. The lectures were reprinted in 1698 in Germany and evoked the warmest encomiums from the Academy of Leipzig as well as from Leibniz. He later filled the chair of theology at the Roman College (now the Gregorian University) and renewed the courses in controversial dogma begun by Bellarmine a century before. These lectures in MS. filled six volumes in folio but were never printed. Successively Rector of the Roman College and of the German College, he was at the same time Consultor of the Congregations of Rites, of the Index, and of Indulgences, as well as being one of the appointed examiners of bishops. On 17 May, 1712, unexpectedly created cardinal by Clement XI, under the title of Santo Stefano in Monte Cœlio, he became chief adviser to the pontiff in matters theological, particularly in the preparation of the condemnation of the errors of Quesnel. As cardinal he assisted at the conclaves which elected Innocent XIII and Benedict XIII. His published works are the "Philosophia mentis et sensuum" (with the addition of natural theology and ethics, Rome, 1702), "De primatu beati Petri" (in the second series of the miscellany printed from the manuscripts in the library of the Roman College, Rome, 1867), and a little pamphlet containing "Daily Prayers for a Happy Death" (in Latin, Vienna, 1742; also in German, Augsburg, 1856).

HURTER, *Nomenclator literarius*, IV (Innsbruck, 1910); SOMMERVOGEL, *Bibliothèque de la compagnie de Jésus*, VIII (Brussels, 1898).

CHARLES MACKSEY.

Tomb, a memorial for the dead at the place of burial, customary, especially for distinguished persons, among nearly all peoples. It is of much importance in the history of art because the development of plastic art can be traced almost in its entirety by means of tombs, for the tombs, having, as a rule, been erected in churches, are better preserved. Apart from the sepulchral slabs in the Catacombs, sarcophagi ornamented with portraits, and scattered examples of mausolea, tombs may be divided into four special classes.

The first class consists of tombs with recumbent tombstones; among such are the stone or metal plates inserted in the flooring of churches. These are the oldest Christian monuments. Originally, at least in Germany, they were ornamented with a cross having a long shaft; from the eleventh century they also bore the figure of the deceased. The monumental metal plate of the tomb of King Rudolph of Swabia (d. 1081), in the cathedral of Merseburg, is of this era. During the Gothic period an engraved brass plate was the favourite sepulchral monument, while the Renaissance returned to the plate cast in relief, such as the plates by Peter Vischer of Nuremberg.

TOMB OF CAN GRANDE I, VERONA
Francesco della Scala, 1329

The second class consists of detached altar-tombs, that is, a raised tomb containing the body of the deceased. One variety rises like a table above the place of burial. Romanesque art generally left the side walls of the altar-tomb without ornament, while Gothic art adorned them with numerous small figures, as those of relatives, mourners, praying figures, and allegorical forms. On the lid the deceased was represented at full length. Numerous examples are to be found in all the medieval cathedrals and monastic churches. Even England, where there are but scanty plastic remains, has a rich treasure of such monuments. Probably no altar-tomb is more celebrated than that of Emperor Maximilian at Innsbruck. Another worthy of mention is Charles the Bold's tomb at Dijon by Claus Sluter. More elaborate monuments have frequently an additional structure above and around them, as a baldachin, e. g. the tomb of the Della Scala at Verona; chiefly that of Cansignorio (d. 1375). During the Renaissance the baldachin assumed an entirely monumental form, almost that of a triumphal arch; fine examples are the monuments of Galleazzo Visconti in the Certosa at Pavia and of Francis I at Saint-Denis.

Tomb of the Doge Giovanni Pesaro
Longhena, the Frari, Venice

The third class may be called mural tombs, that is, altar-tombs set originally in a niche against a wall, and later raised upon pillars, caryatides, or a solid understructure. They were decorated on all sides with rich plastic ornamentation. They were customary as early as the Gothic period and attained their highest development in Italy, where the inordinate craving for fame and the longing to be remembered by posterity led to the production of those magnificent sepulchral monuments for physicians, lawyers, professors, statesmen, and, by no means last, prelates, which fill the churches from Venice to Naples. During the period of the early Renaissance it was a favourite custom to place a recumbent statue of the deceased upon a state bed or a sarcophagus and to set this at a moderate height; this structure is surrounded by standing or kneeling angels who draw back a curtain of the niche in which the Madonna is often visible. A fine example is the tomb of Leonardo Bruni (d. 1444) in Santa Croce at Florence. During the late Renaissance undue consideration was paid to architecture, as in the sepulchral monument of Giovanni Pesaro in the Frari church at Venice. In the seventeenth and eighteenth centuries the art of sculpture obtained again a greater opportunity in the treatment of tombs, but unfortunately only in the monotonous Baroque style. Hardly more than the figure of the deceased was brought into prominence. It was placed within an altar of similar style or upon a broad *podium* and was surrounded by all kinds of symbolical figures in the most daring positions. In a material sense these tombs are often very fine but they frequently lack the desired spiritual earnestness and repose.

Tomb of Leonardo Bruni
Rossellino, Church of S. Croce, Florence

The fourth class consists of hanging sepulchral monuments (memorial tablets). These occur as early as Gothic art in the form of funeral escutcheons and coats of arms made of wood or leather; and are especially prominent in the period of the Rococo and Baroque styles. Besides the altar-shaped tablet often constructed in several stories, the cartouche containing a portrait of the deceased was very popular in sepulchral monuments of this class.

Since the modern era put an end nearly everywhere to the burial of the dead within the church building, a new form of sepulchral art has gradually developed; it has produced works of the greatest beauty in all countries, but has also shown great perversions of the artistic sense, especially in Italy where the tendency is more to an excess of technic than to the conception of the eternal. The finest sepulchral monument of modern times is perhaps the one designed by A. Bartholomé and erected at Père Lachaise.

Beda Kleinschmidt.

Tomb of the Blessed Virgin Mary.—The tomb of the Blessed Virgin is venerated in the Valley of the Cedron, near Jerusalem. Modern writers hold, however, that Mary died and was buried at Ephesus. The main points of the question to be taken into consideration are as follows.

Entrance to the Church of the Assumption

I. The apocryphal works of the second to the fourth century are all favourable to the Jerusalem tradition. According to the "Acts of St. John by Prochurus", written (160–70) by Lencius, the Evangelist went to Ephesus accompanied by Prochurus alone and at a very advanced age, i. e. after Mary's death. The two letters "B. Ignatii missa S. Joanni", written about 370, show that the Blessed Virgin passed the remainder of her days at Jerusalem (Funk, "Patres ap.", 1901, II, 214–16). That of Dionysius the Areopagite to the Bishop Titus (363), the "Joannis liber de Dormitione Mariæ" (third to fourth century), and the treatise "De transitu B. M. Virginis" (fourth century) place her tomb at Gethsemane. From an historical standpoint these works, although apocryphal, have a real value, reflecting as they do the tradition of the early centuries. At the beginning of the fifth century a pilgrim from Armenia visited "the tomb of the Virgin in the valley of Josaphat", and about 431 the "Breviarius de Hierusalem" mentions in that valley "the basilica of Holy Mary, which contains her sepulchre". Thenceforth pilgrims of various rites repaired thither to venerate the empty tomb of Mary. St. Gregory of Tours, St. Modestus, St. Sophronius, Patriarch of Jerusalem, St. Germanus, Patriarch of Constantinople, St. Andrew, Bishop of Crete, John of Thessalonica, Hippolytus of Thebes, and Venerable Bede teach this same fact and bear witness that this tradition was accepted by all the Churches of East and West. St. John Damascene, preaching on the feast of the Assumption at Gethsemane, recalls that, according to the "Euthymian History", III, xl (written probably by Cyril of Scythopolis in the fifth century), Juvenal, Bishop of Jerusalem, sent to Constantinople in 452 at the command of the Emperor Marcian and Pulcheria, his wife, the shroud of the Blessed Virgin preserved in the church of Gethsemane (P. G., XCVI, 747–51). The relic has since been venerated in that city at the Church of Our Lady of Blachernæ.

F. Primitive Level of the Courtyard. G. Level in the XII Century.
H. Present Level.

II. There was never any tradition connecting Mary's death and burial with the city of Ephesus. Not a single writer or pilgrim speaks of her tomb as being there; and in the thirteenth century Perdicas, prothonotary of Ephesus, visited "the glorious tomb of the Virgin at Gethsemane", and describes it in his poem (P. G., CXXXIII, 969). In a letter sent in 431 by the members of the Council of Ephesus to the clergy of Constantinople we read that Nestorius "reached the city of Ephesus where John the Theologian and the Mother of God, the Holy Virgin, were separated from the assembly of the holy Fathers", etc. Tillemont has completed the elliptical phrase by adding arbitrarily, "have their tombs". He is followed by a few writers. According to the meditations of Sister Catherine Emmerich (d. 1824), compiled and published in 1852, the Blessed Virgin died and was buried not at Ephesus but three or four leagues south of the city. She is followed by those who accept her visions or meditations as Divine revelations. However, St. Brigid relates that at the time of her visit to the church of Gethsemane the Blessed Virgin appeared to her and spoke to her of her stay of three days in that place and of her Assumption into Heaven. The revelations of Ven. Maria d'Agreda do not contradict those of Catherine Emmerich.

III. As the soil is considerably raised in the Valley of the Cedron, the ancient Church of the Sepulchre of Mary is completely covered and hidden. A score of steps descend from the road into the court (see plan: B), at the back of which is a beautiful twelfth century porch (C). It opens on a monumental stairway of forty-eight steps. The twentieth step leads into the church built in the fifth century, to a great extent cut from the rock. It forms a cross of unequal arms (D). In the centre of the eastern arm, 52 feet long and 20 feet wide, is the glorious tomb of the Mother of Christ. It is a little room with a bench hewn from the rocky mass in imitation of the tomb of Christ. This has given it the shape of a cubical edicule, about ten feet in circumference and eight feet high. Until the fourteenth century the little monument was covered with magnificent marble slabs and the walls of the church were covered with frescoes. Since 1187 the tomb has been the property of the Mussulman Government which nevertheless authorizes the Christians to officiate in it.

Tomi, a titular metropolitan see in the Province of Scythia, on the Black Sea. It was a Greek colony from Miletus. In 29 B. C. the Romans captured the country from the Odryses, and annexed it as far as the Danube, under the name of *Limes Scythicus.* The city was afterwards included in the Province of Mœsia, and, from the time of Diocletian, in Scythia Minor, of which it was the metropolis. In A. D. 10 Ovid was exiled thither by Augustus, and died there eight years later, celebrating the town of Tomi in his poems. Few places had so many Christian memories as this town, in the barbarous country of the Getæ; e. g. Sts. Macrobius, Gordianus, and their companions, exiled to Scythia and slain in 319, venerated on 13 Sept.; Sts. Argeus, Narcissus, and Marcellinus, also slain under Licinius and venerated 2 Jan.; a great many others whose names only are known, and who are mentioned in the Roman Martyrology for 3 April, 20 June, 5 July, and 1 October. The first bishop may have been Evangelicus, mentioned in the Acts of Sts. Epictetus and Action (8 July), and who must have lived at the end of the third century. Eusebius (De Vita Constantini, III, 7) mentions a Scythian bishop at Nicæa who may have belonged to Tomi. Mention should be made of St. Bretanion, martyred under Valens, and whose feast is observed 25 Jan.; Gerontius, at the Council of Constantinople, in 381; St. Theotimus, writer and friend of St. John Chrysostom, venerated 20 April; Timotheus, at Ephesus in 431; John, ecclesiastical writer, d. about 448; Alexander, at Chalcedon in 451; Theotimus II, in 458; Paternus, in 519; and Valentinian, in 550. The Province of Scythia formed a single diocese, that of Tomi, an autocephalous archdiocese, subject to the Patriarch of Constantinople. It is mentioned in 640 in the Ecthesis of Pseudo-Epiphanius (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 535). Shortly afterwards the Bulgarians invaded the region and the Archdiocese of Tomi was suppressed. The city subsequently belonged to the Byzantines, again to the Bulgarians, then to the Turks, and finally to the Rumanians since the Treaty of Berlin in 1878. The town of Tomi is near Constantza, the capital of Dobroudja and a port on the Black Sea, which has about 15,000 inhabitants. There is a Catholic parish. A statue of the poet Ovid stands in the chief square.

Tongerloo, Abbey of, near Antwerp, Belgium, founded in 1128 in honour of the Blessed Virgin, by de Giselbert, who not only gave the land, but also himself became a lay brother in it. The first religious were sent from St. Michael's Abbey, Antwerp, under Henry, who had come with St. Norbert to Antwerp to extirpate the Tanchelmite heresies. The charter of its foundation was signed, amongst others, by St. Bernard of Clairvaux and by the Blessed Waltman, first Abbot of Antwerp. The Bishop of Cambrai granted synodal rights to the abbots. From very small beginnings the abbey grew to be in time one of the most important in Belgium, making its spiritual and social influence felt in a large district called Campine, now in north-east Belgium and south Holland, then a wild district in which but scanty provision was found for the spiritual and social needs of its scattered inhabitants. Considering the scarcity of priests and the good done by the religious of Tongerloo, the bishops of Cambrai, the chapters of Liège and Maastricht, and several landowners confided the charge of parishes, with the right of patronage, to the abbey; thus it came to pass that in time the abbey had to provide priests for some forty parishes, or small Norbertine residences, in these parts.

Tongerloo Abbey, from the South-west

With the erection of new dioceses (1559–60) in Belgium and Holland, heavy burdens were cast on the abbey, for not only had it to provide the funds, but the new Bishop of Bois-le-Duc was put at its head as abbot. This state of affairs lasted until 1590, when, to obtain its independence, the abbey had to give up much property in support of the new diocese. Meanwhile the Calvinists had become very powerful in Holland and, in their hatred of the Catholic Church, had put many Catholics to death. Amongst those who received the crown of martyrdom are reckoned three religious of Tongerloo, viz.: Arnold Vessem and Henry Bosch in 1557, and Peter Janssens in 1572. The abbey has always promoted education. Bishop Ophovius says that its religious were educated *in omni pietate et doctrina* and Miræus, that it was *fœcundum pastorum Seminarium.* It possessed one of the largest libraries, and was able to take up the work of the Bollandists. (See Backx; Premonstratensian Canons, Bollandists.)

F. M. Geudens

Tongiorgi, Salvator, philosopher, b. at Rome, Italy, 25 Dec., 1820; d. there, 12 Nov., 1865. At the age of seventeen he entered the Society of Jesus. After the usual noviceship, literary and philosophical studies, a half-decade was spent in teaching rhetoric at Reggio and humanities at Forlì. Then four years were passed in the study of theology, under the eminent professors Perrone, Passaglia, Ballerini, and Patrizi. Immediately after this, in 1853, the young priest was assigned to the chair of philosophy in the Roman College, and there during twelve years distinguished himself as a teacher and author. Within a few days of his forty-fourth birthday he was appointed assistant to the provincial of the Roman Province; but his health gave way before a year had elapsed. Father Tongiorgi wrote a well-known course of philosophy, "Institutiones philosophicæ", which he published in three volumes at Rome in 1861 and at Brussels in 1862. Nine editions appeared during the next eighteen years, some of them modified by Claude Ramière. A compendium of the same work and a separate volume on ethics also came from his pen. All his works are still used as text-books for college or seminary. On some of the mooted questions in philosophy the author departed from Scholastic traditions, rejecting the Peripatetic theory of matter and form, denying the real distinction between accidents and substance, and claiming that mere resultants of mechanical and chemical forces could produce the life-activity seen in the vegetable world. These doctrines, though not widely accepted, yet stimulated the Scholastics to make better use of the researches carried on in the physical sciences.

Tongues, Gift of, or Glossolaly (γλωσσολαλία), a supernatural gift of the class *gratiæ gratis datæ*, designed to aid in the outer development of the primitive Church. The theological bearing of the subject is treated in the article Charismata (11). The present article deals with its exegetical and historic phases.

St. Luke relates (Acts, ii, 1–15) that on the feast of Pentecost following the Ascension of Christ into heaven one hundred and twenty disciples of Galilean origin were heard speaking "with divers tongues, according as the Holy Ghost gave them to speak". Devout Jews then dwelling at Jerusalem, the scene of the incident, were quickly drawn together to the number of approximately three thousand. The multitude embraced two religious classes, Jews and proselytes, from fifteen distinct lands so distributed geographically as to represent "every nation under heaven". All were "confounded in mind" because every man heard the disciples speaking the "wonderful things of God" in his own tongue, namely, that in which he was born. To many the disciples appeared to be in a state of inebriation, wherefore St. Peter undertook to justify the anomaly by explaining it in the light of prophecy as a sign of the last times.

The glossolaly thus described was historic, articulate, and intelligible. Jerusalem was then as now a polyglottal region and could easily have produced one hundred and twenty persons who, in the presence of a cosmopolitan assemblage, might express themselves in fifteen different tongues. Since the variety of tongues is attributed to the group and not to individuals, particular disciples may not have used more than their native Aramaic, though it is difficult to picture any of them historically and socially without at least a smattering of other tongues. The linguistic conditions of the country were far more diverse than those of Switzerland to-day. The number of languages spoken equalled the number of those in which the listeners "were born". But for these Greek and Aramaic would suffice with a possible admixture of Latin. The distinction of "tongues" (v. 6, διάλεκτος; v. 11, γλῶσσα) was largely one of dialects and the cause of astonishment was that so many of them should be heard simultaneously and from Galileans whose linguistic capacities were presumably underrated. It was the Holy Ghost who impelled the disciples "to speak", without perhaps being obliged to infuse a knowledge of tongues unknown. The physical and psychic condition of the auditors was one of ecstasy and rapture in which "the wonderful things of God" would naturally find utterance in acclamations, prayers or hymns, conned, if not already known, during the preceding week, when they were "always in the temple", side by side with the strangers from afar, "praising and blessing God" (Luke, xxiv, 52, 53).

Subsequent manifestations occurred at Cæsarea, Palæstina, Ephesus, and Corinth, all polyglottal regions. St. Peter identifies that of Cæsarea with what befell the disciples "in the beginning" (Acts, xi, 15). There, as at Ephesus and Jerusalem, the strange incident marked the baptism of several converts, who operated in groups. Corinth, standing apart in this and other respects, is reserved for special study. In post-Biblical times St. Irenæus tells that "many" of his contemporaries were heard "speaking through the Spirit in all kinds (παντοδαπαῖς) of tongues" ("Contra hær.", V, vii; Eusebius, "Hist. eccl.", V, vii). St. Francis Xavier is said to have preached in tongues unknown to him and St. Vincent Ferrer while using his native tongue was understood in others. From this last phenomenon Biblical glossolaly differs in being what St. Gregory Nazianzen points out as a marvel of speaking and not of hearing. Exegetes observe too that it was never used for preaching, although Sts. Augustine and Thomas seem to have overlooked this detail.

St. Paul's Concept (I Cor., xii-xiv).—For the Biblical data thus far examined we are indebted to the bosom friend and companion of St. Paul—St. Luke. That being true, the views of St. Paul on supernatural glossolaly must have coincided with those of St. Luke. Now St. Paul had seen the gift conferred at Ephesus and St. Luke does not distinguish Ephesian glossolaly from that of Jerusalem. They must therefore have been alike and St. Paul seems to have had both in mind when he commanded the Corinthians (xiv, 37) to employ none but articulate and "plain speech" in their use of the gift (9), and to refrain from such use in church unless even the unlearned could grasp what was said (16). No tongue could be genuine "without voice" and to use such a tongue would be the act of a barbarian (10, 11). For him the impulse to praise God in one or more strange tongues should proceed from the Holy Ghost. It was even then an inferior gift which he ranked next to last in a list of eight charismata. It was a mere "sign" and as such was intended not for believers but for unbelievers (22).

Corinthian Abuses (I Cor., xiv *passim*).—Medieval and modern writers wrongly take it for granted that the charism existed permanently at Corinth—as it did nowhere else—and that St. Paul, in commending the gift to the Corinthians, therewith gave his guaranty that the characteristics of Corinthian glossolaly were those of the gift itself. Traditional writers in overlooking this point place St. Luke at variance with St. Paul, and attribute to the charism properties so contrary as to make it inexplicable and prohibitively mysterious. There is enough in St. Paul to show us that the Corinthian peculiarities were ignoble accretions and abuses. They made of "tongues" a source of schism in the Church and of scandal without (xiv, 23). The charism had deteriorated into a mixture of meaningless inarticulate gabble (9, 10) with an element of uncertain sounds (7, 8), which sometimes might be construed as little short of blasphemous (xii, 3). The Divine praises were recognized now and then, but the general effect was one of confusion and disedification for the very unbelievers for whom the normal gift was intended (xiv, 22, 23, 26). The Corinthians, misled not by insincerity but by simplicity and ignorance (20), were actuated by an undisciplined religious spirit (πνεῦμα), or rather by frenzied emotions and not by the understanding (νοῦς) or the Spirit of God (15). What to-day purports to be the "gift of tongues" at certain Protestant revivals is a fair reproduction of Corinthian glossolaly, and shows the need there was in the primitive Church of the Apostle's counsel to do all things "decently, and according to order" (40).

Faithful adherence to the text of Sacred Scripture makes it obligatory to reject those opinions which turn the charism of tongues into little more than infantile babbling (Eichhorn, Schmidt, Neander), incoherent exclamations (Meyer), pythonic utterances (Wiseler), or prophetic demonstrations of the archaic kind (see I Kings, xix, 20, 24). The unalloyed charism was as much an exercise of the intelligence as of the emotions. Languages or dialects, now καιναῖς (Mark, xvi, 17) for their present purpose, and now spontaneously borrowed by the conservative Hebrew from Gentile foreigners (ἑτερογλώσσοις, χείλεσιν ἑτέρων, I Cor., xiv, 21), were used as never before. But they were understood even by those who used them. Most Latin commentators have believed the contrary, but the ancient Greeks, St. Cyril of Alexandria, Theodoret, and others who were nearer the scene, agree to it and the testimony of the texts as above studied seems to bear them out. (See CHARISMATA.)

THOS. À K. REILLY.

Tonica Indians (OR TUNICA).—A small tribe constituting a distinct linguistic stock living, when first known to the French, in small villages on the lower Yazoo river, Mississippi, in alliance with the Yazoo and Ofogula, and numbering perhaps 700. Their tribal name signifies "the people". They may be identical with the people of "Tanico", encountered by the De Soto expedition in 1540, apparently about north-eastern Louisiana. Their definite history begins in the summer of 1698 with the visit of the missionary priests of the Quebec Seminary of Foreign Missions, Fathers Montigny, Davion, and La Source. They had been decimated just before by a smallpox epidemic, which had ravaged the whole lower Mississippi country, and numbers were still dying, of whom several, including a chief, received baptism. In the next year Fr. Antoine Davion established a mission among them, studying their language and ministering to the allied tribes. In this year the French commander Iberville visited them, and in 1700 the Jesuit, Father Jacques Gravier, descending the Mississippi, stopped off to wait upon Davion, who was prostrated by fever. The Tonica were noted for their affection and loyalty toward the French. This may have been due in part to their lack of kinship with any of the surrounding tribes. In the fall of 1702 Fr. Nicholas Foucault, of the same order, who had arrived in the previous year to assist Davion, was murdered with three other Frenchmen, while asleep, by treacherous Koroa guides in collusion with the Yazoo. In consequence of these murders Father Davion retired to the French fort at Mobile until, at the urgent request of a delegation of Tonica chiefs, who promised full reparation upon the guilty ones, he returned, probably in 1705. In 1706, in consequence of Chickasaw raids instigated by the Carolina slave-traders, the Tonica fled across the Mississippi and settled near the mouth of Red River, Fr. Davion accompanying them. Their neighbours, the Taensa, were likewise compelled to remove by the same enemy.

In 1719 the historian La Harpe stopped at the Tonica village and found Father Davion still there and "very much revered", although preaching fearlessly against their polygamy and heathen ceremonials. They had given up their worst heathenisms and the head chief, with his family, was a daily attendant at the sermons. Charlevoix visited their principal town in 1721 and describes the chief, Cahura-Joligo, as devoted to the French, wearing civilized dress, wealthy, and having the full confidence of the commandants. The houses were built around an open space used for games. Father Davion had some time before left them for the last time, in despair at their indifference, and notwithstanding their affection for him, which was not disturbed even when in his zeal on one occasion, he had burned their sacred fire temple.

In the various difficulties with the powerful Natchez, beginning in 1716, the Tonica, almost alone of the Indian tribes, rendered efficient service to the French. In the final war, beginning in 1729, they again supported the French. In retaliation a large body of fugitive Natchez, aided by the Chickasaw and Koroa, fell upon the Tonica (1731) and defeated them in a desperate battle, killing their best warriors and their head chief Cahur-Joligo. They never recovered from this blow. In 1758 they still counted about 250 souls in a village above Pointe Coupée but some time between 1784 and 1803 the remnant removed to the neighbourhood of Marksville, Louisiana, on the Red River, where some thirty mixed bloods still remain, besides a few others scattered in the Choctaw Nation, Oklahoma, and elsewhere. In 1886 Dr. Albert Gatschet of the Bureau of American Ethnology collected from the survivors the first recorded vocabulary of the language, by which he was enabled to classify it as constituting a distinct stock. This was supplemented in 1909 by Dr. John R. Swanton, of the same Bureau, who also obtained several interesting myths. The Tonica were an agricultural tribe and in arts, customs and general culture closely resembled their neighbours, the Natchez and Taensa. Both sexes had the head artificially flattened, went nearly naked except on ceremonial occasions, and wore the hair at full length down the back. The men did most of the heavy work, spending most of their time in the corn fields and rarely hunting, so that they ate but little meat. They buried in the ground and kept a light burning, and a watch beside the grave for four nights until the soul was supposed to have reached the spirit world. They had a temple with a sacred fire, and according to Father Gravier, had nine principal gods, viz. the Sun, Thunder, Fire and the gods of the four cardinal points, Sky, and Earth. There is no record of the bloody rites characteristic of the Natchez and Taensa.

James Mooney.

Tonkawa Indians.—A tribal group or confederacy, of low culture status and constituting a distinct linguistic stock, formerly ranging about the middle Trinity and Colorado Rivers, in Eastern Texas, and now represented by a single rapidly dwindling remnant of about forty souls. They may have numbered originally 2000 souls, including the Tonkawa proper, the Yojuane, Mayeye, Ervipiame, and others. The origin and meaning of the name Tonkawa are unknown. They call themselves *Titskan-watich*, "natives". They were inveterate rovers, planting nothing, but subsisting entirely by the buffalo and other game, the fruit of the mesquite and cactus, and wild roots. They dwelt in buffalo skin tipis or brushwood shelters, were notable horsemen, and carried the bow, spear, shield, with the usual head-dress of feathered cap and buffalo horns on ceremonial occasions. They were superior hunters and brave and active warriors, but were hated by all the neighbouring tribes by reason of their cannibal habit, on account of which they were universally known among the other Indians as the "Man Eaters". Of their cannibal practices there is abundant record and it is this propensity which led to their outlawry and final destruction. Almost nothing is known of their myths and ritual, beyond the fact that they had a Wolf Dance and claimed the wolf as an ancestor. They were also leaders in the ritual cult of the peyote, a cactus eaten with ceremonial accompaniment to produce waking visions.

The Tonkawa are first mentioned by name in a Spanish document of 1691. In 1719 they first became known to the French through La Haye's expedition into what is now Eastern Oklahoma. In response to their request, the Franciscan Father Francisco Ano de los Dolores in 1748 established for their benefit the Mission of San Francisco Xavier de Horcasitas on San Xavier (now San Gabriel) River, about nine miles north-west of the present Rockdale Nilamco, Texas. Shortly afterward the Tonkawa together with other tribes of Central Texas, were greatly wasted by a smallpox epidemic. The mission also suffered from the attacks of the Lipan Apache, in consequence of which and another epidemic most of the inmates were removed to a mission on Guadalupe River about 1755. Another band of the same connexion, the Ervipiame, established on request of their chief in the Mission of San Francisco-Xavier de Náxera on San Antonio River in 1722, had later been consolidated with the larger body at the second San Xavier. With the decline and abandonment of the Texas missions, 1790–1800, the mission Indians for the most part rejoined their tribes and relapsed into barbarism. In 1778 the Tonkawa were still estimated at about 1200 souls, but another smallpox epidemic immediately thereafter cut them down one-half. In 1855 the Government settled them, with several other tribes, on a reservation on the Clear Fork of the Brazos River, but in consequence of the opposition of the Texans it was found necessary to remove them in 1857 to a new reservation on Washita River, Oklahoma, the Tonkawa camp being just above the present Anadarko. Taking advantage of the confusion of the Civil War, a combination of the neighbouring tribes—who had a hatred toward the Tonkawa on account of their cannibalism and their activity as scouts for the troops—surprised the Tonkawa camp in a night attack, 25 October, 1862, killing 137 out of a total of 305. They never recovered from this blow. After years as refugees about Fort Griffin, Texas, under military protection, the remnant numbering only 90, were gathered together in 1884 and again removed to a small reservation in Oklahoma, near the present Ponca. They are now citizens, with lands allotted in severalty. Our knowledge of the Tonkawa language is based chiefly on Gatschet's studies of manuscript material with the Bureau of American Ethnology.

Tribes in La., etc., with original Presidential Message conveying report of Lewis and Clark discoveries* (Washington, 1806).

James Mooney

Tonsure (Lat. *tondere*, "to shear"), a sacred rite instituted by the Church by which a baptized and confirmed Christian is received into the clerical order by the shearing of his hair and the investment with the surplice. The person thus tonsured becomes a partaker of the common privileges and obligations of the clerical state and is prepared for the reception of orders. The tonsure itself is not an ordination properly so called, nor a true order. It is rather a simple ascription of a person to the Divine service in such things as are common to all clerics. Historically, the tonsure was not in use in the primitive Church during the age of persecution. Even later, St. Jerome (in Ezech., xliv) disapproves of clerics shaving their heads. Indeed, among the Greeks and Romans such a custom was a badge of slavery. On this very account, the shaving of the head was adopted by the monks. Towards the end of the fifth, or beginning of the sixth, century, the custom passed over to the secular clergy.

As a sacred rite, the tonsure was originally joined to the first ordination received, as in the Greek Church it still is to the order of lector. In the Latin Church it began as a separate ceremony about the end of the seventh century, when parents offered their young sons to the service of God. Tonsure is to be given by a candidate's ordinary, though mitred abbots can bestow it on their own subjects. No special age for its reception is prescribed, but the recipient must have learnt the rudiments of the Faith and be able to read and write. The ceremony may be performed at any time or place. As to the monastic tonsure, some writers have distinguished three kinds: (1) the Roman, or that of St. Peter, when all the head is shaved except a circle of hair; (2) the Eastern, or St. Paul's, when the entire head is denuded of hair; (3) the Celtic, or St. John's, when only a crescent of hair is shaved from the front of the head. In Britain, the Saxon opponents of the Celtic tonsure called it the tonsure of Simon Magus. According to canon law, all clerics are bound to wear the tonsure under certain penalties. But on this subject, Taunton (loc. cit. inf.) says: "In English-speaking countries, from a custom arising in the days of persecution and having a prescription of over three centuries, the shaving of the head, the priestly crown, seems, with the tacit consent of the Holy See, to have passed out of use. No provincial or national council has ordered it, even when treating of clerical dress; and the Holy See has not inserted the law when correcting the decrees of those councils."

TAUNTON, *The Law of the Church* (London, 1906), s. v.; GASPARRI, *De sacra ordinatione*, I (Paris, 1893); WERNZ, *Jus Decretalium*, II (Rome, 1899).

WILLIAM H. W. FANNING.

Tootell, HUGH, commonly known as Charles Dodd, historian, b. in 1671 or '72, at Durton-in-Broughton, Lancashire; d. at Harvington Hall, Worcestershire, 27 Feb., 1743. He was educated at the English College, Douay (1688–1693), and St. Gregory's Seminary, Paris (1693–1697). After ordination he returned to England in 1698 as chaplain to the Molyneux family at Mosborough Hall, Lancashire. In 1711 he returned to the Continent where he is said to have witnessed the siege of Douay (1712) as chaplain to an English regiment; certainly he wrote in that character a short "History of the English College at Douay" (1713) which purported to be by a Protestant chaplain. As it attacked the Jesuits, Father Thomas Hunter published his "Modest Defence" (1714), to which Dodd replied in "The Secret Policy of the English Society of Jesus" (1715). From 1716 he was again at Mosborough till 1718, when he returned to Douay to collect materials for his great work "The Church History of England from 1500 to 1688", which occupied him for twenty years. The work was written at Harvington Hall, where he resided from 1722 till his death, first as assistant chaplain, then (from 1726) as chaplain. During his sojourn abroad he wrote and published "Pax Vobis: an Epistle to the Three Churches" (London, 1721); and while at Harvington he composed several spiritual, controversial, and historical treatises most of which have never been published. Many of these MSS. (a complete list of which is given by Gillow, Bibl. Dict. Eng. Cath., V, 550–554) are preserved at Oscott. Those certainly published were: "Certamen Utriusque Ecclesiæ" (1724); "An Abridgment of Christian Doctrine" (s. d.); and "Flores Cleri Anglo-Catholici" (s. d.). After many years' labour the Church History was completed in three folio volumes published in 1737, 1739, and 1742 at Wolverhampton, though for prudential reasons Brussels appears on the title-page. Father John Constable, S. J., attacked his work as unfair to the Jesuits, and Dodd replied in "An Apology for the Church History of England", published in 1742. On his death-bed Dodd expressed his desire to die in peace with the Jesuits. Dodd's translation of Panzani's memoirs was subsequently used by Berington (see PANZANI).

KIRK, *Catholicon*, III, IV, V (London, 1816–17); BUTLER, *Hist. Memoirs of Eng. Cath.* (London, 1819); BERINGTON, Preface to *Memoirs of Panzani* (Birmingham, 1793); *Hist. MSS. Comm. Report*, I, III, V; FOLEY, *Records Eng. Prov. S. J.*, II (London, 1884), is inaccurate and corrected by GILLOW, *Bibl. Dict. Eng. Cath.* s. vv. HUNTER and LINGARD; COOPER, in *Dict. Nat. Biog.*, must be used with caution, being very imperfect.

EDWIN BURTON.

Torah. I. *Use of Word.*—Torah, תורה (cf. Hiph. of ירה), signifies first "direction, instruction", as, for instance, the instruction of parents (Prov., i, 8), or of the wise (Prov., iii, 1). It is used chiefly in reference to the Divine instruction, especially through the revelation to Moses, the "Law", and to the teaching of the Prophets concerning the will of God. In the sense of law "Torah" refers only to the Divine laws. "Torah" is applied to the books containing the teaching of the Mosaic revelation and the Law, that is, the Pentateuch. In Jewish theology Torah signifies, first, the totality of Jewish doctrine, whether taken as a basis for religious knowledge and conduct, or as a basis for study. The body of Biblical writings, especially the Pentateuch, being the source of religious teaching and law, the term "Torah" is applied also to the entire Scriptures (cf. Blau, "Zur Einleitung in die hl. Schrift", Budapest, 1894, 16 sq.), or to passages from the Prophets and the Hagiographa, for instance, "Ab. zara", 17a, in reference to Prov., v, 8, and "Sanh.", 91b, in connexion with Ps. lxxxiv, 5. The expression, however, generally signifies the Pentateuch. In passages like משולשת תורה נביאים וכתובים התורה ("the Scriptures [Torah] consist of three parts, Torah, Prophets, and Hagiographa" [Midrash Tanchuma to Ex., xix, 1]) "Torah" is used in two senses—one general, meaning the whole Scriptures, the other special, signifying the Pentateuch. Elsewhere (Siphre to 32, 13-135b 24) the Torah is plainly distinguished from the non-Pentateuchal books by the comparison of *miqra* (מקרא) and Torah. Besides the "written" Torah, תורה שבכתב, the Judaism which holds to tradition speaks of an "oral" Torah, ת'שבעל פה, the commentaries and the ordinances which put into effect the laws contained in the Pentateuch. This oral Torah, it is claimed, was revealed to Moses and has been preserved in Israel by tradition (see TALMUD).

II. *Torah in the restricted sense of Pentateuch.*—The Torah relates the preparatory measures for and the establishment of the Old-Testament theocracy, and contains the institutions and laws in which this theocracy found its visible expression. The Old Testament itself calls the entire work after its main contents *(ha) tora* or *sefer* (ספר), *ha-tora*, that is, "the book of the Torah", as in II Esd., viii, 2; to emphasize its Divine origin it is called *torath Yahwe*, *sefer torath*

Yahwe (I Esd., vii, 10; I Par., xvi, 40; II Esd., viii, 8), and *sefer torath Yahwe Elohim* (II Esd., ix, 3); while *sefer torath Moshe* (II Esd., viii, 1), *sefer Moshe* (I Esd., vi, 18; II Esd., xiii, 1; II Par., xxv, 4; xxxv, 12) indicate its author. The Talmud and later Jewish writings call the Pentateuch *sefer* (*ha*) *tora;* the name is always used if the whole work were written as a scroll (*megilla*) for use in the Divine service. If the work is written in five scrolls or in book form it is called *ḥ*^{a}*misha ḥum*^{e}*she* (*ha*)*tora* (חמשה חומשי (ה)תורה), "the five-fifths of the law". This division into five parts is old, and in the time of Nehemias served as a model for the division of the Psalter into five books. The Jews generally named the individual books after the first word: (1) *b*^{e}*reshith*, בראשית; (2) *sh*^{e}*moth* or *w*^{e}*'elle sh*^{e}*moth*, שמות or ואלא ש'; (3) *wayyiqra*, ויקרא; (4) *b*^{e}*midbar* or *wayy*^{e}*dabber*, במדבר, וידבר; (5) *d*^{e}*barim* or *'elle ha-d*^{e}*barim*, אלא הדברים (cf. as early a writer as Origen on Ps. 1: Βρησιθ, Οὐαλεσμωθ, Οὐικρα, 'Ελλε ἀδδεβαριμ). There are also names indicating the main contents of the books given to Leviticus, Numbers, and Deuteronomy: *torath koh*^{a}*nim*, תורת כהנים, "law of the priests", for instance in "Meg.", iii, 6; *ḥomesh ha-piqqudim*, חמש הפקודים, "the fifth of the numberings", as in "Yoma", vii, 1, *mishne tora* (תורה משנה), i. e., Deuteronomy, as in Masorah to Deut., xvii, 18. On the other hand *sefer yeçira*, ספר יצירה, "book of the Creation", in Sanh., 62^{b}, and *n*^{e}*ziqin*, נזיקין, "injuries", Masorah to Gen., xxiv, 8, are not to be applied, as is often done, to Genesis and Exodus; they refer only to the account of the Creation and to Ex., xxi, 22.

Another method of division is that by which the paragraphs, or *parashiyyoth* (פרשיות sing. פרשה), are indicated in the scrolls of the Torah used in the synagogues. In the older Midrashim these divisions are called *parashiyyoth p*^{e}*thuḥoth*, פ' פתוחות, "open *parashiyyoth*"; or *parashiyyoth s*^{e}*thumoth*, פ' סתומות, "closed *parashiyyoth*". In the former, the portion of the line following the last word is left blank; in the latter the termination of the paragraph is indicated by leaving only part of the line blank. Such paragraphs are called "small *parashiyyoth*" and they are generally indicated in the printed editions of the Bible by פ or ס. The Pentateuch has altogether 290 open and 379 closed parashiyyoth. In quoting they are generally called after the main contents (as *Baba bathra 14a:* פ' בלעם that is, Num., xxii, 2–xxiv, 25), but sometimes after the first words (as, *Ta'anith* iv, 3, the first six *parashiyyoth* of Genesis). The *parashiyyoth* are regarded as the arrangement of the divisions of the Pentateuch according to contents; but the basis of the distinction between open and closed *parashiyyoth* is not known with certainty.

Another division of the Torah is connected with the reading of lessons read in the synagogue on the Sabbath, a practice referred to in Acts, xv, 21, ἐκ γενεῶν ἀρχαίων as being ancient (cf. also Josephus, "Contra Apion.", II, xvii). It was customary in Palestine to have a three years' cycle of these lessons (Meg., 29^{b}); some writers say there was also a cycle of three years and a half. The Pentateuch, therefore, was divided into 154–175 sections or *s*^{e}*darim* (סדרים, sing. סדר). These *s*^{e}*darim* though not indicated in our Bibles, are important for understanding the structure of the old Midrashim (cf. Büchler, "The Reading of the Law and Prophets in a Triennial Cycle" in "Jew. Quart. Rev.", V, 420 sqq., VI, 1 sqq., VIII, 528 sq.). In the course of time an annual cycle, which first acquired authority among the Babylonian Jews, and is now accepted by nearly all Jewish communities, was adopted. Maimonides (Hilḥoth Tephilla, XIII, 1) calls it the prevailing custom of his era (twelfth century), but says that some read the Pentateuch in three years, which, according to Benjamin of Tudela, was the practice about 1170 among scattered communities in Egypt (cf. Jew. Quart. Rev., V, 420). In this one-year cycle the Pentateuch is divided into fifty-four Sabbath lessons generally called large *parashiyyoth.* A Jewish intercalary year consisting of thirteen lunar months contains fifty-three sabbaths, and the final section is always read on the day of the "joy of the Law" (שמחת תורה), that is, the ninth day after the feast of booths (twenty-third day of *Tishri*). In ordinary years, when there are forty-seven sabbaths, two *parashiyyoth* are joined on each of seven sabbaths in order to complete the number. In Genesis there are twelve sabbath *parashiyyoth*, in Exodus eleven, in Leviticus and Numbers ten each, and in Deuteronomy eleven. They are named from and quoted by the first words. In the printed editions of the Bible they are indicated, as they are also the opening words of the open or closed *parashiyyoth*, by פפפ or ססס, with exception of the twelfth lesson, at the beginning of which (Gen., xlvii, 28) only the breadth of a letter should remain blank. Concerning the distribution of the fifty-four *parashiyyoth* for the year, cf. Loeb, "Rev. des études juives", VI, 250 sqq.; Derenbourg, ibid., VII, 146 sqq.; Schmid, "Überverschiedene Einteilungen der hl. Schrift" (Graz, 1892), 4 sqq.

The Old Synagogue and the Talmud firmly maintain the Mosaic authorship of the Torah, but doubts are entertained regarding a number of passages. In "Baba bathra" 15^{a} only the last eight verses of Deuteronomy, which speak of the death and burial of Moses, are assigned to another author. On the other hand Simon (loc. cit.) teaches, referring to Deut., xxxi, 26, that these verses were also written by Moses under Divine direction (cf. also Josephus, "Antiq. Jud.", IV, viii, 48). During the Middle Ages doubts were expressed as to the possibility of Moses writing certain sentences; for instance, by Rabbi Yisḥaq (to Gen., xxxvi, 11) who was opposed by Aben Ezra, and as well by Aben Ezra himself (to Gen., xii, 6; Ex., xxv, 4; Deut., i, 1; xxxi, 22). Taken altogether, even in the succeeding period the belief in the Mosaic authorship remained undisputed, at least by the orthodox Jews. They hold, moreover, the Divine origin of the entire Torah, and the eighth of the thirteen articles of faith formulated by Maimonides and incorporated into the prayer-book reads: "I believe with full faith that the entire Torah as it is in our hands is the one which was given to our teacher Moses, to whom be peace." (See PENTATEUCH.)

F. SCHÜHLEIN.

Torbido, FRANCESCO, often called IL MORO (The Moor), Veronese painter and engraver, b. at Verona about 1486; the date of his death is unknown, but in a letter of Aretino he is spoken of as still living in 1546. He studied at Venice under Giorgione, and later returned to his native place, where he married a daughter of Count Zenovello Giusti. He then became a pupil of Liberale, who adopted him as his heir. Torbido seems to have remained at Verona, executing commissions for portraits, and painting frescoes in churches and on the fronts of houses, as was the Veronese fashion of those days. His work shows the varying influences of his Venetian master and of the Veronese artists, which he finally blended into a distinct style of his own, but retained the rich, glowing colour schemes acquired from the great Giorgione. Fine examples of his frescoes may still be seen at Verona, in the cathedral ("Nativity" and "Assumption", signed and dated 1534) and in the Church of St. Fermo ("Virgin and Child in Glory"), whilst others are in St. Eufemia and St. Zeno. His portraiture can be studied at Naples, at Venice, and in the Brera Gallery. Two portraits represent the artist himself, one at Munich, signed and dated 1516, the other, a red chalk drawing, in the Christ Church Collection.

Lanzi, *Storia pittorica della Italia* (Bassano, 1509); Vasari, *Le vite de' pittori* (Milan, 1811).

George Charles Williamson.

Toribio Alfonso Mogrovejo, Saint, Archbishop of Lima; b. at Mayorga, León, Spain, 1538; d. near Lima, Peru, 23 March, 1606. Of noble family and highly educated, he was professor of laws at the University of Salamanca, where his learning and virtue led to his appointment as Grand Inquisitor of Spain by Philip II and, though not of ecclesiastical rank, to his subsequent selection for the Archbishopric of Peru. He received Holy Orders in 1578 and two years later was consecrated bishop. He arrived at Payta, Peru, 600 miles from Lima, on 24 May, 1581. He began his mission work by travelling to Lima on foot, baptizing and teaching the natives, his favourite topic being: "Time is not our own, and we must give a strict account of it." Three times he traversed the eighteen thousand miles of his diocese, generally on foot, defenceless and often alone; exposed to tempests, torrents, deserts, wild beasts, tropical heat, fevers, and savage tribes; baptizing and confirming nearly one half a million souls, among them St. Rose of Lima, St. Francis Solano, Blessed Martin of Porres, and Blessed Masias. He built roads, school houses, and chapels innumerable, and many hospitals and convents, and founded the first American seminary at Lima in 1591. He assembled thirteen diocesan synods and three provincial councils. Years before he died, he predicted the day and hour of his death. At Pacasmayo he contracted fever, but continued labouring to the last, arriving at Sana in a dying condition. Dragging himself to the sanctuary he received the Viaticum, expiring shortly after. He was beatified by Innocent XI in 1679 and canonized by Benedict XIII in 1726. His feast is celebrated on 27 April.

De Herrera, *Life of Toribio.* Edward L. Ayme.

Tornielli, Girolamo Francesco, Italian Jesuit, preacher and writer, b. at Cameri, 1 February, 1693, of a distinguished family from Novara; d. at Bologna, 6 April or 12 May, 1752. He entered the Society in 1710, and manifested oratorical powers; after teaching classics, he entered upon a career of preaching, which lasted for almost twenty years. He first spoke at Venice (1733), and then with increasing popularity at Rome, Milan, Florence, and Bologna. Many hailed him as Segneri's successor. Tornielli, however, did not possess Segneri's vehemence, impassioned logic, and directness. Brilliant rather than solid, he lacked originality and depth; but he had imagination and dramatic feeling. For his pathos and easy, popular style he was surnamed the "Metastasio" of the Italian pulpit. To polished diction he added a refined and affecting delivery. Shocked by the licentious songs then common, Tornielli tried to remedy the evil by adapting sacred hymns to the popular airs. Many criticised him for having thus exposed the mysteries of religion to ridicule and contempt. A Jesuit, Sanchez de Luna, defended him in his "Riposta alla censura fatta alle canzonette marineresche per le festività di Maria Santissima". The Accademia della Crusca requested Tornielli to enter that body and offered to publish his works, but he modestly declined.

Tornielli's principal works are: "Sette canzonette in aria marineresca sopra le sette principale feste di Nostra Signora" (Milan, 1738); "Prediche quaresimali" (Milan, 1753, Bassano, 1820, with a preface by Noghera, Savona, 1889); "Panegirici e discorsi sacri" (Bassano, 1768). Sommervogel and Carrara doubt the authenticity of the "Businate", a burlesque poem, written in Milanese dialect and sometimes attributed to Tornielli. There is a eulogy of the orator in the "Piemontesi illustri", III, p. 305.

Carrara, *Nuovo dizionario istorico* (Bassano, 1796); Bettinelli, *Opere edite ed inedite*, XXIII (Venice, 1801); *Prediche scelte di Segneri, Tornielli ed alteri* (Turin, 1824); de Angelis in *Biographie ancienne et moderne*, XLVI (Paris, 1826); *Scelta di prediche dei piu celebri oratori italiani* (Rome, 1837); Audisio, *Lezioni di eloquenza sacra*, II (Turin, 1859), 346–49; Nay, *Brevi cenni sulla vita, sull' opere di Tornielli* (Preface to Tornielli's "La felicità del patrocinio del Governo de Gozzano" etc.), (Turin, 1875); de Backer, *Bibl. des écrivains de la C. de J.* ser., IV, 699; Sommervogel, *Bibl. de la C. de J.*, VIII, 101–4.

John C. Reville.

Torone, a titular see in Macedonia, suffragan of Thessalonica. Torone was a colony of Chalcideans from Eubœa, on the south-west coast of the peninsula Sithonia, the modern name of which is Longos; this is the middle peninsula of Chalcidice, lying between the Toronaic Gulf, called to-day, Cassandra, and the Gulf of Singitticus (Mt. Athos). Built on a hill, in a fine situation, it had a harbour called *Kophos* (deaf), because the sound of the sea-waves could not be heard there, thus giving rise to the proverb: "Deafer than the port of Torone." Torone had thirty small cities under its government; like the other Grecian cities of the region, it furnished Xerxes with men and ships. After the Persian War it passed under the rule of Athens. In 424 B. C., the Olynthian, Lysistratus, opened its gates to Brasidas; it was shortly afterwards retaken by Cleon. After the peace of Nicias it was ceded to the Athenians; in 379 B. C., it was taken by Agesipolas; in 364–3, by the Athenian, Timotheus; in 349–8, by Philip, who annexed it with the other cities of Chalcidice to his own kingdom. In 169 Torone repelled an attack made by the Roman fleet. Since then history is silent about this city which Pliny calls a free city. Its ruins, in the vilayet of Salonica, still bear the ancient name, pronounced by the Greeks, Toroni. As an episcopal see, Torone does not appear in any of the "Notitiæ episcopatuum", and we know of no bishop of the diocese.

S. Pétridès.

Toronto, Archdiocese of (Torontina), in the Province of Ontario, Canada. When constituted a diocese, it embraced all Upper Canada west of the Newcastle district, but at present is limited to the counties of York, Simcoe, Ontario, Peel, Dufferin, Lincoln, and Welland. The first missionary in this district was Father Joseph Le Caron, a Recollect, who celebrated Mass on the shore of Georgian Bay in 1615. Thus began the Huron missions, the story of which, replete with heroism of Recollect and Jesuit, is told elsewhere in this work; suffice it to say here that all the missions among that people and some of those attempted among their Neutral kindred lay within the present archdiocesan limits. During the century and a half following the destruction of these nations, a few priests are known to have been in this district; among these were Father Hennepin, in 1678, and Abbé Picquet, who visited Fort Rouillé (Toronto) in 1752. A Catholic chaplain was attached to the troops at Newark (Niagara-on-the-Lake) in 1794, and about the same time missionaries began to visit occasionally the few Catholics of York (Toronto) and the neighbouring territory. Amongst these was Father Burke, afterwards Vicar Apostolic of Nova Scotia, who held the office of Vicar-General of Upper Canada. After 1804 Father Macdonell came as often as his extended field of labour allowed, and, when Bishop of Kingston, resided at York for some years. In 1826 there were two resident priests in this region, one at York, the other at Niagara.

The Diocese of Kingston was divided on 17 Dec., 1841, and Father Power, bishop-elect of the western portion, having permission to name his episcopal city, chose Toronto, the provincial capital. This first bishop, Michael Power, born at Halifax, N. S., 17 Oct., 1804, was Vicar-General of the Diocese of Montreal when raised to the episcopate. Consecrated on 8 May, 1842, he laid the cornerstone of the cathedral, introduced the Jesuits, and made arrangements to bring the Loreto nuns to the diocese. Appointed by the Government to the Council of Public Instruction, he presided over that body. He died on 1 Oct., 1847, of typhus contracted while attending the immigrants at the fever-sheds. His successor, Armand-François-Marie Comte de Charbonnel, a Sulpician, born at Monistrol-sur-Loire, France, 1 Dec., 1802, was consecrated by Pius IX in the Sistine Chapel, 26 May, 1850. He gave his paternal estates to liquidate the debts of his diocese, introduced the Basilians (Annonay), the Brothers of the Christian Schools, and Sisters of St. Joseph, and was present at the First and Second Provincial Councils of Quebec. His diocese was divided in 1856 by the erection of Hamilton and London as sees. With his fellow-bishops of Upper Canada, he engaged in the struggle for separate schools, which had a successful outcome under his successor. In 1860 he resigned to join the Capuchins, being appointed titular Bishop of Sozopolis, and afterwards titular archbishop of the same see. He died on 29 March, 1891. His successor at Toronto was John Joseph Lynch, C. M., who was born at Clones, County Monaghan, Ireland, 6 Feb., 1816. As a Lazarist, he did missionary and professorial work in Ireland and the United States, being rector of a seminary which he founded at Niagara Falls, New York, when appointed (26 Aug., 1859) titular Bishop of Æchinas, and coadjutor with right of succession to Bishop de Charbonnel.

On the resignation of Bishop de Charbonnel on 26 April, 1860, Bishop Lynch became Bishop of Toronto. He brought to the diocese the Redemptorists, Carmelites, Sisters of the Precious Blood, and Sisters of Our Lady of Charity of Refuge; was present at the Third and Fourth Provincial Councils of Quebec; and also at the Council of the Vatican, where he favoured the immediate promulgation of Papal Infallibility, and acted on the commissions on missions and Oriental rites. During the council (18 Mar., 1870) his diocese was raised to metropolitan rank. He died on 12 May, 1888. In 1879 Archbishop Lynch received as auxiliary Timothy O'Mahony, titular Bishop of Eudocia, and former Bishop of Armidale, Australia, who died on 8 Sept., 1892. John Walsh, second archbishop, born at Mooncoin, County Kilkenny, Ireland, 23 May, 1830, was ordained for the Diocese of Toronto, of which he was vicar-general when appointed Bishop of Sandwich in 1867. On 13 August, 1889, he became Archbishop of Toronto, where he renovated the cathedral, and founded St. John's Industrial School. The Irish Race Convention of 1896 was organized at his suggestion. He was noted as a writer and preacher. His death occurred on 31 July, 1898. Denis O'Connor, C.S.B., his successor, was born at Pickering, Ontario, 28 March, 1841. A Basilian, he taught for several years in that community, being superior of the Assumption College, Sandwich, when chosen Bishop of London, Ontario, where he was consecrated on 19 Oct., 1890. On 27 January, 1899, he was created Archbishop of Toronto. Here he established several new parishes, gave special attention to conferences for the clergy and to the study of Christian doctrine by the young. In 1908 he resigned, being appointed titular Archbishop of Laodicea. He died at St. Basil's Novitiate, Toronto, 30 June, 1911. His successor, Fergus Patrick McEvay, was born at Lindsay, Ontario, 8 December, 1856. Ordained for Kingston, he was transferred to the new Diocese of Peterborough, where he was rector of the cathedral, and then went to Hamilton with Bishop Dowling. There he was appointed rector of the cathedral and vicar-general, and received the papal honours of private chamberlain and domestic prelate. Consecrated Bishop of London, Ontario, 6 Aug., 1899, he was promoted to Toronto, 13 April, 1908. He founded new parishes, rebuilt the cathedral palace, erected a new archiepiscopal residence, and began St. Augustine's Seminary, donated by Mr. Eugene O'Keefe (private chamberlain to His Holiness). At the First National Council of Canada, Archbishop McEvay was chairman of the commission *ad novas materias;* he was also instrumental in founding the Catholic Church Extension Society of Canada. He died on 10 May, 1911.

Civil incorporation took place on 25 March, 1845, under the title of "The Roman Catholic Episcopal Corporation for the Diocese of Toronto in Canada". All ecclesiastical property in the archdiocese, except that belonging to religious communities, is vested in this corporation. There have been three synods (1842, 1863, 1882) and one provincial council (1875). Both clergy and people are for the most part of Irish extraction, with a small percentage of English and Scotch. There are however three parishes exclusively French, three mixed (French and English), 1 for Poles, Italians, Ruthenians, and Syrians, respectively, and one Indian mission. In the archdiocese are 58 churches with resident pastors and 37 mission churches, 81 diocesan priests, and 39 of religious orders or communities; 39 separate schools, 2 high schools, 6 academies, 2 industrial schools, 1 domestic science school, 1 college for young men, 2 ladies' colleges, and 1 diocesan seminary (in course of erection). There are 8009 children in the schools and institutions. The Catholic population is about 70,000. The Basilians have St. Michael's College, 1 novitiate and scholasticate, 2 parishes and 2 missions; the Carmelites, a monastery, novitiate, and house of studies, 2 parishes and 1 mission; the Jesuits, 1 parish, 1 Indian mission, 2 other missions and a memorial chapel on the spot where Fathers de Brébeuf and Lalement were killed; the Redemptorists, 1 monastery and 1 parish (they also give missions throughout the province). The Brothers of the Christian Schools have the De La Salle Institute, St. John's Industrial School, a junior novitiate, and 6 separate schools; the Institute of the Blessed Virgin (Sisters of Loreto), the mother-house for America, a novitiate, a ladies' college, 3 academies, 6 separate schools, and 1 domestic science school; the Sisters of St. Joseph, their mother-house and novitiate, a ladies' college, 3 academies, 1 high school, 21 separate schools, a House of Providence for the aged poor, St. Vincent's Home for Infants, Sacred Heart Orphanage, and St. Michael's Hospital; the Sisters of Our Lady of Charity of Refuge, a convent and novitiate, a girls' industrial school and refuge; the Sisters Adorers of the Precious Blood, a novitiate and convent. The chaplaincies of the central prison, the reformatory for women (each of which has a Catholic chapel), and the hospitals for the insane belong to St. Michael's Cathedral, but are temporarily filled by the Basilians. The jails, hospitals, and military barracks are attended by the parochial clergy of their respective districts.

The city of Toronto has a population of 376,240 (about 45,000 Catholics), and is an educational and commercial centre. There are 22 city parishes, with 40 secular and 12 regular priests. St. Michael's Cathedral, modelled after York Minster, is of the Gothic style of the fourteenth century. It was solemnly dedicated on 29 September, 1848. Toronto University has Catholic representatives on its Board of Governors, Senate, and Staff, and Catholic students under the various faculties. Federated with this institution is St. Michael's College. Catholic pedagogical students attend the provincial normal school and faculty of education. There are sodalities and confraternities in every parish, as well as Catholic fraternal and benefit societies. The Catholic Church Extension Society of Canada aids the Northern and Western missions; St. Vincent de Paul Society relieves the poor; a Children's Aid Society under the same patron protects children of dissolute parents; the St. Elizabeth Nurses' Association cares for the sick in their homes. The Catholic Truth Society and the Holy Name Society are strongly established. The priests have a Eucharistic League and also a society which cares for infirm members of the clergy.

Edw. Kelly.

Torquemada, Tomás de, first Grand Inquisitor of Spain, b. at Valladolid in 1420; d. at Avila, 16 Sept., 1498. He was a nephew of the celebrated theologian and cardinal, Juan de Torquemada. In his early youth he entered the Dominican monastery at Valladolid, and later was appointed prior of the Monastery of Santa Cruz at Segovia, an office which he held for twenty-two years. The Infanta Isabella chose him as her confessor while at Segovia, and when she succeeded to the throne of Castile in 1474 he became one of her most trusted and influential councillors, but refused all high ecclesiastical preferments, choosing to remain a simple friar. At that time the purity of the Catholic Faith in Spain was in great danger from the numerous Marranos and Moriscos, who, for material considerations, became sham converts from Judaism and Mohammedanism to Christianity. The Marranos committed serious outrages against Christianity and endeavoured to judaize the whole of Spain. The Inquisition, which the Catholic sovereigns had been empowered to establish by Sixtus IV in 1478, had, despite unjustifiable cruelties, failed of its purpose, chiefly for want of centralization. In 1483 the pope appointed Torquemada, who had been an assistant inquisitor since 11 February, 1482, Grand Inquisitor of Castile, and on 17 October extended his jurisdiction over Aragon.

As papal representative and the highest official of the inquisitorial court, Torquemada directed the entire business of the Inquisition in Spain, was empowered to delegate his inquisitorial faculties to other inquisitors of his own choosing, who remained accountable to him, and settled the appeals made to the Holy See. He immediately established tribunals at Valladolid, Seville, Jaen, Avila, Cordova, and Villa-real, and, in 1484, at Saragossa for the Kingdom of Aragon. He also instituted a High Council, consisting of five members, whose chief duty was to assist him in the hearing of appeals (see Inquisition.—*The Inquisition in Spain*). He convened a general assembly of Spanish inquisitors at Seville, 29 November, 1484, and presented an outline of twenty-eight articles for their guidance. To these he added several new statutes in 1485, 1488, and 1498 (Reuss, "Sammlungen der Instructionen des spanischen Inquisitionsgerichts", Hanover, 1788). The Marranos found a powerful means of evading the tribunals in the Jews of Spain, whose riches had made them very influential and over whom the Inquisition had no jurisdiction. On this account Torquemada urged the sovereigns to compel all the Jews either to become Christians or to leave Spain. To frustrate his designs the Jews agreed to pay the Spanish government 30,000 ducats if left unmolested. There is a tradition that when Ferdinand was about to yield to the enticing offer, Torquemada appeared before him, bearing a crucifix aloft, and exclaiming: "Judas Iscariot sold Christ for 30 pieces of silver; Your Highness is about to sell him for 30,000 ducats. Here He is; take Him and sell Him." Leaving the crucifix on the table he left the room. Chiefly through his instrumentality the Jews were expelled from Spain in 1492.

Much has been written of the inhuman cruelty of Torquemada. Llorente computes that during Torquemada's office (1483–98) 8800 suffered death by fire and 96,504 were punished in other ways (Histoire de l'Inquisition, IV, 252). These figures are highly exaggerated, as had been conclusively proved by Hefele (Cardinal Ximenes, ch. xviii), Gams (Kirchengeschichte von Spanien, III, II, 68–76), and many others. Even the Jewish historian Graetz contents himself with stating that "under the first Inquisitor Torquemada, in the course of fourteen years (1485–1498) at least 2000 Jews were burnt as impenitent sinners" ("History of the Jews", Philadelphia, 1897, IV, 356). Most historians hold with the Protestant Peschel (Das Zeitalter der Entdeckungen, Stuttgart, 1877, pp. 119 sq.) that the number of persons burnt from 1481 to 1504, when Isabella died, was about 2000. Whether Torquemada's ways of ferreting out and punishing heretics were justifiable is a matter that has to be decided not only by comparison with the penal standard of the fifteenth century, but also, and chiefly, by an inquiry into their necessity for the preservation of Christian Spain. The contemporary Spanish chronicler, Sebastian de Olmedo (Chronicon magistrorum generalium Ordinis Prædicatorum, fol. 80–81), calls Torquemada "the hammer of heretics, the light of Spain, the saviour of his country, the honour of his order".

Hist.*, XXIII (Madrid, 1893), 369–434; Touron, *Histoire des hommes illustres de l'ordre de Saint Dominique*, III (Paris, 1746), 543–68; Tarrida del Marmol, *Les Inquisiteurs d'Espagne* (Paris, 1897); Rodrigo, *Historia verdadera de la Inquisición*, II, III (Madrid, 1877); Lea, *History of the Inquisition in Spain* (London and New York, 1906–08).

Michael Ott.

Torres (Turrianus), Francisco, Hellenist and polemicist, b. in Herrera, Palencia, about 1509; d. at Rome, 21 November, 1584. He was the nephew of Dr. Torres, Bishop of the Canaries. He studied at Salamanca and lived in Rome with Cardinals Salviati and Seripando. In 1562 Pius IV sent him to the Council of Trent, and on 8 January, 1567, he became a Jesuit. He was professor at the Roman College, took part in the revision of the Sixtine Vulgate, and had Hosius and Baronius for literary associates. His contemporaries called him *helluo librorum* for the rapidity with which he examined the principal libraries. He defended the doctrines of the Immaculate Conception, the authority of the sovereign pontiff over the council, the Divinely appointed authority of bishops, Communion under one kind for the laity, the authenticity of the Apostolic Canons and the Pseudo-Isidorian decretals, and pleading the antiquity of the feast of the Presentation of the Blessed Virgin, which Pius V had suppressed, worked for its reinstatement. Blondel accuses him of want of critical judgment, and Nadal of mordacity against Protestants. He wrote more than seventy books, principally polemical, against Protestants, and translations especially of Greek Fathers, many treatises of whose works he found hidden away in libraries.

Pérez Goyena.

Torres Naharro, Bartolemé de, Spanish poet and dramatist, b. at Torres, near Badajoz, towards the end of the fifteenth century. The date of his death is not known, and little is known of his life. He was a cleric and a man of some learning. About the year 1514 he was living in Rome, where he enjoyed the patronage of Fabricio Colonna, whom he served in the capacity of chaplain. Following the publication of a satire from his pen in which he attacked the vices of the Court, he was banished from Rome and took refuge in Naples, where we lose sight of him. In the latter city was published, in 1517, a collection of his lyric and dramatic works under the title of "propaladia". These consist of satires, epistles, romances, ballads, and some miscellaneous poetry, but chiefly of eight plays which he calls "Comedias". Aside from their literary merit, these latter are of more than passing interest, for their author gives us a theory of his own on the subject of the drama, and with them he set a type or model that was to be followed by later authors. He divides comedies into two classes, namely, "Comedias de Noticia" and "Comedia de Fantasía". Under the first heading he would include those dealing with real happenings, that have been actually seen; and under the second, things of the fancy, imaginary incidents that seem true though in fact not true. In the development of the plot, he would follow the division of Horace into five acts, though he would change the name of these to "Jornadas", as they seemed to be no more than convenient resting places. He would have not less than six nor more than twelve characters, and in some of his plays there is a tendency to observe the unities of time, place, and action. Among his better known comedies are "Himenea", "Serafina", and "Tinelaria". The authentic editions of the "Propaladia" are: those of Naples (1517), Seville (1520–26), Toledo (1535), and Madrid (1573–90). The "Biblioteca de Autores Españoles" publishes several romances of Torres (vols. X, XVI, and XXXV).

VENTURA FUENTES.

Torricelli, EVANGELISTA, Italian mathematician and physicist, b. at Faenza, 15 Oct., 1608; d. at Florence, 25 Oct., 1647. Modigliana, in Tuscan Romagna, and Piancaldoli, in the Diocese of Imola, are named as the birthplace by different biographers. Torricelli was educated at the Jesuit college of Faenza, where he showed such great aptitude for the sciences that his uncle, a religious of the order of the Camaldolesi, sent him to Rome in 1626 for the purpose of study. There he fell in with Castelli, the favourite pupil of Galileo, who instructed him in the work of the master on the laws of motion. Torricelli showed his thorough understanding by writing a thesis on the path of projectiles. Castelli sent this essay in manuscript to Galileo with strong recommendations of his young friend. Galileo invited Torricelli to his house, but for personal reasons he was unable to accept until three months before the death of the blind scientist (1641). The grand duke prevailed upon him to remain at Florence and to succeed Galileo at the Academy. He solved some of the great mathematical problems of the day, such as the finding of the area and the centre of gravity of the cycloid. This problem gave rise to disagreeable discussion on the part of Roberval as to priority and originality. Torricelli's honesty, manliness, and modesty are distinctly shown in his reply.

His chief invention was the barometer. Pump-makers of the Grand Duke of Tuscany attempted to raise water to a height of forty feet or more, but found that thirty-two feet was the limit to which it would rise in the suction pump. Strange enough, Galileo, who knew all about the weight of the air, had recourse to the old theory that "nature abhors a vacuum", modifying the law by stating that the "horror" extended only to about thirty-two feet. Torricelli at once conceived the correct explanation. He tried the experiment with quicksilver, a liquid fourteen times as heavy as water, expecting the column which would counterbalance the air to be proportionally smaller. He filled a tube three feet long, and hermetically closed at one end, with mercury and set it vertically with the open end in a basin of mercury, taking care that no air-bubbles should get into the tube. The column of mercury invariably fell to about twenty-eight inches, leaving an empty space (Torricellian vacuum) above its level (1643). He expressed his sorrow at the fact that Galileo had not made this discovery in connexion with the pressure of air. The barometer is to-day one of the most important instruments in physics and chemistry, while the Torricellian method of getting a very high vacuum is still often employed. Another discovery was the law of efflux of a liquid through a small aperture in the wall of a vessel. He also constructed a number of large objectives and small, short focus, simple microscopes. His literary contributions are noted for their conciseness, clearness, and elegance. His manuscripts have not all been published and are carefully preserved at Florence. The following have appeared in print: "Trattato del moto" (Florence, before 1641); "Opera geometrica" (Florence, 1644); "Lezioni accademichi" (Florence, 1715); "Esperienza dell argento vivo" (reprint, Berlin, 1897).

FABRONI, *Vitæ Italorum*, I (Pisa, 1778), 345–400; TIRABOSCHI, *Storia della litt. it.*, VIII (Florence, 1812), 204–10; POGGENDORFF, *Biographisch-lit. Handwörterbuch*, II (Leipzig, 1863), 1119.

WILLIAM FOX.

Torrubia, JOSÉ, b. towards the end of the seventeenth century at Granada, Spain; d. in 1768 in the monastery of Aracœli. He entered the order of St. Peter of Alcántara at Granada. In the Philippine Islands, whither he had gone as missionary and as secretary to Foguéras, the commissioner-general of Mexico, he was imprisoned for four months, as a result of opposition on the part of the religious orders to reforms attempted by the commissioner. He returned to Cadiz and thence went to Rome, where he withdrew from the order of St. Peter and became a Franciscan. In 1732 he was again in the Philippine Islands as superior of a convent. He travelled in America and Asia, remaining for a time at Canton, China. In 1750 he returned to Spain, whence he made three trips to Rome. A linguist, scientist, collector of fossils and of books, writer on historical, political, and religious subjects, Torrubia was held in high esteem in Spain and at Rome, and by none more so than by Pope Benedict XIV. Among his many works may be mentioned: "Roman Ceremonial of the Discalced Religious of St. Francis in the Province of St. Gregory in the Philippines" (Manila, 1728); "Disertacion histórico-politico-geográfica de las islas Filipinas" (Madrid, 1736, 1753); a poem against Free-masonry (Madrid, 1752); "Introducción a la historia natural de España" (Madrid, 1754; German tr., Halle, 1773; Italian tr. of a part printed under his direction at Rome with the title "La gigantologia española"; second volume, on insects, never printed); "History of the Seraphic Order" (Rome, 1756).

PAUL H. LINEHAN.

Tortona, DIOCESE OF (DERTONENSIS), in Piedmont, Italy. The city is situated on the spurs of the northern Apennines, on the right bank of the Scrivia, in a plain rich in cereals, wine, hemp, rice, and silk. The cathedral is of the sixteenth century, built after

Charles V had destroyed the ancient cathedral situated on a hill which dominated the city, to make room for a fort. In the cathedral, besides pictures of the Lombard School, there is an antique sarcophagus carved with the myths of Phaeton and of Castor and Pollux. Other churches are the very ancient S. Maria Canale, S. Giacomo, and the oratories of Loreto and S. Rocco.

The city of Dertona was founded, or established as a Roman colony, in 147 B. C., at the time of the construction of the Via Posthumiana, which connected Piacenza with Genoa. As two other very important roads for Pisa and Provence began here, Dertona was, under the Empire, an important military station. From the ninth century it was under the rule of its bishop, and in 1090 it became a commune. In the struggles of the Middle Ages Tortona was the faithful ally of the Guelphs, for which reason it was several times destroyed, e. g. in 1155 by Barbarossa and in 1163 by the Pavians. From 1260 to 1347 the city was alternately under the dominion or protectorate of the imperial vicars, the marquesses of Montferrat, the Visconti of Milan, and the kings of Naples. From 1347 it formed a part of the Milanese state, the fate of which it shared until 1735, when by virtue of the Treaty of Vienna it was occupied by the King of Sardinia.

Observatory of the Ebro, Roquetas, Diocese of Tortosa

According to the legend, which is, however, a late one, the first Bishop of Tortona was St. Martianus martyred under Hadrian. It is certain that, in the first half of the fourth century, Tortona was subject to the Diocese of Vercelli. The first bishop, according to Savio, was St. Innocent, who he believes was the predecessor of St. Exuperantius (381), the first of whom we have certain historical record, and who was highly praised in a sermon of St. Maximus of Turin. Few other names of bishops of the early period are known; but from the tenth century the list is more complete, comprising: Giseprandus (about 943), who was at the same time Abbot of Bobbio; Ottone (1080), a follower of the schism of Henry IV; Guido (1098), who went to Palestine; Bishop Pietro, one of those who in 1241 were made prisoners by Frederick II, while on their way to attend the Council of Rome. Melchiorre Busetto was killed by the followers of the Marquess Guglielmo of Montferrat, for which the marquess lost all his rights of patronage in the Diocese of Tortona, and was compelled, barefoot and clad in a shirt only, to walk from the scene of the bishop's murder to the cathedral. In the time of Michele Marliano (1461) the body of St. Rochus was found at Vaghera, which was the cause of a lengthy controversy with Arles, which possessed the relics of St. Rochus of Montpellier. Uberto Gambara (1528), afterwards a cardinal, was always absent as papal legate or nuncio in Germany, and renounced the bishopric in favour of his relative Cesare (1548), present at the Council of Trent. Maffeo Gambara (1592) distinguished himself in reforming the church, as did also the Theatine Paolo Aresio (1620). In 1805 the diocese was suppressed by the French Government and united with Casale, and on its re-establishment in 1814 it was taken from the metropolitan See of Turin and made suffragan to Genoa. The diocese has 296 parishes, 317,865 souls, 570 secular and 30 regular priests, five monasteries, five convents for women, three educational institutions for males, and five for females.

CAPPELLETTI, *Le Chiese d'Italia*, XIII; SAVIO, *Gli antichi Vescovi del Piedmonte* (Turin, 1899), 377; CARNEVALE, *Notizie storiche nell'antico e moderno Tortonese* (1845).

U. BENIGNI.

Tortosa, DIOCESE OF (DERTHUSENSIS, DERTUSA), Spain, suffragan of Tarragona, comprises about 6989 square miles, principally in the civil provinces of Tarragona and Castellon. Its principal cities are Tortosa and Castellon. The "Gerarchia Cattolica" (Rome) places the date of creation of the diocese in the fourth century. Local tradition and historians claim St. Paul as founder of the diocese, and St. Rufus, son of Simon of Cyrene, as first bishop. Villanueva (Viaje Literario, vol. V) would explain the origin of the tradition in regard to St. Rufus by the fact that the first bishop after the reconquest of Tortosa from the Moors was Godfrey (Gaufridus), Abbot of the Monastery of St. Rufus, Avignon. Lirioso (364) and Heros (about 400), presented by local historians as the first bishops of whom there is record, are not given by La Fuente or Gams. La Fuente gives Urso (516) as the first known bishop. During Moorish rule in Tortosa (715–1148) the diocese suffered greatly, and little is known of its history. However in 1068 Paternus, "Episcopus Civitatis Tortuensis", is found. After the capture of Tortosa on 31 Dec., 1148, by Raymond Berenger, the diocese was restored to its ancient importance. The cathedral was begun in 1158, and consecrated in 1178 by Berenger, Archbishop of Tarragona; rebuilt from May or June, 1347 until 1597; consecrated 8 June, 1597; again continued from 5 Feb. 1621 to 1725, with latter additions. It is of mixed style, mainly Gothic, and has merit. The cloister is thought to be originally of the twelfth century. A special chapel contains the holy ribbon or sash (La Santa Cinta) which is said to have been left on the main altar of the cathedral by the Blessed Virgin, in an apparition on the night of 24 March, 1178, and which since 1629 is sent to the palace in Madrid before a royal birth. The cathedral archives contain many valuable codices, Bulls, etc.

The diocese was the scene of a disputation between Christians and Jews in 1413–1414, and figured prominently in the Western Schism, as the antipopes Benedict XIII and Clement VIII resided in Peñiscola, in the diocese. The provincial council of Tortosa (1429) did much to remove the evil effects of the schism. Among distinguished bishops of the diocese were Cardinal Augustin Spinola (1623–26) and Adrian VI, elected pope while holding the Bishopric of Tortosa 1516–22, and to whom the privilege of the red calotte worn by bishops of this diocese is attributed. The present bishop of Tortosa is Dr. D. Pedro Rocamora y García (b. 1832). The diocese is divided into 12 archpriestships and contains: 193 parishes; 540 secular parochial clergy; a diocesan seminary; the Collegium Maximum of the Jesuits of the Aragon Province; a college of ecclesiastical vocations; 31 important convents and houses of sisters; numerous primary and secondary schools; one Catholic daily, "El Restaurador" (Tortosa); 5 Catholic weeklies; one Catholic fortnightly, and two Catholic monthlies.

Observatory of the Ebro, at Roquetas, Catalonia, Spain. The founder and present director is Father Ricardo Cirera, S.J. The construction of the buildings was commenced in March, 1903; they were completed in Sept., 1904, and by 30 Aug., 1905, the date of a total eclipse of the sun, it was possible to make all the observations in the observatory. See "Instrucciones para la observación del eclipse de sol del 30 de Agosto de 1905" and Cirera, "Noticia del Observatorio y de algunas observaciones del eclipse de 30 de Agosto de 1905", issued by the observatory. The observatory comprises branches in astrophysics, meteorology, and geophysics.

With the exception of some of the meteorological apparatus, which is installed in the open air, the apparatus is distributed in six buildings, a seventh being devoted to the library and general offices, and a small building apart for the mechanician. All these buildings are separate, so as to obtain the greatest possible accuracy in the results. In the building for the magnetic observations, all iron or any other substance which could exert a contrary magnetic influence is carefully excluded. The observatory is at some distance from the nearest town, on an elevation which dominates the valley of the Ebro. There is no electric car line or other factor in this valley which could act as a disturbing influence. (See "Boletín Mensual del Observatorio del Ebro", vol. I, no. 1, with introduction, an observatory publication.)

The Government declared this institution a public utility on 18 Oct., 1904.

The observatory publishes a monthly bulletin, in which the observations, reduced to their absolute values, are given in tables. Other scientific treatises published by the observatory are: "Discurso relativo al Establecimiento de la nueva Sección de Astronomía y Física del Globo", by Father Cirera; "La Sección de Astronomía y Física del Globo y la Meteorología española"; "Los Eclipses de 8 de Mayo de 1910 y 26 de Abril de 1911"; and "Recientes progresos de las Ciencias Astronómicas en España".

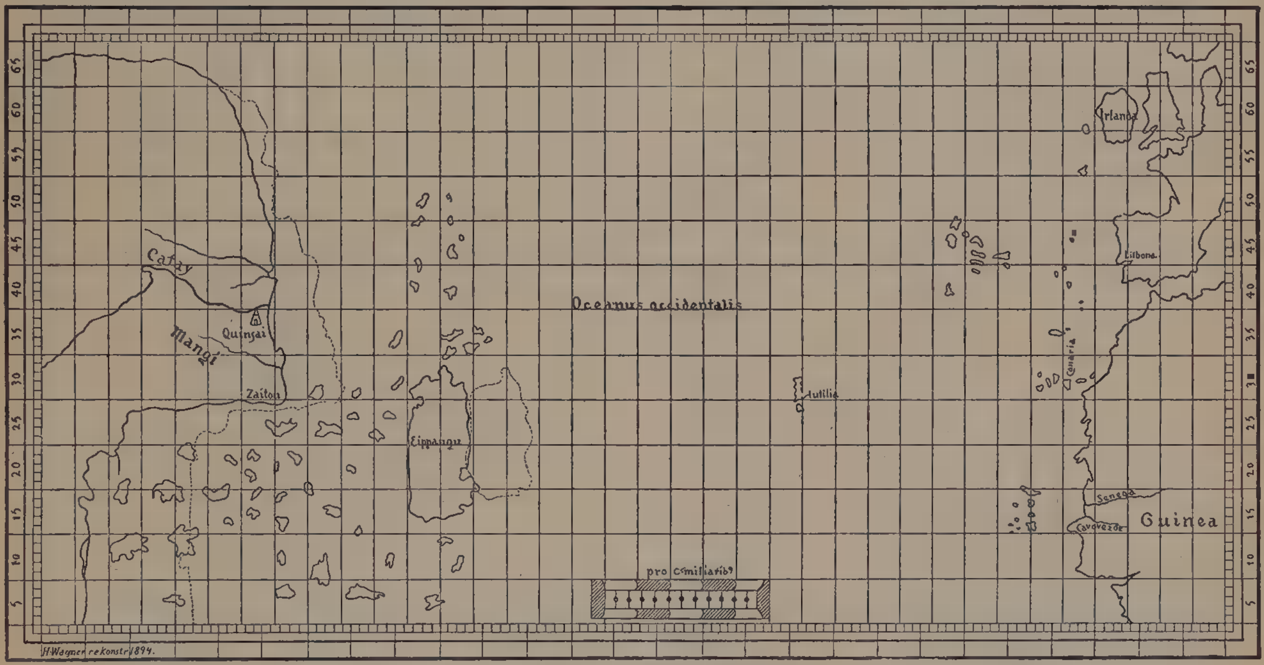
Toscanelli, Paolo dal Pozzo, mathematician, astronomer, and cosmographer, b. at Florence in 1397; d. there, 10 May, 1482. Toscanelli, who was one of the most distinguished scientists of the fifteenth century, was the son of the Florentine physician Dominic Toscanelli. He began his mathematical studies at Florence under Giovanni dell'Abacco. At the age of eighteen he entered the University of Padua where he studied mathematics, philosophy, and medicine. In this period he formed his life-long friendship with Nicholas of Cusa who studied law and mathematics at the same university. The two probably met at the college Prosdocimos de'Beldomandi. Both left the university in 1424, Nicholas with the title of *doctor decretorum* and Paolo as a doctor of medicine. In consequence of this Toscanelli afterwards was frequently called Paolo *fisico*. While Nicholas of Cusa went back to Germany Toscanelli returned to Florence, where he spent the remainder of his life with the exception of short journeys in Tuscany and brief sojourns at Todi and Rome. At Florence Toscanelli took up scientific studies in various directions which brought him into connexion not only with distinguished artists, as Brunelleschi, but also with the greatest scholars of Italy and other countries. He may indeed be said to have been the centre of the learned world of that era. His contemporaries pronounced him one of the most distinguished mathematicians of his time. Regiomontanus and Cusa sought his opinion in the most abstruse questions of theoretical mathematics, or supported their assertions by his authority. Thus Nicholas of Cusa, even at the height of his fame, admired in his friend the thorough mathematician, as is shown by his treatise "De transformationibus geometricis" which was dedicated "Ad Paulum magistri dominici Physicum Florentinum". The same admiration is evident when Cusa wrote as a dialogue between himself and Toscanelli the latter's adverse criticism of Cusa's "Mathematica complementa". In this dialogue Toscanelli says that like Regiomontanus he found the "Mathematica complementa", which investigated the squaring of the circle, obscure and lacking in positiveness.

Paolo dal Pozzo Toscanelli
From a painting by Giorgio Vasari in the Signoria, Florence

Toscanelli's services to astronomy are shown by the painstaking and exact observations and calculations, preserved in manuscript, of the orbits of the comets of 1433, 1449–50, of Halley's comet of 1456, of the comets of May, 1457, of June-July-August, 1457, and that of 1472. According to his own testimony these observations cost him immense labours and long vigils. He could not entirely throw off the influence of astrology, although two of his contemporaries, Marsilio Ficino and Giovanni Pico, disbelieved in it. A monument to his astronomical skill still exists at the Cathedral of Santa Maria del Fiore at Florence in the well-known gnomon, which he constructed about 1468 and which was later improved by Cardinal Ximenes. A marble slab having a small opening in it was placed at a height of 277 feet in the dome over the middle of the left transept; by the shadow he could determine midday to a half-second, and could also settle with much precision the altitudes of the solstices. Toscanelli also gave much attention to cosmography. It seems indeed that he was the most distinguished scholar of the fifteenth century in this branch of science, the aim of which was to gain knowledge of the world in its widest extent. The estimation in which he was held as a cosmographer is shown by the generally accepted belief, resting on traditions respecting Columbus, that Columbus before undertaking his dangerous western voyage asked Toscanelli's advice. Toscanelli had a thorough knowledge of the writings of Ptolemy, he had studied the travels of Marco Polo, and had gained personal information from merchants and seamen, above all from the Italian traveller Nicolo Conti. All that he had thus learned had brought him to the conviction that the transverse extent of Europe and Asia covered nearly two-thirds of the earth, that is 230° of latitude, so that the western route across the ocean could only cover 130°. For a half century the Portuguese had sought to sail around Africa towards the east. Toscanelli seems to have made them repeated proposals as to the possibility of a western route, without, however, being able to convince the Portuguese of the feasibility of his theory.

If we may believe the tradition connecting Toscanelli and Columbus, then Toscanelli wrote, in answer to repeated requests of King Alfonso, the celebrated letter dated 25 June, 1474, to the confessor Canon Ferdam Martins of Lisbon whom he knew. In this letter, which was accompanied by a map, he suggested clear directions for the carrying out of his scheme. This letter had no decisive effect upon the king but probably influenced the adventurous Christopher Columbus, then in the full vigour of manhood. Columbus, who had lived in Lisbon from 1476, heard of the correspondence between Toscanelli and the Court. According to the tradition it was only through the intervention of the friend of Columbus, Lorenzo Giraldi, that the former obtained from Toscanelli, in answer to a personal inquiry, an explanation of his scheme of a voyage westwards. Toscanelli is said to have sent Columbus, for this purpose, a copy of his letter and chart. At the beginning and end of the letter Toscanelli added a few words addressed especially to Columbus. The two biographies of Columbus, that of his son Fernando and that of Bishop Las Casas, both include and give the text of another letter from Toscanelli in reply to a second letter sent him by Columbus. Unfortunately Toscanelli's two letters no longer exist in an authentic form. Both apparently have been greatly altered in the Italian translation of Fernando's "Historie", and in the Spanish biography by the Bishop Las Casas of Chiapaz. However, by good fortune, the middle part of Toscanelli's first letter, that is a copy of the letter of 25 June, 1474, has been preserved in its original form. Harrisse discovered in the "Bibliotheca Colombina" at Seville a copy, made by Columbus himself, of the letter to Martins on the cover of an edition of the "Historia rerum ubique gestarum" of Æneas Silvius. This document makes it possible to determine fairly accurately Toscanelli's opinion, which has been so variously interpreted, concerning the western route and the distance apart of the coasts of the two mainlands.



Toscanelli's Chart, made in 1474, reconstructed by H. Wagner, 1894
It is believed that Columbus, on his first voyage to the New World, carried a copy of this chart with him

Toscanelli's chart, however, has not been preserved, either in the original or in a copy. A successful reconstruction of this chart was made by Hermann Wagner of Göttingen which shows that Toscanelli covered the customary nautical chart of the fifteenth century with the reticulations of a square flat chart, upon which direction and distance could be correctly measured by means of the spaces. It is not surprising that Columbus was overwhelmed with delight when he saw it, that he took it with him on his first westward voyage, and had absolute confidence in it. Consequently his two biographers are right in laying so much emphasis on the controlling influence of Toscanelli over Columbus. They even praise the Florentine scholar as the actual father of the great idea of sailing to India by the western route. A diametrically opposite opinion has been expressed by the French scholar Henri Vignaud, who since the holding of the American Congress at Paris in 1900 has attempted to prove that Toscanelli's correspondence with Martins and Columbus, including the accompanying chart, is a forgery. This has led to a violent controversy over the "Toscanelli question", in which Italian, American, English, French, and German scholars have supported the traditional belief of the connexion between Toscanelli and Columbus. Notwithstanding this, Vignaud in 1905 and 1911 published monographs on the life of Columbus for the purpose of maintaining his views. Vignaud's arguments, however, are not decisive. Even though the correspondence between Toscanelli and Columbus be proved to be apocryphal, still Toscanelli's knowledge and ability as a cosmographer does not suffer in the slightest so long as the letter of 1474 is taken as the expression of his cosmographic ideas, and so long as the letter of Duke Ercole of Este, written to his ambassador Manfredo on 26 June, 1494, is regarded as authentic. This letter says that Toscanelli had really occupied himself with the idea of a voyage towards the west. The titles of only three of Toscanelli's works are known, none of them, unfortunately, have been preserved: the "Prospettiva", the "Meteorologia agricola", and also, according to Uzielli, a translation of Ptolemy's geography. A single manuscript is one of the treasures of the Bibliotheca Nazionale centrale of Florence; this was published in 1864 and pertains to astronomy, geodesy, and geography.

FRIEDRICH STREICHER.

Tosephta (תוספתא, addition, supplement) is the name of a compilation of halakhic-haggadic character, which judged by its contents belongs essentially to the era of the Tanna'im (Teachers), and which is modelled on the plan of the Mishna; all that is lacking are the tractates "Aboth", "Tamid", "Middoth", and "Qinnim". The editors had access to authorities that are older than our Mishna. The individual *Halakhoth* do not show the same subtlety and precision as in the Mishna; often the development of the *Halakha* may be traced from the course of the discussion. The *Haggadah* also is fully represented. The history of the origin of the Tosephta has not yet been satisfactorily cleared up. In any case the work in its present form contains a large number of the doctrines and utterances of later rabbinical teachers (the *Amoraim*), and it was not edited until the late Talmudic period. W. Zuckermandel, "Tosephta, Mishna, und Boraitha in ihrem Verhältnis zu einander" (1 vol., Frankfort, 1908), claims to prove that the Tosephta represents the Palestinian Mishna, and that our Mishna was re-edited in Babylonia.

Edition of the Tosephta by ZUCKERMANDEL (Pasewalk, 1880), supplement to it (Trier, 1882—). Thirty-one tractates, the tractates on the first three orders are to be found translated into Latin in UGOLINO, *Thesaurus*, XVII–XX (Venice, 1755–57).

F. SCHÜHLEIN.

ALONSO TOSTADO
From a print in Thevet's Livre des Vrais Pourtraits, Paris, 1584

Tostado (TOSTATUS), ALONSO, exegete, b. at Madrigal, Castile, about 1400; d. at Bonilla de la Sierra, near Avila, 3 Sept., 1455. After a course of grammar under the Franciscans he entered the University of Salamanca, where, besides philosophy and theology, he studied civil and canon law, Greek, Hebrew, and the other branches then comprised in the curriculum of a university. By great application joined to an unusually brilliant mind and an extraordinarily retentive memory he accumulated such a vast store of knowledge that his contemporaries styled him the wonder of the world. At twenty-two he began to lecture on a wide variety of subjects to large audiences attracted by his learning. Later he assisted with distinction at the Council of Basle. During a visit to the papal court at Siena in 1443, he was denounced to Eugene IV as having publicly defended an heretical and some rash propositions, but in an explanatory letter he assured the pontiff of his orthodoxy. In his "Defensorium", written on this occasion against Torquemada and other critics, he gave utterance to views derogatory to the authority of the pope. On his return to Spain he was appointed Grand Chancellor of Castile, and in 1449 Bishop of Avila, whence his title Abulensis. Besides a Spanish commentary on the chronicles of Eusebius and other minor works, he wrote commentaries on the historical books of the Old Testament as far as II Par., and on the Gospel of St. Matthew. These are extremely diffuse, containing many digressions on dogmatic and other subjects, which, though often excellent in themselves, are out of place in a commentary. An edition of his works in 13 folio volumes was published at Venice in 1507 and 1547; a more complete edition in 24 folio volumes appeared at the same place in 1615, and another in 27 folio volumes in 1728.

F. BECHTEL.

Tosti, LUIGI, Benedictine historian, b. at Naples, 13 Feb., 1811; d. at Monte Cassino, 24 Sept., 1897. His father, Count Giovanni Tosti, descended from an ancient Calabrian family, having died young, his mother, Vittoria Corigliano, entrusted the child to its uncle, a monk at Monte Cassino. In 1819 Tosti became a pupil at the celebrated abbey, and was drawn early towards the monastic life. He was sent to Rome to complete his studies, was ordained priest in 1833, and soon returned to Monte Cassino, where for twenty years he taught the doctrines of St. Thomas. About 1829 he had begun a deep study of history, and in 1842 he published his "Storia della badia di Monte Cassino", soon followed by the "Storia di Bonifazio VIII". His "Storia della Lega Lombarda", dedicated to Pius IX, appeared in 1848 and was a trumpet-call to the Neo-Guelph party. He laboured so assiduously that in 1851 he published the "Storia di Abelardo e dei suoi tempi", the "Storia del Concilio di Costanza" in 1853, the "Storia dell' origine dello scisma greco" in 1856, "La Contessa Matilde e i Romani pontefici" in 1859, and in 1861 the "Prolegomeni alla storia universale della Chilsa".

Tosti took an energetic and enthusiastic part in the national movement blessed by Pius IX. In 1844 he had planned a review, "L'Ateneo italiano", for the purpose of putting the papacy at the head of the *Risorgimento*. The Neapolitan police authorities opposed it, and forbade Tosti to take part in the projected mediation (between the pope and the triumvirs of the ephemeral Roman Republic), which was advocated by the French envoy, Comte d'Harcourt. Pius IX had to intervene personally to secure the liberation of the learned monk, who had been accused, as Cardinal Capecelatro relates, of belonging to a band of murderous conspirators, and put in prison. Temple, the English ambassador at Naples, also courageously opposed this defenceless persecution. Tosti sought consolation in the study of the Holy Scriptures and his beautiful book, "Ricordi biblici", was the fruit of this mishap. He had the sorrow of seeing his beloved convents threatened by a law of spoliation passed by the Parliament of the new Italian Kingdom, and appealed to distinguished friends, such as W. E. Gladstone, to obtain some exemption for Monte Cassino, which he likewise procured later for the Abbey of Grottaferrata, the Sacro Speco of Subiaco, etc. Pained by these persecutions Tosti refused a chair in the University of Pisa, but became later assistant archivist of the Vatican, under Leo XIII. This great pope's allocution in May, 1887, inviting the Italian Government to make peace, presided over by the former revolutionary, Crispi, rekindled Tosti's patriotism. Deputed by the pope to negotiate the restoration of St. Paul's to the Benedictines, Tosti hoped to effect an official reconciliation of the Vatican and the Quirinal. Crispi's impatience, mutual opposition, the distrusts of French diplomatists, thwarted his noble efforts, and the too hopeful religious had to retract publicly his brochure, "La conciliazione". He withdrew to Monte Cassino and undertook his "Della vita di S. Benedetto". Moved by the pope's generous appeal to the English in 1896, he renewed his efforts with Gladstone, in favour of a reunion of the Churches.

Totemism, from *ote*, root *ot*, possessive form *otem*, in the Ojibway dialect of the Algonquin stock of American Indians; by some authorities spelled *dodeme* (Father de Smet), *todem* (Father Petitot), *Toodaim, dodaim, totam* (J. Long); the original signification was apparently a person's family or tribe, and in a narrower sense his belongings.

Totemism constitutes the group of superstitions and customs of which the totem is the centre. It is defined as the intimate relation supposed to exist between an individual or a group of individuals and a class of natural objects, i. e. the totem, by which the former regard the latter as identified with them in a mystical manner and in a peculiar sense their own belongings, so that they bear the name of the totem and show this belief in certain customs. The conviction of the intimate union constitutes the religious aspect of Totemism; the customs which result therefrom form its sociological aspect. If the union exists between an individual and a class of natural objects, we have individual Totemism. When it exists between a clan and a natural class we have clan Totemism. Frazer mentions sex Totemism, but that is peculiar to Australia. The totem is most frequently an animal species, more rarely a plant, occasionally an inanimate object, e. g. sun, wind, rock, etc. Totemism is widespread and developed among the American Indians and the aborigines of Australia. Traces of it are found in South Africa, in the Polynesian Islands, and among the Dyaks of India. Mauss says it does not exist in all savage races of our day (Année sociologique, IV, 1899–1900); Reinach maintains that it existed among the Greeks and Celts (Cultes, Mythes et Religions, II, Paris, 1905); Gomme, in the British Isles (Archæological Rev., III, 1889); Thomas, in Wales (Rev. de l'histoire des religions, XXXVIII, 1898); Renel, among the Romans (Cultes militaires de Rome, Lyons, 1903). It is doubtful whether Totemism existed among the Aryan races, and the facts alleged can be explained by idolatry. Loret maintains that Totemism existed among the early Egyptians, but evidently confounds this belief with animal-worship. Robertson Smith holds that Totemism lies at the basis of the Semitic religions. Zapletal has opened up anew this problem, and questions Smith's conclusions. Evidence from animal names is now admitted to be a precarious support for the Totem theory. Frazer clearly shows that there are sacred animals and plants which are not totems; and Levy denies to Totemism any rôle among the early Hebrews. Hence the present writer rejects the opinion of A. Lang that in the education of mankind Totemism has played a part everywhere.

I. History.—The phenomena of Totemism were first brought to the knowledge of the civilized world by the Jesuit missionaries to North America in the seventeenth century. The earliest accounts in English came from J. Long (Voyages and Travels, London, 1791). Following these are accounts of Major S. H. Long (ed. by Edwin James, London, 1823), James, Warren, Morgan, Schoolcraft, and Catlin. Phenomena of the same kind were observed by travellers and missionaries in Australia. The importance of Totemism in the early history of society was first pointed out by J. F. McLennan, who proposed as a working hypothesis that the ancient nations of the world had passed through a peculiar kind of Fetishism or Animism which finds its typical representation in the totem-tribes of Australia and of North America ("Fortnightly Rev.", Oct.-Nov., 1869; Feb., 1870; "Studies in Ancient History", London, 1896). On these lines Robertson Smith attempted to show that Totemism lay at the root of the Semitic religions and thus was the basis of the faith now embraced by the most civilized nations of the world ("Animal Worship among Arabs" in "Cambridge Jour. of Phil.", 1879; "Kinship and Marriage in early Arabia", 2nd ed., London, 1903; "Religion of the Semitics", Edinburgh, 1889; "Sacrifice" in Encyc. Britannica, 9th ed.); F. B. Jevons went further and affirmed that here are found the germs out of which all religion and all material progress have been evolved (Introd. to the History of Religion, London, 1896); hence Totemism was regarded as an established theory with the foundation laid by McLennan and the superstructure by Frazer, Smith, and Jevons. This theory is now rejected by scholars. Father Brun, writing of French West Africa, says that Totemism does not appear as a precise stage of religious evolution exclusive of all other beliefs; it is simply an element of these beliefs. Murillier criticises Jevons (Revue de l'hist. des religions, XXXVI). The investigation of Franz Boas among the Indians of North-West Canada and of Spencer and Gillen among the Australian aborigines gave the decisive blow to the theory and opened a new phase in the study of Totemism. Hence Hill-Tout says that Totemism is not the ideal and exact social or religious system of savage regimentation which some writers have tried to show. It is found among races varying much in modes of living, e. g. hunting, pastoral, agricultural, and industrial, and, becoming part of their varied beliefs and customs, has appeared to assume differing forms.

II. Origin.—Totemism must be simple to the savage mind, yet it is a puzzle to anthropologists. A great mass of facts different and at times in seeming contradiction have been gathered in America and Australia, yet the resemblances are so many and so close as to justify the classification under one common name. Different explanations have been proposed, and these have varied as new data were added. There is scarcely any other class of social phenomena more difficult to explain. Frazer says a definition is only provisional and A. Lang resorts to "conjectures" and "guesses" (Secret of the Totem, p. 28). The discussion has produced a wealth of literature which has served to exaggerate the real position and influence of Totemism. The difficulty is to define the nature of the relation between the individual or clan and their totem. Hence:—

(a) *The Name-Theory.*—Herbert Spencer classes Totemism under animal-worship and says its explanation is found in the primitive custom of naming children after natural objects from some accidental circumstances or fanciful resemblance, and then in confounding these metaphorical names or nicknames with the real objects, i. e. ancestors, and consequently paying to the animals the same reverence they paid their ancestors. Hence a phase of ancestor-worship founded on mistaking metaphors for facts (Prin. of Sociol., I, xxii). Akin to the "nickname" theory of Spencer is the explanation of Lord Avebury. He views Totemism as nature-worship and says it arose from the practice of naming individuals and then their families after particular animals; the individuals would look upon the animals at first with interest, then with respect, and at length with a sort of awe (Marriage, Totemism, and Religion, London, 1911). A. Lang proposes the "sobriquet" theory. He adopts the opinion of de la Vega that totems were names imposed by outsiders to distinguish the individuals or families from one another (Secret of the

Totem, pref.). Hence he agrees with J. F. McLennan, Loret, and Wake that totems were merely ethnic attributes, symbols, or ensigns of clans. A. K. Keane also holds that Totemism arose in "heraldic badges" (Ethnology, 9). Max Müller writes, "A totem is a clan mark, then a clan name, then the name of the ancestor of the clan, and lastly the name of something worshipped by the clan" (Contributions to the Science of Mythology, I, 201). Lang, however, holds that the name came into use before, not after, its pictorial representation, i. e., the clan mark. Pikler says the germ of Totemism is in the naming and has "its original germ not in religion but in the practical every-day needs of man". Risley also says that the totem is an ancient nickname, usually derived from some animal, of the supposed founder of the exogamous sept, now stripped of its personal association and remembered solely in virtue of the part it plays in giving effect to the rule of exogamy. In criticism it can be said that the name-theory fails to explain the intimate relation of the individual or clan to the totem. Hence Durkheim writes "a totem is not only a name; it is first and above all a religious principle" ("Année sociologique", 1902, 119).

Lang admits that his "theory is not in accordance with any savage explanations of the origin of the totem" (Social Origins, 188). Howlett writes: "It seems most improbable that any such nicknames would have been adopted and have given rise to Totemism, nor do I know of a single instance in which such nicknames have been adopted." Reinach holds that animal names are an effect, not a cause of Totemism (Cultes, Mythes, et Religions, I, 22). Tyler says the theory is not vouched for by sufficient evidence (Primitive Marriage, II, 214). Boas distinguishes three classes of tribal and of clan names, e. g. collective forms of the name of the ancestor, names of region inhabited and names of honour. Miss Fletcher says that with the Wezhishta gens of the Amaha names are classified as *nikie*, i. e. pertaining to the gens, "dream", "fanciful" and "borrowed" names, and nicknames, and women never had more than one name which was of *nikie* class. Hill-Tout declares that the commonest of Indian names in British Columbia are not nicknames, but true *prænomina*, mostly given to infants shortly after birth before any resemblance is apparent or possible.

(b) *The Transmigration Theory*, advocated by G. A. Wilkin, and also by Tylor (Jour. Anth. Inst., XXVIII, 1899), regards the totem as the bridge over the gap between a clan of men and a species of animals, so that they "become united in kinship and mutual alliance". In criticism it may be said that the notion of transmigration is not primitive, for with Tylor Totemism is regarded as primitive. Again the belief in transmigration is found among peoples who show no trace of Totemism, while it is unknown to the African Baganda and to most if not all of the North American Indians whose Totemism is clearly marked. Hence Frazer holds that Totemism and transmigration are distinct and independent. Finally, transmigration may enter into phases of Totemism under the form of the reincarnation of ancestors; this, however, is not the original element but a corrupted phase found only occasionally and hence a later development.

(c) *The Economic Theory*, proposed in accord with those anthropologists who hold that the starting-point of social organization was the necessity of procuring food, appears in two forms. Dr. A. C. Haddon maintains that totems originally were the animals or plants on which the local groups of people chiefly subsisted and after which they were named by the neighbouring groups ("Rep. of the British Assoc.", Belfast, 1902; "Folk Lore", XIII, 393). But this theory fails to explain the existence of inanimate objects as totems. Again, Baldwin Spencer denies such specialization of diet between the local groups (Northern Tribes of Central Australia, p. 767). The second form was advocated by Prof. Frazer, who, following Spencer and Gillen (Jour. Anth. Inst., XXVIII, 1899, 273), taught that Totemism is not so much a religious as an economic system, and held that it originated as a system of magic designed to supply a community with the necessities of life, especially food and drink. Thus each totem group performs magic ceremonies called *intichiuma* for the multiplication of the totem-plant or animal. Hence the prime duty of a totem clan was to provide a supply of its totem-animal or plant for consumption by the rest of the tribe, and thus ensure a plentiful supply of food ("Fort. Rev.", April and May, 1899). Frazer afterwards rejected this theory as too complex, and says that probably the co-operative communities of totemic magicians in Australia are developments of Totemism rather than its germ (Totemism and Exogamy, IV, p. 57). In fact the economic theory does not account for the sense of kinship between man and animal, and the belief prevailing in places that the clan is descended from the animal.

(d) *The External Soul Theory*, earlier propounded by Prof. Frazer, i. e., the possibility of depositing the souls of living people for safety in external objects such as animals or plants, but not knowing which individual of the species is the receptacle of his soul, the savage spares the whole species from a fear of injuring unwittingly the particular individual with which his fate is bound up ("Golden Bough", II, London, 1890). Frazer rejected this theory on the ground that it was not confirmed by subsequent research.

(e) *The Conception Theory* is the third and last explanation of Frazer. He says Totemism has its source in the savage ignorance of paternity, and is a primitive explanation of conception and childbirth, viz. that conception is due to a spirit of an ancestor entering the body of a woman, that she associates it with the object which was nearest her when the child was first felt in the womb, and that this object is regarded as the deserted receptacle of the spirit. And since the spirits of people of one particular totem are believed to congregate in one spot, and the natives know these spots, the totem of the child can easily be determined ("Totemism and Exogamy", IV, 57). In criticism we may say that the theory is based on the beliefs of the Arunta tribe in Australia, that, while van Gennep holds to Arunta primitiveness, A. Lang considers it a decadent sport (Secret of the Totem, appendix), that Spencer and Gillen testify to changes in Arunta Totemism, that it does not explain Totemism in its wide extent, and finally that these beliefs find another and a much better explanation.

(f) *The Manitou, or Guardian Spirit, Theory*, first proposed by the Jesuit missionaries to North America in the seventeenth century and revived in our day by Dr. Franz Boas, Miss Alice Fletcher, Father Morice, Mr. Hill-Tout, and J. Owen Dorsay, teaches that the manitou of the individual has developed into the totem of the clan. This can be explained in two ways. First by real inheritance, e. g. the guardian spirit of an ancestor is transmitted to his descendants. Hence the clan totem is the hereditary manitou of a family. Dr. Boas states that the guardian spirit of the North Pacific Coast becomes hereditary. Father Brun says that the Totemism of French West Africa is essentially familial in the sense of the Roman *gens*. A. Lang objects to the inheritance of the personal totem by the clan on the ground that mother descent is more primitive than paternal descent. But the objection assumes that Totemism is primitive: a contention by no means established. Frazer says the clans would be stable and permanent even with mother descent, if the husband took up his abode with the wife's people or the wife remained at home

(Totemism and Exogamy, II, 103, n). Morgan states that this condition is true of the Iroquois, whose clans are permanent even with mother descent. Hill-Tout writes that in North-West Canada the totem is hereditary either from father to son in the paternal right, or from the man to his sister's children in the maternal right. For even under maternal right the head of the clan is invariably a man—the elder male relative on the maternal side. Thus the founders of families and of totem-crests are as invariably men under matriarchy as under patriarchy; in the former, indirectly through the man's sister, in the latter, directly to his children (Trans. Roy. Soc. Canada, IX, XI; B.A.A.S., London, 1889). Frazer points out that among the Melanesians, where mother-kin prevails, the nearest male relative of the children is the mother's brother (loc. cit., II, 74). And Swanton says of the Tlingit shamans that spirits descended from uncle to nephew. The great difficulty with the real inheritance theory is that it does not explain enough. It may account in places for the change of the personal totem of an ancestor into the clan totem, but it fails to tell how or why the same totem is held by different clans or tribes or stocks not connected by ties of blood-relationship. The natural explanation is that the fauna and flora of a country are substantially the same, and individuals in different parts belonging to different tribes could in the usual way acquire a totem which they would transmit to their descendants. Thus with members of the same clan there would be the same totem with consanguinity. With members of different clans having the same totem there would not be consanguinity but a kind of relationship based in the possession of the same. Hence Dr. Fison writes of the Australians: "All men of the same generation who bear the same totem are tribally brothers, though they may belong to different and widely separated tribes" (quoted by Lang, "Secret of the Totem", 45). If therefore real inheritance be supplemented by supposed inheritance, it can be safely maintained that the clan totem, taken in its widest extent, is a development or extension of the individual totem or manitou through real or supposed inheritance. The nature of the supposed inheritance becomes clear from the following.

III. Nature.—The basis of Totemism is the animistic conception of nature. The life revealed in living things, the forces manifested by physical objects are ascribed to spirits animating them or dwelling therein. "There is indeed nothing in nature", writes Charlevoix, "if we can believe the savages, which has not its spirit" ("Histoire de la Nouv. France", Paris, 1744, VI, 67). The feeling of weakness in the midst of powers and forces greater than his own leads him to seek union with one or more of these powers. It becomes his guide and support; its power is added to his; its life or "essence" or "mystery" becomes part of his very own, he is called by its name, and some part of its physical embodiment is viewed as his most valued possession, as the mark of his spirit protector and the sign of his strengthened life, i. e. his "medicine" or "mystery". Thus savages believe themselves endowed with the qualities of their totems. Thus we can understand the birth and death ceremonies of the totem tribes, the facts that in the tribal dances and ceremonies the individuals imitate in action or costume the appearance and habits of their totems. So also we can understand the respect or reverence which the individual has for his totem, the intimate relation existing between them, the fact that he regards them as his kin and calls them brothers, and as far as possible identifies himself with them. Thus the savage with a totem has his own human life and strength plus the spirit-life and strength of the animal or object whose totem he possesses. For, as with the natives of British Columbia, the *inua* or *uya*, i. e. the "essence" or "mystery", becomes the totem, not the mere outward form of the animal or object. He either has this spirit-life actually and habitually compenetrating and augmenting his own natural powers or at least possesses the right to invoke the spirit-life to the augmentation of his natural powers in time of need, e. g. an Indian in a canoe, seeing the enemy gaining upon him, reverently calls upon his totem, e. g. saw-bill duck, and receives such additional strength that he soon escapes his pursuers (Frazer, "Totemism and Exogamy", III, p. 385). In the former case the possession of the spirit-life is habitual and can be conceived as passing to his descendants; in the latter case it is occasionally present and therefore need not be hereditary. To possess intact this spirit-life, or at least to keep the claim to its assistance clear and unhampered, seems to be the reason for the regular religious ceremonies practised in regard to the totem.

Furthermore, in studying the relation of the spirit-life of the totem to the natural life of the individual, we can conceive that the latter is at times more prominent and at times the spirit-life is principally considered. In the former case the members of the totemic clan are united, not only in the possession of the same common spirit-life, but through ties of consanguinity, by participation in a common human life. In the latter case the members of the totem clan would not of necessity be related to one another by blood, but would consider themselves relatives by a common participation in the spirit-life of the same totem. Thus we can understand why some tribes have both clan and individual totems, and again why some clans have two or more totems. Finally, in the theory that the clan totem is the natural development of the individual totem, the contention of some scholars that the term *totem* should be reserved to the clan totem is of little moment. Thus van Gennep, E. B. Tylor, and Lang hold that the clan totem alone deserves the name; and Frazer now advocates the opinion of van Gennep (Totemism and Exogamy, III, 456).

Hence Totemism, like Fetishism and Shamanism, is based on Animism, but differs from them in the way the spirits are conceived to enter into the lives of men and manifest their power. Miss Kingsley, however, maintains that Totemism is based on the pantheistic conception of the universe, which she says was held by the American Indians. But this is not correct. The Indians always made a distinction between the spirit-life of the totem and the ordinary human life or strength of men. The former was considered sacred, mysterious, mystic, supernatural. This is shown by the terms used to designate the spirit-life, e. g. *wakan* of the Dakotas, *orenda* of the Iroquois, *tlokoala* of the Kwatiutl Indians. Dorsay says that an Indian's *wakaned* is considered inspired and as possessing supernatural power. Thus the Indian's "medicine bag" is his "mystery bag", writes Catlin, and Dr. Hoffman tells us that the young Algonquin receives from the Great Mystery the particular animal form he might adopt as his guardian mystery, and this becomes his advisor, monitor, and intercessor with the superior *manidos*.

The real nature of Totemism, therefore, is the savage conception of a twofold power or life or strength in the individual, i. e. his human life plus the spirit-life of the totem. But the measure in which the spirit-life enters into the human life of the totemic individual varies in different tribes and races, giving rise to the difficulties experienced by students of this subject. Thus we have the spirit-life holding a subordinate position in relation to the human life; or the spirit-life so prominent that the human life is absorbed by it and consequently ignored and forgotten; or we find both the spirit life and the human life equally recognized but at times in a confused manner. In the first case the human element predominates and descent is reckoned by human generation. Miss Fletcher assures us that the Omahas do not hold descent from the totem animals; and Father Brun says the same is true of the natives in West Sudan. Boas writes that the Kwatiutl Indians do not consider themselves to be descendants of the totem; they believe the totem came from an ancestor who had an adventure with an animal which he took as his totem and transmitted to his clan; and that the connexion between the totem and the clan has become so slight that it has degenerated into a crest. The Tlingit do not believe in descent from the totem, yet count the totem as their relative or protector, as e. g. Indians of the Wolf totem implore the wolves: "we are your relations, pray do not hurt us." Hence Powell's statement, that the totem of the clan is considered to be the progenitor or prototype of the clan, is not universally true. This also solves the difficulty experienced by Hill-Tout, who says that the Totemism of British Columbia appears to differ in important and characteristic features from the Totemism of peoples elsewhere.

In the second case, where the spirit-life is considered as absorbing the human life, the fact of human generation is ignored and forgotten. Thus, e. g. among the Aruntes human paternity is unknown. They believe that conception is the entrance of the spirit of an ancestor into the body of a woman, and thus every child born is the reincarnation of an animal or plant ancestor. In the olden times the totemic ancestors were families or groups of families who lived in some definite part of the tribal territory. Some would be swans, others dogs, kangaroos, snakes, etc. They carried with them sacred stones called *churinga*, i. e. soul or spirit-life. Upon death the spirit-life would remain in the *churinga* and would haunt the place where these were. In the course of time all the camping-places, water-holes, large rocks, springs, hills, trees, etc., would be thronged with spirits of all kinds. The exact locality of these ancestral spots, with the specific kind of spirits dwelling there, was known from oral tradition. In virtue of the spirit-life, these spots were considered as related to one another in the same way that human beings are related, e. g. a soakage may be the mother's brother of a certain hill, a rock may be the father of a particular sand-hill, a tree may be the brother of a sand-hole, etc. If in passing a particular spot a woman feels the quickening of the child, she ascribes it to the fact that an ancestral spirit of that spot has at that moment entered her body. The object, e. g. stone, piece of wood, etc., that met her eye at that moment is carefully taken as the *churinga* of the child and placed in the secret store-house of the tribe kept for that purpose. Thus the totem of the child will be the totem of the spot whence the *churinga* was taken. Hence there could be children of the same parents all possessing different totems.

In the third case, where both the spirit-life of the totem and the human life of the individual are recognized but in a confused manner, we find the explanation of another class of beliefs and myths which have gathered around Totemism. Thus we can understand how the North American Indians, in explanation of their origin, can neglect the human so that in the remote past it is lost in the animal. Thus Indians of the Wolf totem say they are descended from wolves, of the Crane totem from cranes, of the Turtle totem from turtles, etc. So too we can see how they were led to believe that their ancestors were monstrosities endowed with superhuman powers, e. g. Salish tribes, or were transformed human or semi-human, e. g. Urabunna or creatures partaking of both human and animal natures with power of transforming themselves into animal or human shapes at will, e. g. Northern Australian tribes, or of retransforming themselves, e. g. Iroquois (Hesitt, "Iroquois Cosmology" in "21st Am. Rep. of Bur. of Ethnol.", Washington, 1904, p. 219). On this hypothesis we can grasp the myths of mixed generation so universal among totemic peoples and see also why the Haides, in venerating the killer-whale, blend in their belief the actual animal and the demon Skana supposed to be embodied in it.

IV. Personal Totem, i. e. *manitou* of Algonquins, *tu kinajek* of Tlingit, *augud* of Torres Straits, *sulia* of British Columbia, *bunjan* of south-east Australia, *ari* of north-east Australia, *oubarre* of West Australia, *atai* and *tamaniu* of Melanesia, *nyarong* of Borneo, *nagual* of South America, *tamanous* of Twana Indians, is not hereditary; it is acquired by the individual and it is his own personal property, whereas the clan totem is considered the possession of the clan. It is obtained either accidentally, as when a savage believes that he owes his life to an animal which he immediately takes as his totem; or bestowed at birth, e. g. in Central America by the parents casting a horoscope; or bestowed on the youth by old wise men, e. g. Sioux; or regularly at the puberty ceremonies. On reaching this age the young Indian goes off alone to the forest and wanders for days without food except roots, etc. After a time when asleep he sees in a dream the animal which is to be his guardian. It or its spirit comes to him. Ever after he wears on his person the object seen, or some portion of it, which is known as his medicine. Catlin describes this in detail. The Salish word *sulia*, from *ulia*, i. e. to dream, indicates the ordinary method by which it is obtained. Boas says that with the Kwatiutl Indians the personal totem must be selected from the totems of the clan, hence the number is limited.

V. Religious Aspect.—Totemism has both a religious and a social aspect. These aspects vary; thus with the interior Australian tribes the religious aspect is predominant; with the coastal tribes the social aspect prevails. Lord Avebury and Spencer hold that Totemism began as a social system only, and that the superstitious regard for the totem is an aftergrowth. A. Lang, failing to grasp the religious meaning of the totem, has helped to popularize this view. McLennan and Robertson Smith teach that the religious reverence for the totem was original. Father Morice says that Totemism among the Dénés is essentially and exclusively connected with their religious system. Investigation into the nature of Totemism shows this to be the true opinion. Durkheim holds the totem to be a god. This is a mistake. The respect paid to the totem is like that given to relatives or brothers; it is his friend and helper, not his superior. Frazer says Totemism has done little to foster the higher forms of religion, and Murillier does not admit the possibility of any transition from Totemism to any other stage of religious evolution. McGee quotes Darsey, that among the Sioux totems were reverenced rather than worshipped. Frazer at first maintained the religious aspect of Totemism ("Totemism", Edinburgh, 1887); now he denies this (Totemism and Exogamy, 1911, IV, 6). He says the key to the Totemism of Australian natives is furnished by the Intichiuma ceremonies; and as these ceremonies, peculiar to each totem group, are performed with spells and enchantments for the multiplication of the totem animal, therefore in its origin Totemism is simply an organized and co-operative system of magic devised for economic purposes. The criticism is that this view is superficial and unsatisfactory, that investigations show the Australian savage life to be saturated with the belief in spirits, e. g. the explanation of conception and birth, and that whereas the Intichiuma ceremonies on the surface may appear to be for the multiplication of the totem animal and thus secure a food supply, yet if we study them in the background of the belief in spirits, their purposes more probably are the multiplication of the reincarnated forms of the spirits. When, e. g. the members of the Kangaroo clan perform magic ceremonies for the multiplication of Kangaroos, we are not warranted in stating that kangaroo animals are in question, for members of this clan are also called Kangaroos. Hence the multiplication of the human species may be intended, so that the Kangaroo spirits may be reincarnated. This seems to be confirmed by the rites having a reference to human generation performed at the puberty or Engwura ceremonies.

The main features in the religious aspect of Totemism are shown in the rites and ceremonies performed with a view to show or to attain identity with the totem. (a) Thus at solemn totemic festivals the totem animal is sacrified and eaten even by its own clan. In Australia the eating of the totem animal was considered essential to the rites for the multiplication of the totem. Hill-Tout says that in British Columbia these ceremonies would last through the winter and the people would be grouped according to their totems, thus changing the usual form of tribal organization. (b) By adoption of personal names referring to the appearance or habits of the totem animal. (c) By dressing in the skin or other parts of the totem animal, wearing badges, masks, crest-hats of the totem, arranging hair, painting face or body, tattooing and mutilating the body so as to resemble the totem; so also totems are painted or carved on weapons, canoes, huts, etc. From this custom we have the totem poles decorated with crests of clan and personal totems, and with red crosses representing the ghosts of their vanquished foes, who are to be their slaves in the other world. (d) By dances and songs as dramatic performances of the myth relating to the acquisition of the spirit protector. (e) By consulting totems as auguries, e. g. the Algonquins and natives of Torres Straits.

VI. Social Aspect.—In its social aspect (a) the totem is generally taboo to the members of the clan. They could not kill it or eat its flesh. An exception is in the solemn totemic ceremonies. According to traditions the Australians in earlier times regularly killed and ate their totem. This is not now the custom. The American Indian will address an apology to his totem before killing it. The Melanesian is supposed to have peculiar success in hunting his totem animal. Hill-Tout says the Salish tribes considered the real *sulia* to be a spirit or mystery-being, though it might take the form of an animal and it could not be killed or hurt if the animal were slain, hence the hunter did not respect the life of the totem; in fact he was considered more successful in hunting his *sulia* animals than other men. Again, on the African Gold Coast a hunter of the Leopard family would not hesitate to kill a troublesome leopard, but he would put oil in the wounds (Harper in "Jour. Anth. Inst.", XXXVI).

(b) Among the Iroquois and the Southern Mewuks of California the totem governs the choice of partners in games, the placing and treatment of visitors.

(c) The main social feature of Totemism is shown in binding together the members of the totem clans. All members of the totem clan regard one another as kinsmen and brothers, and are bound to mutual help and protection. Tylor says every Indian looked for and found hospitality in a hut where he saw his own totem figured and, if he was taken captive in war, his clansmen would ransom him (Jour. Anth. Inst., XXVIII). Morgan shows the superiority of the totem bond over the tribal bond among the Iroquois. In the Torres Straits warfare could not affect the friendship of the totem-brethren. Yet Harper says that on the Gulf Coast a man cannot safely visit a person of the same totem belonging to an unfriendly tribe, nor does he hesitate to kill another having the same totem as himself.

(d) In the social phase must be viewed the secret societies so widely prevalent among the American Indians.

(e) Ford holds that in totemic obligations we are confronted with the beginnings of authority ("Annals of American Academy of Political and Social Science", XXIII, Philadelphia, 1904). Jevons and Reinach teach that the totem clan is the earliest social organization known in the evolution of society (Folk Lore, X). Loret sees in Totemism the explanation of the early Egyptian hieroglyphics, and says it is the parent of writing (Musée Guimet, XIX, 1904–05). Frazer says that it had an indirect influence on agriculture, the domestication of animals and the use of metals, that its influence on economic progress appears to be little more than a shadowy conjecture, but it has done something for pictorial and plastic art, e. g. in totemic representations (Totemism and Exogamy, IV, 19–25). Father Brun, however, warns us that although certain social institutions are placed under the protection of totemic beliefs, the social institutions as a whole are not based upon Totemism. The truth is that Totemism, like any other belief which enters into the life of a people, has an influence on their culture.

(f) The influence of Totemism is shown also in the birth, marriage, and death ceremonies. Thus, e. g. a child of the Ottawa deer clan on the fifth day after birth was painted with red spots or stripes in imitation of a fawn; the bride and groom in the Kolong red-dog clan of Java were rubbed before marriage with the ashes of a red-dog's bones; a member of the Amaha buffalo clan was on dying wrapped in a buffalo robe, etc.

VII. Exogamy.—The relation of exogamy to Totemism is a problem of great difficulty, and will not be completely solved until the origin of exogamy is definitely established. It is a fact that the custom prevails in many tribes that a man cannot marry a woman of his own totem, but must seek a wife from another totem clan. Hence many writers inferred that Totemism and exogamy existed together as different sides of the same institution. Thus A. Lang regards exogamy as the essential feature of Totemism. Hill-Tout takes issue with him maintaining that it is accidental or secondary, that the possession of the same totem becomes a bar to marriage only because it marks kinship by blood, which is the real bar. Lang by totem means "the hereditary totem of the exogamous clan" and admits that if we take totem in its wider extent as comprehending the "personal" totem, the "secret society" totem and the "tribal" totem, then members of these totem groups can intermarry (ibid., p. 204). McLennan and Robertson Smith held that Totemism is found generally in connexion with exogamy, but must be older than exogamy. This view has been confirmed by the investigations of Spencer and Gillen among the Australian savages. They teach that Totemism is a primary and exogamy a secondary feature, and give traditions proving the existence of totems long before that of exogamous groups, and that when the latter did arise, the totems were not affected by them. Hence the exogamous class is a social organization totally different in origin and nature from the totemic clan, and not a mere extension of it, although they have crossed and blended in many places. Again Totemism and exogamy are found existing separately. Father Brun says the totemic clans of the Sudan are not exogamous. Dr. Rivers points out that the natives of Banks Islands have pure Totemism and pure exogamy existing side by side without influencing each other.

Different theories have been proposed to account for the origin of exogamy. Westermark says it arose in the aversion to marriage between blood relatives or near kin, i. e. in horror of incest. This is very probably the true solution. McLennan holds that exogamy was due originally to scarcity of women, which obliged men to seek wives from other groups, i. e. marriage by capture, and this in time grew into a custom. Durkheim derives exogamy from Totemism, and says it arose from a religious respect for the blood of a totemic clan, for the clan totem is a god and is especially in the blood. Morgan and Howitt maintain that exogamy was introduced to prevent marriage between blood relations: especially between brother and sister, which had been common in a previous state of promiscuity. Frazer says this is the true solution, that it really introduced group marriage, which is an advance to monogamy, and that the most complete record of this is the classificatory system of relationship. Lang, however, denies there is any group marriage, and says the so-called group marriage is only tribe-regulated licence. Hill-Tout writes that exogamous rules arose for political reasons by marriage treaties between the groups. Darwin denies primitive promiscuous intercourse, and says exogamy arose from the strongest male driving the other males out of the group. This is also the opinion of Lang, Atkinson, and Letourneau.

JOHN T. DRISCOLL.

Totonac Indians, one of the smaller cultured nations of ancient Mexico, occupying at the time of the Spanish conquest the coast province of Totonicapan, comprehending all except the northern border of the present State of Vera Cruz, together with the Zacatlan district in Puebla. Within this territory they had some fifty towns, with a total population of perhaps a quarter of a million. Their capital, Cempoala, about five miles inland from the present city of Vera Cruz, had a population of about 25,000. In spite of wars, epidemics, and oppressions they still number about 100,000.

The Totonac were the first natives whom Cortés met on landing in Mexico in 1519. According to their own traditions, they had come from the northwest nearly eight centuries earlier, and had maintained an independent kingdom—of which the names of the successive kings are on record—until subjugated by the Aztec only about twenty-five years before the arrival of the Spaniards. Being compelled by their conquerors to the payment of a heavy tribute and to other exactions, including the frequent seizure of their people for slaves or for sacrifice in the bloody Aztec rites, they were ripe for revolt, and their king, Chicomacatt, eagerly welcomed Cortés and promised the support of his fifty thousand warriors against Montezuma.

Encouraged by Cortés, King Chicomacatt asserted his independence by seizing the Mexican taxgatherers then in his country, but was restrained by the Spanish commander from sacrificing them to the idols. They gave willing help in laying the foundations of the city of (Villa Rica de la) Vera Cruz, which Cortés made his starting point for the advance upon the Mexican capital. As a final test of their friendship and obedience, Cortés commanded the destruction of the wooden images of the gods in the great pyramid temple of Cempoala, where every day human victims were sacrificed, their hearts being torn out and placed upon the altars of the gods, the blood sprinkled upon the idols and the walls of the temple, and the dismembered limbs borne away to be served up in a cannibal feast. Notwithstanding the protest of the king and the fierce opposition of the priests and their retainers, the order was carried out by a detachment of Spanish soldiers. The idols were thrown down to the foot of the temple and burned. According to Bancroft (see bibl.), when their pagan temple was cleansed Olmedo preached the Christian Faith and celebrated Mass before the assembled natives. The contrast between the simple beauty of this impressive ceremony and their own bloody worship made a deep impression on the minds of the natives, and at the conclusion those who desired were baptized. So Christianity achieved its first victory in Mexico.

In the subsequent events, culminating in the taking of the city of Mexico and the downfall of the Aztec empire, the Totonac took active part with the Tlascalans as allies of the Spaniards, giving ready allegiance alike to the new rulers and the new religion. In 1526 their territory of Vera Cruz was combined with Tlascala, Tabasco, and Yucatan into a bishopric with seat at Tlascala under Bishop Juliano Garcés, Dominican (d. 1542). The work of Christianizing was given over chiefly to the Dominicans, who had convents at Vera Cruz, Puebla, and Goazacoalco, and who led the fight against Indian slavery (see Casas, Bartolomé de las). Franciscans, Augustinians, and other orders were also represented in the Indian work. The Jesuits in the diocese confined their attention to whites and negroes. In 1575–77 the Totonac, in common with all the other tribes of Southern Mexico, were ravaged by the mysterious *matlalzahuatl* epidemic, estimated to have destroyed two millions of the native race. About the year 1600, in accordance with a viceregal scheme of concentration, the entire population of Cempoala was removed to a new site, and the ancient capital thenceforth sank to the level of a village.

The modern Totonac of Puebla and Vera Cruz are industrious farmers, their chief crop being sugar cane, from which they manufacture sugar in their own mills. They are also expert fishermen. Their houses are of pole framework plastered with clay on the outside and thatched with grass. They wear cotton garments of native pattern and weaving. They are much given to dances and festivals, both church festivals and their own, particularly the Costumbre, an interesting survival of an old sacrifical rite in which seeds and portions of earth sprinkled with the blood of fowls killed for the occasion are distributed to the various fields. Aside from this and some other folklore customs, they are all Catholics, and strongly attached to their religious teachers.

The Totonac language, although considered by Sahagun and Orozco y Berra to be connected with that of their next neighbours, the Huastec, of Mayan stock, is held by Brinton to be of independent stock, but with considerable borrowings from Huastec and Aztec. It is spoken in four principal dialects and lacks the sound of r. Of the published works in the language the most important are the "Arte y Vocabulario de la lengua totonaca" and the "Gramatica et Lexicon Linguæ Mexicanæ, Totonaquæ et Huastecæ" (the latter printed in Mexico, 1560) by the Franciscan missionary, Fr. Andres de Olmos (d. 1571), noted for his mastery of several of the native languages. An "Arte" or manual by Fr. Francisco Dominguez was published in Puebla, 1752, and a catechism and extended vocabularies in two dialects by the same author shortly afterward, with a reprint in Puebla, 1837. Pimentel gives a sketch of the language in his "Cuadro Descriptivo", I (Mexico, 1862–65; 1874–75). Much manuscript material, linguistic and religious, remains unpublished.

JAMES MOONEY

Touchet, GEORGE ANSELM, b. at Stalbridge, Dorset; d. about 1689. He was second son of Mervyn, twelfth Lord Audley, second Earl of Castlehaven, and a man of profligate life; his first wife was Elizabeth Barnham. He was professed as a Benedictine at St. Gregory's, Douai, 22 Nov., 1643, taking the name Anselm in religion. Being sent on the mission in the south of England, he was finally appointed chaplain to Queen Catherine of Braganza in 1671. In that capacity he lived at Somerset House till 1675, when he was banished. Dodd states that he was expressly excluded from the succession to the Earldom of Castlehaven by the Act of Parliament which in 1678 confirmed the earldom to his elder brother James. While living in London he published a book called "Historical Collections out of several grave Protestant Historians concerning the Changes in religion, and the strange confusions following, etc." (1674; 2nd ed., 1686), and in 1680 he issued "The Secret Paths of Divine Love", translated by him from the French of Constantine Barbason.

EDWIN BURTON.

Toul. See NANCY, DIOCESE OF.

Toulon. See FRÉJUS, DIOCESE OF.

Toulouse, ARCHDIOCESE OF (TOLOSENSIS), includes the Department of Haute-Garonne. As re-established by the Concordat of 1802 it included the Departments of Haute-Garonne and Ariège, at which time the archbishop joined to his own the title of Auch, jurisdiction over Auch being given to the Diocese of Agen, also the title of Narbonne, an archdiocese over which jurisdiction went by the Concordat to the Diocese of Carcassonne, and the title of Albi, over which, though formerly an archdiocese, jurisdiction went by the Concordat to the See of Montpellier. In consequence of the creation of the Archdioceses of Auch and Albi under the Restoration, the Archbishop of Toulouse only styled himself Archbishop of Toulouse and Narbonne, and when the Diocese of Pamiers was created the limits of the Archdiocese were restricted to the Department of Haute-Garonne. As thus marked off by the Bull "Paternæ Caritatis", July, 1822, the Archdiocese of Toulouse includes almost the whole of the ancient Dioceses of Toulouse, Rieux, and Comminges, and a few small portions of the ancient Dioceses of Montauban, Lavaur, St-Papoul, Mirepoix, and Lombez.

I. DIOCESE OF TOULOUSE.—Toulouse, chief town of the Tectosagi, at the end of the second century B. C. tried to shake off the yoke of Rome during the invasion of the Cimbri, but at the beginning of the empire it was a prosperous Roman *civitas* with famous schools in which the three brothers of the Emperor Constantine were pupils. In the fourth century it was reckoned the fifteenth town in importance in the empire. In 413 it was taken by Astulph, the Goth, and in 419 under Wallia it became the capital of the Visigothic Kingdom. In 508 after conquest by Clovis it became Frankish. Legends of more or less recent date claim that it was evangelized by St. Martial (see LIMOGES, DIOCESE OF), but as far as historical evidence goes the see seems to have been founded by St. Saturninus (Sernin) in the middle of the third century. The "Passio Sancti Saturnini" corroborates this date as that of his incumbency and martyrdom. Subsequent tradition claims that he was a disciple of St. Peter. St. Papoul (see CARCASSONNE, DIOCESE OF) was his companion and like him a martyr. The name of St. Honoratus, given in some lists as St. Saturninus's successor, seems to have crept in through error from the fabulous legend of St. Firminus of Amiens and, according to Mgr Duchesne, ought to be omitted. Among the bishops of Toulouse may be mentioned: Rhodanius (350–58), exiled by Constantius to Phrygia because of his efforts against Arianism at the Council of Béziers in 356; St. Hilary, whom some historians place before Rhodanius, but who is placed after him by Mgr Duchesne; St. Sylvius (360–400); St. Exuperius (c. 400), who drove from his diocese in 405 the heretic Vigilantius, saved Toulouse from the ravages of the Vandals, and was the friend of St. Jerome; St. Germerius (Germier), whose episcopate (c. 541) is questioned by Mgr Duchesne; Magnulphus (c. 585), exiled by King Gondebaud; St. Erembert (657), a monk of Fontenelle who returned to his monastery to die.

THE CATHEDRAL, TOULOUSE

From being the capital of the Duchy of Aquitaine, from 631, Toulouse became in 778 the capital of the County of Toulouse created by Charlemagne, and which in the tenth century was one of the main fiefs of the crown. Raymond IV, Count of Toulouse, known as Raymond de Saint Gilles (1042–1105), was one of the leaders of the First Crusade. Concerning the leanings of Raymond VI and Raymond VII, Counts of Toulouse, towards the Albigensian heresy, and concerning the death of Simon of Montfort in 1218 under the walls of Toulouse, see ALBIGENSES. At this time Toulouse had as bishop Fulk of Marseilles (1206–31), who fought against Raymond VI and protected the Friars-Preachers in their early days. The marriage (1249) of Jeanne, daughter of Raymond VII, with Alphonse de Poitiers, brother of King Louis IX, led to the uniting in 1271 of the County of Toulouse to the Crown of France, and Toulouse became the capital of the Province of Languedoc. The See of Toulouse was for a time made illustrious by St. Louis (1296–97), son of Charles II, King of Naples and the Two Sicilies, and of Mary, daughter of the King of Hungary: he was nephew of St. Elizabeth of Hungary and grand-nephew of St. Louis King of France. Louis had resigned to his brother Robert all rights over the Kingdom of Naples, and had accepted from Boniface VIII the See of Toulouse after donning the habit of St. Francis. His successor was Peter de la Chapelle Taillefer (1298–1312) who was created cardinal in 1305. To this epoch belongs a very important change that took place in the history of the Diocese of Toulouse. It decreased in size but increased in dignity. Before 1295 the Diocese of Toulouse was very extensive. At the beginning of the thirteenth century Bishop Fulk had wished for the sake of religion to divide it into several dioceses. In 1295 a portion of territory was cut off by Boniface VIII to form the Diocese of Pamiers. Then in 1319 John XXII cut off the Diocese of Toulouse from the metropolitan church of Narbonne and made it a metropolitan with the Sees of Montauban, Saint-Papoul, Rieux, and Lombez as suffragans; a little later Lavaur and Mirepoix also became suffragans of Toulouse. The majority of these sees were composed of territory cut off from the ancient See of Toulouse itself.

John XXII offered the See of Riez in Provence to Gaillard de Preyssac, Bishop of Toulouse since 1305, whom he suspected of having conspired against him with Hugues Giraud, Bishop of Cahors. Gaillard refused the offer, and retired to Avignon where he died in 1327. The first archbishop was Raymond de Comminges, Bishop of Maguelonne from 1309, who, when created cardinal in 1327, abandoned the See of Toulouse and went to Avignon where he died in 1348. He left a book on the "Passion of the Saviour", and some "Sermons for Festival Days". Among his successors were: the Dominican William de Laudun (1327–45), previously Bishop of Vienne; Raymond de Canilhac (1345–50), cardinal in 1350; Cardinal Francis de Gozié (1391–92); Bernard du Rosier (1451–74), author of two treatises on the temporal power of the pope and on the liberty of the Church, and who founded at Toulouse the "Collège de Foix" for the support of twenty-five poor scholars, where he collected one of the first libraries of the period; John of Orleans (1503–33), cardinal in 1533. Protestantism entered Toulouse in 1532 through foreign students. As early as 1563 the Catholics of Toulouse founded a league to uphold the prerogatives of Catholicism, protected by the Parlement but jeopardized by certain Protestant town-councillors. From 1586 to 1595 the League party under Montmorency, Governor of Languedoc, and the Duke de Joyeuse held control in Toulouse. The rule of Henry IV was definitively recognized there in 1596. During this period of religious unrest Toulouse had many notable archbishops: Gabriel de Gramont (1533–34), cardinal in 1530; Odet de Chatillon, Cardinal de Coligny (1534–50), who became a Calvinist, married in 1564, and died in 1571; Anthony Sanguin (1550–59), Cardinal de Meudon in 1539; Georges d'Armagnac (1562–77), cardinal in 1544; François de Joyeuse (1584–1605), cardinal in 1583 and who conducted the negotiations between Henry IV and the Holy See.

Among subsequent archbishops we may mention: Louis de Nogaret (1614–27), Cardinal de Lavalette in 1621, but who never received orders and from 1635 to 1637 led part of the French troops in the Thirty Years War; Charles de Montchal (1628–51), who in 1635 upheld the decision of the Holy See, against the opinion of the majority of the Assembly of Clergy, that the marriages of princes of the blood contracted without royal consent were not null; Pierre de Marca (1652–62), who under Louis XIII aided largely in the re-establishment of Catholicism in Béarn, in 1621 became president of the Parlement of Béarn, was afterwards made Councillor of State by Louis XIII, and wrote a work of Gallican tendency "De concordia Sacerdotii et Imperii", a voluminous work on Spain and especially on the Province of Tarragona, and a commentary on the Psalms; he was secretary to the Assembly of the Clergy of France of April, 1656, which drew up a formula condemning the Five Propositions drawn from the "Augustinus", and he died in 1662 just as he was about to take possession of the See of Paris; Pierre de Bonzy (1672–73), cardinal in 1672; Charles Antoine de Laroche Aymon (1740–52), cardinal in 1771; Etienne Charles de Lomenie (1763–89), Cardinal de Brienne in 1788; Anne de Clermont Tonnerre (1820–30), cardinal in 1822; Paul d'Astros (q. v.) (1830–51), cardinal in 1850; Julien Desprez (1859–95), cardinal in 1879; François Désiré Mathieu (1896–99), cardinal in 1899, was a member of the French Academy, wrote the history of Lorraine under the *ancien régime*, of the Concordat of 1801–2, and of the Conclave of 1903; he died in 1908.

II. DIOCESE OF COMMINGES.—The earliest Bishop of Comminges we know of is Suavis, who assisted at the Council of Agde in 506; but Sidonius Apollinaris speaks of the persecutions suffered at the hands of the Arian Goths in the fifth century by the bishops of Comminges. St. Affricus (*c.* 540), who died in the Rouergue, is wrongly included among the bishops of Comminges. Among the bishops of Comminges were: St. Bertrand of Comminges (1073–1123), grandson of Raymond Taillefer, Count of Toulouse, previously archdeacon of Toulouse, and who built the cathedral of Comminges and restored the town; Bertrand de Goth (1295–99), who became pope under the name of Clement V; Bertrand de Cosnac (1352–72), cardinal in 1372; Amelius de Lautrec (1384–90), cardinal in 1385; Pierre de Foix (1422–64), cardinal in 1437; John Cibò, who became pope in 1484 under the name of Innocent VIII, for a short time in 1467 held the title of Comminges; Cardinal Amanieu d'Albret, who was Bishop of Comminges in 1504 and 1507; Cardinal Carlo Caraffa, strangled in the pontificate of Pius IV, was probably Bishop of Comminges about the middle of the sixteenth century; Urban de Saint-Gelais, who in 1586, without outside assistance and with the help of a cannon which he caused to be brought from Toulouse, captured the town from the Huguenots. In the church of St. Bertrand of Comminges baptism was administered with peculiar ceremonies: the baptismal water was kept in a large silver dove with wings displayed, and enclosed in a cupola surmounting the font; at the moment of baptizing the dove was lowered, by a pulley, over the head of the child and through its open beak the baptismal water was poured.

III. DIOCESE OF RIEUX.—The See of Rieux was founded in 1317, by cutting off a portion of the Diocese of Toulouse. The cathedral of Toulouse, dedicated to St. Stephen, is remarkable for the contrast between its choir and nave: the nave is Romanesque and was begun in 1211 at the instigation of Count Raymond VI; the choir is Gothic, and was begun between 1273 and 1286 by Bishop Bertrand de l'Isle, and completed in the fifteenth century. The church of St. Sernin of Toulouse was begun by St. Sylvius at the end of the fourth century, and completed by St. Exuperius, who transferred to it the remains of St. Sernin, and later those of St. Papoul and St. Honesta, disciples of St. Sernin, and of the bishops, Saints Honoratus, Hilary, and Sylvius. St. Exuperius himself was buried there. Charlemagne gave to St. Sernin's the bodies of St. Suzanna of Babylon, of St. Ascicla and her sister St. Victoria, martyrs of Cordova. Under Charles the Bald the relics of the *Quattuor Sancti Coronati*, Claudius, Nicostratus, Symphorianus, Castor, and their pupil St. Simplicius, were brought from Rome. The crusaders who in 1096 accompanied Raymond de Saint Gilles to the East brought back the body of St. Barnabas, the head of St. Bartholomew, and perhaps some wood from the Crib or Manger, a stone from the Holy Sepulchre, and a Crucifix known as the Crusaders' Crucifix. In 1187 Guillaume Taillefer deposited there other relics acquired in the East, especially the greater portion of the body of St. George. Louis VIII brought thither the bodies of St. Edmund, King of England, and St. Gilbert, founder of the Gilbertines. The people themselves brought the body of Saint Gilles to save it from the Albigensians. Alphonse, brother of Louis IX, last Count of Toulouse, on his entry to the town in 1251 deposited in the church a thorn from the Crown of Thorns, which Baldwin II, Emperor of Constantinople, had given to St. Louis, and a portion of the True Cross. About 1366 the body of St. Thomas Aquinas, given by Urban V to the Dominicans, was brought to Toulouse, and preserved in their church until the Revolution, when it was transferred to St. Sernin's.

As early as 1100 a confraternity was formed with twelve superintendents and seventy-two *bayles-regents* (guardians), in memory of the number of the Apostles and Disciples; they took oath to watch in turn over the relics. Urban II consecrated St. Sernin's on 8 July, 1097, after it had been restored by the canon, St. Raymond; Callistus II dedicated an altar there and placed in it relics of SS. Peter and Paul, SS. Simon and Jude; Urban VIII granted the same indulgences to those who visited the seven altars of St. Sernin's as could be gained by visiting the seven altars of St. Peter's in Rome. The University of Toulouse was founded in 1229, in consequence of a treaty between Raymond VII, Count of Toulouse, and Blanche of Castile, regent of France; its object was to prevent by higher theological studies a recrudescence of Albigensianism. Raymond VIII had to undertake to maintain in Toulouse at his own expense for ten years a certain number of masters of theology, law, and grammar. In the beginning the university was looked at askance by the people of the South, who considered it an instrument of repression. The teaching of theology was given over to the Mendicant Friars, but the students who wished to take degrees had to pass some time at the University of Paris. John XXII and Innocent VI were students there. In 1329 John XXII reformed its statutes. In 1359 Innocent VI founded the College of St. Martial for the support of twenty poor students at the university; in 1360 he definitively organized a faculty of theology with masters drawn exclusively from among its former pupils, and granted the chancellor authority to confer degrees. This was the university's period of prosperity. The new revision of the statutes after 1394 by a committee nominated by the antipope Clement VII was fatal to it; from the fifteenth century to the end of the *ancien régime* the University of Toulouse merely existed.

In 1751 the University of Cahors was merged into that of Toulouse. It was founded in 1332 by John XXII, a native of Cahors, at the instance of the municipal authorities. The pope granted the new university the rights enjoyed by that of Toulouse, and in fact commanded the latter to communicate its privileges to Cahors. The Bull of erection for Cahors was almost identical with the "Parens Scientiarum" for Paris. The privileges of Cahors were confirmed in 1368 by Edward, Prince of Wales, the "Black Prince", and in 1370 by Louis, Duke of Anjou. The university also enjoyed the favour of Benedict XII, Clement VI, Urban V, Clement VII, and Benedict XIII. In 1460 Pius II ordered a revision of its statutes. The main strength of the university lay in its faculty of law which had as members such noted jurists as Petrus Gregorius (1570), Cujas (1554), and de Lacoste (1594). Of the colleges at Cahors the first was founded by Raymond de Pélegry, canon of London, who provided in his will (1365) for the maintenance of thirteen poor scholars. The College of Rodez was founded in 1371 by Bernard of Rodez, Archbishop of Naples, whose birth-place was Cahors. The College of St. Michel was established (1467) by Jean Rubey, archdeacon of Tormes. Among the students of Cahors the most illustrious was Fénelon, who entered upon his classical course there in 1663. During the eighteenth century the university declined, abuses crept in, especially in the matter of granting degrees. The Irish Seminary at Toulouse was founded in 1659 by Anne of Austria to receive twelve Irish clerical students. The Catholic Institute of Toulouse was founded in 1877 by Archbishop Desprez and completed in 1879 by the addition of a faculty of theology. Cardinal Mathieu suppressed the chair of law, and only retained about a dozen chairs of literary and scientific studies; but under the rectorship of Mgr Batiffol the Institute became, in the early part of the twentieth century, an important centre of sacred studies, and has remained so to this date. Its "Bulletin de littérature ecclésiastique" is highly appreciated in the scientific circles of France.

Toulouse is famous for its *jeux floraux* (floral games). The first meeting dates from early in May, 1324, and was organized by some troubadours. The contest was to laud the Blessed Virgin in a poem. Arnaud Vidal of Castelnaudary was the first to gain a prize. In the fifteenth century the "Clemency" of the Blessed Virgin was the theme of the rival poets; she was styled "Confort del monte Clemensa" (support of the world and clemency). This word "Clemensa" gave rise to a legend which ran that a certain woman named Clémence Isaure had instituted the floral games. Guillaume Benoit, councillor of the Parlement of Toulouse (d. 1520), was the first to put faith in this legend. In 1527 Etienne Dolet wrote a poem on Clémence Isaure; and the municipal magistrates of Toulouse, in order to save some property from taxation, declared it had been given to the city by Clémence Isaure; they even went so far as to erect a statue to her in the capitol of the town in 1557. Castel in 1633 assailed the legend in a very decisive manner, but it died hard: an alleged poem was quoted on the Duguesclin campaign in Spain, in which during the fourteenth century reference is made to a Lady Clémence who was no other than Clémence Isaure; then an ode appeared, said to have been recited in 1499; it has recently been proved that the poem is a seventeenth-century production, and the ode a nineteenth-century forgery. Among the saints specially honoured in or connected with the diocese are: St. Orentius (Orens), Bishop of Auch (fourth century), to whom the inhabitants of Toulouse attribute an important victory they gained in 422; St. Gaudentius (Gaudens) (sixth century), a shepherd lad, beheaded by the Arian Visigoths, who gave his name to the town of Montetavezan, now known as Saint-Gaudens; Saint Vidianus (Vezian), martyred by the Arians in the middle of the sixth century; St. William of Lodève, or Gellon, Count of Toulouse, who died in 812; Blessed Raymond, archdeacon of Toulouse, Blessed Stephen of Narbonne, inquisitor, Blessed Bernard of

Rochefort, and Blessed William Arnauld, all of the Order of Saint Dominic; Blessed Bernard, Bl. Fontanerius, and Bl. Admarus, ecclesiastics, Blessed Garcias and Bl. Peter, laymen, massacred by the Albigensians at Avignon in 1242; the shepherdess St. Germaine Cousin of Pibrac (1579–1601); St. John Francis Regis, who joined the Jesuits at Toulouse at the age of nineteen (1597–1640).

Among natives of the diocese are: William de Nogaret, the famous legist of Philip the Fair (1260–1313), born at St. Felix de Caraman; the Jurisconsult Cujas, born at Toulouse (1522–92); Abbé Sicard (1742–1822), founder of deaf-mute instruction, born at Fousseret. The principal places of pilgrimage are: Notre Dame d'Alet at Montaigut, a shrine dating from the eleventh century; Notre Dame d'Avignonet, which dates from the wonders brought by the statue of the B. Virgin of Avignonet when the church which had been closed for forty years in consequence of the massacres committed by the Albigensians, was once more opened in the thirteenth century; Notre Dame du Bont du Puy at Valentines, a shrine dating from the sixteenth century; Notre Dame de Clary at Cessales, dating from the tenth or eleventh century; Notre Dame de Roqueville at Montgiscard. Prior to the application of the Associations Law of 1901 there were in the Diocese of Toulouse: Augustinians of the Assumption, Olivetans, Capuchins, Jesuits, Dominicans, Lazarists, Trappists, Missionaries of Our Lady of the Sacred Heart, Sulpicians, priests of the Sacred Heart, and various teaching congregations of Brothers. At the close of the nineteenth century, the congregations of nuns had charge of 49 nurseries, 1 school for the blind, 1 school for deaf and dumb, 2 orphanages for boys, 12 orphanages for girls, 4 detention homes, 9 houses of charity, 15 hospitals, 8 district nursing homes, 4 houses of retreat, 2 lunatic asylums. In 1905 at the breach of the Concordat, there were in the Archdiocese of Toulouse 448,481 inhabitants, 44 parishes, 508 auxiliary parishes, and 61 curacies assisted by the State.

Gallia Christiana, nova, I (1715), 1089–1114, *et instr.* 176-181; *nova*, XIII (1785), 1–87, 146–47, 186–99, *et instr.* 1–86, 149–80; DUCHESNE, *Fastes épiscopaux*, II (Paris, 1894–9); DEVIC AND VAISSETE, ed. MOLINIER AND ROSCHACH, *Histoire du Languedoc* (15 vols., Toulouse, 1872–92); SALVAN, *Histoire générale de l'église de Toulouse* (4 vols., Toulouse, 1856–61); CAYRE, *Histoire des évêques et archevêques de Toulouse* (Paris, 1873); VIDAL, *Les origines de la province ecclésiastique de Toulouse* in *Annales du Midi* (Toulouse, 1903); LAHONDÈS, *Toulouse chrétienne, l'église St. Etienne cathédrale de Toulouse* (Toulouse, 1890); DOUAI, *Cartulaire de St. Sernin de Toulouse* (Paris, 1887); BRÉMOND, *Histoire de toutes les saintes reliques conservées dans l'insigne basilique de St. Saturnin* (Toulouse, 1862); GATIEN-ARNOULT, *Histoire de l'université de Toulouse* (Toulouse, 1877–82); MOLINIER, *Etudes sur l'organisation de l'université de Toulouse au XIV^e et XV^e siècle* in DEVIC AND VAISSETE, *Histoire du Languedoc*, VII (Toulouse, 1879), 570–608; MOREL, *Essai historique et pittoresque sur St. Bertrand de Comminges* (Toulouse, 1852); HAROT, *Armorial des évêques de Comminges* (Toulouse, 1909); IDEM, *Armorial des évêques de Rieux* (Toulouse, 1908).

GEORGES GOYAU.

Tournai (Lat. TURNACUM, TORNACUM; Flemish, DOORNIJK), DIOCESE OF (TORNACENSIS), in Belgium. As early as the second half of the third century St. Piat evangelized Tournai; some writers represent him as the first bishop, but this cannot be proved. Towards the end of the third century the Emperor Maximian rekindled the persecutions, and St. Piat suffered martyrdom. The great barbarian invasions began shortly afterwards, and a wave of Germanic paganism mingled with the Roman paganism, to the destruction of all Christian life. This lasted from the end of the third century till the end of the fifth. But with the progress of the Frankish race Clodion established himself at Tournai; Childeric, his successor, died there in 481. St. Remigius profited by the good will of the Frankish monarchy to organize the Catholic hierarchy in the north of Gaul. He confided the Diocese of Arras and Cambrai to St. Vaast (Vedastus), and erected the See of Tournai (c. 500), appointing as its titular Eleutherius. It was probably its character of royal city which secured for Tournai this premature creation, but it soon lost its rank of capital by the departure of the Merovingian court. Nevertheless it kept its own bishops for nearly a century; then about 626 or 627, under the episcopate of St. Achar, the sees of Tournai and Noyon were united, retaining their separate organizations. Tournai then lost the benefit of a privileged situation, and shared the condition of the neighbouring dioceses, such as Boulogne and Thérouanne, Arras and Cambrai, where the same titular held both sees for five hundred years. It was only in 1146 that Tournai received its own bishop.

THE CATHEDRAL OF NOTRE-DAME, TOURNAI

Among its bishops may be mentioned: St. Eleutherius (beginning of sixth century); St. Achar (626–27—1 March, 637–38); St. Eloi (641–60); Simon de Vermandois (1121–46); Walter de Marvis (1219–51), the great founder of schools and hospitals; Etienne (1192–1203), godfather of Louis VII and minister of the queen; Andrea Chini Malpiglia (1334–42), cardinal and papal legate; Guillaume Filastre (1460–73), chancellor of the Golden Fleece; Michel de Warenghien (1283–91), a very learned doctor; Michel d'Esne (1597–1614), the author of several works. During the Spanish domination (1521–1667) the see continued to be occupied by natives of the country, but the capture of Tournai by Louis XIV in 1667 caused it to have as bishops a series of Frenchmen: Gilbert de Choiseul du Plessis-Praslain (1670–89); François de La Salle de Caillebot (1692–1705); Louis Marcel de Coëtlogon (1705–07); François de Beauveau (1708–13). After the Treaty of Utrecht (1713) the French were replaced by Germans: Johann Ernst, Count of Löwenstein-Wertheim (1713–31); Franz Ernst, Count of Salm-Reifferscheid (1731–1770); Wilhelm Florentine, Prince of Salm-Salm (1776–94).

It will be readily understood that the union of the see with Noyon and the removal thither of the seat of the bishopric had favoured the growth of the power of the chapter. The privilege possessed by the chapter under the old régime of being composed only of nobles and scholars necessarily attracted to it those most distinguished for birth and learning. Illustrious names of France and Belgium are inscribed in the registers of the archives or on the tombstones of the cathedral. The cathedral, 439 feet long by 216 feet wide, is surmounted by 5 towers 273 feet high. The nave and transept are Romanesque (twelfth century), and the choir is primary Gothic, begun in 1242 and finished in 1325. Originally the boundaries of the diocese must have been those of the *Civitas Turnacensium* mentioned in the "Notice des Gaules". The prescriptions of councils and the interest of the Church both favoured these boundaries, and they were retained throughout the Middle Ages. The diocese then extended along the left bank of the Schelde from the Scarpe to the North Sea, with the exception of the *Vier-Ambachten* (Hulst, Axel, Bouchaute, and Assenede), which seem to have always belonged to the Diocese of Utrecht. The Schelde thus formed the boundary between the Dioceses of Tournai and Cambrai, cutting in two the towns of Termonde, Ghent, Oudenarde, and Tournai itself. The shore of the North Sea between the Schelde and the Yser was wholly included within the perimeter. On the other side of the Yser was the Diocese of Thérouanne, which bordered Tournai as far as Ypres. There began the Diocese of Arras, which bordered Tournai as far as the confluence of the Scarpe and the Schelde at Mortagne, France. This vast diocese was long divided into three archdeaneries and twelve deaneries. The archdeanery of Bruges comprised the deaneries of Bruges, Ardenbourg, and Oudenbourg; the archdeanery of Ghent, the deaneries of Ghent, Roulers, Oudenarde, and Waes; the archdeanery of Tournai, the deaneries of Tournai, Seclin, Helchin, Lille, and Courtrai.

In 1559 in order to wage more successful war against Protestantism, King Philip II of Spain obtained from Paul IV the erection of a series of new dioceses. The ancient Diocese of Tournai was divided, nearly two-thirds of its territory being taken away. The outlines of the archdeaneries of Bruges and Ghent formed the new dioceses of Bruges and Ghent, and six parishes passed to the new Diocese of Ypres. These conditions lasted until the beginning of the nineteenth century. The French Revolution created the Department of Jemappes, which in 1815 became the Province of Hainault, whose boundaries followed those of the Diocese of Tournai, after a concordat between the plenipotentiaries of Pius VII and the consular government of the republic. The Bishop of Tournai retained only two score of the parishes formerly under his jurisdiction, but he governed on the right bank of the Schelde a number of parishes which, prior to the Revolution, belonged to the Dioceses of Cambrai (302), Namur (50), and Liège (50).

From an engraving dated London, 1802

The Diocese of Tournai, with 1,240,525 inhabitants, has 537 parishes, divided into 33 deaneries: Antoing (21 parishes), Ath (12), Beaumont (17), Beloeil (15), Binche (18), Boussu (18), Celles (14), Charleroi (18), Châtelet (27), Chièvres (23), Chimay (22), Dour (18), Ellezelles (6), Enghien (12), Fontaine-L'Evêque (20), Frasnes-lez-Buissenal (14), Gosselies (20), La Louvière (15), Lens (23), Lessines (12), Leuze (17), Merbes-le-Château (17), Mons (Ste-Elisabeth, 9), Mons (Ste-Waudru, 10), Pâturages (17), Péruvelz (12), Roeulx (16), Seneffe (21), Soignies (11), Templeuve (13), Thuin (16), Tournai (Notre-Dame, 14), Tournai (St-Brice, 13).

Eight diocesan colleges prepare young men for theological studies in a seminary, or for a liberal course in a university.

Herimanni liber de restauratione monasterii Sancti Martini Tornacensis, ed. Waitz, in *Mon. Germ. hist.: Script.*, XIV (Hanover, 1883); Catulle, *Turnacum civitas metropolis et cathedra episcopalis Nerviorum* (Brussels, 1652); Chifflet, *Anastasis Childerici I, Francorum regis, sive thesaurus sepulchralis Tornaci effossus et commentariis illustratus* (Antwerp, 1655); Cousin, *Histoire de Tournay* (2 vols., Douai, 1619–20; 2nd ed., with notes, Tournai 1868); Le Maistre d'Anstaing, *Recherches sur l'histoire et l'architecture de l'église cathédrale de Tournai* (2 vols., Tournai, 1842–43); Vos, *Les dignités et les fonctions de l'ancien chapitre de Notre-Dame de Tournai* (2 vols., Bruges, 1898); Warichez, *Les origines de l'Eglise de Tournai* (Louvain, 1902); Idem, *Etat bénéficial de la Flandre et du Tournaisis au temps de Philippe le Bon* (1455) in *Analectes pour servir à l'histoire ecclésiastique de la Belgique*, XXXV, XXXVI, XXXVII (Louvain, 1909, 1910, 1911); *Bulletins et Mémoires de la société historique et littéraire de Tournai* (51 vols., Tournai, 1845–95).

Tournefort, Joseph Pitton de, French botanist, b. at Aix in Provence, 5 June, 1656; d. at Paris, 28 Dec., 1708. After his school-days at a Jesuit college he studied theology at Aix, but in 1677 he turned his attention entirely to botany. He studied medicine at Montpellier and Barcelona. In 1683 he was made a professor and director at the Jardin des Plantes, Paris; he became later a member of the Academy (1692), a doctor of medicine (1698), and professor of medicine at the Collège de France (1702). Tournefort is recognized as a botanical explorer, and as the author of the artificial system of plants named after him. As a youth he travelled repeatedly through western Europe, exploring particularly the region of the Pyrenees. In 1700–2 he visited the Orient, passing through Greece. The account of this journey, "Relation d'un voyage du Levant" (Paris, 1717), appeared after his death; his work is a classic and was translated into English (1741) and German (1776). He collected 1356 species of plants during this one journey.

Tournefort's system of classifying plants is based on the form of the corolla. Up to about 1750 the system was in high repute, being accepted even by Linnæus, but as research advanced it lost its importance. Of permanent importance are the clear distinction Tournefort makes between genus and species, and the exhaustive analyses of genera which he was the first to draw up and illustrate. Linnæus says of him: "Primus characteres genericos condidit." He expounded his system in his "Eléments de botanique" (3 vols. in 8°, Paris, 1694), containing 451 plates; rewritten in Latin as "Institutiones rei herbariæ" (3 vols., Paris, 1700), with 476 plates (in 1703 a supplement was issued containing thirteen plates; a new edition by Adrien de Jussieu in 1719; English tr., London, 1735, French tr., Lyons, 1797). The "Institutiones" was preceded by a defence of his system which was entitled, "De optima methode instituenda in re herbaria" (Paris, 1697), and by a "Histoire des plantes qui naissent aux environs de Paris" (Paris, 1698), an English translation of which appeared in 1732. A genus with about 120 species, belonging to the family of the Borraginaceæ, was named by Linnæus *Tournefortia*, and still retains this designation.

J. H. Rompel.

Tournély, Honoré, theologian, b. at Antibes, Provence, 28 August, 1658; d. at Paris, 26 Dec., 1729. His parents were poor and obscure, but an uncle, a priest, at Paris invited him to that city and gave him a good education. On completing his philosophical and theological studies, he became a doctor of the Sorbonne in 1686, and two years later was sent by the king to the University of Douai to teach theology. Here he distinguished himself by the brilliance of his lectures and by his zeal in opposing the Jansenists. He was even accused of literary forgeries in order to compromise them, but the proofs of this accusation have never been forthcoming. Four years later he was recalled to Paris, appointed professor of theology at the Sorbonne, made a canon of the Sainte-Chapelle, and given the Abbey of Plainpied (Diocese of Bourges). He taught with unvarying success for twenty-four years and, as at Douai, showed himself the determined opponent of the Jansenists. In return they published pamphlets and multiplied attacks and calumnies to discredit him and his teaching, especially after the publication of the Constitution "Unigenitus", in which Clement XI condemned (8 Sept., 1713) their error as manifested in the "Reflexions morales" of Quesnel (q. v.). Tournély was actively engaged in furthering the acceptance of this Constitution by the assembly of the French clergy, of which he was consultor, and by the faculty of theology, of which he was an influential member. When, after the death of Louis XIV (1 Sept., 1715) and with the connivance of Cardinal Noailles, the Jansenists became masters of the faculty of theology, they expunged from its registers the Bull "Unigenitus" and expelled from its meetings Tournély and a score of his friends among the doctors (Jan., 1716). It was only at the earnest intervention of the regent, the Duke of Orléans, that they were reinstated five years later (Feb., 1721).

Tournély had so far published nothing, at least in his own name, but he is regarded as the author or inspirer of several anonymous works against the Jansenists which appeared at that time. On his retirement he immediately began to revise his lectures and, at the request of Cardinal de Fleury and others, to publish them in 1725. With the common title "Prælectiones theologicæ", he issued in Latin the following treatises in octavo: "On God and His Attributes" (1725); "On grace" (1726); "On the Trinity" (1726); "On the Church" (1726); "On the Sacraments in general" (1726); "On the Incarnation" (1727); "On the Sacraments of Baptism and Confirmation" (1727); "On Penance and Extreme Unction" (1728); "On the Eucharist" (1729); "On Holy Orders" (1729); "On Marriage" (1730). The work passed through several editions, among others those of Paris (16 vols., in 8vo, 1738–40), Venice (16 vols., 8vo, 1731–46), Cologne (10 vols., in fol., 1752–65). Several of these treatises have been abridged for use in seminaries, and they still appear in Tournély's name, but they are in reality the work of Montagne, Robinet, and Collet. Tournély's own work is still so important in extent and value that he may be regarded as one of the most notable theologians of his age. The learned Lafiteau, Bishop of Sisteron, even then declared him "one of the greatest men who has ever been in the Sorbonne", and his works were highly esteemed by St. Alphonsus Liguori. His chief merits are clearness of explanation, elegance of style, deep learning, and orthodoxy; his one defect was Gallicanism, for, like all French theologians of that time, he was a Gallican.
